INTERNATIONAL AEROSPACE ABSTRACTS

ANNUAL

CUMULATED

INDEX

PART 2

SUBJECT INDEX, M – Z

VOLUME 12

JANUARY – DECEMBER

1972

ACCESSION NUMBERS A72-10001 to A72-45794

INTERNATIONAL AEROSPACE ABSTRACTS is prepared and published semimonthly (except June and December, which have three issues) by the Technical Information Service, American Institute of Aeronautics and Astronautics, Inc., for the Institute and the National Aeronautics and Space Administration under Contract No. NASW-2422.

SUBSCRIPTION INFORMATION. Semimonthly issues: United States and Possessions, 1 year, \$110 postpaid; foreign countries, 1 year, \$125 postpaid. Cumulated index volumes: United States and Possessions, 1 year, \$75 postpaid; foreign countries, 1 year, \$90 postpaid.

EDITORIAL OFFICE: 750 Third Avenue, New York, N.Y. 10017. SUBSCRIPTION OFFICES: 750 Third Avenue, New York, N.Y. 10017; Third Avenue and Springtown Road, Alpha, N.J. 08865. Second-class postage paid at Phillipsburg, N.J. Copyright © 1972 by the American Institute of Aeronautics and Astronautics, Inc. (The indexes, however, may be reproduced for any bibliographic purpose.)

INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month.

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Office, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR both utilize identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts as required, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each entry is prefixed by the IAA accession number.
- (2) Index Section. Five indexes are contained in this section: Subject, Personal Author, Contract Number, Meeting Paper and Report Number, and Accession Number. Each index is prefaced by explanatory notes.

Cumulated Indexes

The Semiannual Cumulated Index is issued promptly at the end of the first six months and the Annual Cumulated Index is issued promptly at the end of the twelve-month period.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper and Report Number Index, and E—Accession Number Index.

Indexing Vocabulary

The Preliminary Edition of the NASA THESAURUS (December 1967) (NASA SP-7030) is the authority for the indexing vocabulary that appears in the subject indexes to STAR and IAA. The NASA Thesaurus should be consulted for a total picture of the current indexing vocabulary and associated cross-reference structure. Copies of the NASA Thesaurus may be obtained from the National Technical Information Service or the U.S. Government Printing Office at a price of \$8.50 for the three-volume set. A one-volume NASA THESAURUS ALPHABETICAL UPDATE (September 1971) of 623 pages is available from the National Technical Information Service (NTIS), Springfield, Va. 22151, for \$6.00.

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS and the availability of INTERNATIONAL AEROSPACE ABSTRACTS to organizations having contractual arrangements with NASA may be obtained from the following address:

National Aeronautics and Space Administration
Scientific and Technical Information Office
Attention: Code KSI
Washington, D. C. 20546

Documents announced are available from the AIAA Technical Information Service as follows:

- Paper copies of accessions announced in IAA and STAR and of other documents in the TIS library are available at \$5.00 per document up to a maximum of 20 pages. The charge for each additional page is \$0.25.
- Microfiche of documents announced in IAA are available at the rate of \$1.00 per microfiche on demand. Documents available in this manner are identified by the symbol # following the accession number in the Abstracts Section and in the Meeting Paper and Report Number and the Accession Number Indexes.
- Minimum air-mail postage to foreign countries is \$1.00.
- A number of publications, because of their special characteristics, are available only for reference in the library.

Address all inquiries and requests to:

Technical Information Service
American Institute of Aeronautics
and Astronautics, Inc.
750 Third Avenue, New York, N. Y. 10017

Telephone: 212 TN-7-8300
TWX: 212 867-7265

CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "USE" references (U) direct the user to alternate headings under which material on the subject will be found, for example

COLUMBIUM
U NIOBIUM

2. "NARROWER TERM" references (NT) refer the user to more specific headings in the same subject area, for example

LUMINESCENCE
NT ELECTROLUMINESCENCE

Either a Notation of Content or the actual title of the publication appears under each subject heading. They are listed under several subject headings which provide multiple access to the subject of each accession. The *IAA* accession number is located under and to the right of the NOC or the title. It is preceded by numbers identifying the issue and page of *International Aerospace Abstracts* where the accession is located.

To illustrate:

Issue Number	Page Number	Accession Number
14	p2146	A72-30920

M

M WINGS

U VARIABLE SWEEP WINGS

MACH CONES

Fast hyperbolic MHD flow past point source, considering geometry and disturbances singularities of MHD Mach cones

02 p0266 A72-12369

Holographic interferometry of Mach wave field generation by supersonic turbulent jet, noting visible conical wave front from core edge

13 p1898 A72-29580

Mach stem generation by colliding spherical pressure waves in spark ignited combustible gas, noting simultaneous deflagration wave characteristics

24 p3462 A72-45028

MACH INERTIA PRINCIPLE

Tensor-tensor theory of gravitation, introducing first effect of Mach principle

04 p0573 A72-14905

Earth velocity through microwave background, discussing absolute and relative motion, inertial frame and distant matter distribution and Mach principle

14 p2157 A72-30624

MACH NUMBER

Characteristic scale lengths of stationary ionic collisional shocks in Q device perpendicular to magnetic field, presenting shock thickness variation with Mach number and density

01 p0105 A72-10028

Modified implicit continuous fluid Eulerian technique for numerical solution of time dependent fluid flow for Mach numbers from zero to infinity

01 p0049 A72-10226

X-type pseudoshock at high Mach number compared with lambda-type pseudoshock, discussing loss at duct center by leading shock wave

01 p0050 A72-10397

Shock wave propagation from channel in free space for various Mach numbers, using method of characteristics

02 p0202 A72-11590

Real gas tailored shock tube Mach numbers by analytical method, investigating driver temperature effect

02 p0205 A72-12269

Performance similarity of supersonic axial compressors with gas mixtures of different thermodynamic properties, verifying validity of critical Mach number of rotation

[ONERA, TP NO. 966] 04 p0463 A72-15556

Heat pipe temperature gradient initial conditions for ideal gas model, introducing two phase Mach number for choking phenomena analysis

[AIAA PAPER 72-22] 05 p0749 A72-16913

Finite difference method for transonic airfoil design for wide range of angles of attack and Mach numbers

06 p0755 A72-17629

Surface friction coefficient dependence on Mach number and velocity gradients in adiabatic compressible laminar gas flow

08 p1107 A72-21311

Stable large amplitude high Mach number ion acoustic shocks in collisionless plasma, obtaining electron density as function of time

09 p1364 A72-23445

Mach number distribution along critical streamline in compressed layer in front of cylinder in supersonic flow

10 p1415 A72-23752

Two dimensional shock wave interaction with bends in rectangular duct, showing far wall Mach reflection

10 p1464 A72-23879

Rectangular skin panel vibration modes aerodynamic damping dependence on Mach number, dynamic pressure, mode shape and turbulent boundary layer thickness

[AIAA PAPER 72-402] 11 p1568 A72-25423

Impact probe displacement effects in supersonic turbulent boundary layer in terms of Mach number profiles

11 p1572 A72-26005

Numerical calculation of sonic flow around wing section with rounded leading edges, obtaining Mach number distribution, boundary characteristic shape and velocity field

12 p1751 A72-27181

Electrical conductivity of shock wave produced Xe plasma measured by probe, noting dependence on Mach number

15 p2284 A72-31583

Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number

15 p2179 A72-32017

Transient flow induced in convergent-divergent nozzles by shock front impingement, investigating nozzle shape and Mach number effects on formation process of reflected shock

15 p2179 A72-32143

Precursor photoionization production of ionization onset point equivalent electron number densities, calculating phenomenon occurrence Mach number

15 p2281 A72-32407

Postfrontal ion acoustic shock turbulence as function of Mach number and electron/ion temperature ratio, using particle in cell technique

15 p2281 A72-32424

Study of circular arc airfoils with asymptotic critical Mach number. I

17 p2484 A72-34744

Influence of the angle of attack on the performance of high-deflection stator blades

17 p2484 A72-34889

Calculations of the turbulent boundary layer in supersonic nozzles.

17 p2485 A72-35237

Velocity distribution and Mach number in a supersonic molecular beam of plane symmetry

17 p2486 A72-35423

Performance and limitations of shock tubes with imploding detonation drivers.

21 p3128 A72-40767

On the conditions for the appearance of the Mach effect in the reflection of an oblique shock wave in supersonic flow

21 p3046 A72-41339

Reynolds number and drive power variation with Mach number, pressure and temperature in cryogenic wind tunnel

[AIAA PAPER 72-995] 21 p3040 A72-41581

Aerodynamic characteristics of bodies of revolution with large fineness ratios at Mach numbers ranging from 0.2 to 6.0

22 p3134 A72-42286

Flow equations for axisymmetric compressible conical flow in Busemann nozzle, noting numerical method for integral lines construction for given Mach number

22 p3134 A72-42288

Limit Mach number in a gas undergoing partial dissociation and single ionization

22 p3244 A72-42624

Frequency dependence of axially oscillated nozzles admittance real and imaginary parts for different Mach numbers, convergence angles and curvature radii, comparing theory and experiment

24 p3433 A72-45144

Mach reflection from overexpanded nozzle flows.

24 p3365 A72-45794

MACH-ZEHNDER INTERFEROMETERS

Double beam Mach-Zehnder interferometer, discussing optical element imperfection induced degradation elimination by Moire technique

07 p0985 A72-19406

Superheterodyne radiometers for millimeter and submillimeter waves, using Mach-Zehnder interferometer frequency mixer for parasitic signal suppression

08 p1440 A72-21265

Design of an inexpensive, 30 cm diameter, long path difference interferometer.

17 p2553 A72-34640

A unitized and portable holographic interferometer. [ASME PAPER 72-HT-10]

20 p2927 A72-39681

Interferometric method for measuring electro-optic coefficients in crystals.

21 p3095 A72-40138

MACHINE LEARNING

U LEARNING MACHINES

MACHINE LIFE

U SERVICE LIFE

MACHINE ORIENTED LANGUAGES

NT LANGUAGE PROGRAMMING

Linear and nonlinear material static and dynamic structural analysis using NASTRAN digital computer program with finite element approach
01 p0140 A72-10983

Language for description of onboard control system location and attitude control operations during spacecraft maneuvering
05 p0726 A72-16456

Interactive simulation language-8 for minicomputer and programming procedures for nonlinear differential equations solution, considering integration step size and computational accuracy and speeds
07 p0951 A72-20334

Abstract family of multistorage tape acceptors and associated languages, discussing wedge operation and applications
12 p1787 A72-27675

Machine oriented language for modular computer programming, discussing subprogram composition, conditional addresses and description table structure
19 p2769 A72-38089

Process computation systems, discussing translator programs for conversion of user programs into machine language
21 p3024 A72-41002

MACHINE RECOGNITION

U ARTIFICIAL INTELLIGENCE

MACHINE STORAGE

U COMPUTER STORAGE DEVICES

U CORE STORAGE

MACHINE TOOLS

NT BORING MACHINES

Multilead electrical spark discharge machining for mass production technology, noting carburetor slot cutting and data processing equipment applications
01 p0078 A72-11097

Book on electrochemical machining covering metallurgical effects, electrolytes, tool design, rotating surfaces and operating costs
06 p0821 A72-17819

Numerically controlled machine tools accuracy, discussing feed spindle and displacement/angle measuring system errors determination through angular step transducers and laser interferometer
07 p0955 A72-19684

Large automated tape placement machine tool design and construction for laying up aircraft structures from composite materials
08 p1177 A72-21690

Automatic riveting machine for fuel tight aircraft structures, describing process technique and machine design details and features
09 p1319 A72-22906

Computer controlled electron beam machine for microcircuit fabrication, using digital technique capable of working on complex patterns
10 p1459 A72-23956

Die-casting machine design trends, considering uses of elbow lever and hydraulic systems and programmed control
16 p2399 A72-34142

Numerical control component insertion for missile IC electronic module, tabulating producer-user survey data for designs usage and machine tools
17 p2532 A72-35923

Testing the impact accuracy of the NEK-8 HERF machine
18 p2695 A72-36274

Thermochemical techniques application to corrosion protection of metallic powders, mechanical parts and tools, describing chromizing, chromaluminizing, tantaluminizing and niobiumizing processes
[ONERA, TP NO. 1049] 19 p2817 A72-37769

Mandrel design for the filament winding process
19 p2808 A72-38168

Book - Aluminum brazing handbook
19 p2810 A72-38720

Investigation of the dependence of the smoothness of rectilinear motion in precision-equipment mechanisms on the form of the microrelief of contacting surfaces
24 p3403 A72-45325

MACHINE TRANSLATION

Computer programming for minimization of time required for retranslation with compilers, discussing finite state machine modeling with circulating page loose system
24 p3383 A72-45670

MACHINE-INDEPENDENT PROGRAMS

Computer programming languages, discussing system dependent and problem-oriented languages, ALGOL, FORTRAN and applicability ranges
17 p2523 A72-35444

MACHINERY

Analytical and graphical calculations of stress concentration coefficients and stress gradients in machine parts with recesses and finite depth cuts
01 p0144 A72-11377

Soviet book on structural shape effects of machine parts on durability, covering production, gear transmissions shafts, axles, threaded joints, etc
03 p0364 A72-13966

Optimal synthesis of multiparametric machine systems by LP search/determinate analog of random search/, applying to oscillatory models
06 p0821 A72-17726

Machine parts surface hardening and smoothing by vibrating hard alloy sphere impact at ultrasonic frequency
08 p1176 A72-21050

Machine metals fatigue life, creep theory and stress and strain kinetics in severe environments, formulating physical equations
08 p1246 A72-21805

Design information for machinery to incorporate welding positions and joints, fatigue mechanisms, loads, combined stresses and plate and cast materials properties
09 p1409 A72-23621

Oscillations excitation, proposing models for percussive rotational action machines operation and dog tooth clutches processes
13 p1954 A72-28386

Algorithm for optimal strategy in statistical plant control for machine parts production and assembly, discussing measuring equipment errors effects
13 p1965 A72-29168

Rotating machines self excited lateral vibration and instability avoidance and identification
[ASME PAPER 72-DE-21] 14 p2167 A72-30865

Vibrational diagnostics of operational conditions of machines for wear, design faults and efficiency evaluation
16 p2425 A72-33408

Book - Vibration and acoustic measurement handbook.
21 p3086 A72-41533

Energy balance equation for machine unit with rotating element, noting energy distribution in periodic and nonperiodic operation modes
22 p3181 A72-41857

Russian book - Dynamics and acoustics of machines.
22 p3182 A72-42126

Machine vibration diagnostics and damping, emphasizing filter lattice foundation structures, probability analysis and Bayes formula application
22 p3182 A72-42127

Viscoelastic and active vibration isolators for foundation isolation of polyharmonic vibrational effects of operating machines
22 p3182 A72-42131

Machine elements vibration parameters from dynamic model of planetary gears, noting energy spectrum, correlation and amplitude distribution functions
22 p3182 A72-42132

Material properties, metallurgy, production technology and operational factors effects on machinery structural strength
23 p3347 A72-43733

Conference on Fluid Machinery, 4th, Budapest, Hungary, September 11-16, 1972, Proceedings.
24 p3393 A72-45351

MACHINING

NT CHEMICAL MACHINING

NT ELECTROCHEMICAL MACHINING

NT MILLING [MACHINING]

NT SPARK MACHINING

NT ULTRASONIC MACHINING

Warpage control of large Al alloy forgings machining of jumbo jet components, using packing and storage methods
[SAE PAPER 710801] 01 p0074 A72-10280

Steel and Ti-Al-V alloy surface integrity during various machining methods, considering microstructures, residual stress profiles and fatigue characteristics
[SME PAPER IQ 71-237] 01 p0076 A72-10972

Se and Te additions effects on low carbon steels formability and machinability from metallurgical examination and workability tests
07 p0994 A72-19480

Hardenability and pearlite stage isothermal transformation properties of direct-quenching low Cr case-hardening steels, discussing Mn, Mo and Ni alloying effects on machinability
07 p0995 A72-19571

Electromechanical machining metal removal mechanism based on configurational localization model, relating wear processes to electron exchange and free energy margin decrease
07 p0996 A72-19989

Laser applications in industrial machining and welding, describing theory and operation of optically pumped ruby, glass-Nd, YAG-Nd, Ar and carbon dioxide lasers
07 p1007 A72-20224

Dimensional metal working by material erosion involving stereomechanical energy transmission to surface of nonrigid mechanical body
08 p1173 A72-21027

Metal working by plasma beam in turning machine, applying to high strength alloys
08 p1175 A72-21045

Industrial applications of lasers, considering programmable machining, distance measurement, computer memories, communication, night clubs, machine

shops, aircraft manufacture and tunnel boring machine alignment
08 p1182 A72-21207

German monograph on plasma arc machining and cutting of metallic materials on lathe as function of electric power and torch performance
09 p1317 A72-22327

Heat treatment and machining for distortion control of large Al alloy forgings for DC 10 aircraft
09 p1317 A72-22476

Materials processing with carbon dioxide lasers, noting cutting, welding and hole drilling applications
10 p1485 A72-23969

Electrical discharge machining of zirconium diboride, considering operations and tooling requirements
[AIAA PAPER 72-329] 11 p1637 A72-25365

Transitional microstructure of machined surface layer due to built-up edge disintegration
11 p1638 A72-25508

Hydroplasma metal removal for surface cleaning of heat resistant alloys, using electric contact plasma arc machine
11 p1641 A72-26673

Bending roller adjustment parameters for casing shaping in machining process
11 p1642 A72-26815

Commercially available laser systems applications to welding, drilling, scribing and other machining operations
11 p1652 A72-26984

Surface integrity machining practices application to jet engines production, noting cost reduction and process selection and quality control improvement
[ASM PAPER W 72-27,2] 12 p1862 A72-28163

Combined heat treatment and machining effects on Mg-Nd alloys structure and mechanical properties, noting strain hardening mechanism
14 p2125 A72-31042

Economics of material cutting and removal by plasma torches, presenting cutting rates as function of plate thickness for different materials
15 p2243 A72-31321

Electron beam welding, machining and drilling, discussing technical and economic factors
16 p2399 A72-33540

Precision laser system for micromachining applications, describing optical system
17 p2563 A72-35183

Laser machining of thin films. I - Irradiation characteristics of a focused Q-switched YAG laser beam.
18 p2695 A72-36518

Machining boron-epoxy composites.
19 p2809 A72-38386

Influence of deviations in the shape of the base surface on the precision of turbine blade machining operations
22 p3182 A72-41863

MACROCLIMATE

U CLIMATE

MACROMOLECULES

U MOLECULES

MACROSCOPIC EQUATIONS

Inhomogeneous microstructure elastoplastic medium, examining strain and work in plastic deformation
02 p0293 A72-12427

Wave equations for electromagnetic wave propagation in electron-ion-neutral particle magnetoplasma, using macroscopic approach
12 p1852 A72-27850

MACULAR VISION

U VISION

MAGELLANIC CLOUDS

Papers on Magellanic Clouds covering properties, observational and theoretical approaches, supernovae remnants, color-magnitude diagrams, globular clusters, etc
03 p0424 A72-13251

Stellar photometric observations in Magellanic Clouds, presenting photoelectric sequences in UVB system, interstellar reddening and extinction data
14 p2159 A72-30737

Spectrographic and photometric observations of supergiants and foreground stars, in the direction of the Large Magellanic Cloud.
19 p2858 A72-37855

Magellanic clouds structure and dynamics from optical and radio observations, discussing interconnecting magnetic field existence
19 p2865 A72-38481

A more accurate determination of the structural features of the instability strip of classical Cepheids from Gascoigne's photoelectric data in the Small Magellanic Cloud
21 p3113 A72-41757

Model atmosphere analysis of the A 31a-O supergiant HD 33579 in the Large Magellanic Cloud.
22 p3225 A72-42386

Observation of several X-ray sources in 1970 September.
22 p3219 A72-42554

Gamma radiation of Magellanic Clouds and metagalactic origin of cosmic rays.
23 p3328 A72-43264

- The analysis of the small Magellanic Cloud supergiant HD 7583. 23 p3336 A72-43555
- MAGIC TEES**
Coaxial and stripline wideband microwave hybrid junctions equivalent to magic Tees with improved electrical properties 05 p0636 A72-16344
- MAGMA**
Fractional crystallization and crustal contamination roles in origin of quaternary basaltic magmas from Black Rock Desert Region in Utah 06 p0810 A72-18515
Sr isotope data indication of Glass Mountain rhyolite lava as part of parent silicic magma 11 p1623 A72-26240
Crystallization experiments on Apollo 11 magmas of K and Rb-rich basalt, discussing plagioclase characteristics 11 p1723 A72-26523
Electron microprobe analysis of chromian spinels from Apollo 14 rocks indicating crystallization from high aluminum low iron magma 12 p1865 A72-27113
Morphology and petrography of volcanic ashes. 18 p2685 A72-36222
Mineralogy, petrology and chemistry of lunar rock 12039. 23 p3339 A72-44127
- MAGNESIUM**
NT MAGNESIUM ISOTOPES
Cation distribution observation over nonequivalent lattice sites in shocked orthopyroxene, noting Mg and Fe order-disorder 01 p0053 A72-10293
Impurity diffusion of Ag, Cd, In, Sn and Sb in magnesium single crystals, observing valence effect on activation energy 03 p0378 A72-14254
Molecular oxygen evolution Mn catalyst photoactivation as two-quantum process, discussing kinetic model computer simulation 04 p0484 A72-15740
Mg dispersion hardening techniques, exploring internal oxidation of alloys containing rare earths 07 p1011 A72-19481
Mg ion excitation by electron collision in solar chromosphere studies, calculating scattering cross sections 07 p1081 A72-20234
Electric pulse initiated pyrogen jet sputter igniter consisting of magnesium-fluorocarbon coated bridgwire and pellet enclosed in Mk 1 or 2 gilding metal cup 08 p1221 A72-20774
Visual and motion picture studies of ignition and burning characteristics of Mg particle clusters in flames of gas mixtures 09 p1411 A72-22886
Pressure effect on combustion rate of Mg particles in water vapors 09 p1411 A72-22887
Burning process of low boiling Mg particle moving in relation to gaseous oxidizer, assuming heat and mass transfer occurrence by diffusion-conduction mechanism 09 p1411 A72-22888
Ignition and incendiarity of laser irradiated single micron size Mg particles suspended in stoichiometric methane air mixture 10 p1564 A72-25140
Mg addition effect on high temperature mechanical properties of nickel-alumina alloy, studying particle coarsening mechanism changes 11 p1664 A72-26856
OSO-6 Mg X spectroheliogram data for corona electron density map construction during 7 March 1970 solar eclipse period 13 p2031 A72-29529
Mg filterheliogram comparison with Ca spectroheliogram, noting correlation coefficient between location and intensity of bright features on sun 13 p2045 A72-29708
Magnesium particle combustion in rarefied air during pressure changes, discussing combustion time decrease with pressure increase 14 p2170 A72-30236
Temperature dependent Mg and Fe hyperfine doublets in lunar olivine, indicating slow cooling crystallization 15 p2303 A72-31302
Singly ionized Ca and Mg electron impact broadened resonance lines from rapid scanning Fabry-Perot spectrometer measurements in shock tube generated high temperature plasma 15 p2282 A72-32643
Reaction rate and activation energy of low temperature oxidation of Mg particles in nitrous oxide 16 p2476 A72-32353
Mg ignition in nitrous oxide at 600-800 C, determining induction period as function of particle mass and gas stream temperature 16 p2476 A72-32354
Measurements of the limb darkening in the forbidden MgI line at 4571.1 Å. 17 p2608 A72-35078

- A compact grating spectroheliograph for the MgII resonance lines. 17 p2554 A72-35079
Balloon-borne UV spectrophotometer observation of Mg II resonance doublet at 2795 and 2802 Å in stellar spectra, comparing to Ca II line widths 20 p2965 A72-38907
Mg-Al powder mixtures sintering and coining, describing fabrication procedure, microstructure and mechanical properties 21 p3067 A72-40832
Broadening and shift of magnesium lines by van der Waals interaction with argon atoms and by microfields. 22 p3208 A72-42388
Fabrication and properties of graphite fiber reinforced magnesium. 22 p3193 A72-43035
- MAGNESIUM ALLOYS**
Al-Mg alloy under reverse bending fatigue in aqueous sodium chloride with constant load and potentiostatic control, determining anodic polarization effects on fatigue life 01 p0087 A72-11033
Extruded anodized AlMgSi alloy matrix precipitate surface defects, noting wood grain effect, segregated bands, microstructural stains and heterogeneous zones 01 p0077 A72-11042
Equilibrium state and microhardness of phase diagrams in Mg-rich region of Mg-Nd-Zn system 03 p0370 A72-13185
Grain size effect on age hardened Mg-Zn alloy yield and flow stress, using tensile test and electron and optical microscopy at various temperatures 03 p0374 A72-13716
Mg-Zn alloys precipitation hardening mechanism at various aging stages, considering yield strength increase due to interface dislocations 03 p0374 A72-13717
Magnesium alloys torsional vibration damping correlation with texture orientation resulting from fabrication method 03 p0375 A72-13930
Substructure of cast alloys based on Al-Mg system from electron diffraction microscopy 03 p0377 A72-14023
Portevin-Le Chatelier effect in Al-Mg single crystals during tensile tests, investigating strain rate influence on stress 03 p0378 A72-14257
Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory 05 p0671 A72-15987
Prolonged heatings effect on heat resistant magnesium alloys microstructure and mechanical properties 05 p0680 A72-17208
Accelerated fatigue limits for Al and Mg alloys from transverse bend test data 06 p0827 A72-17398
Interfacial dislocations and failure in tension of directionally solidified Al-Cu-Mg eutectic 07 p1016 A72-19937
Mg alloys compositions, melting points, mechanical properties and applications 09 p1327 A72-22479
Ignition delay time and combustion mechanism of Al-Mg alloys single particles in combustion products of oxidizer-fuel mixture 09 p1373 A72-22885
Extruded dispersion strengthened Mg-MgO alloys microstructure, discussing high temperature creep effect on dislocation structure changes 09 p1328 A72-22984
Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickel eutectic composite over range of solidification rates 09 p1330 A72-23376
Metallographic study of denuded zones from diffusional flow in hydrided Mg superplastic alloy with Zn and Zr 09 p1331 A72-23383
German monograph on transition elements Cr, Mn and Zr influence on Al-Zn-Mg alloys stress corrosion covering electron microscope studies and loop-bending tests 10 p1493 A72-23769
X ray diffraction study of molten Mg-Cd alloy atomic structure, demonstrating existence of Mg-Cd compounds 10 p1497 A72-24678
Stress corrosion crack paths in Al-Zn-Mg alloys, showing normal coincidence with grain boundaries 11 p1652 A72-25289
Mn content effect on mechanical properties and corrosion fatigue and stress corrosion cracking resistance of Al-Mg casting alloys 11 p1658 A72-25850
Prolonged heating effect on heat resistant Mg alloys microstructure and mechanical properties 11 p1660 A72-26143

- Cavitation by creep of Mg alloys, using density measurements and metallurgical examinations 11 p1661 A72-26650
Electron microprobe analysis of solute segregation near grain boundaries in Al-Zn-Mg alloy after quenching and aging heat treatment 13 p1973 A72-28652
Al and AlMg single crystals static recovery and stacking fault energy at 77-500 K in plastic deformation, noting cross slip onset at 500 K 13 p1978 A72-29222
Commercial and laboratory Mg alloys for die and sand casting, high strength and extruding applications 14 p2113 A72-30269
Ultrasound damping in Mg and Al alloys by structural grains and dislocation oscillations during work hardening, recrystallization and oversaturated solid solution decay 14 p2122 A72-30957
Thermal and microstructural analysis of phase interactions in Mg alloys of Mg-Nd-Y system 14 p2124 A72-31028
Phase equilibrium of Mg base solid solutions of Mg-Li-Sn system at 200-500 C, analyzing microstructure, microhardness and electrical resistivity 14 p2124 A72-31029
Composition dependence of ultrasonic velocity in binary Mg base alloys measured by pulse method 14 p2143 A72-31030
Alloying effect on structural transformations and strain hardening during aging of two phase α - β Mg-Li-Zn alloys 14 p2124 A72-31031
Li addition effects on Mg mechanical properties temperature dependence and notch sensitivity of binary Mg-Li alloys 14 p2125 A72-31041
Combined heat treatment and machining effects on Mg-Nd alloys structure and mechanical properties, noting strain hardening mechanism 14 p2125 A72-31042
Volumetric analysis of Th, Zr and Li hydrides precipitation in Mg alloys, determining rate equation and activation energy 15 p2257 A72-32118
Solution kinetics of secondary phases in cast dendritic and nondendritic Mg-Zn and Mg-Zn-Zr alloys, using cylindrical and spherical diffusion models 15 p2257 A72-32119
Mg base alloys precipitation processes studied by electron microscopy, emphasizing Mn precipitation in Mg-Th alloy 16 p2405 A72-32998
Al-Cu-Mg alloys room temperature age hardening, determining effects of tension load up to plastic deformation from measurements of mechanical properties and electrical resistance [DFVLR-SONDDR-188] 16 p2408 A72-33674
Crack propagation in Al-Cu-Mg alloy sheet under vibratory bending loads, noting crack length to loading cycles number relationship 16 p2408 A72-33677
New observations of preprecipitation phenomena in Al-Mg and Al-Mg-Zn alloys 17 p2566 A72-34286
Effect of additions of Cu and Zr on stress corrosion cracking of Al-Mg alloys. 19 p2820 A72-38370
Internal stresses in a superplastic Mg alloy. 20 p2935 A72-39002
Correlation analysis techniques to characterize acoustic emission pulses from Mg alloys, obtaining time varying spectra 20 p2924 A72-39281
Effect of alloying on the decay of an aluminum-magnesium solid solution 20 p2942 A72-39823
Burning of particles of an aluminum-magnesium alloy 20 p2987 A72-40041
Mechanism of high temperature creep of aluminum-magnesium solid solution alloys. 21 p3069 A72-41299
Influence of the cycling frequency and directional anisotropy on the fatigue strength of AMg6BM aluminum-alloy sheet 21 p3070 A72-41356
Investigation of the drop forging process applied to magnesium alloys 22 p3183 A72-42816
Magnesium alloys containing rare-earth metals as materials with special physical properties 22 p3192 A72-42817
Deformable magnesium alloys with scandium and yttrium 22 p3192 A72-42820
Stability of Al₃Mg₂ particles against diffusive coagulation in aluminum-magnesium alloys 23 p3301 A72-43649
Ultrasonic treatment of the MA2-1 alloy during recrystallization 23 p3303 A72-44096
Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibra-

tions, showing test results consistency with materials microdeformation theory 24 p3415 A72-45729

MAGNESIUM COMPOUNDS

NT CHLOROPHYLLS

NT DOLOMITE [MINERAL]

NT ENSTATITE

NT FORSTERITE

NT MAGNESIUM FLUORIDES

NT MAGNESIUM OXIDES

NT TALC

Proton and fluorine nuclear magnetic spin-lattice relaxations due to internal rotations in magnesium fluorosilicate hexahydrate 04 p0564 A72-15636

Composition diagrams and properties of intermetallic compounds of magnesium in binary and ternary systems 15 p2252 A72-31196

MAGNESIUM FLUORIDES

Radiation damage in MgO, ZnO and magnesium fluoride, considering energy dependence and roles of radiolysis and elastic collisions 03 p0404 A72-14088

Heat resistance of magnesium, barium and calcium fluorides as solid lubricants in air, hydrogen and water vapor at 100-1100 C 06 p0836 A72-18433

MAGNESIUM ISOTOPES

Solar MgH isotopic abundance ratios and photospheric lines, correcting previous overestimation for sunspot spectra analyses 07 p1071 A72-19179

MAGNESIUM OXIDES

Radiation damage in MgO, ZnO and magnesium fluoride, considering energy dependence and roles of radiolysis and elastic collisions 03 p0404 A72-14088

Thermal conductivity of aluminum, beryllium and magnesium oxides lattices at high temperatures 06 p0828 A72-17615

Visual observations of wall in turbulent pipe flow, using suspending solid MgO particles 09 p1306 A72-22310

Extruded dispersion strengthened Mg-MgO alloys microstructure, discussing high temperature creep effect on dislocation structure changes 09 p1328 A72-22984

Computer algorithms for scattering functions of condensed aluminum or magnesium oxides in combustion products for various temperatures and particle sizes 11 p1747 A72-26966

Increased volume fraction effect on transverse rupture strength and fracture toughness of hot pressed and annealed composites of polycrystalline magnesium oxide 13 p1980 A72-29828

Dispersed particle shape effect on elastic behavior of magnesium oxide composites at low graphite concentrations 15 p2260 A72-31585

Polycrystalline aluminum and magnesium oxide ceramics fracture strength, considering plastic deformation and twinning role in crack nucleation 23 p3305 A72-43505

MAGNESYN [TRADEMARK]

U SERVOMOTORS

MAGNET COILS

Analysis of cryogenic suspensions for use in spacecraft 22 p3230 A72-42208

MAGNETIC ABSORPTION

U ELECTROMAGNETIC ABSORPTION

MAGNETIC AMPLIFIERS

Push-pull magnetic amplifier circuit operation as variable polarity dc source for electroplating applications 11 p1603 A72-25279

T equivalent circuit magnetic modulator system with split excitation windings on four separate cores magnetized by HF source, noting null drift due to hysteresis 11 p1603 A72-25281

Two stage magnetic operational amplifier transfer function, time constants and control stability conditions, using difference equation approach 11 p1605 A72-26466

MAGNETIC ANNULAR SHOCK TUBES

Current sheet velocity limitation in magnetically driven shock tube with plasma electrodes, examining wall ablation and friction and Hall current effects [AIAA PAPER 72-409] 11 p1695 A72-26160

MAGNETIC ANOMALIES

Geomagnetism, discussing world field distribution, secular variation, paleomagnetism, archaeomagnetism, origin, magnetic anomaly and earth electromagnetic induction 01 p0053 A72-10168

Gravity and magnetic anomalies interpretation in terms of buried spherical bodies, calculating bodies size and depth of burial 01 p0064 A72-11101

Spiral geometry and distribution of global geomagnetic anomalies, discussing ideal liquid motion between concentric spherical surfaces of earth sub-core and core radii 02 p0218 A72-11952

Papers on world geomagnetic survey 1957-1969 covering land, sea, airplane and polar-orbiting geophysical observatory satellite observations, magnetic anomalies and reference field 02 p0219 A72-12080

Geomagnetic storms and anomaly observation by Satellite 1964 83C telemetry data transmission to ground stations network 02 p0219 A72-12083

Ionospheric disturbance in American zone during IGY-IGC, showing latitudinal, annual and diurnal solar variations effects and regional geomagnetic anomaly 06 p0806 A72-17641

Auroral zone electron precipitation events before and at negative magnetic bays onset, presenting balloon recordings of bremsstrahlung X-rays intensity 06 p0808 A72-18092

D region positive ion and electron conductivities and densities measurement by parachute borne blunt probes during 1970-1971 winter anomaly 09 p1376 A72-22373

VLF phase changes due to particle precipitation into geomagnetic anomaly during solar proton events explained by exponential ionospheric models with effective reflecting height 11 p1599 A72-26765

Autocorrelation functions of anomalous magnetic field and earth crust structure of central portion of Arctic Ocean, using sliding energy spectrum method 13 p1946 A72-28589

Spiral geometry and distribution of global geomagnetic anomalies, discussing ideal liquid motion between concentric spherical surfaces of earth sub-core and core radii 13 p1949 A72-29264

Anomalous magnetic and gravitational field models autocorrelation function behavior dependence on circular cylindrical sources depth and spacing 14 p2101 A72-30647

Geomagnetic field multipoles effects on radiation belt particle motion for analysis of true anomalies 15 p2222 A72-31280

Theory of magnetically conjugate transport of cold plasma in the outer low-latitude ionosphere 17 p2548 A72-35218

Drift characteristics of the main eccentric geomagnetic dipole 18 p2689 A72-36872

Possibility of determining the secular variation of geomagnetic field components from the distribution of total-vector modulus variation 18 p2689 A72-36873

Diurnally varying neutral wind effects on lower F region ionization distribution, noting Appleton anomaly disappearance time 19 p2794 A72-38865

Identification of short polarity events by transforming marine magnetic profiles to the pole 20 p2917 A72-39476

ASW aircraft magnetic anomaly detection (MAD)/system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference 22 p3177 A72-42322

Magnetic anomalies in New Guinea-New Zealand region from geomagnetic measurements with proton magnetometer, noting effects of andesite-basalt volcanic processes and nuclear precession signal 23 p3284 A72-43380

Autocorrelation functions of anomalous magnetic field and earth crust structure of central portion of Arctic Ocean, using sliding energy spectrum method 24 p3397 A72-45089

Critical-point anomalies in the electron-paramagnetic-resonance linewidth and in the zero-field relaxation time of antiferromagnets. 24 p3432 A72-45674

MAGNETIC CIRCUITS

Magnetostatic interactions of cylindrical magnetic domain propagation circuits in ferromagnetic overlay without in-plane fields [IEEE PAPER 2,1] 03 p0331 A72-13752

Variable flux reset ferroresonator voltage regulator with adjustable terminal characteristics using magnetic and thyristor circuits [IEEE PAPER 17,1] 03 p0311 A72-13770

Magnetic-transistor master oscillator with digital analog converter as programmer for needed output voltage frequency shifts 07 p0946 A72-19959

YIG-tuned microwave transistor oscillator design and performance, considering resonance phenomena and magnetic circuit effects on applications 08 p1139 A72-20985

Far field radiation pattern from magnetic line source covered with moving uniaxial or isotropic nondispersive dielectric or cold plasma sheaths 08 p1137 A72-21985

Magnetic integrated circuits design and fabrication problems involving branched and logic circuits and solid state structures controlled domains 10 p1448 A72-24279

Magnetic and transistorized magnetic digital-to-analog converters 17 p2529 A72-34768

Contactless relay circuits employing a branched-core magnetic modulator with second-harmonic output 19 p2771 A72-37302

MAGNETIC COILS

Plasma flow interaction with magnetic pulse field barrier from magnetic coil for short plasmoids formation 09 p1362 A72-23211

Trap magnetic system with coil generated field increasing towards periphery, showing radial dependence and acting ponderomotive forces 09 p1363 A72-23215

Superconducting coil design for magnetic suspension of supersonic wind tunnel balance 10 p1460 A72-24760

Electrical loss measurements in superconducting magnets at 60 Hz for Nb-Sn ribbon and Nb-Ti cable and multifilament coils 10 p1460 A72-24760

MAGNETIC COMPASSES

Magnetic compass use in instrument flight conditions, suggesting emergency procedures during aircraft system failures 15 p2238 A72-32212

MAGNETIC CONTROL

Interelectrode gap position control of discharge in coaxial gas heater with arc rotated by magnetic field 02 p0201 A72-12865

SAS-A satellite attitude control and determination systems, discussing momentum wheel development, nutation damper and magnetic torquing 03 p0442 A72-14398

Controlled thermonuclear fusion for space propulsion, discussing magnetic-confinement and laser-plasma fusion engines 04 p0556 A72-14889

Geomagnetic control over latitude variation of total electron content in equatorial ionosphere 04 p0515 A72-14931

Toroidal plasma column in Tokamak systems, discussing field inhomogeneity role in maintaining equilibrium with conducting casing, confirming magnetic field and transformer iron core 04 p0557 A72-15171

Steady state angular motion stability of passive magnetically stabilized satellites, using Liapunov method 05 p0726 A72-16464

Long term spin and misalignment in orbit of Azur satellite with passive magnetic attitude control system 05 p0727 A72-16466

AEROS satellite active magnetic attitude control system, describing magnetometer system, sun and IR earth sensors, spin stabilization and axis and spin rate control torque generation 05 p0727 A72-16473

Magnetic multipole confinement of magnetic field-free He and Ar plasmas in vacuum chamber, observing decay 06 p0854 A72-17505

Misalignment angle of Azur satellite orientation axis relative to geomagnetic field vector 06 p0892 A72-18145

Closed line magnetic confinement device filled with laser produced hydrogen plasma, discussing laser beam high speed numerical control for injected pellet interception [CLEA PAPER 12,1] 07 p1040 A72-19392

Optimal test conditions in magnetoscopic control by electrical system for subsurface defects detection, obtaining tangential magnetic field on carbon steel plates 07 p0991 A72-20421

Hydrogen plasma production, using linearly polarized microwaves with superimposed magnetic field 13 p2010 A72-28683

Variable magnetic baffle as control device for Kaufman electron bombardment ion thrusters with hollow cathode [AIAA PAPER 72-488] 13 p2027 A72-28949

Carrier wave behavior in n-type GaAs slab under crossed dc electric and magnetic fields, investigating traveling space charge amplifier magnetic control 14 p2143 A72-30941

Hybrid low power consumption magnetic/fluidic pulse shortener for fluid logic control circuits consisting of short cylindrical chamber with input and output port 16 p2350 A72-33179

Geomagnetic attitude control of an axisymmetric spinning satellite. 17 p2619 A72-34201

The magnetic control of the lower ionospheric absorption at lower latitudes. 17 p2546 A72-34697

- Pulsed IR laser for heating superdense plasma to high temperature, featuring inertial confinement by use of short duration energy and strong magnetic field
19 p2843 A72-38823
- High-resolution spectroscopy using magnetic-field-tuned semiconductor lasers.
20 p2933 A72-39561
- Pulsed metallic-plasma generators.
20 p2958 A72-39781
- Small oscillations of gravity gradient satellite in circular near-equatorial orbit, discussing operational efficiency of magnetic damping systems
22 p3230 A72-42223
- Compression of high current relativistic electron beams using converging magnetic fields.
23 p3315 A72-43525
- Optimal gyroresonator control in electric oscillating field by HF magnetic Lorentz force in terms of relativistic electron trajectory drifts
23 p3290 A72-44200
- Waves generated in the configuration of a magnetically confined and field-permeated axisymmetric jet.
23 p3322 A72-44307
- Theory of magnetically tunable band-pass filters
23 p3273 A72-44360
- Magnetic control of arc plasma and its application for welding.
24 p3406 A72-44777
- MAGNETIC CORES**
- Ferrite core memory for space flight devices, comparing 1 bit storage capacity power consumption with MOS cell
[DGLR PAPER 71-090] 02 p0196 A72-12734
- Computerized design algorithm for ferrite core memory system, considering cross-temperature effect under worst driving conditions
[IEEE PAPER 11, 8] 03 p0327 A72-13766
- Double shunt feedback controlled ferroresonant voltage regulator using magnetic component with simulated core saturation
[IEEE PAPER 17, 3] 03 p0311 A72-13772
- Polyphase signal generators, using reversed flux region propagation in saturable ring core controlled by switching transistors operation
[IEEE PAPER 17, 5] 03 p0322 A72-13773
- Supermagnetic magnetization and ac core loss temperature dependence under slow temperature cycling in vacuum, noting anomalous Barkhausen effect
04 p0564 A72-15718
- Reliable, economical and easily operated read-only magnetic core storage devices for control computers, discussing design features
10 p1445 A72-24639
- Modulation oscillations in ferromagnetic core-based LF signal generators and frequency doublers, deriving differential equations for converter operation and formulas for static characteristics
13 p1930 A72-29049
- Contactless relay circuits employing a branched-core magnetic modulator with second-harmonic output
19 p2771 A72-37302
- Self-excited parametric oscillations at the second harmonic in a parametric system with a triple-post ferromagnetic core
19 p2774 A72-38586
- MAGNETIC DIFFUSION**
- Magnetic diffusion into moving cylindrical incompressible plasma with radial divergence
10 p1521 A72-24413
- On the diffusion of the perturbing toroidal magnetic field from the core to the mantle.
21 p3048 A72-40501
- MAGNETIC DIPOLES**
- Electric quadrupole to magnetic dipole f-values for CO fourth positive and nitrogen Lyman-Birge-Hopfield systems, using curve of growth method
01 p0103 A72-10092
- Zero relative velocity surfaces in bounded circular three body problem in presence of magnetic dipole, deriving Jacobi integral
01 p0127 A72-10358
- Rotating solar magnetic dipole with 26 7/8 day period from polar geomagnetic and spacecraft interplanetary field observations
02 p0277 A72-11899
- Magnetosphere deformation by solar wind, comparing accuracy of free molecular flow and double dipole models
02 p0218 A72-11948
- Weak dipole magnetic field effect on oscillation frequencies of conducting gaseous polytrope stars, using variational equation
02 p0260 A72-12310
- Rotating dipole sector structure of interplanetary and solar photospheric magnetic fields from spacecraft observations
[AD-740309] 03 p0437 A72-13871
- Electromagnetic pulsar models features and predictions, using rotating neutron stars with strong dipolar magnetic fields
03 p0437 A72-13873

- Geomagnetic dipole field kinematic reversals due to cyclonic convective cell distribution fluctuations in earth core
06 p0807 A72-17895
- Neutral current sheath formation from plane dipole magnetic field extension by plasma flow, discussing solar corona streamers and geomagnetic tail
07 p1039 A72-18914
- Secular geomagnetic dipole moment decrease effect on inner proton belt proton energy distribution, comparing with radial diffusion influences
07 p1058 A72-19159
- Semiconductors cyclotron echo signals from dipole interactions of electrons with alternating magnetic fields, discussing frequency doubling and excitation mechanism
07 p1048 A72-19639
- Two dimensional model for plasma without magnetic field trapped near current sheet end in dipole magnetic field resembling geomagnetic tail
08 p1157 A72-21108
- Power integral method for electric and magnetic dipole antennas vlf/elf radiation patterns in cold magnetoplasma, emphasizing focusing effects of refractive index surface
09 p1279 A72-23009
- Radiation pattern of longitudinal magnetic dipole near circular cylinder parallel to flat screen
10 p1453 A72-24903
- Magnetosphere neutral layer plasma conductivity determination from model of linear magnetic dipole in conducting fluid flow
11 p1622 A72-25945
- Changes in total magnetic energy stored outside earth core accompanying earth dipole field decrease over 60 years period from paleomagnetic measurement
11 p1623 A72-26108
- Magnetospheric midday boundary width dependence on geomagnetic dipole axis orientation, discussing different positions for magnetosphere boundary
11 p1628 A72-26914
- Magnetosphere deformation by solar wind, comparing accuracy of free molecular flow and double dipole models
13 p1949 A72-29260
- Dipolar coordinate system for geomagnetic field dipole approximation in studies of diffusion and heat conduction in F region and outer ionosphere
14 p2102 A72-30652
- Wave pattern of three dimensional hydromagnetic perturbations produced by harmonic magnetic dipole in anisotropic plasma
14 p2102 A72-30661
- Hydromagnetic waves excited by transverse magnetic dipole in finite-conductivity plasma
14 p2102 A72-30662
- Eccentric geomagnetic dipole drift field as function of time dependent parameters, calculating potential components in spherical coordinates
14 p2103 A72-30667
- Magnetic dipole or small current loop over homogeneous flat earth, calculating transient electromagnetic field for airborne remote sensing
15 p2224 A72-31672
- Ionospheric models with constant electron density contours axially symmetrical to earth centered dipole magnetic field, discussing radio ray paths
15 p2230 A72-32263
- Stationary plasma flow interaction with dipole magnetic field to study geophysical phenomena in upper atmosphere
15 p2286 A72-32343
- Electromagnetic radiation frequency spectrum and mean power from accelerated magnetic dipoles in circular and Keplerian orbits, noting implications for pulsars
16 p2453 A72-33285
- Experimental methods for studying interactions between plasma streams and three dimensional magnetic dipole fields
16 p2454 A72-33384
- Magnetic dipole matrix elements for atomic transitions between Zeeman levels at microwave frequencies
17 p2585 A72-35769
- Magnetic dipole field interaction with plasma flow ions, noting qualitative model of solar wind flow past magnetosphere
17 p2593 A72-35905
- Capture zone in noninteracting particles rarefied flow around magnetic dipole with transfer into finite orbits under small perturbations
17 p2593 A72-35906
- Drift characteristics of the main eccentric geomagnetic dipole
18 p2689 A72-36872
- Neutral current sheath formation from plane dipole magnetic field extension by plasma flow, discussing solar corona streamers and geomagnetic tail
20 p2957 A72-39380
- Interaction of a steady plasma flow with a dipole magnetic field in the presence of a radial electric field.
21 p3093 A72-41388

- Earth main magnetic field description by cartography and analytic methods based on dipole or spherical harmonic series representations
23 p3283 A72-43366
- The Z sub e field, some of its properties, and its geophysical informativeness
23 p3283 A72-43373
- Semiconductors cyclotron echo signals from dipole interactions with alternating magnetic fields, discussing frequency doubling and excitation mechanism
24 p3431 A72-44571
- MAGNETIC DISPERSION**
- Annealing effects in plated-wire memory elements, discussing recrystallization in Permalloy films from grain size and magnetic dispersion observations
04 p0504 A72-15716
- Magnetic stress anisotropy field in plated cylindrical Permalloy films, determining relationships to circumferential composition variation, geometry and easy-axis dispersion
04 p0564 A72-15717
- Ion trajectories equations of motion solution for E x B type mass separator, presenting curves for mass species dispersion inside separator channel
10 p1509 A72-23942
- Dispersion signal recording for klystron AFC radio spectrometer by low frequency magnetic field modulation
22 p3175 A72-41900
- Use of the simulation method for the solution of a dispersion problem for the propagation of symmetrical magnetic waves in a rectangular waveguide filled with a nonhomogeneous plasma
23 p3263 A72-43450
- MAGNETIC DISTURBANCES**
- NT MAGNETIC STORMS**
- Equivalent current system from measured geomagnetic disturbance vectors, solving Biot-Savart formula derived nonlinear equations by Newton-Raphson iterative method
01 p0055 A72-10430
- Soviet-French Project Omega for near space disturbance studies, using ground and balloon measurements at conjugate points
01 p0063 A72-11075
- Solar cosmic ray cutoff rigidity increase during polar cap absorption related to geomagnetic perturbation onset
02 p0273 A72-11938
- Chapman uniform electrical conductivity core model for geomagnetic disturbance daily variations due to solar wind, noting error in analysis
02 p0222 A72-12794
- Inner magnetosheath hydromagnetic disturbances, presenting magnetometer data in inclination-declination coordinate system
03 p0348 A72-13510
- Auroral absorption prediction during disturbed conditions in communications as function of frequencies and radio ranges at different geomagnetic time and coordinates
05 p0626 A72-16009
- Upper atmosphere supplementary electron flux data relationship to geomagnetic disturbance obtained from high altitude balloon experiments
05 p0709 A72-16236
- F 1 region ion structure during ionospheric magnetic disturbances by numerical simulation of quiet and disturbed conditions based on electron concentration profiles
05 p0656 A72-16247
- Magnetic perturbations in near polar region and morning-night sectors of auroral oval as function of current sources and modulation by universal time
05 p0657 A72-16276
- Additional high energy electrons flux detection in upper atmosphere after magnetic perturbations
05 p0710 A72-16525
- Magnetic baylike disturbances and multiple midlatitude 6300-A auroral arcs during geomagnetic storm recovery phase and concurrent ionospheric current recovery
05 p0630 A72-16620
- Geomagnetic disturbances morphology, considering development and decay of magnetic storms and appearance of geomagnetic pulsations
06 p0802 A72-17367
- F region electron density variation above North America during geomagnetic disturbance on 28 May 1970
[AD-739792] 07 p0976 A72-19162
- Radio auroral electrojet aspect sensitivity and Farley two stream instability, discussing magnetic field distortion and orthogonal deviation as function of current strength and direction
07 p0976 A72-19163
- High time resolution of low latitude asymmetric disturbances in geomagnetic field by Fourier analysis for substorm activity studies
07 p0976 A72-19165
- Interplanetary origin of magnetospheric electric fields responsible for polar magnetic disturbances
07 p0979 A72-20382

Magnetic disturbance singularities searched for in horizontal intensity, showing field depressions around September 5 07 p0980 A72-20406

Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances 08 p1152 A72-20706

Geomagnetic effect of solar wind rotational discontinuity observed by Explorer 34, noting high latitude nonstationary ionospheric current attenuation and magnetic disturbances 08 p1225 A72-20715

Solar unipolar magnetic regions relation to geomagnetic disturbances variability, discussing 11 year cycle 08 p1155 A72-20808

Geophysical data analysis for high latitude negative geomagnetic disturbances revealing geomagnetic pulsations during auroral arcs passage 08 p1155 A72-20809

Solar wind flux velocity diurnal variations relation to magnetic activity index based on Mariner 2 and 4, Pioneer 6 and Vela satellites data 08 p1226 A72-20821

Interplanetary magnetic field perturbations by solar wind and moon, noting lunar wake anomalies positive correlation with plasma beta value 09 p1387 A72-23003

Solar wind kinetic energy from flare associated solar wind disturbances relation to types 2 and 4 radio bursts, using satellite observations 09 p1378 A72-23399

Equatorial sporadic E sudden disappearance associated with magnetic field depressions, noting irregularities and electron velocities role 10 p1475 A72-24956

Ionospheric and magnetic disturbances effects on short wave radio links, using directional antennas and 1.5-24 MHz frequencies 11 p1594 A72-26279

Interplanetary magnetic field direction and high latitude ionospheric currents in dayside auroral regions, showing plasma drift induced magnetic disturbances 11 p1626 A72-26419

Magnetic disturbances recurrence relationship to even- and odd-numbered sunspot cycles, noting existence of 22-year solar cycle 12 p1803 A72-27773

Cosmic ray diffusion in radial divergent flow of magnetic discontinuities in interplanetary plasma, discussing isotropy in presence of regular magnetic field 13 p2029 A72-28591

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi 13 p1947 A72-28606

Solar cosmic ray cut-off rigidity increase during PCA related to geomagnetic perturbation onset 13 p2030 A72-29250

Ring current and polar electrojet effects on proton auroras oval during magnetic disturbances from H alpha line observation 13 p1952 A72-29659

Hyperfine magnetic field reduction produced in Fe-Cr alloy single crystal by Cr atoms observed by Mossbauer method, proposing spin disturbance mechanism 15 p2293 A72-32230

The perturbation of alternating geomagnetic fields by three-dimensional conductivity inhomogeneities 17 p2545 A72-34350

Auroral motion analysis based on baylike disturbances against quiet field background during polar substorm 17 p2550 A72-35858

Electron profiles during negative magnetic bays in the auroral zone 17 p2551 A72-35860

VLF hiss intensity, polarization, incidence angle and arriving direction observation at Antarctica station during magnetic disturbances 18 p2660 A72-36431

Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances 19 p2790 A72-38334

Quasi-periodic variation in F 2 layer reflected signal field strength, noting predominance during periods with type 4 bursts, auroras and geomagnetic disturbances 19 p2792 A72-38639

The Harang discontinuity in auroral belt ionospheric currents. 20 p2920 A72-39980

Aspect-sensitive reflections from ionization irregularities in the F-region. 22 p3154 A72-42364

Sea level tropospheric pressure distribution persistence correlation to solar corpuscular radiation measured by planetary scale geomagnetic disturbance 22 p3219 A72-42517

Outer magnetosphere near midnight at quiet and disturbed times. 23 p3341 A72-44513

Energy releases in the upper atmosphere during geomagnetic disturbances. 24 p3396 A72-44847

Geomagnetic tail magnetic and electric fields ULF, VLF and ELF fluctuations, considering relationship to substorm processes 24 p3397 A72-44857

Polar cap magnetic field induced by currents along magnetospheric lines of force during polar substorm 24 p3397 A72-45087

Cosmic ray diffusion in radial divergent flow of magnetic discontinuities in interplanetary plasma, discussing isotropy in presence of regular magnetic field 24 p3435 A72-45091

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi 24 p3398 A72-45106

MAGNETIC DOMAINS

Single domain grain distribution deduction method obtained from Neel theory, applying to Apollo 11 lunar dust iron grains 01 p0125 A72-10071

Domain configuration observation of magnetic holograms in oriented MnBi films 03 p0359 A72-13447

Magnetostatic interactions of cylindrical magnetic domain propagation circuits in ferromagnetic overlay without in-plane fields [IEEE PAPER 2,1] 03 p0331 A72-13752

Logic functions for magnetic bubble devices based on interaction of circular magnetic domains in rare earth iron oxides, considering gates for dynamic memory [IEEE PAPER 2,3] 03 p0327 A72-13753

Low birefringent orthoferrites for optical devices, considering improvement in Faraday rotation detection of magnetic domains in single crystal platelets [IEEE PAPER 10,10] 03 p0360 A72-13760

Magnetic domain structure of Ni single crystals after plastic deformation as function of stress induced anisotropy of layer-like dislocations 07 p1020 A72-20411

Magnetic domains in cobalt and cementite observed by electron microscopy, investigating thin film thickness effect on temperature 10 p1496 A72-24088

Bloch walls and Landau domain configurations in iron whiskers from DC to 200 kHz by direct magnetization measurements 11 p1659 A72-25912

Diffraction of a laser beam by domains in yttrium iron garnet. 20 p2933 A72-39521

Gunn effect threshold and domain formation in transverse magnetic fields in indium antimonide. 20 p2960 A72-39566

Bubble and strip magnetic domains creation, annihilation and manipulation in epitaxial magnetic garnet films by laser beam thermal absorption induced local heating 22 p3185 A72-42612

MAGNETIC DRUMS

Error probability distribution of digital data magnetic recording in computer drum memory 16 p2367 A72-33262

Plated wire associative memory elements. 17 p2523 A72-35172

MAGNETIC EFFECTS

NT MAGNETIC RIGIDITY

Transient shock produced plasma flow interactions with transverse magnetic field 01 p0105 A72-10020

Similarity theory for electrostatic and magnetic collisionless shocks at zero ion temperature, using numerical simulation results 01 p0106 A72-10029

HF capacitive discharge plasma resonance under weak transverse magnetic field in vacuum 01 p0106 A72-10041

Rankine vortex conducting gas rotating about cylinder axis, investigating magnetic field effects on transverse waves 01 p0106 A72-10132

Two dimensional plasma under dc magnetic field, investigating thermal equilibrium with Liouville equation and BBGKY hierarchy 01 p0107 A72-10145

Flow characteristics, wave propagation and thermal stability of ferrofluids within uniform magnetic field 01 p0050 A72-10235

Magnetic transformation effect on creep behavior of fcc nickel-cobalt alloy compared with self diffusion data in Curie temperature vicinity 01 p0083 A72-10391

Magnetic declination effect on elevation control of F 2 layer maximum, considering east component of geomagnetic field from Capetown and Canberra observations 01 p0054 A72-10427

Ideally conducting plasma confined in vacuum by circularly polarized magnetic field, investigating MHD instabilities suppression by distributed automatic control system 01 p0109 A72-10503

Magnetic field effects on ruby laser radiation kinetics and spectral composition, studying crystal heating and light emission 01 p0080 A72-10577

Interplanetary magnetic field angular gradient and sectorial effects on solar wind, discussing wind velocity 01 p0118 A72-10583

Midlatitude vhf phase detection of magnetic field aligned ionospheric irregularities 01 p0031 A72-10916

Similarity models of interstellar loop structures, investigating magnetic field and energy losses effects and cosmic ray emission 01 p0131 A72-11011

Magnetoplasmadynamic supersonic ring duct as electromagnetic shock tube or plasma gun, emphasizing plasma flow-magnetic field interaction 01 p0110 A72-11204

MHD boundary layer calculation for conducting fluid along semiinfinite flat plate with transverse magnetic field, deriving momentum and kinetic energy integral equations 01 p0113 A72-11383

Strain gage and manganin pressure gage instrumentation for magnetic driven flyr plate facility [MDAC-WD-1700] 02 p2223 A72-11502

Nonuniform magnetic field effects in MHD slider bearing, showing inertia terms contribution dependence on Hartmann number [ASME PAPER 71-LUB-8] 02 p0235 A72-11533

Electron beam interaction with electromagnetic waves in longitudinal interaction devices during focusing by homogeneous magnetic and periodic electrostatic fields 02 p0189 A72-11564

Periodic magnetic field effects at gun cathode on electron beam focusing stability under nonoptimal conditions 02 p0190 A72-11572

Axisymmetric inviscid compressible transonic flow of electrically conducting, heat nonconducting gas in Laval nozzle in presence of meridional magnetic field, deriving equations for magnetic effects on dynamic flow characteristics 02 p0149 A72-11576

Quantum oscillations of minority Fermi surface carriers as function of magnetic field in Hall effect and thermoelectric power in pressure-annealed pyrolytic graphite 02 p0268 A72-11673

Rarefied plasma hydrodynamic equations for rotational discontinuities in solar wind, discussing magnetic field modulus jumpwise changes 02 p0272 A72-11915

Heat transfer from augmented flames and plasma jets based on magnetically rotated arcs, measuring transfer rate as function of electromagnetic torque 02 p0301 A72-12031

Parallel longitudinal resonant slots in rectangular waveguide broad wall, determining mutual impedance from magnetic field reaction 02 p0173 A72-12109

Viscous friction effects on phonon-electron interactions and dislocation velocity by deformation measurement of metallic crystals under pulsating magnetic fields 02 p0243 A72-12169

Weak dipole magnetic field effect on oscillation frequencies of conducting gaseous polytrope stars, using variational equation 02 p0260 A72-12310

Meteor trail forms diversity explanation from magnetic pressure and Reynolds number and plasma diffusion in magnetic fields, discussing geomagnetic effect on trail shape 02 p0282 A72-12336

Periodic solar flare modulation by pulsating structure, attributing radiation to synchrotron radiation emitted by electrons in magnetic tube embed in solar corona 02 p0274 A72-12412

Coulomb logarithm for hot plasma viscosity coefficient in magnetic field by quantum mechanical unified theory 02 p0267 A72-12770

MHD flow due to impulsive rotation of infinite disk, observing magnetic field strength effects on velocity components and boundary layer displacement thickness 02 p0267 A72-12772

Charged particle motion in strong magnetic field, considering magnetic moment and longitudinal adiabatic invariants 02 p0268 A72-12843

Magnetic field effect on Gunn diode oscillator frequency and output power, discussing strong field domain 02 p0196 A72-12885

Geomagnetic field effect on radar echoes from meteor trains during Geminid shower

03 p0345 A72-12982

Magnetic field role in Ap stars abundance peculiarities model, discussing rotational circulation, convection, accretion and mass loss effects on surface

03 p0416 A72-13010

Conducting fluid steady MHD pipe flow under transverse magnetic field, obtaining mass flow rate

03 p0394 A72-13241

Magnetic splitting of lines dependence on Paschen-Back effect for Li resonance doublet in sunspots

03 p0427 A72-13293

Filamentary magnetic structure production on plasma current sheath of coaxial deuterium operated accelerator for laboratory observations of solar flare processes

03 p0411 A72-13338

Coronal rotation determination by spectroscopic method for mean rotation rate vs heliographic latitude, confirming high latitude phenomena dependence of low latitude magnetic fields

03 p0432 A72-13352

Equilibrium state linear theta pinch plasma confinement dependence on nonuniform magnetic force lines curvature radius

03 p0396 A72-13655

Moving plasma beam capture by transverse magnetic field due to polarization space charges electrostatic separation

03 p0396 A72-13657

Microwave propagation through laminated metallic media with gyromagnetic effects, applying dc magnetizing field normal to film plate [IEEE PAPER 31,6]

03 p0323 A72-13784

Potentials, currents and velocity variation of rotating conducting disk system in liquid metal medium under uniform longitudinal magnetic field

03 p0397 A72-13996

Annular MHD channel laminar flow generation at supercritical Reynolds numbers by strong magnetic fields

03 p0398 A72-14005

Visual investigation of semibounded axisymmetric MHD flow of liquid eutectic K-Na alloy under strong magnetic field effect

03 p0399 A72-14014

Second harmonic generation, coherence lengths and second order susceptibilities near band edge in InSb as function of magnetic field

03 p0404 A72-14269

Absorption effects on circular polarization in synchrotron radiation, discussing frequency and magnetic field dependence

04 p0570 A72-14550

Uniform normal magnetic field effect upon MHD free convection from vertical wall with instantaneous heat source, considering shear stress

04 p0556 A72-14856

Interstellar electron density and magnetic field fluctuations effects on Faraday rotation and signal dispersion measure in radio band

04 p0487 A72-14901

Geomagnetic effects on lower ionosphere at lower midlatitude station, discussing long wave propagation

04 p0516 A72-14939

Planetary magnetic activity effects on hf cosmic noise absorption measurements at low and temperature latitudes

04 p0516 A72-14941

Ionospheric plasma drift instability, showing electric and magnetic fields, electron density and temperature effects

04 p0517 A72-14956

Finite Larmor radius effect on Rayleigh-Taylor plasma instability in vertical magnetic field, characterizing solution by variational principle

04 p0557 A72-15022

Nonuniform radial electric field effects on low beta magnetized plasma column stability from numerical analysis for weakly collisional regime

04 p0557 A72-15023

Time dependent hydromagnetic oscillations in contained rotating conducting fluid under magnetic field, using interior boundary layer expansion

04 p0549 A72-15115

Longitudinal ultrasonic sound attenuation in superconducting Mo-Re alloys as function of temperature, magnetic field and frequency, using evaporated thin film Cds transducers

04 p0562 A72-15295

Cylindrical grid-like antenna in anisotropic compressible homogeneous plasma, obtaining magnetic field effects on wave dispersion by numerical solution

04 p0488 A72-15306

Conducting incompressible fluid in laminar pipe flow under traveling magnetic field, investigating friction coefficient and energy balance

04 p0558 A72-15341

Magnetic field effect on heat transfer in steady plane laminar conducting incompressible viscoelastic liquid flow in channel with nonconducting walls

04 p0560 A72-15580

Magnetic damping comparison with internal viscous damping effect on circulatory elastic system equilibrium stability

05 p0689 A72-16061

Electrical conduction in orthogonal coordinates from nondipole geomagnetic field effect on conductivity tensor of ionospheric dynamo region

05 p0657 A72-16260

Magnetic storm disturbing effect on integral electron density in F2 layer and in topside ionosphere

05 p0657 A72-16262

Lower ionospheric currents fields, determining Hall conductivity and geomagnetic lines of force slope effects

05 p0657 A72-16266

Intestinal disbarteriosis and autoinfection occurrence in guinea pigs and rats under magnetic field effect, noting Escherichia population changes

05 p0622 A72-16647

Parallel and perpendicular magnetic field effects on optically injected electron-hole plasma diffusion in Ge from density measurement by infrared beam absorption technique

05 p0702 A72-17167

MHD flow of viscous fluid between two oscillating flat plates, observing velocity damping by magnetic field

05 p0699 A72-17179

Moderate Hartmann number MHD duct flow with applied transverse magnetic field, using numerical methods

06 p0859 A72-17619

Electron density distribution inhomogeneities from vhf Faraday rotation measurements, noting diurnal, seasonal, sunspot cycle and geomagnetic activity effects

06 p0806 A72-17642

Plane supersonic ionizing shock wave in magnetic field under small wave plane perturbation from equilibrium position, calculating stability from linearized equations

06 p0798 A72-17678

Force-free magnetic fields effects on plasma column stability

06 p0860 A72-17744

Stability of weakly ionized homogeneous plasma placed in weak microwave field and in constant magnetic field, expressing growth increments of longitudinal waves

06 p0861 A72-17902

Transverse ionizing shock waves in gaseous hydrogen at speeds to 4000 km/sec, presenting magnetic shock structure and magnetic field jump measurements [AD-738620]

06 p0863 A72-18531

Magnetic effects on Lorentz plasma collision processes, calculating electron distribution function in presence of strong arbitrarily oriented magnetic and weak electric fields

06 p0864 A72-18535

Shear layer finite thickness and magnetic field effects on Kelvin-Helmholtz MHD instability of earth magnetopause boundary [AD-746435]

07 p0974 A72-18892

Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory

07 p1047 A72-18918

Pulsar dynamics and electrodynamics for power derivation from rotational energy, discussing toroidal magnetic field induced nonhydrostatic stress in neutron star

07 p1068 A72-19001

Pitch angle distributions of energetic protons for different geomagnetic activity levels as function of invariant latitude and magnetic local time from ESRO IB satellite measurements

07 p1057 A72-19141

Sound velocity and attenuation variations with magnetic field from ultrasonic continuous wave spectrometry

07 p0984 A72-19321

Magnetic bremsstrahlung energy straggling and radiation reaction, calculating particle and emitted photon distribution

07 p1037 A72-19668

Temperature pulsation spectra of turbulent mercury flow in horizontal pipe at various Reynolds numbers, showing dependence on magnetic field

07 p1100 A72-19882

Reverse deflection and contraction of collisionless plasma beam during motion along curved magnetic field lines

07 p0979 A72-20378

Duskside magnetic activity relationship with bulge detection by whistler method, investigating plasmopause deformation

07 p0979 A72-20381

Plasma lf waves nonlinear spectral broadening in magnetic field based on degeneracy splitting

07 p1045 A72-20443

Refraction of electromagnetic wave with electric field perpendicular to applied magnetic field in anisotropic plasma cylinder cross section

07 p1046 A72-20507

He-Ne laser discharge gap oscillation modes observation, noting applied magnetic field, gas parameters and cathode type effects on stimulated emission

07 p1008 A72-20510

Geomagnetic effect of solar wind rotational discontinuity observed by Explorer 34, noting high latitude nonstationary ionospheric current attenuation and magnetic disturbances

08 p1225 A72-20715

Atmospherical model for plasma motion along surface of geomagnetic tail under action of interplanetary, magnetic lines of forces

08 p1153 A72-20722

Outer radiation belt parameters dependence on interplanetary magnetic field sectorial structure and solar wind velocity

08 p1226 A72-20811

Intraband multiphoton conduction-electron transfer probability in semiconductor under electromagnetic wave action in uniform magnetic field

08 p1216 A72-21066

Magnetic field effect on elf radio wave attenuation during propagation under six ionospheres, showing dependence of minimum on propagation path geomagnetic latitude

08 p1131 A72-21103

Steady state problem of energy spectrum of variable magnetic field accelerated electrons, considering synchrotron X ray emission of Crab pulsar and nebula

08 p1231 A72-21119

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamics equations

08 p1240 A72-21140

Induced nonuniform magnetic field effects on MHD channel flow between two infinite parallel plates, obtaining solution by perturbation theory

08 p1214 A72-21427

MGD equations for ideal plasma steady plane adiabatic flow in magnetic field, considering analogy to Chaplygin equations

08 p1214 A72-21645

Supersonic plasma flow in narrow rectangular channel and free incompressible inviscid conducting liquid jet motion within pulsating transverse magnetic field

08 p1214 A72-21652

Stagnation conditions of magnetoradiative supersonic flow through shock waves for temperature dependent specific heat parameter

08 p1255 A72-21795

Electron plasma fluctuations in semiconductor with nonparabolic conduction band under external electric and magnetic fields

08 p1218 A72-21877

Magnetic field effect on gain saturation in CW Ar laser associated with Zeeman splitting

08 p1184 A72-22036

Microwave induced dc voltages across unbiased Josephson tunnel junctions, showing power spectra dependence on magnetic field

09 p1367 A72-22458

Rotating stellar system with stars and interstellar gas within magnetic field, discussing gravitational and magnetic effects on gas pressure

09 p1384 A72-22511

Geomagnetic field effects on initially spherically symmetric ion cloud diffusive motion in earth upper atmosphere

09 p1297 A72-22577

MHD stability problems in radio galaxy structure and cosmic ray interaction with magnetic fields

09 p1386 A72-22751

Inhomogeneous superconductors and proximity effects, calculating conditions for vortex lattice pinning energy as increasing function of magnetic field and temperature

09 p1370 A72-22798

Hydrodynamic stability of electrically conducting hot viscous fluid surrounded by perfectly conducting rigid boundary in presence of magnetic field

09 p1359 A72-22825

Short plasmoids production in hydrogen plasma jets by applying pulsed multipole magnetic field generated in linear quadrupole system

09 p1362 A72-23203

Magnetic field effect on threshold pressure reduction for He and Ar gas breakdown by carbon dioxide laser radiation, taking into account inhibition of radial electron diffusion [AD-741539]

09 p1365 A72-23493

Perfectly conducting incompressible fluid motion past thin body in oblique field, discussing magnetic field influence on lift

09 p1365 A72-23559

Strong magnetic fields and electric current densities effects on acoustic oscillations and instability in stationary inhomogeneous low temperature plasma flow in crossed fields

10 p1517 A72-23838

- Input impedance of plane antenna immersed in plasma within magnetic field and propagating sheath waves 10 p1520 A72-24132
- Electromagnetic waves penetration through magnetized plasma into lower hybrid resonance region examined in geometrical optics approximation 10 p1521 A72-24352
- Dislocation structure analysis in ferromagnetic materials by magnetic techniques, discussing methods based on magnetization curve static properties and magnetic relaxation phenomena 10 p1487 A72-24574
- Cosmic ray ionization rate for hydrogen calculated for ambipolar diffusion efficiency in decoupling magnetic flux from gas during cloud collapse with angular momentum 10 p1544 A72-24664
- Combined plasma and magnetic field cumulation due to heavy conducting liner implosion, noting compression parameters for plane and cylindrical bodies 10 p1523 A72-24723
- Magnetic simulation of gravity for wind tunnel investigations of aircraft jetison processes, considering Froude number and relationships between model and full scale aircraft 10 p1462 A72-24775
- Linear wave dispersion in homogeneous beam plasma system, considering pressure anisotropies generated by external magnetic field 10 p1524 A72-24927
- Magnetometers for balloon-borne X ray astronomy payload azimuth determination, noting misorientation, earth and spurious magnetic fields effects on measurement effectiveness 10 p1530 A72-24954
- Sporadic E layer variations monitoring in 50 MHz band, examining diurnal, seasonal, magnetic and meteoroid showers relationships of oblique incidence paths 10 p1441 A72-25152
- Uniform and parallel magnetic field effects on hydromagnetic instability of two dimensional jet at small magnetic Reynolds numbers 11 p1693 A72-25521
- Small gap approximation for axial magnetic field effects on stability of nonrotationally symmetric disturbances in inviscid flow between concentric rotating cylinders 11 p1694 A72-25773
- Plasma equilibrium configurations, considering magnetically contained focus in external magnetic field 11 p1694 A72-25788
- Astronomical models of solar wind interaction with interstellar medium, determining magnetic field effects on shock wave 11 p1713 A72-25946
- Magnetic phenomena effects on superconductivity in simple and transition metals and dilute rare earth alloys 11 p1701 A72-26025
- Quasi-steady operation establishment in pulsed MPD arc jet, investigating ion density radial distribution and initial tank pressure and magnetic field effects on plasma front arrival [ALAA PAPER 72-496] 11 p1696 A72-26219
- Solenoid-produced local axial magnetic field influence on beat signal frequency characteristics in ring laser with nearly linearly polarized emission 11 p1650 A72-26357
- Rare gas ion laser excited by electrodeless microwave discharges, noting external magnetic field effects on output 11 p1651 A72-26571
- Ni powder artificial dielectric in waveguide transverse magnetic field, noting nonreciprocal nature of microwave attenuation and phase shift 11 p1607 A72-26786
- Magnetospheric midday boundary width dependence on geomagnetic dipole axis orientation, discussing different positions for magnetosphere boundary 11 p1628 A72-26914
- Predawn effect on hot and cold electrons at magnetoconjugate point in F 2 layer, discussing electron shock wave speed and thermal collisionless wave energy dissipation 11 p1628 A72-26916
- Magnetic field gradient in sunspot umbrae from magnetically split line profiles 12 p1867 A72-27206
- Unsteady viscous incompressible electrically conducting fluid flow generated by porous disk rotation, investigating transverse magnetic field effect 12 p1851 A72-27305
- Localized magnetic field for wind tunnel wall-plasma heat transfer minimization, preserving flow characteristics 12 p1852 A72-27684
- Remanent lunar magnetic field compression by solar wind from magnetic measurements at Apollo landing sites 12 p1871 A72-27691
- Magnetic field effect on ruby laser generated plasma in solid target, measuring thermal ion energy increase 12 p1852 A72-27879
- Geomagnetic field perturbation biological effects, studying geomagnetic storm field energy levels and magnetic flux variables relation to human sensitivity thresholds 12 p1773 A72-28210
- Magnetic storm strength ELF electromagnetic field effects on rabbits, dogs and bacteria, discussing changes in EEG, ECG and blood characteristics 12 p1763 A72-28214
- Signal propagation along homogeneous drifting electron beam focused by strong magnetic field, obtaining phase velocity and space charge density 13 p1914 A72-28373
- Plasma heating by HF electrostatic instabilities excitation with current across external magnetic field, estimating turbulence, ion collision frequencies and ion heating rates 13 p2009 A72-28426
- External magnetic field effect on two frequency quadrupole spin echo in polycrystalline specimen 13 p1915 A72-28473
- Probe triggered audio frequency plasma oscillation period dependence on applied magnetic field and discharge current 13 p2010 A72-28544
- Meteor-induced magnetic effect on cosmic ray intensity for meteor streams with orbits normal or parallel to interplanetary magnetic field lines of force 13 p2029 A72-28592
- Local perturbation generated waves in homogeneous plasma at rest subjected to uniform magnetic field 13 p2010 A72-28680
- Electromagnetic wave propagation in cylindrical plasma column of electrons and ions with and without applied uniform magnetic field in absence of collisions 13 p2010 A72-28681
- Effect of magnetic field superimposed on turbulent shear flow of electrically conducting fluid, discussing turbulent friction in plane flow 13 p2010 A72-28764
- Uniform vertical magnetic field effect on Ekman layer over horizontal plate at rest relative to rotating conducting liquid 13 p2011 A72-29006
- Meteor trail forms diversity explanation from magnetic pressure and Reynolds number and plasma diffusion in magnetic fields, discussing geomagnetic effect on trail shape 13 p2039 A72-29220
- Hall currents effect on unsteady MHD flow of electrically conducting fluid past flat plate imbedded in uniform external transverse magnetic field 13 p2012 A72-29225
- Rarefied plasma hydrodynamic equations for rotational discontinuities in solar wind, discussing magnetic field modulus jumpwise changes 13 p2030 A72-29227
- O-type synchronous electron beam waves interaction with electrostatically structured traveling wave, noting linear gain dependence on beam current and magnetic field 13 p1931 A72-29291
- Fluctuating electric current induced magnetic field effects on long wave nonequilibrium plasma instability associated with large scale closed cycle MHD generators 13 p2014 A72-29370
- Electroacoustomagnetic and Hall effects in semiconductors within strong electric field involving phonon production by supersonic electron drift 13 p2022 A72-29437
- Alternating magnetic field effect on collisionless nonhomogeneous magnetoplasma ion acoustic oscillations stability, examining parametric excitation of Langmuir oscillations 13 p2016 A72-29604
- Transverse magnetic field effect on electron temperature and energy distribution and spectral lines of gas discharge plasma 13 p2017 A72-29635
- VLF long distance radio propagation in earth-ionosphere waveguide, considering earth magnetic field effects in mode conversion and refraction error calculation 13 p1922 A72-29655
- Low temperature homogeneous plasma electric conductivity in magnetic field, noting monotonic decrease 13 p2018 A72-29892
- Visible light flash emission due to strong shock wave of laser spark, investigating strong external magnetic field effect and time variation of luminous intensity 13 p1972 A72-29983
- Density and electric field oscillations of plasma in stellarator, considering magnetic field strength effect, stabilization by ionic collisions and energy pumping mechanism 13 p2019 A72-29985
- Tangential MHD discontinuity stability for ideally conducting compressible fluid in magnetic and gravitational fields 13 p2020 A72-30068
- Range and frequency spread F diurnal and seasonal variations at magnetic equatorial station Thumba, noting geomagnetic activity effect 14 p2097 A72-30130
- He and Ar plasma transport by magnetic fields after expulsion from pulsed linear discharge 14 p2135 A72-30167
- Plasma capture by stellarator diverter magnetic field, noting stream length controllability by field pulse duration 14 p2135 A72-30168
- Sunspot formation due to magnetic flux concentration in active region and formation of invisible pores with suppressed granular motion 14 p2148 A72-30205
- Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies 14 p2137 A72-30311
- Experimental investigation of electrostatic cyclotron harmonic waves excited in inhomogeneous plasma column with axial magnetic field by RF capacitor field 14 p2138 A72-30398
- Cylindrical model of interplanetary magnetic field-moon interaction, taking into account solar wind flow boundary condition asymmetries 14 p2154 A72-30514
- Magnetic and electric field effects on steady state laminar MHD Couette flow of non-Newtonian fluids governed by Prandtl rheological law or Ostwald-de Waele power law 14 p2139 A72-30717
- Dc arc plasma, investigating applied magnetic field, trace elements and gap spacing effects on spectral line intensity spatial distribution 14 p2139 A72-30783
- Weber experiment gravitational signals correlation to solar and geomagnetic activity and cosmic ray intensity 14 p2160 A72-30886
- Uniform rotation and magnetic field effects on gravitational stability of interface between two semi-infinite homogeneous streams 15 p2284 A72-31593
- Transverse magnetic field effects on n-type GaAs Gunn diodes microwave power, coherence and dynamic I-V characteristics [ONERA, TP NO. 1051] 15 p2207 A72-31884
- Falkner-Skan problem extension to MHD flow past nonconducting body by imposing magnetic field with lines of force parallel to undisturbed streamlines 15 p2287 A72-32405
- Induced magnetic field effects on MHD flow between rotating coaxial [insulator/ cylinders, obtaining exact solution and graphical results 15 p2288 A72-32420
- Fast pressure gage with protection against magnetized plasma parasitic effects to measure neutral pressure 15 p2241 A72-32439
- Spectroscopic analysis of condensations density and intensity variations in solar eruptive prominences, discussing hypothetical magnetic field effects 15 p2318 A72-32781
- Quasi-linear approximation of absorption of oscillations excited by electron beam in nonuniform plasma, noting electron distribution change with heating under magnetic field 16 p2432 A72-32807
- Thermonuclear microexplosion ignition by bombarding dense target with intense relativistic electron beam, noting energy requirement reduction by self magnetic beam field 16 p2433 A72-32814
- Cylindrical antenna immersed in weakly ionized magnetoplasma, calculating steady magnetic field effect on electromagnetic and electroacoustic radiation resistances 16 p2434 A72-32860
- Quantum mechanics framework for electron movement perpendicular to intense magnetic field, predicting energy broadening with time for initially monoenergetic electron beam 16 p2422 A72-32881
- Shock wave generation by high current pulsed discharges, determining shock front velocity as function of magnetic pressure on current sheath 16 p2434 A72-32909
- Low energy outer zone electrons high latitude boundary variation with interplanetary magnetic field direction and with geomagnetic activity from Alouette and Explorer data 16 p2382 A72-32957
- Magnetic field effect on finite amplitude convection in fluids complying with Boussinesq approximation, discussing maximum Nusselt number shift 16 p2452 A72-33039
- Ionospheric electron content semiannual and seasonal variations as function of solar and geomagnetic activity from low and mid-northern latitude observations 16 p2385 A72-33378
- Magnetic field effect on polarization plane rotation and emission frequency shift of He-Ne ring laser at 3.39 micron wavelength 16 p2402 A72-33485

Plane hydromagnetic wave propagation in rotating fluid permeated by variable magnitude and direction magnetic field, observing wave-associated critical level

16 p2436 A72-33567

Solenoid-produced local axial magnetic field influence on beat signal frequency characteristics in ring laser with nearly linearly polarized emission

16 p2403 A72-33710

Cosmic ray isotopic data extraction via geomagnetic field, discussing magnetic effects on particle flux and finite resolution limitations of counters

16 p2447 A72-33728

Magnetic field effect on ruby laser generated plasma in solid target, measuring thermal ion energy increase

16 p2439 A72-33988

Magnetogasdynamic heat transfer to hemispherical body in supersonic low density plasma, noting magnetic field effects on heat flux

[AIAA PAPER 72-686] 16 p2346 A72-34056

Magnetoelastic buckling of beams and thin plates of magnetically soft material.

[ASME PAPER 72-APM-35] 17 p2624 A72-34311

Superconductivity.

17 p2594 A72-34565

Effect of a transverse magnetic field on the operation of a thermionic converter under undercompensated Knudsen conditions.

17 p2497 A72-34862

Electromagnetic waves penetration through magnetized plasma into lower hybrid resonance region examined in geometrical optics approximation

17 p2589 A72-34953

Russian book - Effect of magnetic fields on biological objects

17 p2502 A72-35001

Physical phenomena occurring in living objects under the action of constant magnetic fields

17 p2502 A72-35002

Magnetic field effects in enzymes, tissue respiration and some metabolism characteristics of an intact organism

17 p2503 A72-35003

Effects of magnetic fields on microorganisms

17 p2503 A72-35004

Mechanism of the biological action of a constant magnetic field

17 p2503 A72-35005

Action of a constant magnetic field on plant growth

17 p2503 A72-35006

Influence of a magnetic field on radiation-induced chromosome aberrations in plants

17 p2503 A72-35007

Pathologic-anatomic characterization of changes induced by magnetic fields in experimental animals

17 p2503 A72-35008

The magnetic field, infection and immunity

17 p2503 A72-35009

Effect of a magnetic field on the nervous system

17 p2503 A72-35010

Effect of a magnetic field on experimental tumors /direct and via nervous system/

17 p2503 A72-35011

Clinical hygienic and experimental data on magnetic field effects under working conditions

17 p2503 A72-35012

Methodical and methodological characteristics of a magneto-biological experiment

17 p2503 A72-35013

Generalization of basic equations of aerodynamics and electrodynamics.

17 p2539 A72-35043

Geomagnetically trapped alpha particles. I - Off-equator particles in the outer zone.

17 p2548 A72-35595

Geomagnetic effect on the neutral temperature of the F region during the magnetic storm of September 1969.

17 p2549 A72-35603

Transverse magnetic field effects on cylindrical hollow cathode discharge voltage-current characteristics, noting sustaining potential and recombination probability changes

17 p2593 A72-35886

Motion of a sphere in an electrically conducting rotating fluid.

18 p2714 A72-36123

The influence of magnetic pressure on the performance of a high-current discharge thermionic converter

18 p2646 A72-36195

The influence of a nonuniform transversal magnetic field on the power output of a gas laser.

18 p2715 A72-36338

On disturbances in a viscoelastic rod /of variable cross-section/ of Reiss type placed in a magnetic field.

18 p2711 A72-36752

Radial vibration of a composite cylindrical shell subjected to a magnetic field.

18 p2711 A72-36753

On axisymmetric vibration in a transversely isotropic finite cylindrical shell acted upon by a magnetic field.

18 p2711 A72-36755

Fast magnetoacoustic wave interaction with shock wave propagating in ideal electrically conducting gas, showing magnetic field stabilizing effect

18 p2711 A72-36812

Dependence of sporadic ionization in the high-latitude ionospheric E-region on magnetic activity

18 p2688 A72-36860

Lunar electrical conductivity.

18 p2729 A72-37000

Longitudinal waves in a perpendicular collisionless plasma shock. IV - Gradient B.

19 p2838 A72-37329

Beam-defocusing effect due to filament magnetic fields in electron guns of electron linear accelerators.

19 p2772 A72-37404

Permanent rotations of an equatorial satellite in the geomagnetic field

19 p2869 A72-37437

Effect of magnetic field on the performance of millimeter-wave detectors using bulk InSb.

19 p2772 A72-37570

Energy exchange processes in solar flares, noting initial derivation of energy from changing magnetic fields within solar atmosphere

19 p2850 A72-37782

Equations for electron and high-energy photon transfers in magnetic fields

19 p2837 A72-38059

Geomagnetic effect of solar wind rotational discontinuity observed by Explorer 34, noting magnetic storm initial phase relation to high latitude nonstationary ionospheric current attenuation

19 p2852 A72-38343

Atmospheric model for plasma motion along surface of geomagnetic tail under action of interplanetary magnetic lines of force

19 p2791 A72-38350

Hydromagnetic flow between two rotating disks with noncoincident parallel axes of rotation.

19 p2841 A72-38436

Effects of collisions on perpendicular longitudinal ion wave propagation in a magnetized plasma.

19 p2841 A72-38438

Heat conduction as mechanism for solar microwave bursts attenuation, noting effect of gyromagnetic absorption layers

19 p2852 A72-38497

Purification of hydrogen plasmoids by the magnetic field of an injector-diverter device

19 p2843 A72-38539

Investigation of the transport of electrode metal during welding in a carbon dioxide atmosphere

19 p2810 A72-38588

Ambipolar diffusion noise in a semiconductor in the presence of a magnetic field.

19 p2846 A72-38599

Critical current periodicity of Josephson junction interferometers.

19 p2846 A72-38601

Geomagnetic cutoffs for cosmic-ray protons for seven energy intervals between 1.2 and 39 Mev.

19 p2852 A72-38728

Faraday rotation by cosmic magnetic field in cosmology based on scalar-tensor theory of gravitation

20 p2969 A72-39264

Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory

20 p2960 A72-39384

Fabrication and properties of carbon-containing iron fibers and fiber sinter bodies

20 p2939 A72-39439

Gunn effect threshold and domain formation in transverse magnetic fields in indium antimonide.

20 p2960 A72-39566

Amplification of acoustic surface waves under transverse magnetic field in coupled intrinsic semiconductor-piezoelectric systems.

20 p2960 A72-39703

Effects of magnetic field on electron transport properties in gallium arsenide.

20 p2960 A72-39704

Single-cycle electron acceleration in focused laser fields.

20 p2934 A72-39720

Stellar emission and absorption line spectra formation in presence of magnetic field interpreted by radiative transfer equation solution, considering dwarf stars observation

20 p2956 A72-39753

Stability of laminar boundary layers on concave walls in presence of magnetic field.

20 p2958 A72-40066

Magnetic field effects on turbulent shear flow of electrically conducting fluid, discussing turbulence level, friction stress and heat exchange

21 p3089 A72-40260

Alternating magnetic field effect on ionoacoustic oscillations stability of collisionless nonhomogeneous magnetoplasma, examining parametric excitation of Langmuir oscillations

21 p3091 A72-40658

Influence of a magnetic field on the operation of an oscillator employing a two-base diode

21 p3032 A72-40791

OSO-4 observations of coronal EUV hole, considering association with regions of diverging magnetic fields

21 p3106 A72-41042

Influence of the terrestrial magnetic field on the motion of a satellite around its center of gravity

21 p3106 A72-41048

Quantum limit studies in single crystal and pyrolytic graphite.

21 p3097 A72-41186

Finite radial oscillations of uniformly rotating gravitating magnetized fluid cylinder model of star formation dynamics

21 p3109 A72-41331

Three-dimensional cosmic ray anisotropy in interplanetary space. III, IV.

21 p3101 A72-41385

Transverse magnetic field effect on unsteady incompressible laminar MHD boundary layer flow, noting cylindrical body oscillations in fluid

21 p3095 A72-41786

Magnetic field and suction effects on unsteady MHD free convection flow of conductive fluid around nonconductive porous flat plate

21 p3095 A72-41787

Magnetic-field-enhanced heating of plasmas with CO2 lasers.

22 p3210 A72-41969

Some aspects of flare properties versus magnetic boundary morphology.

22 p3217 A72-42038

Magnetic field change rate related to chromospheric activity in McMath Regions 8863, 10385 and 11415, discussing flare associated effects and total flux

22 p3217 A72-42039

Reflection and refraction of radio waves from the ionosphere in presence of time-varying irregularities.

22 p3154 A72-42302

Magnetic tension induced stress balance in plasma sheet, considering pressure gradient along geomagnetic tail axis, plasma flow kinetic energy and pressure anisotropy

22 p3211 A72-42408

Polar-cap electric field distributions related to the interplanetary magnetic field direction.

22 p3172 A72-42432

Neutron star model for magnetic field and superfluidity effects on cooling during pulsar stage

22 p3228 A72-42565

Propagation of Rayleigh waves on visco-elastic cylindrical surfaces placed in a magnetic field.

22 p3207 A72-42876

ULF wave observation by satellite, considering geomagnetic activity control of magnetospheric wave occurrence

22 p3174 A72-42902

August solar activity and its geophysical effects.

22 p3174 A72-42982

Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies

23 p3318 A72-43213

Sunspot formation due to magnetic flux concentration in active region and formation of invisible pores with suppressed granular motion

23 p3333 A72-43235

Determination of magnetic fields in plasmas from hydrogen spectral line profiles

23 p3318 A72-43313

The equatorial electrojet according to measurements from the Cosmos 321 satellite

23 p3328 A72-43369

Plane parallel nonuniform velocity plasma streams instability in absence and presence of magnetic field, comparing with ideal conductive liquid flows

23 p3320 A72-43518

Ion acoustic instability in collisionless shocks.

23 p3320 A72-43522

Perpendicular collisionless shock wave instability.

23 p3320 A72-43523

The effects of magnetic field oscillations on the boundary layer flow past a magnetized plate.

23 p3321 A72-43725

Relation between satellite radio signal scintillations and magnetic activity

23 p3264 A72-43850

Longitudinal magnetic field effect on the characteristics of a high frequency ion source

24 p3428 A72-45015

Meteor-induced magnetic effect on cosmic ray intensity for meteor streams with orbits normal or parallel to interplanetary magnetic field lines of force

24 p3435 A72-45092

Thermal cycling tests for natural remanent magnetism of lunar soil samples, proposing magnetization mechanism of material buried in regolith

24 p3443 A72-45373

Possible explanation of non-power-law radio spectra of cosmic radio sources.

24 p3446 A72-45477

MAGNETIC EQUATOR

Positive Fe ion concentration relationship to equatorial spread F from OGO 6 satellite observation near magnetic equator
01 p0062 A72-10902

Antiprotons abundance in primary cosmic radiation near geomagnetic equator from asymmetrical flux balloon measurements
03 p0407 A72-12992

Quiet day diurnal variability of equatorial geomagnetic field H component related to ionospheric dynamics
04 p0515 A72-14878

Equatorial ring current relation to polar electrojet during magnetosphere geomagnetic storm, discussing magnetosphere-ionosphere current systems
09 p1298 A72-22580

E and F region apparent and true drifts over magnetic equator correlated to solar activity, comparing electron density sensitivity to geomagnetic range
11 p1623 A72-26104

E region electron density distortion at magnetic equator by Sq current system, noting dependence on alpha coefficient profiles
13 p1952 A72-29663

Energetic particle flux observation at very low altitudes near geomagnetic equator, noting narrow distribution around 90-deg pitch angle
13 p2034 A72-30122

Range and frequency spread F diurnal and seasonal variations at magnetic equatorial station Thumba, noting geomagnetic activity effect
14 p2097 A72-30130

Quiet day daily geomagnetic field variability associated with equatorial ionospheric upheavals, noting longitudinal extent
19 p2794 A72-38869

Radar observations of equatorial spread F in a region of electrostatic turbulence.
23 p3286 A72-44528

Equatorial spread F - Recent observations and a new interpretation.
23 p3286 A72-44530

Scattering cross section of electromagnetic wave by collisionless plasma perpendicular to applied magnetic field
01 p0105 A72-10025

Characteristic scale lengths of stationary ionic collisional shocks in Q device perpendicular to magnetic field, presenting shock thickness variation with Mach number and density
01 p0105 A72-10028

Electrostatic waves in longitudinally magnetized plasmas with random electron charge distribution and applied magnetic field, finding phase characteristics
01 p0106 A72-10128

Linear theory of transverse electromagnetic waves and instabilities in uniform plasma during propagation along magnetic field, considering multifluid and kinetic description
01 p0108 A72-10189

Collisionless plasma shock wave measurements in magnetic field, determining plasma temperature and free electron densities
01 p0108 A72-10236

Strong ionizing shock waves production in hydrogen and deuterium gases, measuring plasma electron temperature, axial electric field and density and magnetic field compression
01 p0108 A72-10237 [AD-734469]

Collisionless motion of solar wind ions in helical magnetic field, giving transfer function of charged particles
01 p0118 A72-10360

Magnetic field and plasma sheet variations observation by IMP 3 satellite in distant magnetotail during magnetospheric substorms
01 p0060 A72-10888

Meridional currents intensity in equatorial electrojet region, computing electric and magnetic fields
01 p0063 A72-10924

Electromagnetic instability of linearly polarized mode propagation perpendicular to magnetic field in two colliding plasma streams
01 p0110 A72-11112

Large amplitude linearly or elliptically polarized Alfvén wave propagation parallel to magnetic field, calculating nonlinear Landau damping rate
01 p0111 A72-11227

Numerical-integral equation approach to plane wave scattering from nonplanar conducting surface with sinusoidal height profile for magnetic field parallel to surface ridges
01 p0032 A72-11237 [AD-735574]

Nonaxisymmetric tubular spiral electron beam interaction with fast waves in cylindrical waveguide within longitudinal magnetic field
02 p0170 A72-11563

I-V characteristics and bandwidth properties of distributed emission amplifier within magnetic field, analyzing averaged electron trajectories and hf potential distribution
02 p0189 A72-11568

Extended Thomas-Fermi isolated atom model for pulsar outermost crust magnetic field effects, using pressure-density equations of state
02 p0277 A72-11903

Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes
02 p0217 A72-11932

Kubo bulk electrical conductivity of two dimensional guiding center plasma in strong dc magnetic field
02 p0263 A72-11966

Electromagnetic wave propagation perpendicular to applied uniform magnetic field in relativistic plasma, deriving dispersion relation for stability criterion
02 p0264 A72-12024

Lf drift-type and ion-acoustic oscillations in weakly ionized currentless plasma at low gas pressures in longitudinal magnetic field
02 p0265 A72-12291

Dispersion characteristics and frequency stabilization of 0.63 micron laser in magnetic field
02 p0180 A72-12583

Two stream instabilities of low density beam-plasma interaction in finite and zero magnetic fields
02 p0267 A72-12839

Tensor description of laser beam second harmonic generation in dc magnetic field, using group theory derivation of nonzero element relations for all crystallographical classes
03 p0365 A72-12963

Cylindrical gravitational waves propagation modes in hot plasma subject to axial magnetic field, investigating instability conditions
03 p0388 A72-13025

Neodymium laser plasma dispersion and diffusion in magnetic field, using electrostatic injection of LiH particles
03 p0393 A72-13081

Upstream influence on MHD flow velocity by Rankine body moving parallel to uniform magnetic field in conducting fluid
03 p0394 A72-13153

Calibration of polarimetric measurements in terms of magnetic fields, using Stokes parameters without line formation dependence
03 p0427 A72-13280

Coherence properties of polarized radiation in weak magnetic fields, considering scattering redistribution for normal Zeeman triplet
03 p0427 A72-13292

Radiation pattern from open ended parallel plate waveguide with arbitrary electric or magnetic aperture field distribution, using Wiener Hopf technique
03 p0331 A72-13409

Adiabatic charged particle orbits in magnetic null sheet with transverse electric and added normal magnetic fields
03 p0348 A72-13512

Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities
03 p0311 A72-13564

Spreading currents in parabolic rotating coordinates, determining magnetic field components consistent with Laplace equation series expansion
03 p0311 A72-13565

Plasmoid transport in quadrupole and octupole magnetic fields, measuring plasma amounts in axial region charged particle densities and flux densities at vacuum chamber wall
03 p0395 A72-13568

Plasma flux interaction with axially symmetric magnetic field, investigating electrical polarization behavior
03 p0395 A72-13569

Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current
03 p0395 A72-13570

Bulk recombination effects on nonstationary pinching and collapse of electron-hole plasma by magnetic field in crystal
03 p0401 A72-13581

Power and gas consumption for inductive plasma formed in Ar atmosphere, measuring radial distribution of magnetic field axial component
03 p0395 A72-13652

Plasma beams injection into toroidal magnetic field along gradient or radius, using polarizational interaction
03 p0396 A72-13658

Plasma interchange instability in quadrupole and octupole magnetic fields determination by disturbance wavelength ratio to ion cyclotron radius
03 p0396 A72-13659

Stability of plane rotating galaxies in magnetic field parallel to axis of rotation, showing linearized MHD equations self conjugate for radial disturbance case
03 p0435 A72-13806

Magnetic field and current density distributions in cylindrical conduction MHD channel with arbitrary number of pole-electrode pairs
03 p0398 A72-14000

Time and coordinate dependence of magnetic field for steady symmetric flows of compressible conducting fluid at large Reynolds numbers, investigating self excitation conditions
03 p0398 A72-14001

Angular and linear velocities of plasmoid in coaxial accelerator under axisymmetric magnetic field
03 p0398 A72-14002

Laminar turbulent transition Reynolds number increase at finite perturbations in longitudinal magnetic field
03 p0398 A72-14003

Electric field intensity and pulsation spectra variation along rectangular channel in transverse magnetic field, noting current density changes
03 p0398 A72-14006

Dynamic and electromagnetic characteristics of MHD flow in square tube with walls differing in electroconductivity within oblique transverse magnetic field
03 p0398 A72-14007

Magnetic field distribution in linear MHD channel for large Reynolds numbers, determining current density and longitudinal field component
03 p0398 A72-14010

Free convective motion of conducting fluid past vertical plate in uniform transverse magnetic field, determining optimum dimensions of heat exchangers
03 p0399 A72-14011

Compression wave propagation from cylindrical cavity in weakly conducting magnetoelastic medium under unperturbed magnetic field
03 p0452 A72-14129

Rotationally symmetric force free magnetic field boundary value problem, using linear elliptic differential equation
03 p0400 A72-14352

Self consistent kinetic equations for evolution of particle distribution functions and wave intensity spectra of relativistic spatially homogeneous multippecies plasma in ambient magnetic field
04 p0553 A72-14401

Quasi-linear relaxation of fast ion beam in cold plasma moving transverse to magnetic field
04 p0554 A72-14403

Relativistic equations of motion of charged particle interacting with plane electromagnetic wave propagating at arbitrary angle to uniform magnetic field for magnetosphere model
04 p0554 A72-14406

Force free high beta plasma stability in homogeneous magnetic field and with inhomogeneous temperature and density
04 p0554 A72-14408

Magnetic and gravitational energy release by resistive MHD instabilities responsible for solar flares
04 p0571 A72-14578

Plasma density profiles by microwave interferometry technique in Sirius stellarator divertor for two magnetic field configurations and injection methods
04 p0555 A72-14619

Multimode Ne-He laser in strong magnetic field, discussing plasma-optical effects, emission cut-off magnetic field strength for various discharge levels and single-mode construction
04 p0530 A72-14656

Electromagnetic wave propagation across external magnetic field in contraststreaming thermally anisotropic plasmas, investigating plasma stability
04 p0556 A72-14942

Ar gas dc discharge plasma characteristics in crossed electric and magnetic fields, examining equivalent pressure concept
04 p0556 A72-14945

Electron heating by oscillating electric field in presence of steady magnetic field, solving Boltzmann transport equation for electron velocity distribution in plasma
04 p0556 A72-14947

Plasma column interaction with counter rotating hf magnetic fields of multipole configurations, calculating angular velocity
04 p0557 A72-15169

Toroidal plasma column in Tokamak systems, discussing field inhomogeneity role in maintaining equilibrium with conducting casing, confirming magnetic field and transformer iron core
04 p0557 A72-15171

Hf circularity polarized field strength and plasma density self consistent stationary distribution in weakly inhomogeneous constant magnetic field

04 p0558 A72-15175

High beta plasma lf wave parallel propagation to equilibrium magnetic field, deriving large scale length perturbations from coupled nonlinear partial differential equations

04 p0559 A72-15349

Electric or magnetic field tangential components at ground-air interface, discussing secondary electromagnetic sources

04 p0492 A72-15438

Nonstationary behavior of collisionless shock waves in plasma wind tunnel, suggesting interpretation of magnetosphere magnetic field structure near earth bow shock

04 p0559 A72-15468

Resonant transport properties of polyatomic gases in collinear static and oscillating magnetic fields, using microscopic kinetic equation

04 p0553 A72-15633

Two dimensional axisymmetric surface waves motion in inviscid incompressible homogeneous electrically conducting fluid under uniform magnetic and electric fields, considering surface tension effects

04 p0560 A72-15744

Monograph on design and characteristics of rotating plasma device under crossed electric and magnetic fields, covering dynamic behavior of hydrogen puff

05 p0642 A72-15798

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field

05 p0625 A72-15826

MHD squeeze film lubrication between electrically conducting parallel plates, showing graphically approach time under magnetic field in free space

05 p0665 A72-16031

Hypersonic axially symmetric laminar boundary layer electrically conducting fluid flow in blunt body stagnation region in presence of radial magnetic field

05 p0600 A72-16063

Book on electromagnetic waves in moving magnetoplasmas covering propagation in infinite and bounded plasmas subject to magnetic fields for nonrelativistic and relativistic velocities

05 p0695 A72-16396

Toroidal magnetic ring development and interaction with poloidal magnetic field, considering relationships to sunspots bright rings and spicules dynamics

05 p0719 A72-16512

Transfer equation system solution for nonscattering medium with stationary homogeneous magnetic field, considering boundary value problem in Fraunhofer line theory

05 p0690 A72-16513

Electromagnetic wave transmission and reflection by semiinfinite moving anisotropic plasma with parallel static magnetic field, considering incident H wave

05 p0696 A72-16623

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration

05 p0697 A72-16987

Boundary conditions and equations of plasma arc discharge in cylindrical diode with azimuthal magnetic field

05 p0697 A72-16988

Existence conditions for steady MHD shock waves propagating in collisionless plasma along magnetic field, observing dependence on pressure anisotropy

05 p0698 A72-17016

Anisotropic plasma stability to magnetosonic wave near ion cyclotron frequency propagating almost perpendicular to magnetic field

05 p0698 A72-17017

Relativistic electron pitch-angle diffusion driven by oblique lf whistler-mode turbulence in collisionless plasma immersed in static magnetic field

05 p0699 A72-17024

Coupled longitudinal and transverse plasma waves propagating normal to applied magnetic field, using three fluid model

05 p0700 A72-17230

Parametric plasma instability in hf electric field and constant magnetic field, noting longitudinal plasma oscillations growth

05 p0700 A72-17234

Ion charge composition in plasma-electron beam system in strong longitudinal magnetic field, noting multiply charged ions production under high temperature conditions

05 p0701 A72-17235

Stationary plasma flow interaction with axisymmetric spatially periodic magnetic field in presence of Hall effect, determining electric currents structure

05 p0701 A72-17241

Muon track curvatures in Wilson chamber magnetic field for calibrating ionization levels of logarithmic increase

06 p0811 A72-17293

Self induced electron beam collapse prevention by external magnetic field, determining required field strength by scaling law based on simple orbit model

06 p0854 A72-17418

Higher harmonics in lunar transfer functions for surface magnetic field tangential components, discussing lunar electrical conductivity models

06 p0875 A72-17448

Internal neutral sheet in geomagnetic tail from Explorer 34 magnetic field experiment, noting quasi-periodic structure and magnetic loop formation

06 p0803 A72-17450

Geomagnetic micropulsations on ground and magnetic field fluctuations in tail, noting field strength changes

06 p0804 A72-17455

Lf instability mode in partly ionized plasma due to electron temperature gradient aligned perpendicular to magnetic field, applying to E and F regions [AD-737931]

06 p0804 A72-17460

Cylindrical alkali metal plasma column structure in single ended Q device under axial magnetic field

06 p0854 A72-17503

Wake behind body moving in plasma parallel to magnetic field, observing coupling with parallel ion acoustic waves and with perpendicular Bernstein modes

06 p0875 A72-17525

Plasma perturbations and destabilization in curved magnetic field due to electronic electrical conductivity finiteness

06 p0860 A72-17684

Laser radiation intensity modulation by time varying magnetic field

06 p0825 A72-17685

Weakly ionized decaying afterglow plasma potential fluctuation and instability in magnetic field, using electrostatic probes

06 p0860 A72-17692

Longitudinal ambipolar acoustic instability effect on duration of plasma particle motion to wall across magnetic field, using phase method

06 p0860 A72-17693

Collisionless plasma oscillations in external uniform magnetic field, described by initial value problem for nonrelativistic linearized Vlasov-Maxwell equations

06 p0862 A72-18251

Closed magnetic fields of helical ring currents on concentric spheres surrounded by semiconductor /Tornado trap/

06 p0863 A72-18405

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric sphere

06 p0863 A72-18406

Separatrix structure and stability of helical Tornado trap magnetic field from electron space charge measurements

06 p0863 A72-18407

Pulse reflection of polarized plane electromagnetic wave from cold plasma ionosphere model with vertical magnetic field

06 p0777 A72-18729

Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field

07 p0999 A72-18911

Amplitron stability in optimal frequency regime, relating cut-off voltage and plate current as function of magnetic field, input power and geometrical parameters

07 p0953 A72-19014

Magnetized solar wind velocities and fields obtained by three dimensional model using perturbation technique with spherically symmetric boundary conditions

07 p1057 A72-19142

Lf oscillations of magnetic field at ATS 1, presenting local time and frequency distributions

07 p0975 A72-19160

Nonlinear Landau damping of longitudinal plasma waves in dc magnetic field, obtaining wave-particle interactions from Vlasov equation by perturbation theory and method of characteristics

07 p1041 A72-19505

Nonlinear Landau damping and growth of finite amplitude cyclotron harmonic plasma waves in magnetic field, measuring coupling coefficients by calibrated interferometer

07 p1041 A72-19506

Parallel current and sheath effects on collisional drift waves normal mode structure in Q machines with end plates, using slab plasma model with uniform magnetic field

07 p1042 A72-19511

Plasma layer growth and equilibrium magnetic fields for astron configurations, solving stream function by finite difference methods

07 p1042 A72-19512

Stationary high beta plasma shock waves generated in plasma wind tunnel by impinging on magnetic field, comparing with earth bow shock

07 p1042 A72-19617

Coordinate transformation for decoupling equations for tangential electric and magnetic field propagation

through series of uniform cylindrical layers with arbitrary properties

07 p0946 A72-19799

Statistical analysis of magnetic energy-density antenna performance in mobile communication, comparing two-crossed-slot design to three element unit

07 p0957 A72-19801

Quasi-nucleonic interactions of high energy protons in nuclear emulsion irradiated within pulsed magnetic field

07 p1038 A72-19869

Abrikosov and Mendelsohn models of nonideal superconductors of second kind in transverse magnetic field, discussing Landau-Ginzburg parameters and critical current density

07 p1049 A72-20153

Magnetoelastic vibrations of thin conducting plate in magnetic field, solving electrodynamic equations

07 p1095 A72-20315

Electric field in flow of medium with tensor conductivity due to Hall effect, studying eddy currents structure in magnetic field variation region

07 p1044 A72-20316

Lf convective oscillations in polytropic atmospheres within strong magnetic field, considering stability of quasi-adiabatic and quasi-isothermal motions

07 p1082 A72-20376

Magnetic field influence on shear viscosity of polyatomic gases, measuring rectangular cross section capillary flow resistance for different field orientations

07 p1038 A72-20398

Hall effect influence on magnetospheric boundary magnetic field generation by solar wind perturbation, using beam-magnetic field interface model

07 p0980 A72-20407

Optimal test conditions in magnetospheric control by electrical system for subsurface defects detection, obtaining tangential magnetic field on carbon steel plates

07 p0991 A72-20421

Transverse hydromagnetic plane waves existence in uniformly heated electrically conducting fluid under temperature gradient and magnetic field

07 p1045 A72-20442

Spark source generated electron beam interaction with plasma in uniform magnetic field, estimating HF longitudinal oscillation power

07 p1046 A72-20504

Ambipolar diffusion in weakly ionized unstable plasma afterglow in presence of uniform axial magnetic field

07 p1047 A72-20558

Magnetic field components of vertical currents at magnetosphere boundary and earth surface, using computerized Gaussian method

08 p1156 A72-20822

Unsteady flow of viscous incompressible electrically conducting fluid past infinite nonconducting plate within uniform transverse magnetic field

08 p1212 A72-21079

Magnetic field effect on elf radio wave attenuation during propagation under six ionospheres, showing dependence of minimum on propagation path geomagnetic latitude

08 p1131 A72-21103

Two dimensional model for plasma without magnetic field trapped near current sheet end in dipole magnetic field resembling geomagnetic tail

08 p1157 A72-21108

Solar wind tangential discontinuities and shock waves determination from flux velocity vector, magnetic field and particle density measurements

08 p1227 A72-21154

Electromagnetic wave polarization effect on linear transformation of waves in inhomogeneous magnetoactive plasma in magnetic field

08 p1212 A72-21245

Electrostatic ion wave Landau damping in magnetic field of Ar plasma QP machine

08 p1213 A72-21250

Charge separation effects on plasma shock wave profile in perpendicular propagation to magnetic field, using moment equations derived from Boltzmann equations for electrons and ions [AD-742533]

08 p1213 A72-21254

Molecular ordering in smectic A liquid crystals, evaluating spectrum hyperfine splitting as function of orientation to spectrometer magnetic field

08 p1217 A72-21490

Heisenberg ferromagnet thermodynamic properties in external magnetic field near Curie temperature, studying magnetization, susceptibility, entropy and magnetocaloric effect

08 p1217 A72-21520

Anisotropic conducting fluid flow in presence of traveling magnetic field, determining Hall effect via solution to electromagnetic field distribution boundary value problem

08 p1214 A72-21648

Slow and fast longitudinal ion acoustic waves in plasma cylinder under axial magnetic field

08 p1215 A72-21873

Quantizing magnetic field effect on electromagnetic wave propagation in multivalley n-type Si and Ge and PbTe semiconductors

08 p1218 A72-21878
Propagation time of charge diffusion across magnetic field in bounded plasma

08 p1215 A72-21879
Josephson effect /superconducting weak link/ devices for low frequency magnetic field sensing, noting applications in magnetocardiography and absolute noise thermometry

08 p1218 A72-21919
Hyperfine interactions of Fe cations in ilmenite determined by Mossbauer spectroscopy, noting internal magnetic field and quadrupole coupling constant

09 p1367 A72-22457
Magnetic field measurement methods and magnetometers performance in superconducting, thin film, resonance and fluxgate areas

09 p1308 A72-22465
Optimum pressure and field conditions for intense relativistic electron beam transport in longitudinal magnetic field

09 p1360 A72-22870
Two fluid MHD model to study cylindrical plasma condenser resonance properties in axial magnetic and alternating electric fields

09 p1360 A72-22952
Alfven waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio

09 p1360 A72-22954
Hollow cylindrical cathode discharge sustaining potential reduction and recombination probability increase from transverse magnetic field and rising pressure and plasma density

09 p1361 A72-22957
Contractible current loop model for radius variations, induction current, temperature and inertia center velocity in plasmoid interacting with axially symmetric magnetic field

09 p1361 A72-23202
Plasmoids interaction in diverter magnetic field, investigating integral electron capture intensity

09 p1362 A72-23205
Plasma jet dynamics in axially symmetric magnetic field, obtaining magnetic field generated by conduction currents as function of plasma macroparameters

09 p1362 A72-23206
Moving plasma interaction with oblique magnetic field, establishing magnetization ranges for plasma density and velocity

09 p1362 A72-23208
Plasma flows interaction with plasma cylinder in diverter magnetic field, investigating plasma dynamics with electric probes, plasmascope and mass spectrograph

09 p1362 A72-23210
Plasma flow interaction with magnetic pulse field barrier from magnetic coil for short plasmoids formation

09 p1362 A72-23211
Single helix magnetic field with axial current, discussing field lines rotatory transformation and magnetic well and shear effect on plasma behavior

09 p1363 A72-23216
Double helix magnetic field in longitudinal and axial current fields of stellarators, noting rotatory transformation and shear of field lines

09 p1363 A72-23217
Multipole magnetic field configuration effectiveness in electromagnetic plasma trap, discussing electron losses critical angle and captured ions maximum density

09 p1363 A72-23221
Negative reabsorption coefficient for induced emission of neutron moving in medium in magnetic field

09 p1364 A72-23257
Oblique magnetic fields effect on compressible conductive fluids motion in presence of thin foil, noting lift values in hyperlipitic and double hyperbolic cases

09 p1365 A72-23360
Electrically conducting viscous incompressible fluid rotating with oscillating disk in magnetic field

09 p1366 A72-23575
LF drift-time and ion-acoustic oscillations in weakly ionized currentless plasma at low gas pressures in longitudinal magnetic field

10 p1517 A72-23765
German monograph on radiation characteristics of planar systems in aperture plane of parallel plate waveguide, obtaining relationship between electric and magnetic fields

10 p1434 A72-23775
Massive rotating objects with magnetic fields in galactic nuclei, considering similarities between Crab Nebula and quasars

10 p1535 A72-23908
Quiescent steady state plasma production by beam-plasma discharges in uniform magnetic fields, showing plasma density fluctuation relation to Penning effect

He-Ne laser output dependence on transverse magnetic field, ascribing magneto-optical effects to IR radiation decrease

10 p1490 A72-24046
Light polarization in anisotropic Zeeman laser under axial magnetic field

10 p1491 A72-24134
Relativistic Zeeman-Stark effect on molecular jet due to molecular translational motion in continuous magnetic field

10 p1514 A72-24135
Variable radio structure model using relativistic electron cloud outbursts in stationary magnetic field tubes for faster than light velocities

10 p1536 A72-24139
Velocity and magnetic field expressed by six scalar potentials from MHD equations system, noting compressible fluids flow

10 p1520 A72-24219
Microwave amplitude modulation during propagation through RF plasma under perpendicular low intensity time dependent magnetic field

10 p1520 A72-24345
Electromagnetic wave propagation perpendicular to magnetic field in two-component warm plasma, obtaining dispersion relations for transverse waves

10 p1520 A72-24350
Traveling wave mode ring laser operation, obtaining active medium polarization changes through longitudinal magnetic field excitation by capacitor discharge through spiral pump lamps

10 p1492 A72-24363
Conducting fluid laminar free convective flow over heated rotating horizontal plate in presence of strong magnetic field aligned with rotation vector

10 p1522 A72-24465
Joule dissipation effect on convective instability of current carrying fluid in magnetic field

10 p1522 A72-24533
Plane ionizing shock wave stability in MHD channel within magnetic field

10 p1522 A72-24542
Interacting viscous conducting media flow in inclined channel in presence of transverse magnetic field, using Moiseev asymptotic method for steady flows with wavy interface

10 p1522 A72-24546
Stability of superluminous and subluminal waves propagating transversely to external uniform magnetic field in streaming relativistic plasmas

10 p1522 A72-24608
Coma galaxy cluster X ray and radio source region magnetic field origin as primordial metagalactic flux or strong radio source remnant

10 p1542 A72-24617
Impurities effect on level density of electron gas within strong magnetic field, discussing included self energy

11 p1693 A72-25526
Electrical conductivity of two dimensional strongly magnetized guiding center plasma, using Liouville equation

11 p1693 A72-25563
Magnetic field generation in presence of turbulent velocity distribution, considering gyrotropy parameter equation and nonlinearity

11 p1686 A72-25716
Plasma column stabilization by constant longitudinal inhomogeneous magnetic and rotating HF electromagnetic fields, noting application to plasma convective instabilities

11 p1694 A72-25786
Controlled nuclear fusion plasma stabilization by electrostatic forces, reducing applied magnetic field

11 p1694 A72-25791
Ruby laser light scattering method for measuring magnetic field direction in Tokamak plasma, testing validity by numerical calculation of scattered spectrum

11 p1694 A72-25793
Hydromagnetic stability of isothermal stratified plasma atmosphere uniform flow over conducting liquid along magnetic field, discussing dispersion relation for static configuration

11 p1695 A72-26115
General relativity equations solution for interaction of gravitational radiation and conducting fluids in magnetic field, noting energy absorption in specified depth surface layer

11 p1720 A72-26116
Magnetic field and polar region geometry effects on hollow cathode thruster performance of Kaufman electric engine

11 p1706 A72-26167
Magnetic fields effect on anode heat losses in MPD accelerator arcs, noting minimal charge current density

11 p1711 A72-26225
Rayleigh problem in presence of magnetic field, discussing transpiration effects on MHD flow near oscillating flat plate

11 p1696 A72-26542
Resonant three wave interaction in magnetized spatially uniform plasma under constant magnetic field

11 p1698 A72-26603
Hydromagnetic stability of rotating nondissipative inviscid incompressible conducting fluid annulus permeated by radially varying magnetic field, considering axisymmetric and nonaxisymmetric disturbances

11 p1619 A72-26639
Slow and fast plane magnetoacoustic waves mutual transformation and reflection at plasma and magnetic field inhomogeneities

11 p1698 A72-26643
Electron gas in superstrong magnetic fields of gravitationally collapsed objects outer region, noting Wigner transition to ordered structure

11 p1699 A72-26704
Spreading currents in parabolic rotating coordinates, determining magnetic field components consistency with Laplace equation series expansion

11 p1607 A72-26752
Plasmoid transport in quadrupole and octupole magnetic fields, measuring axial charged particle and flux densities at vacuum chamber wall

11 p1699 A72-26755
Plasma flux interaction with axially symmetric magnetic field, investigating electrical polarization behavior

11 p1699 A72-26756
Plasma-ion beam system drift beam instability in longitudinal magnetic field, noting oscillations frequencies dependence

12 p1849 A72-27060
Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration

12 p1850 A72-27131
Electron beam velocity distribution function fine structure for plasma-beam discharge in hydrogen within longitudinal magnetic field

12 p1850 A72-27261
Quiescent plasma production with axially homogeneous density distribution in skipping magnetic fields by electron cyclotron resonance discharge, noting high electron temperatures

12 p1851 A72-27400
Oscillation periods of rotating perfectly conducting liquid column in presence of axial magnetic field and uniform current

12 p1851 A72-27534
Ruby laser coherent light scattering by cylindrical electron beam under longitudinal magnetic field

12 p1820 A72-27586
Geomagnetic invariant coordinates and related field line parameters calculation via field model and fast numerical method

12 p1803 A72-27771
Inertial sensing principles interrelationship, stressing electric and magnetic procedures

12 p1809 A72-27788
Charged particles propagation in magnetic field and scattering medium with constant and variable transport paths, applying to proton propagation for solar flares

13 p2029 A72-28576
Kinetic approximation for bounded electron beam stability in plasma situated in magnetic field, deriving instability increments and dispersion relations

13 p2010 A72-28578
Polar cap magnetic field induced by currents along magnetospheric lines of force during polar substorm

13 p1946 A72-28587
Wave equations and photon absorption cross section of relativistic electron in magnetic field, taking into account relativistic energies

13 p2002 A72-28647
Dynamic thermo-magnetoelastic problems of long cylinder and infinite medium with hole under magnetic field, using variation method and Laplace transforms

13 p2056 A72-28882
Radial magnetic field geometry for total ion utilization in Kaufman thrusters, noting uniform current density and plasma generation and high electrical efficiency

13 p2027 A72-28948
Number density, particle, momentum and energy fluxes in model ion-exosphere with open magnetic field and asymmetric Maxwellian velocity distribution

13 p1948 A72-29115
Collisional plasma shock waves structure in electromagnetic shock tube with strong transverse bias magnetic field, using two fluid Navier-Stokes equations

13 p2011 A72-29119
Thermal equilibrium coefficient of ionized plasma spatial diffusion transverse to strong uniform dc magnetic field, extending Taylor-McNamara calculation scheme to three dimensions

13 p2011 A72-29120
Electromagnetic wave absorption in warm homogeneous plasma under static magnetic field parallel to surface, taking into account plasma-vacuum boundary conditions

13 p2012 A72-29123
Unsteady state propagation of weak nonlinear plasma waves in magnetic field, discussing shock wave formation and compression pulse evolution

Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes

13 p1949 A72-29244

Charged particle beams focusing in combined dual spiral system with homogeneous magnetic field along axis

13 p1932 A72-29292

Plasma wave measurements during OGO-5 dayside magnetosphere polar cusp encounters, discussing ULF magnetic field wave levels and VLF electric field amplitude ranges

13 p1950 A72-29380

Random homogeneous turbulence generation of rms weak magnetic field fluctuation in infinite medium with short correlation time

13 p2015 A72-29403

Nd laser irradiation of LiH particles in magnetic trap, investigating resultant plasma expansion and diffusion

13 p2015 A72-29431

Dispersion equations for electron and ion cyclotron waves propagating perpendicularly to magnetic field in plasma

13 p2016 A72-29602

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

13 p2016 A72-29603

He ions motion normal to magnetic field under induced electric field, analyzing resonance mechanism

13 p2016 A72-29606

Impulsive pulsations /Pi 2/ identification as geomagnetic field distension coincident with oscillatory component from high resolution Rb vapor magnetometer recordings

13 p1951 A72-29656

Plasma current layer formation due to electric field directed along magnetic field neutral line

13 p2017 A72-29699

Uniaxial compressive stress apparatus for InSb investigation at low temperatures in large magnetic fields

13 p1959 A72-29753

Steady barotropic inviscid flows of rarefied gas plasmas as free jet and within cylindrical channel in axisymmetric external magnetic field with Hall effect

13 p2018 A72-29823

Two dimensional mathematical model of magnetosphere with neutral sheet for oblique incidence of solar wind, noting magnetic field minimum energy

13 p1954 A72-29850

Mathematical model for magnetized solar wind with one fluid MHD and polytropic state equations, calculating magnetic field variables at earth

13 p2034 A72-29958

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field

13 p2007 A72-30013

Polar zone thermospheric temperature variations due to atmospheric cooling, H component variations and discrete perturbation

14 p2097 A72-30133

Current instability of electron-ion plasma in magnetic field produced by moving resonance charges

14 p2136 A72-30301

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field

14 p2136 A72-30302

Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects

14 p2136 A72-30305

Dynamic behavior of long-period oscillations of surface wave type in system of inhomogeneous ion beams moving in dense plasma along magnetic field

14 p2136 A72-30307

Plasma containment by superposed fields /sustained field/ technique application to theta pinch, studying hydrogen and helium discharge behavior

14 p2138 A72-30400

Near field effects on pulsar particle acceleration, relating electric and magnetic field magnitudes

14 p2156 A72-30568

Transverse particle diffusion across external homogeneous magnetic field under random isotropic large scale hydromagnetic turbulence

14 p2102 A72-30650

Spectrochemical trace analyses in electric arc plasma, examining external magnetic field effects on spectral line intensity variation

14 p2139 A72-30784

Diffraction of plane waves scattered by impedance structures in anisotropic medium, noting wedge shaped region with cold plasma under external magnetic field

14 p2086 A72-30809

Linear theory based analysis of compressible electroconductive fluid flow satisfying perfect gas equation in presence of thin profiles within quasi-aligned magnetic field

14 p2095 A72-30824

Magnetized nonuniform plasmas, discussing description to all orders in electron and ion temperatures of waves by operator method

14 p2139 A72-30879

Two counter streaming plasmas with anisotropic temperatures, deriving instability condition for ordinary mode electromagnetic propagation perpendicular to external magnetic field

14 p2140 A72-30935

Anisotropic homogeneous plasmas, deriving computer model to predict effects of circularly polarized parallel plasma waves in external uniform magnetic field direction on instabilities

14 p2140 A72-30938

Kinetic equations for turbulent magnetized plasma, considering wave-wave interactions and wave energy in terms of second order Markov differential equation

14 p2141 A72-30940

Gravitational radiation generation and detection, discussing Weber detector, interaction with electric and magnetic fields and gravitational astronomy

15 p2273 A72-31287

Zeeman triplet with unsplit upper level formation in isothermic atmosphere under magnetic field, considering Doppler and Lorentz frequency profiles of transitions

15 p2304 A72-31332

Numerical analysis of steady one dimensional quasi-shock waves in collisionless plasma within longitudinal uniform magnetic field, noting oscillations behind wave front

15 p2284 A72-31584

Electric and magnetic fields fluctuations in region between shock wave front and magnetosphere boundary, noting resulting energy dissipation

15 p2225 A72-31902

Correlated particle flux, magnetic field, electron intensity and riometer absorption measurements during recovery phase of polar magnetic substorm on 6 March 1970

15 p2226 A72-31946

Hyperfine magnetic field reduction produced in Fe-Cr alloy single crystal by Cr atoms observed by Mossbauer method, proposing spin disturbance mechanism

15 p2293 A72-32230

Geomagnetic substorm magneto-ionospheric effect, discussing electric field transmission, magnetic field variations and currents flowing in dynamo region

15 p2230 A72-32259

Solar flare and neutral sheet simulation by investigating behavior of plasma current through magnetic neutral point created by capacitor discharges

15 p2301 A72-32342

Stationary plasma flow interaction with dipole magnetic field to study geophysical phenomena in upper atmosphere

15 p2286 A72-32343

MHD Couette flow of electrically conducting viscous incompressible fluid in transverse magnetic field with time dependent suction or injection

15 p2286 A72-32396

Magnetic probe measurement of random fluctuations in transverse magnetic field caused by He plasma produced in arc discharge

15 p2287 A72-32408

Cooperative enhanced scattering cross section of far IR laser radiation from nonthermal theta pinch plasmas in weak magnetic field

15 p2288 A72-32417

Streaming MHD flow past sem infinite flat plate in presence of perpendicular uniform magnetic field, obtaining velocity field at large distances

15 p2288 A72-32480

Magnetized plasma discharge steady state problem of finite cylinder positive column in magnetic field, detailing radial and axial solutions

15 p2288 A72-32508

Three Josephson junction asymmetric feed quantum interferometer, discussing magnetic field sensitivity and amplitude variation increase

15 p2241 A72-32536

Skewed wire antennas electric and magnetic near fields prediction from computer programs based on matrix inversion method

15 p2209 A72-32567

Magnetic field profile optimization for beta-limitation in minimum-B mirror confined plasma in nuclear reactor

16 p2432 A72-32805

HF electrostatic instabilities driven by electron-ion relative drift velocity across external magnetic field for inhomogeneous plasma, noting Landau damping role

16 p2433 A72-32809

Ion acoustic, electron plasma and cyclotron harmonic waves parametric instabilities in magnetic field and applications to plasma heating

16 p2433 A72-32811

Plasma column formation by interaction with rotating HF electromagnetic field and longitudinal constant magnetic field

16 p2433 A72-32815

Magnetic configuration for plasma confinement in torsatron with helical windings and no toroidal field coils

16 p2433 A72-32816

Electromagnetic gain mechanisms with required energy supplied by static currents and magnetic fields in homogeneous plasmas

16 p2434 A72-32853

Two dimensional unsteady solutions to MHD equations, describing matter compression near zero line of magnetic field for solar flares and z pinch studies

16 p2435 A72-33151

Experimental methods for studying interactions between plasma streams and three dimensional magnetic dipole fields

16 p2454 A72-33384

Magnetic field rapid dissipation induced by stochastic topology of lines of force, discussing implications for hydromagnetic turbulence, solar activity and cosmic ray diffusion

16 p2378 A72-33454

Electric and magnetic field effects on auroras formation, noting similarity with thermonuclear reactor plasma

16 p2456 A72-33518

Magnetothermoelastic temperature distribution effects due to linear heat source in infinite circular cylinder acted upon by magnetic field

16 p2425 A72-33595

Equations of state and equilibrium for electron gas in strong magnetic field, discussing effects in pulsar crusts and atmospheres

16 p2460 A72-33929

Plasma motion relation to magnetic field line motion for perfect electroconductivity, noting comparison with total particle drift distance

16 p2439 A72-33931

Particle and energy fluxes across magnetic field in axisymmetric toroidal magnetic traps and plasmas with weak collisions, calculating radial electric field

16 p2440 A72-34153

Radiation from a magnetic line source covered with an anisotropic warm plasma slab

17 p2587 A72-34386

Thermomagnetic effect in a plasma placed in a non-homogeneous magnetic field

17 p2588 A72-34838

Closed magnetic fields of helical ring currents on concentric spheres surrounded by conductor /Tornado trap/

17 p2588 A72-34855

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric spheres

17 p2588 A72-34856

Emission of coherent microwave radiation from a relativistic electron beam propagating in a spatially modulated field

17 p2589 A72-34874

Time correlation functions for gases of linear molecules in a magnetic field

17 p2589 A72-34894

Galactic cosmic rays anisotropy prediction as function of energy for various assumed source distributions and magnetic field configurations

17 p2599 A72-34924

Traveling wave mode ring laser operation, obtaining active medium polarization changes through longitudinal magnetic field excitation by capacitor discharge through spiral pump lamps

17 p2563 A72-34962

Russian book - Effect of magnetic fields on biological objects

17 p2502 A72-35001

Mechanism of the biological action of a constant magnetic field

17 p2503 A72-35005

Solution of the Boltzmann equation for a fully ionized plasma in an oscillatory electric field and a steady magnetic field. V - Explicit solution for a homogeneous plasma in a high-frequency electric field

17 p2589 A72-35057

Transverse diffusion and conductivity coefficients for a three-dimensional magnetized equilibrium plasma

17 p2592 A72-35379

Faraday rotation in connection with Hoyle theory of intergalactic magnetic field existence in steady state cosmology, considering cosmological model with cosmic magnetic field

17 p2614 A72-35504

Spectral dependence of diffusion in a magnetized plasma

17 p2592 A72-35623

Influence of reflected ions on the magnetic structure of a collisionless shock front

17 p2592 A72-35819

Alfven waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio

17 p2593 A72-35883

A theoretical analysis of the acceleration of ions in axially symmetric crossed fields with an external source and sectioned electrodes

17 p2593 A72-35902

Calculation of the dependence of the charge density on the distribution of the potential in crossed symmetric electric and magnetic fields

17 p2593 A72-35903

Magnetic dipole field interaction with plasma flow ions, noting qualitative model of solar wind flow past magnetosphere

17 p2593 A72-35905

The influence of magnetic pressure on the performance of a high-current discharge thermionic converter

18 p2646 A72-36195

Combined Rayleigh and Kelvin instability of a Hall plasma with a vertical magnetic field.

18 p2715 A72-36502

Quasi-linear theory of plasmas situated in a weak UHF electric field and a constant magnetic field

18 p2715 A72-36654

Anisotropy and strong-coupling effects on the critical-magnetic-field curve of elemental superconductors.

18 p2719 A72-36710

Observational evidence for strength and structure of intergalactic magnetic fields, discussing primordial fields effects on galaxy formations and early universe evolution

18 p2726 A72-36728

Hydrodynamic stability of the gradient flow of a conducting fluid with a rheological power law in a transverse magnetic field

18 p2716 A72-36814

Circular-elliptical transformation of jet propagating in homogeneous slipstream within unperturbed uniform transverse magnetic field, using linearized three dimensional boundary layer equations

18 p2716 A72-36815

Hall phenomena in a plasma flow situated in a traveling magnetic field

18 p2716 A72-36816

Discontinuities in a collisionless plasma flow having a strong magnetic field.

18 p2717 A72-37042

Study of the mechanism of motion of nonequilibrium plasma inhomogeneities in a magnetic field

18 p2717 A72-37176

Propagation of electromagnetic waves in a rarefied plasma situated in an alternating magnetic field

18 p2717 A72-37177

Magnetic surface equation and collisional diffusion of finite beta tokamak plasma in low density regime

19 p2838 A72-37330

Equilibrium configurations of Vlasov plasmas carrying a current component along an external magnetic field.

19 p2839 A72-37332

Green function for temporal electromagnetic plasma wave echoes oblique to external magnetic field, calculating current density and damping term

19 p2839 A72-37333

The Rayleigh-Taylor problem with a vertical magnetic field, including the effects of Hall current and resistivity.

19 p2839 A72-37339

Classification of the magnetohydrodynamic motions of a rotating fluid

19 p2839 A72-37392

Angular distribution measurements of photoemitted electrons for InAs by means of magnetic field.

19 p2843 A72-37406

Drude theory of electromagnetic waves in an inclined magnetic field. I - One-band model of charge carriers.

19 p2840 A72-37510

Parametric excitation of electromagnetic waves.

19 p2834 A72-37718

The effect of contacts on microwave emission from InSb.

19 p2844 A72-37728

Radiation scattering matrix derivation with allowance for phase correlation, deriving method of radiation transfer equations solution for magnetic field

19 p2834 A72-37819

Propulsive performance of a 30 kW arc-jet thruster stabilized by vortex and magnetic forces.

19 p2848 A72-37925

Coherent radiation emission by indium antimonide in a transverse magnetic field

19 p2845 A72-38176

Solitary waves properties and propagation at right angles to magnetic field in two ion beam magnetized plasma

19 p2841 A72-38441

Magellanic clouds structure and dynamics from optical and radio observations, discussing interconnecting magnetic field existence

19 p2865 A72-38481

Unsteady weakly nonlinear waves in a multicompone plasma with allowance for weak dissipation

19 p2842 A72-38528

Effect of ionic viscosity on the stability of a finite-pressure plasma

19 p2842 A72-38529

Dipole antenna radiation in homogeneous plasma layer magnetized by normal uniform magnetic field, calculating radiation pattern

19 p2768 A72-38661

Pulse propagation in a magnetoplasma. I - Longitudinal propagation.

19 p2843 A72-38751

Propagation of Alfvén-gravitational waves in a stratified perfectly conducting flow with transverse magnetic field.

19 p2843 A72-38791

Differentially rotating magnetoid model for quasar and radio galaxies matter ejection and luminosity mechanisms in terms of magnetic field evolution and current sheet generation

20 p2965 A72-38903

Two dimensional linear polarization radio distribution maps of 3C 270 and 3C 452 radio galaxies, relating to source magnetic field structure

20 p2965 A72-38904

The Nyquist criterion for kinematic-dynamo action.

20 p2956 A72-38912

Some new methods of performing low frequency EMC measurements.

20 p2921 A72-38995

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamics equations

20 p2976 A72-39245

Solar wind tangential discontinuities and shock waves determination from flux velocity vector, magnetic field and particle density measurements

20 p2964 A72-39259

Transport phenomena in an electron-phonon system in strong magnetic fields at low temperatures

20 p2953 A72-39310

Determination of the magnetic field B in vacuum for general two-dimensional MHD-equilibria.

20 p2957 A72-39352

Plasma equilibrium in configurations with a helical magnetic axis with allowance for toroidality.

20 p2957 A72-39353

Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field

20 p2931 A72-39377

Isotropically and anisotropically polarized He-Ne lasers output dependence on longitudinal magnetic fields, noting electron density radial redistribution in gas discharge plasma

20 p2932 A72-39411

Radiation from a particle in static electric and magnetic fields.

20 p2956 A72-39459

Spherical kinematic dynamo models with asymmetric magnetic fields based on mean field electrodynamics and on nearly axisymmetric limit

20 p2954 A72-39875

Computer simulation of RF-confinement of plasmas in an open-ended toroidal quadrupole.

21 p3089 A72-40191

Electrodynamical analysis of superconducting vortices interaction with cylindrical cavities (pinning), calculating critical currents in type II superconductors in external magnetic field

21 p3096 A72-40416

Isometric motion in relativistic magnetohydrodynamics.

21 p3091 A72-40567

The study of turbulence in theta-pinch plasma with azimuthal magnetic field.

21 p3091 A72-40571

Force free fields in type II superconductors.

21 p3096 A72-40573

Dispersion equations solved for electron and ion cyclotron waves propagating perpendicularly to magnetic field in plasma

21 p3091 A72-40656

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

21 p3091 A72-40657

He ions motion normal to magnetic field under induced electric field, analyzing resonance mechanism

21 p3091 A72-40660

Measurement of internal magnetic field distribution in axially magnetized YIG rods based on magnetoelastic resonance absorption.

21 p3097 A72-40692

Interaction of a steady plasma flow with a dipole magnetic field in the presence of a radial electric field.

21 p3093 A72-41388

Spatial measurement of the magnetic field direction in plasma.

21 p3094 A72-41633

Helical field experiments on a three-meter theta pinch.

21 p3094 A72-41636

Propagation of magnetohydrodynamic shock waves in a medium with diminishing density

21 p3094 A72-41653

Investigation of the interaction between a plasma flow and an axisymmetric magnetic field

21 p3094 A72-41655

The magnetic field of eddy currents above a surface crack in metal with excitation of them by an applied inductor.

21 p3057 A72-41722

Effect of a random magnetic field on the absorption line characteristics of stars

21 p3113 A72-41761

Trajectory equations of laminar electron flow in exponential magnetic field, calculating electrode shapes of magnetron injection electron gun

21 p3088 A72-41835

Accuracy of the conservation of the third adiabatic invariant of charged-particle motion in axisymmetric fields. II

22 p3217 A72-42209

Hydrodynamic instability of a plasma boundary with a magnetic field, taking viscosity into account

22 p3210 A72-42277

Self-consistent description of the magnetotail current system.

22 p3172 A72-42429

Boundary fluctuations of a plasma column with a current

22 p3211 A72-42655

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field

22 p3190 A72-42735

Electromagnetic disturbances within a degenerate electron plasma in a quantizing magnetic field

22 p3212 A72-43010

Injection of an electron beam into a plasma bounded by a conducting casing

22 p3213 A72-43105

Confinement time of plasma injected in magnetic field of racetrack with diverter, noting plasma equilibrium in toroidal magnetic field

22 p3213 A72-43106

Motion of plasmoids in a multipole magnetic field of toroidal configuration

22 p3214 A72-43120

Current instability of electron-ion plasma in magnetic field produced by moving resonance charges

23 p3317 A72-43203

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field

23 p3317 A72-43204

Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects

23 p3317 A72-43207

Dynamic behavior of long-period oscillations of surface wave type in system of inhomogeneous ion beams moving in dense plasma along magnetic field

23 p3317 A72-43209

Equilibrium equations for vortex lines with allowance for interaction with boundary of ideal superconductor, calculating extremum values of magnetic field

23 p3312 A72-43316

The $Z_{sub} e$ field, some of its properties, and its geophysical informativeness

23 p3283 A72-43373

Plasma diagnostics for electron-ion oscillation discharge in alternating positive-negative electrodes under axial magnetic field, noting electrons drift

23 p3319 A72-43403

Calculation of the parameters of a plasma accelerated in a high-frequency electric field and a static magnetic field

23 p3320 A72-43660

Plasma-beam interaction in limited geometry: Temperature effects

23 p3321 A72-43700

Laplace equation for homogeneous magnetic field perturbation by superconducting elliptical cylinder and by two parallel circular cylinders

23 p3313 A72-43779

Longitudinal dielectric tensor for an electron gas in a uniform magnetic field.

23 p3321 A72-43808

Method for solving the problem of radiation in an anisotropic plasma

23 p3321 A72-44220

Circularly polarized waves in magnetoplasmas containing negative ions.

23 p3323 A72-44533

Multicomponent plasmas with static magnetic field, deriving dielectric tensor and dispersion relation for wave propagation by linearization technique

24 p3428 A72-44967

Longitudinal magnetic field effect on the characteristics of a high frequency ion source

24 p3428 A72-45015

Charged particles propagation in magnetic field and scattering medium with constant and variable transport mean free path, applying to proton propagation for solar flares

24 p3435 A72-45076

Kinetic approximation for confined electron beam stability in plasma situated in magnetic field, deriving instability increments and dispersion relations

24 p3428 A72-45078

Superhigh-frequency heating of a plasma and longitudinal electron heat conductivity in a magnetic field

24 p3429 A72-45492

Current induced drift rate of plasma electrons in electric and magnetic fields, noting electron velocities in turbulent heating of plasma

24 p3429 A72-45507

Current-driven drift wave instability in a sheared magnetic field.

24 p3430 A72-45570

Thermal conductivity in dirty transition-metal superconductors near the upper critical field.

24 p3432 A72-45675

Plasma-ion beam system drift beam instability in longitudinal magnetic field, noting oscillations frequencies dependence

24 p3431 A72-45713

MAGNETIC FILMS

Domain configuration observation of magnetic holograms in oriented MnBi films

03 p0359 A72-13447

MnBi magnetic film optical memory system characteristics evaluation, considering laser power requirement, bit packing density and SNR

[IEEE PAPER 3,4]

03 p0332 A72-13754

Ten million bit magnetic film computer memory, discussing design, fabrication, performance and cost per bit

[IEEE PAPER 11,1]

03 p0327 A72-13761

Nondestructive readout in computer storage of plated wires on Permalloy film deposited substrates, testing design parameters effects on performance

[IEEE PAPER 11,2]

03 p0332 A72-13762

Plated-wire computer memory using thin Permalloy film on W wire substrate, testing nondestructive and destructive readout characteristics

[IEEE PAPER 11,3]

03 p0327 A72-13763

High speed easy rewrite read-only memory using plated wire with multilayered nondestructive readout magnetic thin film, testing performance

[IEEE PAPER 11,4]

03 p0332 A72-13764

Destructive readout computer memory of wire substrate electrodeposited with two thin Permalloy layers separated by Cu

[IEEE PAPER 11,5]

03 p0332 A72-13765

Iterative hysteretic model for calculating magnetization distribution in thin magnetic layer for digital recording systems

[IEEE PAPER 14,7]

03 p0328 A72-13769

Coupled-film closed-easy-axis arrays for large capacity NDRO multiple-write bulk memory, discussing disturb mechanisms limitation on performance and design

[IEEE PAPER 21,9]

03 p0328 A72-13780

Annealing effects in plated-wire memory elements, discussing recrystallization in Permalloy films from grain size and magnetic dispersion observations

04 p0504 A72-15716

Magnetic stress anisotropy field in plated cylindrical Permalloy films, determining relationships to circumferential composition variation, geometry and easy-axis dispersion

04 p0564 A72-15717

Bubble and strip magnetic domains creation, annihilation and manipulation in epitaxial magnetic garnet films by laser beam thermal absorption induced local heating

22 p3185 A72-42612

MAGNETIC FLUX

Dember-Hall voltage ratio for low magnetoconcentration in intrinsic semiconductor

01 p0113 A72-10044

Magnetospheric magnetic field distortions under quiet and slightly disturbed conditions, obtaining scalar intensity with OGO 3 and 5 rubidium vapor magnetometer

01 p0060 A72-10886

Solar magnetic fields time fluctuation determination using longitudinal, intensity and line of sight velocity measurements

03 p0356 A72-13278

Magnetic field strengths from umbral spectral lines in sunspots

03 p0428 A72-13301

Solar magnetic field structure determination in active regions from H alpha morphology obtained with chromospheric magnetograph, discussing emerging flux region role

03 p0428 A72-13304

Solar magnetic fields time fluctuation determination using longitudinal, intensity and line of sight velocity measurements

03 p0430 A72-13318

MHD processes responsible for solar flares in polarity boundaries of magnetic fields, determining magnetic energy change and flux

03 p0410 A72-13322

Solar proton flare connection with strong electric currents, discussing net magnetic flux changes and electric conductivity and field strength

03 p0410 A72-13326

Plasma jet formation within high pressure discharges in air at atmospheric pressure, discussing electrode configuration, current density and accelerating magnetic field strength

03 p0396 A72-13662

Polyphase signal generators, using reversed flux region propagation in saturable ring core controlled by switching transistors operation

[IEEE PAPER 17,5]

03 p0322 A72-13773

Two dimensional MHD turbulent flow generation in strong magnetic field

03 p0398 A72-14004

Inviscid incompressible conducting fluid motion under line sink in uniform strong magnetic field

[AD-740535]

04 p0550 A72-15343

Superposable and self-superposable MGD flows from nonlinear differential equations, considering entropy, flow velocity and magnetic field strength

05 p0694 A72-16030

Galactic high energy electron differential spectrum, estimating spatial distribution and random magnetic field intensity

05 p0709 A72-16237

Electromagnetic wave propagation in rectangular waveguide with periodic ferrite structure, presenting computer graphics for stop bandwidth vs magnetic field strength

05 p0627 A72-16342

Sunspot magnetic field strength rapid variation, discussing spot group development and flare activity

05 p0722 A72-17155

Plasma jet injection stoppage and reflection in strong transverse magnetic field, considering instability due to flow interactions

06 p0860 A72-17694

Magnetic flux determination in magnetosphere tail during substorm from auroral oval boundary and center location observation

06 p0807 A72-17985

Output power dependence on pressure and magnetic field strength in Kr ion laser for green, yellow and red lines

06 p0826 A72-18010

Geomagnetic field intensity fluctuations due to events in atmosphere, ionosphere, magnetosphere and in interplanetary space connected with solar activity

06 p0809 A72-18276

Nonlinear microwave absorption by plasma between cyclotron and hybrid frequencies for critical magnetic field

06 p0776 A72-18408

Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources

06 p0863 A72-18415

Low latitude surface horizontal magnetic field intensity depression due to quiet time ring current in magnetosphere as function of solar wind velocity

07 p0155 A72-18884

Critical magnetic flux indications of microanomalous plasma diffusion in electron bombardment ion engines

07 p0154 A72-19614

Local structure of solar magnetic fields in sunspots as complexes of microspots

07 p1079 A72-20008

Optimal location of nonreciprocal disk shaped YIG element traveling wave quantum rub paramagnetic amplifier for weak magnetic levels

08 p1138 A72-20795

Impedance strip synthesis on symmetric cylindrical antenna excited by phased magnetic flux ring, determining radiation pattern for pure reactance conditions

08 p1131 A72-20932

Pulsar braking index and period-pulse width distribution calculations within proposed model leading to neutron star surface magnetic field strength estimates

08 p1235 A72-21389

Boltzmann equation solution in terms of irreducible spherical tensors and Talmi coefficients, calculating stress tensor for fully ionized plasma in strong magnetic field

09 p1341 A72-22681

Solar wind properties and discontinuity characteristics, describing particle densities, wind speed, magnetic field level and near earth electron and ion temperatures

09 p1377 A72-22756

Whistler damping factor dependence on magnetic field strength in geometrical optics approximation, emphasizing nonlinear effects at low frequencies in ionospheric propagation

09 p1282 A72-23516

Rb 87 line shift produced by rare buffer gases and molecular nitrogen measured from applied magnetic field magnitude and hyperfine structure of D lines

10 p1490 A72-24040

Geomagnetic field inflation during magnetic storm main phase, considering energy sources and injected proton plasma radial velocity

10 p1472 A72-24274

Semiconductor IC transducers for electrical readout of optical radiation, mechanical stress and magnetic field strength

10 p1448 A72-24282

Normal ionizing shock waves characteristics in He under varying conditions of magnetic field strength, discharge current and gas pressure

11 p1694 A72-25789

Electron bombardment ion thruster performance characteristics with variable magnetic baffle and hollow cathode

[AIAA PAPER 72-489]

11 p1710 A72-26214

Ar laser levels population inversion dependence on current density, discharge tube pressure and magnetic flux

11 p1649 A72-26350

Magnetic field line connection between F region irregularities causing scintillation and ionospheric conditions inducing spread E

11 p1625 A72-26405

Geomagnetic tail and substorm activity structure from IMP-3 magnetic data, discussing plasma sheet thickness changes and magnetic flux distribution

11 p1627 A72-26533

Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation

12 p1847 A72-27055

One-wavelength MHD induction generator operated on NaK flow system with various excitation conditions, calculating magnetic flux density and power by Fourier series

13 p1900 A72-29364

Drift dissipative instability in bounded gas discharge plasma within magnetic field, investigating oscillations dependence on gas pressure and field strength

13 p2016 A72-29605

Plasma ion heating by magnetoacoustic waves, presenting resonance peak-magnetic field intensity relations for various densities and ion energy

13 p2019 A72-29913

Energy storage in chromospheric magnetic flux ropes in solar flares, discussing kink perturbation instability suppression

13 p2049 A72-29936

Minimum magnetic field energy of two dimensional magnetosphere with neutral sheet for arbitrary dipole inclination to solar wind as function of potential difference on boundary points

14 p2101 A72-30643

Sense coil geometry and drive waveform effects on low level flux gate magnetometers sensor noise

15 p2233 A72-31507

Ar laser levels population inversion dependence on current density, discharge tube pressure and magnetic flux

16 p2402 A72-33703

Nonlinear microwave absorption by plasma between cyclotron and hybrid frequencies for critical magnetic field

17 p2588 A72-34858

Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources

17 p2588 A72-34864

Rotary shocks and waves of relativistic magnetohydrodynamics

17 p2593 A72-35908

Earth surface magnetic field intensity variations in terms of magnetospheric resonator excitation, assuming three dimensional Alfvén waves

18 p2688 A72-36869

Generation of the large-scale magnetic field of the galaxy. II

19 p2864 A72-38079

A line-profile Stokesmeter - Preliminary results on non-sunspot fields.

20 p2971 A72-39761

On the filamentary nature of solar magnetic fields.

20 p2971 A72-39762

On the filamentary nature of active-region magnetic fields.

20 p2971 A72-39764

Flux vortices and transport currents in type II superconductors.

20 p2961 A72-39809

HF absorption of electromagnetic field in ionized oxygen plasma as function of dc discharge current

20 p2958 A72-39969

Sweet's mechanism for the destruction of magnetic flux.

20 p2955 A72-40017

A numerical solution for the near and far fields of an annular ring of magnetic current.

21 p3015 A72-40354

Drift dissipative instability in bounded gas discharge plasma within magnetic field, investigating oscillations dependence on gas pressure and field strength

21 p3091 A72-40659

Activity of the secular behavior of the geomagnetic field

22 p3168 A72-41924

Solar polar regions magnetic fields polarity and strength during 1960-1971

22 p3221 A72-42026

A possibly direct measurement of coronal magnetic field strengths.

22 p3222 A72-42042

Plasma sheet characteristics of geomagnetic tail at 60 earth radii, inferring spatial distribution of magnetic field magnitude and plasma energy density

22 p3211 A72-42407

An optical magnetic probe with pulsed detector voltage.

22 p3177 A72-42447

Numerical integration of integral equation for phased array radiation modeled by impedance fila-

- ments in conductive plane, noting excitation by magnetic flux 22 p3159 A72-42663
- Magnetic flux penetration into superconducting thin films. 23 p3323 A72-43271
- Electric field orientation, magnetic field strength and high voltage pulse delay effects on spark chamber track displacement from true particle trajectory 23 p3291 A72-44441
- Magnetic field fluctuations during substorms. 24 p3396 A72-44853
- Electron bremsstrahlung from hot plasma in the presence of strong magnetic field. 24 p3431 A72-45627
- Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation 24 p3427 A72-45708
- MAGNETIC FORMING**
- Al alloys degree of deformation dependence on pulse energy during extrusion by pulsed magnetic field, showing hardening effect 09 p1319 A72-22865
- Magnetic-explosive welding /magneweld/ process using capacitor discharge through wire coil, noting sintered Al powder and Zircaloy 2 applications 09 p1321 A72-23638
- Electrohydraulic and electromagnetic metal forming, using capacitor stored energy conversion into hydraulic shock waves or magnetic pressure to deform sheet metal components, pipes, etc 15 p2243 A72-31323
- MAGNETIC INDUCTION**
- Aligned fields in MHD shock polar equation, obtaining magnetic induction polar variables 01 p0106 A72-10135
- Geomagnetism, discussing world field distribution, secular variation, paleomagnetism, archaeomagnetism, origin, magnetic anomaly and earth electromagnetic induction 01 p0053 A72-10168
- Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences 02 p0217 A72-11939
- Filamentary magnetic structure production on plasma current sheath of coaxial deuterium operated accelerator for laboratory observations of solar flare processes 03 p0411 A72-13338
- Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities 03 p0311 A72-13564
- Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current 03 p0395 A72-13570
- Variational problem of conducting fluid flow in MHD channel at large magnetic Reynolds numbers at induction saturation 03 p0397 A72-13999
- Anisotropic plasma rotational discontinuity theory, considering parallel and perpendicular components of plasma pressure and magnetic induction 05 p0695 A72-16074
- Neutral rotating mass shell surrounding concentric stationary electrically charged insulation, calculating induced dipole-like magnetic field from coupled linearized general relativity field equations 06 p0853 A72-18423
- Magnetic induction distribution in second species superconductor cylindrical samples after limited flux jumps, proposing instability propagation model 09 p1369 A72-22797
- Electron bombardment type simplified ion source with magnetic field induction by filament heating current, discussing design and characteristics 10 p1518 A72-23965
- Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities 11 p1691 A72-26751
- Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current 11 p1699 A72-26757
- Steel components contact fatigue kinetics measurement by emf increase of inductive sensor 12 p1887 A72-28245
- Machine oil wear degree and Fe content determination by placing sample into induction coil and measuring coil Q at RF 13 p1957 A72-29142
- Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences 13 p1949 A72-29251
- Solid and composite rotor induction motors, comparing predicted characteristics based on analytical and numerical analyses 15 p2182 A72-31779
- Device for ac induction measurements in air, using the Gauss effect in germanium semiconductor diodes 17 p2529 A72-34767
- Voltagages induced in superconductors in the absence of transport currents. 18 p2719 A72-36744
- A kinematic theory of large magnetic Reynolds number dynamos. 19 p2833 A72-37248
- Some problems of electromagnetic induction in the equatorial electrojet region. II - The analysis of magnetic and telluric variations at Zaria, Nigeria. 19 p2789 A72-37772
- MAGNETIC INDUCTION PROBES**
- U MAGNETIC PROBES**
- MAGNETIC LENSES**

- Geomagnetic field measurement, discussing variometers and magnetographs theory 06 p0812 A72-17370
- Geomagnetic field vector components measurement methods, considering data processing problems 06 p0812 A72-17371
- Geophysical applications of high resolution magnetometers to geomagnetic measurements, archaeological investigations and satellite sounding of planetary magnetic fields 06 p0812 A72-17374
- Magnetic vector directions determination in sunspots by fringe technique with corrections for instrumental polarization in line spectrum 06 p0889 A72-18326
- Dissipative magnetic parameters measurement in ferrite and insertion loss measurement in waveguide Y-circulators below microwave resonance 06 p0786 A72-18367
- Transverse ionizing shock waves in gaseous hydrogen at speeds to 4000 km/sec, presenting magnetic shock structure and magnetic field jump measurements [AD-738620] 06 p0863 A72-18531
- Imp 5 magnetic field measurements at high geomagnetic latitudes in outer magnetosphere near noon meridian, noting depressed field region centered on polar cusp 07 p0975 A72-19146
- Interplanetary magnetic sector structure at 1962-1969 solar maxima, noting Pioneer 9 magnetometer experiment observations 07 p1071 A72-19161
- Ultrasensitive measurement technique for low microwave susceptibility on ferrite samples featuring feedback scheme for signal klystron locking 07 p0955 A72-19320
- Pulsar rotation and dispersion from polarization and pulse arrival time observations, calculating magnetic field components in path to pulsars 07 p1072 A72-19343
- Transverse magnetic field measurement over sunspot in chromosphere, noting fan-shaped field line divergence 08 p1232 A72-21135
- Magnetic spectra measurement of powdered hexagonal ferrites in millimeter wavelength range during grinding and after heat treatment 08 p1218 A72-21875
- Magnetic field measurement methods and magnetometers performance in superconducting, thin film, resonance and fluxgate areas 09 p1308 A72-22465
- Ferromagnetic thin film magnetometers operation and performance characteristics for magnetic field measurement 09 p1308 A72-22467
- Resonance magnetometers for magnetic field measurement, discussing classification, operation principles and general properties 09 p1308 A72-22468
- Fluxgate magnetometry, discussing weak field sensors, low power devices and various applications 09 p1308 A72-22469
- Diamagnetic energy measurements on rotating plasma in crossed static electric and magnetic fields with short circuiting metal wall 10 p1519 A72-24097
- Search coil magnetometer for measurement of weak alternating magnetic fields encountered by Helios solar probe in space 11 p1632 A72-25804
- Magnetic field direction measurement in Tokamak toroidal plasma by laser light scattering, using Fabry-Perot interferometer 11 p1697 A72-26583
- Metagalactic magnetic field contributions to observed Faraday rotation measurements for distant extragalactic radio sources 13 p2039 A72-29088
- Aeros satellite magnetic properties, describing measurement procedures for component induced disturbance fields, dipole moments and eddy currents 13 p1940 A72-30080
- Sense coil geometry and drive waveform effects on low level flux gate magnetometers sensor noise 15 p2233 A72-31507
- Tansei satellite spin axis orientation measurement by two flux-gate magnetometers and sun sensor 15 p2272 A72-32334

Magnetic field distribution measurement in axisymmetric plasma column inside Tokamak device by alpha particle beam from radioisotope

16 p2434 A72-32818

Spin effects on satellite-borne cylindrical probe electron density measurements, considering satellite wake and geomagnetic field effects

16 p2389 A72-32962

Flux quantization in superconductors demonstrated by magnetometer probe measurement of magnetic field trapped in thin In film holes

16 p2441 A72-33225

Magnetic balance for magnetic saturation measurement and determination of retained austenite, Curie temperature, permeability and martensite content

16 p2391 A72-33237

Nondestructive test for measuring the state of heat treatment in closure welds.

18 p2695 A72-36672

The treatment of the Stokes parameters and measurement of magnetic field.

20 p2970 A72-39755

Investigation of the structure of a high-current discharge in a lithium plasma

22 p3209 A72-41878

A possibly direct measurement of coronal magnetic field strengths.

22 p3222 A72-42042

Simultaneous solar-wind plasma and magnetic-field measurements in the expected region of the extended geomagnetic tail.

22 p3170 A72-42405

Specific-heat and magnetic measurements in superconducting Ta-Nb alloys.

23 p3323 A72-43273

The equatorial electrojet according to measurements from the Cosmos 321 satellite

23 p3328 A72-43369

Magnetic anomalies in New Guinea-New Zealand region from geomagnetic measurements with proton magnetometer, noting effects of andesite-basalt volcanic processes and nuclear precession signal

23 p3284 A72-43380

Magnetism of meteorites - A review of Russian studies.

23 p3339 A72-44129

Pressure and magnetic field probe measurements in transverse shock waves in ionizing hydromagnetic regimes, investigating bow shock effects on accuracy

24 p3390 A72-44708

Approaches to verification and solution of magnetic particle inspection problems.

24 p3407 A72-44903

MAGNETIC MEMORIES

U MAGNETIC STORAGE

MAGNETIC METALS

U MAGNETIC MATERIALS

U METALS

MAGNETIC MIRRORS

Flutelike microinstabilities in mirror-confined homogeneous magnetized one-species plasma with broad perpendicular velocity distribution

04 p0559 A72-15354

Hydrogen plasma generation by microwave field in magnetic-mirror device due to electron cyclotron resonance, measuring transverse diffusion coefficient dependence on magnetic field

07 p1046 A72-20506

Velocity space instability in hot electron plasma created by adiabatic compression in pulsed magnetic mirror, observing radiation bursts below electron cyclotron frequency during compression

08 p1213 A72-21257

Colliding plasma flows motion and capture in transverse magnetic field with mirror configuration, noting polarization effect

09 p1362 A72-23209

Magnetic mirror system to study Lorentz ionization of highly excited hydrogen atoms with quantum numbers 6-7 in strong magnetic fields

09 p1363 A72-23222

Rotating low density plasma in magnetic mirror trap with Penning discharge, determining conditions for oscillations damping and plasma lifetime

10 p1521 A72-24354

Magnetic mirrors for highly stripped heavy ions production in hot electron plasmas by low voltage high current electron beam

10 p1524 A72-25035

Collisional distributions in mirror plasmas, using successive approximation technique for Fokker-Planck equation lowest eigenvalue and eigenmode

11 p1694 A72-25792

Electron density and temperature measurement from scattering of laser radiation in plasma within axisymmetric toroidal magnetic mirror machine

13 p2017 A72-29609

Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field

15 p2283 A72-31434

Magnetic field profile optimization for beta-limitation in minimum-B mirror confined plasma in nuclear reactor

16 p2432 A72-32805

Stable mirror plasma machine, determining particle distribution near loss cone by asymptotic analysis based on transit to mean collision times ratio

16 p2432 A72-32808

Electron density and temperature measurement from laser radiation scattering in plasma within axisymmetric toroidal magnetic mirror machine

21 p3091 A72-40663

Interaction of a streaming plasma with a magnetic mirror.

21 p3094 A72-41635

External high-frequency modulation of an electron beam and heating of plasma ions in the case of beam-plasma instability in the magnetic trap

21 p3095 A72-41678

External high-frequency modulation of an ion beam and the absorption of beam-plasma instability oscillations in a plasma situated in a magnetic field of mirror configuration

21 p3095 A72-41683

MAGNETIC MOMENTS

Dynamo theory MHD equations numerical solution, showing rapid variation of electromagnetism field, hydrodynamic velocities and earth core magnetic moment

02 p0217 A72-11933

Electromagnetic wave scattering characteristics at arbitrarily configured body with dimensions smaller than primary field wavelength, determining electric and magnetic moments

02 p0181 A72-12595

Electron paramagnetic resonance investigation of III-V compound semiconductor crystals, observing large magnetic moments, heteropolar chemical bonding and impurities

13 p2021 A72-28572

Dynamo theory MHD equations numerical solution, showing rapid variation of electromagnetism field, hydrodynamic velocities and earth core magnetic moment

13 p1949 A72-29245

Mossbauer and X ray structural analysis of nickel ferrite-chromite magnetic moments, comparing with theoretical data

14 p2141 A72-30171

Magnetoelastic effects in elastic dielectric analysis based on continuum with single magnetic moment, noting magnetically saturated material

15 p2274 A72-31482

Paramagnetic phase induced moment system containing substitutional impurities, calculating mode energies by Green function method in random phase approximation

15 p2295 A72-32546

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation

15 p2295 A72-32549

Induced electron emission dependence on polarization, frequency and intensity of second wave incident on electron with anomalous magnetic moment

16 p2424 A72-33365

Study of the Stark effect in the resonance lines of sodium by an atomic jet method

22 p3209 A72-43048

MAGNETIC PERMEABILITY

Pressure induced d band deformation effect on magnetic susceptibility of Ti-V and V-Cr alloys

03 p0370 A72-13087

Digital magnetic temperature transducer using permeability discontinuity at Curie temperature for high stability and reproducibility without calibration [IEEE PAPER 8, 5]

03 p0332 A72-13758

Second harmonic generation, coherence lengths and second order susceptibilities near band edge in InSb as function of magnetic field

03 p0404 A72-14269

Electron correlation effects on low temperature thermodynamics of amorphous semiconductors, predicting Curie law magnetic susceptibility and equilibrium electronic specific heat dependence on temperature

04 p0562 A72-15153

NMR behavior and magnetic susceptibility of intermetallic compound CeAl, noting exchange polarization of RKKY type between 4f electrons and conduction electrons

05 p0702 A72-16784

Electrical resistance, Hall coefficient and magnetic susceptibility of transition metal nitrides at low and room temperatures

06 p0827 A72-17386

Ultrasensitive measurement technique for low microwave susceptibility on ferrite samples featuring feedback scheme for signal klystron locking

07 p0955 A72-19320

Diamagnetic enhancement of magnetic susceptibility of amorphous semiconductors, considering mobility states and paramagnetic Van Vleck reduction

09 p1373 A72-23508

Magnetic susceptibility of ternary Al-Mn alloys with Ti, Va, Cr, Fe, Co, Ni, Cu and Zn, describing microstructure and aging experiments

10 p1494 A72-23832

Fcc lattice ferromagnetic alloys para-process susceptibility anomalous increase explanation by phase transition thermodynamic theory

13 p1977 A72-28911

Ionosphere radio wave propagation from fluid plasma wave and magnetically nonpermeable medium electrodynamics studies

15 p2193 A72-31281

Langmuir probe susceptance- and conductance-voltage measurements via in-phase and quadrature component plots as function of applied dc potential

15 p2241 A72-32515

Orbiting electron magnetic susceptibility derivation from many band Hamiltonian using Bloch representation to avoid decoupling transformation ambiguity

15 p2282 A72-32547

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation

15 p2295 A72-32549

Magnetic balance for magnetic saturation measurement and determination of retained austenite, Curie temperature, permeability and martensite content

16 p2391 A72-33237

Magnetic shielding effectiveness of metal cylinder tubes with periodically imbedded annular transverse Bloch walls of high permeability

16 p2369 A72-33669

Special features of the operation of ferroperobs with low-permeability core moulds at small excitation fields.

19 p2804 A72-38760

Magnetism of meteorites - A review of Russian studies.

23 p3339 A72-44129

Application of a strongly doped semiconductor model to the study of thermodynamic and conductivity properties

24 p3432 A72-45068

MAGNETIC POLES

Electromagnetic emission from pulsar with magnetic force tube on surface of magnetosphere treated as rotating magnetic multipole

02 p0285 A72-12833

Solar polar magnetic fields, discussing inversion line location, observations, data analysis, general field and computer reduction

03 p0432 A72-13356

Magnetic monopole search in lunar samples by electromagnetic measurement, determining flux limits for cosmic radiation and pair production in proton-nucleon collisions

06 p0880 A72-17884

On the state of the geomagnetic field and its reversals.

17 p2548 A72-35323

H alpha loops incompatibility with stable filaments/prominences/ noting magnetic loops existence between regions of opposite polarity

17 p2617 A72-35704

Three dimensional seismic monitoring system developed from inertial guidance gyroscopes and accelerometers, noting pole shift observation, tilting during earth tides and earthquakes forecasting [AIAA PAPER 72-840]

20 p2923 A72-39088

Solar polar regions magnetic fields polarity and strength during 1960-1971

22 p3221 A72-42026

MAGNETIC PROBES

Fluxgate magnetometry, discussing weak field sensors, low power devices and various applications

09 p1308 A72-22469

Nanosecond response magnetic probes to measure fast disturbances in oblique shock waves within collisionless plasma, describing experimental technique

15 p2235 A72-31646

Magnetic probe measurement of random fluctuations in transverse magnetic field caused by He plasma produced in arc discharge

15 p2287 A72-32408

NT REMANENCE
NT SPIN-LATTICE RELAXATION
NT THERMOMAGNETIC EFFECTS

Short wave radio reception and signal path at magnetically conjugate point in Southern Hemisphere, using 40-110 msec delay times

Apollo 12 lunar crystalline rock and fines magnetic properties measurement, noting magnetic minerals composition

Lunar induced and permanent magnetism, discussing solar wind dynamic pressure effects and Apollo data

Large scale solar magnetic field properties, discussing rotation, patterns and effects on corona

Reliable Permalloy integrated magnetic memories with realizable low switching coefficients and square-loop properties, discussing design and fabrication

Lunar craters and maria origin from rock and sample chemical composition and magnetic differentiation

Nd-Dy alloy magnetic and structural properties over entire composition range

La superconductivity pressure dependence based on valency considerations, noting actinides metals and alloys localized magnetism explanation by simple model

Magnetic properties and paleomagnetic data of Permian Cutler and Elephant Canyon formations in Utah, discussing thermal demagnetization and origin of stable magnetization

Viking Lander magnetic properties investigation of Martian surface with implications for planetary composition and differentiation and atmospheric interaction

Magnetic properties, electrical resistivity and hardness of vacuum melted Ni-Fe-Ta alloys

Skew magnetic structure of ionizing shock waves with ohmic dissipation as dominant diffusion mechanism

Magnetic structure of ionizing oblique shock waves with transverse and normal components in zero magnetic Prandtl number limit

Magnetic structure of normal ionizing shock waves with zero transverse energetic component

Magnetovariometers design, operation and applications, discussing ferromagnetic materials properties effect on performance characteristics

Investigation method for shock wave induced demagnetization in YIG, noting impact study of magnetic properties

Aeros satellite magnetic properties, describing measurement procedures for component induced disturbance fields, dipole moments and eddy currents

Magnetization and temperature interrelationship in high constant magnetic field for Apollo 11, 12 and 14 rocks, obtaining magnetic hysteresis curves

Degenerate electron gas magnetic properties implications for metals, white dwarfs and neutron stars, discussing nonmagnetic state for thermal equilibrium

Structural rings impulsively loaded by magnetic pressure between two parallel current-carrying conductors

Magnetic materials.

Magnetic properties and texture of a thin strip of nickel-iron-molybdenum alloys

Magnetic properties of the powders of highly dispersed iron-cobalt-nickel alloys

MAGNETIC PUMPING

Electron-ion heating in high beta perpendicular collisionless shock waves by plasma cylinder magnetic compression using theta pinch

Nonthermal emission of a magnetoactive plasma in the field of super-high-frequency pumping wave

Parallel pumping of spin waves in yttrium garnet single crystals

Resonances in the collisionless heating of a plasma by transit time magnetic pumping.

MAGNETIC RECORDING

Long life magnetic tape recorder for onboard data storage in space flights, discussing two motor tape transport and static memories for improved reliability

Iterative hysteretic model for calculating magnetization distribution in thin magnetic layer for digital recording systems

Solar magnetogram recorded mean photospheric magnetic field cross correlation with interplanetary magnetic field

Error probability distribution of digital data magnetic recording in computer drum memory

Control equipment designs for phase error estimation of pulse sequences in multichannel magnetic recording systems

DAMIEN III digital magnetic tape recording system for aircraft flight test data acquisition, discussing components

Magnetic recording head designs, covering information density, head-tape subsystems and head materials electrical and mechanical suitability

Instantaneous velocity nonuniformity measurement of mechanism motion using phasemeters with magnetic data recording

Broadband magnetic tape predetection recording of data modulated carrier MHz radio telemetry signals, applying to Aris, Mercury and Gemini programs

MAGNETIC RELAXATION

NT SPIN-LATTICE RELAXATION

Proton and fluorine nuclear magnetic spin-lattice relaxations due to internal rotations in magnesium fluorosilicate hexahydrate

Dislocation structure analysis in ferromagnetic materials by magnetic techniques, discussing methods based on magnetization curve static properties and magnetic relaxation phenomena

Relaxation methods of magnetic and acoustic spectroscopy for studies of gravitational and inertial dipoles and quadrupoles in molecules and nuclei of solid bodies

MAGNETIC RESONANCE

NT ELECTRON

RESONANCE

NT FERROMAGNETIC RESONANCE

NT NUCLEAR MAGNETIC RESONANCE

NT PARAMAGNETIC RESONANCE

NT PROTON MAGNETIC RESONANCE

NT PROTON RESONANCE

Quasi-linear theory of magnetosphere gyroresonant wave-particle interactions, discussing particle distribution function anisotropy, wave packet effects, whistler mode, energy and pitch angle distributions, etc

Resonance magnetometers for magnetic field measurement, discussing classification, operation principles and general properties

Abrikosov vortex lattice in superconductors, calculating resonance linewidth and vacancy formation energy

In and Gd substitution effect in calcium-vanadium garnets as potential microwave materials, discussing magnetic properties, resonance linewidth and temperature stability

Earth surface magnetic field intensity variations in terms of magnetospheric resonator excitation, assuming three dimensional Alfvén waves

Theoretical study of the Zeeman spectrum and of the magnetic resonance in the evanescent wave of Fresnel - Case of the magnetic transverse mode

Pressure shift of the magnetic resonance line of neon in a He-Ne laser.

MAGNETIC RIGIDITY

Solar cosmic ray cutoff rigidity increase during polar cap absorption related to geomagnetic perturbation onset

Solar cosmic ray cut-off rigidity increase during PCA related to geomagnetic perturbation onset

MAGNETIC SHIELDING

Active shielding against radiation in space using charged particle deflection by electric and magnetic fields

Magnetic shielding effectiveness of metal cylinder tubes with periodically imbedded annular transverse Bloch walls of high permeability

MAGNETIC SIGNALS

Polarization and spatial and frequency characteristics of ground signal resulting from finite source Pc 1 micropulsation disturbance

Tunable wide field birefringent element / filter magnetograph/ to separate polarized magnetic signal from selected spectral line width

MAGNETIC SIGNATURES

Real time analog video magnetogram, describing differential photometer for electronic subtraction technique

Solar magnetic field fine structure from filter magnetograms, tabulating magnetic elements frequency distributions

Solar magnetic field variations in McMath Regions, using longitudinal magnetograms time sequences

Electric field aligned sheet currents of low energy electrons and protons near auroral arc, obtaining magnetic signatures

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi

Signatures for substorm development of the growth phase and expansion phase.

Energy spectrum of small scale solar magnetic fields.

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi

MAGNETIC SPECTROSCOPY

Superconducting magnetic spectrometer for cosmic ray nuclei spectrum analysis, describing design, calibration and operation

Digital pulse programmer with saturation burst sequence for pulsed nuclear magnetic resonance spectroscopy

Varian HR-60 NMR spectrometer probe with Dewared insert for low temperature operation

Magnetic-field variations in 78 Virginis, beta Coronae Borealis, and 73 Draconis.

Particle trajectory and time of flight measurement in search for anti-alpha particles in primary cosmic radiation, using magnetic spectrometer with spark chambers

MAGNETIC STARS

Observed light curve amplitude phase relations in Ap magnetic star UVB system, using oblique rotator model

Cosmic rays generation by charged particles acceleration in electromagnetic constant crossed fields during magnetic stars contraction to neutron star dimensions

Magnetic star theory, postulating stellar magnetic flux as slowly decaying relic of flux in prestar gas, considering dissipation processes and rotation

Dynamo theory of magnetic stars, proposing symmetrical rotator as alternative to skew rotator

Magnetic neutron stars /pulsars/ atmosphere, questioning vacuum approximation method applicability

Stellar MHD, discussing strongly magnetic stars identification and slow rotation origin based on oblique rotator model

Spectrophotometric investigation of Ap stars. I - Two-dimensional quantitative spectral classification

Spectral variabilities of magnetic peculiar A stars associated with atmospheric chemical composition anomalies, using inclined rotator model

- Ten million bit magnetic film computer memory, discussing design, fabrication, performance and cost per bit
[IEEE PAPER 11,1] 03 p0327 A72-13761
- Nondestructive readout in computer storage of plated wires on Permalloy film deposited substrates, testing design parameters effects on performance
[IEEE PAPER 11,2] 03 p0332 A72-13762
- Plated-wire computer memory using thin Permalloy film on W wire substrate, testing nondestructive and destructive readout characteristics
[IEEE PAPER 11,3] 03 p0327 A72-13763
- High speed easy rewrite read-only memory using plated wire with multilayered nondestructive readout magnetic thin film, testing performance
[IEEE PAPER 11,4] 03 p0332 A72-13764
- Computerized design algorithm for ferrite core memory system, considering cross-temperature effect under worst driving conditions
[IEEE PAPER 11,8] 03 p0327 A72-13766
- Holographic optical techniques application to bulk magnetic storage for high information density and memory capacity and fast random access
[IEEE PAPER 19,4] 03 p0361 A72-13776
- Mathematical model for design of plated-wire magnetic memory cell, considering drive requirement minimization as criterion
[IEEE PAPER 21,1] 03 p0328 A72-13777
- Low cost large array of decoding magnetic switches with electrodeposited Au conductors and Permalloy memory elements featuring high output flux for low driving current
[IEEE PAPER 21,3] 03 p0328 A72-13778
- Reliable Permalloy integrated magnetic memories with realizable low switching coefficients and square-loop properties, discussing design and fabrication
[IEEE PAPER 21,4] 03 p0328 A72-13779
- Coupled-film closed-easy-axis arrays for large capacity NDRO multiple-write bulk memory, discussing disturb mechanisms limitation on performance and design
[IEEE PAPER 21,9] 03 p0328 A72-13780
- Magnetic bubble repertory dialer memory design, noting bit storage capacity and random access
[IEEE PAPER 28,1] 03 p0328 A72-13782
- Annealing effects in plated-wire memory elements, investigating Cu and Permalloy interdiffusion at low temperatures by X ray diffraction and electron beam microprobe
04 p0503 A72-15715
- Annealing effects in plated-wire memory elements, discussing recrystallization in Permalloy films from grain size and magnetic dispersion observations
04 p0504 A72-15716
- Mass storage systems technologies covering magnetic recording, surface wave acoustics, magneto-optic beam addressing, magnetic bubbles, switchable resistances and IC memories
09 p1283 A72-23413
- Storage characteristics of plated magnetic wire for nondestructive read and write
16 p2369 A72-33672
- MAGNETIC STORMS**
- Plasma sheet structures, dynamics and role in magnetospheric substorm onset as function of near earth and distant merging regions
01 p0052 A72-10082
- Geomagnetic storm field recovery near synchronous satellite ATS 1 in terms of ring current belt and plasma sheet variations
01 p0053 A72-10088
- Lower ionosphere ionization response to auroral particle fallout during 1968 substorms, using geomagnetic, VLF and balloon measurements
01 p0053 A72-10366
- Ionospheric composition of ions and neutral gases during magnetic storm, using coupled differential equations
01 p0054 A72-10425
- Decreasing period micropulsations during elementary magnetospheric substorms, discussing relation to ring current asymmetry development
01 p0059 A72-10602
- Earth magnetosphere boundary position, bow shock wave, transition region thickness and magnetopause currents magnetic fields during geomagnetic storms
01 p0059 A72-10605
- Auroral absorption and DR currents development during magnetic storms, discussing corpuscular fluxes arrival from magnetospheric tail into lower ionosphere
01 p0059 A72-10619
- High latitude magnetotail highly directed nearly monoenergetic positive ions population observation during geomagnetic storms, using Vela satellites electrostatic analyzers
01 p0060 A72-10887
- Magnetic field and plasma sheet variations observation by IMP 3 satellite in distant magnetotail during magnetospheric substorms
01 p0060 A72-10888
- Isolated magnetospheric substorms model, explaining electric field origin, cold plasma flow, magnetic field lines and particle phenomena
01 p0060 A72-10889
- Stable red arc 6300 Å emission calculation from satellite electron temperature and density data during geomagnetic storms
01 p0061 A72-10893
- Magnetospheric wave and particle phenomena correlation to convection electric fields in nighttime magnetosphere during isolated substorms
01 p0062 A72-10904
- ATS Faraday rotation measurement data on total electron content during geomagnetic storms, giving first midlatitude ionosphere average storm patterns and seasonal influence analysis
02 p0216 A72-11900
- DR-current belt dynamics during magnetic storm based on ground observation data on midlatitude red arcs
02 p0217 A72-11929
- Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution
02 p0217 A72-11940
- Incomplete ring current decay during magnetic storm development, discussing field asymmetry based on global network synchronous observations and generation mechanism by protons
02 p0218 A72-11949
- Geomagnetic storms and anomaly observation by Satellite 1964 83C telemetry data transmission to ground stations network
02 p0219 A72-12083
- Plasma sheet positive ions flux enhancement detection at lunar distance during lunar eclipse and geomagnetic storm
02 p0283 A72-12452
- Damped geomagnetic pulsations associated with geomagnetic storms interpreted as interaction between hydromagnetic oscillations and solar wind induced magnetospheric motions, discussing modified mathematical model
02 p0222 A72-12872
- Geomagnetic field and interplanetary plasma parameters daily variations correlation, taking into account corrections for storm time effects
03 p0348 A72-13511
- Plasma sheet thinning in substorms correlated to auroral oval poleward expansion and associated phenomena in magnetotail
03 p0348 A72-13514
- Magnetic storm effects on neutral atmospheric composition above 400 km, discussing energy deposition
03 p0349 A72-13518
- Vertical motions of midlatitude F 2 layer during magnetospheric substorms, investigating electric field distribution
03 p0349 A72-13519
- Soviet book on calms and storms in upper atmosphere covering energy variations, auroras, geomagnetic storms, weather forecasting, etc
03 p0350 A72-13967
- Solar wind effects on storms and structure of magnetosphere and radiation belt maintenance
03 p0350 A72-14304
- Statistical analysis of low latitude F 2 layer disturbances associated with sudden commencement type geomagnetic storms, investigating critical frequencies
04 p0516 A72-14937
- Upper atmosphere and ionosphere magnetic storm phenomena, showing atomic to molecular concentration ratio decrease
04 p0516 A72-14938
- Ionospheric electron content changes during 25-26 May 1967 magnetic storm event from geostationary satellite monitoring
04 p0516 A72-14940
- Atmospheric density near 150 km altitude from Cosmos 316 orbital decay, noting density increases during geomagnetic storms
05 p0655 A72-16070
- Magnetic storm disturbing effect on integral electron density in F 2 layer and in topside ionosphere
05 p0657 A72-16262
- Auroral substorms development phases, noting auroral arcs latitudinal shifting during genesis phase
05 p0657 A72-16273
- Magnetic baylike disturbances and multiple midlatitude 6300-Å auroral arcs during geomagnetic storm recovery phase and concurrent ionospheric current system
05 p0630 A72-16620
- Geomagnetic disturbances morphology, considering development and decay of magnetic storms and appearance of geomagnetic pulsations
06 p0802 A72-17367
- Worldwide magnetic storm due to solar wind interaction with geomagnetic field, discussing field deformation
06 p0803 A72-17368
- VLF wave excitation during sudden storm commencement, causing magnetosphere trapped energetic electrons to diffuse and precipitate into lower ionosphere
06 p0803 A72-17451
- Geomagnetically trapped low energy proton flux distribution due to 17 April 1965 magnetic storm, noting adiabatic effects
06 p0803 A72-17452
- Geomagnetic storm associated quasi-sinusoidal magnetic field micropulsations due to Alfvén/drift instability or enhanced storm-time ring current
06 p0804 A72-17454
- Equatorward motion of midday auroras during magnetospheric substorms, using all sky photographs
06 p0805 A72-17463
- Solar flare effectiveness relation to magnetic field orientation from magnetic storms development analysis
06 p0873 A72-17984
- Ionospheric storms features based on F2 critical frequency data, investigating magnetosphere during geomagnetic storms
06 p0810 A72-18280
- Geomagnetic tail role in magnetospheric substorms, discussing solar wind energy storage, magnetic merging process and plasma sheet origin
07 p0977 A72-20032
- Geomagnetic phenomena associated with auroras and magnetic storms, investigating analog modeling experiment by stationary electrical discharges under laboratory conditions
07 p0980 A72-20457
- Shock wave excitation by moving solar wind discontinuity in geomagnetic tail as cause of active phase of magnetospheric substorm
08 p1153 A72-20716
- Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere
08 p1153 A72-20717
- F 2 layer diffuse reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease
08 p1154 A72-20738
- Vertical distribution of electron density seasonal anomaly and storm effects in daytime midlatitudes topside ionosphere from Alouette 1 data
08 p1155 A72-20814
- Midlatitude and equatorial geomagnetic micropulsations during 13-14 January 1967 world-wide magnetic storm from ground and satellite observations
08 p1157 A72-21107
- Ionospheric electron density nighttime changes as function of local time, height and latitude during geomagnetic storms
08 p1157 A72-21113
- Perturbation effects on F 2 layer and outer ionosphere electron density profiles during successive magnetic storms from Alouette 1 satellite data
08 p1157 A72-21145
- Polar magnetic substorm generation through ionospheric current intensification in westward electrojet localized region, noting interplanetary magnetic field role
08 p1159 A72-21494
- Auroral zone neutral wind velocity and atmospheric temperature correlations with geomagnetic activity, considering ion-neutral particle drag as accelerating mechanism during magnetic storms
08 p1161 A72-21535
- Upper atmospheric oxygen red line diurnal variations and midnight minimum, noting emission relation to kinetic temperature in magnetic storm
09 p1296 A72-22234
- Equatorial ring current relation to polar electrojet during magnetosphere geomagnetic storm, discussing magnetosphere-ionosphere current systems
09 p1298 A72-22580
- Geomagnetic field inflation during magnetic storm main phase, considering energy sources and injected proton plasma radial velocity
10 p1472 A72-24274
- Magnetic storm effects in atmospheric neutral composition, noting thermospheric wind circulation role due to Joule heating within auroral zone
10 p1476 A72-24957
- Geometric parameters variations of ionospheric N/h/ profiles and characteristics during magnetic storm, discussing prognosis procedures from solar activity, latitude and season
11 p1594 A72-26273
- F region N/h/ profiles and parameters deviations during ionospheric and magnetic storms, discussing perturbation index
11 p1594 A72-26275
- Ogo-5 observation of lower hybrid resonance noise, bursts, VLF hiss and whistlers near plasmapause during large magnetic storm
11 p1624 A72-26399
- Geomagnetic tail and substorm activity structure from IMP-3 magnetic data, discussing plasma sheet thickness changes and magnetic flux distribution
11 p1627 A72-26533
- Geomagnetic field perturbation biological effects, studying geomagnetic storm field energy levels and magnetic flux variables relation to human sensitivity thresholds
12 p1773 A72-28210

Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by geomagnetic storms, noting ionization process time lag in lower ionosphere
13 p1945 A72-28580

DR-current belt dynamics during magnetic storm based on ground observation data on midlatitude red arcs
13 p1948 A72-29241

Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution
13 p1949 A72-29252

Incomplete ring current decay during magnetic storm development, discussing field asymmetry based on global network synchronous observations and generation mechanism by protons
13 p1949 A72-29261

Midnight auroral electrojet time variations relationship to midday auroras latitudinal shift during South Pole magnetospheric substorms
13 p1950 A72-29382

Low energy proton flux increases associated with geomagnetic storms due to interplanetary shock waves occurring during solar cosmic ray flare event decay
13 p2032 A72-29724

Global ionospheric electron density variations and associated thermospheric winds during 15-21 June 1965 geomagnetic storm from ground based and satellite data
13 p1953 A72-29805

Infrasonic excitation of red oxygen emission at 6300 A during geomagnetic storms at middle latitudes
14 p2098 A72-30146

Geomagnetic storms caused by quasi-stationary directed corpuscular streams resulting from solar chromosphere flares
14 p2147 A72-30487

Global electron concentration disturbances in low and middle latitude F2 during magnetic storm
14 p2100 A72-30635

Auroral electron spectrum space-time dynamics during magnetospheric substorms, using X ray bremsstrahlung balloon data
14 p2101 A72-30637

Expanding auroral bulge front photographs during auroral substorm, noting violent curl motions and arcs formation
15 p2223 A72-31439

Lower Arctic thermosphere neutral composition changes due to disturbances, considering atomic hydrogen, nitric oxide, hydroxyl, water vapor, nitrogen and oxygen
15 p2225 A72-31912

Unshocked solar wind detection by ATS 5 satellite during 8 March 1970 geomagnetic storm
15 p2299 A72-31960

Ionospheric ion temperatures and velocities and electron and neutral densities from incoherent scatter observations during 11 February 1969 magnetic storm
15 p2229 A72-32254

Geomagnetic substorm magneto-ionospheric effect, discussing electric field transmission, magnetic field variations and currents flowing in dynamo region
15 p2230 A72-32259

High latitude trapping boundary for 20 KeV electrons and 100 KeV protons during intense geomagnetic substorms, observing field-line motion
16 p2444 A72-32958

Solar flare producing regions statistical correlation to SC/SI events accounting for geomagnetic storms and Forbush decreases in terms of interplanetary streams
16 p2445 A72-33376

Model for magnetospheric substorm growth phase, noting daytime magnetopause convection onset, geomagnetic tail configurational changes and breakup with auroral electrojet development
16 p2387 A72-33903

Daytime irregular geomagnetic pulsation, Pid, and its relation to magnetospheric substorm.
17 p2546 A72-35062

Flaring-tail model explanation for geomagnetic tail configuration changes during magnetospheric substorm growth phase
17 p2548 A72-35589

Energetic electron intrusion into inner radiation zone during and after 2 September 1966 geomagnetic storm, noting radial diffusion role
17 p2601 A72-35596

Geomagnetic effect on the neutral temperature of the F region during the magnetic storm of September 1969.
17 p2549 A72-35603

Precipitation dynamics and energy spectrum of auroral electrons in the midnight sector during a magnetospheric substorm
17 p2550 A72-35854

Auroral substorm and proton auroras during moderate geomagnetic disturbances
17 p2550 A72-35857

Equatorial anomaly changes caused by ionospheric disturbances, noting diurnal variations of magnetic storm effect
17 p2551 A72-35868

Geomagnetic storms correlation with chromospheric flare series and with central meridian passages of recurrent positive plages
18 p2723 A72-36087

Comprehensive investigation of individual geomagnetic storms.
18 p2686 A72-36226

Geomagnetic activity and the solar situation in the neighbourhood of proton effects.
18 p2686 A72-36227

Sudden commencements of geomagnetic storms at the turn of two solar cycles.
18 p2686 A72-36228

Atmospheric model synthesis of observed electron temperatures and concentrations in tropical ionosphere during 8 March 1970 magnetic storm, noting F2 region features
18 p2686 A72-36296

North-south asymmetry in cosmic ray intensity increases before magnetic storms
18 p2722 A72-36851

Ionospheric magnetic disturbances during March 1970 related to solar flare corpuscular and proton fluxes, generating ring current and PCA absorption
18 p2688 A72-36857

Latitudinal energy distribution of geomagnetic disturbances
18 p2688 A72-36868

Measurements of MeV-electrons during the recovery-phase of a polar magnetic substorm on March 6, 1970.
19 p2789 A72-37409

Geomagnetic storms caused by quasi-stationary directional corpuscular streams resulting from solar chromosphere flares
19 p2851 A72-38316

Geomagnetic effect of solar wind rotational discontinuity observed by Explorer 34, noting magnetic storm initial phase relation to high latitude nonstationary ionospheric current attenuation
19 p2852 A72-38343

Shock wave excitation by moving solar wind discontinuity in geomagnetic tail as cause of active phase of magnetospheric substorm
19 p2791 A72-38344

Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere
19 p2791 A72-38345

F 2 layer spread reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease
19 p2791 A72-38366

Perturbation effects on F 2 layer and outer ionosphere electron density profiles during successive magnetic storms from Alouette 1 satellite data
20 p2916 A72-39250

Positive geomagnetic bays in evening high-latitudes and their possible connection with partial ring current.
21 p3049 A72-41387

On the physical mechanism of the magnetospheric substorm development.
22 p3169 A72-42012

Some topside electron density measurements from Ariel III satellite during the geomagnetic storm of 25-27 May 1967.
22 p3169 A72-42017

Magnetospheric substorm onset examined via simultaneous balloon X ray and electric field measurements, discussing ATS 5 observations
22 p3170 A72-42409

Coordinated observations of the magnetosphere - The development of a substorm.
22 p3171 A72-42410

Investigation of interaction between Pc 1 and 2 and Pc 5 micropulsations at the synchronous orbit during magnetic storms.
22 p3171 A72-42412

Statistical characteristics of storm-associated Pc 5 micropulsations observed at the synchronous equatorial orbit.
22 p3171 A72-42413

Geomagnetic storm and seasonal effects on spread of monthly distribution and average behavior of midlatitude F region electron peak density and slab thickness
22 p3172 A72-42434

Magnetic storm classification from geomagnetic field H and Z components behavior, associating with solar corpuscular flux
22 p3174 A72-42952

Families of geomagnetic storms, direction of the interplanetary magnetic field, and solar activity
23 p3283 A72-43371

Rocket measurements of electron influx during a major magnetic storm with type A aurora.
23 p3332 A72-44515

Quadruple conjugate pair observations of the sudden commencement absorption event on June 17, 1965.
23 p3286 A72-44526

Preconditions for the triggering of polar magnetic substorms by storm sudden commencements.
23 p3286 A72-44531

Symposium on the Morphology and Physics of Magnetospheric Substorms, Moscow, USSR, August 3, 1971, Proceedings.
24 p3395 A72-44846

Quiet, growth, expansive and recovery phases of auroral morphology, noting interplanetary magnetic field turning relation to substorm
24 p3396 A72-44848

Behavior of outer radiation zone and a new model of magnetospheric substorm.
24 p3396 A72-44850

Plasma sheet variations during substorms.
24 p3396 A72-44851

Magnetic field fluctuations during substorms.
24 p3396 A72-44853

Electric field variations during substorms - OGO-6 measurements.
24 p3396 A72-44854

Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by geomagnetic storms, noting ionization process time lag in lower ionosphere
24 p3397 A72-45080

MAGNETIC SUBSTORMS
U MAGNETIC STORMS
MAGNETIC SURVEYS
Papers on world geomagnetic survey 1957-1969 covering land, sea, airplane and polar-orbiting geophysical observatory satellite observations, magnetic anomalies and reference field
02 p0219 A72-12080

Geomagnetic survey by polar-orbiting OGO 2 and 4, discussing data acquisition and reduction results and accuracy
02 p0219 A72-12081

Geomagnetic survey by Cosmos-49 satellite as international program, discussing data analysis and observation accuracy
02 p0219 A72-12082

Magnetosphere and adjacent regions magnetic surveys by OGO 1 and 3 satellites, discussing magnetopause, bow shock, magnetosheath, geomagnetic tail, ring current and polar substorms
02 p0220 A72-12084

Magnetic survey worldwide earth coverage by land, sea and airplane measurements data
02 p0220 A72-12085

Conducting fluid convective motion in earth core estimated from geomagnetic field and time derivative data at earth surface
02 p0220 A72-12087

Latitudinal rotation direction daytime characteristics of pc 5 pulsation polarization based on global magnetic observations
18 p2689 A72-36870

Secular variation of the geomagnetic field in epoch 1965 to 1970 according to observatory and satellite data
18 p2689 A72-36871

Earth main magnetic field description by cartography and analytic methods based on dipole or spherical harmonic series representations
23 p3283 A72-43366

Some results of an analysis of Pc4-type steady geomagnetic pulsations at a network of stations
23 p3283 A72-43372

MAGNETIC SUSCEPTIBILITY
U MAGNETIC PERMEABILITY
MAGNETIC SUSPENSION
Electromagnetic suspension - Conference, Southampton, England, July 1971
10 p1460 A72-24756

Superconducting magnetic suspension and balance facility of supersonic wind tunnel for dynamic stability studies
10 p1460 A72-24757

Superconducting levitron machine for trapped hot plasma stability and confinement studies in vacuum, discussing construction and coil performance
10 p1460 A72-24758

Superconducting coil design for magnetic suspension of supersonic wind tunnel balance
10 p1460 A72-24759

Automatic electromagnetic suspensions using tuned RLC saturable reactor control
10 p1460 A72-24761

Electromagnetic remote model positioning sensing system for wind tunnels with magnetic suspension, using differential transformer action
10 p1461 A72-24762

Wind tunnel model magnetic suspension system with remote position sensor based on optical contrasts scanning analysis
10 p1461 A72-24763

Optical TV scanning for wind tunnel model position detection in magnetic suspension system for sphere low density drag measurements
10 p1461 A72-24764

[ONERA, TP NO. 988]
Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations
10 p1461 A72-24765

Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility
10 p1461 A72-24766

Power supply for magnetic suspension system, using controlled rectifier and dc power amplifier circuits

10 p1461 A72-24767

Wind tunnel model remote position sensing and control systems, discussing drift reduction in magnetic suspension

10 p1461 A72-24768

Static aerodynamic characteristics of bulbous based cone models and slender wings at subsonic speed, using magnetic suspension and balance system

10 p1461 A72-24769

Aerodynamic data acquisition with magnetic balance on wind tunnel model delta and AGARD G wing planforms and body of revolution

10 p1462 A72-24770

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect

10 p1462 A72-24771

Spheres drag coefficient measurements in laminar flow as function of Reynolds number, using wind tunnel model magnetic suspension system

10 p1419 A72-24772

Superconducting magnetic suspension systems safety aspects, discussing relief valves for He boil-off, flowmeters, cryostat temperature monitors, power supply diodes and safety interlocks

10 p1462 A72-24774

Iron rotational hysteresis effect in cold magnetic balance wind tunnel system for spinning aircraft configurations and subsonic flow regimes

10 p1462 A72-24776

Analysis of cryogenic suspensions for use in spacecraft

22 p3230 A72-42208

Residual drag torque on magnetically suspended rotating spheres.

23 p3315 A72-44540

MAGNETIC SWITCHING

Logic functions for magnetic bubble devices based on interaction of circular magnetic domains in rare earth iron oxides, considering gates for dynamic memory

03 p0327 A72-13753

Low cost large array of decoding magnetic switches with electrodeposited Au conductors and Permalloy memory elements featuring high output flux for low driving current

03 p0328 A72-13778

Reliable Permalloy integrated magnetic memories with realizable low switching coefficients and square-loop properties, discussing design and fabrication

03 p0328 A72-13779

Mass storage systems technologies covering magnetic recording, surface wave acoustics, magnetooptic beam addressing, magnetic bubbles, switchable resistances and IC memories

09 p1283 A72-23413

MAGNETIC TAPE RECORDERS

U MAGNETIC RECORDING

U TAPE RECORDERS

MAGNETIC TAPES

Moving window displays for IR scanner signals, producing images on magnetic video tape

02 p0228 A72-11852

Magnetic recording head designs, covering information density, head-tape subsystems and head materials electrical and mechanical suitability

16 p2394 A72-33643

Investigation of the strength and deformability of thin composite materials of magnetic recorder type. I. Strength and deformability at elevated temperatures

21 p3073 A72-41707

MAGNETIC TRANSDUCERS

Digital magnetic temperature transducer using permeability discontinuity at Curie temperature for high stability and reproducibility without calibration

03 p0332 A72-13758

Linear negative feedback dc current magnetic transducers for telemetry input signals, discussing operation principles and design

16 p2370 A72-33862

Application of N equalizing and compensating signals in a single-cell reciprocal magnetoelectric transducer

24 p3386 A72-45315

MAGNETIC TRAPS

U PLASMA CONTROL

MAGNETIC VARIATIONS

NT GEOMAGNETIC MICROPULSATIONS

NT GEOMAGNETIC PULSATIONS

NT NOCTURNAL VARIATIONS

Geomagnetic field and AU/AL index variations with UT during international quiet days at high latitudes interpreted as electrojet diurnal redistribution

02 p0217 A72-11930

Statistical characteristics of rough sea compared with variable magnetic fields near Crimean coast in Black Sea

02 p0218 A72-11951

Equatorial ionospheric drift measurements and relation to electrojet from H component geomagnetic field variations

02 p0221 A72-12459

Lunar surface magnetic field variations, considering solar wind effect

02 p0285 A72-12871

Five component electromagnetic field station to record geomagnetic field magnetic and electric components variations

05 p0643 A72-16253

Charged particles injection effects on magnetic perturbations relation to integral auroral luminance intensity from whole sky photometry measurements

05 p0658 A72-16277

Trapped particle motion response to collapsing dipole moment in secularly varying geomagnetic field

07 p1058 A72-19158

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere

08 p1130 A72-20711

Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere

08 p1153 A72-20717

Quasi-periodic ionospheric electron density fluctuations effects on electromagnetic waves propagation, noting effect on surface recordings as geomagnetic variations

08 p1156 A72-20824

Magnetic fluctuations in elf and vlf waves in space, discussing whistler phenomena and applications to magnetospheric probes

08 p1158 A72-21189

Geomagnetic field short term variations as function of solar activity from solar radiation data harmonic analysis, relating large amplitude fluctuation to seasonal variations

09 p1304 A72-23503

Semiannual and annual modulation of geomagnetic field horizontal intensity, suggesting two component model of generating mechanism

10 p1476 A72-24960

Geomagnetic field and magnetosphere variations due to solar wind interactions, using rocket, satellite and indirect measurements

11 p1621 A72-25841

Low latitude geomagnetic field diurnal variations caused by solar wind associated component, noting evening side depression

11 p1713 A72-26109

Ap stars with variable periods from magnetic and photometric data analysis

12 p1868 A72-27221

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data

13 p1946 A72-28588

AU and AL indices variations effect on geomagnetic field during international quiet days at high latitudes interpreted as electrojet diurnal redistribution

13 p1948 A72-29242

Statistical characteristics of rough sea compared with variable magnetic fields near Crimean coast in Black Sea

13 p1949 A72-29263

Geomagnetic activity index Ap correlation with daily magnetic variations during quiet sun year 1964

15 p2230 A72-32260

Geomagnetic and meteorological elements lunar daily variation calculation by modified Chapman-Miller method, estimating confidence limits for parameters reliability

16 p2384 A72-32972

Planetary waves in terms of geomagnetic secular variation due to earth core fluid oscillation under MHD forces, using thick shell model

16 p2385 A72-33342

Critical component of the interplanetary magnetic field responsible for large geomagnetic effects in the polar cap.

17 p2548 A72-35590

Geomagnetic activity annual variation investigation, showing 12-month wave existence

17 p2549 A72-35605

Spherical analyses of the principal geomagnetic field for the years 1550 through 1800

18 p2689 A72-36874

Some problems of electromagnetic induction in the equatorial electrojet region. II - The analysis of magnetic and telluric variations at Zaria, Nigeria.

19 p2789 A72-37772

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere

19 p2765 A72-38339

Rotation period variation in long term behavior of interplanetary magnetic sector structure during nearly four solar cycles

19 p2868 A72-38731

Geomagnetic activity index Ap variation spectral data analysis, noting correlation to sunspot number variation

19 p2793 A72-38747

Lunar magnetic variations at Trelew /Argentina/.

19 p2794 A72-38860

Quiet day daily geomagnetic field variability associated with equatorial ionospheric upheavals, noting longitudinal extent

19 p2794 A72-38869

Seasonal, diurnal and magnetic dependence of ionospheric scintillation at 64 deg invariant latitude.

20 p2916 A72-39226

The interpretation of surface equatorial magnetic daily variations on disturbed days.

20 p2916 A72-39238

Activity of the secular behavior of the geomagnetic field

22 p3168 A72-41924

Short period geomagnetic variations, discussing origin by different solar activity mechanisms

22 p3173 A72-42544

The sunspot cycle and solar and lunar daily variations in H.

22 p3228 A72-42882

Solar-wind parameter variation, magnetic activity, and electrons in the magnetospheric tail and outer radiation belt

23 p3283 A72-43367

The Z sub e field, some of its properties, and its geophysical informativeness

23 p3283 A72-43373

The effects of magnetic field oscillations on the boundary layer flow past a magnetized plate.

23 p3321 A72-43725

The effect of change in the geomagnetic dipole moment on the rate of the earth's rotation.

23 p3285 A72-43819

Magnetic pulsation spectra in a nonisothermal plasma

23 p3323 A72-44483

Annual and solar-magnetic-cycle variations in the interplanetary magnetic field, 1926-1971.

23 p3286 A72-44504

Magnetic field fluctuations during substorms.

24 p3396 A72-44853

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data

24 p3397 A72-45088

MAGNETICALLY TRAPPED PARTICLES

NT ARTIFICIAL RADIATION BELTS

NT INNER RADIATION BELT

NT OUTER RADIATION BELT

NT PROTON BELTS

NT RADIATION BELTS

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric sphere

06 p0863 A72-18406

Separatrix structure and stability of helical Tornado trap magnetic field from electron space charge measurements

06 p0863 A72-18407

Magnetospherically trapped particles sources, losses and transport processes, presenting time averaged proton, electron and alpha particle distributions in trapping and pseudo-trapping regions

07 p1062 A72-20028

Geomagnetically trapped protons, electrons and alpha particles verification and measurements in inner and outer radiation belts

07 p1062 A72-20227

Two dimensional model for plasma without magnetic field trapped near current sheet end in dipole magnetic field resembling geomagnetic tail

08 p1157 A72-21108

Multipole magnetic field configuration effectiveness in electromagnetic plasma trap, discussing electron losses critical angle and captured ions maximum density

09 p1363 A72-23221

Nonadiabatic and atmosphere induced energy losses as causes of proton capture in geomagnetic field

11 p1715 A72-26915

Energetic electron and proton trapping in lower solar atmosphere magnetic field, discussing particle injection, bremsstrahlung and gyro synchrotron radiation

13 p2046 A72-29719

Geomagnetically trapped protons pitch angle distribution from ESRO 2 semiconductor telescope measurements

15 p2300 A72-31991

Closed magnetic fields of helical ring currents on concentric spheres surrounded by conductor /Tornado trap/

17 p2588 A72-34855

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric spheres

17 p2588 A72-34856

Separatrix shape, presence and position and electron lifetime and space charge in helical Tornado trap magnetic field

17 p2588 A72-34857

External high-frequency modulation of an electron beam and heating of plasma ions in the case of beam-plasma instability in the magnetic trap

21 p3095 A72-41678

Transformation of trapped charged particles to transit particles under the influence of a high-frequency electric field 24 p3429 A72-45494

MAGNETITE
Magnetite forms in Orgueil meteorite, observing platelets, stackings and framboids by scanning electron microscope 04 p0569 A72-14506
Electronic model for low temperature transition in magnetite with nonintegral average electron number on site 11 p1701 A72-26023

MAGNETIZATION
Anhyseretic contact printing magnetization simulation by computer with Preisach diagram modified by Onsager field effect [IEEE PAPER 14,2] 03 p0327 A72-13768
Iterative hysteretic model for calculating magnetization distribution in thin magnetic layer for digital recording systems [IEEE PAPER 14,7] 03 p0328 A72-13769
Supermendum magnetization and ac core loss temperature dependence under slow temperature cycling in vacuum, noting anomalous Barkhausen effect 04 p0564 A72-15718
Monograph on Co alloy permanent magnets covering principles, magnetization and testing, alnicos, magnet steel and miscellaneous alloy technology, fine particle magnets and applications 08 p1217 A72-21481
Pinning force of vortex lines and microstructural inhomogeneities in superconductors, using magnetization and critical current measurements 09 p1369 A72-22796
Magnetization and elastic stresses effect on Ni dislocations movement due to domain wall interactions 09 p1371 A72-22866
Magnetic properties and paleomagnetic data of Permian Cutler and Elephant Canyon formations in Utah, discussing thermal demagnetization and origin of stable magnetization 09 p1305 A72-23668
Lunar breccia and crystalline rocks thermoremanent magnetization characteristics, presenting alternating field and thermal demagnetization curves 14 p2154 A72-30507
Magnetization and temperature interrelationship in high constant magnetic field for Apollo 11, 12 and 14 rocks, obtaining magnetic hysteresis curves 14 p2155 A72-30517
Natural remanent magnetism creation in meteorites via shock passage in collisional fragments 16 p2451 A72-32990
Hard superconductors cylindrical samples irreversible magnetization and size effect calculation, comparing results with experiment on Nb-Ti alloy specimens 16 p2441 A72-33523
Low field magnetization measurements at 4.2 K on bulk and thin film niobium nitride, discussing Pauli spin paramagnetism and spin-orbit scattering 16 p2442 A72-33843
Possibility of using the eddy-current method to measure the local magnetization of an object. 19 p2805 A72-38761
Spin wave theory and sublattice magnetization of Cr obtaining wave velocity 21 p3097 A72-40626
Quantum-chemical model of organic ring-shaped molecule with persistent magnetization at microscopic level 22 p3150 A72-42318
Thermal stability of lunar rock remanence, indicating magnetization components acquired after initial cooling 22 p3226 A72-42535
Spontaneous magnetization of Ni foils in high pressure H gas, noting Hall voltage measurement in ferromagnetic foils and thin plates 23 p3324 A72-44140

MAGNETO-OPTICS
Optics for data processing, discussing magneto-optic and holographic memories in computer systems 01 p0035 A72-11315
Photosensitive magneto-optic films for large capacity computer memories 01 p0035 A72-11316
Data holder made of three thin ferromagnetic coupled films for magneto-optic computer memory 01 p0035 A72-11317
MnBi magnetic film optical memory system characteristics evaluation, considering laser power requirement, bit packing density and SNR [IEEE PAPER 3,4] 03 p0332 A72-13754
Thin film optical waveguides using magneto-optic GdIG as substrate, discussing computerized design for propagation mode converter efficiency [IEEE PAPER 3,6] 03 p0332 A72-13755
Magneto-optic storage density and read-write rate, discussing transducer cost, solid state injection lasers, holographic techniques and high activity data base applications [IEEE PAPER 19,1] 03 p0361 A72-13774

Holographic optical techniques application to bulk magnetic storage for high information density and memory capacity and fast random access [IEEE PAPER 19,4] 03 p0361 A72-13776
Mathematical model for reciprocal and nonreciprocal magneto-optical effects in magnetized ferrite-filled microstrip transmission lines 04 p0502 A72-15434
Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field 05 p0625 A72-15826
Magneto-optical effects on circular polarization in sunspots within Fe I 6302.5 A line 05 p0719 A72-16514
Magneto-optical effect on CW radiation intensity of Ar laser with cell in magnetic field for various gain conditions 07 p1009 A72-20615
Mass storage systems technologies covering magnetic recording, surface wave acoustics, magneto-optic beam addressing, magnetic bubbles, switchable resistances and IC memories 09 p1283 A72-23413
He-Ne laser output dependence on transverse magnetic field, ascribing magneto-optical effects to IR radiation decrease 10 p1490 A72-24046
Muller matrix derivation for microwave light modulation studies in quasi-homogeneous magneto-optical and electro-optical media, taking into account finite light speed 10 p1493 A72-24914
Crossover and magneto-optical effects of line splitting in sunspot spectra, considering instrumental circular polarization 13 p2047 A72-29738
Magneto-optics materials for use in data storage, discussing quality evaluation based on figure of merit reflecting heat sensitivity and readout requirements 15 p2203 A72-32352
Magnetic materials. 17 p2595 A72-34571
Magneto-optic effects in Fraunhofer lines with Zeeman splitting 19 p2835 A72-38495
Polarimeter for recording of magneto-optical rotation dispersion and Kerr equatorial effect in visible, near UV and near IR spectral ranges 22 p3176 A72-42108
Electro-, magneto- and acousto-optical methods for laser Q-switching, discussing physical and operational principles 22 p3186 A72-42942
Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field 23 p3319 A72-43434
Advanced optical storage techniques for computers. 23 p3288 A72-43876

MAGNETOACOUSTIC WAVES
Magnetosphere transmittance for fast magnetosonic waves, considering refraction, reflection and earth surface intersection 01 p0058 A72-10587
MHD channels magnetoacoustic and ionization instabilities effect on mean current density and electric field strength, determining effective electroconductivity and Hall parameter 01 p0110 A72-11208
One dimensional plane magnetoacoustic wave stability from synchronous flow in narrow flow gap MHD induction machine 02 p0265 A72-12263
Electroacoustic magnetic and Hall effects in semiconductors in strong electric field involving phonon production by supersonic electron drift 03 p0401 A72-13088
Short periodical pulsations in solar atmosphere related to magnetosound propagation in area of temperature minimum with directed perpendicular magnetic field 03 p0436 A72-13813
Anisotropic plasma stability to magnetosonic wave near ion cyclotron frequency propagating almost perpendicular to magnetic field 05 p0698 A72-17017
Dispersion relations for frequencies near first two harmonics of perpendicular magnetosonic waves in relativistic anisotropic plasmas 05 p0698 A72-17020
Magnetosonic, Alfvén, shock and infinitesimal waves and corresponding rays in relativistic hydrodynamics and magnetohydrodynamics, using tensor distributions 06 p0847 A72-17253
Weakly damped Alfvén ion-cyclotron waves and fast magnetoacoustic waves in infinite plasma cylinder inserted into current bearing finite coil 07 p1046 A72-20516

Cyclotron magnetoacoustic wave generation by planets and binary stars in circular orbits, deriving interstellar gas density variations 08 p1231 A72-21122
Electron Larmor radius effect on hf hose and mirror instabilities of fast magnetoacoustic and ion acoustic waves in nonisothermal plasma 08 p1215 A72-21874
Plasma filament equilibrium in Sirius stellarator during heating by fast magnetosonic wave 09 p1363 A72-23214
Magnetoacoustic wave propagation and reflection in equilibrium inhomogeneous plasma under nonuniform magnetic field 11 p1695 A72-26094
Slow and fast plane magnetoacoustic waves mutual transformation and reflection at plasma and magnetic field inhomogeneities 11 p1698 A72-26643
Magnetoacoustic waves interactions with energy particles in plasmasphere, demonstrating magnetosonic waveguide channel existence around earth below plasmasphere 13 p1947 A72-28605
Electroacoustomagnetic and Hall effects in semiconductors within strong electric field involving phonon production by supersonic electron drift 13 p2022 A72-29437
Plasma ion heating by magnetoacoustic waves, presenting resonance peak-magnetic field intensity relations for various densities and ion energy 13 p2019 A72-29913
Sounding rocket experiment on nonlinear interaction between two electron plasma waves and ion acoustic wave in ionosphere to investigate artificial realization feasibility 15 p2231 A72-32333
Ion acoustic, electron plasma and cyclotron harmonic waves parametric instabilities in magnetic field and applications to plasma heating 16 p2433 A72-32811
Nonlinear wave interaction in anisotropic plasmas, discussing helicon decay with acoustic wave emission and quasi-longitudinal waves with magnetoacoustic wave emission 16 p2436 A72-33478
Normal mode formulation of spin wave-helicon wave interactions in ferromagnetic semiconductors. 18 p2718 A72-36452
Fast magnetoacoustic wave interaction with shock wave propagating in ideal electrically conducting gas, showing magnetic field stabilizing effect 18 p2711 A72-36812
Nonlinear magnetosonic waves in a plasma with a finite conductivity. 21 p3090 A72-40485
Magnetosonic waves interactions with energy particles in plasmasphere, demonstrating magnetosonic waveguide channel existence around earth below plasmasphere 24 p3398 A72-45105

MAGNETOACOUSTICS
Moving plasma heating by fast large amplitude hf magnetoacoustic wave, noting Doppler effect resonance splitting 08 p1212 A72-21070

MAGNETOACTIVITY
NT MAGNETORESISTIVITY
Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties 02 p0183 A72-12766
Gyrosynchrotron radiation fields from mildly relativistic electrons in magnetoactive plasma, studying radiative transfer problem 14 p2138 A72-30556
Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties 20 p2903 A72-39072
Nonthermal emission of a magnetoactive plasma in the field of super-high-frequency pumping wave 21 p3090 A72-40407
Conditions for magnetoactive plasma longitudinal waves with phase velocity near light velocity existence, investigating increments during synchrotron instability due to relativistic particles 23 p3262 A72-43311
On the instability of nonlinear longitudinal oscillations of magnetoactive plasma. 23 p3320 A72-43524

MAGNETOCARDIOGRAPHY
Josephson effect /superconducting weak link/ devices for low frequency magnetic field sensing, noting applications in magnetocardiography and absolute noise thermometry 08 p1218 A72-21919
Mathematical, physical and engineering aspects of electro- and magnetocardiography, noting heart field nondipolar properties and heart vector determination difficulties 09 p1273 A72-23414

- Cryogenic Josephson junction magnetometer in magnetocardiography, discussing high ambient noise levels in unshielded environment
12 p1769 A72-27288
- Electrocardiography and magnetocardiography to determine flux and vortex sources respectively of heart electrical activity impressed current density
13 p1909 A72-28998
- MAGNETOELASTIC VIBRATIONS**
U MAGNETOELASTIC WAVES
MAGNETOELASTIC WAVES
NT MAGNETOACOUSTIC WAVES
Compression wave propagation from cylindrical cavity in weakly conducting magnetoelastic medium under unperturbed magnetic field
03 p0452 A72-14129
- Magnetoelastic vibrations of thin conducting plate in magnetic field, solving electrodynamic equations
07 p1095 A72-20315
- Exact solutions for plane thermoelastic and magnetoelastic wave frequency equations, determining specific loss extremum values
15 p2336 A72-32447
- Radial vibration of a composite cylindrical shell subjected to a magnetic field.
18 p2711 A72-36753
- MAGNETOELASTICITY**
U MAGNETOSTRICTION
MAGNETOELECTRIC MEDIA
Composite materials sum and product physical properties, considering magnetostrictive and piezoelectric interactions
18 p2717 A72-35996
- MAGNETOGASDYNAMICS**
U MAGNETOHYDRODYNAMICS
MAGNETOGRAMS
U MAGNETIC SIGNATURES
MAGNETOGRAPHS
U MAGNETOMETERS
U RECORDING INSTRUMENTS
MAGNETOHYDRODYNAMIC ACCELERATION
U PLASMA ACCELERATION
MAGNETOHYDRODYNAMIC FLOW
Transient shock produced plasma flow interactions with transverse magnetic field
01 p0105 A72-10020
- Interplanetary magnetic field angular gradient and sectorial effects on solar wind, discussing wind velocity
01 p0118 A72-10583
- Discrete ionospheric model of supersonic two dimensional low density plasma flow past large bodies, using quasi-neutrality condition
01 p0001 A72-10588
- Flowing plasma ionization density measurement by stagnation probe, comparing measured with calculated plasma sheath convection current values
[AD-738692] 01 p0110 A72-11189
- Electron thermal boundary layer effects on Langmuir probe measurements in subsonic cold plasma flow
01 p0071 A72-11191
- High velocity plasma generation in induction hydrodynamic shock tube and flow into rail type plasma accelerator, investigating possible T layer formation
01 p0110 A72-11203
- Magnetoplasma dynamic supersonic ring cut as electromagnetically shock tube or plasma gun, emphasizing plasma flow-magnetic field interaction
01 p0110 A72-11204
- Electron work function and electrode physicochemical properties and surface temperature on boundary layer formation and thickness at electrodes in MHD channel
01 p0009 A72-11206
- Electrically ionized striated plasma flow in annular channel, noting application to synchronous induction MHD generator
01 p0111 A72-11209
- Electrical properties of subsonic argon plasma stream seeded with uranium hexafluoride, using electrostatic probe
01 p0111 A72-11334
- German monograph on toroidal electric arc plasma with allowance for induced flow, covering tube wall heat transfer, electric field, MHD vortex development, mathematical model, etc
02 p0263 A72-11650
- Solar wind plasma spherically symmetrical outflow allowing for equations of motion of velocity components, discussing interplanetary field and single fluid MHD
02 p0278 A72-11914
- Fast hyperbolic MHD flow past point source, considering geometry and disturbances singularities of MHD Mach cones
02 p0266 A72-12369
- MHD flow development in parallel plate channel entrance region, obtaining numerical solution for velocity distribution, pressure drop and length at different Hartmann numbers
02 p0266 A72-12493

- Two dimensional MHD channel flow of inviscid fluid in circular nonuniform magnetic field
02 p0267 A72-12771
- MHD flow due to impulsive rotation of infinite disk, observing magnetic field strength effects on velocity components and boundary layer displacement thickness
02 p0267 A72-12772
- Upstream influence on MHD flow velocity by Rankine body moving parallel to uniform magnetic field in conducting fluid
03 p0394 A72-13153
- Conducting fluid steady MHD pipe flow under transverse magnetic field, obtaining mass flow rate
03 p0394 A72-13241
- Solar wind plasma flow through earth bow shock, deriving specific heats ratio based on one-fluid theory and conservation equations
03 p0412 A72-13509
- Plasmoid transport in quadrupole and octupole magnetic fields, measuring plasma amounts in axial region charged particle densities and flux densities at vacuum chamber wall
03 p0395 A72-13568
- Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current
03 p0395 A72-13570
- Moving plasma beam capture by transverse magnetic field due to polarization space charges electrostatic separation
03 p0396 A72-13657
- Cold plasma flow rate determination from emission inhomogeneities, using time of flight method and high speed streak photography for instantaneous velocity measurements
03 p0396 A72-13663
- Viscous electroconducting liquid two unidimensional Hartmann flows electromagnetic coupling under transverse magnetic field induction
03 p0396 A72-13790
- Compressible turbulent boundary layer equations for flow on B wall of MHD accelerator, including electron thermal nonequilibrium and finite rate ionization
03 p0397 A72-13923
- Decelerating MHD effect on rotational funnel flow excited by vortex line or radial converging currents
03 p0397 A72-13994
- Elliptic equations solutions for electromagnetic effect in MHD rectangular channels using relationship to Laplace equations
03 p0397 A72-13995
- Self similar solutions for unsteady shear flows of conducting Newtonian fluids with rheological power law under transverse magnetic field
03 p0397 A72-13997
- Plane mixing boundary layer flow of high temperature turbulent gas jet in longitudinal magnetic field
03 p0397 A72-13998
- Variational problem of conducting fluid flow in MHD channel at large magnetic Reynolds numbers at induction saturation
03 p0397 A72-13999
- Magnetic field and current density distributions in cylindrical conduction MHD channel with arbitrary number of pole-electrode pairs
03 p0398 A72-14000
- Time and coordinate dependence of magnetic field for steady symmetric flows of compressible conducting fluid at large Reynolds numbers, investigating self excitation conditions
03 p0398 A72-14001
- Two dimensional MHD turbulent flow generation in strong magnetic field
03 p0398 A72-14004
- Annular MHD channel laminar flow generation at supercritical Reynolds numbers by strong magnetic fields
03 p0398 A72-14005
- Dynamic and electromagnetic characteristics of MHD flow in square tube with walls differing in electroconductivity within oblique transverse magnetic field
03 p0398 A72-14007
- Steady laminar viscous conducting fluid flow in infinite rectangular channel in crossed electric and magnetic fields, deriving flow rate and potential distribution
03 p0398 A72-14008
- Steady flow of viscous incompressible conducting fluid in rectangular channel with sectional walls under longitudinal external magnetic field, deriving velocity distribution
03 p0398 A72-14009
- Magnetic field distribution in linear MHD channel for large Reynolds numbers, determining current density and longitudinal field component
03 p0398 A72-14010
- Free convective motion of conducting fluid past vertical plate in uniform transverse magnetic field, determining optimum dimensions of heat exchangers
03 p0399 A72-14011

- Axisymmetric rotational motion of electrically conducting fluid between dielectric disks in crossed electric and magnetic fields
03 p0399 A72-14012
- MHD boundary layer on rotating disk and on body of revolution in longitudinal flow at large Stewart numbers
03 p0399 A72-14013
- Visual investigation of semibounded axisymmetric MHD flow of liquid eutectic K-Na alloy under strong magnetic field effect
03 p0399 A72-14014
- Neutral current sheets in slow moving plasma with frozen-in magnetic field with null force line
03 p0438 A72-14070
- Supercritical stationary states of dissipative hydromagnetic rotating Couette flow between electrically insulating cylinders within axial magnetic field
04 p0554 A72-14405
- MHD approximation to solve natural convection problem in vertical channel under external inhomogeneous magnetic field, noting fluid flow rate
04 p0555 A72-14646
- Uniform normal magnetic field effect upon MHD free convection from vertical wall with instantaneous heat source, considering shear stress
04 p0556 A72-14856
- Magnetic field effect on heat transfer in steady plane laminar conducting incompressible viscoelastic liquid flow in channel with nonconducting walls
04 p0560 A72-15580
- Plasma velocity, gas pressure, wall heat flux and shock heated region extent measured in electrical discharge shock tube, discussing ionization relaxation process
05 p0693 A72-15849
- Cylindrical positive probe behavior in high speed collisionless mesothermal plasma flow
[ONERA, TP NO. 1000] 05 p0660 A72-15860
- General MHD duct flow problems solution using machine transformation and finite difference technique supplemented by successive overrelaxation [ASME PAPER 71-WA/APM-15]
05 p0694 A72-15965
- Superposable and self-superposable MGD flows from nonlinear differential equations, considering entropy, flow velocity and magnetic field strength
05 p0694 A72-16030
- Current collection characteristics of flush mounted electrostatic probes on sharp flat plate in ionized hypersonic flows
[AIAA PAPER 72-104] 05 p0696 A72-16814
- Argon plasma transient axial flow and heating characteristics in pinched column of linear z-pinch device with collapsing current sheets conversion to axial streaming velocity
[AIAA PAPER 72-208] 05 p0696 A72-16886
- One dimensional continuous electrode shock tube driven MHD accelerator, analyzing unsteady flow behind ionizing shock wave by method of characteristics [AIAA PAPER 72-102] 05 p0697 A72-16973
- MHD Couette flow stochastic processes optimal control synthesis by dynamic programming
05 p0653 A72-17131
- MHD flow of viscous fluid between two oscillating flat plates, observing velocity damping by magnetic field
05 p0699 A72-17179
- Poloidal Hall current calculation in hydrodynamic approximation for stationary weakly interacting and conducting cylindrical plasma flow with uniform transverse flow parameter distribution
05 p0701 A72-17240
- Stationary plasma flow interaction with axisymmetric spatially periodic magnetic field in presence of Hall effect, determining electric currents structure
05 p0701 A72-17241
- Polarization electric field and depolarization current measurements in plasma flows along toroidal solenoid with diverter
06 p0853 A72-17387
- Wake behind obstacle immersed in plasma flow of single ended Q-machine, using experiment as diagnostic of ion distribution function
06 p0856 A72-17526
- Magneto-viscous interactions in combustion plasma, measuring velocity distributions for ordinary hydrodynamic and MHD flow with transverse magnetic field
06 p0859 A72-17618
- Moderate Hartmann number MHD duct flow with applied transverse magnetic field, using numerical methods
06 p0859 A72-17619
- Hartmann number for velocity pulsation free transition from turbulent MHD flow to laminar, noting difference relative to linear stability theory
06 p0860 A72-17679
- Plasma jet injection stoppage and reflection in strong transverse magnetic field, considering instability due to flow interactions
06 p0860 A72-17694

Exact linear dielectric operator for stratified plasma streams with velocity gradients for diagnostics with electromagnetic waves 06 p0861 A72-17748

Steady two dimensional magnetodynamic flow past nonconducting wedge with perpendicular magnetic field at different shock attachment angles 06 p0861 A72-18113

Supersonic hydrogen plasma flow in collapsing postsunset upper ionosphere, noting nonvanishing temperature gradient effect on critical point location 07 p0974 A72-18899

Neutral current sheath formation from plane dipole magnetic field extension by plasma flow, discussing solar corona streamers and geomagnetic tail 07 p1039 A72-18914

Continuum plasma turbulent boundary layer structure in shear flow, showing electron to ion saturation currents ratio decrease from laminar case [AIAA PAPER 72-107] 07 p1040 A72-18953

Optimal control of hydromagnetic flow of electrically conducting fluid in equilibrium cylindrical configuration, using dynamic programming method 07 p1040 A72-18980

Dynamo action of magnetohydrodynamic fluid motions with two dimensional periodicity 07 p1042 A72-19611

Nonuniform plane parallel plasma streams instability with/without magnetic field, comparing with conducting fluid 07 p1042 A72-19618

Wall stabilized dc arc channel for plasma viscosity and flow characteristics studies, using pressure probe 07 p1043 A72-19877

Two channel high resolution spectrometric measurements of plasma velocity from intrinsic radiation in optical range by Doppler effect 07 p1044 A72-19885

Particle acceleration and plasma ejection in solar flares, using model of nonstationary cumulative flow near magnetic neutral line 07 p1060 A72-20014

Unsteady laminar viscous incompressible electrically conducting flow between nonconducting parallel flat plates with applied constant magnetic field 07 p1044 A72-20245

MHD dynamo model for incompressible real electrically conducting fluid unsteady flow 07 p1044 A72-20304

Electric field in flow of medium with tensor conductivity due to Hall effect, studying eddy currents structure in magnetic field variation region 07 p1044 A72-20316

Induced nonuniform magnetic field effects on MHD channel flow between two infinite parallel plates, obtaining solution by perturbation theory 08 p1214 A72-21427

MGD equations for ideal plasma steady plane adiabatic flow in magnetic field, considering analogy to Chaplygin equations 08 p1214 A72-21645

Inviscid conducting gas steady one-dimensional MHD flow, using three-dimensional phase diagram for differential equations analysis 08 p1214 A72-21646

Laminar MHD boundary layer lateral velocity component profile for conducting fluid injection at oblique incidence, considering drag force and pressure gradient effects 08 p1214 A72-21647

Supersonic plasma flow in narrow rectangular channel and free incompressible inviscid conducting liquid jet motion within pulsating transverse magnetic field 08 p1214 A72-21652

Steady flow of dual temperature plasma into vacuum from widening nozzle, taking into account electron thermal conductivity and heat exchange between components 08 p1214 A72-21653

Electric eddy currents formation during thermal acceleration of inviscid quasi-linear plasma in profiled channel 08 p1215 A72-21654

Two dimensional MHD conducting fluid flow past insulating cylinder in presence of arbitrarily oriented magnetic field, determining lift and drag coefficients for small Hartmann numbers 09 p1359 A72-22533

Convective heat transfer between jets produced by plasmatrons and heated substrate, showing independence of plasma flow rate 09 p1319 A72-23189

Pulsed plasma flow interaction with spatially periodic magnetic field generated by coaxial coils with alternating currents, noting MHD stability 09 p1362 A72-23207

Colliding plasma flows motion and capture in transverse magnetic field with mirror configuration, noting polarization effect 09 p1362 A72-23209

Plasma flows interaction with plasma cylinder in diverter magnetic field, investigating plasma dynamics with electric probes, plasmoscope and mass spectrograph 09 p1362 A72-23210

Plasma flow interaction with magnetic pulse field barrier from magnetic coil for short plasmoids formation 09 p1362 A72-23211

Perfectly conducting incompressible fluid motion past thin body in oblique field, discussing magnetic field influence on lift 09 p1365 A72-23559

Oblique magnetic fields effect on compressible conductive fluids motion in presence of thin foil, noting lift values in hyperlentic and double hyperbolic cases 09 p1365 A72-23560

Viscous boundary layer equations for MHD flow near rear stagnation point at small Reynolds number 09 p1296 A72-23674

Electromagnetic coupling between one dimensional laminar flows of viscous conducting fluid in presence of magnetic field, noting static and dynamic efficiencies dependence on Hartmann number 10 p1519 A72-24065

Velocity and magnetic field expressed by six scalar potentials from MHD equations system, noting compressible fluids flow 10 p1520 A72-24219

Steady state exact solutions of MHD equations for perfectly conducting self gravitating incompressible fluid, showing solutions existence for rotating planetary ellipsoid free liquid surface 10 p1539 A72-24328

Numerical solution for super-Alfvénic supersonic aligned MGD flow over cone with attached shock wave, obtaining surface pressure coefficients, current and vorticity distributions 10 p1418 A72-24463

Second order Cowley-Imai analogy application to transcribe gas dynamic perturbation solutions into magnetogasdynamic solutions for perfect gas axisymmetric super-Alfvénic flows 10 p1521 A72-24464

Joule dissipation effect on convective instability of current carrying fluid in magnetic field 10 p1522 A72-24533

Interacting viscous conducting media flow in inclined channel in presence of transverse magnetic field, using Moiseev asymptotic method for steady flows with wavy interface 10 p1522 A72-24546

Interaction solutions of steady crossed field MHD channel flows for perfect, singly ionizing monatomic and thermodynamically unspecified gases 10 p1523 A72-24789

Suction or injection interaction with rotation in three dimensional MHD flow between two porous nonconducting disks under magnetic field 10 p1524 A72-25039

Nonisothermal hydrogen plasma channel flow and radiative heat transfer combined with convective and conductive transfer between isothermal black parallel boundaries [AIAA PAPER 72-279] 11 p1692 A72-25219

Uniform and parallel magnetic field effects on hydromagnetic instability of two dimensional jet at small magnetic Reynolds numbers 11 p1693 A72-25521

T-tube plasma flow velocity measurement via shock wave attenuation recording technique 11 p1693 A72-25561

Stationary MHD aligned flows of ideal incompressible fluids with same streamline patterns in plane, axisymmetric and spatial flows 11 p1695 A72-25910

Magnetosphere neutral layer plasma conductivity determination from model of linear magnetic dipole in conducting fluid flow 11 p1622 A72-25945

Dynamic response of MHD flow under impulsive pressure gradient, obtaining approximate analytic solutions for conduits of arbitrary cross sections by complex variable approach 11 p1695 A72-26039

Sunspots contact region charged particles acceleration by plasma flow induced electric field, noting Fermi type mechanism 11 p1695 A72-26107

Hydromagnetic stability of isothermal stratified plasma atmosphere uniform flow over conducting liquid along magnetic field, discussing dispersion relation for static configuration 11 p1695 A72-26115

MPD thruster diagnostics and interpretation of electric current distribution, applying integral form of Maxwell equation for moving Hall probe [AIAA PAPER 72-498] 11 p1711 A72-26221

Magnetosphere fast electron precipitation investigated by simulation experiments with model created by plasma stream interaction with dipole magnetic field 11 p1714 A72-26531

Rayleigh problem in presence of magnetic field, discussing transpiration effects on MHD flow near oscillating flat plate 11 p1696 A72-26542

Method of characteristics for three dimensional supersonic flow of guiding center plasma, noting application to solar wind-moon interaction 11 p1573 A72-26601

Plasmoid transport in quadrupole and octupole magnetic fields, measuring axial charged particle and flux densities at vacuum chamber wall 11 p1699 A72-26755

Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current 11 p1699 A72-26757

Boundary conditions and equations of plasma arc discharge in cylindrical diode with azimuthal magnetic field 12 p1850 A72-27132

Oscillation periods of rotating perfectly conducting liquid column in presence of axial magnetic field and uniform current 12 p1851 A72-27534

Localized magnetic field for wind tunnel wall-plasma heat transfer minimization, preserving flow characteristics 12 p1852 A72-27684

Hydrodynamic approximation for solar wind nonuniformity in ecliptic plane, noting linear disturbances caused by nonuniform velocity of plasma flow from corona 13 p2029 A72-28577

Nonlinear transverse forced resonant oscillations in isotropic elastic body and ideally conducting compressible fluid flowing in external magnetic field 13 p2010 A72-28719

Effect of magnetic field superimposed on turbulent shear flow of electrically conducting fluid, discussing turbulent friction in plane flow 13 p2010 A72-28764

Growth rates of unstable electromagnetic waves propagating perpendicularly to symmetric counterstreaming finite temperature plasmas 13 p2012 A72-29129

Hall currents effect on unsteady MHD flow of electrically conducting fluid past flat plate imbedded in uniform external transverse magnetic field 13 p2012 A72-29225

Solar wind plasma spherically symmetrical outflow allowing for equations of motion of velocity components, discussing interplanetary field and single fluid MHD 13 p2039 A72-29226

Random phase approximation for nonlinear theory of MHD nonequilibrium plasma steady turbulent regime, noting ionization level rise by energy dissipation 13 p2013 A72-29359

Velocimeter design for MHD boundary layer flow velocity measurement, using Doppler frequency shift of laser light scattered from added macroscopic particles 13 p1957 A72-29360

Two dimensional laminar compressible flow of electrically conducting gas at thermodynamic equilibrium and perpendicular to magnetic field lines 13 p2013 A72-29362

Nonstationary laminar zero-discharge MHD Couette flow produced by sudden movement of highly conductive plate in closed volume filled with conducting liquid 13 p2016 A72-29607

Steady barotropic inviscid flows of rarefied gas plasmas as free jet and within cylindrical channel in axisymmetric external magnetic field with Hall effect 13 p2018 A72-29823

Slow viscous incompressible conducting fluid MHD flow between two nonparallel walls, obtaining velocity profile solution in power series for small Reynolds numbers 13 p2020 A72-30047

He and Ar plasma transport by magnetic fields after expulsion from pulsed linear discharge 14 p2135 A72-30167

Magnetic and electric field effects on steady state laminar MHD Couette flow of non-Newtonian fluids governed by Prandtl rheological law or Ostwald-de Waele power law 14 p2139 A72-30717

Heat transfer in MHD boundary layer flow of conducting incompressible fluid with aligned magnetic field on flat plate at high Prandtl number 14 p2141 A72-31068

Flow-plasma system described by hydrodynamic equations, comparing self oscillatory process features with other systems 14 p2141 A72-31129

Hydromagnetic channel flow stability computation via energy method, solving eigenvalue problem by direct forward numerical integration 15 p2283 A72-31212

Plasma velocity, gas pressure, wall heat flux and shock heated region length measured in electrical discharge shock tube without diaphragms, discussing ionization relaxation process 15 p2283 A72-31268

Approximate model of weak shock wave interaction with laminar MHD boundary layers for perfectly conducting supersonic streams 15 p2284 A72-31633

Convective heat transfer in fully developed MHD channel flow between two parallel electrically conducting plates

15 p2335 A72-31636

Characteristic parameters of stationary supersonic plasma flow in magnetic de Laval nozzle calculated for collisional and collisionless cases, measuring ion saturation currents

15 p2285 A72-32268

Stationary plasma flow interaction with dipole magnetic field to study geophysical phenomena in upper atmosphere

15 p2286 A72-32343

MHD Couette flow of electrically conducting viscous incompressible fluid in transverse magnetic field with time dependent suction or injection

15 p2286 A72-32396

Steady laminar MHD flow of viscous incompressible electrically conducting fluid between long concentric rotating porous cylinders under radial magnetic field

15 p2287 A72-32397

Falkner-Skan problem extension to MHD flow past nonconducting body by imposing magnetic field with lines of force parallel to undisturbed streamlines

15 p2287 A72-32405

End effect in current response of highly negative cylindrical Langmuir probe in collisionless plasma flow, discussing use for ion temperature determination

15 p2288 A72-32418

Induced magnetic field effects on MHD flow between rotating coaxial (insulator) cylinders, obtaining exact solution and graphical results

15 p2288 A72-32420

Streaming MHD flow past semiinfinite flat plate in presence of perpendicular uniform magnetic field, obtaining velocity field at large distances

15 p2288 A72-32480

Boundary layer ionization on flat plate and cylindrical plasma probes in high speed flow, considering ionized continuum flow and collisionless plasma

16 p2374 A72-32831

Asymptotic solution for inviscid conducting fluid flow past arbitrary wing profile in magnetic field

16 p2434 A72-32929

Perturbation theory for equations of motion of electrically and thermally conducting viscous compressible flow in homogeneous magnetic field, calculating fluctuation modes

16 p2435 A72-33008

Vorticity jump across stationary MHD discontinuity generalization from gas dynamics problem, noting results validity for shock and detonation waves

16 p2435 A72-33011

Skin friction effects due to Hall currents in conducting unsteady slip flow over porous flat plate under transverse magnetic field

16 p2435 A72-33108

Experimental methods for studying interactions between plasma streams and three dimensional magnetic dipole fields

16 p2454 A72-33384

Weakly ionized nonequilibrium plasma flow from gas discharge tube positive column, obtaining electron temperature axial decay rate from energy equation

16 p2437 A72-33655

Faraday ring currents induction by radial magnetic field in low pressure plasma supersonic ring channel flow driven by inductive hydrodynamic shock tube

16 p2437 A72-33749

Plane vortex sheet in incompressible inviscid and finitely conducting fluids, investigating discontinuity in density and conductivity on hydromagnetic stability

16 p2438 A72-33842

Russian book on magnetogasdynamic flow theory and calculations covering plasma flows and energy conversion in MHD channels of dc generator

16 p2438 A72-33873

Conducting fluid flow near neutral sheet in magnetic field, assuming cold polar wind plasma geomagnetic tail

16 p2438 A72-33930

Steady state magnetically balanced cross flow arc, calculating flow and temperature fields and boundary shape under assumption of two independent variables [AIAA PAPER 72-687]

16 p2439 A72-34055

Magnetogasdynamic heat transfer to hemispherical body in supersonic low density plasma, noting magnetic field effects on heat flux

16 p2346 A72-34056

Theoretical study of electromagnetic coupling in the forced oscillatory regime of two one-dimensional laminar flows of a viscous and electroconducting liquid in the presence of a transverse uniform magnetic field

17 p2587 A72-34281

Flow of a real gas in annular channels with curvilinear walls at large MHD-interaction parameters

17 p2587 A72-34457

Transverse edge effect in a rectangular MHD channel with a sectional side wall

17 p2587 A72-34458

Stabilization of magnetohydrodynamic flows by a distributed feedback system

17 p2587 A72-34459

Magnetohydrodynamic flow in the region of a conductivity discontinuity at the wall

17 p2587 A72-34460

Flow conditioning in electric discharge convection lasers.

17 p2562 A72-34638

Continuity, motion and Maxwell equations for steady MHD flow under constant magnetic flux

17 p2588 A72-34765

Experimental evidence for stationary population inversions of atomic levels in an expanding hydrogen plasma

[DFVLR-SONDDR-213] 17 p2589 A72-34898

On the motion of a perfectly conducting fluid past a thin body.

17 p2485 A72-35055

Critical point regularity conditions and asymptotic solutions to the time stationary, linearized, inhomogeneous solar wind flow problem.

17 p2599 A72-35095

Wall stabilized dc arc channel for plasma viscosity and flow characteristics studies, using pressure probe

17 p2590 A72-35127

Two channel high resolution spectrometric measurements of plasma velocity from intrinsic radiation in optical range by Doppler effect

17 p2590 A72-35133

Explorer 33 and 35 plasma observations of magnetosheath flow.

17 p2548 A72-35587

Experimental and two-dimensional computational study of end losses from a theta pinch.

17 p2592 A72-35628

Magnetic dipole field interaction with plasma flow ions, noting qualitative model of solar wind flow past magnetosphere

17 p2593 A72-35905

MHD inlet flow into channel, obtaining velocity profile numerical solution in Prandtl approximation with modified boundary conditions

18 p2714 A72-36121

Transition from sheath-convection to saturation-current behaviour of a Langmuir probe in a flowing plasma.

18 p2715 A72-36688

Solution of some mixed boundary value problems of conducting medium thermodynamics by the method of variable separation

18 p2715 A72-36802

Turbulence characteristics of flows with large velocity gradients in rectangular MHD channel with copper walls

18 p2715 A72-36813

Hydrodynamic stability of the gradient flow of a conducting fluid with a rheological power law in a transverse magnetic field

18 p2716 A72-36814

Hall phenomena in a plasma flow situated in a traveling magnetic field

18 p2716 A72-36816

Self-similar separation flows in a laminar magnetohydrodynamic boundary layer during injection and suction

18 p2716 A72-36886

Self-similar unsteady magnetogasdynamic flows of a radiating gas produced by the motion of a piston

18 p2716 A72-36897

Hydromagnetic boundary layer flow around an oscillating axisymmetric body.

18 p2683 A72-36932

The influence of geostrophic force on the stability of an heterogeneous conducting fluid with a radial gravitational force.

18 p2683 A72-36933

Discontinuities in a collisionless plasma flow having a strong magnetic field.

18 p2717 A72-37042

Determination of the separation parameter of an incompressible magnetohydrodynamic boundary layer by applying the dimensionality theory

18 p2717 A72-37181

Classification of the magnetohydrodynamic motions of a rotating fluid

19 p2839 A72-37392

Multiplicity theorem for aligned steady MHD flows of inviscid perfectly conducting gas, assuming constant density along streamline

19 p2840 A72-37405

German monograph - Behavior of an electric arc produced by an exploding wire in a granular medium

19 p2834 A72-37483

Numerical calculation of the lunar wake in a magnetohydrodynamic model.

19 p2864 A72-38435

Hydromagnetic flow between two rotating disks with noncoincident parallel axes of rotation.

19 p2841 A72-38436

Magnetohydrodynamic channel flow with an arbitrary inlet velocity profile.

19 p2842 A72-38446

Low beta model of collision dominated plasma flow effect on toroidal confinement, simulating Stellarator, Levitron and Tokamak

20 p2957 A72-39356

Neutral current sheath formation from plane dipole magnetic field extension by plasma flow, discussing solar corona streamers and geomagnetic tail

20 p2957 A72-39380

Magnetospheric shapes, flows and substorms in terms of magnetotail flux, solar wind pressure, dipole moment and plasma sheet interaction

20 p2919 A72-39546

Stationary adiabatic plasma flow in the magnetosphere.

20 p2919 A72-39547

Two phase flow types defined as flow problems of two-phase matter mixtures /solid, liquid, gas or plasma/ and interface interaction

20 p2915 A72-39971

The linear stability of flow in a circular pipe in the presence of a strong transverse magnetic field.

20 p2958 A72-40018

Magnetic field effects on turbulent shear flow of electrically conducting fluid, discussing turbulence level, friction stress and heat exchange

21 p3089 A72-40260

Isometric motion in relativistic magnetohydrodynamics.

21 p3091 A72-40567

Nonstationary laminar zero-discharge MHD Couette flow produced by sudden movement of highly conductive plate in closed volume filled with conducting liquid

21 p3091 A72-40661

Interaction of a steady plasma flow with a dipole magnetic field in the presence of a radial electric field.

21 p3093 A72-41388

Development of the AEDC-VKF tunnel J - A real gas high density, true velocity, hypersonic, aerodynamic test facility.

21 p3040 A72-41579

Interaction of a streaming plasma with a magnetic mirror.

21 p3094 A72-41635

Investigation of the interaction between a plasma flow and an axisymmetric magnetic field

21 p3094 A72-41655

Two dimensional MHD fluctuating flow of incompressible electrically conducting rarefied gas past infinite porous wall for slip-flow regime with variable suction

21 p3095 A72-41784

Transverse magnetic field effect on unsteady incompressible laminar MHD boundary layer flow, noting cylindrical body oscillations in fluid

21 p3095 A72-41786

Magnetic field and suction effects on unsteady MHD free convection flow of conductive fluid around nonconductive porous flat plate

21 p3095 A72-41787

Discontinuities propagation in quasi-linear hyperbolic partial differential equation systems, noting MHD flow and crystal optics equations

22 p3204 A72-41905

Anode heat transfer for a flowing argon plasma at elevated electron temperature.

22 p3210 A72-41952

Nonlinear transverse forced resonant oscillations in isotropic elastic body and ideally conducting compressible fluid flowing in external magnetic field

22 p3210 A72-42096

Approximate calculation of a laminar arc discharge in a cylindrical channel

22 p3210 A72-42285

Extremal bounds for mass flow rate of laminar MHD flow in circular and thin walled conducting pipes at high Hartmann number

22 p3210 A72-42315

Magnetic tension induced stress balance in plasma sheet, considering pressure gradient along geomagnetic tail axis, plasma flow kinetic energy and pressure anisotropy

22 p3211 A72-42408

A transpiration radiometer for measurement of total thermal radiation from a flowing plasma.

22 p3179 A72-42691

Motion of plasmoids in a multipole magnetic field of toroidal configuration

22 p3214 A72-43120

Polarizational interaction of opposed plasma flows in a linear octupolar magnetic field

22 p3214 A72-43121

Numerical treatment of a model of the hydromagnetic dynamo with a selected system of convection in the earth's core.

23 p3284 A72-43422

The effects of magnetic field oscillations on the boundary layer flow past a magnetized plate.

23 p3321 A72-43725

One dimensional steady conducting gas flow in nonaccelerating coordinate system under magnetic field, calculating pressure, density and temperature variations with boundary shock wave

23 p3281 A72-44265

Streamline and fieldline geometry with applications to MHD flow kinematic properties, discussing field and momentum relations decomposition in terms of sound velocity

23 p3322 A72-44270

- The equilibrium configuration of a slowly rotating mass of liquid in the presence of a poloidal magnetic field.
23 p3322 A72-44306
- Waves generated in the configuration of a magnetically confined and field-permeated axisymmetric jet.
23 p3322 A72-44307
- Magnetohydrodynamic flow between parallel rotating disks. I - Influence of finite wall-conductance.
23 p3322 A72-44400
- Modification of the Rankine-Hugoniot relations for shocks in space.
23 p3341 A72-44510
- Measurements of magnetotail plasma flow made with Vela 4B.
23 p3342 A72-44514
- A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma.
23 p3292 A72-44543
- Pressure and magnetic field probe measurements in transverse shock waves in ionizing hydromagnetic regimes, investigating bow shock effects on accuracy
24 p3390 A72-44708
- MHD Couette flow between conducting walls with heat transfer.
24 p3428 A72-44970
- Hydrodynamic approximation for solar wind nonuniformity in ecliptic plane, noting linear disturbances caused by nonuniform velocity of plasma flow from corona
24 p3435 A72-45077
- Linearized analysis of magnetohydrodynamic channel entrance flow.
24 p3430 A72-45573
- On the unsteady magnetohydrodynamic flow over yawed infinite cylinder.
24 p3395 A72-45599
- MAGNETOHYDRODYNAMIC GENERATORS**
- Optimal conditions for energy conversion in MHD generator, observing ion seeding effect on plasma temperature
01 p0009 A72-11207
- Electrically ionized striated plasma flow in annular channel, noting application to synchronous induction MHD generator
01 p0111 A72-11209
- Plasma temperature and seed atom concentration in MHD generator ducts and combustion chambers by optical measurements, discussing boundary layer thickness, optical density, etc
01 p0072 A72-11218
- One dimensional plane magnetoacoustic wave stability from synchronous flow in narrow flow gap MHD induction machine
02 p0265 A72-12263
- Ambipolar diffusion influence on MHD generator electrical conductivity, discussing plasma radiation, electron escape generator geometry and efficiency and ignition temperature range
04 p0554 A72-14404
- Electron density and temperature fluctuations coupled through Ohm law for ionizable medium, applying to MHD generators and MPD arc thrusters [AIAA PAPER 72-101]
05 p0706 A72-16813
- NASA closed cycle MHD facility for power generation, discussing system components, design and operation [AIAA PAPER 72-103]
05 p0616 A72-16936
- Self regenerating molten seed electrodes for open cycle MHD power generators longevity, regulating combustion chamber and gas flow seeding
06 p0862 A72-18336
- Performance characteristics and limitations of electrode and insulation materials for open and closed cycle MHD generators, noting ceramic compositions for channel
09 p1335 A72-22401
- German monograph on gas dynamic properties of turbulent subsonic compressible flow of ideal gas at insulator walls in MHD generator
10 p1517 A72-23771
- MHD generator duct external loop electric current maximization by working material resistivity tensor optimal distribution
10 p1521 A72-24434
- Optical method based on spectral line center intensity recording to measure plasma temperature in MHD generators channels and combustion chambers
10 p1525 A72-25111
- Russian book on electrodynamic plasma acceleration covering charged particles motion in electromagnetic field and pulsed, MHD, steady and Hall accelerators
12 p1853 A72-28341
- Nonequilibrium MHD generator with electrode walls slanted away from magnetic field direction, predicting electrical performance for comparison with flat wall generator
13 p1899 A72-29352
- Linear nonequilibrium Faraday type MHD generator, predicting electrode configuration effects on voltage drops, axial leakages and current distribution
13 p1900 A72-29353
- Ionization turbulence effect on nonequilibrium plasma MHD generator performance, using I-V characteristics equation
13 p1900 A72-29354
- MHD power generators analytical modeling by digital technique for prediction of performance and efficiency as function of size and operating conditions [AD-741173]
13 p1900 A72-29355
- Thermal-to-electric power conversion efficiency of nonequilibrium MHD generator with Cs seeded noble gases, considering electrode configuration and gas dynamic effects
13 p1900 A72-29356
- Nonequilibrium Faraday MHD generator performance examined by double diaphragm shock tube within ionization region
13 p2013 A72-29357
- Time dependent and stationary two dimensional calculation of current and potential distributions in MHD generator preionizer and entrance region flow
13 p2013 A72-29358
- One-wavelength MHD induction generator operated on NaK flow system with various excitation conditions, calculating magnetic flux density and power by Fourier series
13 p1900 A72-29364
- Numerical analysis method for performance prediction of linear induction machines including liquid metal MHD pumps and generators and linear motors
13 p1900 A72-29365
- Electrothermal instability analysis for MHD generator, considering electron thermal conduction and wall boundaries effects for cases with current parallel or perpendicular to walls
13 p2014 A72-29366
- MHD laser discharge characteristics under generator conditions, emphasizing interaction of gas ionization instabilities and lasing radiation field
13 p2014 A72-29367
- Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma
13 p2014 A72-29369
- Fluctuating electric current induced magnetic field effects on long wave nonequilibrium plasma instability associated with large scale closed cycle MHD generators
13 p2014 A72-29370
- Nonlinear model of ionization instability of MHD generators, assuming discharge structure with alternating layers of high and low electrical conductivity
13 p2014 A72-29371
- Mathematical model for ionized plasma response to sinusoidal perturbations, calculating dispersive waves in MHD generators with working fluid of potassium seeded argon
13 p2014 A72-29372
- Variable amplitude and phase velocity electromagnetic traveling wave field distribution in diverging MHD induction machine channel with liquid metal flow
16 p2435 A72-33282
- Electromagnetic field in MHD generator active zone approximated by cruciform plate, calculating secondary fields from Helmholtz equation
16 p2435 A72-33283
- Russian book on magnetogasdynamic flow theory and calculations covering plasma flows and energy conversion in MHD channels of dc generator
16 p2438 A72-33873
- Electromagnetic characteristics of MHD channels with nonconducting walls at finite magnetic Reynolds numbers
17 p2587 A72-34456
- Transverse edge effect in a rectangular MHD channel with a sectional side wall
17 p2587 A72-34458
- Electric fields in MHD channels in the case of anisotropic and nonuniform conductivity
18 p2716 A72-36817
- Optimum design of MHD generator combustion chamber, noting effects of heating temperature, oxygen enrichment degree and flow velocities
21 p2997 A72-41065
- Fission and fusion propulsion for deep space missions, discussing gas and colloid core reactors, controlled fusion, MHD and laser plasma systems
24 p3423 A72-45168
- Metal vapor plasma as working medium in MHD generator, discussing hydrodynamic relations, power efficiency and thermodynamic cycle
24 p3428 A72-45169
- MAGNETOHYDRODYNAMIC STABILITY**
- Two dimensional collisionless plasmas instability with neutral points, discussing sheet pinch with periodic structure
01 p0105 A72-10022
- Plasma hydrodynamic Buneman current instability under strong electric field, considering nonlinear stage in one dimensional case
01 p0105 A72-10024
- Steady motion effect on sunspot magnetic field stability related to force-free configurations and solar flare origin
01 p0118 A72-10083
- Plane and spherical geometry anisotropic plasma jet stability, considering uniform velocity streaming immersed in magnetic field surrounded by nonconducting medium
01 p0106 A72-10131
- Electron layer precession under magnetic field in background plasma, noting density effect on instability
01 p0107 A72-10144
- Linear theory of transverse electromagnetic waves and instabilities in uniform plasma during propagation along magnetic field, considering multifluid and kinetic description
01 p0108 A72-10189
- Nonlocal theory of electrostatic trapped particle instability in collisionless toroidal plasma, estimating particle mode nonlinear diffusion coefficient
01 p0108 A72-10239
- Nonlocal behavior of ion sound instability in collisionless nonuniform confined plasma shock wave
01 p0108 A72-10240
- Acoustic instability of plasma with current under equilibrium ionization and moderate neutral gas pressures
01 p0109 A72-10485
- MHD instabilities of plasma with current, using two fluid model in crossed magnetic-electric fields
01 p0109 A72-10486
- Ideally conducting plasma confined in vacuum by circularly polarized magnetic field, investigating MHD instabilities suppression by distributed automatic control system
01 p0109 A72-10503
- MHD waves nonlinear interaction in magnetosphere, calculating transverse Alfvén and magnetosonic and longitudinal acoustic wave decay instabilities
01 p0109 A72-10618
- Energy and momentum transfer between fields and particles in plasma crossed by transverse electromagnetic wave, investigating MHD stability
01 p0109 A72-10884
- Farley-Buneman instability nonlinear development mechanism in equatorial electrojet, noting turbulent vertical electron flux role
01 p0062 A72-10901
- Relativistic electron beams in plasma, considering electrostatic instability conditions and critical currents
01 p0109 A72-10975
- Electromagnetic instability of linearly polarized mode propagation perpendicular to magnetic field in two colliding plasma streams
01 p0110 A72-11112
- MHD channels magnetoacoustic and ionization instabilities effect on mean current density and electric field strength, determining effective electroconductivity and Hall parameter
01 p0110 A72-11208
- Unstable sound waves in uranium plasma, taking into account fission power density, radiation diffusion and ionization variations
01 p0112 A72-11336
- Plasma physics computer simulation of double stream and beam instabilities, wavelength nonlinearities and velocity distribution, using superparticle and Vlasov equation models
02 p0263 A72-11691
- Electromagnetic wave propagation perpendicular to applied uniform magnetic field in relativistic plasma, deriving dispersion relation for stability criterion
02 p0264 A72-12024
- Wall stabilized Ar arc plasma, investigating Boltzmann equilibrium existence between spectral energy levels
02 p0264 A72-12025
- Diffuse plasma resonances in space interpreted by wave-particle nonlinear interaction in weakly turbulent plasma, considering electrostatic electron cyclotron wave instability
02 p0265 A72-12366
- Inhomogeneous plasmas parametric instabilities excitation, observing threshold electric field power requirement
02 p0266 A72-12370
- Two stream instabilities of low density beam-plasma interaction in finite and zero magnetic fields
02 p0267 A72-12839
- Macroscopic geometry and velocity spaces of plasma collective modes involving long range force interaction between particles
02 p0267 A72-12841
- Rain type periodic solar radio bursts interpreted on basis of stream instability pulsating regime, considering plasma waves excitation
03 p0406 A72-12936
- Cylindrical gravitational waves propagation modes in hot plasma subject to axial magnetic field, investigating instability conditions
03 p0388 A72-13025
- Weakly turbulent plasma wave system, obtaining drift solution for stationary distribution stability
03 p0394 A72-13274
- Dash phenomenon in eruptive loop prominences representing solar flare process at all levels of atmosphere, discussing pinch effect instability
03 p0411 A72-13332

Plasma interchange instability in quadrupole and octupole magnetic fields determination by disturbance wavelength ratio to ion cyclotron radius

03 p0396 A72-13659

Fluctuations and diffusion correlation analysis in linear octupole magnetic confinement, determining dispersion relation for interchange instability

03 p0396 A72-13660

Linear and nonlinear MHD shock wave propagation and stability, investigating Hugoniot relation

03 p0396 A72-13688

Magnetoplasma with skin current characterized by current and electron temperature nonuniformity, analyzing instabilities for perturbations above ion gyrofrequency

03 p0396 A72-13713

Stability of plane rotating galaxies in magnetic field parallel to axis of rotation, showing linearized MHD equations self conjugate for radial disturbance case

03 p0435 A72-13806

Nonlinear ionization wave equation, calculating nonlinear response of unstable positive plasma column to weak pulse disturbance

03 p0399 A72-14346

Mathematical model for two-stream instability induced anomalous resistivity and heating in plasma with equal initial electron and ion temperatures in static electric field

04 p0554 A72-14402

Force free high beta plasma stability in homogeneous magnetic field and with inhomogeneous temperature and density

04 p0554 A72-14408

Magnetic and gravitational energy release by resistive MHD instabilities responsible for solar flares

04 p0571 A72-14578

Hf electric field influence on electron drift instability and slow ion-acoustic waves for inhomogeneous magnetized plasma stabilization

04 p0555 A72-14617

MHD equilibrium equations for axially asymmetric finite beta toroidal plasma with diffuse boundaries

04 p0556 A72-14854

Electromagnetic wave propagation across external magnetic field in contraststreaming thermally anisotropic plasmas, investigating plasma stability

04 p0556 A72-14942

Ionospheric plasma drift instability, showing electric and magnetic fields, electron density and temperature effects

04 p0517 A72-14956

Finite Larmor radius effect on Rayleigh-Taylor plasma instability in vertical magnetic field, characterizing solution by variational principle

04 p0557 A72-15022

Nonuniform radial electric field effects on low beta magnetized plasma column stability from numerical analysis for weakly collisional regime

04 p0557 A72-15023

Sufficient criteria for MHD stability derived from lowest eigenvalue bounds of Sturm-Liouville problem

04 p0557 A72-15168

Toroidal plasma column in Tokamak systems, discussing field inhomogeneity role in maintaining equilibrium with conducting casing, confirming magnetic field and transformer iron core

04 p0557 A72-15171

MHD stability of plasma boundary in transverse constant magnetic and hf circularly polarized fields

04 p0558 A72-15174

Hf circularly polarized field strength and plasma density self consistent stationary distribution in weakly inhomogeneous constant magnetic field

04 p0558 A72-15175

Ion-wave current instabilities theory, showing inhomogeneities generated by field aligned currents in collisionless plasma

04 p0559 A72-15350

One dimensional collisionless plasma instability driven by cold electron beam, determining limits from beam trapping

04 p0559 A72-15353

Flutelike microinstabilities in mirror-confined homogeneous magnetized one-species plasma with broad perpendicular velocity distribution

04 p0559 A72-15354

Plasma discharge instability in air in polyethylene and organic glass capillaries with evaporating walls, using time lapse filming

05 p0693 A72-15840

Vlasov equation stability properties of collisionless plasma and stellar gas, removing energy variation difficulties with multiple water bag model

05 p0694 A72-16060

Weak D type ionization waves stability in optically thick plasma layer behind front of interstellar gas

05 p0715 A72-16210

Longitudinal wave interaction and excitation by plasma instability in equatorial electrojet, considering energy transfer mechanism

05 p0656 A72-16242

Ion-acoustic instability in ionosphere in presence of fast particles inhomogeneity, estimating ions and electrons drift velocities

05 p0656 A72-16245

Plasma oscillations stabilization, considering nonlinear effects in phase velocity of plasma waves

05 p0695 A72-16416

Plasma stability in field of longitudinal monochromatic wave, examining satellites excitation by Langmuir wave

05 p0696 A72-16681

Turbulent heating in computer simulation of modified plasma two stream instability driven by relative electron-ion drifts across magnetic field

05 p0696 A72-16687

Low density plasma flute oscillations stabilization by feedback system with potential sensors and electrodes, deriving dispersion equation

05 p0697 A72-16983

Lf oscillations due to drift diffusion of current free weakly ionized inhomogeneous plasma in magnetic field

05 p0697 A72-16984

Whistler instability of electron plasmas with non-Maxwellian velocity distribution function

05 p0698 A72-17015

Anisotropic plasma stability to magnetosonic wave near ion cyclotron frequency propagating almost perpendicular to magnetic field

05 p0698 A72-17017

Longitudinal electrostatic waves in perpendicular collisionless plasma shock, investigating stability

05 p0698 A72-17021

MHD shock waves stability, showing Hall term effect on number of shock boundary conditions

05 p0699 A72-17025

Hot plasma transverse and longitudinal wave parametric excitation by intense laser light near plasma frequency, noting instability role in resonant coupling mechanism

05 p0699 A72-17172

Ion-acoustic waves and ionization waves instabilities in gas discharge plasmas

05 p0699 A72-17222

Laminar leading edge of collisionless plasma perpendicular shock structure and distribution functions, considering instability calculations

05 p0654 A72-17227

Electron temperature gradient instability in collisionless shocks propagating across magnetic field

05 p0700 A72-17228

Parametric plasma instability in hf electric field and constant magnetic field, noting longitudinal plasma oscillations growth

05 p0700 A72-17234

Geomagnetic storm associated quasi-sinusoidal magnetic field micropulsations due to Alfvén/drift instability or enhanced storm-time ring current

06 p0804 A72-17454

Lf instability mode in partly ionized plasma due to electron temperature gradient aligned perpendicular to magnetic field, applying to E and F regions

[AD-737931]

06 p0804 A72-17460

Heated lithium ion system /HELIOS/ facility for quiescent steady state plasma studies, noting MHD instabilities minimization

06 p0854 A72-17502

Plasma microinstabilities due to ion acoustic waves propagation with double-humped ion velocity distribution function in Q machine

06 p0855 A72-17516

Thermal noise and ion-acoustic waves excitation in Q machine two beam plasma with high temperature ratio in presence of inhomogeneous B-field, observing instability

06 p0856 A72-17517

Ion acoustic waves instability from electron-ion temperature difference in homogeneous collisional ionized plasma, using fluid equations perturbation analysis

06 p0856 A72-17524

Wave induced Q machine cesium plasma loss produced by current-driven collisional drift instability

06 p0857 A72-17527

Collisional drift instability dependence on parallel wavelength in potassium Q device plasma

06 p0857 A72-17528

Linear dispersion relation for pressure gradient driven drift waves instabilities from ion and electron thermal conductivity effects in collisional plasma

06 p0857 A72-17529

Electron temperature fluctuations associated with drift-type instability in Q device, discussing plasma diagnostic techniques

06 p0857 A72-17530

Dynamic stabilization of transverse Kelvin-Helmholtz instability driven by nonuniform plasma motion, using ac electric field near ion cyclotron frequency

06 p0857 A72-17531

Q-machine plasma column drift instability passive feedback control, regulating feedback drive current phase and amplitude by varying resonance circuit characteristics

06 p0857 A72-17532

Normal mode solutions for bounded systems from linear dispersion roots, discussing plasma waves and instabilities and damping effects in Q machines

06 p0858 A72-17537

Cross-field current driven ion acoustic instability in two plasma devices, causing neutral sheet phenomena, anomalous dispersion and ion heating

[AD-740261]

Plane supersonic ionizing shock wave in magnetic field under small wave plane perturbation from equilibrium position, calculating stability from linearized equations

06 p0798 A72-17678

Plasma perturbations and destabilization in curved magnetic field due to electronic electrical conductivity finiteness

06 p0860 A72-17684

Weakly ionized decaying afterglow plasma potential fluctuation and instability in magnetic field, using electrostatic probes

06 p0860 A72-17692

Longitudinal ambipolar acoustic instability effect on duration of plasma particle motion to wall across magnetic field, using phase method

06 p0860 A72-17693

Plasma jet injection stoppage and reflection in strong transverse magnetic field, considering instability due to flow interactions

06 p0860 A72-17694

Force-free magnetic fields effects on plasma column stability

06 p0860 A72-17744

Stability of weakly ionized homogeneous plasma placed in weak microwave field and in constant magnetic field, expressing growth increments of longitudinal waves

06 p0861 A72-17902

Numerical model for ion beam instability in nonisothermal plasma with electron temperature much greater than ion temperature

06 p0861 A72-17915

MHD convection in rotating electrically conducting viscous fluid layer within magnetic field, investigating linear stability

06 p0861 A72-18069

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric sphere

06 p0863 A72-18406

Separatrix structure and stability of helical Tornado trap magnetic field from electron space charge measurements

06 p0863 A72-18407

Radial distribution of charged particle concentration fluctuation during decaying plasma instability development magnetic field

06 p0863 A72-18416

Soviet book on turbulent plasma theory covering stationary-turbulence spectra, instabilities, electromagnetic properties and wave propagation, particle stochastic acceleration, turbulent heating, etc

06 p0863 A72-18522

High-beta theta pinch plasma toroidal equilibrium by oscillating magnetic field superposition on main confining field

06 p0864 A72-18538

Contraststreaming electron beams instability in finite length one dimensional system with stationary neutralizing ion background, analyzing electrostatic waves space/time development by numerical simulation

06 p0865 A72-18540

Plasma density inhomogeneity effects on beam-plasma instability and Landau damping from digital simulation using charge sheet model

06 p0865 A72-18541

Plasma Dory-Guest-Harris type instability nonlinear evolution from numerical integration of Vlasov equation, using particle simulation and Fourier-Hermite transform methods

06 p0865 A72-18542

Weakly ionized plasma instability in strong nonuniform magnetic field with convective flow and steadily oscillating final state

06 p0865 A72-18543

Low frequency drift instability in local electron cyclotron resonance produced plasma, discussing oscillation fundamental frequency characteristics, wave propagation, density and potential waves, etc

07 p1039 A72-18799

Electrostatic wave instabilities at harmonics of electron cyclotron frequency in hot and cold anisotropic plasma with Maxwellian temperature distribution

07 p1039 A72-18824

Shear layer finite thickness and magnetic field effects on Kelvin-Helmholtz MHD instability of earth magnetopause boundary

07 p0974 A72-18892

Nonlinear monochromatic Alfvén wave propagation parallel to magnetic field in anisotropic plasma with long wavelength beam instability

07 p1039 A72-18915

Threshold condition for purely growing parametric instability in inhomogeneous plasma

07 p0975 A72-19153

Radiative cooling induced thermal instability mechanism for condensation in astrophysical plasma

07 p1040 A72-19348

Colliding plasmas transverse instabilities, investigating ion dynamic and electron beam induced return currents effects
07 p1041 A72-19508

Transverse electromagnetic instabilities in anisotropic plasmas, confirming by computer simulation energy constants derived from nonlinear Vlasov-Maxwell equations
07 p1041 A72-19509

Field free constricted plasma discharge stability between electrodes, obtaining critical current
07 p1042 A72-19606

Dispersion relation for uhf drift waves in nonuniform plasma with cold electrons drift through stationary ions, deriving plasma stability conditions
07 p1042 A72-19612

Hf instability on whistler branch of finite pressure plasma with nonmonotonic ion distribution function under Landau damping effect
07 p1042 A72-19615

Nonuniform plane parallel plasma streams instability with/without magnetic field, comparing with conducting fluid
07 p1042 A72-19618

Supraluminous wave instability in weakly turbulent plasmas, using Vlasov equations
07 p1043 A72-19619

Ion heating in high Mach number oblique collisionless shock waves, noting role of two-ion beam instability from digital simulation
07 p1043 A72-19665

Vibration modes and stability of nonequilibrium low density He-Cs plasma in magnetic field
07 p1043 A72-19876

Ionization change induced striation instability of low temperature plasma with ambipolar diffusion in transverse magnetic field
07 p1043 A72-19878

Hydrogen plasma ionization equilibrium and thermodynamic stability existence condition based on Saha equation
07 p1044 A72-19889

Rf excitation produced plasma instability, considering density fluctuation and drive frequency introduction by amplitude modulation
07 p1045 A72-20441

Stability conditions of dissipative trapped ion mode in axisymmetric toroidal confinement systems, investigating collisional damping rate
07 p1045 A72-20476

Growth rate and boundary of drift dissipative instability in plasma under linear theta pinch conditions
07 p1045 A72-20477

Anisotropic equilibrium solution to Vlasov equation for high beta theta pinch plasma column
07 p1045 A72-20478

Dynamic stabilization of MHD instabilities in plasma column by multipole hf fields, analyzing dispersion equation
07 p1045 A72-20479

Quasi-linear theory validity for turbulent collisionless plasmas, considering bump-in-tail and weak symmetric two-stream instabilities
07 p1045 A72-20481

Inhomogeneous high-collision finite pressure plasma stability, finding thermal instability development under uniform temperature and arbitrary pressure
07 p1046 A72-20514

Nonlinear ion acoustic instability in plasma for subharmonic and harmonic forcing oscillations similar to Van der Pol effect
07 p1046 A72-20541

Interplanetary medium physical parameters from spacecraft measurements, noting solar wind properties, magnetic fields and MHD discontinuities
08 p1228 A72-20826

Stability of steady large amplitude whistler wave supported by weak electrostatic waves in collisionless magnetoplasma, constructing distribution function via Vlasov equation solution
08 p1213 A72-21258

High energy electron beam interaction with dense plasma, investigating unstable waves growth by numerical methods
08 p1213 A72-21259

Electrostatic ion wave stability in electrogasdynamic channel flow from approximate numerical solution of dispersion equations
08 p1211 A72-21305

Electron Larmor radius effect on hf hose and mirror instabilities of fast magnetoacoustic and ion acoustic waves in nonisothermal plasma
08 p1215 A72-21874

MHD stability problems in radio galaxy structure and cosmic ray interaction with magnetic fields
09 p1386 A72-22751

Alfven waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio
09 p1360 A72-22954

Axisymmetric MHD equilibria with elliptical cross sections and flat current profile, obtaining criterion for stability to localized modes by numerical computation
09 p1361 A72-23047

Ellipsoidal plasmoid equilibrium revolution frequency and potential energy and stability in external hf fields
09 p1362 A72-23204

Pulsed plasma flow interaction with spatially periodic magnetic field generated by coaxial coils with alternating currents, noting MHD stability
09 p1362 A72-23207

Plasma filament equilibrium in Sirius stellarator during heating by fast magnetosonic wave
09 p1363 A72-23214

Homogeneous plasma internal feedback mechanism and structure, discussing instabilities control by external feedback
09 p1365 A72-23474

Strong magnetic fields and electric current densities effects on acoustic oscillations and instability in stationary inhomogeneous low temperature plasma flow in crossed fields
10 p1517 A72-23838

Bounded plasma ionization instability inhomogeneity scale evaluation, assuming negligible electron energy losses due to heat conduction
10 p1517 A72-23844

Plane ionizing shock wave stability in MHD channel within magnetic field
10 p1522 A72-24542

MHD sheet pinch model time dependent nonequilibrium stability determined by equations of incompressible viscous resistive magnetofluid [AD-739661]
10 p1523 A72-24751

Superconducting levitron machine for trapped hot plasma stability and confinement studies in vacuum, discussing construction and coil performance
10 p1460 A72-24758

Parallel viscous modification of resistive tearing instability in Cartesian model of hard core pinch plasma confinement
10 p1523 A72-24795

Density fluctuations and ion acoustic two stream instability characteristics of RF generated plasma derived from electromagnetic scattering at 24 GHz
10 p1523 A72-24800

Collisionless thermalization of ion beam by interaction with plasma, noting acoustic instability growth
10 p1524 A72-24921

Nonlinear HF ionospheric instabilities classification on unified basis by coupled mode theory
10 p1440 A72-24936

Small scale sporadic E layer explained by means of cross field instability, proposing numerical solution based on realistic three dimensional perturbation
10 p1478 A72-25164

Three dimensional linear analysis of ionosphere cross field instability, noting potential as E region irregularities source
10 p1478 A72-25166

Perturbation technique application to nonlinear behavior of ion waves produced by two-beam instability in plasma
11 p1692 A72-25519

Uniform and parallel magnetic field effects on hydromagnetic instability of two dimensional jet at small magnetic Reynolds numbers
11 p1693 A72-25521

Plasma beam cyclotron instability theory based on computer simulation, noting stabilizing effect due to Landau damping
11 p1693 A72-25562

Plasma column stabilization by constant longitudinal inhomogeneous magnetic and rotating HF electromagnetic fields, noting application to plasma convective instabilities
11 p1694 A72-25786

Time dependent solutions of Tokamak equilibrium equations for plasma diffusive processes
11 p1694 A72-25787

Plasma equilibrium configurations, considering magnetically contained focus in external magnetic field
11 p1694 A72-25788

Plasma decay instabilities in finite amplitude Alfven wave field, discussing critical wave amplitude
11 p1694 A72-25790

Controlled nuclear fusion plasma stabilization by electrostatic forces, reducing applied magnetic field
11 p1694 A72-25791

Finite element method application to hydromagnetic plasma stability analysis, considering cylindrical plasma immersed in axial magnetic field and bounded by conducting shell
11 p1695 A72-25794

Longitudinal plasma oscillations nonlinear instability due to energy transformation into harmonics and subharmonics
11 p1695 A72-25795

Anomalous heating due to nonlinear parametric interaction between plasma and laser radiation, calculating laser power thresholds for nonlinear instability effects
11 p1695 A72-25857

Hydromagnetic stability of isothermal stratified plasma atmosphere uniform flow over conducting liquid along magnetic field, discussing dispersion relation for static configuration
11 p1695 A72-26115

Interplanetary plasma microinstabilities within framework of underlying electron-proton solar exosphere, discussing solar wind high beta effects
11 p1714 A72-26529

Plasma interchange instability and convection in gravitational field, showing viscosity and resistivity stabilization and critical Reynolds number
11 p1697 A72-26584

Absolute and convective plasma instabilities distinction in one dimensional linear infinite system, discussing saddle points method
11 p1697 A72-26585

Bounded systems dispersion relations interpretation for plasma waves and instabilities on finite cylinders, with emphasis on end plate damping and axial current effects on Q machines
11 p1697 A72-26597

Larmor frequency influence on Rayleigh-Taylor instability of viscous Hall plasma with magnetic field
11 p1698 A72-26604

Hydromagnetic stability of rotating nondissipative inviscid incompressible conducting fluid annulus permeated by radially varying magnetic field, considering axisymmetric and nonaxisymmetric disturbances
11 p1619 A72-26639

Plasma parametric instabilities excitation by radio waves in ionosphere, noting LF ionic and HF electrostatic wave growth
11 p1628 A72-26767

Plasma-ion beam system drift beam instability in longitudinal magnetic field, noting oscillations frequencies dependence
12 p1849 A72-27060

Low density plasma flute oscillations stabilization by feedback system with potential sensors and electrodes, deriving dispersion equation
12 p1850 A72-27127

LF oscillations due to drift-diffusion of current free weakly ionized inhomogeneous plasma in magnetic field
12 p1850 A72-27128

Thermal electron relativistic streaming effects on electromagnetic instability in magnetoplasmas
12 p1851 A72-27389

Electron wave sideband frequencies and wave-trapped electron oscillations as cause of plasma instability
12 p1851 A72-27430

Quasi-linear approximation equations for relativistic charged particles beam dissipative instability in collisional plasma, noting electrons heating at high collision frequencies
12 p1852 A72-27860

Stability properties for collisionless plasma and encounterless self gravitational stellar gas described by Vlasov equations
12 p1875 A72-27916

Self stabilization, measurement of two-ion beam instability generated by microturbulent ion heating in plasma with variable temperature ratio
13 p2007 A72-28428

Convective hydromagnetic stability of hot conducting fluid layer in magnetic field by Liapunov method
13 p2011 A72-28891

Parametric decay instability of Langmuir and acoustic plasma waves induced by incident electromagnetic wave near plasma frequency, noting application to ionospheric instabilities
13 p2012 A72-29126

Growth rates of unstable electromagnetic waves propagating perpendicularly to symmetric counterstreaming finite temperature plasmas
13 p2012 A72-29129

MHD laser discharge characteristics under generator conditions, emphasizing interaction of gas ionization instabilities and lasing radiation field
13 p2014 A72-29367

Cs seeded nonequilibrium MHD Ar plasma stability in fully ionized seed regime
13 p2014 A72-29368

Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma
13 p2014 A72-29369

Fluctuating electric current induced magnetic field effects on long wave nonequilibrium plasma instability associated with large scale closed cycle MHD generators
13 p2014 A72-29370

Nonlinear model of ionization instability of MHD generators, assuming discharge structure with alternating layers of high and low electrical conductivity
13 p2014 A72-29371

Two point correlation description of MHD plasma properties subject to electrothermal instability, calculating electron number density and temperature fluctuations
13 p2015 A72-29373

Parametric instability of magnetoactive plasma relative to nonpotential oscillations excitation, deriving threshold value of HF field strength
13 p2016 A72-29601

Alternating magnetic field effect on collisionless nonhomogeneous magnetoplasma ion acoustic oscillations

tions stability, examining parametric excitation of Langmuir oscillations

13 p2016 A72-29604

Drift dissipative instability in bounded gas discharge plasma within magnetic field, investigating oscillations dependence on gas pressure and field strength

13 p2016 A72-29605

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations

13 p2017 A72-29618

B type discrete radio aurora theoretical prediction based on drift gradient instability, comparing with observations

13 p1951 A72-29651

Stationary nonlinear ion acoustic oscillations in dense weakly ionized current carrying plasma, considering wave propagation velocity and instability process

13 p2019 A72-29988

Tangential MHD discontinuity stability for ideally conducting compressible fluid in magnetic and gravitational fields

13 p2020 A72-30068

Plasma instability theories for radio auroras, reviewing radar and radio observation systems and ion acoustic and drift gradient predictions

14 p2098 A72-30140

Current instability of electron-ion plasma in magnetic field produced by moving resonance charges

14 p2136 A72-30301

Dissipative instability produced by colliding ions and atoms in weakly ionized plasma

14 p2136 A72-30303

Dispersion of polyhedral nonrelativistic electron flow interacting with slow waves of magnetized cold plasma, observing instability in presence of Doppler effects

14 p2136 A72-30304

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves

14 p2136 A72-30308

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect

14 p2137 A72-30309

LF and HF oscillations in plasma-electron beam system, investigating instability control

14 p2137 A72-30310

Non-Maxwellian inhomogeneous collisionless plasma equilibrium and stability, proposing statistical thermodynamic model

14 p2137 A72-30394

Ion viscosity tensor and ion thermal flux derived for microinstabilities of inhomogeneous collisional high pressure plasma, noting second derivatives of temperature

14 p2137 A72-30395

Wave pattern of three dimensional hydromagnetic perturbations produced by harmonic magnetic dipole in anisotropic plasma

14 p2102 A72-30661

Two counter streaming plasmas with anisotropic temperatures, deriving instability condition for ordinary mode electromagnetic propagation perpendicular to external magnetic field

14 p2140 A72-30935

Anisotropic homogeneous plasmas, deriving computer model to predict effects of circularly polarized parallel plasma waves in external uniform magnetic field direction on instabilities

14 p2140 A72-30938

Lagrangian complex amplitude derivation for monochromatic electrostatic wave in unmagnetized collisionless plasma, investigating nonlinear Landau damping effects on instability

14 p2140 A72-30939

Hydromagnetic channel flow stability computation via energy method, solving eigenvalue problem by direct forward numerical integration

15 p2283 A72-31212

Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field

15 p2283 A72-31434

Monochromatic plasma wave excitation by cold electron beam, obtaining instability maximum amplitude and oscillation period

15 p2285 A72-32270

Mathematical model for modified ordinary electromagnetic wave propagation in presence of two cold counterstreaming plasma electron beams, noting instability regions and growth rate

15 p2286 A72-32274

Analytical solution of dispersion equation for ionization instability threshold in unbounded low temperature plasma, noting independence of relaxation rates

15 p2286 A72-32277

Radial transport instability during intense microbeam heating of thin plasma column, noting

maximum temperatures and phase coherence cut-off effect

15 p2286 A72-32306

MHD instabilities growth rates from diffuse linear pinch equations of motion solution

15 p2287 A72-32416

Finite beta plasma drift cone instability relationship to mirror ratio and plasma temperature changes

15 p2288 A72-32422

Solar flares induced magnetic field configurations, considering open and closed current sheets instabilities as flare sources

15 p2301 A72-32788

HF electrostatic instabilities driven by electron-ion relative drift velocity across external magnetic field for inhomogeneous plasma, noting Landau damping role

16 p2433 A72-32809

Ion acoustic, electron plasma and cyclotron harmonic waves parametric instabilities in magnetic field and applications to plasma heating

16 p2433 A72-32811

Rotating plasmas steady MHD equilibria without PS factor enhancement, considering cases of vanishing and nonvanishing toroidal current

16 p2433 A72-32817

Plasma accumulation in electrostatic potential well produced by electron space charges, determining diocotron instability as function of electron plasma and gyrofrequency ratio

16 p2434 A72-32819

Plasma wave excitation by monoenergetic relativistic electron beam, investigating beam-plasma wave synchronism during instability development

16 p2434 A72-32912

F region crossed field instability nonlinear theory based on energy transfer by mode coupling and absorption by linear damping with application to equatorial electrojet

16 p2384 A72-32976

Critical layer equations of plasma resistive instabilities, using sheet pinch model

16 p2436 A72-33577

Extraordinary wave instabilities in collision dominated plasma taking into account finite wave number, noting dispersion equation for refractive index larger than unity

16 p2436 A72-33653

Anomalous diffusion coefficient of axially decaying RF discharge collisional plasma under instability mode suppressed by feedback technique

16 p2437 A72-33657

Plasma stability in field of longitudinal monochromatic wave, examining satellites excitation by Langmuir wave

16 p2437 A72-33693

Random ionization waves convective instability in glow discharge positive column, calculating fluctuations spectrum as function of position along column for localized white noise source

16 p2437 A72-33747

Plane vortex sheet in incompressible inviscid and finitely conducting fluids, investigating discontinuity in density and conductivity on hydromagnetic stability

16 p2438 A72-33842

Alfvén wave firehose instability relaxation calculation to include nonlinear terms for explanation of solar wind temperature anisotropies by collisionless mechanism

16 p2449 A72-33933

Nonlinear theory of crossed field and two stream instabilities of nonthermal plasma motions in equatorial electrojet

16 p2387 A72-33937

Particle scattering due to Rosenbluth-Post convective plasma loss-cone instability distribution function

17 p2587 A72-34189

Magnetic field stability in Tornado-2 trap as function of helical currents on concentric spheres

17 p2588 A72-34856

Separatrix shape, presence and position and electron lifetime and space charge in helical Tornado trap magnetic field

17 p2588 A72-34857

Radial distribution of charged particle concentration fluctuation during decaying plasma instability development in magnetic field

17 p2588 A72-34865

Cerenkov instability and VLF emissions generated outside the plasmopause

17 p2547 A72-35063

Vibration modes and stability of nonequilibrium low density He-Cs plasma in magnetic field

17 p2589 A72-35126

Ionization change induced striation instability of low temperature plasma with ambipolar diffusion in transverse magnetic field

17 p2590 A72-35128

Hydrogen plasma ionization equilibrium and thermodynamic stability existence condition based on Saha equation

17 p2590 A72-35137

HF electrostatic wave instability induced in plasma by electron beam, noting resonant frequency Doppler shift

17 p2591 A72-35369

Slipping stream instability of a self-gravitating hydromagnetic gas cloud

17 p2613 A72-35501

Water bag model application to one dimensional inhomogeneous two-stream collisionless electron plasma stability computation, noting electrostatic modes

17 p2592 A72-35619

Electron cyclotron drift instability linear theory application to controlled fusion and collisionless shocks, proving anomalous resistance to current flow normal to magnetic field

17 p2592 A72-35624

A stability mechanism for the ion-acoustic waves

17 p2592 A72-35625

Beam-generated collisionless ion-acoustic shocks

17 p2592 A72-35626

Instability of electromagnetic cyclotron harmonic waves in plasmas

17 p2592 A72-35775

Alfvén waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio

17 p2593 A72-35883

Dynamo instability and feedback in a stochastically driven system

18 p2678 A72-36013

Combined Rayleigh and Kelvin instability of a Hall plasma with a vertical magnetic field

18 p2715 A72-36502

The electromagnetic radiation near the ion plasma frequency emitted by a turbulently heated plasma

18 p2715 A72-36598

Observation of satellite modes in a beam-plasma instability

18 p2715 A72-36600

Quasi-linear theory of plasmas situated in a weak UHF electric field and a constant magnetic field

18 p2715 A72-36654

Hydrodynamic stability of the gradient flow of a conducting fluid with a rheological power law in a transverse magnetic field

18 p2716 A72-36814

Flute modes in a plasma in the presence of nonuniform electric fields

18 p2717 A72-37162

Nonlinear equations for explosive instabilities of three plasma waves interaction with mutually different linear damping

19 p2838 A72-37326

Longitudinal waves in a perpendicular collisionless plasma shock. IV - Gradient B

19 p2838 A72-37329

Nonlinear time evolution of firehose unstable MHD waves, noting quasi-linear theory truncation error for low wave numbers relaxation time and energy growth

19 p2839 A72-37334

Boundary conditions in the presence of Hall current or finite ion Larmor radius effects

19 p2839 A72-37338

Experimental indications of plasma instabilities induced by laser heating

19 p2840 A72-37549

Nonlinear saturation of the ion-acoustic instability

19 p2840 A72-37931

Hydrodynamic stability of periodic burning front for ideally conducting incompressible fluids in longitudinal or transverse magnetic field

19 p2882 A72-38457

Effect of ionic viscosity on the stability of a finite-pressure plasma

19 p2842 A72-38529

Stability of a plasma conductor with axial current, surrounded by cold gas with a pressure gradient

19 p2842 A72-38533

Electric discharge concept to uncouple electron density from temperature for production of stable uniform electric laser discharges

19 p2812 A72-38596

Continuum eigenmodes of an inhomogeneous plasma

20 p2956 A72-39015

MHD instability of two dimensional laminar boundary layer in incompressible electrically conducting fluid along concave wall with periodic three dimensional disturbances

20 p2957 A72-39328

Determination of the magnetic field B in vacuum for general two-dimensional MHD-equilibria

20 p2957 A72-39352

Plasma equilibrium in configurations with a helical magnetic axis with allowance for toroidality

20 p2957 A72-39353

Drift instabilities in an inhomogeneous collisionless plasma

20 p2957 A72-39355

Nonlinear monochromatic Alfvén wave propagation along magnetic field in anisotropic rarefied plasma with firehose instability

20 p2957 A72-39381

Finite sized optically thin radiating plasma stability analysis, deriving luminosity function for metastable state existence from mathematical model 20 p2958 A72-39456

Observation of superheat instability in a fully ionized current-carrying plasma. 20 p2958 A72-39854

Suppression of instabilities in a beam-plasma system by a modulation of the electron beam. 21 p3089 A72-40199

A system of disc-stabilized dc arc and solution nebulization device for the investigation of multicomponent plasmas. 21 p3039 A72-40213

Contribution to nonlinear theory of electron-beam kinetic instability in a plasma 21 p3090 A72-40408

Nonlinear ion sound in a fully ionized current-carrying plasma 21 p3090 A72-40411

Rayleigh-Taylor instability in a composite medium. 21 p3104 A72-40478

Nonlinear magnetosonic waves in a plasma with a finite conductivity. 21 p3090 A72-40485

The study of turbulence in theta-pinch plasma with azimuthal magnetic field. 21 p3091 A72-40571

Parametric instability of magnetoactive plasma relative to nonpotential oscillations excitation, deriving threshold value of HF field strength 21 p3091 A72-40655

Alternating magnetic field effect on ionoacoustic oscillations stability of collisionless nonhomogeneous magnetoplasma, examining parametric excitation of Langmuir oscillations 21 p3091 A72-40658

Drift dissipative instability in bounded gas discharge plasma within magnetic field, investigating oscillations dependence on gas pressure and field strength 21 p3091 A72-40659

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations 21 p3091 A72-40671

Three-dimensional pattern of instability development during the interaction between a modulated electron beam and a plasma 21 p3092 A72-40800

Measurements of enhanced absorption of electromagnetic waves and effective collision frequency due to parametric decay instability. 21 p3092 A72-40829

Linear and nonlinear aspects of ion-sound current instability for solar atmosphere conditions of full ionization, noting implications for flare mechanism 21 p3100 A72-41040

Frictional effects with neutrals and the gravitational instability of a plasma. 21 p3093 A72-41332

Effects of parallel wavelength on the collisional drift instability. 21 p3093 A72-41627

Transverse velocity shear instabilities within a magnetically confined plasma. 21 p3093 A72-41628

Plasma heating by large-amplitude, low-frequency electric fields. 21 p3094 A72-41630

Helical field experiments on a three-meter theta pinch. 21 p3094 A72-41636

Low-frequency oscillations in a Penning-discharge plasma under conditions of a cyclotron ion source 21 p3095 A72-41682

External high-frequency modulation of an ion beam and the absorption of beam-plasma instability oscillations in a plasma situated in a magnetic field of mirror configuration 21 p3095 A72-41683

Influence of boundaries on the ionization instability of a plasma in a discharge of coaxial geometry 22 p3209 A72-41876

Influence of inelastic electron-energy losses on the development of ionization instability in a plasma 22 p3209 A72-41877

Uniform low temperature gas discharge plasma diagnostics in shielded volume, noting application of stable plasma generation effect for isotope analysis 22 p3210 A72-42152

Hydrodynamic instability of a plasma boundary with a magnetic field, taking viscosity into account. 22 p3210 A72-42277

Boundary fluctuations of a plasma column with a current 22 p3211 A72-42655

Larmor radius and collisional effects on the dynamic stability of a composite medium. 22 p3212 A72-42990

Wave propagation in plasma modulated by external electric field, noting dispersion equation for coupled waves and instability conditions 22 p3212 A72-43101

Surface drift vibrations of a weakly ionized plasma 22 p3212 A72-43102

Instability of a weakly ionized plasma with respect to vibrations with wavelengths of the order of the Debye radius 22 p3213 A72-43104

Confinement time of plasma injected in magnetic field of racetrack with diverter, noting plasma equilibrium in toroidal magnetic field 22 p3213 A72-43106

An ion-cyclotron instability of a plasma produced by a fast-ion beam 22 p3213 A72-43113

Electromagnetic emission during the development of a hydrodynamic beam instability in a bounded plasma 22 p3213 A72-43115

Current instability of electron-ion plasma in magnetic field produced by moving resonance charges 23 p3317 A72-43203

Dissipative instability produced by colliding ions and atoms in weakly ionized plasma 23 p3317 A72-43205

Dispersion of polyhelical nonrelativistic electron flow interacting with slow waves of magnetized cold plasma, observing instability in presence of Doppler effects 23 p3317 A72-43206

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves 23 p3317 A72-43210

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect 23 p3317 A72-43211

LF and HF oscillations in plasma-electron beam system, investigating instability control 23 p3317 A72-43212

Conditions for magnetoactive plasma longitudinal waves with phase velocity near light velocity existence, investigating increments during synchrotron instability due to relativistic particles 23 p3262 A72-43311

Collisionless heating of plasma ions by an ion beam 23 p3318 A72-43321

Surface wave parametric excitation by weak HF electric field in semibounded plasma, calculating near threshold instability by dispersion equation 23 p3318 A72-43322

Nature of polar-aurora light intensity pulsations associated with P12-type geomagnetic pulsations 23 p3282 A72-43359

A current instability in the neutral layer of the tail of the earth's magnetosphere 23 p3283 A72-43368

Excitation of potential oscillations in a plasma by a flow of phased oscillators 23 p3319 A72-43401

Electron distribution fluctuation in two level system of unstable electron gas, noting periodic time dependence of population 23 p3319 A72-43406

Physical processes of weak, single wave and strong plasma turbulence and instabilities driven by oscillating fields 23 p3319 A72-43514

Plane parallel nonuniform velocity plasma streams instability in absence and presence of magnetic field, comparing with ideal conductive liquid flows 23 p3320 A72-43518

Ion acoustic instability in collisionless shocks. 23 p3320 A72-43522

Perpendicular collisionless shock wave instability. 23 p3320 A72-43523

On the instability of nonlinear longitudinal oscillations of magnetoactive plasma. 23 p3320 A72-43524

Strictional nonlinearity effect on uniform nonrelativistic monoenergetic beam interaction with isotropic bounded plasma, investigating plasma oscillations and stability 23 p3320 A72-43576

Plasma-beam interaction in limited geometry: Temperature effects 23 p3321 A72-43700

Quasi-linear theory for the low-frequency instability of a plasma placed in a weak SHF electric field 23 p3321 A72-44172

Electromagnetic instabilities produced by neutral-particle ionization in interplanetary space. 23 p3332 A72-44506

Parametric instabilities and anomalous heating of plasmas near the lower hybrid frequency. 23 p3323 A72-44545

The critical velocity of gas-plasma interaction and its possible heterogenic relevance. 24 p3429 A72-45468

Instability of a magnetically active plasma in the presence of a specified transverse velocity of the ions 24 p3429 A72-45488

High-frequency instabilities in a plasma with a nonlinear ion-acoustic wave 24 p3429 A72-45489

Anode sheath plasma current instabilities, examining electron and ion turbulent heating, plasma particle limiting energies and unsteady oscillation spectra 24 p3429 A72-45490

Current-driven drift wave instability in a sheared magnetic field. 24 p3430 A72-45570

Nonlinear instability of Bernstein modes pumped by an electromagnetic wave. 24 p3430 A72-45571

Plasma-ion beam system drift beam instability in longitudinal magnetic field, noting oscillations frequencies dependence 24 p3431 A72-45713

MAGNETOHYDRODYNAMIC TURBULENCE

NT PLASMA TURBULENCE

Solar coronal MHD disturbance off eastern limb correlation with complex radio event observed simultaneously with white light coronameter and Culgoora radioheliograph 02 p0276 A72-11647

Quasi-linear theory of relativistic particle acceleration by hydromagnetic turbulence for small gyration radius expansion, using Vlasov equation 02 p0265 A72-12301

Turbulent micro and macromotion velocities in solar photosphere from CN molecule vibrational band line contours 07 p1077 A72-19810

Random homogeneous turbulence generation of rms weak magnetic field fluctuation in infinite medium with short correlation time 13 p2015 A72-29403

Transverse particle diffusion across external homogeneous magnetic field under random isotropic large scale hydromagnetic turbulence 14 p2102 A72-30650

Postfrontal ion acoustic shock turbulence as function of Mach number and electron/ion temperature ratio, using particle in cell technique 15 p2281 A72-32424

Turbulent micro and macromotion velocities in solar photosphere from CN molecule vibrational band line contours 17 p2617 A72-35735

Energy spectrum of small scale solar magnetic fields. 20 p2971 A72-39765

On a resolution of the equations governing the second order correlation functions for an isotropic hydromagnetic turbulence. 22 p3212 A72-43100

MAGNETOHYDRODYNAMIC WAVES

NT ELECTROSTATIC WAVES

NT PLASMA WAVES

Aligned fields in MHD shock polar equation, obtaining magnetic induction polar variables 01 p0106 A72-10135

LF large scale oblique Alfvén wave propagation in turbulent ion acoustic plasma, investigating dispersion relation, Landau damping and interactions 01 p0107 A72-10137

Nonlinear hydromagnetic waves in finite beta collisionless plasma, calculating space-time evolution with nonlinear integrodifferential equation 01 p0107 A72-10143

Quasi-steady spectrum of hydromagnetic noise in proton belt, using random excited broad wave fields in nonisothermal magnetosphere 01 p0118 A72-10367

MHD waves nonlinear interaction in magnetosphere, calculating transverse Alfvén and magnetosonic and longitudinal acoustic wave decay instabilities 01 p0109 A72-10618

MHD boundary waves properties, noting application to traveling wave nonreciprocal devices and planar structures based on microwave integrated circuits 01 p0029 A72-10703

MHD wave modes nonlinear coupling by quantum field approach with Hamiltonian formulation, applying to solar coronal heating 01 p0129 A72-10797

Microscale MHD wave and stationary structure fluctuations in interplanetary medium solar wind, considering theoretical constraints 01 p0129 A72-10883

Magnetospheric wave and particle phenomena correlation to convection electric fields in nightside magnetosphere during isolated substorms 01 p0062 A72-10904

High speed interstellar gas dynamic resonant hydromagnetic wave interaction with cosmic ray shocks 01 p0121 A72-11140

Large amplitude linearly or elliptically polarized Alfvén wave propagation parallel to magnetic field, calculating nonlinear Landau damping rate 01 p0111 A72-11227

Hydromagnetic cylindrical blast wave propagation in self gravitating polytropic gas, obtaining graphs for velocity, pressure, density and magnetic field distributions 02 p0264 A72-12181

Magnetospheric hydromagnetic waves propagation characteristics, discussing isotropic/poloidal and guided/toroidal modes coupling in conjunction with hydromagnetic wedge model

02 p0268 A72-12870

Damped geomagnetic pulsations associated with geomagnetic storms interpreted as interaction between hydromagnetic oscillations and solar wind induced magnetospheric motions, discussing modified mathematical model

02 p0222 A72-12872

Acceleration phase of solar cosmic rays and relativistic electrons in solar flare of 7 July 1966, discussing MHD shock waves generation

03 p0407 A72-12942

Linear and nonlinear MHD shock wave propagation and stability, investigating Hugoniot relation

03 p0396 A72-13688

Ionospheric hydromagnetic and acoustic gravity wave interactions, examining stratified nonisothermal atmospheric model

04 p0516 A72-14934

Dispersion relation for MHD wave propagation through partially ionized magnetoplasma, discussing collision frequencies effects

04 p0556 A72-14943

Hydromagnetic whistler traveling wave tube amplification in magnetosphere, deriving temporal growth rate dependence on plasma parameters

04 p0517 A72-14950

Existence conditions for steady MHD shock waves propagating in collisionless plasma along magnetic field, observing dependence on pressure anisotropy

05 p0698 A72-17016

Nonlinear MHD wave trains in cold collisionless plasma investigated by numerical and analytical methods

05 p0698 A72-17018

MHD shock waves stability, showing Hall term effect on number of shock boundary conditions

05 p0699 A72-17025

Hall fields effect on interaction of MHD waves in inhomogeneous plasma, considering MHD wave dispersion

05 p0701 A72-17237

Magnetosonic, Alfvén, shock and infinitesimal waves and corresponding rays in relativistic hydrodynamics and magnetohydrodynamics, using tensor distributions

06 p0847 A72-17253

Circularly polarized hydromagnetic wave propagation upstream in solar wind, noting Doppler shifted whistler and slow electron cyclotron modes

06 p0872 A72-17449

Geoelectric field strengths deduction from mid-frequency slopes on diurnal incidence plot of pc 1 hydromagnetic whistlers

07 p0974 A72-18904

MHD shock normals calculation by magnetic coplanarity formula, applying to bow shock crossing of Pioneer 6

07 p1040 A72-19157

Hydromagnetic wave theory for solar wind, noting tangential discontinuities, perpendicular and Alfvén shocks and forward and reverse fast and slow shocks

07 p1058 A72-19354

Transverse hydromagnetic plane waves existence in uniformly heated electrically conducting fluid under temperature gradient and magnetic field

07 p1045 A72-20442

Weakly damped Alfvén ion-cyclotron waves and fast magnetoacoustic waves in infinite plasma cylinder inserted into current bearing finite coil

07 p1046 A72-20516

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere

08 p1130 A72-20711

Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere

08 p1153 A72-20717

Pulsars CP 0328 and NP 0531 twinkling explained by interstellar electron density fluctuations due to Alfvén wave passage and coupling of cosmic rays to interstellar gas

09 p1377 A72-22753

Alfvén waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio

09 p1360 A72-22954

Van Allen proton belt model, considering ionosphere particle acceleration by stochastic interaction with hydromagnetic waves due to solar wind at magnetosphere shock front

10 p1529 A72-24245

Optimal control computation for nonlinear hyperbolic partial differential system by gradient and quasi-linearization techniques, noting MHD, fluid flow and electromagnetic wave propagation

10 p1456 A72-24453

Internal Alfvén gravity waves propagation in rotating Boussinesq inviscid adiabatic conducting fluid shear flow within transverse magnetic field, considering electromagnetic and Coriolis forces effects

10 p1511 A72-24470

Fast auroral hydromagnetic wave occurrence relation to substorm activity, suggesting role of enhanced particle population in magnetospheric region

10 p1476 A72-24962

Plasma decay instabilities in finite amplitude Alfvén wave field, discussing critical wave amplitude

11 p1694 A72-25790

Hydromagnetic waves propagation and horizontal group velocity westward from dawn terminator to dark hemisphere, inferring magnetospheric properties

11 p1625 A72-26414

Supergranular motions source of Alfvén waves dominating solar wind microstructure at earth orbit

11 p1724 A72-26530

Skew magnetic structure of ionizing shock waves with ohmic dissipation as dominant diffusion mechanism

11 p1618 A72-26605

Hydromagnetic wave scattering of high energy cosmic rays in highly ionized interstellar gas to confine cosmic rays to Milky Way

12 p1864 A72-27745

High frequency potential effect on fast transverse magnetic waves along plasma layer bounded by two conducting plates

12 p1785 A72-27855

Multilayer plasma model for MHD pulse propagation in ionospheric waveguide, noting approximation of Alfvén velocity distribution by plasma layers

13 p1946 A72-28585

LF oscillations and electron drift in frozen plasma under strong electromagnetic radiation, deriving formulas for coupled Alfvén and spiral waves

13 p2035 A72-28593

High latitude ionospheric transmission and reflection properties for oblique hydromagnetic plane waves at micropulsation frequencies for daytime and nighttime conditions

13 p1951 A72-29390

Alfvén wave transmission in sunspot umbral magnetic flux tube, noting standing progressive waves and energy dissipation in facular regions

13 p2049 A72-29937

Hydromagnetic waves excited by transverse magnetic dipole in finite-conductivity plasma

14 p2102 A72-30662

Earth core hydromagnetic oscillations with respect to geomagnetic secular variation time scales and role in dynamo process-produced geomagnetic field

15 p2222 A72-31279

Theory for plasma radiation from collisionless MHD shock waves applied to Type 2 solar radio bursts, comparing to type 4 bursts

16 p2446 A72-33461

Plane hydromagnetic wave propagation in rotating fluid permeated by variable magnitude and direction magnetic field, observing wave-associated critical level

16 p2436 A72-33567

MHD wave propagation and generation during spin-up of rotating viscous incompressible electrically conducting fluid

16 p2436 A72-33572

Plasmopause and geomagnetic micropulsations correlation from universal magnetospheric instability model, noting drift waves conversion to sound or Alfvén waves

16 p2387 A72-33906

Alfvén wave propagation in interplanetary medium for solar wind microscale fluctuations, using stationarity spherically symmetrical model

16 p2449 A72-33912

Alfvén wave firehose instability relaxation calculation to include nonlinear terms for explanation of solar wind temperature anisotropies by collisionless mechanism

16 p2449 A72-33933

Fermi acceleration effects in low energy particle transport in interplanetary space, assuming kinetic energy contained in Alfvén and bidirectional traveling waves

16 p2460 A72-33938

The propagation of non-axisymmetric Alfvén waves in an argon plasma

17 p2591 A72-35371

Detection of solar-wind electron plasma frequency fluctuations in an oblique nonlinear magnetohydrodynamic wave

17 p2602 A72-35610

Alfvén waves development and high pressure plasma hydrodynamic and kinetic instabilities dependence on magnetic field to temperature gradients ratio

17 p2593 A72-35883

Rotary shocks and waves of relativistic magnetohydrodynamics

17 p2593 A72-35908

Earth surface magnetic field intensity variations in terms of magnetospheric resonator excitation, assuming three dimensional Alfvén waves

18 p2688 A72-36869

Nonlinear time evolution of firehose unstable MHD waves, noting quasi-linear theory truncation error for low wave numbers relaxation time and energy growth

19 p2839 A72-37334

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere

19 p2765 A72-38339

Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere

19 p2791 A72-38345

Propagation of Alfvén-gravitational waves in a stratified perfectly conducting flow with transverse magnetic field

19 p2843 A72-38791

The effect of asymmetry on toroidal hydromagnetic waves in a dipole field

20 p2957 A72-39230

Nonlinear theory of particle motion in monochromatic Alfvén wave field application to Pc-1 geomagnetic pulsations evolution

20 p2917 A72-39408

Resonance between spin waves and magnetohydrodynamic waves in antiferromagnetic semiconductors and metals

21 p3096 A72-40415

Propagation of HM-waves with periods corresponding to periods of Pc1 micropulsations through the lower ionosphere

21 p3015 A72-40497

Linear and Alfvén waves propagation in incompressible beam-plasma systems, deriving dispersion law

21 p3092 A72-40994

Propagation of magnetohydrodynamic shock waves in a medium with diminishing density

21 p3094 A72-41653

Pc 1 hydromagnetic whistlers and emissions polarization characteristics measured in plane of earth surface

22 p3169 A72-42019

The heating of the solar plasma due to microwave phenomena correlated with type II meter bursts

22 p3222 A72-42041

ULF wave observation by satellite, considering geomagnetic activity control of magnetospheric wave occurrence

22 p3174 A72-42902

Nature of polar-aurora light intensity pulsations associated with Pi2-type geomagnetic pulsations

23 p3282 A72-43359

Magnetic pulsation spectra in a nonisothermal plasma

23 p3323 A72-44483

Instability of the whistler structure of oblique hydromagnetic shocks

24 p3428 A72-45013

Multilayer plasma model for MHD pulse propagation in ionospheric waveguide, noting approximation of Alfvén velocity distribution by plasma layers

24 p3397 A72-45085

LF oscillations and electron drift in frozen plasma under strong electromagnetic radiation, deriving formulas for coupled Alfvén and spiral waves

24 p3440 A72-45093

MAGNETOHYDRODYNAMICS

MHD equations for plasma of arbitrary collision frequency in weakly inhomogeneous magnetic field, considering collisional and resonant particle effects

01 p0108 A72-10241

Oscillatory hydromagnetic dynamo model of variable sign large scale solar magnetic field, using Benard convective cell with Coriolis velocity disturbance

01 p0128 A72-10585

Applied MHD and high temperature gas dynamics - Conference, Gdansk, Poland, May 1970

01 p0110 A72-11201

Nonuniform magnetic field effects in MHD slider bearing, showing inertia terms contribution dependence on Hartmann number

02 p0235 A72-11533

Rarefied plasma hydrodynamic equations for rotational discontinuities in solar wind, discussing magnetic field modulus jumpwise changes

02 p0272 A72-11915

Dynamo theory MHD equations numerical solution, showing rapid variation of electromagnetic field, hydrodynamic velocities and earth core magnetic moment

02 p0217 A72-11933

Geomagnetism theory of dynamos in homogeneous fluid masses, considering Rikitake self reversing, kinematic and hydromagnetic dynamo problems

02 p0220 A72-12088

Cascade connected electrode scheme for MHD applications, noting potential and current distributions and Hall voltage buildup

02 p0265 A72-12276

Solar corona MHD and plasma physical structure, considering macroscopic and microscopic properties

03 p0422 A72-13204

MHD processes responsible for solar flares in polarity boundaries of magnetic fields, determining magnetic energy change and flux

03 p0410 A72-13322

Radio-astronomical evidence for magnetohydrodynamic pulsations in corona, considering

solar radio burst model of pulsating structure due to synchrotron radiation

03 p0432 A72-13349

Solar magnetic field and solar cycle dynamo theory based on mean field MHD

03 p0433 A72-13361

Full lubrication characteristics, discussing pressure pump, viscosity, MHD, volume elasticity, centrifugal and rheodynamic techniques

03 p0365 A72-14299

Cylindrical blast wave propagation in MGD, deriving closed-form solutions for line explosion in medium with constant pressure, density and axial magnetic field

03 p0400 A72-14391

Plasma layer implosion in theta pinch, deriving modified snow flow equations from MHD equations

04 p0556 A72-14855

MHD squeeze film lubrication between electrically conducting parallel plates, showing graphically approach time under magnetic field in free space

05 p0665 A72-16031

Large scale alternating solar magnetic field generation by outer shell convective flow, constructing oscillator hydromagnetic dynamo model

05 p0715 A72-16232

Electron density and temperature temporal and radial profiles in megawatt MPD-arc thruster exhaust, using Thomson scattering technique

05 p0707 A72-16887

Spatio-temporal tensorial structure of fluid magnetodynamic equations in terms of electromagnetism and continuum mechanics

06 p0861 A72-18103

Magnetohydrodynamic theory of spherical drop deformation and drag under axisymmetric current distribution in conducting viscous incompressible fluid

06 p0864 A72-18533

Digital computer numerical procedure to solve dynamo theory MHD equations for earth nucleus, using combination of Fourier and finite difference methods for integration

08 p1155 A72-20810

Quasi-steady MPD propulsion systems for astronomical applications, describing electric energy storage bank, mass supply system, accelerator and operation principle

09 p1374 A72-22934

Two fluid MHD model to study cylindrical plasma condenser resonance properties in axial magnetic and alternating electric fields

09 p1360 A72-22952

Two fluid MHD model for flat plasma condenser in crossed magnetic and alternating electric fields, calculating impedance and disturbed plasma parameters

09 p1360 A72-22953

Clebsch transformation in relativistic MHD, considering Maxwell equations in vacuum and electromagnetic perfect fluid in isentropic flow

10 p1519 A72-24126

Current lines of relativistic fluid investigated by Ehlers method, applying to MHD Godel type universes

10 p1520 A72-24220

Godel metric type MHD universes, using Maxwell and conservation equations

10 p1524 A72-24857

Quasi-steady MPD thruster system, discussing gas injection, electronic synchronization and electrolytic pulse forming network

11 p1613 A72-26196

Optimization criteria for electric feeding in quasi-steady MPD thruster, discussing energy storage bank characteristics determination

11 p1709 A72-26197

Quasi-steady operation establishment in pulsed MPD arc jet, investigating ion density radial distribution and initial tank pressure and magnetic field effects on plasma front arrival

11 p1696 A72-26219

Mass, momentum and energy distribution measurement in quasi-steady MPD discharge, obtaining velocity vector profiles

11 p1696 A72-26220

Magnetogasdynamics intrinsic equations, determining geometrical and mechanical characteristics of axisymmetric and meridional plane motions

13 p2010 A72-28682

Uniform vertical magnetic field effect on Ekman layer over horizontal plate at rest relative to rotating conducting liquid

13 p2011 A72-29006

Rarefied plasma hydrodynamic equations for rotational discontinuities in solar wind, discussing magnetic field modulus jumpwise changes

13 p2030 A72-29227

Dynamo theory MHD equations numerical solution, showing rapid variation of electromagnetic field, hydrodynamic velocities and earth core magnetic moment

13 p1949 A72-29245

MHD - Conference, Argonne, Illinois, March 1972

13 p1899 A72-29351

Mathematical model for magnetized solar wind with one fluid MHD and polytropic state equations, calculating magnetic field variables at earth

13 p2034 A72-29958

Two dimensional unsteady solutions to MHD equations, describing matter compression near zero line of magnetic field for solar flares and z pinch studies

16 p2435 A72-33151

Stellar MHD, discussing strongly magnetic stars identification and slow rotation origin based on oblique rotator model

16 p2460 A72-33923

Combustion fronts velocity comparison with light speed in relativistic hydrodynamics and MHD

17 p2589 A72-34911

Two fluid MHD model for flat plasma condenser in crossed magnetic and alternating electric fields, calculating impedance and disturbed plasma parameters

17 p2593 A72-35882

Conservative difference schemes for linear and non-linear problems of mathematical physics, discussing gas dynamics and magnetogasdynamics problems requirements

19 p2833 A72-37383

Propagation of surface waves along a plane boundary between two magnetoactive plasmas

19 p2842 A72-38532

Thermoelasticity and magnetohydrodynamics equations and inequalities, covering Fourier law, stress relations, Bingham fluids, Ohms law, variational formulations and functional analysis

20 p2952 A72-39183

Radiation from an electric dipole in anisotropic media

24 p3424 A72-44706

MAGNETOHYDROSTATICS

Solar magnetic field distribution in sunspots surface layers, considering photospheric three dimensional magnetohydrostatic model

03 p0431 A72-13337

MAGNETOIONIC PLASMA

U PLASMAS [PHYSICS]

MAGNETOIONICS

Magnetoionic component with fluctuating elliptical polarization during wave reflection from F 2 layer, discussing suppression mechanism

01 p0028 A72-10593

Phase difference measurement between magnetoionic components returned from lower ionosphere due to pulsed radio signal, obtaining electron density profiles

01 p0063 A72-10914

Lorentz polarization effects on complex refractive index and wave polarization of magnetoionic theory

04 p0548 A72-14944

Magnetoionic mode reciprocity for oblique incident electromagnetic wave propagation through birefringent stratified media

04 p0492 A72-15445

Total flux and polarization of solar S-component at mm wavelengths, obtaining radio source optical depth by evaluation of QL propagation based on magnetoionic theory

07 p1069 A72-19080

Time dependent parallel and cross polarized electromagnetic pulse propagation in magnetoionic medium for normal incidence

09 p1280 A72-23231

Electromagnetic waves on a conducting infinite cylinder in a magnetoionic medium

17 p2517 A72-35399

Structure of ionospheric inhomogeneities according to simultaneous observations of two magnetoionic components

18 p2688 A72-36856

Group delay times of magnetoionic components for horizontal electron density profiles in magnetic meridian plane, noting comparison with ionospheric sounding data

23 p3283 A72-43361

Ray tracing in ionosphere and magnetoionic theory application to coupling in cold plasma waves, considering linear waves, electrodes, particles and echoes as exciters

23 p3319 A72-43516

MAGNETOMETERS

NT VARIOMETERS

Digital videomagnetograph providing real time display of line of sight component of solar magnetic fields

03 p0356 A72-13281

Kitt Peak 40 channel magnetograph using fiber optic probe for spectral and spatial resolution in weak photospheric field detection

03 p0356 A72-13282

Pressure scanning Fabry-Perot magnetometer using KDP crystal and Glan-Thompson prism with echelle interferometer spectrograph for polarized Zeeman components

03 p0356 A72-13283

Sacramento Peak magnetograph, discussing modified Doppler-Zeeman analyzer for separate measurements of circularly polarized line displacement

03 p0356 A72-13284

Systematic errors of Crimean vector magnetograph related to miscentering of spectral lines

03 p0357 A72-13285

Optics and electronics of digitized birefringent filter solar magnetograph to isolate magnetic sensitive lines

03 p0357 A72-13287

Absorption line formation in magnetic field for magnetograph interpretation of solar atmosphere

03 p0427 A72-13291

Magnetographic observations of magnetic fields in quiescent solar prominences, using Zeeman effect on H, He, and metal lines

03 p0428 A72-13298

Solar magnetic field structure determination in active regions from H alpha morphology obtained with chromosphere magnetograph, discussing emerging flux region role

03 p0428 A72-13304

Magnetograph scans of solar disk center supergranulation, showing downdrafts relation to magnetic field strength and chromosphere and photosphere brightness

03 p0429 A72-13307

High resolution magnetographic and spectrographic observations of plage fields and photospheric effects in weakly active regions

03 p0429 A72-13308

Plage magnetic fields associated with downward velocities from magnetograph filtergrams of opposite circular polarizations in CA I absorption line

03 p0429 A72-13312

Inner magnetosheath hydromagnetic disturbances, presenting magnetometer data in inclination-declination coordinate system

03 p0348 A72-13510

Weak magnetic moments measurement under pressure and over wide temperature range by Faraday method, discussing magnetometer and cryogenic equipment modifications

04 p0522 A72-15478

AEROS satellite active magnetic attitude control system, describing magnetometer system, sun and IR earth sensors, spin stabilization and axis and spin rate control torque generation

05 p0727 A72-16473

Geomagnetic field measurement, discussing variometers and magnetographs theory

06 p0812 A72-17370

Geomagnetic field vector components measurement methods, considering data processing problems

06 p0812 A72-17371

Three component airborne magnetometer design, discussing direction reference system and stabilized platform

06 p0812 A72-17372

Aeromagnetic surveying with airborne fluxgate magnetometer, discussing field data compilation and interpretation

06 p0812 A72-17373

Geophysical applications of high resolution magnetometers to geomagnetic measurements, archaeological investigations and satellite sounding of planetary magnetic fields

06 p0812 A72-17374

Rocket-borne vector magnetometer measurements of midlatitude ionospheric currents near sporadic E, noting nearly uniform vertical distribution

06 p0804 A72-17459

Earth bow shock magnetic field data correlation withOGO 5 flux gate magnetometer, using Tidman-Northrop theory

07 p0975 A72-19145

Proton 2 and 4 and Cosmos 196 orientation by quick response algorithm from onboard three component magnetometer readings

08 p1240 A72-21138

Magnetic field measurement methods and magnetometers performance in superconducting, thin film, resonance and fluxgate areas

09 p1308 A72-22465

Superconducting quantum flux sensors for measuring magnetic fields and susceptibility, voltage and resistance

09 p1308 A72-22466

Ferromagnetic thin film magnetometers operation and performance characteristics for magnetic field measurement

09 p1308 A72-22467

Resonance magnetometers for magnetic field measurement, discussing classification, operation principles and general properties

09 p1308 A72-22468

Fluxgate magnetometry, discussing weak field sensors, low power devices and various applications

09 p1308 A72-22469

Magnetometers for balloon-borne X ray astronomy payload azimuth determination, noting misorientation, earth and spurious magnetic fields effects on measurement effectiveness

10 p1530 A72-24954

Search coil magnetometer for measurement of weak alternating magnetic fields encountered by Helios solar probe in space

11 p1632 A72-25804

- Cryogenic Josephson junction magnetometer in magnetocardiography, discussing high ambient noise levels in unshielded environment 12 p1769 A72-27288
- Broadband superconducting quantum microwave magnetometer design, operation and performance 12 p1812 A72-28219
- Two gyro three axis stabilizer with gyrocompass effect for gravimeter or magnetometer sensor stabilization in towed gondola 13 p1957 A72-29271
- Impulsive pulsations (Pi/2) identification as geomagnetic field distortion coincident with oscillatory component from high resolution Rb vapor magnetometer recordings 13 p1951 A72-29656
- Photospheric network, magnetic fields, Ca emission and continuum faculae from multichannel magnetograph observations 13 p2045 A72-29705
- Tunable wide field birefringent element/filter magnetograph to separate polarized magnetic signal from selected spectral line width 13 p2045 A72-29706
- Apollo 16 lunar surface magnetometer cooling system variable conductance heat pipe/radiator design and thermal performance [AIAA PAPER 72-271] 14 p1271 A72-30828
- Sense coil geometry and drive waveform effects on low level flux gate magnetometers sensor noise 15 p2233 A72-31507
- Tansey satellite spin axis orientation measurement by two flux-gate magnetometers and sun sensor 15 p2272 A72-32334
- Optically pumped magnetometer error, predicting atomic g-factor modification by nonresonant RF fields 15 p2339 A72-32335
- Proton 2 and 4 and Cosmos 196 orientation by high speed algorithm from onboard three component magnetometer readings 20 p2976 A72-39243
- A line-profile Stokesmeter - Preliminary results on non-sunspot fields. 20 p2971 A72-39761
- Magnetic anomalies in New Guinea-New Zealand region from geomagnetic measurements with proton magnetometer, noting effects of andesite-basalt volcanic processes and nuclear precession signal 23 p3284 A72-43380
- Image motion in the Culgoora solar magnetograph - The role of vibration. 23 p3278 A72-43617
- MAGNETOMETRY**
U MAGNETIC MEASUREMENT
MAGNETOPOUSE
- Earth magnetosphere boundary position, bow shock wave, transition region thickness and magnetopause currents magnetic fields during geomagnetic storms 01 p0059 A72-10605
- Outer zone energetic electron precipitation, elf whistler and plasmopause location measurements by polar satellite OV-3-3 instruments 01 p0120 A72-10890
- Idealized model for small scale internal structure of magnetopause separating distorted geomagnetic field in magnetosphere from solar plasma flow in magnetosheath 02 p0218 A72-11977
- Solar proton entry observations over polar caps in relation to magnetosphere, magnetotail and magnetopause models 02 p0275 A72-12463
- Shear layer finite thickness and magnetic field effects on Kelvin-Helmholtz MHD instability of earth magnetopause boundary 07 p0974 A72-18892
- Hall effect influence on magnetospheric boundary magnetic field generation by solar wind perturbation, using beam-magnetic field interface model 07 p0980 A72-20407
- Spatial characteristics of magnetic field fluctuation in the magnetosheath. 17 p2545 A72-34474
- A three dimensional, analytical magnetospheric model with defined magnetopause. 19 p2789 A72-37410
- Model for the uneven illumination of polar caps by solar protons. 23 p3286 A72-44502
- Pioneer 8 observation of diffuse magnetosphere-magnetopause boundary, noting proton flux intensity and flow angle 23 p3341 A72-44512
- MAGNETOPLASMAS**
U PLASMAS [PHYSICS]
MAGNETORESISTANCE
U MAGNETORESISTIVITY
MAGNETORESISTIVITY
- Resistivity, thermoelectric power and magnetoresistance of carbon fibers derived from heat treated polyacrylonitrile 07 p1024 A72-20550
- Spectral distribution characteristics of geomagnetic field mean intensity variations, relating longitudinal

specific resistance and integral conductivity of top rock layer 09 p1296 A72-22236

Mobility-field characteristics of GaAs below Gunn threshold with magnetoresistance technique, relating to device performance and other material parameters 13 p2021 A72-28573

Electrical characterization of GaAs by Hall and magnetoresistance measurements, analyzing temperature dependence of carrier concentration 13 p2024 A72-30034

Tensor analysis for planar magnetoresistivity and Hall effect in Ni single crystal thin films, noting anisotropy effects in ferromagnetic crystals 15 p2294 A72-32386

Plasma magnetoresistance in variable magnetic field measured on n-type InSb sample for SHF inertialess power sensor development 16 p2436 A72-33482

LF circularly polarized electromagnetic waves/helicons/ resonance crystal plates, deriving magnetoresistivity and Hall coefficient 21 p3066 A72-40624

Galvanomagnetic properties of well-oriented graphite in relation to the structural imperfections. 21 p3073 A72-40691

MAGNETOSONIC RESONANCE

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences 02 p0217 A72-11939

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences 02 p0217 A72-11939

MAGNETOSPHERE

NT GEOMAGNETIC TAIL
 NT MAGNETOPOUSE

Drift shells and pitch angle evolution of energetic particle motion in magnetospheric model including convection electric field 01 p0117 A72-10077

Magnetosphere transmittance for fast magnetosonic waves, considering refraction, reflection and earth surface intersection 01 p0058 A72-10587

Hall effect and magnetic field characteristics in lower ionosphere by vertical magnetospheric currents, using gyrotropic model 01 p0059 A72-10590

Decreasing period micropulsations during elementary magnetospheric substorms, discussing relation to ring current asymmetry development 01 p0059 A72-10602

MHD waves nonlinear interaction in magnetosphere, calculating transverse Alfvén and magnetosonic and longitudinal acoustic wave decay instabilities 01 p0109 A72-10618

Open magnetosphere mathematical models application to dayside auroras, investigating interplanetary magnetic field topology 01 p0060 A72-10885

Magnetospheric magnetic field distortions under quiet and slightly disturbed conditions, obtaining scalar intensity with OGO 3 and 5 rubidium vapor magnetometer 01 p0060 A72-10886

Isolated magnetospheric substorms model, explaining electric field origin, cold plasma flow, magnetic field lines and particle phenomena 01 p0060 A72-10889

Magnetoionospheric wave and particle phenomena correlation to convection electric fields in nightside magnetosphere during isolated substorms 01 p0062 A72-10904

Magnetospheric diagnostics from ground stations data, considering dimensions, cusp, ring current, tail flux, electric fields, radiation zone, solar wind and interplanetary field 01 p0132 A72-11072

Pulsar magnetosphere axisymmetric and vacuum oblique rotator models, emphasizing electromagnetic field properties 01 p0134 A72-11159

Magnetospheric substorm model for auroral activity sudden increase and ionospheric current development explanation by shock wave excitation in magnetospheric tail neutral layer 02 p0217 A72-11927

Geomagnetic PDP pulsations oscillation frequency drift, considering proton motion characteristics in magnetospheric equatorial plane 02 p0217 A72-11931

Magnetosphere deformation by solar wind, comparing accuracy of free molecular flow and double dipole models 02 p0218 A72-11948

Long period geomagnetic pulsation generation at boundary of magnetosphere and incoming solar wind, considering possibility from idealized model 02 p0218 A72-11950

Magnetosphere and adjacent regions magnetic surveys by OGO 1 and 3 satellites, discussing magnetopause, bow shock, magnetosheath, geomagnetic tail, ring current and polar substorms 02 p0220 A72-12084

Vertical distribution of ionospheric and magnetospheric electric fields, estimating Joule heating 02 p0220 A72-12324

Magnetosphere model for low energy cosmic ray proton propagation mode to synchronous orbit satellite, calculating geomagnetic cutoffs and penetration regions [AD-741079] 02 p0274 A72-12453

Solar proton entry observations over polar caps in relation to magnetosphere, magnetotail and magnetopause models 02 p0275 A72-12463

Broadband geomagnetic micropulsations relations to magnetospheric, interplanetary and solar phenomena [AD-739038] 02 p0222 A72-12869

Magnetospheric hydromagnetic waves propagation characteristics, discussing isotropic/poleoidal and guided/toroidal modes coupling in conjunction with hydromagnetic wedge model 02 p0268 A72-12870

Damped geomagnetic pulsations associated with geomagnetic storms interpreted as interaction between hydromagnetic oscillations and solar wind induced magnetospheric motions, discussing modified mathematical model 02 p0222 A72-12872

Vertical motions of midlatitude F 2 layer during magnetospheric substorms, investigating electric field distribution 03 p0349 A72-13519

Trapped particles induced by fluctuating magnetospheric electric and magnetic fields, calculating radial diffusion and energy distribution and time variations 04 p0566 A72-14723

Geomagnetic micropulsation activity relationship to magnetospheric processes and interplanetary magnetic field, investigating time dependence of telluric current 04 p0515 A72-14927

Magnetospheric heat flux effect on height variation of electron and ion temperatures and ion composition in topside ionosphere 04 p0515 A72-14929

Hydromagnetic whistler traveling wave tube amplification in magnetosphere, deriving temporal growth rate dependence on plasma parameters 04 p0517 A72-14950

Nonstationary behavior of collisionless shock waves in plasma wind tunnel, suggesting interpretation of magnetosphere magnetic field structure near earth bow shock 04 p0559 A72-15468

Transverse electric field in ionosphere and magnetosphere during inhomogeneities consisting of fast electrons 05 p0656 A72-16246

Solar wind proton penetration through earth magnetosphere, taking into account drift, force lines curvature and nonstationary plasma boundary 05 p0709 A72-16255

Charged particle acceleration by nonstationary sinusoidal electric fields in earth magnetosphere based on mathematical model 05 p0709 A72-16256

Noncircular ionospheric current conversion into longitudinal currents in magnetosphere along lines of force of geomagnetic field 05 p0657 A72-16259

Magnetospheric field model, assuming magnetostatic problem solution facilitated by equation linearity 05 p0657 A72-16274

Magnetospheric current effects on geomagnetic field structure, noting electron and proton precipitation into auroral zone 05 p0657 A72-16275

Periodic quasi-noise spectrum and amplitude modulation of HF pulsed signals from earth in magnetosphere plasma 05 p0696 A72-16605

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data 05 p0659 A72-16765

Cosmic plasma phenomena in astrophysics, discussing distribution, ionospheric disturbances, magnetospheric waves, solar wind, etc 05 p0723 A72-17217

Vlf phenomena of magnetospheric origin, presenting whistlers classification table 06 p0803 A72-17375

Vlf wave excitation during sudden storm commencement, causing magnetosphere trapped energetic electrons to diffuse and precipitate into lower ionosphere 06 p0803 A72-17451

Auroral zone vlf hiss and associated low energy electron precipitation in polar magnetosphere [AD-736327] 06 p0804 A72-17456

- Interplanetary magnetic field fluctuations correlation with trapped particles redistribution, deriving magnetospheric electric field properties
06 p0875 A72-17468
- Energetic charged particles penetration into magnetosphere by auroral simulation experiments with artificial solar wind, observing magnetic field microfluctuations behind collisionless shock front
06 p0805 A72-17469
- Magnetoguided whistler propagation, observing longitudinal current in ionospheric plasma
06 p0808 A72-18064
- Geomagnetic field intensity fluctuations due to events in atmosphere, ionosphere, magnetosphere and in interplanetary space connected with solar activity
06 p0809 A72-18276
- Magnetospheric structure models during quiet solar periods
06 p0809 A72-18277
- Electrodynamics of ionosphere and magnetosphere, discussing irregularities, red arc and auroral thermosphere density and temperature changes
06 p0809 A72-18279
- Ionospheric storms features based on F2 critical frequency data, investigating magnetosphere during geomagnetic storms
06 p0810 A72-18280
- Magnetospheric plasma sources, discussing wave-particle interactions and acceleration mechanisms
06 p0810 A72-18281
- Low latitude surface horizontal magnetic field intensity depression due to quiet time ring current in magnetosphere as function of solar wind velocity
07 p1055 A72-18884
- Magnetospheric field model from magnetosphere surface approximation by paraboloid of revolution
07 p0974 A72-18903
- Imp 5 magnetic field measurements at high geomagnetic latitudes in outer magnetosphere near noon meridian, noting depressed field region centered on polar cusp
07 p0975 A72-19146
- Solar wind discontinuities and shock waves in interplanetary medium at magnetospheric boundary related to geomagnetic impulses
07 p1061 A72-20024
- Spherical harmonic representations of geomagnetic field including magnetosphere and tail regions based on ground based and low altitude spacecraft measurements within several earth radii
07 p0977 A72-20026
- Particle motions in earth magnetospheric tail and core, estimating maximum rate of magnetic field annihilation and magnetic drift shell
07 p1062 A72-20027
- Auroral forms dynamics dependence on solar wind and DP intensity in magnetosphere
07 p0977 A72-20030
- Plasma sheet distribution in magnetosphere from low energy particle observations in equatorial region of magnetotail
07 p0977 A72-20031
- Quasi-linear theory of magnetosphere gyroresonant wave-particle interactions, discussing particle distribution function anisotropy, wave packet effects, whistler mode, energy and pitch angle distributions, etc
07 p0978 A72-20034
- Magnetospheric trapped particle diffusion coefficients and acceleration in earth radiation belts
07 p1062 A72-20035
- Magnetosphere If electric fields influence on trapped radiation region particle behavior, considering magnetic drift rates
07 p1062 A72-20036
- Electric field measurements in ionosphere and magnetosphere by double probe and electron and ion drift techniques
07 p0978 A72-20042
- Structural interactions between magnetosphere and ionosphere in terms of electrostatic field associated with plasma temperature difference
07 p0979 A72-20046
- Magnetosphere theory of pulsar electrodynamics, discussing unipolar inductor with iron sphere having uniform magnetization parallel to rotation axis
07 p1080 A72-20058
- Stability of electron beam injected into magnetospheric plasma at small and high altitudes
07 p0979 A72-20377
- Interplanetary origin of magnetospheric electric fields responsible for polar magnetic disturbances
07 p0979 A72-20382
- Space-time relationship derivation to estimate traveling time of discontinuities running against magnetosphere in unperturbed solar wind
08 p1153 A72-20714
- Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere
08 p1153 A72-20717
- Magnetic field components of vertical currents at magnetosphere boundary and earth surface, using computerized Gaussian method
08 p1156 A72-20822
- Artificial magnetosphere interaction with 8 keV electrons in hydrogen plasma beam simulating solar wind, noting penetration caused by boundary instability
08 p1156 A72-20823
- Magnetic fluctuations in elf and vlf waves in space, discussing whistler phenomena and applications to magnetospheric probes
08 p1158 A72-21189
- Solar energetic particle access characteristics to magnetosphere from PCA riometer and satellite measurements, determining relationship between earth dipole field and interplanetary field
08 p1228 A72-21497
- Apollo 15 lunar subsatellite particle experiment subsystem design for studying magnetosphere dynamics, plasmas-moon interaction and solar flare physics
08 p1168 A72-21519
- RAE-1 measurements of lf radio phenomena in magnetosphere, solar corona and Galaxy, discussing design, calibration and performance
08 p1137 A72-21984
- Equatorial ring current relation to polar electrojet during magnetosphere geomagnetic storm, discussing magnetosphere-ionosphere current systems
09 p1298 A72-22580
- Thermal positive ion densities measurement in outer ionosphere and magnetosphere by OGO 1 satellite, relating plasmapause distribution and magnetic activity level
09 p1300 A72-23011
- Ionospheric and magnetospheric electric field measurements by rocket, satellite or balloon-borne electrostatic probes or by plasma drift methods
10 p1473 A72-24529
- Pulsar radiation mechanism study from magnetosphere structure model, taking into account neutron star evaporated gas accumulation in gravitation-centrifugal force balance region
10 p1544 A72-24672
- Magnetospheric electrons precipitation into ionosphere due to conjugate conductivity asymmetry caused by wind induced ions vertical redistribution, using atmospheric model
10 p1530 A72-24791
- Fast auroral hydromagnetic wave occurrence relation to substorm activity, suggesting role of enhanced particle population in magnetospheric region
10 p1476 A72-24962
- Geomagnetic field and magnetosphere variations due to solar wind interactions, using rocket, satellite and indirect measurements
11 p1621 A72-25841
- Interplanetary and magnetospheric magnetic force lines reconnection and effects on geomagnetic activity
11 p1718 A72-25933
- Penetrating particles effect on low energy scintillation spectrometers sensitivity in various regions of magnetosphere
11 p1632 A72-25934
- Magnetosphere neutral layer plasma conductivity determination from model of linear magnetic dipole in conducting fluid flow
11 p1622 A72-25945
- Dayside magnetosphere stably trapped radiation zone high latitude boundary determination from energetic electron intensity spatial distribution observation by Imp 3 satellite
11 p1713 A72-26106
- Radial profiles of ionized He flux and protons in magnetosphere, taking into account charge exchange processes and fluctuating electrostatic fields
11 p1624 A72-26397
- Magnetospheric equatorial compressional wave propagation to ground observed as transverse wave, noting plane of polarization
11 p1625 A72-26413
- Hydromagnetic waves propagation and horizontal group velocity westward from dawn terminator to dark hemisphere, inferring magnetospheric properties
11 p1625 A72-26414
- Magnetosheath pressure, magnetic field, temperature, particle density and stream velocity computed for earth bow shock in oblique interplanetary field with solar wind
11 p1723 A72-26526
- Magnetosphere fast electron precipitation investigated by simulation experiments with model created by plasma stream interaction with dipole magnetic field
11 p1714 A72-26531
- Geomagnetic activity index response time to fluctuations in interplanetary electric field azimuthal component, relating to magnetosphere average energy content
11 p1627 A72-26670
- Magnetospheric midday boundary width dependence on geomagnetic dipole axis orientation, discussing different positions for magnetosphere boundary
11 p1628 A72-26914
- Ionospheric irregularities-magnetospheric parameters relationship from satellite scintillation measurement, noting use as indirect electron precipitation indicator
12 p1803 A72-27772
- Analytic models of large scale electric fields in atmosphere, considering geomagnetic Sq current in lower atmosphere and inner magnetosphere
12 p1804 A72-27790
- Quasi-steady and sporadic corpuscular fluxes as basic solar activity effect on troposphere, showing magnetosphere interaction time relation to meridional atmospheric circulation changes
12 p1842 A72-28208
- Solar activity effects in magnetosphere and ionosphere relation to geomagnetic activity and biospheric development, noting 11 year geomagnetic perturbation cycles
12 p1805 A72-28209
- Polar cap magnetic field induced by currents along magnetospheric lines of force during polar substorm
13 p1946 A72-28587
- Magnetosonic waves interactions with energy particles in plasmasphere, demonstrating magnetosonic waveguide channel existence around earth below plasmasphere
13 p1947 A72-28605
- Magnetospheric substorm model for auroral activity sudden increase and ionospheric current development explanation by shock wave excitation in magnetospheric tail neutral layer
13 p1948 A72-29239
- Geomagnetic PDF pulsations oscillation frequency drift, considering proton motion characteristics in magnetospheric equatorial plane
13 p1949 A72-29243
- Magnetosphere deformation by solar wind, comparing accuracy of free molecular flow and double dipole models
13 p1949 A72-29260
- Long period geomagnetic pulsation generation at boundary of magnetosphere and incoming solar wind, considering possibility from idealized model
13 p1949 A72-29262
- Earth-solar wind bow shock structure from OGO-5 observations during passage from interplanetary medium into magnetosheath
13 p1950 A72-29379
- Plasma wave measurements during OGO-5 dayside magnetosphere polar cusp encounters, discussing ULF magnetic field wave levels and VLF electric field amplitude ranges
13 p1950 A72-29380
- Magnetosheath electron precipitation effect on dayside auroral-oval plasma density and conductivity, relating precipitation heat flux to solar wind energy density
13 p1950 A72-29381
- Midnight auroral electrojet time variations relationship to midday auroras latitudinal shift during South Pole magnetospheric substorms
13 p1950 A72-29382
- Magnetospheric ring current relation to polar magnetic substorm from charged particle measurements by satellites and magnetic field measurements at ground
13 p1952 A72-29658
- Time varying magnetospheric electric field spatial distribution effect on plasmasphere temporal evolution, considering fine structure due to periodic gusts in convection electric field
13 p1953 A72-29804
- Positively and negatively charged plasma components thermodynamic density fluctuations effect on ionospheric and magnetospheric slowly varying electric fields measurement
13 p1953 A72-29810
- Two dimensional mathematical model of magnetosphere with neutral sheet for oblique incidence of solar wind, noting magnetic field minimum energy
13 p1954 A72-29850
- Two dimensional equilibrium solution of plasma sheet, applying to tail magnetosphere problem
13 p1954 A72-29959
- Seasonal changes in magnetospheric directional fluxes at synchronous altitudes due to solar wind induced field line knee effect and drift shell asymmetry
14 p2097 A72-30131
- Nonlinear AM and FM due to bonded nature of quasi-monochromatic whistler packets in magnetosphere
14 p2085 A72-30448
- Three layer atmospheric model for neutral gas motion-produced ionosphere and magnetosphere currents, electromagnetic field and charged particle concentration perturbations
14 p2100 A72-30632
- Magnetospheric and ionospheric potential electric fields, using variational process based on transverse/longitudinal conductivity ratios in plasma
14 p2100 A72-30633
- Minimum magnetic field energy of two dimensional magnetosphere with neutral sheet for arbitrary dipole inclination to solar wind as function of potential difference on boundary points
14 p2101 A72-30643
- Magnetospheric electric fields estimation from electron fluxes intensity on early daylight side
14 p2102 A72-30660

Whistler waves amplification in magnetosphere, obtaining particles pitch angle and energy diffusion coefficients and one dimensional Fokker-Planck equation
15 p2194 A72-31427

Magnetosphere thermal plasma densities determination from hydromagnetic whistler digital sonograms and modified normalized dispersion curves
15 p2283 A72-31430

Whistler propagation in magnetosphere disturbed by ring current, explaining electron density decrease
15 p2194 A72-31433

Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field
15 p2283 A72-31434

Electric and magnetic fields fluctuations in region between shock wave front and magnetosphere boundary, noting resulting energy dissipation
15 p2225 A72-31902

Whistler mode VLF signal transmission in ground transmitter and magnetically conjugate zones, observing spectrum broadening and AM in magnetosphere
15 p2197 A72-31919

Solar proton flux density angular and latitude distribution in polar regions magnetosphere from satellite observation
15 p2299 A72-31921

Whistlers nose frequency and minimum group time delay determined from model magnetosphere and from measurement, noting precision effect on electric field calculation accuracy
15 p2198 A72-31947

Rocket-observed energetic electron flux association with ground recorded plasmasphere whistler in terms of gyroresonant wave-particle interaction
15 p2198 A72-31948

Magnetospheric geometry derivation from ISIS-I observations of soft particles penetration into polar cap and auroral regions, discussing entry and energization mechanisms
15 p2227 A72-31953

Report to COSPAR on West German space program covering meteorology, aeronomy, ionospheric physics, magnetosphere, solar wind and radiation, solar system and life sciences
15 p2338 A72-32014

Review of symposium on D region, upper polar ionosphere, magnetosphere and wave-particle interactions
15 p2229 A72-32251

Geomagnetic substorm magneto-ionospheric effect, discussing electric field transmission, magnetic field variations and currents flowing in dynamo region
15 p2230 A72-32259

Magnetosphere description based on satellite observation data, discussing particle distributions, solar wind, shock wave, magnetic sheath and magnetopause
15 p2315 A72-32400

Pulsar rotating electromagnetic field vectors classification for magnetosphere models
16 p2450 A72-32866

Nightside magnetosphere convection electric field from motions of whistler ducts within plasmasphere, considering interplanetary magnetic field theta component
16 p2382 A72-32960

Mathematical model for magnetosphere surrounding rotating neutron star, noting computer programs for Maxwell and plasma equations solution
16 p2460 A72-33927

Pulsars radiation mechanism relationship to magnetospheric conditions, considering optical, X ray and gamma radiation
16 p2460 A72-33928

Indices of geomagnetic pulsations.
17 p2545 A72-34628

Daytime irregular geomagnetic pulsation, Pid, and its relation to magnetospheric substorm.
17 p2546 A72-35062

Association between quasi-periodic VLF emission and micropulsation.
17 p2516 A72-35065

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data
17 p2548 A72-35268

Explorer 33 and 35 plasma observations of magnetosheath flow.
17 p2548 A72-35587

Flaring-tail model explanation for geomagnetic tail configuration changes during magnetospheric substorm growth phase
17 p2548 A72-35589

Critical component of the interplanetary magnetic field responsible for large geomagnetic effects in the polar cap.
17 p2548 A72-35590

Magnetospheric convection induced longitudinal or Fermi acceleration role in nighttime auroral particle flux production mechanism
17 p2601 A72-35592

Pitch-angle diffusion of radiation belt electrons within the plasmasphere.
17 p2602 A72-35597

Turbulence of electrostatic electron cyclotron harmonic waves observed by Ogo 5.
17 p2549 A72-35599

Book on ionosphere and magnetosphere covering solar radiation effects, ionospheric layers, currents and storms, charged particle movement and various wave propagations
17 p2550 A72-35850

Auroral zone splitting into various radiation intensity regions, discussing DR currents influence on particle motion in magnetosphere and structural relationship
17 p2550 A72-35856

Magnetosphere resonant oscillations space-time characteristics for arbitrary azimuthal number, noting frequency dependence on geomagnetic shell
17 p2551 A72-35859

Laboratory model information relating to modeled geophysical phenomena, noting magnetosphere study from plasma physics experiments
17 p2551 A72-35904

A new source for the large-scale electric fields in the magnetosphere.
18 p2686 A72-36623

Low latitude equatorial electrojet analysis based on three dimensional electric field equation for ionosphere and magnetosphere
18 p2687 A72-36854

Electron and proton acceleration in the outer magnetosphere regions during polar substorms
18 p2688 A72-36866

Sideband growth in nonlinear Landau wave-particle interaction.
19 p2838 A72-37327

A three dimensional, analytical magnetospheric model with defined magnetopause.
19 p2789 A72-37410

Magnetospheric and ionospheric conjugate point phenomena as solar events manifestations via solar wind shock wave interaction with geomagnetic field
19 p2790 A72-37858

Space-time relationship derivation to estimate traveling time of discontinuities running against magnetosphere in unperturbed solar wind
19 p2791 A72-38342

Geomagnetic field fluctuations during storms, considering Alfvén waves generation and propagation in solar wind and magnetosphere
19 p2791 A72-38345

Diurnal variation of the H+ flux between the ionosphere and the plasmasphere.
19 p2793 A72-38759

The propagation of very low-frequency waves in ducts in the magnetosphere. II.
20 p2916 A72-39192

Persistent particle anisotropies and magnetospheric models.
20 p2916 A72-39233

Signatures for substorm development of the growth phase and expansion phase.
20 p2916 A72-39237

Magnetosphere-ionosphere interactions; Proceedings of the Advanced Study Institute, Dalseter, Norway, April 14-23, 1971.
20 p2917 A72-39526

Magnetospheric interactions with topside ionosphere in terms of polar wind ion flows and density related to plasma temperature, F 2 region and cusp observations
20 p2918 A72-39537

Aircraft and spacecraft high latitude optical measurements of magnetosphere-related emissions, discussing red arcs, IR auroras, X ray pulsations, conjugate effects, etc
20 p2918 A72-39539

High latitude particle precipitation and source regions in the magnetosphere.
20 p2964 A72-39542

Ionospheric and magnetospheric electric field strength measurements in auroral and polar cap regions by Ba ion cloud and double floating probe techniques
20 p2918 A72-39543

Stationary adiabatic plasma flow in the magnetosphere.
20 p2919 A72-39547

Magnetic neutral sheet model in terms of self consistency between current and tail field in reversal region
20 p2919 A72-39548

VLF emission artificial triggering by whistler Morse pulses in magnetosphere, explained in terms of resonant trapped particle current and wave field behavior
20 p2903 A72-39549

Magnetospheric propagation of auroral hiss with whistler mode dispersive properties, suggesting burst source locations and mechanisms
21 p3048 A72-40399

Nonlinear theory of the monochromatic circularly polarized VLF and ULF waves in the magnetosphere.
21 p3015 A72-40480

Whistler propagation through magnetosphere.
21 p3049 A72-40975

Conjugate features of magnetospheric electron dynamics observed at balloon altitudes.
21 p3049 A72-41614

Rarefaction wave generation by solar wind shock wave interaction with magnetosphere, noting geomagnetic field weakening during magnetic storm
22 p3217 A72-41894

Sudden impulses in the geomagnetotail and the vicinity.
22 p3168 A72-42002

The equilibrium potential of a magnetospheric satellite in an eclipse situation.
22 p3168 A72-42003

DP-2 mode daily magnetic variation in polar cap based on magnetic and auroral records, noting relationship to magnetospheric substorms
22 p3168 A72-42005

On the physical mechanism of the magnetospheric substorm development.
22 p3169 A72-42012

Limits to energetic proton fluxes trapped in Jupiter's magnetosphere.
22 p3221 A72-42021

Nonadiabatic condition effects on ultrarelativistic electron energy losses in geomagnetic trap in remote magnetosphere regions
22 p3218 A72-42224

Longitudinal magnetospheric currents contribution to auroral electrojet from satellite observation data, noting magnetosphere electric field excitation of meridional Pedersen and Hall currents
22 p3169 A72-42225

Magnetohydrodynamic theory for the interaction of an interplanetary double-shock ensemble with the earth's bow shock.
22 p3170 A72-42404

Magnetospheric substorm onset examined via simultaneous balloon X ray and electric field measurements, discussing ATS 5 observations
22 p3170 A72-42409

Coordinated observations of the magnetosphere - The development of a substorm.
22 p3171 A72-42410

Upper limit of the torque of the solar wind on the earth.
22 p3219 A72-42427

Induction effect of slowly decaying ring current, estimating electric field strength by model consisting of earth dipole and symmetric ring
22 p3172 A72-42430

Injun 5 satellite measurements of magnetospheric convection electric fields via double probe technique, discussing substantiation with OGO 6 results
22 p3174 A72-42901

ULF wave observation by satellite, considering geomagnetic activity control of magnetospheric wave occurrence
22 p3174 A72-42902

Propagation of electromagnetic waves in a weakly ionized warm magnetoplasma.
22 p3155 A72-42991

Ray structures of polar auroras and their association with drift-current instability in a plasmoid
23 p3282 A72-43358

Some results of an analysis of Pc4-type steady geomagnetic pulsations at a network of stations
23 p3283 A72-43372

Generation threshold of anomalous resistance for longitudinal currents in the magnetosphere
23 p3284 A72-43379

Pioneer 8 observation of diffuse magnetosphere-magnetopause boundary, noting proton flux intensity and flow angle
23 p3341 A72-44512

Outer magnetosphere near midnight at quiet and disturbed times.
23 p3341 A72-44513

Symposium on the Morphology and Physics of Magnetospheric Substorms, Moscow, USSR, August 3, 1971, Proceedings.
24 p3395 A72-44846

Behavior of outer radiation zone and a new model of magnetospheric substorm.
24 p3396 A72-44850

Polar cap magnetic field induced by currents along magnetospheric lines of force during polar substorm
24 p3397 A72-45087

Magnetosonic waves interactions with energy particles in plasmasphere, demonstrating magnetosonic waveguide channel existence around earth below plasmasphere
24 p3398 A72-45105

MAGNETOSPHERIC ELECTRON DENSITY

Nonducted vlf wave propagation near plasmapause during whistlers based on diffusive equilibrium and collisionless models for magnetospheric electron density distribution
02 p0222 A72-12873

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data
05 p0659 A72-16765

Magnetospherically trapped particles sources, losses and transport processes, presenting time averaged proton, electron and alpha particle distributions in trapping and pseudo-trapping regions
07 p1062 A72-20028

Whistler dispersion and occurrence rate characteristics at low latitudes during solar cycle, noting annual variations and magnetospheric electron density 11 p1623 A72-26105

Magnetospheric equator plane electron density profiles determination from plasmapause whistlers observed in UK 11 p1626 A72-26421

Low energy electron flux in magnetosphere, discussing relation to geophysical phenomena, solar wind, interplanetary magnetic field and charged particle longitudinal drift trajectories 15 p2225 A72-31903

Magnetosphere description based on satellite observation data, discussing particle distributions, solar wind, shock wave, magnetic sheath and magnetopause 15 p2315 A72-32400

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data 17 p2548 A72-35268

Ring current effect on magnetospheric electron density profiles derived from plasmapause whistlers. 17 p2600 A72-35368

Radiation belt electron lifetimes and removal through pitch angle diffusion by plasmaspheric whistler waves in cyclotron harmonics 20 p2918 A72-39532

Properties of low energy particle impacts in the polar domain in the dawn and dayside hours. 20 p2964 A72-39541

Auroral electron and proton distribution in magnetosphere and precipitation pattern from satellite, rocket and ground based observations 20 p2920 A72-39976

Spatial and temporal variations of thermal plasma ion and electron densities as function of L at 3000-5700 km from polar orbiting OV 3-1 satellite observation 22 p3211 A72-42414

Solar-wind parameter variation, magnetic activity, and electrons in the magnetospheric tail and outer radiation belt 23 p3283 A72-43367

MAGNETOSPHERIC INSTABILITY

Plasma sheet structures, dynamics and role in magnetospheric substorm onset as function of near earth and distant merging regions 01 p0052 A72-10082

Quasi-steady spectrum of hydromagnetic noise in proton belt, using random excited broad wave fields in nonisothermal magnetosphere 01 p0118 A72-10367

Plasma electron and proton motion in equatorial plane of magnetosphere under geomagnetic disturbance generated electric field 01 p0058 A72-10586

Ion electromagnetic cyclotron modes growth rates in multicomponent magnetospheric plasmas, discussing instabilities enhancement 01 p0062 A72-10906

Inner magnetosheath hydromagnetic disturbances, presenting magnetometer data in inclination-declination coordinate system 03 p0348 A72-13510

Solar wind effects on storms and structure of magnetosphere and radiation belt maintenance 03 p0350 A72-14304

Radio auroral electrojet aspect sensitivity and Farley two stream instability, discussing magnetic field distortion and orthogonal deviation as function of current strength and direction 07 p0976 A72-19163

Vertical density gradients as source of two stream instability irregularities in radio aurora theory 07 p0976 A72-19164

Magnetospheric instabilities theory based on Vlasov equation and Landau damping 07 p0978 A72-20033

Shock wave excitation by moving solar wind discontinuity in geomagnetic tail as cause of active phase of magnetospheric substorm 08 p1153 A72-20716

Auroral plasma particle discharge during motion in strong inhomogeneous magnetic field, magnetospheric instability due to temperature anisotropy 11 p1715 A72-26904

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi 13 p1947 A72-28606

Auroral electron spectrum space-time dynamics during magnetospheric substorms, using X ray bremsstrahlung balloon data 14 p2101 A72-30637

Magnetospheric quasi-stationary pinch effect and filamentary structure due to electron streams parallel to geomagnetic field lines 14 p2103 A72-30664

Model for magnetospheric substorm growth phase, noting dayside magnetopause convection onset, geomagnetic tail configurational changes and breakup with auroral electrojet development 16 p2387 A72-33903

Plasmapause and geomagnetic micropulsations correlation from universal magnetospheric instability model, noting drift waves conversion to sound or Alfvén waves 16 p2387 A72-33906

Precipitation dynamics and energy spectrum of auroral electrons in the midnight sector during a magnetospheric substorm 17 p2550 A72-35854

Auroral absorption and magnetospheric plasma dynamics pattern from arctic stations atmospheric opacity data 18 p2688 A72-36859

Earth magnetosphere pinch effect related to geomagnetic field pulsations and polar aurora luminosity fluctuations 18 p2688 A72-36867

Earth surface magnetic field intensity variations in terms of magnetospheric resonator excitation, assuming three dimensional Alfvén waves 18 p2688 A72-36869

Shock wave excitation by moving solar wind discontinuity in geomagnetic tail as cause of active phase of magnetospheric substorm 19 p2791 A72-38344

Radial penetration of a hot plasma associated with a large-scale electric field in the magnetosphere, and some related problems. 20 p2916 A72-39228

Radiation belt protons and ion-cyclotron wave interactions accounting for magnetospheric ring current instabilities during storm at plasmapause 20 p2919 A72-39545

Magnetospheric shapes, flows and substorms in terms of magnetotail flux, solar wind pressure, dipole moment and plasma sheet interaction 20 p2919 A72-39546

Auroral space-time regularities relationship to magnetospheric variations, precipitating electron fluxes, magnetic tail formation and substorms 20 p2920 A72-39977

The generation and propagation of VLF emissions. 20 p2904 A72-39984

Earth outer radiation belt and unstable radiation zone dynamics during IQSY magnetically quiet and disturbed period based on Elektron-series satellite data 22 p3218 A72-42211

Midlatitude VLF emissions in magnetosphere due to plasma resonance instability near plasmapause, using ground, rocket and satellite observations, estimating electron energy 23 p3263 A72-43515

Plasma sheet variations during substorms. 24 p3396 A72-44851

Magnetic field fluctuations during substorms. 24 p3396 A72-44853

Pc 5 type geomagnetic pulsations correlation with nighttime magnetosphere auroral magnetic disturbances from magnetograms obtained at Murmansk, College /Alaska/ and Tiksi 24 p3398 A72-45106

MAGNETOSPHERIC ION DENSITY

NT MAGNETOSPHERIC PROTON DENSITY

Hydrogen ions concentration in dayside region of plasmasphere from OGO 5 satellite mass spectrometry, noting plasmapause position as function of magnetic activity 01 p0061 A72-10892

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data 05 p0659 A72-16765

Whistling atmospherics generation mechanism, showing ionic sound excitation by hydromagnetic wave propagation through magnetospheric rapid plasma concentration change regions 08 p1155 A72-20807

Magnetospheric electron cyclotron and Langmuir plasma frequencies ratio determination from satellite observed electron and ion density data 17 p2548 A72-35268

Plasmapause nightside, dayside and bulge positive ion concentration measurements with OGO 5 mass spectrometer compared with magnetospheric convection model 20 p2919 A72-39544

Spatial and temporal variations of thermal plasma ion and electron densities as function of L at 3000-5700 km from polar orbiting OV 3-1 satellite observation 22 p3211 A72-42414

MAGNETOSPHERIC PROTON DENSITY

Magnetospherically trapped particles sources, losses and transport processes, presenting time averaged proton, electron and alpha particle distributions in trapping and pseudo-trapping regions 07 p1062 A72-20028

Magnetosphere description based on satellite observation data, discussing particle distributions, solar wind, shock wave, magnetic sheath and magnetopause 15 p2315 A72-32400

Magnetospheric particles and interplanetary magnetic field measurements for solar proton event of March 1970, noting polar cap structures 16 p2444 A72-32956

Auroral electron and proton distribution in magnetosphere and precipitation pattern from satellite, rocket and ground based observations 20 p2920 A72-39976

MAGNETOSTATIC AMPLIFIERS

Multidimensional function extremum for sectioned resonator type gyroamplifier efficiency optimization 08 p1172 A72-22050

MAGNETOSTATIC FIELDS

Magnetostatic interactions of cylindrical magnetic domain propagation circuits in ferromagnetic overlay without in-plane fields 03 p0331 A72-13752

Gyroresonance devices efficiency increase, discussing magnetostatic field distribution optimization in interaction space 04 p0502 A72-15575

Epitaxial YIG film separated from conductive plane by thin dielectric layer, considering magnetostatic propagation dispersion and insertion loss 15 p2294 A72-32502

Motion of ion-cloud in the ionosphere, field-aligned cloud with Gaussian distribution of ionization density. 17 p2546 A72-35060

The oriented elastic continuum as a model for the magnetoelectric body. 22 p3206 A72-42525

MAGNETOSTATICS

Magnetospheric field model, assuming magnetostatic problem solution facilitated by equation linearity 05 p0657 A72-16274

Microwave pulse frequency shift and frequency modulation in YIG bar magnetostatic delay line with adiabatically varying parameters 13 p1923 A72-30095

MAGNETOSTRICTION

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering heavy current carrying filaments equilibrium and boundary value problems 07 p1035 A72-19975

Dynamic thermo-magnetoelastic problems of long cylinder and infinite medium with hole under magnetic field, using variation method and Laplace transforms. 13 p2056 A72-28882

Magnetoelastic coupling existence between shearing stresses and linear deformation, noting influence on Poynting effect experimental results 13 p1980 A72-29782

Magnetoelastic effects in elastic dielectric analysis based on continuum with single magnetic moment, noting magnetically saturated material 15 p2274 A72-31482

Magnetothermoelastic temperature distribution effects due to linear heat source in infinite circular cylinder acted upon by magnetic field 16 p2425 A72-33595

Magnetoelastic buckling of beams and thin plates of magnetically soft material. 17 p2624 A72-34311

Magnetoelastic amplitude modulator of millimeter waves based on an antiferromagnetic/hematite/ 17 p2529 A72-34842

Composite materials sum and product physical properties, considering magnetostrictive and piezoelectric interactions 18 p2717 A72-35996

Laminar composite materials with special physical properties 20 p2940 A72-39451

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering current carrying heavy filaments equilibrium and boundary value problems 20 p2955 A72-40032

Measurement of internal magnetic field distribution in axially magnetized YIG rods based on magnetoelastic resonance absorption. 21 p3097 A72-40692

The oriented elastic continuum as a model for the magnetoelastic body. 22 p3206 A72-42525

Magnetostriction of porous nickel films 23 p3299 A72-43340

Magnetostriction of stainless steels as a function of heat treatment 23 p3300 A72-43596

A difference method for plane problems in magnetoelastodynamics. 23 p3321 A72-44051

MAGNETOTELLURIC PROFILING

U GEOMAGNETISM

U MAGNETIC SURVEYS

MAGNETOVARIOMETERS

U VARIOMETERS

Pulse modulator thyristor circuit design and optimum operating conditions for driving high peak power radar magnetron 02 p0195 A72-12694

Electrostatic field calculation for magnetron /injection/ electron gun with wedge shaped cathode 06 p0826 A72-18404

- Self consistent problem solution for planar magnetron diode with low cathode field and charge density not exceeding density of Brillouin zone
08 p1142 A72-21703
- Group and symmetry theory application to degenerate mode splitting in magnetron cavity systems with electromagnetic fields disturbances
08 p1142 A72-21740
- Vacuum tube developments for radar, TV and communication applications, discussing microwave, traveling wave, cathode ray, memory and vidicon tubes, magnetrons, klystrons and tetrodes
11 p1606 A72-26544
- Critical analysis of Mouthaan-Susskind diffusion theory for magnetron diode electron transport, noting theoretical results discrepancy with experimental data
13 p1931 A72-29289
- Magnetron crossed field amplifier multistage frequency multiplier HF field properties, obtaining numerical solutions for nonlinear governing equations
15 p2209 A72-32669
- Trajectory equations of laminar electron flow in exponential magnetic field, calculating electrode shapes of magnetron injection electron gun
21 p3088 A72-41835

MAGNETS

- NT CRYOGENIC MAGNETS
- NT ELECTROMAGNETS
- NT HIGH FIELD MAGNETS
- NT SUPERCONDUCTING MAGNETS
- Monograph on Co alloy permanent magnets covering principles, magnetization and testing, alnicos, magnet steel and miscellaneous alloy technology, fine particle magnets and applications
08 p1217 A72-21481

MAGNIFICATION

- N-wave dynamic magnification factors for sonic bangs response on complicated structures
04 p0464 A72-14849
- Holographic virtual image formation and magnification by classical geometrical optics laws application, deriving equivalent law of refraction
16 p2392 A72-33599

MAGNIFIERS

U MAGNIFICATION

MAGNITUDE

- General dimensional analysis as extension of conventional /restricted/ dimensional analysis of physical phenomena, using progressive homogeneity law and fundamental magnitudes
10 p1503 A72-23918

MAGNONS

- Quantum coherent spin wave interactions in ferromagnetics, showing retained emission field
07 p1007 A72-20125
- Heisenberg antiferromagnet with noncollinear sublattices and linear dislocation, considering coupled spin wave states and density
13 p2023 A72-29910
- Dynamic spin disorder effect on electrical and thermal conductivity, noting low resonant frequency in metal atom magnon spectrum
15 p2290 A72-31388
- Two-magnon Raman scattering in antiferromagnets, obtaining amplitude-renormalization factor by extended Dyson-Maleev graphical approach to include corrections in transition operator \hat{M}
15 p2295 A72-32548
- On the magnon interaction in haematite. I - Magnon energy of optical mode.
17 p2595 A72-35358
- Normal mode formulation of spin wave-helicon wave interactions in ferromagnetic semiconductors.
18 p2718 A72-36452
- Parallel pumping of spin waves in yttrium garnet single crystals
21 p3096 A72-40413
- Resonance between spin waves and magnetohydrodynamic waves in antiferromagnetic semiconductors and metals
21 p3096 A72-40415
- Direct fitting of spin wave energies to interatomic exchange parameters in the ferromagnetic rare earth metals.
21 p3097 A72-40625
- Spin wave theory and sublattice magnetization of Cr obtaining wave velocity
21 p3097 A72-40626

MAGNUS EFFECT

- Wind-tunnel Magnus testing of a canted fin or self-rotating configuration.
17 p2486 A72-35254
- Effects of rifling and N-vanes on the Magnus characteristics of bodies of revolution.
[AIAA PAPER 72-970] 22 p3135 A72-42341
- Spin induced boundary layer distortion on rotating cone at supersonic speeds via spark shadowgraphs, correlating Magnus and normal force measurements with boundary layer configurations
[AIAA PAPER 72-967] 22 p3135 A72-42343
- Correlation of Magnus force data for slender spinning cylinders.
[AIAA PAPER 72-966] 22 p3135 A72-42344

MAIN SEQUENCE STARS

- Stellar evolution in close binary systems, discussing post main sequence stage, hydrodynamical processes and dwarf binaries
03 p0437 A72-13868
- Metal-rich 1.19 solar mass main sequence star evolution to convection onset in core during He flash
04 p0577 A72-15283
- Long time behavior of neutron star magnetic fields, noting pulsar evidence for large internal fields in main sequence stars
09 p1389 A72-23393
- Main sequence star evolution relation to pulsar formation, discussing stellar core density at carbon ignition with respect to critical density limit
09 p1394 A72-23698
- Main sequence, red giant and white dwarf stars convective envelopes evolution, discussing mixing length theory inadequacy
10 p1545 A72-24826
- Structure of lower main sequence stars, considering ionization equilibrium in outer convection zone
10 p1546 A72-24835
- Secondary component of eclipsing binary beta Lyrae as massive main sequence star in rapid nonuniform motion, refuting black hole suggestion
11 p1717 A72-25869
- Evolution of extreme population I massive stars from main sequence to He exhaustion phase, discussing various development phases in H-R diagram
14 p2158 A72-30727
- Near-solar mass star secular stability during gravitational contraction and main sequence phases, considering static and quasi-static models
14 p2158 A72-30734
- Field stars near NGC 2168 /M 35/ cluster, segregating main sequence stars by proper motion dispersions with allowance for interstellar extinction
14 p2159 A72-30742
- B type main sequence star absolute energy flux envelope from ground based and OAO 2 observations, comparing with model atmosphere prediction
15 p2311 A72-31997
- Lower zero age main sequence star models uncertainties, comparing nonmixing and mixing length theory for various composition atmospheres
15 p2314 A72-32367
- Opacity corrections of main sequence stellar models of 2.25 solar masses in terms of Cox, Carson and Watson formulas
16 p2452 A72-33130
- Pre-main-sequence stars. II - Stellar polarization in NGC 2264 and the nature of circumstellar shells.
17 p2605 A72-34531
- Fundamental data for massive stars compared with theoretical models.
17 p2611 A72-35317
- Limb darkening for B-type main sequence stars in the infrared.
17 p2612 A72-35383
- The helium abundance in thirty-three main sequence B stars.
18 p2726 A72-36726
- Absolute magnitudes and color indexes of red giant concentration centers on a color-luminosity diagram
19 p2863 A72-38069
- Secular stability. I - A Population I star near the main sequence.
19 p2864 A72-38099
- Pulsating variables in the Pleiades cluster.
21 p3105 A72-41032
- Resonance effects on second order anharmonic pulsational amplitudes for polytropic main sequence evolutionary models, classifying Cepheid-type pulsators
24 p3437 A72-44832
- Iterative solution for adiabatic radial pulsation in massive main sequence star, noting transition to nonlinearity via Eddington stability integral extension
24 p3438 A72-44833

MAINTAINABILITY

- Task oriented maintainability engineering relationship to systems engineering and logistics support requirements
10 p1564 A72-23852
- Reliability and maintainability - Conference, San Francisco, January 1972
10 p1485 A72-23972
- Mathematical model as basis for equipment design-sensitive maintainability prediction technique, using information theory concepts of design interpretation
10 p1503 A72-23979
- Computer programmed instruction checklist for reliability and maintainability engineers requirements
10 p1443 A72-23981
- Multistage systems maintainability, presenting equations for optimum allocation of demonstration tests to repairable elements
10 p1443 A72-23982
- Statistical test plans with improved flexibility, application ease and efficiency for maintainability demonstration
10 p1504 A72-23998

- Spacecraft electronic equipment design criteria for maintainability and installation, discussing mockup zero g demonstration tests of new packaging concepts
[AIAA PAPER 72-235] 10 p1487 A72-24445
- Cost effectiveness determination for different levels of reliability and maintainability of training aircraft, using computer simulation
13 p2067 A72-28355

- Complete aircraft systems reliability and maintainability, discussing extraordinary variances causes, faulty data inferences and operational testing for equipment specifications validation
13 p1896 A72-28358

- OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs
13 p1999 A72-29202

- Bolkow 105C 5-place helicopter with twin turbine engine driven rigid glass-reinforced plastic rotor blades, emphasizing design philosophy of easy maintainability
13 p1898 A72-29871

- Concorde engines design for maintainability and reliability to reduce turnaround time, discussing diagnostic facilities and on-wing maintenance features
15 p2298 A72-32457

- Aircraft design for operational reliability and maintainability, emphasizing working relations coordination between manufacturer and operator
15 p2181 A72-32459

- Results of the reliability and maintainability demonstration of the OH-58A light observation helicopter.
[AHS PREPRINT 652] 17 p2491 A72-34507

- Aircraft hydraulic control systems modular design for maintainability, emphasizing component removal with minimum hydraulic fluid loss and air entrainment
22 p3140 A72-42294

- Aerospace vehicles preliminary design computer program to include cost, reliability, maintainability and safety parameters in addition to weight as performance determining factors
[SAWE PAPER 940] 23 p3342 A72-43480

- Man serviced spacecraft systems reliability and maintainability optimization methodology, developing parametric data based on failure modes analysis, components MTBF, duty cycles, redundancy and costs
[SAWE PAPER 943] 23 p3343 A72-43483

MAINTENANCE

NT AIRCRAFT MAINTENANCE

NT SPACE MAINTENANCE

- Field repair of Nb alloy panels with protective coatings designed as part of space shuttle thermal protection system
01 p0091 A72-10758
- Field repair of fused slurry silicide coating for oxidation protection of Nb alloys in space shuttle environment
01 p0075 A72-10759
- Multichannel communication system reliability, considering channel repair time random distribution
01 p0033 A72-11263
- Redundancy with repair for system mean time to first failure, presenting differential equation coefficients for Markov process
02 p0236 A72-11556

- Papers on metal fatigue damage covering basic mechanisms, detection, field practices for repair, avoidance and control
02 p0295 A72-12495

- Jet engine component overhaul procedures for fatigue damage repair, detailing distressed metal removal, replacement and welding techniques
02 p0271 A72-12499

- Metal fatigue damage avoidance, control and repair, considering design, metallurgical and service factors
02 p0296 A72-12500

- Computer simulation techniques in aerospace ground equipment design for maintenance testing of avionics systems
03 p0329 A72-14196

- Markov model random variation optimal periodicity in preventive maintenance operations, estimating distribution density and moments
04 p0527 A72-15574

- Boron-epoxy structure repair technology based on titanium plugs and fiberglass, discussing equipment, graphical design and nondestructive tests
08 p1193 A72-21691

- Stochastic rule for optimum moment of preventive maintenance of redundant technological systems, predicting system reliability
08 p1180 A72-22056

- Radio system failure prediction based on parameter variation a priori or a posteriori data, determining reliability and optimal preventive maintenance intervals
08 p1143 A72-22070

- Computer reliability in terms of design criteria to minimize faults incidence, discussing failures detection and correction, fault diagnosis and system maintenance
10 p1444 A72-23985

Prediction method for computing maintenance technician reliability as probability of equipment repair completion within given time

Decision making models application to systems configuration, reliability, repair level and spares optimization and availability analysis

Space shuttle thermal protection refurbishment labor costs and techniques, noting motion studies results for maintenance tasks in terms of manpower and performance time

Model for supervised repairable system reliability, assuming system life and repair times as exponential probability distributions with deterministic supervisor active and inactive times

Weapon system reliability improvement through integrated maintenance data collection and evaluation system, considering maintenance organization and operation

Military system and equipment Level of Repair optimization for minimum life cycle costs, considering weapon systems deployment, operation level and mobility requirements

Logical groupings of preventive maintenance and replacement policies for stochastically failing items to reduce cost under continuous surveillance

Allocating optimum time for systems malfunction search.

MAJORITY CARRIERS

Validity range of applied voltage relationship to majority carrier current in Schottky diodes, assessing minority carrier current importance

Laser induced chemical decomposition of copper maleate and fumarate and fragment reaction with low hydrocarbons, comparing with thermal heating

Single malfunction diagnosis models in systems failures, describing fixed and sequential testing schedules

Malfunction detection for space station environmental/thermal control and life support system, using onboard computer

Relay circuits malfunction due to interactions between coil induced currents and diode coil shunts, discussing circuit design and operating conditions

SIDERAL program organization and computational method application to calculation of malfunction by drift of linear analog equipment

Aircraft industry product support role in time delays minimization for aircraft operators, discussing malfunction report, minimum equipment decision and fault diagnosis

Incompressible fluid turbulent flow variational principles, discussing Malkus principle for maximum dissipation rate and minimum entropy production principle for convective and dissipative systems

Man-machine systems communication ambiguities due to information misinterpretation involving sense organs, previous experience and expectational bias

Synergic control of computer-manipulators, evaluating system

Hierarchically structured man machine control systems synthesis, outlining iterative procedure for optimizing functional

Time shortage as stress factor affecting mental activity of operator in man-flying vehicle system, discussing control signal handling efficiency

Unmanned systems flight testing by test bed vehicle conversion to man operated mode, discussing T-33A jet trainer conversion to drone operation

Computerized man machine systems human factors research simulator, discussing application to railroad train operations

Digital system automated design and analysis developments covering interactive graphic computer aided design, gate level simulation, synthesis, partitioning, interconnection and fault test generation

Interactive computerized design and programs for computer logic design block assignment to modules, comparing performance with manual solutions

Interactive computer graphics design aids to IC mask layouts, discussing hardware and software techniques including IMP program

CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities

Algebraic scheme describing electric element and subnetwork interconnection into networks by wiring operators having conversation capability with computer

Book on discrete event computer simulation for complex systems synthesis and analysis covering random numbers use, languages, and interactive man machine applications

GPSS/360 interactive simulation program with report generator, selective output display and HELP blocks for model manipulation and real time viewing

Computer aided design in electronics, discussing interactive computing with time sharing teletype keyboards or CRT graphics and applications in IC, network analysis and optimization

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation

Man computer dialogue, considering human factors effects on interaction course

Instructor station design for automated flight training systems, considering human factors and informational requirements

Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc

Interactive simulation language-8 for minicomputer and programming procedures for nonlinear differential equations solution, considering integration step size and computational accuracy and speeds

Hybrid computer and graphics terminals for real time dynamic man machine interaction, discussing AM communication system simulation

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems

Soviet papers on industrial plants automatic control systems organization, design and technological arrangement, covering information handling requirements and man machine interfaces

Automated administrative control systems design, discussing man machine interactions in industrial and economic enterprises management

Man and technology in orientation and navigation Conferences, Essen, Germany, October 1971

Man machine systems in navigation, discussing problems of integrating man with high speed and high capacity electromechanical systems with allowance for human weaknesses and abilities

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors

Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition

Man machine decision making procedures for multicriterial aggregate estimates, using pairwise comparisons and linear programming

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

Interactive remote terminal as formatting tool for reliability engineer to free from computational labor and concentrate on conceptual problems

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system

Space shuttle flight crew/computer interface display and control functional requirements optimization by real time digital simulation

Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation

Human operator role in space systems reliability, suggesting approaches to system design and program planning to exploit human potential

Optimum performance typewriter keyboard design, discussing biomechanical improvements in finger positioning facilitation, operator postural muscular strain reduction, etc

WINDCO interactive man-computer system for automated cloud motion tracking using precisely aligned digital ATS satellite pictures

Fault-tolerant digital computer logic design for dynamic and interactive recovery with data integrity after error, discussing hardware and software functions requirements

Visual display systems for man-machine communications, discussing applications, data processing, hardware designs and human engineering

Computer-aided interactive graphic displays for ATC, discussing subsystems, data processing flow and operational capabilities

Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar

Human operator dynamic characteristics measurement, using pseudorandom binary signals and mathematical models in closed loop control system

Online identification on human describing function by iterative differential analyzer, noting application to man-machine systems and online adaptive control systems

Aircraft design interactive computer graphics technique, using human decision input response to computer output information

Book on human factors engineering covering systems design requirements and interface equipment for man machine interaction implementation

Systems, man and cybernetics - IEEE Conference, Anaheim, California, October 1971

Mathematical models for man-machine control behavior in biodynamic environments including manual control performance and interface elements

Pilots in aircraft systems management involving machine and air traffic environment

Automatic flight control systems value to aircraft pilot, stressing man machine interface

Soviet book on astronaut activity psychological features covering space flight living conditions, space and time perception psychophysiological mechanism changes and weightlessness effects

Man-machine systems communication ambiguities due to information misinterpretation involving sense organs, previous experience and expectational bias

Synergic control of computer-manipulators, evaluating system

Hierarchically structured man machine control systems synthesis, outlining iterative procedure for optimizing functional

Time shortage as stress factor affecting mental activity of operator in man-flying vehicle system, discussing control signal handling efficiency

Unmanned systems flight testing by test bed vehicle conversion to man operated mode, discussing T-33A jet trainer conversion to drone operation

Computerized man machine systems human factors research simulator, discussing application to railroad train operations

Digital system automated design and analysis developments covering interactive graphic computer aided design, gate level simulation, synthesis, partitioning, interconnection and fault test generation

Interactive computerized design and programs for computer logic design block assignment to modules, comparing performance with manual solutions

Interactive computer graphics design aids to IC mask layouts, discussing hardware and software techniques including IMP program

CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities

Algebraic scheme describing electric element and subnetwork interconnection into networks by wiring operators having conversation capability with computer

Book on discrete event computer simulation for complex systems synthesis and analysis covering random numbers use, languages, and interactive man machine applications

GPSS/360 interactive simulation program with report generator, selective output display and HELP blocks for model manipulation and real time viewing

Computer aided design in electronics, discussing interactive computing with time sharing teletype keyboards or CRT graphics and applications in IC, network analysis and optimization

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation

Man computer dialogue, considering human factors effects on interaction course

Instructor station design for automated flight training systems, considering human factors and informational requirements

Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc

Interactive simulation language-8 for minicomputer and programming procedures for nonlinear differential equations solution, considering integration step size and computational accuracy and speeds

Hybrid computer and graphics terminals for real time dynamic man machine interaction, discussing AM communication system simulation

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems

Soviet papers on industrial plants automatic control systems organization, design and technological arrangement, covering information handling requirements and man machine interfaces

Automated administrative control systems design, discussing man machine interactions in industrial and economic enterprises management

Man and technology in orientation and navigation Conferences, Essen, Germany, October 1971

Man machine systems in navigation, discussing problems of integrating man with high speed and high capacity electromechanical systems with allowance for human weaknesses and abilities

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors

Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition

Man machine decision making procedures for multicriterial aggregate estimates, using pairwise comparisons and linear programming

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

Interactive remote terminal as formatting tool for reliability engineer to free from computational labor and concentrate on conceptual problems

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system

Space shuttle flight crew/computer interface display and control functional requirements optimization by real time digital simulation

Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation

Human operator role in space systems reliability, suggesting approaches to system design and program planning to exploit human potential

Optimum performance typewriter keyboard design, discussing biomechanical improvements in finger positioning facilitation, operator postural muscular strain reduction, etc

dom numbers use, languages, and interactive man machine applications

GPSS/360 interactive simulation program with report generator, selective output display and HELP blocks for model manipulation and real time viewing

Computer aided design in electronics, discussing interactive computing with time sharing teletype keyboards or CRT graphics and applications in IC, network analysis and optimization

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation

Man computer dialogue, considering human factors effects on interaction course

Instructor station design for automated flight training systems, considering human factors and informational requirements

Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc

Interactive simulation language-8 for minicomputer and programming procedures for nonlinear differential equations solution, considering integration step size and computational accuracy and speeds

Hybrid computer and graphics terminals for real time dynamic man machine interaction, discussing AM communication system simulation

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems

Soviet papers on industrial plants automatic control systems organization, design and technological arrangement, covering information handling requirements and man machine interfaces

Automated administrative control systems design, discussing man machine interactions in industrial and economic enterprises management

Man and technology in orientation and navigation Conferences, Essen, Germany, October 1971

Man machine systems in navigation, discussing problems of integrating man with high speed and high capacity electromechanical systems with allowance for human weaknesses and abilities

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors

Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition

Man machine decision making procedures for multicriterial aggregate estimates, using pairwise comparisons and linear programming

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

Interactive remote terminal as formatting tool for reliability engineer to free from computational labor and concentrate on conceptual problems

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system

Space shuttle flight crew/computer interface display and control functional requirements optimization by real time digital simulation

Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation

Human operator role in space systems reliability, suggesting approaches to system design and program planning to exploit human potential

Optimum performance typewriter keyboard design, discussing biomechanical improvements in finger positioning facilitation, operator postural muscular strain reduction, etc

Book on discrete event computer simulation for complex systems synthesis and analysis covering random numbers use, languages, and interactive man machine applications

GPSS/360 interactive simulation program with report generator, selective output display and HELP blocks for model manipulation and real time viewing

Computer aided design in electronics, discussing interactive computing with time sharing teletype keyboards or CRT graphics and applications in IC, network analysis and optimization

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation

Man computer dialogue, considering human factors effects on interaction course

Instructor station design for automated flight training systems, considering human factors and informational requirements

Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc

Interactive simulation language-8 for minicomputer and programming procedures for nonlinear differential equations solution, considering integration step size and computational accuracy and speeds

Hybrid computer and graphics terminals for real time dynamic man machine interaction, discussing AM communication system simulation

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems

Soviet papers on industrial plants automatic control systems organization, design and technological arrangement, covering information handling requirements and man machine interfaces

Automated administrative control systems design, discussing man machine interactions in industrial and economic enterprises management

Man and technology in orientation and navigation Conferences, Essen, Germany, October 1971

Man machine systems in navigation, discussing problems of integrating man with high speed and high capacity electromechanical systems with allowance for human weaknesses and abilities

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors

Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition

Man machine decision making procedures for multicriterial aggregate estimates, using pairwise comparisons and linear programming

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

Interactive remote terminal as formatting tool for reliability engineer to free from computational labor and concentrate on conceptual problems

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system

Computer aided iterative design of nonlinear single loop control system with sinusoidal describing function and time response display capability

11 p1601 A72-26042

Interactive computer graphics with three dimensional real time CRT display of air combat maneuvers for fighter pilot training

11 p1613 A72-26291

Integrated display system design with navigation update, weapon delivery, reconnaissance, bomb damage assessment, threat and terrain avoidance capabilities for multicrew military aircraft

11 p1684 A72-26292

Data display techniques in man operated automatic control system, assessing information volume versatility and operability

11 p1585 A72-26451

Aircraft microminiature ILS with transmitter and localizer antenna to provide pilot with bearing and glide slope information for alignment with runway

12 p1842 A72-27106

Interactive computer graphics technique for structural analysis, aiding engineering decisions by CRT graphical and numerical information display

12 p1787 A72-27864

Pilot-aircraft system model for relationship between weapons delivery accuracy and manual flight control system design, noting display, computation and control aids to pilot

12 p1773 A72-28121

Remotely manned vehicles /RMV/ application in aerial warfare, considering anti-aircraft defenses lethality increase, equipment costs and role of man during combat mission

13 p1896 A72-28451

Man machine system to repack weather information for easy assimilation, considering computer driven keyboard CRT displays

13 p1924 A72-28872

Pilot trainer transfer function identification for man-machine and on-line adaptive control system using analog/hybrid computer

14 p2091 A72-30721

Aircraft copilot assistance to pilot in flight phases, emphasizing takeoff and landing and man machine system reliability

14 p2072 A72-30815

Aerospace complex physical systems including human operator, discussing computerized design for behavior analysis by means of mathematical models

14 p2093 A72-30846

Russian book on man and computer covering interaction systems technological capabilities, mathematical aspects and applications

15 p2188 A72-31272

Aircraft inertial navigation system, discussing mode selection unit, digital computer and control display for operator communication with system

15 p2267 A72-31596

Graphic color display adapted to traffic control for direct operator-computer dialogue, noting instruction repertoire, switching device and input devices

16 p2420 A72-32894

Book on man machine system experiments covering ATC, air defense, logistics organizations, space flight, battlefield operation, police dispatching, communications, etc

16 p2359 A72-33796

Predictive model for human operator performance in short term visual information processing based on psychological research to obtain decision accuracy and response time

16 p2359 A72-33865

Computerized photographic imagery analysis system with interactive operator controls for processing option selection in image enhancement prior to pattern identification

17 p2520 A72-34407

Automated cloud tracking using precisely aligned digital ATIS pictures.

17 p2521 A72-34411

Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy

17 p2493 A72-35564

Historical development of right and left hand patterns in horsemanship, land vehicle, ship and aircraft control and navigation

18 p2707 A72-37050

Man machine systems operational effectiveness augmentation through human factors engineering to enhance human operator capability for parallel data processing and decision making

19 p2761 A72-38308

Control center relation to process control computers in production engineering, discussing information flow and communication in man machine systems

19 p2761 A72-38310

Process control of the 100-m telescope - Communication of the observer with the computer-controlled telescope

19 p2804 A72-38487

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

19 p2782 A72-38521

Flight and centrifuge tested aircrew tilting supinating seats biomedical and technical adequacy as acceleration protective man machine system

19 p2761 A72-38707

Behavioural characteristics of men in the performance of some decision-making task components.

20 p2898 A72-39805

Area navigation systems integration into existing ATC and man/machine relationship problems, considering cockpit workload coordination

21 p3079 A72-40280

An area navigation system for a long range airplane.

21 p3079 A72-40281

Russian book - Space ergonomics.

21 p3004 A72-40300

Anthropotechnics /human engineering/ approach to man machine system optimization, discussing task allocation and adaptations of machine dynamics, displays and controls to human operator

21 p3009 A72-41403

Display device layout based on human operator manual control information requirements consideration, discussing functional categories, motion compatibility, indicators relation and integration

21 p3009 A72-41404

Prediction role in execution of manual control with display device to aid human operator adaptation

21 p3010 A72-41406

Display device design and human operator training based on visual and auditory sensation and perception principles, emphasizing fitting between man and information

21 p3010 A72-41407

Human operator decision making role in information presentation system determined by experiments using laboratory performance and test measures, field observation, electrical and biochemical measures

21 p3010 A72-41408

Prediction displays based on the extrapolation method.

21 p3010 A72-41409

Man machine system input via human controller output transformation, illustrating with spacecraft lateral position manual control problem

21 p3010 A72-41411

Manual workload determination by control characteristics, control-display relationships, demands for dexterity and sensitivity and speed and accuracy requirements

21 p3010 A72-41414

Man machine system functions and display and control role descriptions by flow diagrams, giving examples of keying and task in guided weapon system

21 p3011 A72-41415

Human or computer control role in teleoperator remote control mechanisms, discussing control modes, sensing and transmission time delay problems

21 p3011 A72-41416

Computerized supervisory control for interpretation of subgoal statements from human operator to permit teleoperator interaction with environment without long time delay

21 p3011 A72-41417

Lectures on theory of manual-vehicle control.

21 p3011 A72-41418

A method for the development and optimization of controller-models for man-machine systems.

21 p3011 A72-41420

Manual tracking control with continuously variable selective control gain in response to system state, noting intuitive optimization

21 p3011 A72-41425

Mental and physical workload measure and differentiation in man machine systems

21 p3012 A72-41427

Development and optimization of a nonlinear multiparameter human operator model.

22 p3149 A72-41949

Mathematical methods of man machine control system synthesis, using homeostasis and functional compatibility principle

22 p3162 A72-42243

German monograph - Control performance as a function of the transmission ratio and the Coulomb friction in the operational element.

22 p3152 A72-43052

Detection of hazards associated with aerospace operations.

23 p3287 A72-43424

Man machine control system synthesis, noting quality criteria and estimates for weighting function coefficients of optimization potential

24 p3376 A72-45508

Problems of complex object modeling based on heuristic self-organization

24 p3376 A72-45509

Invariant transformation of the control laws in ergatic systems

24 p3376 A72-45510

Formation of an optimizing functional in control systems

24 p3386 A72-45511

Mathematical description of a human operator in ergatic control systems

24 p3376 A72-45514

Algorithmic description of the generalized operational characteristic of a human operator

24 p3376 A72-45515

Estimate of the operational efficiency of a human operator in the follow-up mode of a closed-loop control system

24 p3376 A72-45516

Methodical aspects of studies of ergatic differential-game systems

24 p3376 A72-45517

Man in a control circuit during an information game synthesis

24 p3377 A72-45520

Experimental determination of the distribution rule for the time of failure-free operator action in the tracking mode /with pursuit/

24 p3377 A72-45521

Theoretical-experimental method for parametric synthesis of director-type control systems

24 p3377 A72-45522

Aircraft interception avoidance problem solved by differential game theory, discussing human operator decision making for random pursuit tracking

24 p3377 A72-45523

NT WATER MANAGEMENT

NT WEAPON SYSTEM MANAGEMENT

Aerial photointerpretation in forest administration, discussing electronic data processing methods

09 p1302 A72-23291

MANAGEMENT ANALYSIS

Azur satellite project definition organizational structure and time schedule, noting management and implementation problems

05 p0752 A72-16136

MANAGEMENT INFORMATION SYSTEMS

Industrial R and D data collection to relate idea dispositions by management to subjective evaluation, considering urgency, predictability and expected time horizon roles

04 p0598 A72-15455

Electronic data processing for management information utilization

12 p1890 A72-27267

Management information system role in cost effective civil and military aircraft operations, discussing hardware modification and human resources and communication system adaptation

15 p2339 A72-32458

MANAGEMENT METHODS

Design review as management tool for complex systems quality and reliability assurance, discussing Skylab program

10 p1486 A72-24005

Apollo program management decisions based on reliability analysis, discussing incentive fees, testing optimization, engineering changes approval and flight readiness certification

10 p1486 A72-24007

Statistical-analytical cost models for spacecraft development and fabrication, taking into account various technical and management factors

10 p1564 A72-24026

Cost effective innovations in space programs management, discussing communication, problem solving and reward and punishment

10 p1564 A72-24451

Management alternatives evaluation methodology for capital expenditures on large facilities in terms of competitive capability enhancement for aerospace contracts

15 p2340 A72-32615

Problems confronting the engineer in charge of procurement of components intended for electronic aerospace systems

18 p2743 A72-37126

NDT application and development in industry, considering confidence in inspection techniques, framework and management resistance

24 p3408 A72-45295

MANAGEMENT PLANNING

NT PRODUCTION PLANNING

NT PROJECT PLANNING

Aircraft producibility considerations in preliminary design and production planning phases

01 p0074 A72-10245

Quality control function in configuration management, discussing hardware and software validity for decision formulation

NASA quality assurance program, discussing management planning, assessment, failure prevention and cost effectiveness

ATC system decision making problem and future technological and administrative improvements

European Space Research and Technology Center satellite project control system, describing critical path network analysis, work package cost control and project planning

Mathematical model for research payoff estimation by internal rate of return method used by large corporations for project evaluation

Product support functional organization, discussing support systems analysis and engineering, trainer design, technical proposals and publications, customer training, field service, etc

Industrial R and D data collection to relate idea dispositions by management to subjective evaluation, considering urgency, predictability and expected time horizon roles

DELTA flow chart and network method for R and D projects planning and scheduling

Interflug national economic control system, discussing objectives, costs, labor, science and technology, material and price management plans

In-house R and D laboratory organization cost effectiveness evaluation methods, discussing supervisory, program and special appraisals, visiting committees and natural competition

R and D management policies choices with respect to Bayesian decision-theoretic model in simulated environments

Technological forecasting method evaluation for R and D planning, fitting trend curves to sets of technological data

Technology transfer model in terms of donor-recipient activities for information implementation, forecasting and long range planning in developing countries and regional economics

Computer aided administrative control systems development for industrial enterprises management, covering product manufacture

Selection, arrangement and use of computers and peripheral equipment in automated administrative control management system within industrial enterprise

Industrial enterprises preparation for computerized administrative control systems introduction

Systems approach to technological forecasting for short range research, considering consumer, market and organizational resources

Reliability growth curves for product assessment as technical management forecasting technique

Work administration system for aerospace applications, considering contractual statements, corporate requirements, schedule accomplishment and cost effectiveness

Dynamic modeling application to technological forecasting, discussing mathematical simulation for R and D management planning in project selection and budget allocation

Technological forecasting and long range planning in transportation, considering roles of expert opinion, trend extrapolation, normative models and social impact

Optimization of diagnostic tests for monitoring industrial system efficiency, obtaining compromise between costs and utilization

Industrial enterprise training expense planning in terms of staff productivity and work time

Military R and D organization questionnaires data analysis to obtain relationship between job productivity, satisfaction, ability, age and salary

Aircraft maintenance operations and personnel requirements planning for optimal economic effectiveness, formulating relations between work productivity, downtime and aircraft utilization

Schedule analysis computer program algorithms for waterfall bar chart display and commodity flow processing and graphing through network

Lunar roving vehicle qualification program to meet performance specifications under lunar conditions, describing testing procedures and project management techniques

Resource analyses for R & D programs

French space program management planning, discussing orientation, operation and control of activities

Mathematical formulation of linear programming problem, reducing vector value optimal management plan determination to quadratic programming problem

Integration of safety engineering into a cost optimized development program

Planning and management requirements for aircraft jet engine control system research and development

NASA ICBM/IRBM space program major management decisions and highlights concerning Atlas, Titan and Thor

Simulation procedure for mission and maintenance planning of an air force wing

MANAGEMENT SYSTEMS

NT MANAGEMENT INFORMATION SYSTEMS
Aerospace management systems effectiveness in design, development, test and engineering areas, discussing cost, scheduling and technical performance factors

[AIAA PAPER 72-243]

MANDRELS
Inflatable mandrels use to manufacture filament wound casings examined in terms of suitable mandrel materials and required mechanical properties

Mandrel design for the filament winding process

MANEUVERABILITY
Air to air maneuverability of aircraft capable of in-flight thrust vectoring, indicating improved deceleration, normal acceleration g-force and turn rate

Dynamic control system parameters optimization for series of maneuvers under different degrees of informability

Combat jet helicopter maneuverability, considering aircraft flying characteristics, pilot capability, flight configuration, altitude and load factor

Fighter aircraft maneuverability, range and armament requirements, discussing canard vs delta configurations

General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack

Helicopter maneuverability factors, discussing flight direction change ability, acceleration limitations and rotor thrust requirements

Design for air combat

Maneuver low control and relaxed static stability applied to a contemporary fighter aircraft

MANEUVERABLE SATELLITES
U MANEUVERABLE SPACECRAFT
U SATELLITES

MANEUVERABLE SPACECRAFT
NT APOLLO SPACECRAFT
NT LIFTING REENTRY VEHICLES
NT RENDEZVOUS SPACECRAFT

Rotating dumbbell shaped satellites orientation optimization by system of jets, calculating energy losses

MANEUVERS
NT EARTH ORBITAL RENDEZVOUS
NT ORBITAL RENDEZVOUS
NT SIDESLIP
NT SPACECRAFT DOCKING
NT SPACECRAFT MANEUVERS

Human and animal controlled self rotating maneuvers during free fall, comparing theoretical motion analysis with photographs of falling cats

SST operational maneuver effects on sonic boom, discussing steady flight and acceleration-to-cruise pressure signatures

Experimental investigation of an astronaut maneuvering scheme

ASW aircraft magnetic anomaly detection /MAD/ system range limitation due to residual maneuver noise, discussing real time compensation for geomagnetic gradient interference

MANGANESE

NT MANGANESE ISOTOPES

Fe XI to XV emission lines from transitions and isoelectronic spectra in manganese, chromium and vanadium

Manganese catalyst photoactivation process for oxygen photosynthetic evolution investigated in Mn-deficient Anacystis nidulans cells

Structural stabilization of austenitic steels with manganese, maintaining toughness and sensitivity to martensitic transformation by hammer hardening

Structural stabilization of austenitic steels with manganese, noting chemical purity and cleanliness conditions

Mn additions effects on austenitic stainless steels yield strength, work hardening characteristics, corrosion resistance and machinability

Mn content effect on mechanical properties and corrosion fatigue and stress corrosion cracking resistance of Al-Mg casting alloys

Solar spectrum Mg I multiplet lines hyperfine structures, examining emission lines with Fabry-Perot and Fourier transform spectrometers

Solar Mg abundance and hyperfine structure from oscillator strengths measurement by comparing absorption lines at furnace temperatures

Mg base alloys precipitation processes studied by electron microscopy, emphasizing Mn precipitation in Mg-Th alloy

The classification of transitions between levels of principal quantum numbers 3 and 4 in Fe IX to XVI and Mn VIII to XV

German monograph - Significance of the manganese-carbon ratio in the brittle-fracture behavior and weldability of high-strength fine-grained structural steels

MANGANESE ALLOYS
Al-Mn system constitution, discussing metastable phase, high and room temperature modifications and transformation equilibrium

Passivation velocity apparatus for testing Al-Mg alloy sensitivity to corrosion under voltage

High alloy chromium and manganese steels brittle fracture susceptibility, showing notch effects

Hardening of Fe-Mn-Ti ferritic and martensitic alloys, investigating microstructure and mechanical properties

Phase equilibria of Mo-Mn-C and W-Mn-C systems by X ray analysis, showing eutectoid decomposition involving rhombic modification

MnBi thin films as potential storage media within holographic optical memory system having write-in reference beam for readout

Aging effect on brittleness and hardening of Fe-Ni-Mn alloy at various temperatures

Magnetic susceptibility of ternary Al-Mn alloys with Ti, Va, Cr, Fe, Co, Ni, Cu and Zn, describing microstructure and aging experiments

Electron bombardment disordering of ordered Ni-Mn alloy along different crystallographic directions

Safe welding procedures for carbon manganese steels, noting hydrogen cracking association with hardening of heat affected zone

Relative valence effect of transition metal additions on alpha-gamma phase equilibrium in Fe-Cr-Mn system

Ni-Mn alloy phase transformation characteristics from neutron diffraction and small angle scattering studies, showing ordered nearly stoichiometric metastable phase for entire temperature range

Cr and V additions effects on Mn steels mechanical properties and wear resistance, noting strength limit increase

Microstructure and mechanical properties of heat resistant Fe-Mn-Al alloys at 650-1150 C

Al-Mu-Li alloys phases mechanical and thermal properties under tensile and fatigue tests at room and elevated temperatures 14 p2124 A72-31037

Composition, strength and plasticity of ultralight Mn-Li alloys with two-phase alpha-beta base 14 p2125 A72-31040

Structural and orientation study of sequentially evaporated MnBi thin films on glass substrates using electron diffraction and transmission microscopy 16 p2441 A72-33207

Texture of Ti-Sn and Ti-Mn alloy specimens observed by X ray reflection technique after hot rolling, annealing and cold rolling 16 p2407 A72-33529

Study of certain features of the electronic structure of the ternary alloys Ni3/Mn, Fe/ and Ni3/Mn, Co/ 17 p2568 A72-35518

Microstructure and differential thermal analyses of ternary system Co-Mn-Al, presenting phase diagrams 19 p2818 A72-37852

Ferromagnetic tau phase structure of Mn-Ac alloy with powder anisotropy related to platelet formation and twinning orientation 21 p3068 A72-40965

Strain hardening effect of Ni, Mn and Mo in Cr steel after high temperature annealing 23 p3301 A72-43742

High alloy chromium and manganese steels brittle fracture susceptibility, showing notch effects 24 p3414 A72-44941

MANGANESE COMPOUNDS

Effect of copper, cobalt and manganese salts on certain morphological-biochemical components of the blood in young sheep of the Hissar breed 20 p2893 A72-40075

MANGANESE IONS

Electron spin resonance of divalent Mn ion doped in thallous azide single crystals, investigating temperature effects on spin Hamiltonian parameters 22 p3152 A72-42716

MANGANESE ISOTOPES

Aluminum 26 and manganese 53 produced by solar-flare particles in lunar rock and cosmic dust. 20 p2970 A72-39472

MANIFOLDS

Bogoliubov-Mitropolski-Hale integral manifold theorem for perturbed nonlinear differential equations, using generalized variation of parameters formula 03 p0381 A72-12907

Missile destruct systems explosive transmission line manifolds, discussing designs for high reliability under severe environmental conditions 08 p1221 A72-20782

L-1011 TriStar cartridge valves and manifolds, reservoirs and hydraulic service center design for speedy maintenance and servicing 14 p2073 A72-31050

MANIFOLDS [MATHEMATICS]

Invariant manifolds in rigid body motion about fixed point, considering Euler-Poinsoit, Lagrange-Poisson and Kovalevskia cases 04 p0549 A72-15197

Differential equations of motion construction from given manifold, determining functional minimization of solution 04 p0550 A72-15544

Markov processes for local diffusions defined by second order differential operator delta with Holder coefficients on manifold 10 p1505 A72-24201

Differential geometry extremal problem of holomorphic embedding of complex curves in Kaehler manifold with constant holomorphic curvature, using Riemann surface moduli theory 10 p1506 A72-24862

Heat equation for insulated uniform body, examining definition and continuity of mapping from linear manifold of assumed boundary values 11 p1747 A72-26555

Dynamic control stability on given time interval, using Liapunov-like functions and integral manifolds in quadratic forms 13 p2004 A72-29471

System theory on group manifolds and coset spaces. 17 p2575 A72-34949

Criteria for nonlinear systems controllability in terms of state variable analytic function and derivatives, implying strong accessibility for manifolds including Euclidean spaces 18 p2673 A72-36616

Equivariant integrality theorems for differentiable manifolds. 22 p3199 A72-42310

A manifold imbedding algorithm for optimization problems. 23 p3268 A72-44197

Analytic continuation of functions over infinite dimensional domains, covering Banach manifolds, hypoanalytical mappings, convexity and topology 24 p3418 A72-44827

Spline functions application to approximation theory problem of determining diameters of subspaces and manifolds in Banach space 24 p3419 A72-45548

MANIPULATION

U MANIPULATORS

MANIPULATORS

Accuracy criterion for master mechanism position reproduction by slave mechanism of master-slave manipulator 07 p0914 A72-19261

Teleoperator manipulator for payload handling in space shuttle, noting design features and simulations of master-slave remote control system [AIAA PAPER 72-238] 13 p1909 A72-29075

In orbit servicing of spacecraft. 18 p2730 A72-36543

New modifications of manipulators for investigations using microelectrodes 22 p3149 A72-42073

Control simulation models of three dimensional joint angle motions, including circle, ellipse and straight line trajectories and orientations in space 22 p3162 A72-42187

Teleoperator technology development, discussing remote operators, mobile manipulators and autonomous robots for man capability extension and industrial application [ASME PAPER 72-AERO-18] 22 p3245 A72-43150

A teleoperator system for space application. 24 p3407 A72-45174

MANN-WHITNEY-WILCOXON U TEST

Noise statistics sensitivity of two sample Mann-Whitney nonparametric detector for radar application 05 p0629 A72-16570

MANNED LUNAR SURFACE VEHICLES

Manned-Unmanned Lunar Explorer (MULE) for NASA integrated program plan after 1980, discussing weight, locomotion system and mission capabilities [AIAA PAPER 72-369] 11 p1612 A72-25394

Implications of new transport vehicles and cost analysis of supplying and maintaining a manned lunar laboratory. 24 p3441 A72-45209

MANNED ORBITAL LABORATORIES

NT MANNED ORBITAL RESEARCH LABORATORIES

SkyLab experimental space station, discussing environment comfort, Apollo spacecraft rendezvous for crew rotation and onboard experiments in earth resources, biomedicine, astronomy, etc 06 p0893 A72-18611

Legal aspects of international manned orbiting laboratories, discussing space objects registry and liability for damage 07 p1103 A72-19461

Manned orbital laboratories within framework of space treaty 07 p1103 A72-19462

SkyLab earth resources experiment package, examining crew tasks [AIAA PAPER 72-234] 10 p1472 A72-24444

Design of Salyut manned orbital laboratory combined with Soyuz service module 12 p1876 A72-27107

Space Shuttle supported manned earth orbital laboratories for operational communication and navigation systems, discussing mission program, design and equipment [AIAA PAPER 72-533] 12 p1876 A72-27357

Space shuttle applications as spacecraft launcher, unmanned instrumentation platform and manned laboratory, discussing advantages to space research 13 p2051 A72-28935

Future orbital observatory modules for stellar and galactic astronomy. 24 p3453 A72-45533

MANNED ORBITAL RESEARCH LABORATORIES

MORL and Orbital Biomedical Laboratory projects, reviewing crew accommodation, spacecraft and booster requirements and biomedical measurements 05 p0724 A72-16177

MANNED ORBITAL SPACE STATIONS

U ORBITAL SPACE STATIONS

MANNED ORBITAL TELESCOPES

NT APOLLO TELESCOPE MOUNT

MANNED REENTRY

Parameters affecting communication and rescue time constraints for emergency astronaut return from low earth orbits 09 p1395 A72-23155

MANNED SPACE FLIGHT

NT APOLLO FLIGHTS

NT MANNED REENTRY

NT MERCURY FLIGHTS

Manned space station design for astronomy, space physics and biology, earth surveys, aerospace medicine, materials science and advanced technologies applications 01 p0135 A72-10937

Optimum duration of human circadian cycle with respect to energy cost during work hours, relating normal cycle change to prolonged space mission stresses 05 p0619 A72-16639

Soviet book on space exploration in U.S.S.R. covering Elektron, Proton and Cosmos research satellites, communication and meteorological satellites, lunar and manned spacecraft, etc 06 p0879 A72-17815

Space rescue - Conference, Konstanz, West Germany, October 1970 09 p1395 A72-23151

Manned space flight escape, rescue and survival systems based on onboard, prepositioned aid and earth launched concepts, considering earth orbit, lunar and interplanetary missions 09 p1395 A72-23152

Escape systems evolution for manned space flight, considering X-15, Mercury, Gemini and Apollo programs and future space stations and planetary missions 09 p1395 A72-23153

Parameters affecting communication and rescue time constraints for emergency astronaut return from low earth orbits 09 p1395 A72-23155

Terminal guidance systems and techniques application to manned space flight rescue operations, discussing emergency location and rescue spacecraft communication and guidance 09 p1396 A72-23158

Rest and activity patterns effect on space crews well-being and operational effectiveness during prolonged extraterrestrial missions, noting work load effect on long-haul transport aircrews 10 p1427 A72-23727

Design considerations and reliability analysis for long duration manned space missions, noting redundancy and inflight maintenance requirement [AIAA PAPER 72-239] 10 p1487 A72-24446

Medical evaluation of manned space flight physiological effects, considering Mercury, Gemini and Apollo programs 11 p1585 A72-26100

Diving operations medical aspects significance for manned planetary surface exploration in high density atmospheres, considering protective clothing, breathing apparatus and gas mixtures, etc 12 p1769 A72-27415

Computer and meteorological satellite effects on weather support for manned space missions, discussing Gemini 5 and Apollo 11 landing weather predictions and cloud climatology 13 p1989 A72-28804

NASA space plans for 1970s including lunar, planetary and universe explorations, cost reduction, human living and working capability, technology applications and international cooperation 14 p2162 A72-31136

Medical requirements for manned space flight, discussing physiological data monitoring and transmission, equipment miniaturization, telediagnosis, spacecraft environment protection, etc 16 p2358 A72-33562

Preventive and remedial space flight safety engineering, discussing escape capsules and onboard and earth-launched rescue systems 17 p2620 A72-34427

Long range planning for the development of space flight emergency systems. 17 p2620 A72-34428

The earth orbit shuttle as a space rescue vehicle. 17 p2620 A72-34437

Spacecrews rescue requirements, considering escape capsules earth-based and orbit-based rescue systems and flight hazards 17 p2620 A72-34438

Brief survey of the problems of space radiobiology and radiation safety in space flights. 17 p2509 A72-35376

International Space Rescue Symposium, 2nd, Mar del Plata, Argentina, October 9, 1969, Proceedings. 17 p2622 A72-35549

Iridium and tantalum foils for spaceflight neutron dosimetry. 17 p2558 A72-35901

Space technological advance effects on human extraterrestrial, scientific, economic and sociological progresses 19 p2867 A72-38545

Bosch CO2 reduction unit research and development. [ASME PAPER 72-ENAV-10] 20 p2896 A72-39167

An integrated medical system for long-duration space missions. 21 p3009 A72-41305

Space rescue operations planning requirements for 1980s manned satellite missions, discussing vehicles, equipment and various mission phases 24 p3449 A72-45129

Despinning and detumbling satellites in rescue operations. 24 p3450 A72-45160

Human organism and space flight stress endurance limits and manned space mission rescue capabilities requirements, considering cabin decompression, anoxia, radiation, onboard illness, etc 24 p3376 A72-45218

Comparative merits of manned and unmanned (automated) space exploration, considering lunar observatories, earth orbiting space stations and interplanetary missions 24 p3441 A72-45220

MANNED SPACE FLIGHT NETWORK

Apollo centralized ground support and communication system, describing network support team, mission control center, instrumentation support team and manned space flight network 13 p1940 A72-29860

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles 02 p0256 A72-12289

Optimum manned spacecraft electrical power distribution voltage and frequency selection, discussing corona, radiation and safety 03 p0313 A72-14187

UV sensitive fire detector in manned space vehicle, discussing simulation in aircraft flying zero gravity parabolas 06 p0814 A72-17584

International standardization of manned spacecraft components for rescue efforts and joint multinational space missions 09 p1395 A72-23154

Emergency reentry manned spacecraft remedial concepts, mission constraints and system designs in terms of cost effectiveness 09 p1396 A72-23159

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles 10 p1508 A72-23758

Fault tolerant redundancy for manned spacecraft computers considered as long term desirable solution from cost analysis 10 p1443 A72-23819

Human operator role in space systems reliability, suggesting approaches to system design and program planning to exploit human potential [AIAA PAPER 72-228] 10 p1430 A72-24439

Environmental control and life support subsystem conceptual design studies for shuttle launched 6-12 man crew modular space station [ASME PAPER 72-ENAV-22] 20 p2895 A72-39155

Bosch carbon dioxide reduction process for manned spacecraft oxygen recovery, analyzing carbon and water forming reactions with iron as catalyst [ASME PAPER 72-ENAV-9] 20 p2896 A72-39168

Integration of an automated onboard data management system with a manned spacecraft environmental thermal control and life support system. [ASME PAPER 72-ENAV-6] 20 p2896 A72-39171

Manned and unmanned space-based astronomical observatory systems pros and cons, discussing experiment management complexity and cost reduction 24 p3447 A72-45546

MANOMETERS

Pressure measuring method with piston manometers for absolute vacuum gage calibration 04 p0507 A72-14440

Combination flow-pressure measuring instrument based on rotating Flösdorf manometer with switching relay system 04 p0525 A72-15665

Thin walled Bourdon tube manometric spring deformation analysis by Ritz method in second approximation 09 p1397 A72-22349

Transit tube manometric system with fast particle beam ionization of residual gas molecules for vacuum measurements 09 p1364 A72-23226

Ultramicromanometer based on photomultiplier for low pressure Penning discharge light flux emission measurement 10 p1480 A72-24208

Vacuum gage calibration standardization by piston manometer method of pressure determination from direct force-area measurement 12 p1805 A72-27037

Mesosphere and lower thermosphere temperature measurement by rocket-borne manometer, relating temperature variations to corpuscular flux intensity and sun generated geomagnetic excitations 15 p2225 A72-31910

Pressure measuring instruments design, considering fluid, piston, spring, electrical and ultrasonic manometers 16 p2391 A72-33240

Kinetic theory of a modified Knudsen's absolute manometer. 22 p3175 A72-41941

MANPOWER

Space shuttle thermal protection refurbishment labor costs and techniques, noting motion studies results for maintenance tasks in terms of manpower and performance time [AIAA PAPER 72-374] 11 p1726 A72-25398

Aircraft maintenance operations and personnel requirements planning for optimal economic effectiveness, formulating relations between work productivity, downtime and aircraft utilization 14 p2174 A72-30822

MANTLE [EARTH STRUCTURE]

U EARTH MANTLE

MANUAL CONTROL

NT CONTROL STICKS

NT VISUAL CONTROL

Manual orbital control used on Soyuz spacecraft in orbital flight, investigating equations of motion and pilot work load 05 p0725 A72-16438

Dynamic manned vehicle cockpit simulator for visual and aural effects and acceleration changes, discussing STOL and VTOL characteristics 06 p0796 A72-18246

Design and operation of hand control of automatic camera for astrogodesy used for measuring artificial earth satellites orbits 08 p1165 A72-21021

Optimal solutions for apportionment between automatic and manual flight control, considering number and types of displays required 09 p1348 A72-22783

Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation [AIAA PAPER 72-227] 10 p1551 A72-24438

Data display techniques in man operated automatic control system, assessing information volume versatility and operability 11 p1585 A72-26451

Pilot-aircraft system model for relationship between weapons delivery accuracy and manual flight control system design, noting display, computation and control aids to pilot 12 p1773 A72-28121

Target acquisition by systems with unlagged acceleration control or rate control with exponential time lag, discussing number of approach and control stick movements 13 p1911 A72-29819

Tracker recovery strategy during temporary target obscuration in pursuit tracking task, analyzing control stick movements 13 p1911 A72-29820

Historical development of right and left hand patterns in horsemanship, land vehicle, ship and aircraft control and navigation 18 p2707 A72-37050

An optimal model-following flight control system for manual control. 19 p2753 A72-38228

Relationships among isometric forces measured in aircraft control locations. 19 p2761 A72-38706

Displays and controls; Proceedings of the Advanced Study Institute, Berchtesgaden, West Germany, March 15-26, 1971. 21 p3009 A72-41402

Display device layout based on human operator manual control information requirements consideration, discussing functional categories, motion compatibility, indicators relation and integration 21 p3009 A72-41404

Human consciousness and choice role in biological control process automation to define differences between manual and automatic control systems 21 p3009 A72-41405

Prediction role in execution of manual control with display device to aid human operator adaptation 21 p3010 A72-41406

Man machine system input via human controller output transformation, illustrating with spacecraft lateral position manual control problem 21 p3010 A72-41411

A model for analysing the coordination of manual movements. 21 p3010 A72-41413

Manual workload determination by control characteristics, control-display relationships, demands for dexterity and sensitivity and speed and accuracy requirements 21 p3010 A72-41414

Man machine system functions and display and control role descriptions by flow diagrams, giving examples of keying and task in guided weapon system 21 p3011 A72-41415

Human or computer control role in teleoperator remote control mechanisms, discussing control modes, sensing and transmission time delay problems 21 p3011 A72-41416

Computerized supervisory control for interpretation of subgoal statements from human operator to permit teleoperator interaction with environment without long time delay 21 p3011 A72-41417

Lectures on theory of manual-vehicle control. 21 p3011 A72-41418

Some contributions to the theory of linear models describing the control behaviour of the human operation. 21 p3011 A72-41419

A method for the development and optimization of controller-models for man-machine systems. 21 p3011 A72-41420

Manual tracking control with continuously variable selective control gain in response to system state, noting intuitive optimization 21 p3011 A72-41425

Influence of stick efficiency on tracking error applying two slightly different control elements 21 p3012 A72-41429

Results of the investigation of different extrapolation displays. 21 p3012 A72-41431

Development and optimization of a nonlinear multiparameter human operator model. 22 p3149 A72-41949

Human operator dynamics for aural compensatory tracking. 22 p3149 A72-41950

German monograph - Control performance as a function of the transmission ratio and the Coulomb friction in the operational element. 22 p3152 A72-43052

An investigation of parameters and factors governing manual control of STOL aircraft in landing approach. [AIAA PAPER 72-987] 24 p3369 A72-45415

MANUALS

DC-10 nondestructive testing manual, detailing section/subject format, methods, planned area accessibility and aircraft maintenance 01 p0078 A72-11109

MANUFACTURING

NT LOW GRAVITY MANUFACTURING

NT SPACE MANUFACTURING

Aircraft design productivity to reduce production cost and enhance product profitability, using joint engineering and manufacturing team [SAE PAPER 710748] 01 p0074 A72-10247

Inconel 718 surface integrity from various manufacturing processes, tabulating data on surface finish effects on fatigue, microhardness and metallurgical properties [SME PAPER IQ 71-239] 01 p0076 A72-10967

Porous stainless steels as filter medium, describing manufacturing techniques, properties and applications 02 p0233 A72-11449

Industrial and biological processing possibilities under weightless condition, considering crystal growth, metal processing, vaccine production and electrophoresis in space manufacturing 02 p0278 A72-11961

Lunar mineral resources from analyses of moon samples, discussing solar cell and vacuum process manufacturing 05 p0722 A72-17099

Space shuttle payloads and space manufacturing candidate materials and methods, discussing float-zone refined semiconductors, electronic crystals, viral insecticides, vaccines and biological cells 06 p0824 A72-18622

Semifinished product production technology influence on heat resistant alloys mechanical properties, considering forging, rolling, casting, melting, diffusion welding and powder metallurgy 06 p0834 A72-18647

Automated detonator production facility features, describing modernization program 08 p1221 A72-20780

Book on digital and analog monolithic IC systems, covering manufacturing methods, component design, MOS logic, arithmetic, error correction, codes, applications, etc 09 p1286 A72-23044

Manufacturing process for dispersion strengthened nickel-chromium-thorium dioxide alloys for space shuttle thermal protection system panels, discussing joining optimization and mechanical properties 11 p1659 A72-26035

Production manufacturing processes improvements for composite materials 11 p1674 A72-26232

Inertia welded bimetallic fasteners for aerospace industrial applications, noting cost advantages [ASM PAPER W 72-32,5] 12 p1817 A72-28166

- Algorithm for optimal strategy in statistical plant control for machine parts production and assembly, discussing measuring equipment errors effects
13 p1965 A72-29168
- Semiconductor devices quality assurance based on electrical and mechanical performance tests at every stage of product manufacture from initial design
14 p2091 A72-31164
- Thin film resistor manufacture and evaluation for stability and long-life characteristics
14 p2091 A72-31171
- Manufacturing process for glass fiber chopped strand mats, discussing physical and electrical properties and applications to filament winding
16 p2414 A72-33303
- Resin selection for manufacture of chemically resistant glass fiber reinforced polyesters, considering structural factors of chain for susceptibility to alkaline hydrolysis
16 p2414 A72-33304
- Process computer system design, discussing structural units, data flow coordination with storage, input/output channels and periphery coupling problems
17 p2523 A72-35443
- The manufacture of multilayer reusable surface insulation materials for space shuttle.
[SME PAPER EM 72-714]
18 p2695 A72-36527
- INTERNEPCON '71; Proceedings of the International Electronic Packaging and Production Conference, Brighton, Sussex, England, October 19-21, 1971.
20 p2908 A72-39490
- Design and manufacturing considerations in hermetic microcircuit enclosures.
20 p2908 A72-39495
- A comparison of manufacturing techniques for hybrid microwave circuits.
20 p2908 A72-39496
- Industrial work study methods application to aerospace manufacturing for establishment of efficient work methods, facilities utilization and productivity controls
21 p3132 A72-41643
- Book - Industrial robots - A survey: Details of construction, performance, prices, and applications /Enlarged edition/
22 p3183 A72-43099
- ### MANY BODY PROBLEM
- Solution of N planets equations of motion around sun with recurrent power series in time
01 p0123 A72-10014
- Topological structure of anharmonically coupled many body problem, describing generalized Bose operators formulation
02 p0262 A72-12049
- Numerical instability of gravitational n-body problem considering differences between computed systems and exact solutions to differential equations
04 p0581 A72-15629
- Partial iterative refinements of parameters by reduced Newton-Raphson process based on generalized inverse, noting method use in gravitational n-body integration
04 p0581 A72-15630
- Differential equations systems formulation and numerical integration in gravitational problem of stellar n-bodies, discussing close approaches
05 p0713 A72-16052
- Book on orbital mechanics covering perturbation theory, many body problem, conic sections, orbit determination, canonical transformations and Hansen methods, moving coordinates, etc
06 p0879 A72-17820
- N-body problem equations of motion numerical integration methods supplemented by two body perturbation description and coordinate and time transformations
06 p0885 A72-18072
- Numerical integration of N-body problem integrodifferential equations, using integrals as constraints and for correction application in least squares procedure
06 p0885 A72-18074
- Statistical mechanics of N-body self gravitating system one dimensional model, using canonical and microcanonical ensembles
06 p0885 A72-18075
- Numerical experiments in collisionless stellar systems evolution by gravitational n-body calculations using computers
06 p0885 A72-18076
- N-body gravitational problem direct integration techniques, discussing fourth order polynomial method, computer algorithm and regularization procedure for two body encounters and close binaries
06 p0885 A72-18078
- N-body gravitational problem numerical integration treatment of close approaches, using transformations for eliminating differential equations of motion singularities
06 p0885 A72-18079
- Two point boundary value solution for N-body trajectories, comparing asymptotic with numerical integration solutions for several lunar and interplanetary trajectories
07 p1068 A72-18945
- Soviet book on celestial mechanics and astrodynamics covering classical and contemporary theory, many body problem, satellite perturbation, optimal and boundary value problems, etc
07 p1078 A72-19952
- Nonflat central configuration N point masses existence for any integer greater than four, disproving Wintner conjecture of finite number of integers
08 p1236 A72-21639
- Celestial mechanics considerations for many body problem with finite and infinite macroobjects motions correlation and conservation principles elucidation
08 p1236 A72-21641
- Generalized many body problem of interacting finite material points motion in isolated stellar systems
08 p1237 A72-21642
- Gravitational n body problem - IAU Conference, Cambridge, England, August 1970
12 p1872 A72-27890
- Numerical integration for many body systems equations of motion, noting Monte Carlo and Boltzmann moment methods for large systems
12 p1873 A72-27895
- Massless test star velocity vector deflection in stellar field from numerical integration on relaxation times
12 p1873 A72-27901
- Gravitational many body problem differential equation system formulation and numerical integration
12 p1874 A72-27902
- Integrals utilization in numerical integration of n body gravitational systems, discussing accuracy and reduced computation time
12 p1874 A72-27903
- Statistical mechanics of one dimensional model for many body self gravitating system with canonical and microcanonical ensembles, noting isothermal solution of Vlasov equation
12 p1846 A72-27907
- Numerical experimentation in collisionless systems for Jeans instability, static self consistent models and spiral patterns
12 p1874 A72-27908
- Relaxation processes enhancement by collective particle collisions effects in plasma, stressing application to stellar dynamics
12 p1853 A72-27915
- Fourth order polynomial method and computational algorithm for direct integration of n body systems, discussing two body encounters and binary systems
12 p1875 A72-27917
- Close approaches in numerical integration of gravitational many body problem, discussing smoothing and regularization
12 p1875 A72-27918
- Infinitesimal mass revolution around smallest primary of restricted four body problem, discussing element perturbation
14 p2161 A72-30913
- The collision singularity in a perturbed n-body problem.
17 p2609 A72-35107
- Use of multiple basis sets in the Brueckner-Goldstone many-body perturbation theory for atomic problems.
17 p2586 A72-35772
- Brueckner-Goldstone many-body perturbation calculation of helium photoionization.
17 p2586 A72-35773
- The one-dimensional N-body problem and rectilinear gas motion
17 p2584 A72-35909
- Many-body forces and the effect of the matter distribution in the universe to the gravitational constant.
18 p2728 A72-36800
- Problem of n bodies with a variable gravitational constant, and some dynamic characteristics of large-scale cosmic systems
19 p2863 A72-38077
- A form of the translational dynamical equations for relative motion in systems of many non-rigid bodies.
22 p3205 A72-42113
- The concept of reference loci applied to four-body dynamics.
24 p3440 A72-45137
- About the first integrals of the generalized problem of translatory-rotary motion of rigid bodies.
24 p3442 A72-45235
- Critical inclinations and eccentricities concepts for N planet problem, applying results to general three body problem
24 p3442 A72-45239
- ### MANY PARTICLE THEORY
- ### U MANY BODY PROBLEM
- ### MAPPING
- ### NT ICE MAPPING
- ### NT ORTHOPHOTOGRAHY
- ### NT SOIL MAPPING
- ERTS satellite return beam vidicon TV system and multispectral scanner images, describing photogrammetric and cartographic evaluations
01 p0065 A72-10449
- EROS program thematic mapping system for binary graphic overlays of open water, snow and ice, reflective IR vegetation and human works
01 p0066 A72-10460
- Grasslands mapping for ecosystem analysis, determining spectroradiance/reflectance characteristics by aerial and satellite-borne multispectral scanner imagery, aerial and ground photography and spectrometry
02 p0208 A72-11783
- Remote sensing for land use soil limitations recognition and mapping, using color encoded density slicing analysis
02 p0209 A72-11793
- Environments susceptibility to low resolution imaging for land-use mapping, relating landscapes spatial frequency distributions to expected ERTS resolutions
02 p0210 A72-11796
- Terrestrial radiation emission mapping from imagery produced by scanning radiometer, discussing remote sensors used to study surface energy phenomena
02 p0210 A72-11804
- ERTS return beam vidicon system geometric calibration for high resolution photomaps maps cartographic referencing and register, discussing optical and electronic distortion sources
02 p0225 A72-11818
- Narrow beam millimeter wave radiometer with real-time TV display for terrain mapping, analyzing contours blurring caused by antenna pattern and output integration
02 p0191 A72-11821
- Land pattern mapping from monom imagery analysis, using coordinate digitizer system with planimetric computer input
02 p0187 A72-11874
- Automatic geologic mapping with calibrated narrow band visible and near IR rock reflectivity data and computer processing
02 p0215 A72-11878
- Automated photometric wetland mapping using aerial color film microdensitometric analysis and computer techniques
02 p0215 A72-11886
- Hyperaltitude photography evaluation for geological mapping, comparing Gemini 4 and aerial photographs
02 p0216 A72-11891
- Satellite photography application to morphological cartography of Baja California
02 p0216 A72-11892
- Earth compartmentalization by meridians and parallels, discussing structuralization and latitude-longitude disymmetry
03 p0350 A72-13800
- Urban area aerial photography survey for large scale photomaps, discussing building feature examination and universal stereophotogrammetric instruments utilization
03 p0362 A72-14311
- Planicart stereoplotter for map compilation and revision in photogrammetry
06 p0815 A72-17756
- Satellite-borne multispectral photographic line-scan system with direct optoelectrical signal conversion for photogrammetric and cartographic applications
06 p0815 A72-17757
- Multiple projection assembly for topographic maps preparation by satellite photographs optical projection onto model surfaces, exemplifying by reverse lunar hemisphere
08 p1165 A72-21155
- U.S. Navy cartography, describing RA-3B Skywarrior capabilities and photographic instrumentation
08 p1169 A72-21699
- Sea surface roughness mapping by airborne microwave radiometry with correction for viewing angle and atmospheric effects
09 p1297 A72-22525
- Topographical stereo map plotting apparatus with auxiliary device for orthophoto production, describing design for combined photointerpretation-cartographic applications
09 p1313 A72-23309
- Automatic cloud cover mapping from satellite photographs, describing three step procedure of texture edge detection and cleaning, region coloring and map cleaning
10 p1478 A72-23782
- Linear processes coupling and cylindrical probability imaging through nonlinear mappings, noting relationship to Ito theory of stochastic integrals
10 p1505 A72-24072
- Geomagnetic Sq current electric field mapping into lower atmosphere, calculating equipotential surfaces
11 p1626 A72-26416
- Martian Sinus Meridiani and South Polar maps from mosaics of Mariner 6 and 7 wide angle photographs
12 p1871 A72-27664
- Apollo mapping camera system synchronized laser altimetry utilization in astro-photogrammetric triangulation
12 p1872 A72-27816

Nonsymmetrical stellar motion in galaxies, finding number of isolating integrals in systems with three degrees of freedom from four dimensional mapping 12 p1874 A72-27911

Photomaps plotting from high altitude photographs, presenting expressions for segment areas selection 13 p1954 A72-28496

Computerized reconstruction of orthogonal representations from cylindrical and conical mapped projections with known parameters and base 13 p1956 A72-28738

Large scale mapping by photogrammetric method based on contour points of outdated small scale aerial survey photographs, noting root-mean-square errors 13 p1959 A72-29633

Broad scale remote mapping of spectral composition of silicate rocks from thermal IR scanner data 14 p2099 A72-30321

Distortion corrections in geophysically traced gravitational, magnetic and geoelectric field maps, discussing automation 14 p2101 A72-30642

Cartographic and environmental surveys by Skylab orbiting stations and ERTS satellite using panoramic and mapping cameras and laser altimeter 15 p2232 A72-31247

Nonlinear electronic /transistor/ system mapping-on by matrix dynamic transform algorithms, comparing with Newton-Raphson method 15 p2210 A72-31491

Three dimensional transformation for continental scale geodetic grids photogrammetry by satellite method, noting scale alteration and Euler angles determination 16 p2387 A72-33799

Holographic photogrammetry and cartography 17 p2555 A72-35184

Transformation of points from sidelooking radar images into the map system. 17 p2555 A72-35336

Means of obtaining versions of orthogonal cartographic projections 17 p2548 A72-35361

The new Mariner 9 map of Mars. 18 p2729 A72-36988

Holography application in photogrammetric contour mapping, discussing topographic data acquisition, storage, retrieval and display problems 19 p2797 A72-37609

Method for transforming three-dimensional images on maps, plans, and other documents with the aid of an electronic computer 19 p2802 A72-38082

Multiple projection assembly for topographic maps preparation by satellite photographs optical projection onto model surfaces, exemplifying by reverse lunar hemisphere 20 p2924 A72-39260

Synthesis of threshold-logic networks using Karnaugh-mapping techniques. 21 p3037 A72-40636

Mars photographic mapping and UV/IR spectrometric investigation by Mariner 9, discussing Martian surface features and atmospheric composition 21 p3105 A72-40967

A new approach to automatic scanning of contour maps. 22 p3174 A72-43024

Analytic continuation of functions over infinite dimensional domains, covering Banach manifolds, hypoaanalytical mappings, convexity and topology 24 p3418 A72-44827

A thermal mapping technique for shock tunnels and a practical data reduction procedure. [AIAA PAPER 72-1031] 24 p3389 A72-45408

MAPS

NT ASTRONOMICAL MAPS

NT METEOROLOGICAL CHARTS

NT RADAR CLUTTER MAPS

NT RADAR MAPS

NT RELIEF MAPS

Image scale selection for topographic map revision in orthophotograph production considering economics and suitability 09 p1311 A72-22968

A square equal-area map of the world. 20 p2915 A72-38961

MARAGING

Maraging Fe-Ni-Co-Mo alloy ordered metastable omega phase formation during martensite aging from electron microscopic investigation, noting Co addition effects and precipitation 14 p2115 A72-30404

MARAGING STEELS

Constant high tensile stress and rapid aerodynamic heating effect on maraging steels and Ti and Al alloys, evaluating test and simulation procedures for design data development 01 p0084 A72-10749

Maraging and Ni steels stress corrosion cracking rates dependence on stress intensity factor, discussing measurements in salt and distilled water 01 p0086 A72-10995

Ni maraging steel microstructure effects on strength and fracture toughness 01 p0087 A72-11024

Press and sinter production of Ni maraging steel powder metallurgy parts 02 p0234 A72-11464

Quenched and tempered high strength and maraging steels delayed failure properties from notched-tensile sustained-load tests in distilled water 02 p0246 A72-12560

Maraging steel laminates stress corrosion cracking behavior, showing composite base plate and weld structure influence on crack propagation reduction 04 p0534 A72-15569

Stress corrosion crack growth in air melted and vacuum arc remelted nickel maraging steel, using stress wave analysis technique 05 p0674 A72-16327

Fatigue and fatigue-corrosion properties of high strength stainless maraging martensitic structural and stainless austenitic steels 05 p0680 A72-17206

Economical methods for cast maraging steel production, describing composition, heat treatment and mechanical properties 07 p1010 A72-18970

Maraging steel embrittlement by titanium carbonitrides lattices separation during cooling, suggesting rapid quenching and plastic deformation temperature reduction 07 p1012 A72-19677

Heat treatment effects on strength differential of high strength martensitic stainless and Ni maraging steels 07 p1015 A72-19926

Austenite stabilization in maraging steel by cumulative heat cycling, using dilatometric and X ray analysis techniques 07 p0998 A72-20483

Stable austenite formation during maraging steel aging at 300-750 C determined by X ray diffraction 07 p1022 A72-20525

German monograph on fracture formation and behavior in Ni maraging steel under repeated stress alternations, considering Al and Ti effects on steel strength 08 p1190 A72-22172

Fe-Ni alloys atom redistribution during aging before phase precipitation, discussing Mo and Co clusters in martensitic maraging steels 08 p1190 A72-22189

Welded high strength maraging steels fatigue performance, stressing nondestructive testing technique 09 p1332 A72-23617

Prototype fine wire feed unit and microplasma welding torch and equipment for butt welding of Ni maraging steel, testing welds mechanically 09 p1321 A72-23636

Fatigue and fatigue-corrosion properties of high strength stainless maraging, martensitic structural and stainless austenitic steels 11 p1660 A72-26141

Filler wires development for inert gas welding of stainless maraging steel 11 p1660 A72-26488

Coherent precipitate structure in Fe-Ni-Co-Mo maraging alloys, using electron microscopy 11 p1668 A72-26940

Electroslag and vacuum remelted maraging steel rolling contact, investigating fatigue life as function of lubricant film thickness/surface roughness ratio 12 p1816 A72-28109

Austenite grain growth characteristics of heat treated Ni maraging steel 13 p1976 A72-28673

Ni-Cr-Mo stainless maraging steel, investigating yield strength, toughness, corrosion resistance and weldability 14 p2113 A72-30270

Heat treatment and grain size effects on stress corrosion resistance and life duration of maraging steels, investigating crack initiation and propagation 14 p2117 A72-30539

Heat treatment hardening effect on stress corrosion resistance of ultrapure maraging and stainless steels, emphasizing hydrogen embrittlement 14 p2117 A72-30540

Plane strain fracture toughness tests of compact thick maraging steel specimens at various yield strength levels as function of aging 16 p2406 A72-33317

Fractographic lines in maraging steel - A link to fracture toughness. 18 p2700 A72-36584

Optimal composition equation with austenite retention index for high strength maraging stainless steel development for improved toughness 18 p2702 A72-36796

German monograph - Effect of molybdenum and degree of age hardening on the corrosion properties of maraging chromium steels 19 p2816 A72-37654

Tensile and compressive flow strength and work hardening behavior in maraging steels, attributing

strength differential to nonlinear elastic interactions between interstitials and dislocations 20 p2939 A72-39306

Load tests in air to evaluate maraging steels weldments for rocket motor case applications 20 p2942 A72-39955

Fracture toughness of the heat-affected zone in 14CrMoV69 steel and 18Ni maraging steel. 21 p3067 A72-40850

Strain hardening of maraging steels in liquid nitrogen 22 p3187 A72-41867

Contribution to the study of the creep behavior of 18 per cent-nickel maraging steel 24 p3415 A72-45600

MARIA

NT LUNAR MARIA

MARINE NAVIGATION

U SURFACE NAVIGATION

MARINE PROPULSION

NT UNDERWATER PROPULSION

Nuclear energy value to society, stressing usefulness for electric power generation and marine propulsion 03 p0387 A72-14376

Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications 05 p0688 A72-15777

MARINE TECHNOLOGY

Marine and aerospace engineering - Conference, Paris, May 1971 04 p0463 A72-15551

Self contained portable data acquisition system for marine, environmental and ecology research, using multiple analog recording and digital telemetry transmitter 06 p0797 A72-18613

Development and testing of a precise marine electrostatic gyroscope. 24 p3401 A72-44638

Weather satellites - Their role in the application of environmental services to the marine industries. 24 p3420 A72-44648

MARINER PROGRAM

Mariner 1969 Mars mission, emphasizing planetary encounter, surface and atmospheric data and search for extraterrestrial life 01 p0130 A72-10930

Satellite-star optical navigation data from Mariner program, describing objectives and performance of preflight and real time activities leading to successful performance 15 p2271 A72-32196

Mariner and Mars space probe data on Mars surface and atmosphere, suggesting possibility of tectonic activity 16 p2461 A72-34181

Coordinates of features on the Mariner 6 and 7 pictures of Mars. 24 p3436 A72-44695

Mariner spacecraft Jupiter-Saturn 1977 gravity assisted flyby, discussing mission objectives and trajectory options [AIAA PAPER 72-943] 24 p3444 A72-45438

Mariner Mars 1971 adaptive mission planning for scientific objectives flexibility based on planetary features observed, discussing plan change implementation [AIAA PAPER 72-944] 24 p3444 A72-45439

MARINER SPACE PROBES

Mars and Venus explorations, discussing Mariner probes, Mars craters, volcanism, polar areas, surface temperature and atmosphere and Venus radar astronomy and atmospheric model 03 p0440 A72-14305

Programming systems for onboard unmanned deep space probe computers, describing Mariner and outer planet Grand Tour Programs 07 p0949 A72-19295

Mariner Mars 1969 IR spectrometer for Mars atmosphere and surface spectra recording, describing design specifications and optimization for low light level sensitivity 09 p1313 A72-23326

Aeolian transport and surface roughness of Mars Hellas basin, using Mariner 1969 photographs 10 p1536 A72-24151

Mars observation by Mariner 9, discussing TV pictures of surface, UV and IR spectroscopy of atmosphere, S band experiment and Phobos and Deimos studies 10 p1538 A72-24309

Mars surface lineament systems from Mariner photographs, noting global and radial type associated with Hellas and South Pole basins 12 p1868 A72-27259

Mars craters degradation and density regional variations from Mariner 6 and 7 imagery, using numerical scoring method 14 p2149 A72-30318

Mars nonpolar region photometric and topographic characteristics from Mariner 6 and 7 UV spectrometer observations 15 p2311 A72-32084

Bistatic radar measurements of the surface of Mars with Mariner 1969. 21 p3110 A72-41453

The composition of the Martian atmosphere - Minor constituents. 21 p3110 A72-41458

MARINER SPACECRAFT

Mariner 9 experiments, discussing IR interferometric spectroscopy observations of Mars dust composition and pole flattening 06 p0889 A72-18340

Mariner 9 television reconnaissance of Mars surface and satellites, observing south polar cap and dark spots with crater features 06 p0889 A72-18341

Mariner 9 IR spectroscopy observations of Mars surface, indicating dust with silicon oxide content and atmospheric warming and water vapor over south polar cap 06 p0890 A72-18342

Brightness temperatures over Mars south polar cap from Mariner 9 IR radiometry, comparing to Mariner 6 and 7 06 p0890 A72-18343

Mariner 9 UV spectrometry observations of Mars airglow spectrum containing CO Cameron band and atomic oxygen and hydrogen lines 06 p0890 A72-18344

Mariner 9 radio occultation measurements of Mars day side atmosphere, indicating isothermal temperature, surface pressures and ionosphere properties 06 p0890 A72-18345

Mariner 9 radio tracking measurements of Mars gravity field and pole direction, comparing to moon and earth 06 p0890 A72-18346

Spacecraft planetary approach navigation with TV camera onboard Mariner 9 giving images of Mars natural satellites against star background, discussing optical data processing programs [AIAA PAPER 72-53] 07 p1032 A72-18946

Digital data transition tracking loop as practical implementation of optimum self bit synchronizer in Mariner spacecraft telemetry demodulators 10 p1437 A72-24687

Mars astrophysical observation from Mars 3, describing instruments and measurement results 15 p2308 A72-31901

Apparent difference in Martian night and day side surfaces atmospheric pressure based on Mariner spacecraft occultations, noting effects of topography and electron layer 15 p2310 A72-31973

Mariner spacecraft 1973 for flyby Venus and encounter Mercury, discussing launch and arrival conditions and aiming zones selection to maximize science return [AIAA PAPER 72-942] 21 p3113 A72-41578

Application of advanced filtering methods to the determination of the interplanetary orbit of Mariner 71. [AIAA PAPER 72-906] 24 p3443 A72-45427

Spacecraft navigation systems for Mariner Jupiter-Saturn 1977 Project, considering maneuvers, orbit determination and data requirements [AIAA PAPER 72-926] 24 p3423 A72-45432

MARINER VENUS-MERCURY 1973

Mariner Venus/Mercury 1973 flyby mission imaging experiment, discussing mission constraints, objectives and use of real time transmission vidicon camera and high resolution UV photography 04 p0568 A72-14494

Mariner spacecraft 1973 for flyby Venus and encounter Mercury, discussing launch and arrival conditions and aiming zones selection to maximize science return [AIAA PAPER 72-942] 21 p3113 A72-41578

MARINER 4 SPACE PROBE

Mariner 4 trajectory relation to proposed location of bow wave caused by solar wind interaction with Mars ionosphere, noting planet orbit aberration effects 09 p1385 A72-22581

MARINER 5 SPACE PROBE

Venus upper clouds composition from Mariner 5 occultation data analysis concerning temperature and pressure profiles, abundances, polarization characteristics, reflection and emission spectra 08 p1236 A72-21496

MARINER 6 SPACE PROBE

Nonthermal escape and predissociation mechanism for Mars low nitrogen concentration reflected in Mariner 6 and 7 UV spectrometric results 02 p0280 A72-12208

Mars surface topographic characteristics relationship to earth features, using Mariner 6 and 7 photographs 04 p0569 A72-14501

MARINER 7 SPACE PROBE

Nonthermal escape and predissociation mechanism for Mars low nitrogen concentration reflected in Mariner 6 and 7 UV spectrometric results 02 p0280 A72-12208

Mars surface topographic characteristics relationship to earth features, using Mariner 6 and 7 photographs 04 p0569 A72-14501

Mars south polar cap surface roughness and photometric function from Mariner 7 UV spectrometric experiment 10 p1531 A72-23708

The location of the Mountains of Mitchel and evidence for their nature in Mariner 7 pictures. 21 p3110 A72-41456

Mariner 7 ultraviolet spectrometer experiment - Topographic slopes of Mars' polar region. 21 p3110 A72-41457

MARINER 9 SPACE PROBE

Mariner 9 TV experiment image data display, processing and production for real time analysis, noting computer algorithms 15 p2236 A72-31982

Preflight and real time gravity sensing for Mariner 9 satellite orbit determination during Mars 1971 mission 15 p2270 A72-32186

Mars and its satellites as viewed by Mariner 9 17 p2607 A72-34752

A detailed analysis of Mariner nine TV navigation data. [AIAA PAPER 72-866] 20 p2977 A72-40061

Mars photographic mapping and UV/IR spectrometric investigation by Mariner 9, discussing Martian surface features and atmospheric composition 21 p3105 A72-40967

Mariner 9 spacecraft systems and photographs of Martian surface details 24 p3441 A72-45170

Maneuver design and implementation for the Mariner 9 mission. [AIAA PAPER 72-913] 24 p3443 A72-45429

Mariner 9 Mars orbital trajectory analysis from earth based radio data, considering gravity field, n-body perturbation and solar radiation pressure effects [AIAA PAPER 72-928] 24 p3443 A72-45434

MARKERS

Single Integrated Signal Device to aid in locating downed airmen awaiting rescue in dense jungle terrain by Search and Rescue aircraft 08 p1112 A72-21580

Inflight validation of laboratory scaled-down simulation experiments on optimal hierarchy of colors for markers and signals [AD-737901] 08 p1147 A72-21582

Rescue signaling devices design and operation, discussing pinpoint markers, rocket boosted panel markers, strobe units, antennas and balloon marker 08 p1112 A72-21584

MARKET RESEARCH

Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOI aircraft [SAE PAPER 710750] 01 p0002 A72-10249

Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market 07 p1105 A72-20269

Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies 13 p2067 A72-30125

MARKETING

Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc 13 p1896 A72-28452

Helicopters technical and marketing projections for 1980s, emphasizing reliability, maintainability and maneuverability in design philosophy 17 p2491 A72-34926

MARKING

NT ISOTOPIC LABELING

Runway marking requirements for visibility under day and night conditions, considering night reflection value, color stability, durability, noninterference with flight operations, etc 17 p2535 A72-34243

MARKOV CHAINS

Markov chain successive approximation method for electromagnetic wave propagation in medium with random large discontinuities, using scalar parabolic equation 02 p0181 A72-12588

Target trajectory detector optimization, using data and Markovian chain apparatus 03 p0323 A72-13831

Optimal detection of Markov radio signals with intrapulse FM using nonlinear filtration theory 04 p0487 A72-15146

Accumulator type radar detector analysis by Markov chains method, discussing false alarm and detection probabilities 11 p1592 A72-25807

Simultaneous iteration for eigenvalue problem numerical solution by mutually orthogonal trial vectors close to required eigenvectors, applying to flutter analysis and Markov chains 11 p1679 A72-26959

Heuristic recognition algorithms with learning for homogeneous irreducible stationary Markov chain sequence of recognized objects 12 p1837 A72-27824

Limit distributions for sums of random values specified in a denumerable Markov chain with absorption 19 p2827 A72-38470

Convergence rate estimates for the sums of random values determined in a Markov chain with absorption 21 p3075 A72-41094

Uniform estimate of the residual term in a multidimensional limiting theorem for homogeneous Markov chains on the basis of a class of all measurable convex sets. I 23 p3307 A72-43344

MARKOV PROCESSES

NT MARKOV CHAINS

Three body ionic recombination as Markov process, deriving ion pairs quasi-equilibrium distribution equation identical to Bates-Flannery statistical theory 01 p0104 A72-10860

Semi-Markov process sojourn time within reducible subset of states, examining asymptotic behavior with algorithm developed for linear operators disturbances 01 p0094 A72-11265

Redundancy with repair for system mean time to first failure, presenting differential equation coefficients for Markov process 02 p0236 A72-11556

Second order Markov process statistical model for gravity anomalies in local region, applying to error analysis in inertial navigation system computerized simulation 02 p0207 A72-15596

Suboptimal nonlinear filter performance evaluation methods based on Kolmogorov equations for Markov process transition density function 04 p5055 A72-15040

Light transmission in medium with random inhomogeneities in Markov random process approximation, obtaining short wave field statistical characteristics 04 p0488 A72-15380

Markov model random variation optimal periodicity in preventive maintenance operations, estimating distribution density and moments 04 p0527 A72-15574

Run length encoding for removing redundancy from video signals, determining upper bound on compression ratio based on first order Markov model 06 p0773 A72-17488

Random vibrations nonlinear theory, investigating nonlinear systems response to random excitation via Markov processes modeling 06 p0896 A72-17966

Coupled detection-estimation of Gauss-Markov processes in white Gaussian noise, deriving Bayes optimal recursive rules 06 p0775 A72-18388

Nonlinear elastic systems with distributed parameters, obtaining single frequency mode random oscillations solution of boundary value problem by asymptotic method and Markov process 06 p0850 A72-18700

Gyroscopic error analysis, solving nonlinear equations by continuous Markov processes theory 06 p0819 A72-18724

Optimal receiver synthesis for radio signals with differentiable components of continuous Markov processes masked by phase interference and white noise 07 p0937 A72-18847

Signal detection in stationary, Markov and other noise background, discussing functional method of statistical and probabilistic representation 07 p0943 A72-19520

Orbit determination using Kalman-Bucy filter to estimate state and unmodeled acceleration approximated as first order stationary Gauss-Markov process 08 p1145 A72-20867

Random vibration theory and Markov processes in nonlinear stochastic systems with probability and asymptotic methods application 08 p1205 A72-20965

Algorithm for asymptotic behavior approximation of semi-Markov processes with splitting set of states by Markov chain 08 p1198 A72-20997

Markov type isotropic random Gaussian field analysis in n-dimensional Euclidean space 08 p1198 A72-20999

Markov processes in stellar dynamics, discussing relaxation and evaporation times and star velocity distribution for galactic cluster models 09 p1390 A72-23504

Reliability and time to failure prediction for degradation-prone systems via Markov processes theory 10 p1504 A72-23988

Fatou theorem at Martin boundary derived from Dynkin theory on excessive functions and exit space of Markov process 10 p1504 A72-24062

Markovian characteristics of time dependent excursions and independent incursions processes provided with limits to left and continuous to right, noting Poisson punctual process and Borel sets 10 p1505 A72-24114

Markov processes for local diffusions defined by second order differential operator delta with Holder coefficients on manifold 10 p1505 A72-24201

Time to failure determination in complex service systems, examining Markov processes 11 p1609 A72-25435

Reliability analysis of repairable redundant systems with random replenishment of reserves, using discrete time Markov process theory 11 p1600 A72-25440

Servo systems operational reliability analysis for variable intensity of fluctuating interference, discussing Markov process probability determination and Kolmogoroff equations solution 11 p1609 A72-25441

Russian papers on discrete control systems covering inertialess Markov objects, pulse amplitude and frequency modulation and statistical analysis 11 p1609 A72-25442

Recurrent algorithms for inertialess Markov objects identification based on statistical solutions theory 11 p1609 A72-25443

Time shared computer systems output maximization via degenerate exponential distribution function modeling, noting reducibility to Markov processes 11 p1601 A72-25900

Uniform Markov processes properties in Hilbert space, examining operator subgroups 12 p1836 A72-27071

Signal filtration algorithms and parameter estimation in additive non-Gaussian noise background by conditional Markov process theory 12 p1783 A72-27633

Russian papers on adaptive control systems covering automata and game theory, learning models, Markov processes and probability theory 12 p1787 A72-27921

Ergodic theorems for operators generated by Markov transients, examining asymptotic properties of stochastic learning model 12 p1787 A72-27924

Random number method for particle motion in homogeneous turbulence field, using Brownian motion Markov process for turbulence approximation 13 p1940 A72-28421

Van der Pol and nonlinear parametric oscillators fluctuations due to random noises analyzed by averaging method and discrete Markov processes 14 p2133 A72-31134

Alternant theorems for characterization of minimum solutions in multidimensional Chebyshev approximation of functions connected with Markov systems 15 p2261 A72-31497

Book - Elements of applied stochastic processes 17 p2575 A72-34624

Real and definite processes in complete probabilized space, showing Markov process as solution of stochastic differential equation 17 p2576 A72-35420

Reliability analysis of an intermittently used system with N types of failure. 18 p2693 A72-36024

Markovian plasma turbulence model to obtain convergent perturbation series for diffusion coefficient via trajectories in particle propagator 19 p2841 A72-38442

Optimal strategies for control of a semi-Markovian process by a set of observers 19 p2770 A72-38584

Pontryagin equations for Markov process limits probability, solving problem of one dimensional steady random process limits for given initial probability density function 22 p3205 A72-42227

Characteristics of filtering the Rayleigh parameter of pulse signals in the presence of noise 22 p3154 A72-42228

Optimal filtration algorithms of Markov parameters of discrete time signals in digital data transmission system with background noise, using Gaussian probability density approximation 23 p3264 A72-44005

MARS (PLANET)

Mariner 1969 Mars mission, emphasizing planetary encounter, surface and atmospheric data and search for extraterrestrial life 01 p0130 A72-10930

Review of papers on planetology given at Brighton symposium, covering moon, Venus, Mars and Jupiter 01 p0132 A72-11071

Martian internal structure, investigating oxidation rate of chondritic material 02 p0277 A72-11752

Martian radio emission at 8.57 mm during 1971 approach, comparing brightness temperature to Jupiter 02 p0280 A72-12196

Martian equatorial zone brightness distribution formula, noting agreement with observations near zero phase and 6-45 deg phase angles 02 p0282 A72-12328

Minimum velocity change noncoplanar two and three impulse orbital transfer from regressing oblate

earth assembly parking ellipse into flyby trans-Martian asymptotic velocity vector 03 p0434 A72-13634

Statistical processing of phase dependence of Martian integral brightness at 0.3-1.1 microns, noting abrupt reflectivity decrease 03 p0436 A72-13816

Extraterrestrial life on Mars and Venus and Jupiter atmospheres, discussing abiogenesis failures on life-supportable planets 04 p0471 A72-14805

Bright O, C and carbon dioxide emissions in Martian airglow from temperature profile models based on Mariner UV spectrometry 06 p0803 A72-17446

Mariner 9 experiments, discussing IR interferometric spectroscopy observations of Mars dust composition and pole flattening 06 p0889 A72-18340

Mariner 9 radio tracking measurements of Mars gravity field and pole direction, comparing to moon and earth 06 p0890 A72-18346

Mars internal structure models with chondrite as potential core-forming material, discussing absence of internal origin magnetic field 07 p1084 A72-20518

Venus, Mars, Jupiter and Saturn UV spectra from OAO-2 objective grating spectrophotometry, obtaining planetary albedos from G-type stars observations 09 p1382 A72-22288

Venus and Mars visible geocentric declinations from daytime observations with Wanschaff vertical circle compared to nighttime results 09 p1388 A72-23065

Viking Lander seismic investigations for Martian tectonic activity, internal structure and composition, core size and conditions of formation 10 p1540 A72-24389

Secular and periodic variations of orbital elements of Mars satellites due to oblateness and solar attraction 10 p1541 A72-24471

Mars and Venus instrumented spacecraft flight results, describing planetary topographies, atmospheres and magnetic fields 12 p1877 A72-27650

Martian equatorial zone brightness distribution formula, noting agreement with observations near zero phase and 6-45 deg phase angles 13 p2039 A72-29212

Mars and moon cores elastic properties inferred from hydrostatic equilibrium based on observed data for total mass, radius and moment of inertia 13 p2048 A72-29809

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series 14 p2148 A72-30207

Extraterrestrial life search, noting radio contact with civilizations, bioastronautics, Martian conditions and physicochemical experiments 14 p2076 A72-30694

Phobos and Deimos orbital characteristics, noting related Martian physical properties determination 15 p2302 A72-31277

Mars observations during 1971 opposition, noting south pole phenomena relation to Martian atmosphere changes 15 p2306 A72-31600

Mars and Venus automatic station data transmission systems for surface and atmosphere studies, discussing relay and direct transmission modes 15 p2203 A72-31823

Mars violet haze and blue clearing for Syrtis Major-Arabia from photographic and photoelectric data 15 p2311 A72-32086

Mars and its satellites as viewed by Mariner 9 17 p2607 A72-34752

Observations of the region of interaction between the solar-wind plasma and Mars 17 p2600 A72-35219

Observed seasonal change of the Martian polar cap. 17 p2615 A72-35679

Earth based Mars photographic observations with direct image transmission via TV system, determining rotation period 17 p2619 A72-35956

Exact positions of Mars as determined by the photographic method at Pulkovo in 1966 and 1967 19 p2859 A72-37914

Computer processed Mars photographic positional measurements with Pulkovo normal astrophotograph in 1965 19 p2861 A72-37985

Photoelectric transit observations of Saturn and Mars, showing culmination in universal ephemerides time 19 p2862 A72-37987

In-situ geochemical analysis of Martian and lunar composition via alpha particle activation technique, discussing Surveyor instrument performance 20 p2899 A72-39828

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series 23 p3333 A72-43237

The distribution of craters on the surfaces of the moon and Mars in relation to their origin 24 p3441 A72-45222

Photographic observations of Mars at the Main Astronomical Observatory, AN USSR during 1963-1967 24 p3448 A72-45686

MARS ATMOSPHERE

Radiative heat transfer equilibrium in Earth, Venus and Mars atmospheres, taking into account interaction with ground 01 p0058 A72-10561

Topography and Coriolis effects on Martian atmospheric circulation, incorporating low radiative time constant and large variations in analytical model 01 p0135 A72-11279

Nonthermal escape and predissociation mechanism for Mars low nitrogen concentration reflected in Mariner 6 and 7 UV spectrometric results 02 p0280 A72-12208

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography 02 p0282 A72-12326

Mars short wave line spectra from measurement with reflector, estimating nitrogen dioxide content in atmosphere 03 p0436 A72-13815

Annual heat balance in Martian northern polar cap, considering atmospheric, ground and solar heat flux absorbed by snow 03 p0436 A72-13817

Mars and Venus explorations, discussing Mariner probes, Mars craters, volcanism, polar areas, surface temperature and atmosphere and Venus radar astronomy and atmospheric model 03 p0440 A72-14305

Mars atmospheric water vapor observations, examining spectroscopic plates water line strengths at 8200 A 04 p0569 A72-14497

Mars atmosphere diatomic oxygen upper limit abundance, using high dispersion spectroscopic data from 1969 apparition 04 p0569 A72-14498

Mars carbon dioxide distribution map determination of surface topography from spectrophotometric observations of equatorial region 04 p0569 A72-14499

Mars topographic map study of high velocity relief winds, showing seasonal and secular changes 04 p0569 A72-14502

Martian atmospheric volatiles history, noting initial chemical conditions favorable to abiotic organic synthesis 04 p0569 A72-14503

Reduced collision integrals for components of Venus and Mars type carbon dioxide atmospheres at 1000-11,000 K, using intermolecular interaction potentials 05 p0712 A72-15851

Mars Hellas area surface features, relating crater absence to surface age and white spot phenomena to water reservoir under permafrost layer 06 p0881 A72-17929

Martian atmospheric pressure determination from carbon dioxide bands spectroscopic measurements 06 p0884 A72-18032

Martian atmosphere evolution, stressing photochemical production of oxygen, carbon and nitrogen 06 p0889 A72-18275

Mariner 9 IR spectroscopy observations of Mars surface, indicating dust with silicon oxide content and atmospheric warming and water vapor over south polar cap 06 p0890 A72-18342

Mariner 9 UV spectrometry observations of Mars airglow spectrum containing CO Cameron band and atomic oxygen and hydrogen lines 06 p0890 A72-18344

Mariner 9 radio occultation measurements of Mars day side atmosphere, indicating isothermal temperature, surface pressures and ionosphere properties 06 p0890 A72-18345

Martian dust storm depth determination from carbon dioxide absorption and abundance observation on Mars by earth based spectroscopy 06 p0890 A72-18348

Mars, Venus and Jupiter atmosphere composition and structure from spectral analysis, discussing equilibrium temperature, radiative heat transfer, integrated density and adiabatic temperature gradient 07 p1073 A72-19353

Transcript of conference on origins of life covering cosmic evolution, abundance and distribution of biologically important elements, earth and Mars atmosphere evolution, etc 07 p1074 A72-19450

Mars* atmosphere temperature profiles inference from outgoing radiation spectral characteristics, constructing atmospheric model

08 p1232 A72-21147

Martian violet clouds photometric studies, determining monochromatic albedo, optical thickness and Junge parameter

08 p1237 A72-21827

Planetary atmosphere diffuse radiation from limb side, applying to Mars atmospheric emission

08 p1238 A72-21832

Planetary atmospheres composition diversity, discussing evolution of Mars, Venus, earth and Jupiter from primitive solar nebula

08 p1119 A72-22012

Mariner 4 trajectory relation to proposed location of bow wave caused by solar wind interaction with Mars ionosphere, noting planet orbit aberration effects

09 p1385 A72-22581

Carbon dioxide atmospheric models for Mars and Venus, discussing aeronomy, Mariner probes, gas dissociation by solar radiation, and electron density inconsistency

09 p1386 A72-22685

Mariner Mars 1969 IR spectrometer for Mars atmosphere and surface spectra recording, describing design specifications and optimization for low light level sensitivity

09 p1313 A72-23326

Theoretical model of large scale topographical effects on wind generation through temperature advection, applying to Mars atmosphere general circulation

10 p1531 A72-23707

Mars observation by Mariner 9, discussing TV pictures of surface, UV and IR spectroscopy of atmosphere, S band experiment and Phobos and Deimos studies

10 p1538 A72-24309

Martian atmosphere water vapor detection and mapping during Viking missions, discussing experimental approach and spectrometer choice

10 p1539 A72-24378

Mars atmospheric entry experiments for Viking 1975 mission, discussing onboard neutral gas mass spectrometer and retarding potential analyzer

10 p1540 A72-24381

Viking Lander imaging experiments with stereoscopic camera system to study Martian surface and atmospheric morphology, composition and evolution

10 p1540 A72-24382

Viking Lander mass spectroscopic analysis of organic compounds, water and volatile constituents of Martian atmosphere and surface

10 p1540 A72-24383

Viking Lander meteorology experiments to measure Martian atmosphere pressure, temperature, wind speed and direction and water vapor content

10 p1540 A72-24388

Viking Lander magnetic properties investigation of Martian surface with implications for planetary composition and differentiation and atmospheric interaction

10 p1541 A72-24391

Hypersonic base heating investigation on Mars atmosphere entry blunt bodies, taking into account gas composition and angle of attack effects

[AIAA PAPER 72-317]

11 p1568 A72-25251

Martian atmospheric pressure determination from carbon dioxide bands spectroscopic measurements

11 p1719 A72-25968

Carbon dioxide and dust effect on Martian atmospheric temperatures from time dependent calculations

12 p1865 A72-27033

Martian storm of 1971, describing development, decline, structure and photographic data

12 p1870 A72-27425

Mars surface particulate matter eroded by atmospheric winds, noting erosive and settling velocities and yellow clouds distribution

12 p2036 A72-28794

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography

13 p2039 A72-29210

Mars atmospheric temperature, pressure and electron density from radio occultation measurement with Mariner 6 and 7, noting frozen carbon dioxide in middle atmosphere

13 p2039 A72-29335

Martian ionosphere electromagnetic wave propagation characteristics for E, F1 and F2 models, calculating refractive index for zero and nonzero collision frequencies

13 p1922 A72-29474

Pontyagin maximum principle for optimal terminal velocity control of automatic space probe descent in Mars atmosphere

14 p2162 A72-30456

Radiative transfer in Mars and above-cloud Venus carbon dioxide atmospheres, studying diurnal variations in temperature profile

14 p2160 A72-30897

Reduced collision integrals for components of Venus and Mars type carbon dioxide atmospheres at 1000-11,000 K, using intermolecular interaction potentials

15 p2302 A72-31270

Model Martian atmosphere, investigating effects of departures from electron density profile spherical symmetry on radio wave phase shift in bistatic radar occultation experiment

15 p2194 A72-31440

Mars observations during 1971 opposition, noting south pole phenomena relation to Martian atmosphere changes

15 p2306 A72-31600

Mars astrophysical observation from Mars 3, describing instruments and measurement results

15 p2308 A72-31901

Apparent difference in Martian night and day side surfaces atmospheric pressure based on Mariner spacecraft occultations, noting effects of topography and electron layer

15 p2310 A72-31973

Mars topography variations from earth based surface height radar ranging and Mariner spectrophotometric observation of Mars atmosphere

15 p2313 A72-32346

Probability for spore sterilization by aerodynamic heating, considering straight line and decaying circular orbital Mars entry trajectories

16 p2461 A72-34165

Mariner and Mars space probe data on Mars surface and atmosphere, suggesting possibility of tectonic activity

16 p2461 A72-34181

The spectrum of Mars between 8 and 13 microns.

17 p2606 A72-34575

Earth and Mars - Evolution of atmospheres and surface temperatures.

17 p2613 A72-35395

Electron temperature in the Martian ionosphere.

17 p2613 A72-35499

Mars Hellas region surface features, relating crater absence to surface age and atmospheric condensation-produced white spot phenomena to sub-permafrost water reservoir

18 p2730 A72-37154

Martian atmosphere atomic oxygen concentration estimation from Mariner 6 and 7 O I 1304 and 1356 A data analysis

19 p2868 A72-38734

Seasonal and latitudinal relation between Mars white clouds occurrence frequency and global water distribution, suggesting cloud composition as water vapor

20 p2968 A72-39241

Mars atmosphere temperature profiles inference from outgoing radiation spectral characteristics, constructing atmospheric model

20 p2968 A72-39252

Detection of molecular oxygen in the Martian atmosphere.

21 p3103 A72-40451

Numerical experiment of radiative-convective equilibrium of the Martian atmosphere.

21 p3105 A72-40772

Mars photographic mapping and UV/IR spectrometric investigation by Mariner 9, discussing Martian surface features and atmospheric composition

21 p3105 A72-40967

'Mars-2,' 'Mars-3' observatories exploring the 'red' planet.

21 p3109 A72-41318

The composition of the Martian atmosphere - Minor constituents.

21 p3110 A72-41458

Martian topography according to ground-based radar measurements and the CO2 absorption observed from the earth and from the Mariner 6 and 7 spacecraft

21 p3114 A72-41766

Martian surface relief and atmospheric properties from Mars probe observations, considering soil, dust storms, temperature distribution and life possibility

22 p3222 A72-42139

Martian light sources generated by suspended crystals producing parhelic halo in atmosphere, noting randomly oriented and gravitationally arranged suspensions

22 p3223 A72-42142

Stability of the Martian atmosphere.

22 p3224 A72-42292

Detection of molecular oxygen on Mars.

22 p3224 A72-42293

Development and performance analysis of a trajectory estimator for an entry through the Martian atmosphere.

[AIAA PAPER 72-953]

22 p3224 A72-42352

Mars - The effects of topography on baroclinic instability.

22 p3225 A72-42504

Mars atmosphere and surface observation by Soviet space probes Mars 2 and 3, investigating temperatures, chemical composition, dust storms and thermal radio emission

23 p3338 A72-43992

MARS ENVIRONMENT

NT MARS ATMOSPHERE

Mars biology likelihood from long winter model, suggesting north polar cap summer remnant vaporization as atmosphere, liquid water and greenhouse effect source

10 p1424 A72-23717

Antarctica dry valley microbiology investigation for Martian life model

12 p1802 A72-27258

Life on Mars, investigating ground based and probe observations of atmospheric composition and pressure, surface temperature and features and UV radiation

12 p1761 A72-27624

Viking mission gas exchange experiment for life detection in Martian soil, covering design of experiment

14 p2084 A72-30876

MARS LANDING

Mars 3 spacecraft structure and experiments, noting central hypergolic fuel tanks, S-band directional antenna and solar panels

06 p0892 A72-17400

Mars 1975 Viking mission profile, describing soft landing/orbiter probes and life detection experiments

12 p1877 A72-27687

Color band selection for Mars lander multispectral imaging system for surface constituent discrimination

15 p2307 A72-31809

Mars Viking 1975 mission objectives and navigation activities from trans-Mars injection through post-landing stationkeeping phase, considering trajectory dispersions

15 p2269 A72-32180

Landing-site and orientation determination for a spacecraft on Mars

21 p3103 A72-40302

Location estimation for spacecraft landed on Mars surface via statistical techniques application to earth based radio tracking data, taking into account ephemeris biases

[AIAA PAPER 72-903]

21 p3082 A72-41554

Evaluation of optical data for Mars approach navigation.

24 p3422 A72-44646

MARS PROBES

NT VIKING LANDER SPACECRAFT

NT VIKING MARS PROGRAM

NT VIKING ORBITER SPACECRAFT

Space crew radiation dosage calculation from Mars mission high impulse gas core nuclear rocket engine exhaust plume fission fragments

01 p0022 A72-11353

Soviet interplanetary spacecraft Mars 2 and 3, describing design, mission objectives, onboard systems and instrumentation

09 p1395 A72-22974

Mars and Venus probes entry into planetary atmospheres, discussing aerodynamics of trajectory control and soft landing

09 p1394 A72-23673

Life detection on earth from satellite 100 meter resolution photographs, discussing potential false positives and implications for Mars probes

10 p1471 A72-23718

Mars 3 probe design and mission details, covering trajectory correction lander separation, engine start-up, aerodynamic braking and dust storm data

14 p2151 A72-30477

Mariner and Mars space probe data on Mars surface and atmosphere, suggesting possibility of tectonic activity

16 p2461 A72-34181

Landing-site and orientation determination for a spacecraft on Mars

21 p3103 A72-40302

Martian surface relief and atmospheric properties from Mars probe observations, considering soil, dust storms, temperature distribution and life possibility

22 p3222 A72-42139

An integrated multi-purpose biology instrument utilizing a single detector, the mass spectrometer.

23 p3287 A72-43397

The results of Soviet research into Mars.

24 p3447 A72-45559

MARS SPACECRAFT

U MARINER SPACECRAFT

MARS SURFACE

Martian surface nature from Surveyor and Apollo missions data on lunar particle size distribution

01 p0132 A72-11037

Topography and Coriolis effects on Martian atmospheric circulation, incorporating low radiative time constant and large variations in analytical model

01 p0135 A72-11279

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography

02 p0282 A72-12326

Annual heat balance in Martian northern polar cap, considering atmospheric, ground and solar heat flux absorbed by snow

03 p0436 A72-13817

Martian surface relief observation from earth distance, showing telescope resolution requirements above dense atmospheric layers

03 p0438 A72-13983

Mars and Venus explorations, discussing Mariner probes, Mars craters, volcanism, polar areas, surface temperature and atmosphere and Venus radar astronomy and atmospheric model

03 p0440 A72-14305

Central peaked Martian crater distribution from Mariners 6 and 7 photographs, comparing south polar region to equator

03 p0440 A72-14310

Mars carbon dioxide distribution map determination of surface topography from spectrophotometric observations of equatorial region

04 p0569 A72-14499

Mars surface features Schiaparelli nomenclature from Mediterranean Sea area classical geography

04 p0569 A72-14500

Mars surface topographic characteristics relationship to earth features, using Mariner 6 and 7 photographs

04 p0569 A72-14501

Mars topographic map study of high velocity relief winds, showing seasonal and secular changes

04 p0569 A72-14502

Radar observations of Martian craters and scarp during 1971 opposition

04 p0579 A72-15359

Radar observation of Mars surface, noting rugged terrain and craters

04 p0579 A72-15360

Southern Martian polar cap seasonal change, describing variation at vernal equinox and dry ice hypothesis

04 p0581 A72-15621

Carbon dioxide frost identification on Martian polar caps by Fourier spectroscopy

06 p0881 A72-17900

Mars Hellas area surface features, relating crater absence to surface age and white spot phenomena to water reservoir under permafrost layer

06 p0881 A72-17929

Mariner 9 television reconnaissance of Mars surface and satellites, observing south polar cap and dark spots with crater features

06 p0889 A72-18341

Mariner 9 IR spectroscopy observations of Mars surface, indicating dust with silicon oxide content and atmospheric warming and water vapor over south polar cap

06 p0890 A72-18342

Brightness temperatures over Mars south polar cap from Mariner 9 IR radiometry, comparing to Mariner 6 and 7

06 p0890 A72-18343

Martian crater abundance correlation with surface albedo, discussing relative age of light and dark terrains

08 p1230 A72-20983

Martian height gradients from 1.6 micron carbon dioxide band intensity, using telescopes with prismatic quartz spectrometer

08 p1231 A72-21125

Semitransparent particle model of Martian surface for reflective power at various incidence and reflection angles, discussing packing density and optical parameters

08 p1231 A72-21126

Brightness distribution and phase dependence measured for spheres with different colors and roughness for Mars surface optical parameters model validity

08 p1238 A72-21830

Mariner Mars 1969 IR spectrometer for Mars atmosphere and surface spectra recording, describing design specifications and optimization for low light level sensitivity

09 p1313 A72-23326

Lunar and Mars crater genetic similarities, discussing scale dependent effects and post-impact geologic development

10 p1531 A72-23704

Martian cratering by asteroid impact, discussing Palomar-Leiden asteroid statistics, Opik capture theory and evolutionary extrapolation limitations

10 p1531 A72-23705

Martian crater obliteration theory, suggesting filling by dust deposition

10 p1531 A72-23706

Mars south polar cap surface roughness and photometric function from Mariner 7 UV spectrometric experiment

10 p1531 A72-23708

Aeolian transport and surface roughness of Mars Hellas basin, using Mariner 1969 photographs

10 p1536 A72-24151

Mars observation by Mariner 9, discussing TV pictures of surface, UV and IR spectroscopy of atmosphere, S band experiment and Phobos and Deimos studies

10 p1538 A72-24309

Viking Mars Orbiter imaging experiment with high resolution contiguous coverage by vidicon cameras for landing sites selection and surface study

10 p1539 A72-24377

Viking Mars Orbiter IR thermal mapper /IRTM/ to study surface kinetic temperature, thermal balance, anomalous cooling regions, ground frosts and water vapor

10 p1539 A72-24379

Viking Lander imaging experiments with stereoscopic camera system to study Martian surface and atmospheric morphology, composition and evolution

10 p1540 A72-24382

Viking Lander mass spectroscopic analysis of organic compounds, water and volatile constituents of Martian atmosphere and surface

10 p1540 A72-24383

Viking Lander carbon 14 assimilation experiment for life detection in Martian soils

10 p1540 A72-24385

Viking Lander detection of metabolically produced radioactive labeled gas in Mars surface samples

10 p1540 A72-24386

Viking Lander light scattering experiment to detect microbial growth from aqueous turbidity changes in contact with Martian soil

10 p1430 A72-24387

Viking Lander physical properties experiments for Martian soil, studying bearing strength, cohesion, adhesion, grain size, porosity, thermal properties and internal friction

10 p1540 A72-24390

Viking Lander magnetic properties investigation of Martian surface with implications for planetary composition and differentiation and atmospheric interaction

10 p1541 A72-24391

Mars surface lineament systems from Mariner photographs, noting global and radial type associated with Hellas and South Pole basins

12 p1868 A72-27259

Life on Mars, investigating ground based and probe observations of atmospheric composition and pressure, surface temperature and features and UV radiation

12 p1761 A72-27624

Martian Sinus Meridiani and South Polar maps from mosaics of Mariner 6 and 7 wide angle photographs

12 p1871 A72-27664

Mars surface particulate matter eroded by atmospheric winds, noting erosive and settling velocities and yellow clouds distribution

13 p2036 A72-28794

Viking orbiter/lander spacecraft instrumentation for Mars soil biological life experiments, discussing pyrolytic and labeled release, light scattering and gas exchange techniques

13 p1956 A72-29024

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography

13 p2039 A72-29210

Mars doublet cratering by impacting meteoroid breakup due to stresses in gravitational field, using Monte Carlo simulation

14 p2149 A72-30317

Mars craters degradation and density regional variations from Mariner 6 and 7 imagery, using numerical scoring method

14 p2149 A72-30318

Mars surface normal albedo distribution function from red light photometry data

14 p2152 A72-30489

Mars observations in 1965, 1967 and 1969 by 150 mm and 400 mm refracting telescopes noting surface map and drawings

15 p2305 A72-31397

Mars observations during 1971 opposition, noting south pole phenomena relation to Martian atmosphere changes

15 p2306 A72-31600

Color band selection for Mars lander multispectral imaging system for surface constituent discrimination

15 p2307 A72-31809

Apparent difference in Martian night and day side surfaces atmospheric pressure based on Mariner spacecraft occultations, noting effects of topography and electron layer

15 p2310 A72-31973

Mars nonpolar region photometric and topographic characteristics from Mariner 6 and 7 UV spectrometer observations

15 p2311 A72-32084

Surface roughness effects on Mars photometric properties, allowing for scattering in terms of Minnaert law

15 p2311 A72-32085

Unmanned remotely controlled planetary rovers for Mars surface exploration, discussing design concepts

15 p2214 A72-32316

Mars topography variations from earth based surface height radar ranging and Mariner spectrophotometric observation of Mars atmosphere

15 p2313 A72-32346

Mars integrated radio temperature relation to blanket electrical properties for 1971 opposition, assuming Martian soil properties independence from depth and temperature

15 p2315 A72-32730

Hellas-Hellepontos transition zone properties in origin model with impact and later isostatic subsidence

16 p2454 A72-33445

Mars surface mapping from spectrophotometric studies of surface materials photometric function, composition and distribution, suggesting color due to limonite-stained soil particles

16 p2457 A72-33616

Mariner and Mars space probe data on Mars surface and atmosphere, suggesting possibility of tectonic activity

16 p2461 A72-34181

Earth and Mars - Evolution of atmospheres and surface temperatures.

17 p2613 A72-35395

Saltation threshold velocity simulation by dynamic model with terrestrial and Martian surface applications, using particle trajectory equations for near ground-atmosphere interface

17 p2614 A72-35637

The new Mariner 9 map of Mars.

18 p2729 A72-36988

Mars Hellas region surface features, relating crater absence to surface age and atmospheric condensation-produced white spot phenomena to sub-permafrost water reservoir

18 p2730 A72-37154

Mars polar caps formation at aerographic latitudes, assuming water vapor condensation on ground and water presence in carbon dioxide snow

19 p2863 A72-38072

Mars surface normal albedo distribution function from red light photometry data

19 p2864 A72-38318

Secular and seasonal modifications of Mars surface, considering southern polar cap and 1971 dust storm

19 p2865 A72-38475

Sand deposition due to wind action in Martian craters, comparing to terrestrial analogs

20 p2969 A72-39389

Mars photographic mapping and UV/IR spectrometric investigation by Mariner 9, discussing Martian surface features and atmospheric composition

21 p3105 A72-40967

'Mars-2,' 'Mars-3' observatories exploring the 'red' planet.

21 p3109 A72-41318

Bistatic radar measurements of the surface of Mars with Mariner 1969.

21 p3110 A72-41453

Diurnal and seasonal behavior of discrete white clouds on Mars.

21 p3110 A72-41454

An orthographic photomap of the South Pole of Mars from Mariner 7.

21 p3110 A72-41455

The location of the Mountains of Mitchel and evidence for their nature in Mariner 7 pictures.

21 p3110 A72-41456

Mariner 7 ultraviolet spectrometer experiment - Topographic slopes of Mars' polar region.

21 p3110 A72-41457

Martian topography according to ground-based radar measurements and the CO2 absorption observed from the earth and from the Mariner 6 and 7 spacecraft

21 p3114 A72-41766

Martian surface relief and atmospheric properties from Mars probe observations, considering soil, dust storms, temperature distribution and life possibility

22 p3222 A72-42139

Specific effective scattering area of the lunar, Martian, and Venusian surfaces in the radio range

22 p3223 A72-42214

Mars - The effects of topography on baroclinic instability.

22 p3225 A72-42504

Biological instrumentation for the Viking 1975 mission to Mars.

23 p3259 A72-43396

Mars atmosphere and surface observation by Soviet space probes Mars 2 and 3, investigating temperatures, chemical composition, dust storms and thermal radio emission

23 p3338 A72-43992

Coordinates of features on the Mariner 6 and 7 pictures of Mars.

24 p3436 A72-44695

Mariner 9 spacecraft systems and photographs of Martian surface details

24 p3441 A72-45170

The results of Soviet research into Mars.

24 p3447 A72-45559

MARS 3 SPACECRAFT

Mars 3 spacecraft structure and experiments, noting central hypergolic fuel tanks, S-band directional antenna and solar panels

06 p0892 A72-17400

Mars atmosphere and surface observation by Soviet space probes Mars 2 and 3, investigating tempera-

- tures, chemical composition, dust storms and thermal radio emission
23 p3338 A72-43992
- MARS 69 PROJECT**
Mariner 1969 Mars mission, emphasizing planetary encounter, surface and atmospheric data and search for extraterrestrial life
01 p0130 A72-10930
Mariner Mars 1969 IR spectrometer for Mars atmosphere and surface spectra recording, describing design specifications and optimization for low light level sensitivity
09 p1313 A72-23326
- MARS 71 PROJECT**
Preflight and real time gravity sensing for Mariner 9 satellite orbit determination during Mars 1971 mission
15 p2270 A72-32186
- MARTENSITE**
Stress effects on TiNi compound martensitic transformation, investigating deformation as function of composition and heat treatment
01 p0087 A72-11023
Ultrasonic cavitation effects on martensitic specimens, observing plastic deformation, softening, phase transformations and decay
03 p0370 A72-13187
Tempered Fe-Cr-C-Co steels microstructural and mechanical properties, investigating martensite and bainite
03 p0375 A72-13929
Mo and C additives effects on austenite susceptibility to deformation martensite formation and steel resistance to hydroerosion
03 p0375 A72-13941
Dilatometric investigation of martensitic transformation in TiNi compound, observing plastic memory effect
03 p0377 A72-14021
Low temperatures and deformation rates effect on martensitic phase formation in Cr-Ni austenitic stainless steel under compression and tension
03 p0379 A72-14378
Hardening of Fe-Mn-Ti ferritic and martensitic alloys, investigating microstructure and mechanical properties
05 p0672 A72-16144
Face-centered orthorhombic martensite in Ti-V alloy, determining axial ratios and lattice parameters by transmission electron microscopy and X ray diffraction
05 p0676 A72-17102
Crystal structures and martensitic transformation mechanism of TiNi, using X ray diffraction and electrical resistivity measurements
06 p0827 A72-17421
Internal friction and plastic microstrains in martensitic transformation of Fe-Ni, Co-Ni, and Fe-Cr-Ni alloys
06 p0830 A72-18294
Austenitizing conditions effects on hardness and microstructure of tempered steel, emphasizing martensite structure and grain size changes produced by controlled heat treatment
07 p0995 A72-19486
Martensitic transformations induced by plastic deformation in Fe-Ni-Cr-C system, noting stacking fault energy dependence on temperature
07 p1015 A72-19928
Tensile strength enhancement of dislocated martensites in Fe alloys by precipitate dispersion in austenite prior to transformation
07 p1016 A72-19936
X ray study of martensite fine structure produced by plastic deformation in Fe-Ni alloy
08 p1188 A72-21788
Carbon effects on internal friction of low temperature Fe-Ni alloy during martensitic transformation
10 p1495 A72-24083
Internal friction peak in fresh tempered martensite from Fe-Ni-C alloy cooled to 77 K, suggesting hypothetical carbon atoms interactions with mobile dislocations
10 p1496 A72-24232
Co, Al and Mn additions effect on secondary hardening during aging in Fe-Mo-C martensite
11 p1655 A72-25511
High strength hypereutectoid steel with low carbon needle-like martensite matrix obtained by conventional heat treatment
12 p1827 A72-27100
Electron diffraction study of transformation twin rotations in Fe-Ni martensites, showing foil plane uncertainty effect with respect to image plane
13 p1975 A72-28666
Martensitic transformation in Cu-Al-Ni alloy thin film, investigating gamma-prime phase substructure formation and crystal growth pattern
13 p1976 A72-28907
Hardened coarse-grained steels recrystallization during fast heating, investigating martensite phase macro- and microstructural changes by X ray analysis
13 p1977 A72-28908

- Cu-Al-Ni alloys single crystals internal friction temperature dependence during martensitic transformations
13 p1977 A72-28912
Maraging Fe-Ni-Co-Mo alloy ordered metastable omega phase formation during martensite aging from electron microscopic investigation, noting Co addition effects and precipitation
14 p2115 A72-30404
Martensitic transformation athermal kinetics and accompanied martensite morphology change in Fe-Ni and Fe-Ni-Cr alloys
14 p2115 A72-30407
Premartensitic beta phase instability, lattice vibration and shape memory effect in noble metal base and Ti alloys
15 p2259 A72-32641
Magnetic balance for magnetic saturation measurement and determination of retained austenite, Curie temperature, permeability and martensite content
16 p2391 A72-33237
Quenching produced martensitic transformations from equilibrium beta phase region for Ti alloys with Ta
16 p2408 A72-33618
Precipitation reactions during tempering of Ti-Ta alloys, studying hcp and orthorhombic martensitic phases from electron microscope observations
16 p2408 A72-33619
The effect of plastic deformation on the martensite-to-austenite transition in an iron-nickel alloy
20 p2938 A72-39298
The effect of Si, Zr, Al and Mo on the structure and strength of Ti martensite
20 p2941 A72-37972
Habit plane interpretations of surface martensite transformation and orientation measurements compared with invariant plane strain (IPSS) theory
21 p3065 A72-40088
Single and double shear invariant plane crystallographic theories for martensitic transformations, calculating lattice deformations by combined Bain and complementary shear strains
21 p3065 A72-40089
Stress induced martensitic transformation relationship to shape memory effect compared with superelasticity, transformation plasticity and reversible linear change
21 p3065 A72-40091
Martensite formation temperature decrease and grain size reduction caused by martensite crystals interaction with barriers in Fe alloy containing austenite beta phase particles
21 p3070 A72-41679
Kinetic aspects of plastic strain induced martensite in polycrystalline Fe-Ni-C alloy from tensile tests on austenitic specimens
22 p3189 A72-42437
Thermoelastic martensite caused elastic vibration damping in Cu-Al-Ni alloy, observing shape memory effect
22 p3190 A72-42442
Martensitic transformation in filamentary cobalt crystals
22 p3192 A72-43017
Fe-Ni-C martensite reverse transformation to austenite during large and rapid applied shear, evaluating shear zone neighboring partially pierced hole
22 p3193 A72-43031
Enhanced strengthening of a spinodal Fe-Ni-Cu alloy by martensitic transformation
22 p3194 A72-43040
Martensitic transformation during deformation in titanium alloys with a metastable beta phase
23 p3300 A72-43591
- MARTENSITIC STAINLESS STEELS**
Plate microcracking of ferrous martensites containing Mn, Cr and Ni, discussing austenite grain size variations
05 p0678 A72-17119
Fatigue and fatigue-corrosion properties of high strength stainless maraging martensitic structural and stainless austenitic steels
05 p0680 A72-17206
Heat treatment effects on strength differential of high strength martensitic stainless and Ni maraging steels
07 p1015 A72-19926
Adiabatic reversion of Ni martensitic steel to austenite under shear in orthogonal cutting
07 p0996 A72-19934
High temperature nitriding of martensitically aging steels in ammonia-nitrogen mixtures, obtaining hard nonbrittle diffusion surface layers
07 p1020 A72-20418
Austeno-martensitic steel with 25 percent delta ferrite, examining microstructural changes due to aging at 550 C by thin slide electron microscopy
07 p1021 A72-20484
Internal friction measurements of tempered martensitic Cr steel quenched from 1100 C, connecting friction peaks with precipitation phenomena
07 p1021 A72-20486

- Martensite first stage decomposition mechanism and kinetics during tempering of quenched Re steels with varying carbon concentration
08 p1187 A72-21779
Fe-Ni alloys atom redistribution during aging before phase precipitation, discussing Mo and Co clusters in martensitic maraging steels
08 p1190 A72-22189
Soviet monograph on thermoplastic hardening of high strength martensitic steels and Ti alloys by ordering dislocation structure
09 p1327 A72-22520
Fe-Ni-C alloy mixed austeno-martensitic microstructure embrittlement, investigating mechanical properties after thermomechanical treatment
10 p1495 A72-24087
Fracture strength relation to austenite stability in steels with plastic deformation caused by strain induced austenite-martensite transformation
10 p1499 A72-24894
Fatigue and fatigue-corrosion properties of high strength stainless maraging, martensitic structural and stainless austenitic steels
11 p1660 A72-26141
Heat treatment effects on martensitic bainitic steel hardness, tensile strength and impact endurance, examining carbide and alpha phases
11 p1666 A72-26922
Tensile strength and martensitic transformation effect on stainless steel plastic deformation at cryogenic temperatures
15 p2253 A72-31521
Creep tests on Cr martensite stainless steel, showing inapplicability of Garofalo equation for stress dependence of secondary creep rate during variable stress experiment
16 p2412 A72-34112
Fine structure in quenched Fe-Al-C steels
20 p2938 A72-39300
Formation of deformation martensite in Fe-Ni-C alloys which do not undergo transformation on cooling
21 p3066 A72-40270
Deformation-induced martensitic transformation in isothermal and athermal Fe-Ni-C alloys
21 p3066 A72-40272
Strength of welded joints of high-strength stainless steels at cryogenic temperatures
21 p3061 A72-41365
Strain hardening of maraging steels in liquid nitrogen
22 p3187 A72-41867
- MARTIN MILITARY AIRCRAFT**
U MILITARY AIRCRAFT
MASCONS
Mascon free lunar gravitational potential calculations, showing hydrostatic equilibrium in early evolution
03 p0434 A72-13552
Lunar Mare Ibrum lava flow geology and nature, mascon origins and explosive, collapse and impact mechanisms for small crater origin
06 p0887 A72-18218
Moon model - An offset core
20 p2969 A72-39374
Dynamic model compensation algorithm accuracy for sequential estimation of time history of lunar satellite acceleration due to modeled surface mascons effects
24 p3440 A72-45139
- MASER OUTPUTS**
Microwave source four hundredth order harmonic mixing with laser radiation, using Josephson junction and maser
12 p1827 A72-28221
Buffer gas mixture and pumping light effects on shifts from ground state hyperfine frequency in Rb-85 maser frequency standard
14 p2109 A72-30196
Stellar OH radical emission amplification by maser effect raising low energy molecules to high energy by pumping
14 p2110 A72-30578
OH maser sources parametric down-conversion, deriving nonlinear current densities, electron cyclotron wave damping and parametric gain coefficient
21 p3064 A72-41030
Recoil effect on inverted molecules changing pumping conditions and gain for interstellar, OH maser intensity and radial velocity variations
21 p3102 A72-41773
- MASER RESONATORS**
U MASERS
MASERS
NT GAS MASERS
NT TRAVELING WAVE MASERS
Interstellar OH and water maser regions, deriving density, diameter and temperature
01 p0133 A72-11142
Quantum mechanical analysis of detuning in cascaded cavity molecular beam masers
03 p0368 A72-13747

Millimeter and submillimeter wave molecular beam masers amplification principles and Doppler and collisional broadening elimination capability
04 p0532 A72-15597

Signal detection in ruby element quantum paramagnetic amplifier operating at liquid nitrogen temperature
08 p1141 A72-21377

Ruby use for submillimeter range optically pumped quantum paramagnetic amplifier
08 p1183 A72-21770

Book on density matrix theory application to lasers and masers, covering quantum mechanics, perturbation theory, magnetism and magnetic resonance, statistical ensembles, etc
12 p1826 A72-28203

Interstellar OH maser size determination, discussing scattering by inhomogeneities in electron distribution
16 p2456 A72-33473

Russian book on microwave electronics covering linear-beam and cross-field backward and traveling wave amplifiers and oscillators, klystrons, masers, plasma devices, etc
17 p2532 A72-34650

Hydroxyl and water radio sources scale and geometry constraints placed by interstellar maser gain saturation relation to emission solid angle
21 p3062 A72-40565

Saturation protection of a maser amplifier by the pulse-modulated pumping method
21 p3063 A72-40785

Observations of sources of maser radio emission with an angular resolution of 0.0002 sec
21 p3101 A72-41751

Initial electron velocity and emitter surface roughness effects on oscillatory velocities dispersion in helical electron beams used in cyclotron resonance masers
22 p3208 A72-42664

Statistics of the radiation from astronomical masers
23 p3337 A72-43872

MASKING

Pitch shift of pure tone by masking tones and band limited noise
01 p0101 A72-10159

Visual masking effect due to light offset, investigating human identification response to tachistoscopic test stimuli on lighted background with simultaneous shut-off
02 p0166 A72-11550

Electrophysiology for auditory temporal masking mechanism study of cat cochlear nucleus and inferior colliculus single neurons
05 p0620 A72-17175

Interactive computer graphics design aids to IC mask layouts, discussing hardware and software techniques including IMP program
06 p0778 A72-17473

Programming system for automatic plotting of mask patterns for ICs
12 p1791 A72-27551

Masking functions for intensity discrimination of pulsed sinusoids with and without noise masker
13 p2006 A72-29772

Disparity-associated depth sensation masking, suggesting visual signal processing inhibitory mechanisms for crossed and uncrossed stimuli
15 p2184 A72-31366

Auditory induction of fainter by louder sounds as perceptual phenomenon cancelling masking effects
16 p2354 A72-33170

Energy detection model for transient overshoot in tonal signals masked by narrow band auditory stimuli, discussing masking produced by gated sinusoid
16 p2359 A72-33972

Effect of fringe on masking-level difference when gating from uncorrelated to correlated noise
21 p2997 A72-40346

Masking techniques for thin film and semiconductor devices and ICs fabrication, discussing conventional and computerized optical and electron beam systems
22 p3159 A72-42634

A means of reducing custom LSI interconnection requirements.
23 p3273 A72-44454

MASKS

NT OXYGEN MASKS

Gas mask-caused air flow resistance effects on respiratory and circulatory response to exercise, assessing maximal oxygen uptake
13 p1906 A72-29818

MASS

NT CRITICAL MASS

NT ELECTRON MASS

NT PARTICLE MASS

NT PLANETARY MASS

NT STELLAR MASS

Complex structures mass and stiffness matrices reduction by automatic condensation, calculating lowest eigenfrequencies and eigenmodes of substitute systems
[DGLR PAPER 71-108]
02 p0299 A72-12721

Inertial and gravitational mass equivalence principle verified for aluminum and platinum, using torsional pendulum with large relaxation time
03 p0388 A72-13076

Relativistic flight of decreasing mass, increasing acceleration and constant thrust rocket description from earth and rocket observer viewpoints, noting light flash transmission and arrival times
03 p0441 A72-13836

Gravitational and inertial masses equivalence principle verification by pendulum torsional oscillation experiment with laser beam
04 p0519 A72-15070

Mass concept for moving crack, relating stress concentrations of elastic field with crack inertia
05 p0673 A72-16306

Inertial and gravitational mass equivalence principle verified for Al and Pt, using torsional pendulum with large relaxation time
13 p2004 A72-29426

MASS BALANCE

Balance laws of micromorphic theory for polycrystalline mixtures, granular composites and fluid suspensions involving motions with wavelength comparable to intrinsic discontinuities in materials
01 p0102 A72-10320

Rotation and mass inclusion into study of energy barriers location effects on thermonuclear reaction dynamics
02 p0262 A72-11981

Gas turbine combustors performance model, using reaction rate equation from elementary mass balance equation
[ASME PAPER 71-WA/GT-5]
05 p0704 A72-15898

Angular velocity vector active damping during spin-up of electrically supported gyro with mass-unbalance readout, using Euler equations of motion
07 p0986 A72-19691

Mass and energy balance for electrode wire fusion in pulsed current MIG /metal inert gas/ welding, discussing pulse duration and amplitude requirements and shielding gas composition effect
09 p1321 A72-23644

Mass and energy balance in air cooled matrix type phosphoric acid cell, noting operational reliability and construction
16 p2351 A72-33889

Elastic vibrations in roller bearings. I - The rotating mass is balanced with respect to its own rotation axis
17 p2561 A72-35894

Unbalanced shafts vibration and stability characteristics, considering elastic and damping properties of sliding bearings oil films
18 p2731 A72-36069

Luminous intensity, visibility duration, condensation nuclei and mass balance of noctilucent clouds
18 p2686 A72-36504

An automatic mass-trim system for spinning spacecraft.
20 p2977 A72-39603

Balancing aerospace bodies on industrial balancing machines.
[SAWE PAPER 929]
23 p3293 A72-43469

Rotating aerospace vehicles dynamic balance error terms due to despun masses misalignment and aerodynamic effects
[SAWE PAPER 930]
23 p3342 A72-43470

Mass and heat budget estimations of the Atlantic SE trade wind flow at the equator.
24 p3420 A72-44756

Mathematical model for life support system optimization in terms of reduced mass minimization as quality criteria for energy conversion and metabolic processes
24 p3375 A72-45133

MASS DISTRIBUTION

Pultusk meteorite shower fragments number and mass estimates from numerical integration of differential equations
01 p0126 A72-10103

Galaxy clusters stability, obtaining mass distribution function from combined virial theorem and mass to light ratios
01 p0131 A72-11003

Computer calculation for atmospheric total mass and seasonal redistribution from pressure and temperature field data, discussing error sources
03 p0348 A72-13480

Globular clusters with inhomogeneous composition, deriving partial densities of masses
03 p0436 A72-13826

Vibration mode shapes and frequencies determination by finite element method using consistent and lumped masses formulations in differential equation solution, considering convergence rate
[AD-739820]
05 p0736 A72-16086

Time optimal control for pitch damping of gravity gradient stabilized satellite by mass distribution variation
05 p0727 A72-16465

Mass addition distribution and gas injectant effects on heat transfer rates, transition locations and surface pressures of sharp cone
[AIAA PAPER 72-183]
05 p0748 A72-16838

Rocket orbit in mass point gravitational field, studying KS variables separability, elliptic functions and equivalent problems
06 p0877 A72-17656

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law
06 p0884 A72-18030

Mass distribution gravitationally equivalent to L1 lunar potential model for finite torus shaped shell region sampled by Apollo spacecraft
07 p1067 A72-18871

Spiral galaxies hypothesis for higher mass-luminosity ratio of outer parts from undetected cold neutral hydrogen, using model of NGC 300
07 p1068 A72-19071

Galactic nucleus explosive events and mass expulsion evidence from high velocity hydrogen survey with 20 ft horn reflector
07 p1070 A72-19086

Numerical solution of equations for asteroidal mass distribution under collisional fragmentation
07 p1071 A72-19180

Book on physical cosmology development covering universe expansion, steady state, isotropy, Hubble constant, cosmic time scale, mass density, etc
08 p1236 A72-21480

Optimal stabilization of permanent rotation of solid body with arbitrary mass distribution by controlled gyroscope
08 p1168 A72-21552

Nonflat central configuration N point masses existence for any integer greater than four, disproving Wintner conjecture of finite number of integers
08 p1236 A72-21639

Frost rule for meteoroid spatial sorting as basis for Allende meteorite shower stream field examination of fragment mass and position
08 p1237 A72-21651

Radar measurement of meteor bodies mass distribution parameter
08 p1239 A72-21889

Radio echo determination of meteor body distribution by mass with allowance for electron attachment and overestimated nighttime values
09 p1383 A72-22505

Galaxy NGC 253 mass and distance from neutral hydrogen spectral line observations with radio telescope
09 p1391 A72-23533

Velocity dispersions and discrepant red shifts in groups of galaxies, using virial theorem for galaxy mass calculations
10 p1534 A72-23903

Hyades member star BD plus 16.516 deg described as late evolution product of binary system with mass exchange and loss through planetary nebula phase
10 p1543 A72-24618

Distributed elastic system discrete model mass, stiffness and damping matrices derivation from dynamic test response data
[AIAA PAPER 72-346]
11 p1728 A72-25375

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law
11 p1719 A72-25966

Mass, momentum and energy distribution measurement in quasi-steady MPD discharge, obtaining velocity vector profiles
[AIAA PAPER 72-497]
11 p1696 A72-26220

Computer calculation for atmospheric total mass and seasonal redistribution from pressure and temperature field data, discussing error sources
11 p1623 A72-26250

Shallow isotropic and orthotropic shells vibration, investigating dynamic rigidity for concentrated mass
12 p1878 A72-27079

Lognormal fragment mass distribution of Lowicz meteorite shower 1935
12 p1866 A72-27118

Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center
14 p2153 A72-30496

Lunar crust mass distribution relation to moments of inertia derivation from librations, inferring non-validity of lunar evolution fluid phase hypothesis
14 p2153 A72-30504

Charge and mass densities relation for stationary charged dust distribution in general relativity, investigating Einstein-Maxwell equations for stationary gravitational field
15 p2275 A72-31591

Earth-moon system mass from ratio of solar mass to sum of terrestrial and lunar masses, discussing solar attraction effects and radar distance measurements
15 p2306 A72-31598

Heavy body mass distribution gravitational effects in nonlocal linear theory, noting refractive index, rosette motion and perihelion advance
15 p2278 A72-32484

Vibration perturbation of slender rotating beam with end masses, using method of matched asymptotic expansions
[ASME PAPER 72-APM-B]
17 p2625 A72-34318

- Large amplitude vibration of a circular plate with concentric rigid mass. [ASME PAPER 71-APMW-11] 17 p2625 A72-34319
- Intergalactic ionized gas and member galaxies mass relationship in local group and nearby galactic clusters, considering gravitational potential 17 p2604 A72-34475
- Transverse vibrations of bars with concentrated additional masses 17 p2627 A72-34772
- Many-body forces and the effect of the matter distribution in the universe to the gravitational constant. 18 p2728 A72-36800
- Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center 19 p2864 A72-38325
- Vibrations of a concentrated mass on a ring coupled to a thin shell 20 p2981 A72-39908
- General relativity equations for hydrostatic equilibrium of spherical distribution of mass combined with equations of state for highly relativistic neutron star central regions 20 p2955 A72-40011
- The effects of discrete masses and elastic supports on continuous beam natural frequencies. 21 p3116 A72-40335
- Multiple scattering of bending waves by random inhomogeneities. 22 p3235 A72-42460
- The estimation of masses of individual galaxies in clusters of galaxies. 22 p3227 A72-42551
- New method for determining the distribution of delta-g anomalies for a sphere, horizontal cylinder, and vertical material half-line 22 p3173 A72-42574
- The parameters of a two-mass oscillatory system in which one of the masses is acted upon by a complex working resistance 23 p3312 A72-43352
- Balancing aerospace bodies on industrial balancing machines. [SAWE PAPER 929] 23 p3293 A72-43469
- Despun conical flight vehicles eccentric insulation mass properties history, deriving preflight and in-flight equations for weight, center of gravity coordinates and moments and products of inertia [SAWE PAPER 938] 23 p3342 A72-43478
- Structural mass properties mathematical modeling for dynamic structural analysis, describing matrix notation for finite element methods application [SAWE PAPER 944] 23 p3344 A72-43484
- The effect of meteoric ion processes on radio studies of meteoroids. 23 p3336 A72-43558
- Numerical models of elliptical galaxy based on rotational speed and integral equations for mass distribution 23 p3338 A72-44033
- Infinite rectangular elastic bar surface mass distribution effects on harmonic wave propagation modes, obtaining approximate solution by expanding displacement as power series 23 p3352 A72-44123
- Interplanetary objects in review - Statistics of their masses and dynamics. 24 p3435 A72-44688
- Determination of parameters related to the interior of Mercury. 24 p3436 A72-44696
- Particle fragmentation, mass distribution and chemical composition of cometary meteoroids in earth orbit, noting collisional erosion and similarity to stony meteorites 24 p3445 A72-45459
- MASS FILTERS**
- U FLUID FILTERS**
- MASS FLOW**
- Laminar flow between stationary and rotating disk with mass flow through concentric circular opening by finite difference method 02 p0203 A72-12098
- Self magnetic coaxial plasma accelerator integral output data, presenting mass velocities and thrust measurement [DGLR PAPER 71-103] 02 p0266 A72-12736
- Turbulence effects in stratified shearing flow, determining relationship between measured mass flux and overall Richardson number 06 p0798 A72-17762
- Laser plasma density and velocity distributions and mass flow from surface and plasma pressure in target heating process based on interferometric measurements 08 p1215 A72-21719
- Mass flow and current distribution in magnetic MPD accelerator thruster plumes calculated from meridional flow stream function equation 11 p1696 A72-26224 [AIAA PAPER 72-501]
- One-dimensional theory of flows with combustion 18 p2740 A72-36246

- Critical mass flow and nonequilibrium nozzle flow of vibrationally relaxing, ideal dissociating diatomic and singly ionizing monatomic gases, using steepest descent method 21 p3046 A72-41249
- Transverse mass flow past a sphere at small Reynolds numbers 21 p3047 A72-41664
- MASS FLOW FACTORS**
- Hydraulic servomechanism spool type control valve orifice flow characteristics, measuring mass flow for various spool determined port shapes 07 p0915 A72-20533
- MASS FLOW RATE**
- Kinetic energy correction in capillary viscometry, observing pressure drops and mass flow rates 02 p0202 A72-11724
- Conducting fluid steady MHD pipe flow under transverse magnetic field, obtaining mass flow rate 03 p0394 A72-13241
- Mass blocking of subsonic isentropic swirling flow through convergent axisymmetric nozzle, considering radial velocity component effect on vorticity 03 p0342 A72-13957
- Heat transfer in rectangular annular channel during external heating under supercritical pressure, discussing thermal flux, mass flow rates and enthalpy 03 p0457 A72-14152
- Electrical measurements on capillary-fed colloid thruster with Zener diode-like I-V characteristic and constant propellant mass flow rate 04 p0565 A72-15204
- Test facility for electric microthrusters, describing microbalance for thrust and propellant mass flow rate measurement 09 p1292 A72-23404
- Modular carbon dioxide laser design and operational features, reporting measured data on plasma tube current, pressure and gas mixture flow rate effects on power output 10 p1492 A72-24565
- Turbojet simulator for supersonic wind tunnel models, simulating inlet mass flow ratio and exhaust nozzle pressure ratio [ASME PAPER 72-GT-89] 11 p1705 A72-25664
- High efficiency hybrid rocket motor based on polyester fuel and RFNA oxidizer, determining correlation between burning rate, oxidizer and total flow rates 15 p2297 A72-31207
- Mass flow rate and mean density measurements in separated laminar boundary layers with large transverse density gradients, analyzing density difference effects on instability 16 p2379 A72-33571
- Compressible swirling flow through convergent-divergent nozzles. 17 p2485 A72-34999
- Centrifugal pumps performance instability, considering mass flow rate/pressure curve characteristics as function of impeller slip, fluid prerotation and hydraulic losses 18 p2694 A72-36042
- Influence of pressure, mass flow rate, and nozzle angle on the chemical relaxation in nozzles 19 p2880 A72-37494
- A study of the liquid-vapor phase change of mercury based on irreversible thermodynamics. [ASME PAPER 72-HT-A] 20 p2983 A72-39481
- Condensation on a downward-facing horizontal rippled surface. [ASME PAPER 72-HT-33] 20 p2983 A72-39485
- Equations of motion for the variable mass flow-variable exhaust velocity rocket. 21 p3112 A72-41559
- Extremal bounds for mass flow rate of laminar MHD flow in circular and thin walled conducting pipes at high Hartmann number 22 p3210 A72-42315
- The dynamical effects of stellar mass loss on diffuse nebulae. 22 p3224 A72-42380
- Solar system thin disk form planet formation in equatorial plane from nebula dust component, discussing gravitational effects and mass increase rate 23 p3335 A72-43261
- An experimental study of film cooling through a rearward-facing slot. 23 p3356 A72-43971
- MASS RATIOS**
- NT PAYLOAD MASS RATIO**
- NT PROPELLANT MASS RATIO**
- Periodic orbit families emanating from Lagrange triangular point L4 in restricted three body problem with mass ratio parameter equal to Routh critical mass ratio 01 p0123 A72-10013
- Inertial-gravitational mass ratio in classical and quantum case, proving equivalence principle non-validity for Brans-Dicke gravitation theory compared to Einstein theory 01 p0102 A72-10861
- Galactic evolution and cosmology implications of primordial solar D/H ratio, discussing deuterium production mechanisms 04 p0574 A72-14980

- Close binary system average gravity and effective temperature at Roche limit for 90 deg phase and both conjunctions, taking into account mass ratios and orbital inclination 06 p0882 A72-18002
- Impact interaction between free two body system with elastic spring coupling and fixed plane, considering mass ratio and velocity restitution coefficient 08 p0299 A72-21803
- Close binary stars system model for totally eclipsing AW UMa light curves and line profiles, noting very low mass ratio 10 p1550 A72-25195
- Spallation origin of anomalous He 3/He 4 ratio in 3 Centauri A, considering thermonuclear processes model 14 p2158 A72-30731
- Earth-moon system mass from ratio of solar mass to sum of terrestrial and lunar masses, discussing solar attraction effects and radar distance measurements 15 p2306 A72-31598
- Internal kinematics of two compact galaxies from spectroscopic observations, noting velocity dispersion, luminosity function and mass/light ratio 17 p2611 A72-35311
- A comparison of measurements of the charge spectrum of solar cosmic rays from nuclear emulsions and the Explorer 35 solid-state detector. 18 p2721 A72-35988
- Star cluster age relation to mass ratios of stars and interstellar hydrogen and dust 19 p2867 A72-38511
- Gross properties of five Scd galaxies as determined from 21-centimeter observations. 21 p3105 A72-41027
- A two-parameter survey of periodic orbits in the restricted problem of three bodies. 21 p3106 A72-41049
- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight 23 p3250 A72-43463
- Dynamic behavior of three point mass system with variable body mass ratios and constant total system mass, applying results to stellar systems 24 p3442 A72-45240
- MASS SPECTRA**
- Artificial intelligence application to mass spectra interpretation, discussing heuristic Dendritic Algorithm based computer program to generate structural isomers 07 p0950 A72-19608
- Classification of mass spectra on computers /COM-SOC/ for compound characterization of complex mixtures with geochemical and environmental applications 07 p0980 A72-20393
- Electron impact induced aurene epoxides fragmentation, discussing ion formation, intermediates, thermal rearrangement and mass spectra 13 p1913 A72-29775
- Electron energy distribution, ions mass spectral composition and spatial charge concentration of currentless photoresonant Ce plasma obtained by associative ionization 14 p2136 A72-30175
- Solid bodies microanalysis by mass spectrum microscopy based on secondary ion-ion emission, discussing ion source and focusing systems 14 p2104 A72-30449
- Mass spectra stimulated by O+ and Ar+ interacting with a surface. 24 p3378 A72-45312
- MASS SPECTROMETERS**
- High resolution RF linear mass spectrometer for separation of ions formed by electron impact on organic molecules 01 p0064 A72-10043
- Positive H, HE and O ions in exosphere from mass spectrometers mounted on Elektron 4 satellite 01 p0053 A72-10368
- Miniaturized magnetic mass spectrometer for trace contaminants continuous monitoring and control, discussing applications to closed atmospheric systems in spacecraft and undersea environments [AIAA PAPER 71-1122] 01 p0068 A72-10558
- Equilibrium concentrations of negative ions in nighttime D region, comparing computations to mass spectrometric measurements 01 p0063 A72-10917
- Aeros satellite mass spectrometer, retarding potential analyzer and neutral gas thermograph onboard experiments, noting measurements and data transmission triggering by flight direction sensor [DGLR PAPER 71-093] 02 p0284 A72-12727
- Aeros satellite mass spectrometer design, discussing operation mode ion detection system, power supply, logarithmic electrometer and modulator 02 p0232 A72-12729
- Quadrupole mass spectrometer ultimate characteristics concerning resolution, range, recording speed, working pressure and sensitivity 03 p0360 A72-13665

Lunar mass spectrometer experiment, determining global distributions and diurnal variations of lunar atmosphere

04 p0509 A72-15103

Single breath diffusing capacity and alveolar dead space measurements for carbon 18 monoxide using respiratory mass spectrometer

04 p0480 A72-15215

Rocket-borne mass spectrometer with helium cooled electron bombardment ion source to reduce gas-wall interactions effects

04 p0524 A72-15538

Thermospheric structure between 100 and 400 km from rocket soundings and ground observations, noting mass spectrometers chemical reactions influence on atmosphere model accuracy

09 p1300 A72-23015

Mars atmospheric entry experiments for Viking 1975 mission, discussing onboard neutral gas mass spectrometer and retarding potential analyzer

10 p1540 A72-24381

Rocket-borne mass spectrometer tested in high velocity molecular beam facility for thermospheric atomic oxygen density measurement

11 p1634 A72-26422

Mass spectrometer measurements of hydrogen, helium, nitrogen, oxygen and nitrogen oxide ion concentrations vertical profiles in ionosphere at midlatitudes

11 p1628 A72-26906

Atmospheric ion composition analysis by RF mass spectrometer during rocket ionosphere sounding, discussing meteor ionization layers

15 p2225 A72-31915

Lower thermospheric neutral gas density and composition rocket-borne mass spectrometric measurements with liquid He cooled ion source

15 p2236 A72-31942

Satellite instrument to observe atmospheric composition by energy analysis of incoming gas stream, using velocity mass spectrometer for neutral particles measurement

15 p2236 A72-31966

Mesospheric and lower thermospheric composition from neutral atmospheric particles measured by rocket-borne instrument consisting of RF quadrupole mass spectrometer

15 p2228 A72-31967

An atomic oxygen beam system for the investigation of a mass spectrometer response in the upper atmosphere.

19 p2795 A72-37515

A simple combination mass spectrometer inlet and oxygen electrode chamber for sampling gases dissolved in liquids.

19 p2762 A72-38146

Dissociation of molecular ions formed by charge exchange in an in-line tandem mass spectrometer.

19 p2763 A72-38801

Nozzle beam-mass spectrometer system for studying one-atmosphere flames.

20 p2921 A72-38975

Electronic circuit for linearizing the transfer function of a photographic plate used in mass-spectrometry.

20 p2925 A72-39428

Helium-cooled mass spectrophotograph and frigen-cooled radiometer in a plasma wind tunnel

20 p2928 A72-39929

An integrated multi-purpose biology instrument utilizing a single detector, the mass spectrometer.

23 p3287 A72-43397

MASS SPECTROMETRY

U MASS SPECTROSCOPY

MASS SPECTROSCOPY

Mass spectrometric investigation of high power laser beam plasma on solid target, determining multicharged ion yield, energy, angular distribution and recombination effect

01 p0079 A72-10349

Mass spectroscopic analysis of addition effects of Xe, hydrogen and oxygen on CO-He laser discharge

01 p0079 A72-10517

Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis

02 p0218 A72-11947

Ionospheric ion-molecule and ion-electron reaction rate constants determination from nighttime flight of rocket-borne ion mass spectrometer data least square fitting

03 p0347 A72-13396

Colorado Green River Formation oil shale extracts, determining nitrogenous compounds content with high resolution mass spectrometry

03 p0320 A72-13741

Mass spectrometric studies of solvent extractable acid methyl esters of oil shale from Colorado Green River Formation

03 p0320 A72-13742

Specific quantitative trace analysis technique for solids using spark source mass spectrometry

03 p0361 A72-13849

Apollo 11 lunar fines behavior and gas evolution characteristics from high vacuum differential thermal analysis and mass spectroscopy

04 p0569 A72-14504

Organic materials detection on planetary surfaces with in situ gas chromatography and mass spectrometry

04 p0573 A72-14808

Largest Apollo 15 lunar rock mass spectrometry analyses of noble gases with gas retention age estimation and spallation Kr data

06 p0888 A72-18267

Mass spectral analysis of aliphatic amino acid derivatives, obtaining diagnostic criteria for distinction of alpha, beta, gamma and N-methyl isomers

07 p0935 A72-18905

Gas content determination in metals by melting and vaporizing measured microvolumes using laser microprobe and magnetic mass spectrometer

07 p1006 A72-19549

Gaseous boron dioxide and oxyfluoride heat of formation determination by mass spectroscopy and molecular effusion technique

[AD-740421] 07 p0936 A72-19682

Teflon diffusion membrane for in vivo blood and intramycardial tissue gas tension measurement by mass spectroscopy without chemically bonded heparin surface

08 p1124 A72-20901

Mass spectroscopic measurement of inert gases in Lunik 16 fragments and dust samples

09 p1380 A72-22267

Eu and Sr distribution between coexisting feldspars in acidic rocks, using mass spectroscopic isotope dilution method

10 p1472 A72-24166

Viking Lander mass spectroscopic analysis of organic compounds, water and volatile constituents of Martian atmosphere and surface

10 p1540 A72-24383

Mass spectrometric analysis of positive ions in carbon dioxide laser systems with nitrogen-helium mixture

10 p1492 A72-24411

Rocket-borne mass spectrometric studies of composition of lower thermosphere

11 p1622 A72-25847

Chemical ionizing mass spectrometry with electron bombardment of reactant gas, discussing plasma chromatography

11 p1590 A72-26389

Atmospheric temperature measurement by neutral particle wake method, using satellite-borne mass spectrometer

11 p1634 A72-26408

High vacuum mass spectroscopic analysis of volatile products released under friction from solid synthetic resin lubricants with molybdenum disulfide as antifriction filler

12 p1835 A72-28199

Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis

13 p1949 A72-29259

Mass spectroscopic determination of vapor composition during GaAs and GaP single crystals exposure to ruby laser radiation

14 p2109 A72-30316

Mass spectrometric techniques for collision processes in decaying nitrogen-helium and nitrogen-neon plasmas, obtaining ambipolar diffusion coefficients and reaction rate constants

15 p2283 A72-31299

Thermospheric composition global model for magnetically quiet conditions based onOGO-6 mass spectrometer measurements

15 p2227 A72-31954

Lower thermosphere neutral composition from February 1969 rocket-borne mass spectrometer measurements over Fort Churchill, Canada

16 p2383 A72-32965

IR mass spectrometric study of OBF in Ne and Ar matrices, discussing molecular structure

16 p2360 A72-33223

Positive and negative ions relative intensity measurement during nitrous oxide target molecules injection into sonic Ar plasma reaction channel, using quadrupole mass spectrometer

[AIAA PAPER 72-675] 16 p2440 A72-34064

Mass spectrometer sampling system for measuring effluent concentrations downwind of stacks at various positions in turbulent flow within atmospheric simulation facility

[AIAA PAPER 72-649] 17 p2536 A72-35478

Solid-body-surface and thin-layer analyses by the static method of secondary-ion mass spectroscopy

18 p2719 A72-36830

Lunar volcanic gas release rate estimation from orbiting Apollo spacecraft-borne mass spectrometer detection, noting atmospheric perturbation

19 p2868 A72-38736

Spacecraft atmosphere trace contaminant sensor system using mass spectrometric analysis of contaminants concentrated on sorbents in monitor inlet system

[ASME PAPER 72-ENAV-15] 20 p2896 A72-39162

Recent positive and negative ion composition measurements in the lower ionosphere by means of mass spectrometers.

20 p2917 A72-39528

Neutron activation and mass spectrometry methods for geochemical analysis of rare earth elements in meteoritic, lunar and terrestrial materials

20 p2899 A72-39835

The mass spectrographic measurement of gas separation with the aid of ambipolar effusion in neon-krypton mixtures

21 p3053 A72-40486

Chondrite and achondrite Nb abundance from spark source mass spectroscopic analysis

21 p3104 A72-40492

MASS TRANSFER

Flare region curved absorption lines interpreted as photospheric and chromospheric mass motions

01 p0129 A72-10800

Turbulence intensity effects on mass transfer from cylinders in cross flow at various Reynolds numbers

[ASME PAPER 70-WA/HT-3] 02 p0205 A72-12312

Solar wind induced atmospheric mass loss from magnetic field-free planets, using mass, momentum and energy conservation laws

02 p0275 A72-12465

Coronal magnetic fields effects on energy and mass flux from lower solar atmosphere levels into corona, discussing plasma instabilities, solar flares, radio bursts, etc

03 p0422 A72-13206

Global angular momentum balance, considering atmospheric frictional torques and fluxes, ocean water mass exchanges and seasonal variations effects

03 p0384 A72-14142

Heat and mass transfer equations for unsteady transpiration cooling, taking into account temperature gradient between coolant and surface

03 p0457 A72-14154

Heat and mass transfer processes in systems of bodies with variable phase boundaries, proposing difference scheme

03 p0458 A72-14159

Trimethylchlorosilane film boiling for silicon carbide deposit on vertical heated tungsten filaments, investigating mass transport rate

04 p0595 A72-14600

Quasi-linear parabolic equations loaded system first boundary value problem for heat and mass transfer equations inverse problems

04 p0540 A72-15545

Heat and mass transfer along axially conducting gas controlled heat pipes, discussing wall temperature profiles and condenser characteristics

[ASME PAPER 71-WA/HT-29] 05 p0745 A72-15882

Book on heat and mass transfer, covering research results over 1953-1969 on supersonic aircraft and missiles cooling problems, rarefied gas dynamics boundary layer flow, etc

05 p0747 A72-16399

Turbine blade local heat transfer coefficient calculation with digital computer program and naphthalene blade mass transfer in cascade flow

05 p0747 A72-16498

Heat and mass transfer blowing correction correlations for graphite and charring ablator reentry nosetip and heat shield applications

[AIAA PAPER 72-91] 05 p0748 A72-16810

Mass transfer effects on hypersonic turbulent boundary layer properties from profile measurements on porous cone

[AIAA PAPER 72-184] 05 p0650 A72-16839

Transient compressible heat and mass transfer in porous media, solving coupled nonlinear partial differential equations in finite difference form by iterative technique

[AIAA PAPER 72-23] 05 p0749 A72-16914

Analytical models for predicting mass transfer cooling effects on blade row efficiency of turbine airfoils

[AIAA PAPER 72-11] 05 p0707 A72-16943

Graphite ablation in combined convective and radiative heating, considering mass and energy transfer effects

[AIAA PAPER 72-88] 05 p0750 A72-16954

Shock wave deceleration and boundary layer mass loss effects on electron density and ionization levels of air in shock tube

05 p0700 A72-17225

Numerical solution of supersonic flow past blunt bodies with large mass injection, deriving finite difference equations

06 p0756 A72-18114

Reynolds analogy based correlation method for Stanton number prediction for turbulent heat and mass transfer in smooth tubes

06 p0903 A72-18186

Bulk vapor formation processes during laser beam heating of metals, considering effect on mass transfer

07 p1000 A72-18939

Heat and mass transfer in initial section of circular pipe under stabilized laminar flow, using modified Leveque method

07 p0968 A72-19883

Iterative solution of differential equations for steady plane flow with heat and mass transfer at high Reynolds numbers

07 p0971 A72-20098

Temperature fields and mass and heat transfer at surface of solid spherical particle in laminar viscous fluid flow

07 p0973 A72-20318

Modified mixing length velocity distribution predictions for turbulent boundary layers with uniform mass transfer for low and high Reynolds numbers

08 p1150 A72-21622

Heat and mass exchange in laminar boundary layer in air-carbon dioxide binary mixture under free convection on porous heated vertical surface

08 p1255 A72-21664

Soviet book on heat and mass transfer and friction in gradient fluid flows in variable cross sectioned ducts and at surface of bodies

08 p1152 A72-22022

Free turbulent jet heat and mass exchange and axial flow characteristics

09 p1292 A72-22235

Mass and energy exchange in tropical convective cloud systems from ATS cloud photographs

09 p1344 A72-22430

Burning process of low boiling Mg particle moving in relation to gaseous oxidizer, assuming heat and mass transfer occurrence by diffusion-conduction mechanism

09 p1411 A72-22888

Newton cooling law applicability to unsteady heat and mass transfer approximate calculation for ion exchange process

09 p1412 A72-23685

Heat and mass transfer analogy based on coefficients ratio and boundary layer theory

09 p1412 A72-23686

Book on heat and mass transfer analysis covering conduction, boundary layer and channel flow convection, thermal radiation, rarefied gas mechanics, thermophysical properties, etc

10 p1561 A72-23748

Nonthermal emission and ejection of matter from galactic nuclei, discussing radio, optical and IR synchrotron sources and background radiation

10 p1535 A72-23906

Thin liquid surface water film cooling tests for mass loss under simulated reentry heating and shear conditions

10 p1563 A72-24648

High mass transfer rate effect of foreign gas on transport coefficients in fully developed turbulent flow

11 p1614 A72-25231

Noncoincidence of maximum velocity and zero shear stress due to asymmetric turbulent velocity profiles, considering effect on momentum, heat and mass transfer in noncircular channels

11 p1618 A72-26534

Mass transfer effect on adiabatic wall enthalpy and recovery factors in laminar boundary layer flow at high injection rates, using self similar solutions

11 p1746 A72-26535

Laminar transition and turbulent natural convection mass transfer measurements on inclined and vertical surfaces by electromechanical method

11 p1635 A72-26536

Heat and momentum transfer of binary gas mixture flow in parallel plate channel with mass injection from porous wall, calculating velocity, pressure and temperature distributions

11 p1746 A72-26538

Turbulent gas flow mass transfer coefficient derived from Lapin relation between vertical velocity and concentration distributions in turbulent boundary layer near semipermeable surface

12 p1889 A72-28136

Papers on heat and mass transfer covering physicochemical conversions, transonic gas flow in closed channels, drying theory, turbulent flows, liquid evaporation, electrorheology, etc

13 p2063 A72-28626

Linearized steady motion of gas with mass sources and sinks, determining resonance onset conditions

13 p1893 A72-28731

Equilibrium diabatic Ekman layer geostrophic drag, heat and mass transfer coefficients, presenting velocity and temperature profiles

14 p2100 A72-30346

Radiation pressure on quasar outer envelope material as cause of mass outflow for masses less than gravitational force-determined critical value

14 p2155 A72-30552

Mass exchange and thermal time scales for shell source burning binary components with deep outer convective layers, interpreting numerical results from analytical model

14 p2159 A72-30739

Galactic tidal interactions, computing mass loss for hyperbolic collisions and giant system formation from density distribution models

14 p2161 A72-31043

Mass transfer effect on heat transfer to evaporating droplet, considering mass efflux shielding effect and forced convection flow field

14 p2172 A72-31051

Integral method application to convective flows with axial diffusion, obtaining heat and mass transfer characteristics

14 p2096 A72-31058

Free stream turbulence effect on mass transfer from circular cylinder in cross flow as function of Schmidt and Reynolds numbers, using electrochemical measurement method

14 p2096 A72-31061

Heat and mass transfer in steady viscous flow through curved circular tubes, investigating velocity and temperature profiles

14 p2173 A72-31064

Mass entrainment products effect on radiative and convective heat transfer during decomposition of graphite blunt body in steady hypersonic flow of radiating air

14 p2174 A72-31158

German monograph on mass transport in thin fluid layers covering diffusion, convection, laminar flow rate distribution, flame ionization and gas chromatography measurements, etc

15 p2216 A72-31350

Holographic determination of local convective mass transfer coefficients over flat plate normally impinged with laminar air jet, using swollen polymer transparent coating

15 p2239 A72-32349

Exact boundary layer calculations for heat and mass transfer on cones at angle of attack, considering Mach number, enthalpy ratio and cross flow effects

15 p2337 A72-32591

PTFE thin films interspersal with lumps and streaks from transfer to smooth surface during low speed sliding, discussing friction coefficient under various conditions

16 p2396 A72-32870

Thermodynamic properties of axisymmetric and planar stagnation flows of air with gas injection, taking into account mass transfer effects on heat transfer rate

16 p2477 A72-33428

Boundary conditions influence on heat and mass transfer in low temperature heat pipes with freon as working fluid

16 p2479 A72-33853

Book - The method of weighted residuals and variational principles: With application in fluid mechanics, heat and mass transfer

17 p2573 A72-34250

Measurement of the parameters and the structure of a wet vapor flow with interphase heat and mass transfer in the relaxation zone behind the front of a shock wave

17 p2637 A72-35130

Heat and mass transfer in initial section of circular pipe under stabilized laminar flow, using modified Leveque method

17 p2637 A72-35131

Flow over infinite wedge with mass transfer by boundary suction or injection, solving nonlinear boundary layer equations by parametric differentiation method

17 p2485 A72-35230

Arch prominence outside west limb on 24 April 1971, noting H α alpha monochromatic image, internal motion of matter and radio emission

17 p2614 A72-35503

Heat mass and momentum transport in free turbulent mixing

17 p2543 A72-35638

Turbulent boundary layer with discontinuity in wall temperature and concentration

17 p2638 A72-35746

Book - Investigation of nonstationary heat and mass transfer processes by the net-point method

18 p2740 A72-36248

Evolution of close binary systems with intermediate initial mass ratios

18 p2728 A72-36741

German monograph - A photometric method for measuring the concentration distribution in turbulent boundary layers

19 p2799 A72-37652

Burning of carbon particles in a supersonic chemically active gas flow

19 p2882 A72-38454

Investigation of the transport of electrode metal during welding in a carbon dioxide atmosphere

19 p2810 A72-38588

On the application of perturbation theory for the calculation of molecular constants due to small mass changes and on the determination of force constants from very heavy isotope substitution

19 p2763 A72-38806

The prediction of compressible turbulent boundary-layer flows with mass addition.

[ASME PAPER 72-HT-58]

20 p2914 A72-39658

An analytical solution of wall-temperature distribution for transpiration and local mass injection over a flat plate.

[ASME PAPER 72-HT-57]

20 p2985 A72-39659

Transient laminar free convection in closed spherical containers.

[ASME PAPER 72-HT-37]

Heat and mass transfer in the initial mixing region of confined coaxial laminar jets.

[ASME PAPER 72-HT-22]

A differential interferometer and its application to heat and mass transfer measurements.

[ASME PAPER 72-HT-12]

A two-equation model of turbulence applied to the prediction of heat and mass transfer in wall boundary layers.

[ASME PAPER 72-HT-15]

Prediction of turbulent boundary layer heat transfer with pressure gradient and mass transfer.

[ASME PAPER 72-HT-16]

Heat and mass transfer in Venturi tubes

20 p2928 A72-40048

Results of a study of heat and mass transfer during the purification of helium from nitrogen by the condensation method

21 p3127 A72-40130

Russian book - Heat and mass transfer: A reference book.

21 p3128 A72-40350

Unsteady state description of living corneal mass transport modes, elucidating cornea thickness control mechanism

21 p3001 A72-40912

Investigation by the mass transfer method of the diffusion of nickel at a $1/110^\circ$ surface of tungsten single crystals

21 p3068 A72-40955

Calculation of heat shield with local mass injection in hypersonic flow.

21 p3131 A72-41235

Studies on the convective heat transfer from a rotating disk. VI - Experiment on the laminar mass transfer from a stepwise discontinuous naphthalene disk rotating in a uniform forced stream.

22 p3243 A72-41946

A calculation procedure for heat, mass and momentum transfer in three-dimensional parabolic flows.

22 p3243 A72-41954

Flat compressible turbulent boundary layers of air, predicting foreign gas injection effects on mass and heat transfer Stanton numbers and skin friction

22 p3165 A72-41958

Arbitrary length thin liquid film cooling mass transfer data correlation, accounting for film roughness and entrainment effects

22 p3243 A72-41960

Numerical analysis of the natural convection in a porous medium between two concentric cylinders

22 p3244 A72-42640

Rate of molybdenum solution in carbon-saturated liquid iron.

22 p3193 A72-43027

Descriptive model of the turbulent motion of an isovolumetric fluid

23 p3279 A72-43699

Centaurus X-3 - Possible reactivation of an old neutron star by mass exchange in a close binary.

24 p3439 A72-44976

MAST SHOCK TUBES

U MAGNETIC ANNULAR SHOCK TUBES

MATCHING

Least squares and point matching techniques compared for solution of two dimensional steady state heat conduction problems with irregularly shaped boundaries

[ASME PAPER 71-HT-P]

Visual and haptic perception in angle reproduction matching task, noting performance differences relation to nature of form discrimination and task

10 p1433 A72-25126

MATERIAL ABSORPTION

Hydrogen diffusion kinetics in Nb under various temperatures during gas-metal absorption experiments, observing room temperature hardness profile

01 p0087 A72-11026

Nitrogen interaction with Ni-based melts at 1600 C, noting absorption rate dependence on nitrogen diffusion rates and melt viscosities

07 p1011 A72-19546

Thermodynamic analysis of metal surfaces covered by electropositive adsorbates.

18 p2656 A72-36126

Spacecraft functional properties degradation due to surface contamination with outgassing vapors, discussing contaminant materials transport and sorption characteristics

23 p3254 A72-43619

MATERIAL BALANCE

NT WATER BALANCE

MATERIAL REMOVAL [MACHINING]

U MACHINING

MATERIALS EROSION

U EROSION

MATERIALS HANDLING

NT GROUND HANDLING

NT PROPELLANT TRANSFER

NT REMOTE HANDLING

Vacuum handling system for lunar materials thermophysical properties measurements under contamination preventive conditions 04 p0509 A72-15496

Asbestos reinforced plastics safe handling and manipulation ensured by regulations provided precautions 11 p1583 A72-25549

Air cargo growth potential, marketing and profitability, considering need for improvements in ground handling, rate structure, container standardization, documentation, etc 13 p1896 A72-28452

Terminal handling environment and air cargo requirements for noncontainerized freight 16 p2372 A72-33175

Book - Industrial robots - A survey: Details of construction, performance, prices, and applications / Enlarged edition/ 22 p3183 A72-43099

Boeing 747-F cargo aircraft, describing onboard and ground facilities for freight handling and loading 23 p3278 A72-43245

Air freight ground handling and distribution terminal facilities and methods, discussing future technical and organizational developments for efficient handling of increased traffic volume 23 p3358 A72-43246

Feeder for the supply of powder materials to spraying setups 23 p3278 A72-43293

Flying crane helicopters utilization in construction industry for materials transport and structural erection work, discussing technical and economic aspects 23 p3251 A72-43637

The heavy lift helicopter - An operations research/technology/performance blend. 24 p3466 A72-44581

MATERIALS RECOVERY
NT WATER RECLAMATION
Rolling operations in vacuum for protection of metallic materials underprocessing 11 p1645 A72-26867

MATERIALS SCIENCE
Materials science historical development from ancient theories of structure of matter to modern atomic and field theories leading to general theory of elastic continuum 02 p0297 A72-12611

Transparent rain repellent polymer coatings, discussing water repellency theory, polymer chemical structures, adhesion to glass surfaces and evaluation methods 03 p0381 A72-14237

Materials research for investment cast turbine wheel, investigating Fe base specimens 05 p0666 A72-16496

Materials selection problems due to wide variety of new products, discussing technologically and economically optimal decisions on product design, development and future substitutions 06 p0906 A72-18255

Soviet book on nonmetallic material strength during nonuniform heating covering, load endurance, bending phenomena and thermal stability of fiberglass, pyroceramics and reinforced plastics 06 p0796 A72-18521

NASA materials science and manufacturing in space program involving space shuttle reusable equipment and weightlessness applications experiments 06 p0797 A72-18621

Laboratory metal corrosion testing, considering reasons, conditions and damage assessment 08 p1189 A72-22104

Electron microscopy and structure of materials - Conference, University of California, Berkeley, September 1971 11 p1666 A72-26926

Materials science - Conference, Los Angeles, April 1972 12 p1833 A72-28076

Macroparametric, microstructural and general rationales methods for fatigue resistant materials, noting crack propagation and fracture mechanics 14 p2120 A72-30612

Materials characteristics relevance for USAF technology, discussing processing conditions, environment simulation, real time techniques, ultrasonic and X ray inspection methods, etc 16 p2404 A72-32823

Carbon-carbon composite process and fabrication techniques, discussing heat treatment effects and physical properties correlation to material structure 17 p2561 A72-35666

Book - Treatise on materials science and technology, Volume I 18 p2718 A72-36392

Book - Annual review of materials science. Volume I 19 p2843 A72-37441

Isolator elastomers properties, discussing spring isolators, combination springs and pneumatic systems 19 p2806 A72-37550

Essential factors in reliability prediction and stress analysis of structural component with wide load and temperature variations 19 p2874 A72-37710

Time spectrum and angular distribution for positron annihilation studies of electron structure and phase transformations of materials 19 p2845 A72-38401

Japan Congress on Materials Research, 15th, Tokyo, Japan, September 1971, Proceedings. 20 p2935 A72-38877

Interamerican Conference on Materials Technology, 3rd, Rio de Janeiro, Brazil, August 14-17, 1972, Proceedings. 20 p2936 A72-39201

Structure-property relationships in polymeric materials. 20 p2944 A72-39212

Factors affecting acoustic emission response from materials. 20 p2924 A72-39279

Russian book - Handbook of aircraft materials. 21 p3072 A72-40459

Environmental characteristics and advantages of manufacturing in space, considering gravity, vacuum, temperature, pressure and radiation effects on materials and products processing 21 p3060 A72-40968

A non-equilibrium thermodynamic theory of simple materials based on a single-integral entropic functional. 21 p3124 A72-41505

The effect of a thermal and ultrahigh vacuum environment on the strength of precompressed granular materials. 22 p3173 A72-42528

Book - Fracture: An advanced treatise. Volume 7 - Fracture of nonmetals and composites. 23 p3345 A72-43501

Brittle ceramic materials strength, showing porosity effect dependence on Weibull homogeneity parameter value 23 p3306 A72-43750

Materials creep behavior and elevated temperature design. 24 p3453 A72-44553

Book - A review of the science of fibre reinforced plastics. 24 p3417 A72-44674

MATERIALS TESTS
Ground test determination of design data for low supersonic high density air deployable deceleration systems, considering high strain rate effects on parachute materials 01 p0005 A72-10313

Statistical methods application to parachute materials evaluation, using factorial experiments for multiple variables simultaneous effects analysis 01 p0005 A72-10317

Aerospace wire and cables testing methods standards for evaluating mechanical, electrical and chemical properties, coating thicknesses, continuity flaws, flammability, geometrical characteristics, etc [SAE AS 1198] 01 p0006 A72-10384

Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core 01 p0138 A72-10723

Impact sensitivity of space shuttle materials in liquid and gaseous oxygen at high pressures 01 p0102 A72-10772

Material characteristics effect on compaction behavior of metal powders, stressing density and pressure measurements 02 p0242 A72-11460

Polycarbonate yield locus from strain rate, creep, isotropy, isoclinic and reloading tests on perforated plates [SESA PAPER 1819] 02 p0248 A72-11501

Papers on metal fatigue damage covering basic mechanisms, detection, field practices for repair, avoidance and control 02 p0295 A72-12495

Acoustic emission techniques in defect structure materials tests, discussing fracture strength, crack propagation, fatigue, plastic deformation and creep in metals, composites and rocks 03 p0362 A72-13225

Flammability smoke hazards and combustion product toxicity tests of plastics [PI PAPER 2] 03 p0379 A72-13243

Aircraft interior materials selection relative to fire hazards and smoke emission properties [PI PAPER 18] 03 p0380 A72-13249

Thermography capabilities and limitations for design analysis and quality control in nondestructive testing of material test vehicle carbon-carbon composite cones 03 p0364 A72-14026

Nondestructive testing for materials inspection and monitored aircraft maintenance programs 03 p0364 A72-14201

MATERIALS TESTS
Materials spectral emission properties measurement, comparing with absolute black body model 04 p0596 A72-14652

Quality control of powdered metal parts, considering chemical, atomization, electrolytic and mechanical production stages, tool inspection and test patterns 06 p0822 A72-18070

Low temperature test facility for cryogenic and rocket materials under combined tension and torsion 06 p0797 A72-18648

Explosive shock loading effect on materials mechanical properties, describing test equipment 06 p0797 A72-18659

Two-fold congruency tests of penetrant inspection system sensitivity using hydrophilic and lipophilic removers/emulsifiers/ 07 p0995 A72-19650

Real time computer aided mechanical testing and data analysis system for composites, confirming computer analysis by motion pictures of thin walled graphite/epoxy composite fracture 07 p0965 A72-19734

Fatigue life gages to determine cumulative fatigue damage due to variable cyclic strain history on unmatched materials 08 p1163 A72-20915

Materials ideal strength calculation compared with test results 08 p1242 A72-21185

Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests 08 p1126 A72-21585

Interlaminar shear testing of composite materials, discussing short beam, scissor and torsional methods [PI PAPER 7] 09 p1337 A72-22542

Material testing by holographic interferometry, discussing application to early detection of delayed cracking, fatigue damage and bond imperfections 10 p1482 A72-24575

Space and ground environments effect on cryogenic multilayer insulation materials, tabulating mechanical and thermophysical test data [AIAA PAPER 72-286] 11 p1741 A72-25225

Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory [AIAA PAPER 72-313] 11 p1743 A72-25247

Venus probes thermal insulation materials development and testing under simulated Venus atmospheric conditions [AIAA PAPER 72-368] 11 p1744 A72-25393

Reusable external insulation materials for space shuttle thermal protection, evaluating local heat transfer at interface areas in plasma arc test facility [AIAA PAPER 72-388] 11 p1744 A72-25409

Composite materials testing and design - ASTM Conference, Anaheim, California, April 1971 11 p1670 A72-25452

Rolled polycrystalline metal samples principal anisotropy direction determination by acoustic measurements at ultrasonic frequencies 12 p1806 A72-27086

Long term high temperature test machine to record structural changes of materials 12 p1795 A72-27464

Fracture toughness of high strength alloys, discussing rocket motor cases, nondestructive test standards and subcritical crack growth 12 p1829 A72-27656

High modulus fiber composite circular tube specimens multiaxial load testing, noting gripping methods to reduce transitional strains 12 p1886 A72-28000

Material fatigue failure criterion during cyclic loading, noting energy dissipation and resonant frequency roles 12 p1888 A72-28250

Materials selection for contact and clearance type seals for various environment conditions [ASLE PREPRINT 72AM 23] 13 p1964 A72-28975

Thermostat for electrical measurements of high resistance materials in air up to 1200 C 13 p1957 A72-29274

Lightning current tests of aircraft glass/carbon fiber reinforced plastics materials 13 p1898 A72-30040

High speed testing of materials mechanical behavior over range of loading rates 14 p2165 A72-30441

Pure shear testing method and apparatus, verifying validity of method by chromoplastic test specimens 16 p2469 A72-33231

Testing method for materials exposed to explosive forming, noting applications in study of formability, heat treatment effects and crack initiation 16 p2391 A72-33235

Surface crack detection in ferrous and nonferrous metals, glass, ceramics and plastics by water-washable dye penetrants process 16 p2397 A72-33239

Evaluation of sublimed molybdenum collector coatings for additive diode operation. 18 p2646 A72-36202

- A mechanical pulsator for testing plastics with the capacity for adjusting cyclic and mean load during test 18 p2676 A72-37097
- New method for determining the integral radiative capacity of partially transparent materials at high temperatures 18 p2704 A72-37190
- Nondestructive testing of advanced composites. 19 p2799 A72-37669
- On the fatigue crack propagation in polymeric materials. 20 p2943 A72-38886
- On the plastic behaviour of time dependent materials - Theoretical and experimental investigation. 21 p3124 A72-41504
- Postoperative states of turbine disk alloys at 280-500 and 550-630 C, noting lower durability values 23 p3347 A72-43737
- Investigation of the state of the structure of turbine-disk materials after operation 23 p3302 A72-43965
- Ultrasonic defect detection and evaluation techniques, stressing limitations for defect geometry, size and nature 24 p3408 A72-45294

MATHEMATICAL ANALYSIS

U APPLICATIONS OF MATHEMATICS

MATHEMATICAL LOGIC

- NT ALGORITHMS
- NT AXIOMS
- NT BOOLEAN ALGEBRA
- NT BOOLEAN FUNCTIONS
- NT BOREL SETS
- NT EQUIVALENCE
- NT FORMULAS [MATHEMATICS]
- NT LATTICES [MATHEMATICS]
- NT SET THEORY
- NT THRESHOLD LOGIC
- Probabilistic logic method, concepts and elementary operations in combining Boolean algebra and probability theory 08 p1197 A72-20869
- Truth table classification and numerical identification of character patterns of elements in groups and clusters 09 p1265 A72-22644

MATHEMATICAL MODELS

- NT ANALOG SIMULATION
- NT DIGITAL SIMULATION
- NT THOMAS-FERMI MODEL
- NT VENEZIANO MODEL
- Planetary atmosphere IR radiative transfer model using matched asymptotic expansions method 01 p0125 A72-10099
- Warm inhomogeneous plasma models perturbation analysis, computing high frequency oscillation and eigenfrequencies and eigenfunctions formulas 01 p0106 A72-10134
- Model with large Lorentz factor and relativistic relations violations to explain theoretical estimate disparity with experimental data for high energy primary cosmic rays 01 p0118 A72-10156
- Sound propagation and absorption mechanism in liquid-base foams explored by bubble pulsation and coupling mathematical model and distributed parameter mechanical analog 01 p0115 A72-10161
- Shock isolator model, using passive elements and variable Coulomb friction force to minimize transmitted shock and relative displacement 01 p0047 A72-10218
- Kalman filtering process digital simulation by numerical integration of matrix differential equations describing linear system random process model and optimal filter 01 p0024 A72-10225
- Aerial focal plane shuttered camera high velocity images mathematical model based on collinearity equations, incorporating translational and rotational camera motion during exposure for image motion compensation 01 p0066 A72-10461
- Mathematics for pattern recognition, discussing perception, combinatorics and statistics, feature selection, cybernetic methods and fuzzy sets 01 p0034 A72-10465
- Microwave propagation on nonlinear transmission lines by examination of energy dissipation in shock front, considering distributed and lumped-parameter models 01 p0029 A72-10692
- Bipolar transistor model for device and circuit performance prediction, determining parameter from charge distribution by regional approximation technique 01 p0042 A72-10786
- Mathematical model of porosity gas transport test for automated fusion welding operation using mass spectrometer 01 p0076 A72-10815
- Planetary quarantine cost and mission success constraints, formulating mathematical models for international goals and implementation systems 01 p0019 A72-10819

- Open magnetosphere mathematical models application to dayside auroras, investigating interplanetary magnetic field topology 01 p0060 A72-10885
- Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation 01 p0130 A72-10964
- Statistical model for communication probability estimate based on signal-to-interference and SNR criteria 01 p0031 A72-10997
- Physical inconsistencies of mechanico-mathematical concepts of metal deformation, considering friction forces, lubricant action and plastic tensors and deviators 01 p0102 A72-11077
- Atmospheric primary and secondary cosmic ray propagation with close reference to two-fire-ball, H-quantum and excited baryon models of multiple meson production 01 p0121 A72-11122
- Monte Carlo simulation on high energy cosmic ray propagation and multiplication in high altitude emulsion chamber observations, examining two-fire-ball and H-quantum models 01 p0121 A72-11123
- Hydraulic analogy application to heat conduction problems, considering seepage and network pipe flow models for complex heat flux phenomena representation 01 p0145 A72-11174
- Experimental development of homogeneous field of plane stresses gripped in biaxial traction, considering convex models under constraint 01 p0142 A72-11176
- Lateral spatial interactions of sensory receptors, discussing mathematical theory for monocular visual inputs described by real valued functions on continuum 01 p0021 A72-11196
- Spatially homogeneous rotating and expanding universe models, deriving Lagrangian function from Einstein field equations 01 p0103 A72-11260
- Energy spectrum equations for steady state turbulent convection model based on Heisenberg statistical theory, noting application to convection in planetary and stellar atmospheres 01 p0146 A72-11311
- Coaxial flow gaseous core nuclear reactor system dynamic analysis, developing mathematical model and equations solution by computer program 01 p0100 A72-11352
- Bidirectional scattering of electromagnetic waves from rough surfaces in plane of incidence restricted only by tangent plane approximation, comparing with other models 02 p0170 A72-11467
- Irredundant multiple output combinational logic network fault detection and diagnosis theorems derivation from structural models in labeled direct graph form 02 p0184 A72-11478
- Mathematical reliability modeling for fault tolerant digital computers, summarizing error masking and standby sparing reliability equations 02 p0184 A72-11481
- Ultrareliable fault-tolerant digital computer design with protective standby replacement and hybrid redundancy, presenting mathematical models for system reliability evaluation 02 p0185 A72-11487
- Reliable combinational logic networks, deriving conditions for fault locatability from directed graph formal model 02 p0185 A72-11491
- Three dimensional heat conduction behavior in laminated composites calculated from continuum model using asymptotic developments 02 p0300 A72-11547
- Second order Markov process statistical model for gravity anomalies in local region, applying to error analysis in inertial navigation system computerized simulation 02 p0207 A72-11596
- Creep theory by rheonomic body interpretation as controlled system with unknown vectors at input and output, obtaining stress-strain curves for experimental verification 02 p0289 A72-11620
- Aerodynamic multivariable function generation in real time simulation of high performance missile 02 p0186 A72-11656
- Mathematical model for control process as adaptive memory tracker, discussing digital simulation 02 p0186 A72-11659
- Single malfunction diagnosis models in systems failures, describing fixed and sequential testing schedules 02 p0186 A72-11689
- Plasma physics computer simulation of double stream and beam instabilities, wavelength nonlinearities and velocity distribution, using superparticle and Vlasov equation models 02 p0263 A72-11691

- Mathematical analogy between nonequilibrium and viscous inert transonic flows for reacting mixtures with relaxation and freezing 02 p0150 A72-11736
- Computerized statistical identification of aerial photograph ground patterns, comparing elliptical boundary condition with minimum distance to mean classification models 02 p0187 A72-11842
- Composite scattering theory mathematical model for radar backscattering cross section relation to ocean surface conditions and wind velocity 02 p0172 A72-11868
- Satellite-borne radar altimetry pulse compression, discussing signal return statistics, receiver models and detected waveshape relation to altitude, attitude and antenna beamwidth errors 02 p0172 A72-11870
- Thermal modeling for IR images geologic interpretation, discussing physical parameters role in materials natural environmental diurnal temperature behavior 02 p0214 A72-11877
- Extended Thomas-Fermi isolated atom model for pulsar outermost crust magnetic field effects, using pressure-density equations of state 02 p0277 A72-11903
- Three dimensional angle dependent model for three body problem, considering exact quantum mechanical reactive scattering cross sections 02 p0262 A72-11911
- Random processes models based on Poisson sequences extended to simultaneous asymmetry and probability density function excess, establishing asymptotic relationships 02 p0216 A72-11919
- Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes 02 p0217 A72-11932
- Oxygen distribution in human brain under counter-current capillary blood flow conditions, presenting mathematical simulation for transport in Krogh system 02 p0168 A72-12037
- Chlorella growth rate model, presenting specific photosynthetic and urea and carbon dioxide utilization rates 02 p0160 A72-12038
- Mathematical model for radiation damage cross section linear energy transfer dependence, explaining experimental values of relative biological effectiveness [CERN 71-16] 02 p0160 A72-12052
- Turbulent flow development in concentric annuli from modified Reichart integral equation model for eddy diffusivity of momentum 02 p0203 A72-12103
- Nonlinear theory of cascaded two-way coherent spacecraft tracking system model, obtaining steady state probability density functions of phase and Doppler error 02 p0174 A72-12137
- TWT small parameters measurement for gain calculation, using equivalent transmission line model 02 p0193 A72-12229
- Elastic continuous media nonlinear models approximation, obtaining Euler-Lagrange functions 02 p0259 A72-12234
- Isotropic incompressible turbulence numerical simulation, presenting algorithm for convolution sums calculation 02 p0205 A72-12367
- Helium shock wave two step collisional ionization model comparison to observed profile data from laser Fabry-Perot interferometer 02 p0266 A72-12368
- Gravity model for spacecraft orbit prediction with gravitational anomalies, discussing gravity dipoles and disturbing acceleration tangential component [AAS PAPER 71-375] 02 p0283 A72-12424
- Anelastic solid energy dissipation linear memory models based on viscoelasticity theory, applied to earth and metals experimental data and dynamic loading problems 02 p0294 A72-12447
- Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes 02 p0269 A72-12552
- Size determination for stationary space charge clouds in streaming media from theoretical model of tanks filled with electrostatically chargeable inflammable fluids 02 p0261 A72-12554
- Book on mathematical fluid dynamics covering viscous and ideal fluid motion, boundary theory, constitutive equations, hydrodynamics and kinematics 02 p0206 A72-12623
- Circular cylindrical sandwich panel and rectangular sandwich plates dynamic stability under periodic external loads derived from mathematical model 02 p0298 A72-12664
- Mathematical model for research payoff estimation by internal rate of return method used by large corporations for project evaluation 02 p0305 A72-12695

- Turbulent supersonic separated flow field analysis and pressure measurements for two dimensional and axisymmetric internal and external flow models [DGLR PAPER 71-076] 02 p0152 A72-12710
- Closed boundary layer separation regions in super- and hypersonic flow, deriving mathematical model for neutral stability curves calculation [DGLR PAPER 71-065] 02 p0153 A72-12715
- Chapman uniform electrical conductivity core model for geomagnetic disturbance daily variations due to solar wind, noting error in analysis 02 p0222 A72-12794
- Multivortex model of vortex sheet development on slender axisymmetric bodies at angle of attack 03 p0307 A72-12919
- Human arm arterial pressure and flow pulsations numerical analysis, constructing electrical analog circuit from mathematical model 03 p0317 A72-12951
- Mathematical models for man-machine control behavior in biodynamic environments including manual control performance and interface elements 03 p0318 A72-13162
- Differential and difference equations approximate solutions in finite state machine form, developing adaptive gain changer model in aircraft stability control system 03 p0338 A72-13164
- Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations 03 p0442 A72-13189
- Statistical model of small scale discrete structure of magnetoplasma in solar active regions 03 p0430 A72-13335
- Homogeneous isotropic elastic medium free vibration in unbounded space, obtaining relativistic relations in wave field from mathematical model 03 p0389 A72-13425
- Equivalent circuit models in semiconductor transport for thermal, optical, Auger-impact and tunneling recombination-generation-trapping processes [AD-740495] 03 p0401 A72-13585
- Steels fatigue life tests as function of stress level, confirming Wohler curves mathematical model 03 p0373 A72-13673
- Optimization algorithms synthesis models, discussing conceptual-implementable transition 03 p0327 A72-13702
- Angular momentum conservation law compliance of generalized triple configuration model for spin-detonation nucleus, assuming transverse Chapman-Jouguet wave 03 p0342 A72-13734
- Iterative hysteretic model for calculating magnetization distribution in thin magnetic layer for digital recording systems [IEEE PAPER 14.7] 03 p0328 A72-13769
- Mathematical model for design of plated-wire magnetic memory cell, considering drive requirement minimization as criterion [IEEE PAPER 21.1] 03 p0328 A72-13777
- Plate under projectile impact, calculating motion response due to random initial velocity distribution over surface by stochastic model 03 p0447 A72-13852
- Combustible fuel-air mixture laminar and turbulent flame propagation mathematical model, with reference to detonation and prevention 03 p0456 A72-13876
- Isotopic heat source unit multiple elliptical orbit reentry unperturbed by solar-lunar gravitational forces, deriving analytical model of grazing trajectories, aerodynamic heating and thermochemical ablation 03 p0457 A72-13959
- Computer modeling technique for electromagnetic scattering and radiation problems in resonance region employing thin wire electric field integral equation 03 p0328 A72-14028
- Mathematical modeling methodology for communication receiver life cycle EMC decisions, considering analysis and prediction problems with emphasis on nonlinear circuits and systems 03 p0324 A72-14034
- Computer aided intrasystem electromagnetic compatibility prediction programs, discussing mathematical models and program philosophies 03 p0328 A72-14039
- LSI/MOS logic circuits radiation effects prediction from modeling studies of individual devices on test chip 03 p0334 A72-14087
- Statistical thermodynamics models for determining vacancy concentration and atoms and vacancies arrangement in metals and alloys under thermal equilibrium 03 p0378 A72-14255
- Hydrogen diffusivity in Fe with cavities at room temperature calculated by mathematical model and numerical methods 03 p0378 A72-14256
- Turbulent particle diffusion statistical mechanical model, using random walk 03 p0344 A72-14331
- Mathematical models of elastic shells and rods, discussing virtual work, operator classifications, deformations and constitutive equations 03 p0454 A72-14344
- Radar signal processing by digital computer modeling, presenting apparent target splitting probability and azimuth estimate distribution for shifting window target detectors 03 p0326 A72-14361
- Mathematical model for two-stream instability induced anomalous resistivity and heating in plasma with equal initial electron and ion temperatures in static electric field 04 p0554 A72-14402
- Two dimensional solar cell model with partial differential equation relating arbitrary point potential to cell parameters for I-V characteristics prediction 04 p0465 A72-14480
- ATC for North Atlantic air transportation, emphasizing collision risk model for safety standards assessment 04 p0544 A72-14484
- Computer model of dislocation motion acted on by viscous drag through point obstacle array for tensile stress and shock deformation tests [AD-737978] 04 p0584 A72-14528
- Microwave breakdown prediction models for antenna system in ionized reentry environment 04 p0486 A72-14531
- Kinetic-analytical models for nitric oxide formation in combustion processes, evaluating heterogeneous effects [WSCIP PAPER 71-28] 04 p0482 A72-14581
- Nuclear rocket time optimal start-up using distributed parameter system model with linear control and nonlinear state 04 p0547 A72-14672
- Analytical model for acoustic impedance of perforated plate liner with multiple frequency excitation, discussing effects of fluid motion, grazing flow and spectral excitation 04 p0548 A72-14699
- Human and animal controlled self rotating maneuvers during free fall, comparing theoretical motion analysis with photographs of falling cats 04 p0478 A72-14709
- Photochemical electron transfer evolution models, noting titanium and zinc oxides as photosensitizers 04 p0484 A72-14777
- Extended iterative weighted least squares estimation of coefficients for linearly independent component signals in linear model 04 p0539 A72-14913
- Large amplitude whistler mode wave packet multiple emissions model including wave-particle interactions 04 p0517 A72-14948
- Large linear time invariant dynamic control system optimum simplified model based on performance index connecting feedback errors 04 p0506 A72-15113
- Cyclic strain accumulation induced creep behavior prediction via plasticity model, considering non-homogeneous stress states [ASME PAPER 71-APM-NN] 04 p0589 A72-15179
- Fiber reinforced composites with transversely isotropic constituents, discussing various mathematical models for elastic constants calculation 04 p0590 A72-15189
- External biodynamic models for human mechanical response to various environmental forces, emphasizing injury mechanisms 04 p0481 A72-15266
- Bipropellant fuel droplets combustion in oxidizing atmospheres from spherico-symmetrical nonconvective quasi-steady state model, discussing supercritical pressures and forced convection probability 04 p0596 A72-15273
- Cross correlation model for interpreting empirical results on binaural noise masking level differences in sinusoidal signal detection, comparing with equalization-cancellation model 04 p0550 A72-15296
- Boltzmann equation collision integral statistical models, solving shock structure in monatomic gas 04 p0513 A72-15339
- Arrhenius model and graphical methods for temperature accelerated life tests in electrical insulation systems 04 p0500 A72-15364
- Mathematical model for reciprocal and nonreciprocal magneto-optical effects in magnetized ferrite-filled microstrip transmission lines 04 p0502 A72-15434
- Mountain barrier and convective area minimum size determination for numerical forecasting models, reducing primitive equations system to advection difference equation 04 p0544 A72-15459
- Markov model random variation optimal periodicity in preventive maintenance operations, estimating distribution density and moments 04 p0527 A72-15574
- Earth mantle shear velocity model derived from S waves travel time gradient direct measurement, disregarding deep depth lateral homogeneity assumption 04 p0519 A72-15578
- Book on similarity laws and modeling covering dimensional analysis, transformations, differential equations, gas flows and nonequilibrium processes 04 p0513 A72-15675
- Integrated data processing system organizational model methodology for individual firms, emphasizing interdependence on program groups 05 p0632 A72-15815
- Rarefied gases thermal energy diffusion model, using radiative transfer electrical network analog [ASME PAPER 71-WA/HT-4] 05 p0743 A72-15865
- Nonequilibrium stagnation heat transfer mathematical models for injecting He, Ar or H into ionizing air laminar viscous layers at low Reynolds numbers [ASME PAPER 71-WA/HT-18] 05 p0744 A72-15877
- Analytical model for living biological tissue transient heat transfer, taking into account conduction, storage, generation, convection and blood flow effects [ASME PAPER 71-WA/HT-36] 05 p0620 A72-15887
- Gas turbine combustors performance model, using reaction rate equation from elementary mass balance equation [ASME PAPER 71-WA/GT-5] 05 p0704 A72-15898
- Spiral groove shaft vacuum seals, presenting mathematical ballpark performance model [ASME PAPER 71-WA/PID-5] 05 p0664 A72-15914
- Theoretical model for turbulent mixing of confined jet, including wall boundary layer [ASME PAPER 71-WA/FE-31] 05 p0646 A72-15925
- Incompressible turbulent flow in parallel-plate channel with one porous bounding wall, using velocity slip model [ASME PAPER 71-WA/FE-1] 05 p0647 A72-15939
- Dutch monograph on heat transfer of gas with vibrational relaxation at shock tube end wall covering mathematical model, induced velocity effect on pressure, etc 05 p0648 A72-16045
- Computerized simulation techniques for plasmas, discussing electrostatic particle model properties and implications 05 p0694 A72-16058
- Pattern recognition by automatic clustering methods without fixed definitions for number and specification of classes, using sequential diagnosis 05 p0632 A72-16075
- Stability characteristics of finite difference schemes based on lumped-parameter model and numerical integrator for wave propagation in continuous media 05 p0735 A72-16081
- Pressure source model of sound radiated by sonic jet, deriving frequency spectra ratio and jet pressure 05 p0600 A72-16105
- Book on computer applications to engineering analysis covering mathematical models, numerical techniques, program usage, programming and design 05 p0632 A72-16106
- Quasi-steady continuous process adaptive optimal control, discussing algorithms and model for sensitivity matrix calculation and digital simulation for strategy 05 p0640 A72-16200
- Fluid motion model with gas bubbles, noting energy dependence on temperature and density 05 p0649 A72-16224
- Charged particle acceleration by nonstationary sinusoidal electric fields in earth magnetosphere based on mathematical model 05 p0709 A72-16256
- Generalized cellular automata simulation by mathematical model network of identical automata with two states 05 p0641 A72-16317
- Linear dynamic control system identification by local impulse response approximation, comparing with Goodman-Reswick model 05 p0641 A72-16319
- One dimensional bipolar junction transistor, comparing charge control and regional mathematical models for suitability in device and circuit computerized analysis and design 05 p0636 A72-16359
- Large launch vehicle attitude control system absolute stability mathematical model, using quadratic Liapunov function for exponential property description 05 p0728 A72-16475
- Mathematical model for blood leucocyte population changes after radiation exposure within Blair model leucocytes hemopoietic to cardiovascular systems transport 05 p0618 A72-16635
- Slat-airfoil combinations aerodynamics modeled by single point vortex to represent leading edge slat, discussing on-line computer graphics program [AIAA PAPER 72-221] 05 p0603 A72-16798
- Vortex production of intense localized heating to leeward regions of bodies in hypersonic flows, proposing flow field models [AIAA PAPER 72-77] 05 p0604 A72-16804

Finite difference integration based on theoretical model analysis of three dimensional turbulent boundary layer on sharp cone at angle of attack in supersonic flow
[AIAA PAPER 72-187] 05 p0650 A72-16842

Computerized analytical model of two dimensional multicomponent airfoil in viscous subsonic flow
[AIAA PAPER 72-2] 05 p0606 A72-16861

Atmospheric turbulence incompressible two dimensional model, comparing Navier-Stokes equations numerical integration results with finite difference simulation
[AIAA PAPER 72-152] 05 p0651 A72-16871

Analytical model of thermal/structural optimization for long term storage cryogenic propellant systems
[AIAA PAPER 72-142] 05 p0691 A72-16881

Theoretical model for radiating metallic gas produced around iron meteor entering earth atmosphere, presenting temperature, pressure and density distributions
[AIAA PAPER 72-204] 05 p0721 A72-16884

Turbulent boundary layer analogy mathematical model for turbulent mixing and buoyancy effects on aircraft trailing vortex wake motion and persistency
[AIAA PAPER 72-42] 05 p0607 A72-16903

Heat pipe temperature gradient initial conditions for ideal gas model, introducing two phase Mach number for choking phenomena analysis
[AIAA PAPER 72-22] 05 p0749 A72-16913

Mathematical model for radiative transfer properties of high albedo carbon dioxide and water cryodeposits on opaque substrate
[AIAA PAPER 72-58] 05 p0749 A72-16929

Analytical models for predicting mass transfer cooling effects on blade row efficiency of turbine airfoils
[AIAA PAPER 72-11] 05 p0707 A72-16943

Adaptive model following control systems design by hyperstability approach for flight control and simulation
[AIAA PAPER 72-95] 05 p0613 A72-16956

Finite difference model application to supersonic planar viscous near wake, determining parameter range by physical and numerical restraints
[AIAA PAPER 72-115] 05 p0609 A72-16971

Lattice gas critical point and nonanalytical three dimensional models comparison with experimental data
05 p0691 A72-17062

Multistage axial flow compressor adjustment by flow geometrical dimension changes obtaining influence coefficient from linearized mathematical model
05 p0708 A72-17064

Multistage gas turbine flow area dimension change influence coefficient calculation from discrete nonlinear mathematical model through equation linearization
05 p0708 A72-17065

Characteristic functional for random delayed events and cluster processes, using Blanc-Lapierre statistical model
05 p0693 A72-17079

Damping effect in discrete one dimensional nonlinear lattice model leading to weakly dissipative Korteweg-de Vries equation
06 p0838 A72-17301

Bright O₂ and carbon dioxide emissions in Martian airglow from temperature profile models based on Mariner UV spectrometry
06 p0803 A72-17446

Coordinated characterization and mathematical modeling for device, circuit and system designs and computer analysis, applying to bipolar transistor
06 p0778 A72-17477

One dimensional analysis computer program for junction device modeling, exemplifying hf bipolar transistor Fermi statistics effect and velocity limitation in high current density
06 p0779 A72-17478

Analytical model of Gunn diode oscillating in resonant mode with domain quenching, determining current harmonics
06 p0783 A72-17573

Numerical model for ion beam instability in nonisothermal plasma with electron temperature much greater than ion temperature
06 p0861 A72-17915

Blood flow mathematical formulation, considering tissues constitutive equations, geometrical configurations, arterial wave propagation, etc
06 p0768 A72-17959

Random vibrations nonlinear theory, investigating nonlinear systems response to random excitation via Markov processes modeling
06 p0896 A72-17961

ATC study by computerized simulation, using successive approximation models
06 p0845 A72-17975

Heart pacemaker activity during muscular exertion, developing mathematical model based on system dynamics transient processes analysis
06 p0764 A72-18059

Project management mathematical models for task scheduling, resource allocation, information planning and decision making
06 p0905 A72-18067

Flow in gas lubricated conical bearings, considering analytical and numerical solutions for axisymmetric flow model with temperature dependent viscosity and dissipation coefficients
06 p0801 A72-18124

Mathematical-physical model for laser pulsed radiation-induced pressure wave transmission through surface and internal biological tissues
06 p0768 A72-18150

EEG discharges virtual dipolar sources computation, using mathematical model with homogeneous spherical conductive medium to simulate human head
06 p0769 A72-18201

Mathematical modeling of discrete nonconservative dynamic elastic systems for finite sensitivity, using Liapunov stability
06 p0840 A72-18320

Linear four step model for photosynthetic molecular oxygen evolution, discussing oxidation states, flash yield oscillation damping and deactivation
06 p0770 A72-18424

Meteorological tests for mathematical models in study of climate changes
06 p0843 A72-18451

IMPATT diode oscillator injection locking behavior from model, comparing results with experiment
06 p0788 A72-18469

Turbulence model for near-wall boundary layer flows, solving differential equations for kinetic energy and length scale
06 p0802 A72-18527

Fiberglass reinforced plastics under constant strain rate, deriving failure models as random process for microscopic crack propagation
06 p0898 A72-18548

Diffused failure model as basis for plotting delayed fracture curves in space of principal stresses
06 p0898 A72-18552

Axiomatic determination of dynamic logic control systems based on Moore automaton elements and combined continuous and finite models
06 p0781 A72-18660

Artificial biped locomotion dynamic equilibrium, representing mathematical model by two nonlinear differential equations with variable coefficients
06 p0769 A72-18703

Coefficient matrix for estimation of numerical solution error bounds for finite element models
07 p1025 A72-18786

Nonlinear dynamic system mathematical model for unit mass particle escape trajectories from potential well, taking account of trapped motions and stable oscillations
07 p1025 A72-18807

Fluidic devices electrostatic modulation, verifying jet deflection analytical model by experimental results
07 p0913 A72-18819

Fluctuating and steady model for turbulent reactive and nonreactive flow, solving for turbulent kinetic energy and density by averaging procedure
[AIAA PAPER 72-68] 07 p0966 A72-18948

Magnetized solar wind velocities and fields obtained by three dimensional model using perturbation technique with spherically symmetric boundary conditions
07 p1057 A72-19142

Spacecraft charging at synchronous orbit, constructing mathematical model of ATSS
07 p1058 A72-19150

Metal clad dielectric slab waveguide for integrated optics, obtaining dispersion equation solution and propagation modes from simplified model
07 p0940 A72-19229

Mathematical model for dissipative dual-spin satellite analysis, making use of high speed rotor symmetry to permit quasi-holonomic transformation
07 p1085 A72-19280

Electrical cardiac activity computer simulation model including biophysically faithful conduction system and electrocardiograms for high fidelity production
07 p0929 A72-19313

Mathematical model for semicircular canal dynamic response to angular acceleration, emphasizing role of perilymph over endolymph in cupula displacement
07 p0917 A72-19491

Bilaterally symmetric vortex rings dynamic behavior, computing pointwise induced velocity via Biot-Savart law for hydrodynamic and Rankine vortex models
[AD-739139] 07 p0967 A72-19501

Mathematical model physical structure, effectiveness and limitations for circadian rhythms, discussing Princeton and modified biochemical models
07 p0930 A72-19530

Algorithm for low order linear state variable models construction from measured data
07 p0950 A72-19701

Linear multivariable discrete time cyclic system sensitivity model yielding sensitivity functions with

respect to any system parameters and initial conditions
07 p0961 A72-19706

Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis
07 p0961 A72-19708

Nonlinear wave propagation of laser beams in absorbing fluid media, comparing computer model calculation results with experiment on liquid carbon disulfide cell
07 p1006 A72-19837

Monatomic gas atoms scattering by solid surfaces, using classical three dimensional lattice model
07 p0969 A72-20064

Gas-solid surface interaction semicontinuous model, predicting accommodation coefficient as function of gas atoms initial energy on tungsten
07 p0970 A72-20081

Mathematical model for superheavy cosmic ray production by spallation on interstellar hydrogen, assuming single source for particle injection with given charge spectrum
07 p1062 A72-20197

Book on models of particles and moving conducting media covering generator electrodynamics, electron tubes, particle accelerators, plasma and electron beam simulation, ion propulsion, etc
07 p1036 A72-20203

Linear equations with periodic coefficients in mathematical models for systems with rotating components, discussing methods for obtaining closed form solutions
07 p0913 A72-20204

Analytical model for surface fatigue crack configuration during propagation into thick plate under cyclic loading
[AD-741575] 07 p1095 A72-20242

Deterministic model for new product innovation adoption rate in commercial aircraft jet engine market
07 p1105 A72-20269

MHD dynamo model for incompressible real electrically conducting fluid unsteady flow
07 p1044 A72-20304

Partial differential equation language /PDEL/ for batch and interactive digital simulation of PDE models
07 p0951 A72-20327

Stochastic simulation model for space shuttle fleet operations, using closed loop queueing system approach
07 p0965 A72-20330

Airfield surface system fast-time computer simulation model for airport planning systems analysis
07 p0965 A72-20341

Optimal selection of flawless nose cones from graphite billets, obtaining mathematical model based on ultrasonic reflection test data
07 p1086 A72-20350

Nonlinear model for computer simulation of human arterial system, using finite difference technique for pressure and flow calculations
07 p0934 A72-20357

Human performance and exhaustion predictive model from responses to exercise and environmental stresses, considering circulation, thermal regulation, work load and oxygen pressure effects
07 p0934 A72-20358

Numerical simulation of atmospheric turbulence in planetary boundary layer due to wind shear and/or unstable thermal stratification, noting buoyancy and planetary rotation effects
07 p1031 A72-20359

Computer simulation requirements for air and ground transportation system, emphasizing mathematical models capable of system performance relation to design parameters
07 p0952 A72-20362

Real time computer simulation of command and control in transportation systems, detailing models, and programming technique and ATC controller effectiveness evaluation
07 p0952 A72-20363

Venusian atmospheric circulation experiments with time dependent two layer primitive equations model, discussing hot house and Goody-Robinson radiation transfer implications
07 p1083 A72-20452

Interatomic force model for elastic properties of alpha quartz and alkali halides generalized for specified structure under arbitrary pressure
07 p0980 A72-20519

Mathematical model for multiple bearing supported isotropic undamped rotors with arbitrary stiffness and mass distribution, taking into account horizontal/vertical motion coupling
07 p1096 A72-20529

Circular elastoplastic beam under combined torsion and tension via Mindlin elastic model for materials with microstructure, taking into account work hardening
07 p1097 A72-20534

Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process
07 p1055 A72-20542

Metals cold working mechanics about stress state and yield points, proposing theoretical model for mechanism and applications in extrusion molding, drawing and hollow forging

07 p0999 A72-20599

Geomagnetic field optimal model with expansion of spherical harmonic series by least squares method

07 p0980 A72-20657

Signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios

08 p1130 A72-20724

Hot wire ignitor modeling including measured H value and heat generation by explosive chemical reaction

08 p1219 A72-20754

Kalman filter estimator for nonlinear human pilot model parameters including time delay

08 p1145 A72-20861

Input binary sequence transformation in chain of series connected on-off neuron models, applying to n-stage linear filter analysis

08 p1138 A72-20870

Associative memory model using neuron synaptic weight change for storing input disturbances

08 p1138 A72-20871

Convective heat transfer from human form, using cylindrical model and aluminum statue physical replica in oven and wind tunnel air flow studies

08 p1123 A72-20892

Mathematical model of capacitive transducer for displacement measurement in open mesh grid structures

08 p1163 A72-20918

Spectral density estimates for discrete time models of steady nonGaussian random processes, noting dispersion in asymptotic expression

08 p1198 A72-20996

Thermomathematical model for calculating craters formed by short pulses in electro discharge machining

08 p1173 A72-21028

One dimensional model for drift transistor at low injection level with minority carrier mobility dependence on impurity concentration

08 p1140 A72-21063

Median true height atmospheric profile model synthesis from propagation parameters, using polynomial representations and alpha-Chapman layers

08 p1157 A72-21106

Two dimensional model for plasma without magnetic field trapped near current sheet end in dipole magnetic field resembling geomagnetic tail

08 p1157 A72-21108

Mathematical model of gravitational wave zone for ring emanated smooth axisymmetric toroidal pulse

08 p1158 A72-21177

Metallic matrix stress-strain properties from phenomenological model based on idealized behavior of system components, noting dependence on fiber volume content

08 p1185 A72-21183

Numerical modeling of Venus atmospheric circulation, taking into account short wave radiation absorption, boundary layer, mesoscale convection and horizontal friction

08 p1233 A72-21191

Stationary statistical model for microwave oscillator flicker frequency noise, leading to power spectral density and time domain frequency instability [ONERA, TP NO. 1085]

08 p1141 A72-21431

Metal cold working mechanics, discussing model based on equality of internal and external forces needed for plastic deformation

08 p1176 A72-21439

Fiberglass heat transfer mathematical model, noting scattering effect and thermal conductivity

08 p1191 A72-21452

Carrier based attack aircraft allocation model formulation and solution for maximum inflicted target damage, using sequential unconstrained minimization technique with nonlinear programming [AD-736073]

08 p1256 A72-21469

Graphical analysis of accelerated life test data on insulating fluids, capacitors, bearings and electronic devices, using inverse power law model

08 p1176 A72-21587

Phonon limited mean free path in Cd by limiting point method, proposing model with elastic anisotropy

08 p1217 A72-21592

Molecular beam continuum model for calculation of hypersonic flow past flat plate at zero incidence angle [AD-746387]

08 p1254 A72-21609

Mathematical model of solar radiation pressure effects on earth satellite orbit

08 p1237 A72-21643

Unsteady uniform turbulent flow of incompressible liquid in circular pipe, verifying mathematical model with velocity distribution calculations

08 p1151 A72-21666

Junction FET drain source capacitance theory based on two-region physical model, taking into account carrier drift velocity saturation effect

08 p1142 A72-21745

Glass fiber reinforced polymer composite model for tensile stress distribution in matrix and fibers and at bond interface

08 p1194 A72-21753

Soviet papers on human higher nervous activity physiology covering conditioned reflexes and adaptive behavior, neurotropic substance effects, mathematical and structural modeling, etc

08 p1118 A72-21834

Conditioned reflex activity, discussing biological and nervous system, electric analog simulation and mathematical and structural modeling

08 p1127 A72-21842

Mark VII ear performance calculation procedure for perceived loudness or noisiness levels relation to sound pressure, using experimental frequency weighting contours

08 p1127 A72-21895

Rarefied gas sealant viscoelastic performance prediction by analytical models, comparing results with experiments on multiple grooved samples

08 p1177 A72-21929

Radio system operational reliability analysis by mathematical methods with use of digital computer, discussing statistical modeling algorithm

08 p1143 A72-22065

Vibration modes of bladed turbine wheel, formulating mathematical model

08 p1224 A72-22132

Mathematical models for hydraulic position servo, deriving time optimal controllers

08 p1113 A72-22156

Turbulent flow model based on two equations for kinetic energy distribution and vorticity fluctuations, comparing flow and heat transfer prediction with experimental data

08 p1152 A72-22169

Submodel similarity relations in single indirect experiment design

08 p1257 A72-22176

Mathematical model for derivation of asperity or metal-metal contact load sharing of lubricated machine components in journal and roller bearings

09 p1317 A72-22248

Vaneless diffuser air flow calculation based on helical flow model with back currents in boundary layer

09 p1259 A72-22299

Spectrum shape of Doppler radar return from two dimensional random rough surface model using helmholtz integral approach and Kirchhoff approximation

09 p1277 A72-22314

German monograph on model concept for erosion mechanism involved in crystalline material surface bombardment covering particle elastic deformation during impact

09 p1397 A72-22324

German monograph on wall stabilized Ar arc column displacement by pulsed HF radiation heating covering power absorption determination based on theoretical model

09 p1358 A72-22341

Steady state global climatic model for earth-atmosphere-ocean system, discussing perturbations effect on stability

09 p1343 A72-22426

Filtered-equation pressure coordinate numerical weather prediction model in finite difference formulation, discussing various initialization procedures and boundary value specifications

09 p1343 A72-22427

Primitive equation multilayer model for winter precipitation prediction in U.S. northeast coastal region, noting correlation with observational data

09 p1344 A72-22428

Initially stationary axisymmetric disk of stars evolution calculated by gravitational potential solver for various values of velocity dispersion

09 p1383 A72-22460

Long distance communications multimode waveguides and probability distributions on symplectic group in extension of mathematical model with random inhomogeneities

09 p1277 A72-22474

Discrete model of dynamic forces between teeth of single stage transmission with parallel gear axes

09 p1404 A72-22772

Polyatomic ions interaction with neutral molecules in gases, calculating ion mobility as function of temperature from core model representation

09 p1355 A72-22788

Magnetic induction distribution in second species superconductor cylindrical samples after limited flux jumps, proposing instability propagation model

09 p1369 A72-22797

Mixing length model for turbulent boundary layer in incompressible flow with fluid injection at wall, extending solution to compressible case [ONERA, TP NO. 986]

09 p1294 A72-22818

Snow-plough model of plasma acceleration for determining time dependence, gas density distribution and energy transfer

09 p1359 A72-22819

Mathematical model of skin contact cooling tube device for human body thermoneutrality maintenance in various environments

09 p1270 A72-22821

Continuum model for cylindrical and spherical elastic laminated composites deformation, using balance and constitutive equations

09 p1405 A72-22992

Height integrated ionospheric conductivity calculated using numerical model and approximate formulas

09 p1300 A72-23017

Model of dynodes system with random electron-hole pairs number, calculating equations for mean fluxes transport and correlated noise fluctuations

09 p1280 A72-23116

German book on unsteady heat conduction and temperature field equalization covering mathematical treatment with Laplace transformations

09 p1412 A72-23175

Mathematical model and inelastic stress analysis for metal creep-fatigue interaction and progressive deformation in breeder reactors operation

09 p1407 A72-23200

Mathematical model of ion capture and annihilation by aerosol particles from ground level to 60 km

09 p1346 A72-23266

Ionospheric electron concentrations and temperatures determined by time dependent continuity equations model during 11 September 1969 solar eclipse

09 p1390 A72-23518

Collisionless plasma spherical probe RF sheath model based on quasi-static approximation and electrostatic theory

09 p1365 A72-23520

Mathematical model of block adjustment and star coordinate accuracy in photographic astrometry

09 p1392 A72-23541

Nonlinear systems optimal design mathematical modeling, discussing synthesis, manufacturing, production, exploitation and evaluation

09 p1343 A72-23610

Adjustable structure model for parameter adaptive control, noting convexity of performance index function over evaluation interval

10 p1455 A72-23793

Systems analysis and mathematical modeling role in planning transportation networks from control theory viewpoint

10 p1442 A72-23796

Turbulence models application to internal flow prediction, using two-, three- and five-equation models and shear stress hypothesis

10 p1463 A72-23854

Human left ventricle measurements, modeling, control and simulation for heart monitoring purposes, describing muscle performance mathematical model and stress effect prediction control system

10 p1429 A72-23924

Mathematical model as basis for equipment design-sensitive maintainability prediction technique, using information theory concepts of design interpretation

10 p1503 A72-23979

Bayes analysis application to Weibull distribution parameters estimation, using entropy concept for figure of merit to assess reliability analysis

10 p1444 A72-23987

Decision theory and cost-benefit modeling application to large government funded systems development programs, discussing Bayesian techniques

10 p1564 A72-23993

Stochastic models of human performance effectiveness functions reliability and correctability from error data generated by tracking and vigilance tasks

10 p1429 A72-24001

Decision making models application to systems configuration, reliability, repair level and spares optimization and availability analysis

10 p1486 A72-24006

Probability model of statistical independence relationships among two events and environmental event, examining all combinations of definition statements for reliability analysis

10 p1504 A72-24015

Statistical-analytical cost models for spacecraft development and fabrication, taking into account various technical and management factors

10 p1564 A72-24026

Cochlea enclosed two dimensional cavity potential flow model for fluid mechanical theory of hearing

10 p1430 A72-24295

Binary collision loaded-sphere molecular model for diatomic gases computer simulation, obtaining normal shock waves velocity, density and temperature profiles

10 p1466 A72-24297

Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model

10 p1418 A72-24331

Absorbing sphere model for ion-ion recombination upper limit thermal energy reaction rate and total cross section energy dependence

10 p1515 A72-24342

Laminar flow dispersion coefficient for curved tubes and channels determined by mathematical model, permitting concentration distribution computation

10 p1468 A72-24371

Mathematical modeling for structural analysis and design from viewpoint of methodology, physical principles, simulation, optimization, constraints and control theory

[SMRT PAPER M 2/3] 10 p1556 A72-24393

Turbulence generated sound due to interaction with sound absorbent liners, investigating dynamic process via rigid boundary model with homogeneous array of circular orifices or pistons

10 p1511 A72-24424

Analytical design of pulse width modulated systems with time constant and delay for electronic control, using Z transform

10 p1457 A72-24458

Model for large signal losses prediction in charge coupled devices due to fast interface state trapping

10 p1526 A72-24625

Mathematical statistics application to complex systems modeling, considering group method of data handling, simulation and regression methods

10 p1457 A72-24634

Electronic circuits statistical optimization with Monte Carlo procedure, discussing methods and algorithms for accelerating evolutionary modeling

10 p1452 A72-24638

Glass network physical properties model, using physical chemistry description of crystal structure without regularly repeating lattice

10 p1502 A72-24735

Radio propagation over slightly roughened curved earth surface, using perturbation method and Taylor series in model calculation

10 p1439 A72-24743

MHD sheet pinch model time dependent nonequilibrium stability determined by equations of incompressible viscous resistive magnetofluid

[AD-739661] 10 p1523 A72-24751

Approximate model to reduce differential equation order for linear system of series connected elementary aperiodic components with different time constants

10 p1457 A72-24753

Mathematical model for compressed gas convection into lower atmosphere with substantial density changes

10 p1563 A72-24778

Mathematical model for arterial system pressure, blood flow and dimensional changes, examining cardiac ejection dynamics and vasculature mechanical properties and viscoelasticity

10 p1432 A72-24812

Universal mathematical model of n-plet atomic theory, obtaining existence criterion for photogeneous relation in relation age

10 p1506 A72-24851

Tensile ligament instability model for stress corrosion crack propagation velocity in austenitized steel tempered at 750 F

10 p1499 A72-24888

Mathematical model for supersonic crack propagation in cubic lattice, deriving velocity-applied stress relation

10 p1558 A72-24895

Mathematical description of frequency difference hologram obtained by superposition of two holograms of same object produced with light of different frequencies

10 p1483 A72-24915

Hubbard mathematical model for metal-insulator transition due to electrons correlations, noting schematic phase diagram and transition metal oxides

10 p1527 A72-24939

Random walk models replacing Fokker-Planck equation for many particle systems with Coulomb interactions

10 p1513 A72-25041

Linear dynamic control system identification by local impulse response approximation, comparing with Goodman-Reswick model

10 p1458 A72-25073

Model for I/O channel traffic in computer systems, obtaining closed solution for stationary probabilities of state

10 p1446 A72-25148

Retrieval model based on probability distribution defined on set of all admissible arrays of elements in loci set

10 p1446 A72-25191

Parameter identification method for mathematical extremal control model of complex structure for static plants based on regression analysis

10 p1458 A72-25192

Boundary layer model for laminar transient forced convection film boiling on isothermal flat plate, noting one dimensional conduction, intermediate and steady state regions

[AIAA PAPER 72-289] 11 p1741 A72-25227

Radiative heat transfer spectral, temperature and directional dependence on interacting opaque surfaces

system properties, noting models with accounted non-gas character

[AIAA PAPER 72-306] 11 p1742 A72-25240

Digital computer calculation of complex electric networks described by mathematical models, calculating flow distribution

11 p1577 A72-25282

Methods of moments, rational transform approximation, Taylor series expansion and modulating functions used for process identification model, determining system transfer functions

11 p1607 A72-25283

Accuracy and reliability in engineering design of discrete automata without memory/logic circuits/, using Boolean algebra for mathematical models

11 p1600 A72-25434

Equilibrium state dynamics of Burger turbulence model with two velocity components, using Fourier amplitude representation

11 p1615 A72-25553

Molecular scattering in free jet expansion, using spherical source and two component background gas mathematical models

11 p1615 A72-25558

Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation

[SAE PAPER 720303] 11 p1703 A72-25567

Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model

[ASME PAPER 72-GT-109] 11 p1571 A72-25673

Relativistic homogeneous anisotropic models analogs construction in Newtonian cosmology

11 p1716 A72-25711

Mechano-acoustical network model for room-hallway-window system response to sonic booms or other transient loads, determining damping ratios

11 p1686 A72-25729

Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions

11 p1745 A72-25815

Single spiral vortex cavity termination model for second order solution of flat plate hydrofoil cavitation flow

11 p1616 A72-25879

Electronic model for low temperature transition in magnetite with nonintegral average electron number on site

11 p1701 A72-26023

Russian book on approximate solutions of boundary value problems covering elliptic differential equations and Ritz, moment, straight lines and probability modeling methods

11 p1677 A72-26065

Electrostatic ion thruster theoretical model, deriving ionization rate density as function of discharge current

[AIAA PAPER 72-432] 11 p1707 A72-26175

Resistorjet performance models for investigating energy losses in hydrogen, ammonia, methane and carbon dioxide nozzle flows

[AIAA PAPER 72-455] 11 p1708 A72-26191

Dynamic modeling application to technological forecasting, discussing mathematical simulation for R and D management planning in project selection and budget allocation

11 p1748 A72-26284

Narrow band process signal model for phase and amplitude difference distribution densities of alternating period compensation system output signal

11 p1596 A72-26310

Mathematical model of combustion region of steam boilers or gas turbines based on turbulent flow and transport equations

11 p1747 A72-26592

Mathematical model of weak coupling influence on damped harmonic oscillators with different eigenfrequencies applied to bounded plasma oscillations

11 p1698 A72-26600

Gabor-Nelson myocardium electrical activity model for mathematical construction of vectorcardiograph from ECG for comparison of various lead systems

11 p1588 A72-26629

Mathematical model of extracellular pH in brain tissue from blood and cerebrospinal fluid acid-base parameters for respiration central chemosensitive mechanism study

11 p1579 A72-26660

Pulsating heat source model for physical processes in metal surface layer under fatigue limit stress level, calculating critical volume to limit energy buildup

11 p1738 A72-26801

Computerized numerical model of mixed subsonic and supersonic gas flow with sonic transition in turbine curvilinear channel

11 p1574 A72-26967

Mathematical model of gas turbine parameters scatter and geometrical fabrication tolerances of flow through section

11 p1712 A72-26974

Perturbation procedure for weakly coupled oscillators in connection with statistical mechanics ergodic problem and nonlinear interaction models

12 p1844 A72-27248

Mathematical model for thermal lensing of IR laser window, discussing aberrations effect on diffraction-limited far field focus time

12 p1819 A72-27284

Kinetics and cavity intensity models for output characteristics of pulsed electric discharge carbon dioxide lasers

12 p1820 A72-27287

Nonlinear mathematical dc models of planar transistors for computerized IC design and analysis obtained by continuity equation approximate solution

12 p1789 A72-27313

Mathematical model to describe complete creep process in metal from hardening and brittle failure theories

12 p1828 A72-27322

Digital adaptive echo cancellation mathematical technique for voice circuits derived from satellite transmission

[AIAA PAPER 72-539] 12 p1780 A72-27362

Model for supervised repairable system reliability, assuming system life and repair times as exponential probability distributions with deterministic supervisor active and inactive times

12 p1814 A72-27555

Signal mathematical model in optical and acoustic pattern recognition

12 p1786 A72-27571

One stage approximation to color conversion model, predicting gain setting control dependence on achromatic contrast

12 p1809 A72-27681

Ekman boundary layer in two level quasi-geostrophic general circulation numerical model, representing physical characteristics of boundary layer turbulence increase with height

12 p1840 A72-27708

Jupiter and Saturn gravitational moments from available models, taking into account rotation, density and radius

12 p1871 A72-27744

Turbulence model based on transport equations for Reynolds stress tensor and energy dissipation rate, deriving simplified version for boundary layer flows

12 p1798 A72-27830

Computer model for evolution of isolated rotating disks of stars, noting gravitational two stream dynamic instability for infinite double periodic stellar systems

12 p1874 A72-27909

Ergodic theorems for operators generated by Markov transients, examining asymptotic properties of stochastic learning model

12 p1787 A72-27924

Lens MTF calculation in presence of diffraction patterns via image mathematical model construction yielding Fourier transform

12 p1810 A72-27937

Spectroscopy by synthesis of two or more fixed or moving diffraction gratings, obtaining transfer functions for total information increase

12 p1811 A72-27943

Mathematical model for hydraulic fatigue testing machine, analyzing nonlinear control stability of vibratory loading process

12 p1796 A72-27978

Combustion surface acoustic admittance model of blended solid propellant with allowance for foam zone inertia and solid/gas interface reactions

12 p1889 A72-27980

Pilot-aircraft system model for relationship between weapons delivery accuracy and manual flight control system design, noting display, computation and control aids to pilot

12 p1773 A72-28121

Statistical methods for friction and wear processes, noting Rayleigh distribution of wear particles, surface dispersion velocity, energy dissipation and friction force

12 p1818 A72-28186

Modified Van der Pol wave motion oscillator model for prediction of aortic dynamic response to negative g impact accelerations

12 p1765 A72-28271

Mathematical model for digital systems reliability, determining probability of success and of various failure modes

13 p1923 A72-28356

Mathematical models for complex system debugging in initial life period, noting maximum likelihood estimates for failure rate functions

13 p1962 A72-28365

Oscillations excitation, proposing models for percussive rotational action machines operation and dog tooth clutches processes

13 p1954 A72-28386

Interdiction bombing mission effectiveness model for bad and good weather aircraft type selection depending on weather conditions at target site

13 p1896 A72-28400

Mathematical model of reactive fluid flows during postignition transients in hybrid propellant rocket system
13 p2025 A72-28416

Explicit numerical modeling method for dynamics of dense high temperature laser-produced plasmas, discussing time scale for energy transfer from electrons to ions
13 p2009 A72-28424

Modeling process for mathematical representation of mechanical problems, deriving design information in digital or graphic form
13 p2000 A72-28450

Mathematical model for dynamic yield point dependence in strain rate based on similarity and dimensionality theories and Weierstrass theorem
13 p2054 A72-28458

Monte Carlo method for radiative transport theory problems, considering mathematical models of light scattering media and photon trajectory random elements
13 p2001 A72-28505

Exponential functions model for D region vertical distribution of electron density profiles, taking into account solar X- and cosmic rays
13 p1945 A72-28581

Multilayer plasma model for MHD pulse propagation in ionospheric waveguide, noting approximation of Alfvén velocity distribution by plasma layers
13 p1946 A72-28585

Gravitational theory strong discontinuity conditions, using basis variational equation for field and media model construction in general relativity theory
13 p2002 A72-28711

Conformally flat linear axial symmetry chromometrically invariant cosmological models, discussing various types of spaces realized during model evolution
13 p2036 A72-28759

Precipitation exceedance rates charts for various risks, using statistical models
13 p1989 A72-28811

Mathematical model for numerical simulation of warm fog modification by seeding hygroscopic particles, taking into account turbulent diffusion and horizontal wind advection
13 p1992 A72-28844

Multiscale numerical model for local weather development simulation, noting forecasting for long distance air travel
13 p1993 A72-28857

Mathematical two mass model for horizontal, angular and vertical vibrations of pneumatic wheel with allowance for inelastic tire resistance
13 p2003 A72-28918

Characteristic thrust concept introduced to classify propulsion system tasks related to geosynchronous communications spacecraft, developing approximate analytical models
[AIAA PAPER 72-514] 13 p2052 A72-28977

Random walk atomic migration model for radon diffusion through lunar regolith into atmosphere
13 p2038 A72-28995

Electrophysiologic data acquisition by multiple dipole type of inverse electrocardiographic procedure based on model data, noting favorable and unfavorable dipole array configuration
13 p1909 A72-28997

Mathematical random fluctuation models for noise and energy spectra of pulsed processes during current passage through semiconductors
13 p2021 A72-29064

Accelerated reliability, life, fatigue and performance tests of automatic systems components, noting mathematical models for minimum time techniques
13 p1965 A72-29172

Mathematical model for flow field inside raindrop under aerodynamic transient stresses before impingement at stagnation point of blunt body in supersonic flight
13 p1942 A72-29224

Random processes models based on Poisson sequences extended to simultaneous asymmetry and probability density function excess, establishing asymptotic relationships
13 p1948 A72-29231

Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes
13 p1949 A72-29244

Time history model of transient ignition to self sustained propellant burning, taking into account pressure effects and igniter heat flux
13 p2065 A72-29305

MHD power generators analytical modeling by digital technique for prediction of performance and efficiency as function of size and operating conditions
[AD-741173] 13 p1900 A72-29355

Nonlinear model of ionization instability of MHD generators, assuming discharge structure with alternating layers of high and low electrical conductivity
13 p2014 A72-29371

Mathematical model for ionized plasma response to sinusoidal perturbations, calculating dispersive waves

in MHD generators with working fluid of potassium seeded argon
13 p2014 A72-29372

Radar clutter models and comparison with measurements, discussing parameters for description and main functions for suppression
13 p1922 A72-29396

Human hand-arm system vibration characteristics, describing mechanical impedance measurements for mathematical modeling
13 p1910 A72-29559

Mathematical model for gas turbine engine inlet noise caused by shock wave impingement, noting dynamic wave system with overpressure and distortion
13 p2028 A72-29576

Acoustic environmental prediction model for near, mid and far field rocket engine noise
13 p2028 A72-29582

Analytical models for potential flow through smooth edged orifice, comparing acoustical inertance predicted and experimental values
13 p2006 A72-29770

Dynamics and thermodynamic interactions connected with large, mesoscale and small scale stratiform clouds, describing mathematical models
13 p1995 A72-29849

Two dimensional mathematical model of magnetosphere with neutral sheet for oblique incidence of solar wind, noting magnetic field minimum energy
13 p1954 A72-29850

Divided attention effect localization, using choice tracking task reaction times in sequential stage model for human information processing
13 p1911 A72-29852

Work hardening-recovery model of dislocation creep, deriving multiaxial mechanical equation of states for strain/time relationship under arbitrary temperature-stress sequences
13 p2061 A72-29872

Mathematical model for magnetized solar wind with one fluid MHD and polytropic state equations, calculating magnetic field variables at earth
13 p2034 A72-29958

Kalman filter stability analysis by mathematical modeling, using floating point computer algorithm
13 p1934 A72-30000

Mathematical model of atmospheric electric clouds, calculating electric charges and fields from convection and conductivity data
13 p1996 A72-30086

Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies
13 p2067 A72-30125

High velocity water jet generation dynamics, deriving equations of motion for mathematical model with nozzle profiles and liquid compressibility approximations
14 p2093 A72-30180

Two body model for three body problem of uniformly distributed and isotropically expanding gravitational matter of Einstein-Sitter universe, noting metagalaxy cooling rate
14 p2149 A72-30211

Mathematical model for compressed gas thermal convection into lower atmosphere with substantial density changes
14 p2170 A72-30215

Earth-moon system periodic orbits calculation by modified quasi-linearization combined with particular solutions method, using restricted three body model
14 p2149 A72-30232

Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation
14 p2071 A72-30283

Non-Maxwellian inhomogeneous collisionless plasma equilibrium and stability, proposing statistical thermodynamic model
14 p2137 A72-30394

Porous cellular structure materials, investigating porosity effects on modulus of elasticity based on central monoporosity model
14 p2165 A72-30433

Lunar interior thermal history and current state from theoretical temperature models, taking into account initial conditions, heat sources, differentiation and simulated convection
14 p2155 A72-30519

Linear mathematical model for twin shaft gas turbine with isolated turbocompressor, calculating dynamic constants as function of operational modes
14 p2146 A72-30581

Myelinated nerve fiber mathematical model for action potential transmission mechanism analysis during relative refractory phases
14 p2079 A72-30597

Anomalous magnetic and gravitational field models autocorrelation function behavior dependence on circular cylindrical sources depth and spacing
14 p2101 A72-30647

Solid rocket propellants storage life analysis and prediction by mathematical modeling of physical-chemical failure generating processes
14 p2145 A72-30762

Modified geometrical model for sintering Ni-doped W, including surface tension effect at Ni-vapor interface
14 p2121 A72-30770

Aerospace complex physical systems including human operator, discussing computerized design for behavior analysis by means of mathematical models
14 p2093 A72-30846

Gas surface interactions models, computing scattering kernels by reduction to boundary value problem
14 p2134 A72-30880

Temperature-slip problem in rarefied gases, obtaining exact solution by generalized BGK scattering model and Wiener Hopf technique
14 p2095 A72-30882

Nonlinear interaction of resonant plasma oscillations with nonresonant wave pulse, using water bag model of electron plasma
14 p2140 A72-30936

Anisotropic homogeneous plasmas, deriving computer model to predict effects of circularly polarized parallel plasma waves in external uniform magnetic field direction on instabilities
14 p2140 A72-30938

Cooperative direction changing isomer movement on polymer chain lattice describing equations derivation procedure
14 p2125 A72-30962

Reichardt mixing model for turbulent boundary layer calculation in wall flow, noting supersonic and nonisothermal jet flow
14 p2095 A72-31002

Mathematical model for mechanical and electrical hysteresis, noting application to nonlinear ferromagnetic resonant circuit with saturable inductor
14 p2132 A72-31105

Nonlinear oscillation systems mathematical model, determining periodic mode parameters, self excitation and damping mechanisms by point mapping method
14 p2133 A72-31126

Rectangular plate nonlinear lumped-parameter model for large displacement amplitudes, deriving differential equations of motion via Hamilton principle and Euler equations
14 p2169 A72-31148

Mathematical model for computation of electronic circuit drift reliability and circuit production yields, discussing operational parameter allowance
14 p2091 A72-31165

Reliability modeling principles, concepts and implementation techniques for switching system design
14 p2091 A72-31167

Material constants for strain hardened polycrystalline metals calculated from mathematical model for plastic deformation
15 p2322 A72-31361

Linear systems theory for mathematical model of retinal image and ganglion cell excitation, calculating receptor layer luminance distributions for several stimulus patterns
15 p2184 A72-31367

Multimode optical fiber waveguide theoretical model to predict pulse propagation dispersion for comparison with measurements
15 p2194 A72-31546

Approximate model of weak shock wave interaction with laminar MHD boundary layers for perfectly conducting supersonic streams
15 p2284 A72-31633

Two dimensional incompressible turbulent boundary layer in arbitrary pressure gradient, obtaining mathematical model for solution by implicit finite difference method
15 p2217 A72-31718

Adaptive radar tracking processes in presence of clutter, comparing efficiencies via mathematical models
15 p2196 A72-31747

Software models to test operating conditions of logic nets, discussing application to network faults diagnostics
15 p2203 A72-31749

Theoretical model for HF mechanical waves interaction with crystal lattices based on measurements of high amplitude ultrasonic waves attenuation in metal crystals
15 p2292 A72-31835

MOS junction transistor turn-off behavior calculation based on model with carrier source and drain for channel formation
15 p2207 A72-31891

Mathematical adjustment model for lunar laser ranging, noting accuracy improvement of points coordinates and orientation parameters
15 p2310 A72-31971

Pageson balloon satellite orbital perturbations due to erratic solar radiation pressure induced accelerations, comparing modified Smith perturbation model calculations with photometric observations
15 p2228 A72-31975

Solar wind model dividing interplanetary space in one fluid and two fluid collisionless regions, discussing proton thermal anisotropy
15 p2300 A72-31996

ATC systems fast-time simulation, emphasizing importance of human operator performance realistic modeling
15 p2269 A72-32097

Solution kinetics of secondary phases in cast dendritic and nondendritic Mg-Zn and Mg-Zn-Zr alloys, using cylindrical and spherical diffusion models
15 p2257 A72-32119

Blade characteristics of axial flow fan with orifice fan guide investigation by theoretical model with flat plate parallel to wing tip surface
15 p2179 A72-32142

Thermodynamic perturbation and scaling theory for multidimensional spherical models of lattice structure in terms of field of critical phenomena
15 p2293 A72-32219

Amorphous semiconductors theories, discussing electron states and transport properties in terms of Cohen, Mott and Gubanov models
15 p2293 A72-32234

Lateral distribution, radiation spectra and pulse shapes calculated from mathematical models of cosmic ray showers radio emission, noting chemical composition of primary particle
15 p2230 A72-32262

Mathematical model for modified ordinary electromagnetic wave propagation in presence of two cold counterstreaming plasma electron beams, noting instability regions and growth rate
15 p2286 A72-32274

Finite element method for discrete models of composite materials, discussing nonlinear dynamic problems
15 p2330 A72-32296

Tight binding model for binding energy determination in transition atoms adsorption on same series transition metal substrate, using moments expansion technique
15 p2281 A72-32379

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation
15 p2295 A72-32549

Particulate composite model deformation and failure behavior under plane uniaxial compressive stress, using finite element method
15 p2258 A72-32556

Mathematical models for electromagnetic interference in electronic equipment, discussing nonlinear circuit analysis
15 p2201 A72-32568

Structural averaging of stresses in finite element method hybrid stress model, using additional equilibrium equations
15 p2332 A72-32597

Analytical model for nonpenetrating impact caused head injuries, evaluating protective device effectiveness via energy absorption characteristics
15 p2191 A72-32602

Atmospheric motions prediction with numerical model based on discrete stratified fluid free oscillations
15 p2266 A72-32720

Probstein-Gold viscoelastic model of supersonic flow induced surface cross-hatching assessment against Dowell studies on plates and shells flutter
16 p2463 A72-32838

Harmonic oscillators with negative resistance elements, discussing simplified mathematical calculation for I-V characteristics nonlinearity and applications to various diodes and transistors
16 p2368 A72-32858

Reversible instantaneous deformations and internal energy in viscoelastic incompressible fluids, using Oldroyd and De Witt hydrodynamic models
16 p2376 A72-32937

Mathematical models for depolarized light scattering by particle pair in gas, noting molecular collisions effect
16 p2423 A72-32952

Mathematical model for fast transverse glow discharges for pumping high pressure gas lasers, noting short rise time of applied voltage pulse
16 p2399 A72-33012

Earth crust waveguide three layer model for electromagnetic wave propagation, showing mode relation to absorption conditions
16 p2362 A72-33074

Limit displacement or solids parameters optimization for perfectly locking bodies, presenting mathematical models based on extremum energy theorems
16 p2423 A72-33104

Two dimensional fibrous medium model for strain and stress analysis of structural plate formed by three dimensional grid of rods
16 p2467 A72-33115

Inverse transformations in mathematical models of elasticity and plasticity problems reducible to biharmonic equation
16 p2468 A72-33163

Theoretical model for computer calculation of transients in oscillator consisting of nonlinear amplifier with feedback through sequence of matched LC circuits
16 p2371 A72-33280

Mathematical models for radio attenuation in ice by electromagnetic absorption and reflection from interfaces, noting radar tracking
16 p2363 A72-33290

Mathematical model of atmospheric tides using Navier-Stokes equations for perfect gas in thermodynamic equilibrium
16 p2385 A72-33343

Mathematical model for reliability analysis of modularly redundant electronic systems with unequal failure rates for operating and standby units
16 p2398 A72-33344

Electronic circuit reliability prediction model with statistical dependence for detailed failure modes
16 p2371 A72-33345

Initiation mechanisms for explosive materials and experiments for hazard evaluation, discussing subdetonation reactions and mathematical models of explosive processes
16 p2442 A72-33353

Subcooling and acceleration effects on nucleate boiling heat flux, comparing heat transfer prediction models with experimental measurements
16 p2477 A72-33433

Approximation of mathematical models for continuous media with many degrees of freedom, local structure and interactions, discussing parameters similarity conditions
16 p2425 A72-33586

Mathematical model for atmospheric ions density fluctuation with time, noting absence of oscillating solutions
16 p2386 A72-33652

System models for R and D processes in terms of state variables and control vectors, deriving algorithm for optimization
16 p2482 A72-33864

Predictive model for human operator performance in short term visual information processing based on psychological research to obtain decision accuracy and response time
16 p2359 A72-33865

Nonparametric probability density function modeling algorithms comparison for convergence rate and limit cycle stability relative to implementation ease
16 p2367 A72-33867

Teflon-bonded hydrophobic gas diffusion electrode performance prediction by mathematical treatment of flooded catalyst agglomerate model
16 p2352 A72-33892

Model for VLF emissions triggered by whistlers and man-made radio signals, noting effects of wave packet and second order resonance
16 p2365 A72-33905

Mathematical model for magnetosphere surrounding rotating neutron star, noting computer programs for Maxwell and plasma equations solution
16 p2460 A72-33927

Earth bow shock wave structure model based on development of strong density gradient in magnetic field-free cosmic plasma
16 p2387 A72-33935

Structural information model for data compression algorithm synthesis, using piecewise signal approximation
16 p2395 A72-33954

Hybrid computer simulation of cochlea mathematical model, noting nonlinear damping
16 p2359 A72-33971

Mathematical model for deuterium slab solid and plasma under laser pulses irradiation, noting shock wave propagation and slab acceleration
16 p2439 A72-34027

Analytical model for crosshatch ablation patterns, geometric features and stability characteristics prediction based on viscoelastic melt layer interaction with gas boundary layer
16 p2480 A72-34030

Convective clouds fluid dynamic numerical modeling, considering plumes, thermals and vortex rings formation
16 p2419 A72-34083

Rheological model for creep under intermittent square wave stress pulses, taking into account time dependent dislocation density
16 p2412 A72-34113

Lift and drag on conical, cylindrical and spherical artificial satellites from spatial impulsive interaction model depending on gas temperature and surface conditions
16 p2347 A72-34167

A simulation method permitting the direct construction of an integrated fluidic circuit with predetermined frequency response curve
17 p2494 A72-34197

Communication satellite modeling into subsystems to formulate parametric relationships among power, mass and cost, comparing computerized design alternatives
17 p2512 A72-34263

Comparison of circuit call capacity of demand-assignment and preassignment operation.
17 p2512 A72-34270

Mathematical model for nonequilibrium gas composed of hard spherical nonattracting molecules, deriving gas dynamics theory in terms of multiple integrals
17 p2538 A72-34424

General purpose simulation system /GPSS/ to program discrete time dependent mathematical models related to transport and queueing processes
17 p2521 A72-34471

Simulation of an air cargo handling system
17 p2536 A72-34472

The reduction of false tracks during automatic tracking
17 p2522 A72-34826

The identification of parameters in nonlinear thermal networks with the aid of a Kalman filter
17 p2533 A72-34827

Discrete vortex model numerical simulation of Onsager negative temperature instability for interacting line vortices two dimensional motions
17 p2538 A72-34871

A new theoretical model for representing jet penetration into a subsonic stream
17 p2538 A72-34888

Mathematical model of nitric oxide formation by fuel droplet burning above fuel critical pressure, applying to diesel engine operations
17 p2511 A72-34901

Analysis and testing of compressible flow ejectors with variable area mixing tubes.
17 p2485 A72-34968

Russian book - Mathematical methods of modeling in space studies
17 p2607 A72-35026

A probabilistic model of a control computer complex for estimating the efficiency of communication of a computer with data sources and receivers
17 p2522 A72-35029

Flight vehicle, control system and perturbations models synthesis from variational problem solution via control functions improvement
17 p2621 A72-35037

Numerical integration of ordinary differential equations in a real-time modeling procedure
17 p2576 A72-35041

Mathematical models for metallic plastic strain hardening under cyclic loads, introducing internal state parameters
17 p2632 A72-35111

The fitting, calibration, and validation of simulation models.
17 p2523 A72-35226

Reflection of weak shock waves from permeable materials.
17 p2581 A72-35250

Intermediate-range gravity - A generally covariant model.
17 p2581 A72-35380

Flight tests correlation with mathematical models to predict electro-optical viewing systems capability for military missions
17 p2557 A72-35553

Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy
17 p2493 A72-35564

Shock-wave structure using nonlinear model Boltzmann equations.
17 p2542 A72-35614

Verification of theory for plasma of finite-size particles.
17 p2592 A72-35618

Water bag model application to one dimensional inhomogeneous two-stream collisionless electron plasma stability computation, noting electrostatic modes
17 p2592 A72-35619

Phenomenological model for incoherent microwave scatter attenuation from turbulent plasma, establishing relation between plasma parameters and attenuation coefficient
17 p2517 A72-35622

Turbulence model equations for calculation of supersonic and hypersonic flows, representing Reynolds stresses and turbulent heat flux vector in terms of eddy viscosity
17 p2543 A72-35639

Stochastic model for unsteady rhythmic processes based on periodical correlation of random processes
17 p2534 A72-35777

Time-optimal mathematical models operating with low-frequency pulse-frequency-modulated input information converted to an intermediate digital code
17 p2524 A72-35786

Mathematical model for flow limitation in collapsible tube in relation to pressure in pulmonary and circulatory system
17 p2510 A72-35972

Electrodynamic generator nonlinear internal resistance determination as function of flow parameters

and model geometry via boundary conditions formulation 18 p2643 A72-35998

Approximations yielding closed equations for isotropic turbulence compared to laboratory and computer experiments, emphasizing Langevin type model equation for velocity 18 p2677 A72-36008

Low order model and error rates for two-dimensional turbulent motion prediction in atmosphere spectrum 18 p2677 A72-36009

Mathematical solution to equations of turbulent motion in viscous fluids asymptotic to strange attractors 18 p2678 A72-36015

Structure, analysis and synthesis of time series models, discussing kernel Hilbert space, spectral estimation, moving averages, identification, etc 18 p2678 A72-36023

Reliability analysis of an intermittently used system with N types of failure. 18 p2693 A72-36024

Self-consistent statistical models for the gravity anomaly, vertical deflections, and undulation of the geoid. 18 p2723 A72-36028

A geopotential model (APL 5.0-1967) determined from satellite Doppler data at seven inclinations. 18 p2685 A72-36029

Mathematical models for flow ejection and aorta pressures based on displacement ballistocardiography and time dependent incompressible flow theories respectively 18 p2649 A72-36035

Recursive bootstrap maximum likelihood estimators algorithms for identification of process modeled by stable linear difference equation under additive output measurement noise 18 p2672 A72-36056

Nonlinear dynamic feedback control systems modeling by parameter estimation scheme with polynomial representation for state variables 18 p2672 A72-36057

Feedback controller synthesis from nonlinear system modeling by linear equations, proving theorem relating stability properties 18 p2672 A72-36060

Model improvements for thermionic diode plasmas. 18 p2715 A72-36218

Conformally flat linear axisymmetric chronometrically invariant cosmological models, discussing various types of spaces realized during model evolution 18 p2724 A72-36237

Rate distortion theory model for visual communication fidelity assessment via weighted noise measurement and K rating 18 p2657 A72-36251

Q values from lunar seismic record measurements indicating separation of scattering and real loss parameters effects on energy propagation, discussing geophysical models 18 p2724 A72-36288

Mathematical modeling assumptions and procedures in experimental mechanics, considering transfer function, impedance and human factor roles 18 p2709 A72-36353

Mathematical model and simulation for contact problems involving elastic half spaces and viscoelastic and friction effects 18 p2734 A72-36371

Theoretical models for cavity and wake flows, outlining numerical methods for solving functional equations 18 p2679 A72-36387

Molecular and atomic interaction forces as interfacial free energy sources, discussing molecular attachment kinetics and surface configuration models 18 p2718 A72-36393

Resonant mode sound field radiated by nonuniform slender circular cross section free-free beams, using dipole array modeling 18 p2710 A72-36410

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression 18 p2680 A72-36414

Mathematical methods for improving the significance of scintigrams 18 p2652 A72-36425

A stochastic bioburden model for spacecraft sterilization. 18 p2652 A72-36442

Theoretical model for plane turbulent wakes subject to adverse, favorable and mixed pressure gradients based on Reynolds stress equation, describing experimental verification 18 p2680 A72-36477

Dual amplitude construction possibility from general field theory couplings and propagators, considering factorization on multiperipheral configuration in translational and rotational modes 18 p2713 A72-36516

Prediction of electron concentration reductions in re-entry flow fields due to electrophilic liquid and water injection. 18 p2730 A72-36537

[AIAA PAPER 72-670] Statistical model of chemical reactions in nonisothermal low pressure plasma. 18 p2715 A72-36567

An analytical description of the line element in the zone-fluctuation model of colour vision. I, II. 18 p2651 A72-36606

Linear homogeneous system of differential equations as model for perturbation problems including functions with retarded and/or advanced arguments 18 p2705 A72-36614

Mathematical model for internal atmospheric gravity waves breaking process modification by momentum exchange between wave and mean flow 18 p2687 A72-36630

Perturbation method in inelastic interaction model for transport processes in reacting gases described by Boltzmann kinetic equation 18 p2713 A72-36807

A vortex model for the study of the flow at the rotor blade of a helicopter 18 p2642 A72-36975

A mathematical model of cold propane flames 18 p2741 A72-37016

Dynamics of dissolution of gas bubbles or pockets in tissues. 18 p2655 A72-37027

Digital computer simulation of human systemic arterial pulse wave transmission - A nonlinear model. 18 p2655 A72-37028

Finite element models with rigid displacement for nonrigid structure analysis, noting curved beam and shells 18 p2739 A72-37173

Theoretical models for speed-accuracy tradeoff during difficult visual discrimination tasks under time pressure 18 p2655 A72-37220

Time-dependent ionization equilibrium and line radiation under flarelike conditions. 18 p2849 A72-37241

Optimal terminal rendezvous as a stochastic differential game problem. 18 p2869 A72-37284

Equilibrium configurations of Vlasov plasmas carrying a current component along an external magnetic field. 18 p2839 A72-37332

Scattering of Langmuir waves produced by a beam with finite transverse dimensions. 18 p2839 A72-37337

Mathematical model of class of complex control systems composed of structures obtained from aggregates of ordered sets and random operators 18 p2777 A72-37380

Two component reaction kinetics model for numerical analysis of combustion during two- and three dimensional supersonic steady flow of hydrogen-air fuel mixtures 18 p2880 A72-37389

A three dimensional, analytical magnetospheric model with defined magnetopause. 18 p2789 A72-37410

Models of neurons reacting to input signal alternation in space and time 18 p2759 A72-37424

Neuron mathematical model synthesis from algorithms to construct neural networks and single threshold element in network form 18 p2759 A72-37425

The thermal conductivity of a statistically isotropic heterogeneous medium. 18 p2880 A72-37462

A model of a nonlinear viscoelastic medium allowing for the effects of cumulative damage 18 p2871 A72-37528

Model reference adaptive control systems design based on optimal control, parametric optimization, stability and statistical estimation theory 18 p2778 A72-37722

Mathematical model of ideal incompressible gyroscopic fluid with internal angular momentum using kinematic equations 18 p2835 A72-37929

Effectiveness of using composite materials directionally reinforced by hollow fibers 18 p2823 A72-38002

STOL ride quality criteria - Passenger acceptance. [AIAA PAPER 72-790] 18 p2749 A72-38107

A method for increasing thrust reverser utilization on STOL aircraft. [AIAA PAPER 72-782] 18 p2752 A72-38141

An optimal model-following flight control system for manual control. 18 p2753 A72-38228

Variable stability simulation techniques for nonlinear, rate dependent systems. 18 p2780 A72-38241

An investigation of vehicle dependent aspects of terminal area ATC operation. 18 p2832 A72-38256

A biased filter for linear discrete dynamic systems. 19 p2781 A72-38273

Geophysical signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios 19 p2765 A72-38352

Adhesive wear theoretical model based on asperity interactions number, area and volume, considering implications for friction and surface temperature analysis 19 p2809 A72-38377

Numerical calculation of the lunar wake in a magnetohydrodynamic model. 19 p2864 A72-38435

Structure of ion acoustic solitons and shock waves in a two-component plasma. 19 p2841 A72-38440

Markovian plasma turbulence model to obtain convergent perturbation series for diffusion coefficient via trajectories in particle propagator 19 p2841 A72-38442

Nonlinear interaction of a small cold beam and a plasma. II. 19 p2841 A72-38444

Two state system analytic modelling as nonlinear heat transfer problem 19 p2882 A72-38445

Burke-Shumann-Zeldovich model for aerodynamic characteristics of straight jet laminar diffusion flames, considering free, semibounded and slipstream types 19 p2882 A72-38460

Certain problems in continuum mechanics for a deformed body of variable mass 19 p2835 A72-38471

Mathematical model for perfectly absorbing spherical Langmuir probe in collisionless plasma, obtaining plasma density and ion temperature 19 p2842 A72-38524

Linear acoustic model to predict axial flow turbomachinery aerodynamic sound generation including flow effects on radiation 19 p2788 A72-38568

Solution of the problem of the unsteady motion of a mixture in a flat duct using a quasi-homogeneous model with allowance for deposition on the walls 19 p2788 A72-38589

Model random medium with two kinds of dielectric layers stacked in arbitrary proportions, calculating electromagnetic wave propagation characteristics by transmission line analogy 19 p2767 A72-38613

Differential equations for digital model of linear quadrupole, discussing digital simulation of analog radio equipment circuits 19 p2775 A72-38659

Theory of spontaneous mode locking in lasers using a circuit model. 19 p2813 A72-38690

Collisionless solar wind protons - A comparison of kinetic and hydrodynamic descriptions. 19 p2853 A72-38732

The mechanics of an organized wave in turbulent shear flow. III - Theoretical models and comparisons with experiments. 19 p2789 A72-38794

A thermal stratification model of a cryogenic tank at supercritical pressures. 19 p2883 A72-38845

Book - An introduction to engineering systems. 20 p2945 A72-38925

A Monte Carlo model of turbulent mixing for the prediction of NO production in steady-flow combustors. [WSCI PAPER 72-8] 20 p2982 A72-38973

Antenna pattern analysis for compatibility prediction. 20 p2902 A72-39000

Mathematical model of seismic isolation block and pneumatic suspension for inertial guidance component tests to describe design factors effects on vibration behavior [AIAA PAPER 72-844] 20 p2950 A72-39085

Theoretical model for acoustic emission relationship to fiber cracking during rising load tensile test on fiber reinforced composites 20 p2925 A72-39285

Deformation of the earth by surface loads. 20 p2916 A72-39335

Low beta model of collision dominated plasma flow effect on toroidal confinement, simulating Stellarator, Levitron and Tokamak 20 p2957 A72-39356

Recent advances in R & D value measurement and project selection methods. 20 p2988 A72-39397

Electrostatic, reticular vorticity, turbulence effects and equivalences with tensional and spectral elastic fields. 20 p2953 A72-39419

Finite sized optically thin radiating plasma stability analysis, deriving luminosity function for metastable state existence from mathematical model 20 p2958 A72-39456

Earth density, surface wave velocity and other properties calculation from model consistent with physical and petrological mantle theories

20 p2917 A72-39475

Simple conduction model for the theoretical steady-state heat pipe performance.

20 p2984 A72-39607

An advanced stochastic model for threshold crossing studies of rotor blade vibrations.

20 p2885 A72-39622

Mathematical models for radiative heat transfer prediction in real enclosures, noting directional characteristics of heat exchanging surfaces

[ASME PAPER 72-HT-K]

20 p2984 A72-39652

Mathematical model for surface tension induced thermocapillary fluid flow influence on conductive heat transfer through condensate film broken by non-wetting strips

[ASME PAPER 72-HT-H]

20 p2985 A72-39654

An analysis of heat transfer in turbulent pipe flow with variable properties.

[ASME PAPER 72-HT-59]

20 p2985 A72-39657

Saturated liquid film boiling on vertical surface, calculating local heat transfer rates as function of height and superheat from turbulent vapor flow model

[ASME PAPER 72-HT-38]

20 p2986 A72-39668

A parametric study of the transient ablation of Teflon.

[ASME PAPER 72-HT-32]

20 p2986 A72-39671

A digital simulation system for heat transfer modelled by ordinary and partial differential equations.

[ASME PAPER 72-HT-25]

20 p2986 A72-39673

A two-equation model of turbulence applied to the prediction of heat and mass transfer in wall boundary layers.

[ASME PAPER 72-HT-15]

20 p2986 A72-39685

The calculation of low-Reynolds-number phenomena with a two-equation model of turbulence.

[ASME PAPER 72-HT-20]

20 p2914 A72-39688

Digital computer hierarchical structure based on tree model using request/service resources as nodes, examining parallel multiple-stream organizations effectiveness

20 p2906 A72-39735

Mathematical model for MOS transistor circuit analysis, noting parameters measurement and environmental effects representation

20 p2909 A72-39783

Mathematical model for moving radiometer system for reflected solar radiation measurement, discussing instrument time constant effect on surface emittance variations reproduction

20 p2927 A72-39795

Reliability prediction of a two-unit standby redundant system with standby failure.

20 p2929 A72-39855

Mathematical model for Venus phase anomaly, noting upper limit of reflecting layer for refraction effect

20 p2972 A72-39874

Spherical kinematic dynamo models with asymmetric magnetic fields based on mean field electrodynamics and on nearly axisymmetric limit

20 p2954 A72-39875

One dimensional migratory dynamo model for alpha effect turbulence controlled by increasing magnetic field, considering oscillatory antisymmetric solutions relation to solar cycle

20 p2972 A72-39877

Computerized long term weather forecasting via mathematical modeling of atmospheric processes based on meteorological parameters worldwide observational data

20 p2948 A72-39939

Dynamic adjustment of initial model fields by using complete equations of hydrothermodynamics

20 p2949 A72-39943

Characteristics of models of detonation spinning in various combustible media

20 p2987 A72-40045

Turbulent mixing of fluids of different density moving in a tube

21 p3044 A72-40129

Russian book - Mathematical modeling and electrical circuit theory, Number 8.

21 p3023 A72-40153

Solution of the general linear programming problem by electronic simulation using the regularization method

21 p3023 A72-40155

Inverse data transformation in control problems

21 p3036 A72-40156

Modeling a hybrid quasi-analog system on a computer

21 p3023 A72-40157

Digital simulation of the SEI-1 static electrointegrator for solving heat-type equations

21 p3127 A72-40160

Simulation of torsional vibrations of rods without concentrated masses

21 p3116 A72-40167

Simulation of flexural vibrations of rods without concentrated masses

21 p3116 A72-40168

Some problems in the mathematical simulation of blade vibrations in turbomachines

21 p3116 A72-40169

Accuracy of alpha-analog simulation of linear algebraic equations in the case of a nonzero discrepancy vector

21 p3074 A72-40170

Russian book - Mathematical modeling and electrical circuit theory.

21 p3036 A72-40176

Simulation of physically nonlinear multispin beams

21 p3116 A72-40180

Using the quasi-homogeneity of differential equations in modeling physical systems

21 p3083 A72-40377

Mathematical model of earth liquid core dynamo mechanism for magnetic field maintenance based on simple motions with spherical harmonic form

21 p3048 A72-40400

Mathematical model of two-component alga-bacteria biocenosis

21 p2997 A72-40431

Russian book - Hydrodynamic evolution model of the earth.

21 p3103 A72-40461

Further study of the severe storm with a rotating updraft configuration.

21 p3077 A72-40466

A method of calculating the parameters of a linearized transistor model

21 p3027 A72-40475

A contribution to the theory of finite antenna groups, taking into consideration radiation coupling

21 p3028 A72-40503

Theoretical model prediction for matched filter selectivity and noise effects on strained object deformation in optical correlation applications, comparing results with experiments

21 p3053 A72-40611

Void lattice model for Mo physical properties and equilibrium lattice spacing determination, calculating defect Green function

21 p3066 A72-40623

Current and voltage waveform measurements with sampling oscilloscope and capacitive voltage-divide probe to verify TRAPATT diode oscillator theoretical model

21 p3032 A72-40635

Failure diagnostics in mathematical models of automatic control systems

21 p3038 A72-40712

Crystalline lens optical structure in human eye, representing on and off axis imaging characteristics by mathematical model

21 p3007 A72-40737

Light pulse propagation through clouds - Models and experiments.

21 p3063 A72-40857

Canonic model representations for communication receiver to analyze and simulate input-output behavior as nonlinear signal processing black box

21 p3019 A72-40889

A mathematical model of the chemoreflex control of ventilation.

21 p3008 A72-40917

Mathematical models for temperature profiles and heat transfer rates in two-stream and multistream cross flow heat exchanger

21 p3128 A72-40931

Diffusion in the system K₂O-SrO-SiO₂. IV - Mobility model, electrostatic effects, and multicomponent diffusion.

21 p3097 A72-40935

Unsteady burning of reacting mixture of air and condensed-phase combustion products in closed variable volume, noting mathematical model for parameters calculation

21 p3128 A72-40977

Application of variational methods to the solution of some thermal shock problems

21 p3128 A72-40978

Two explanations of temporal changes in ability-skill relationships - A literature review and theoretical analysis.

21 p3008 A72-41015

Numerical model of NGC 7662 consistent with line strengths and ratios, considering double shell structure and central star flux deviation from black body

21 p3105 A72-41033

Mathematical model for dielectrics with time dependent polarization, noting relaxation time distribution function

21 p3085 A72-41074

Non-Hertzian contact stresses in a smoothly cradled heavy cylinder.

21 p3119 A72-41108

A model of low-frequency sound propagation in a lined duct.

21 p3085 A72-41112

Kullback-Leibler information function and the sequential selection of experiments to discriminate among several linear models.

21 p3075 A72-41187

Ground and torque relation to swivel angle and lateral displacement of wheel rim plane, using string model for tire

21 p2996 A72-41260

A method to calculate electric currents in quiescent prominences.

21 p3108 A72-41282

Determination of the limits of applicability of a continuous model when calculating a discrete polar lattice disk

21 p3122 A72-41346

Lectures on theory of manual-vehicle control.

21 p3011 A72-41418

Some contributions to the theory of linear models describing the control behaviour of the human operation.

21 p3011 A72-41419

The design of a nonlinear multi-parameter model for the human operator.

21 p3011 A72-41421

The functional organisation of object directed human intended-movement and the forming of a mathematical model.

21 p3011 A72-41422

The influence of a prediction display on the human transfer characteristics.

21 p3012 A72-41432

Application of wall corrections to transonic wind tunnel data.

[AIAA PAPER 72-1009]

21 p3041 A72-41591

Burgers model equation for shear flow turbulence with complex physical processes and nonlinearities in governing equations

21 p3047 A72-41637

Turbulent flow experimental and theoretical investigation, discussing Reynolds stress transport equations, shear layers and turbulence models in context of digital prediction methods

21 p3047 A72-41639

Phenomenological models of the electron-phonon interaction and the superconductivity criterion of metals

21 p3098 A72-41688

Physical model of the onset of turbulent burning of compacted systems in a half-closed volume

21 p3131 A72-41699

Optimum spatial filter for an anisotropic background-noise.

21 p3036 A72-41839

Electrodynamic mathematical model for electroconductivity of nonuniform plasma with Hall effect, calculating current distribution from Riemann problem solution

22 p3210 A72-41888

Development and optimization of a nonlinear multiparameter human operator model.

22 p3149 A72-41949

Transient oscillator analysis of a high-pressure electrically excited CO laser.

22 p3184 A72-41970

Resonant interaction of an electrostatic wave with electrons in a current sheet.

22 p3169 A72-42008

Gravitational theory strong discontinuity conditions, using fundamental variational equation for field and media model construction in general relativity theory

22 p3204 A72-42089

Nonlinear problems of analyzing the observability of the trajectories of spacecraft motion on the basis of measured data

22 p3223 A72-42203

Mathematical model for lattice-type error distribution of parallel channels communication system, noting metric for algebraic signal coding method

22 p3154 A72-42234

Mathematical methods of man machine control system synthesis, using homeostasis and functional compatibility principle

22 p3162 A72-42243

An analysis of aircraft lateral-directional handling qualities using pilot models.

[AIAA PAPER 72-962]

22 p3137 A72-42347

Equations of motion appropriate to the analysis of control configured vehicles.

[AIAA PAPER 72-952]

22 p3137 A72-42353

Error sensitivity of statistical models with pattern rearrangement for analysis of interplanetary scintillation in ecliptic plane

22 p3218 A72-42402

Induction effect of slowly decaying ring current, estimating electric field strength by model consisting of earth dipole and symmetric ring

22 p3172 A72-42430

Analytical model for a polarizable medium at radio and lower frequencies.

22 p3155 A72-42467

Extremum principles for a class of dynamic rigid-plastic problems.

22 p3235 A72-42522

The dynamics of the ascending flight of sounding rockets

[ONERA, TP NO. 1056]

22 p3231 A72-42582

Causality in the relativistic theory of elastic media in the three-dimensional case. 22 p3206 A72-42626

Pair-correlation and angular distribution functions calculations for one and two dimensional amorphous structures 22 p3197 A72-42797

Analytical model of the flash produced in aluminum-aluminum hypervelocity impacts. 22 p3207 A72-42867

Mathematical models from UV, IR and radio observations of chromosphere and transition region to corona, noting temperature effects of shock wave dissipation 22 p3229 A72-42903

Mathematical model for plastic deformation of polycrystalline materials with Hookes law elastic strains 22 p3242 A72-43135

Two body model for three body problem of uniformly distributed and isotropically expanding gravitational matter of Einstein-Sitter universe, noting metagalaxy cooling rate 23 p3334 A72-43241

Hydrodynamic and Wiener-Siegel hidden parameter models incapability for quantum mechanics reduction to classical mechanics, obtaining proofs to von Neumann theorem 23 p3312 A72-43298

Einstein equations reduction to friction systems in homogeneous cosmological models, investigating Bianchi models isotropization and statistical analysis 23 p3335 A72-43301

Model of degenerate semiconductor near semielectric phase transformation, noting superconducting state at low temperatures with corresponding impurity concentrations 23 p3323 A72-43317

A stability analysis for tethered aerodynamically shaped balloons. 23 p3250 A72-43332

Numerical treatment of a model of the hydromagnetic dynamo with a selected system of convection in the earth's core. 23 p3284 A72-43422

Electromagnetic induction in a half-space with a cylindrical inhomogeneity. 23 p3284 A72-43423

Structural mass properties mathematical modeling for dynamic structural analysis, describing matrix notation for finite element methods application [SAWE PAPER 944] 23 p3344 A72-43484

Probabilistic model for tensile strength of brittle fibers, discussing clamping effects at various gage lengths and Weibull flaw structure 23 p3305 A72-43490

Numerical simulation of the relaxation of a beam of charged particles in a strong electric field 23 p3315 A72-43530

Modeling a holographic process on a computer 23 p3287 A72-43531

Empirical support for a stochastic model of evolution. 23 p3254 A72-43565

Computer-controlled queuing system with service interruptions. 23 p3275 A72-43605

Isotropic materials nonlinear rheonomic behavior at small strains, deriving model structure deformation laws 23 p3345 A72-43623

Stochastic models for block triangulation by bundle approach, comparing theoretical accuracies obtained from different block adjustment methods 23 p3284 A72-43631

The dynamics and control of Eulerian turbomachines. [ASME PAPER 72-AUT-S] 23 p3279 A72-43633

Lumped parameter model description of distributed parameter fluid dynamic systems by bond graph techniques [ASME PAPER 72-AUT-J] 23 p3279 A72-43634

On the efficient reduction of truncation error in numerical weather prediction models. 23 p3311 A72-43675

Mathematical formulation of ice crystal formation and propagation mechanism in seeded supercooled convective clouds 23 p3311 A72-43722

Statistical strength and plasticity criterion for materials in a complex stress-strain state 23 p3349 A72-43953

Numerical models of elliptical galaxy based on rotational speed and integral equations for mass distribution 23 p3338 A72-44033

Properties of a superconducting point contact contained in a resonator 23 p3324 A72-44221

Elements of a theory of CW gasdynamic quantum generators. 23 p3297 A72-44225

Reliability analysis of a jet engine fuel system with the aid of an analog computer using operational data 23 p3326 A72-44282

Mathematical model for dynamics simulation of aircraft turboprop engines, using digital, analog and hybrid computers 23 p3327 A72-44288

A digital model of jet engine hydraulic fuel controller 23 p3327 A72-44291

Determination of the statistical characteristics of a turbine stage and a group of turbine stages 23 p3328 A72-44295

Charts for confidence limits and tests for failure rates. 23 p3294 A72-44395

Multiple collisions and an optical model of the inelastic interaction between cosmic particles and nuclei 23 p3330 A72-44413

Approximation for Monte Carlo method modeling of pion-nucleon and nucleon-nucleon inelastic collisions at high energies 23 p3317 A72-44414

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models 24 p3466 A72-44578

Lockheed airline system simulation and aircraft scheduling models. 24 p3466 A72-44579

Possibility of determining the lung ventilation volume by the mathematical modeling method 24 p3374 A72-44597

One-level fine-mesh limited-area grid numerical weather prediction atmospheric model, evaluating various finite difference schemes, boundary conditions and initialization methods 24 p3420 A72-44619

Time ratio models of equipment availability for using and procuring agencies, considering performance effectiveness criterion and suboptimization risk 24 p3467 A72-44659

Allocating optimum time for systems malfunction search. 24 p3406 A72-44661

Robert Bruce's spider problem extended - Reliability of adaptive experimental systems. 24 p3406 A72-44666

The problems of reliability growth and demonstration with military electronics. 24 p3384 A72-44670

Cumulative damage stochastic models and distributions of strength of steels and graphite. 24 p3412 A72-44673

A method for balancing geopotential and wind fields 24 p3420 A72-44765

Radiative transfer in a gray isothermal spherical layer. 24 p3461 A72-44805

Model potential calculations of lithium transitions. 24 p3426 A72-44808

A finite element model for shells based on the discrete Kirchhoff hypothesis. 24 p3457 A72-44876

Relative position of the rib within the chest and its determination on living subjects with the aid of a computer program. 24 p3372 A72-44957

Pulsed carbon dioxide laser medium composition, pressure and electrical parameters effects on output power, energy and efficiency from mathematical model solution of kinetic equations 24 p3409 A72-44966

Hyperbolic space criterion for cosmological model based on axioms conforming to special and general theory of relativity, noting coordinate transformation 24 p3439 A72-44969

Combustion product gas dynamic motion effects on detonation front propagation, discussing reacting blast wave and finite kinetic rate models and asymptotic results 24 p3391 A72-45027

Model for shock wave propagation through gas-liquid drop medium based on liquid phase atomization by boundary layer stripping 24 p3391 A72-45049

A theoretical model for the combustion of droplets in super-critical conditions and gas pockets. 24 p3463 A72-45050

Response of convectively controlled burning to non-linear disturbances. 24 p3464 A72-45055

Exponential functions model for D region vertical distribution of electron density profiles, taking into account solar X- and cosmic rays 24 p3397 A72-45081

Multilayer plasma model for MHD pulse propagation in ionospheric waveguide, noting approximation of Alfvén velocity distribution by plasma layers 24 p3397 A72-45085

Mathematical model for life support system optimization in terms of reduced mass minimization as quality criteria for energy conversion and metabolic processes 24 p3375 A72-45133

Flow model for the determination of the heat transfer on the base of vehicles with clustered H2-O2 rocket engines. 24 p3434 A72-45201

Frictionless core flow and friction layers at turbomachine walls and blades for real two dimensional cascade flow modeling 24 p3394 A72-45370

Jet stream formation from uniform distribution of grains in similar elliptical orbits, discussing models with numerical simulation 24 p3445 A72-45461

Problems of complex object modeling based on heuristic self-organization 24 p3376 A72-45509

Mathematical description of a human operator in ergatic control systems 24 p3376 A72-45514

Cross section parameters for electron impact excitation, noting mathematical models for aeronautical users 24 p3400 A72-45591

Mathematical model for secondary electron production fall-off, calculating ionization cross section from electron distribution 24 p3400 A72-45592

A power-law model for the multiple-integral theory of non-linear viscoelasticity. 24 p3460 A72-45696

MATHEMATICAL STATISTICS

U STATISTICAL ANALYSIS

MATHEMATICAL TABLES

Liapunov functions generation, using auxiliary functional differential equations table for invariance determination 06 p0838 A72-17378

Pade table for formal power series with notation for extension to Laurent series, relating algebraic theory to bigradient determinants and numerical analysis algorithms 11 p1676 A72-25501

Table of indefinite and definite integrals of products of error functions with transcendental and special functions 15 p2262 A72-31589

A table of solutions of the one-dimensional Burgers equation. 19 p2828 A72-38717

New method for determining the distribution of delta-g anomalies for a sphere, horizontal cylinder, and vertical material half-line 22 p3173 A72-42574

MATHEMATICS

Applied mathematics and mechanics - Conference, Mannheim, Germany, April 1971 15 p2323 A72-31451

MATHIEU EQUATION

U MATHIEU FUNCTION

MATHIEU FUNCTION

Harmonic waves propagation in infinite transverse isotropic cylinder with elliptic cross section, obtaining solution in terms of Mathieu functions 14 p2163 A72-30190

Special boundary value problems solution method for Mathieu differential equation, transforming Mathieu equation to Hill differential equation via Fourier series expansion 15 p2264 A72-32468

Integral equation for pressure distribution by rigid punch contact with elastic half space, solving by Mathieu function expansion in Fourier series 21 p3126 A72-41541

MATRICES

Pattern recognition by computerized local processing of binary matrix representations 01 p0018 A72-10476

MATRICES [CIRCUITS]

Analog matrix, input data and procedure for AI frame and Cu-clad printed circuit board module thermal resistance analysis using ECAIP program 01 p0035 A72-10380

Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation 02 p0193 A72-12342

Destructive readout computer memory of wire substrate electrodeposited with two thin Permalloy layers separated by Cu [IEEE PAPER 11,5] 03 p0332 A72-13765

Coupled-film closed-easy-axis arrays for large capacity NDRO multiple-write bulk memory, discussing disturb mechanisms limitation on performance and design [IEEE PAPER 21,9] 03 p0328 A72-13780

MOS Si-gate arrays for static, dynamic and programmable read-only memories, investigating information storage reliability 03 p0336 A72-14282

Computer analysis of linear electric circuits without restrictions on network topology and component composition, using system matrix 04 p0495 A72-14464

Programmable cellular cascades and arrays synthesis for realizing arbitrary Boolean functions or parallel arithmetic operations

04 p0498 A72-15107

Thin film conductors, distributed film resistors and capacitors design and associated IC layout to form functional arrays

06 p0790 A72-18574

Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation

08 p1143 A72-21948

Electroluminescent matrix display system with amorphous semiconductor threshold switches for isolation and memory, discussing performance and address waveforms

12 p1788 A72-27239

Active RC circuit synthesis by state model method, minimizing capacitances of admittance matrix for microelectronic circuit technology

15 p2210 A72-31595

Diffraction theory for large storage capacity holographic random access memory design, discussing geometric optimization of detector array and storage plate

15 p2238 A72-32159

Adjacent channel discrimination enhancement in Gray-scale binary coded two dimensional array, using checkerboard filter for pattern noise suppression

15 p2238 A72-32162

Minimum elements number on discrete two dimensional hologram with constant distance between emitters, considering reduction of matrix elements

15 p2242 A72-32665

Cellular-array arithmetic unit with multiplication and division

17 p2519 A72-34297

Investigation of the dependence of the electrical characteristics of a 'Fotovolt'-type high-voltage matrix photoconverter on the radiation intensity and temperature

17 p2498 A72-35511

Electrical properties and fabrication details of integral diode matrices with controllable avalanche breakdown produced from zone melted silicon under temperature gradient

19 p2774 A72-38416

Two dimensional microprogrammed cellular arrays logic organization and control structure for multifunctional digital subsystems

20 p2906 A72-39736

Disk and toroidal solid state computer storage cellular arrays without boundary cells, comparing read- and write-time characteristics with conventional organizations

20 p2910 A72-39966

Experimental investigation regarding Archimedean spiral antennas for the L-band, and radiator groups constructed from them whose radiation directions are controlled by a conduction matrix

21 p3028 A72-40510

Application of the transmission-line-matrix method to homogeneous waveguides of arbitrary cross-section

21 p3032 A72-40629

Parallelized algorithms for computer solution of spanning tree, distance and path problems on cellular array of identical modules containing memory and combinational logic

22 p3157 A72-43023

Gain measurements of matrix-type TEA CO₂ laser

23 p3296 A72-44072

MATRICES [MATHEMATICS]

NT ADJOINTS
NT CANONICAL FORMS
NT EIGENVALUES
NT EIGENVECTORS
NT JORDAN FORM

Spacecraft flight trajectory parameters from unknown second moment matrix of navigation measurement errors

01 p0127 A72-10352

Complex structures mass and stiffness matrices reduction by automatic condensation, calculating lowest eigenfrequencies and eigenmodes of substitute systems

[DGLR PAPER 71-108] 02 p0299 A72-12721

State space method application to power servomechanism analysis, discussing transition matrices and state equations

03 p0338 A72-13645

Covariance matrix of coordinate fluctuations of instantaneous radar center of reflection from set of scatterers

04 p0487 A72-15144

Matrix representation of nonlinear equation iterations based on polynomial methods, considering convergence and application to parallel computation

04 p0540 A72-15373

Matricial difference schemes based on numerical methods characterized by approximations for integrating stiff systems of differential equations

04 p0540 A72-15375

Modal theory of state observers for control of multivariable time-invariant linear systems with plant matrices possessing distinct eigenvalues

04 p0507 A72-15529

Multiple-input multiple-output linear time invariant feedback systems stability, investigating continuous-time case

04 p0507 A72-15694

N-port resistive network synthesis involving use of vectors, cones, bilinear inequalities and matrices

05 p0639 A72-15801

Analytical inversion of quasi-orthogonal matrix for Simpson method of state feedback gains calculation in multiloop linear mode control systems

05 p0639 A72-15807

Quasi-steady continuous process adaptive optimal control, discussing algorithms and model for sensitivity matrix calculation and digital simulation for strategy

05 p0640 A72-16200

Interplanetary spacecraft trajectory error analysis by closed form approximation to state transition matrix, enabling rapid estimation with computer program

05 p0718 A72-16443

Bounds on condition number for irregular meshes of finite elements expressed in terms of extremal eigenvalues of element matrices

[AD-739416] 05 p0682 A72-16540

Deflection function for symmetrical bending of unloaded annular plate, constructing stiffness, mass and stability coefficient matrices by function manipulation

05 p0739 A72-16550

Flight mechanics derivative transformations by matrix methods for changing coordinate or independent variable systems

[DFVLR-SONDDR-175] 05 p0612 A72-16706

Error covariance matrix square root calculation in orbit determination from ground based observations

05 p0720 A72-16752

Error covariance matrix evaluation at end of orbit extrapolation in terms of state vectors at measurement, discussing computation and interpretation

05 p0720 A72-16753

Finite periodic beam response to turbulent boundary layer pressure field fluctuation, using transfer matrix technique

[AIAA PAPER 72-171] 05 p0650 A72-16832

Generalized matrix inverse application to dynamic system state vector estimation, determining covariance matrix for comparison with optimal Kalman type procedure

05 p0641 A72-17089

Linear system digital simulation by matrix exponentiation with generalized hold order algorithm for accuracy improvement at less computer time

06 p0839 A72-17630

Complete measurement in holography using complex coefficients of conversion matrix of interaction between coherent beam and recorded object

06 p0817 A72-18014

Coefficient matrix for estimation of numerical solution error bounds for finite element models

07 p1025 A72-18786

Real rational function Cauchy index computed from integral functions of polynomial coefficients and signature of infinite class of matrices

07 p1026 A72-18817

Time-variable multivariable systems reduction to completely controllable and observable systems by subdivision and transformation procedures, using subsystems order matrices

07 p1026 A72-19271

Linear multivariable systems feedback invariant structure of controllable matrix pair under rich transformation group including regular linear coordinate and state-feedback transformations

07 p0960 A72-19700

Weighting matrices effect on optimal regulator for linear time invariant multivariable systems

07 p0961 A72-19713

Matrices of fundamental solutions constructed for loading singularities and Green method in unbounded micropolar elastic continuum

07 p1095 A72-20243

Linear first order differential equation transient response computer simulation using transition matrix method

07 p1028 A72-20340

Dynamic system time varying parameters on-line estimation using adaptive extended Kalman filter based on predicted error covariance matrix alteration

08 p1144 A72-20847

Significance criteria for comparing strength parameter against expectation from random group of vectors in variance matrix applications

09 p1341 A72-23023

Numerical algorithm for matrix case extension of transport problem in periodic media

09 p1342 A72-23368

Matrix notation for replacing vector analysis in control theory by introduction of differential operators similar to Hamiltonian operator

09 p1352 A72-23369

Revised algorithm for unconstrained optimization using quasi-Newton methods based on recurring factorization of approximation to Hessian matrix

10 p1502 A72-23723

Optimal probing signals design for state vector parameter estimation, considering Fisher information matrix function as optimality criterion

10 p1454 A72-23786

Muller matrix derivation for microwave light modulation studies in quasi-homogeneous magnetooptical and electrooptical media, taking into account finite light speed

10 p1493 A72-24914

Distributed elastic system discrete model mass, stiffness and damping matrices derivation from dynamic test response data

[AIAA PAPER 72-346] 11 p1728 A72-25375

Square matrix inverse computation by convergent power series method

11 p1678 A72-26368

Matrix and graphic test construction methods for optimal design of logic networks in automatic control systems

11 p1612 A72-26443

Regular matrices inversion for linear equations solution, using modified method of completing

11 p1678 A72-26495

Optimality and strategy efficiency in Gaussian elimination on sparse matrix, using graphical method

11 p1678 A72-26496

Automatic search for Huffman sequential logic circuit breakdown detection sequence, using VEGA program through matrices and graphs utilization

11 p1612 A72-26549

Linear multistep methods with variable matrix coefficients for asymptotic numerical integration of ordinary differential equations system

11 p1679 A72-26960

Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program

12 p1752 A72-28142

Transfer matrices determination for two terminal pair network derived from four terminal pair network, considering bandpass filters

13 p1931 A72-29060

Neuronal network numerical and analytic studies, using invariant imbedding and matrix Fredholm integral equation

13 p1986 A72-29400

Finite element displacement field with internal equilibrium application to nine degrees of freedom triangular bending element stiffness matrix calculation

14 p2168 A72-30930

Matrices and permutation rules for tetrahedral polynomial finite elements for Helmholtz equation, commenting on computer time and convergence rate

14 p2126 A72-30932

Slender rotating body aeroelastic behavior under inertial, gravitational, thrust, servocontrol, elastic and aerodynamic forces, presenting equilibrium equations in matrix form

15 p2319 A72-31210

Nonlinear electronic (transistor) system mapping-on by matrix dynamic transform algorithms, comparing with Newton-Raphson method

15 p2210 A72-31491

Algorithm to transpose large matrices in excess of direct access computer memory for external sequential storage

15 p2203 A72-31748

Generalized differential system for Hamiltonian, Hermitian and corresponding symmetric nonreal linear matrix differential equations systems

15 p2263 A72-31756

Nonlinear equations systems iterative solution methods convergence, generalizing Varga matrix splitting technique to nonlinear mappings in Banach space

15 p2264 A72-32465

Skewed wire antennas electric and magnetic near fields prediction from computer programs based on matrix inversion method

15 p2209 A72-32567

Numerical methods for Liapunov linear matrix equations solution in control systems analysis and design

15 p2265 A72-32798

Three dimensional orthogonal coordinate system transformation by simultaneous independent small angle axes rotation using transformation matrix

16 p2424 A72-33249

Sandwich structures buckling calculation by transfer matrices with allowance for cross section shearing

16 p2471 A72-33680

System theory on group manifolds and coset spaces

17 p2575 A72-34949

Monograph - The finite-element method in plate bending analysis

17 p2634 A72-35547

Book - Riccati differential equations

17 p2577 A72-35798

Functional relationships between the conventional steady-state error characteristics and the weighting matrices in the quadratic performance index.
18 p2672 A72-36058

On discrete-time Kalman filter in singular case and a kind of pseudo-inverse of a matrix.
18 p2672 A72-36059

Matrix coefficients calculation of state variables equations for network analysis and synthesis.
19 p2777 A72-37313

Formal extension of the possibilities of the method of integral transforms in the study of linear distributed systems with constant parameters.
19 p2834 A72-37432

Symmetric and innerwise matrices for the root-clustering and root-distribution of a polynomial.
19 p2825 A72-37851

Direct and inverse transformations between phase variable and canonical forms.
19 p2826 A72-38230

Decoupling of linear discrete time systems by state variable feedback.
19 p2827 A72-38563

A long line as a limit of an infinite quadrupole chain.
20 p2904 A72-39592

A modernized specialized computer for evaluating determinants.
21 p3036 A72-40161

Calculation of intensities of vibration-rotation of a diatomic molecule by the factorization method.
21 p3087 A72-40471

Nonlinear differential equation periodic solution approximation by pseudo-linear representation of nonlinear terms effects on single harmonic, using describing function matrix method.
21 p3076 A72-41314

Computational solutions of matrix problems over an integral domain.
21 p3076 A72-41315

Mathematical spectra theory application to matrix eigenvalue problem, obtaining explicit form of determinant characteristic polynomial by numerical methods.
21 p3076 A72-41781

Computer-aided vector Taylor series approximation of fundamental matrix of ordinary first order differential equations with variable coefficients.
21 p3076 A72-41785

Instability of the characteristic indices of systems of linear differential equations with almost periodic coefficients.
22 p3197 A72-41853

Structural mass properties mathematical modeling for dynamic structural analysis, describing matrix notation for finite element methods application [SAWE PAPER 944].
23 p3344 A72-43484

Formal solution of a system of differential equations of fractional rank with an irregular singular point.
23 p3308 A72-43579

Design of controllers for open-loop unstable multivariable system using inverse Nyquist array.
23 p3275 A72-43609

Iterative method of computing the limiting solution of the matrix Riccati differential equation.
23 p3275 A72-43610

Efficient method to multiply successively functions of the companion matrix and applying the method to evaluate transient response.
23 p3309 A72-43862

Ray optics applications to electromagnetics and other disciplines, discussing matrix representation for wavefront curvature and field computation simplification via transformations.
23 p3314 A72-44331

Use of the three-dimensional covariance matrix in analyzing the polarization properties of plane waves.
23 p3315 A72-44518

Determination of the covariance matrix of the spatial coordinates of points of a geometrical model.
24 p3397 A72-44867

MATRIX ALGEBRA
U MATRICES [MATHEMATICS]
MATRIX ANALYSIS
U MATRICES [MATHEMATICS]
MATRIX METHODS
Matrix calculation of forced atmospheric oscillations for Hall, Coriolis and Pedersen regions.
01 p0053 A72-10090

Matrix formulation of free-free modal synthesis procedures for dynamic analysis of composite structural systems, giving flow charts [SAE PAPER 710783].
01 p0137 A72-10274

Algorithms for mass and stiffness matrices synthesis from experimental vibration modes applied to cantilever beam [SAE PAPER 710787].
01 p0137 A72-10278

Pollution and environmental quality remote sensing, describing five dimensional sensor/applications matrix for decision guidance.
02 p0212 A72-11827

Noncircular cylindrical shells dynamic analysis using transfer matrix method.
02 p0293 A72-12372

Matrix method calculation for aerodynamic loads, transverse forces, bending moments, torques and twist of hinged main rotor blades in helicopter during forward flight.
02 p0294 A72-12440

Statistical linearization approach to determine approximate instantaneous correlation matrices of nonlinear structure response to nonwhite excitation.
02 p0298 A72-12663

Stiffness matrix method application to finite deformation theory, noting convergence through use of iterative interpolation in numerical calculations.
02 p0298 A72-12667

Strain anisotropy effect on thin walled tubular steel samples with combined bending and torsion, constructing matrix and stress vectors.
03 p0445 A72-13578

Antenna arrays near-field radiation pattern prediction, using Harrington matrix methods.
03 p0323 A72-14030

Wire antenna computer design to determine feed voltages for obtaining pattern synthesis and gain maximization, using matrix methods.
04 p0495 A72-14492

High frequency diffraction problems, using matrix formulation in spectral domain.
04 p0489 A72-15396

Vibration theory calculations using parametric matrix function method and associated operators.
04 p0550 A72-15543

Spacecraft attitude control system reliability and performance improvement through nonorthogonal coordinates application, using matrix technique.
05 p0728 A72-16477

Biaxial bending solution by tangent stiffness matrix method suitable for computer application.
06 p0897 A72-17967

Algorithm for bandwidth reduction of symmetric matrices for complex structural problems.
06 p0897 A72-17968

Dynamic matrix analysis of vibrating three dimensional frame structures, comparing discrete and continuous mass systems.
06 p0897 A72-17971

Iterative and direct modification procedures for structural analysis matrix displacement method, discussing computer program implementation.
07 p1089 A72-19329

Stress-strain state determination in elastic parallelepiped by net point method and matrix filtering.
07 p1091 A72-19754

Book on matrix structural analysis covering matrix algebra concepts, direct stiffness matrix methods, lifting surface, nonlinear truss and structural partitioning analysis, etc.
07 p1092 A72-19908

Nonlinear large amplitude vibration of beams for various support conditions, using finite element matrix displacement method.
08 p1245 A72-21626

Green matrix computation algorithm extensible to spherical and toroidal closed shells of revolution for stress-strain state determination.
08 p1246 A72-21672

Transfer matrix and dynamic stiffness techniques application to critical speed analysis in rotating machinery.
08 p1224 A72-22128

Transfer matrix method application to rocket vehicles structural dynamics, incorporating axial and aerodynamic lift forces in vibrational analysis.
09 p1397 A72-23499

Spectral line formation in atmosphere with plane parallel layers and frequency independent source function, using matrix approach for transfer equation solution.
10 p1535 A72-24058

Matrix displacement method for nonuniform beam vibration problems, using internal nodes concept.
11 p1735 A72-25740

Curved cylindrical shell finite element with reduced stiffness matrix, noting convergence for symmetrical and unsymmetrical loading.
11 p1735 A72-25896

Finite element method for buckling coefficients of isotropic rectangular plate subject to linearly varying axial compression, using general linear geometric matrix.
11 p1736 A72-25999

Jones matrix method for polarization natural states, frequencies and mode losses calculation in anisotropic optical resonators.
11 p1688 A72-26347

Matrix methods in structural dynamics, discussing frequency response, normal mode, Fourier, Newmark, difference and Houbolt methods.
12 p1882 A72-27338

Book on structural analysis covering statically indeterminate structures, force and displacement methods, flexibility and stiffness matrices, strain energy, virtual work, energy theorems, etc.
15 p2325 A72-31517

Orthogonal vibration damping matrix numerical evaluation, comparing Caughey series and direct approaches.
15 p2326 A72-31711

Temperature dependent elastoplastic wing assemblies and continua analysis via matrix displacement method.
16 p2471 A72-33791

Matrix progression method analysis of free vibration problem for cantilever thin circular cylindrical elastic shells, using Flugge equations.
16 p2475 A72-34173

Calculation of correlation matrices for linear systems subjected to nonwhite excitation. [ASME PAPER 71-APMW-10].
17 p2625 A72-34316

Freedoms retention determination eigenvalue analysis of complex structures large dynamic matrices deriving transformation vectors based on maximum swept volume deformation modes.
17 p2576 A72-35253

Monograph - The elastic flexural-torsional buckling of beam-columns by discrete element techniques.
17 p2634 A72-35548

Programmable computation method based on matrix formulation for numerical solution of differential equations in heat conduction and thermal stress problems.
17 p2635 A72-35898

Balancing of a flexible rotor by means of mode separation.
18 p2732 A72-36072

Higher vibration modes by matrix iteration.
18 p2736 A72-36772

FORTRAN subroutines for plate bending and plane stress elements stiffness and geometric matrices generation, taking into account anisotropic properties and linear thickness variations.
18 p2739 A72-37166

Bounds on the extremal eigenvalues of the finite element stiffness and mass matrices and their spectral condition number.
18 p2705 A72-37202

A general theory of polarization holography and its application to photoelastic analysis.
19 p2799 A72-37627

Structural-matrix methods for discrete automatic control system designs.
19 p2779 A72-38185

Book - An introduction to engineering systems.
20 p2945 A72-38925

Application of material formalisms to the specification of light polarization changing systems.
20 p2928 A72-40025

A consistent approach for treating distributed loading in the matrix force method.
21 p3122 A72-41261

Iteration process convergence improvement based on stiffness change expression as linear combination of two matrices in structural reanalysis.
22 p3235 A72-42602

Symmetrical bending of circular plates using finite elements.
22 p3236 A72-42605

Eigenvalue spectrum translation and frequency shifting by inertia and stiffness matrix modifications in iteration techniques.
22 p3207 A72-42850

Transfer matrix approach for determining stresses and displacements in elastostatics of laminated composites [ASCE PREPRINT 1674].
23 p3351 A72-44105

Butler-matrix fed arrays, discussing phase differences, scan steps and sectors, sidelobe structure and attenuation.
23 p3273 A72-44363

A method of computing numerically integrated stiffness matrices.
24 p3457 A72-44878

MATRIX STRESS CALCULATION
U MATRIX METHODS
MATRIX THEORY
Group matrix representation theory application to elastic spacecraft stabilization.
01 p0135 A72-10497

Two element matrix patterns generation with different degrees of internal constraint, developing objective complexity measures based on information theory or symmetry and grouping considerations.
01 p0013 A72-10715

Jones matrix representation of optical instruments applied to Fourier interferometers/spectrometers and spectropolarimeters/.
03 p0358 A72-13434

Time domain infinite matrices analysis methods for linear stationary and nonstationary multivariable systems, presenting recursion formulae.
06 p0792 A72-17310

Algorithm for bandwidth reduction of symmetric matrices for complex structural problems.
06 p0897 A72-17968

Density matrix equation solution in Liouville space, using variational procedure for laser mode equation and separable interaction method.
07 p1006 A72-19670

Toeplitz matrix in numerical solution of integral equation for cylindrical antenna and array, presenting rapid inversion algorithm by exploiting symmetry properties [AD-743577] 07 p0957 A72-19795

Linear inverse problem of coefficient matrix eigenvectors, implying surface waves and free oscillations for earth structure 08 p1159 A72-21495

Positive to quasi-stochastic matrix reduction by similar variation method, determining largest characteristic number and eigenvector 09 p1343 A72-23490

Algebraic dimensional analysis developed algorithm to generate optimized dimensionless products set associated with physical phenomenon, using matrix methods 10 p1443 A72-23916

Boundary value problems for overdetermined elliptical systems of differential equations with arbitrary sized rectangular matrix 10 p1506 A72-24777

Moore-Penrose pseudoinverse matrix computation, using single and multiple modulus arithmetic method for reduced roundoff error 11 p1676 A72-25505

Modal damping matrix off diagonal terms measurement in viscous damping exploration for dynamic analysis of linear structures 11 p1736 A72-25988

Complex square stochastic matrix spectral inverse, examining nonzero eigenvalues on unit circle 11 p1677 A72-26152

Polynomial theory problems, using Bezoutian matrix formed from polynomials a and b and matrix polynomial relating b to companion matrix of a 11 p1678 A72-26155

Square matrix inverse computation by convergent power series method 11 p1678 A72-26368

Inverse eigenvalue problem numerical solution for matrices and difference and differential equations, obtaining algorithms for parameters estimation 11 p1679 A72-26955

Book on density matrix theory application to lasers and masers, covering quantum mechanics, perturbation theory, magnetism and magnetic resonance, statistical ensembles, etc 12 p1826 A72-28203

Elementary formulas for scalar and matrix valued functions gradient calculation, including continuum mechanics application 15 p2262 A72-31587

Reduced density matrix dependence on nonzero boundary conditions, considering Salzburg-Kirkwood integral equations 15 p2282 A72-32448

Noninteractive compensation of linear multivariable control systems based on matrix block diagram technique 15 p2213 A72-32799

Matrix Riccati equation solution method in optimal control theory, noting boundary conditions implementation 15 p2265 A72-32803

Finite element method matrices in least squares approximation and elliptic partial differential equations, discussing numerical stability properties 17 p2573 A72-34219

Nonlinear generalizations of matrix diagonal dominance with application to Gauss-Seidel iterations. 17 p2573 A72-34220

On the Gaussian elimination method for inverting sparse matrices. 17 p2573 A72-34237

A sequential algorithm for covariance matrix calculations. 17 p2574 A72-34416

Magnetic dipole matrix elements for atomic transitions between Zeeman levels at microwave frequencies 17 p2585 A72-35769

Characteristic equation coefficients of monodromy matrix for linear system of second order homogeneous differential equations with periodic coefficients 21 p3075 A72-41092

Irreducible sparse matrix transformation to upper triangular form by row-column permutation formulated as linear integer programming problem 21 p3075 A72-41312

Reinforcement method algorithm for inversion of matrix with rational function terms 21 p3075 A72-41313

Gaussian elimination with floating point arithmetic, discussing algorithm for least squares scaling of matrices with less error than row and column norms equilibration 21 p3076 A72-41317

A constructive method of solving the Liapounov equation for complex matrices. 22 p3199 A72-42775

Reduction to diagonal form of some triangular-matrix classes in spaces of functions that are analytic in multicircular regions 23 p3308 A72-43581

Linear inequalities and P matrices, with applications to stability of nonlinear systems. 23 p3309 A72-43859

MATTER [PHYSICS]

Materials science historical development from ancient theories of structure of matter to modern atomic and field theories leading to general theory of elastic continuum 02 p0297 A72-12611

Hydrodynamics of matter-antimatter system embedded in thermal radiation, observing coalescence effect 03 p0416 A72-13013

Galactic superclusters and matter distribution in universe, considering systematic catalog errors and uncertainty of statistical tests 03 p0421 A72-13172

Equation of state for matter at 10-500 trillion g/cc, applying to baryon matter and neutron stars 04 p0571 A72-14557

Universe evolution, discussing constituents, matter and antimatter, quasars and radio stars in various galaxies 14 p2157 A72-30623

Electron and nuclear components and transformations of matter under extreme conditions of pressure and temperature exemplified in stellar /pulsar/ evolution 18 p2725 A72-36520

Kinetic equations for ultradense matter neutronization, noting stellar configuration of given mass with variable volume 21 p3086 A72-40096

Equation of state of neutron-star matter at sub-nuclear densities. 22 p3228 A72-42564

Joining of two semiclosed worlds and a cosmological model of matter-antimatter asymmetry. 23 p3336 A72-43489

Necessary conditions for steady state in radiation - Matter interaction and the role of entropy. 24 p3461 A72-44806

Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation 24 p3427 A72-45708

MATURE STREAMS

U STREAMS

MATURE VEGETATION

U VEGETATION

MAXIMUM LIKELIHOOD ESTIMATES

Error correction techniques of convolutional coding with Viterbi maximum likelihood decoding for communications systems design, using computer simulation 01 p0026 A72-10344

Optimal measurement programs for instrument controlled spacecraft trajectory sections, using maximum likelihood method 01 p0127 A72-10354

Adaptive maximum likelihood receiver for direct ranging navigation, comparing with phase locked receivers 05 p0686 A72-16560

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 05 p0721 A72-16760

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use 07 p0959 A72-19286

On-line digital computer maximum likelihood estimate of Earth atmosphere profile ahead of flight vehicle using discrete measurements of density, temperature and pressure 08 p1156 A72-20853

Maximum likelihood estimates of covariance parameters of time discrete nonstationary linear systems from residuals measurement of suboptimal sequential filter 08 p1145 A72-20865

Taxonomy for incomplete data problems, developing unified analysis methods based on maximum likelihood estimate 08 p1199 A72-21199

Maximum likelihood estimate of carrier frequency and arrival direction of radio signals in background noise for large aperture antennas 08 p1133 A72-21373

Maximum likelihood estimation for Weibull distribution parameters from multicensored samples by Monte Carlo simulation 08 p1200 A72-21589

Bayes estimators for Poisson distribution random parameters and reliability function, using Monte Carlo method and maximum likelihood estimation 08 p1200 A72-21590

State estimation for nonlinear discrete-time system based on quantized data, presenting maximum likelihood estimate solution and Monte Carlo simulation results 09 p1290 A72-23095

Maximum likelihood method of combining system and component data for reliability estimates 10 p1444 A72-24016

Maximum likelihood receiver performance for optical detection of multimode laser or scattered radiation, considering photocounting distribution, decision threshold and error probability 10 p1452 A72-24681

Constant false alarm rate signal processors for several electromagnetic interference types, using distribution-free methods and maximum likelihood estimation in radar target detection 10 p1437 A72-24683

Stellar physical parameters computed from multicolor photometric data on extratmospheric magnitudes by maximum likelihood method 11 p1715 A72-25296

Mathematical models for complex system debugging in initial life period, noting maximum likelihood estimates for failure rate functions 13 p1962 A72-28365

Psychological criteria for flying personnel selection in civil aviation, noting performance prediction based on maximum likelihood estimates 14 p2080 A72-30816

Optimum processing structure /likelihood/ functional/ determination for signal sequence detection given noisy common background image sets 15 p2196 A72-31783

Joint maximum likelihood estimation of three parameters of Weibull distribution, obtaining modified quasi-linearization algorithm for nonlinear equations iterative solution 16 p2416 A72-33348

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 17 p2610 A72-35263

Recursive bootstrap maximum likelihood estimators algorithms for identification of process modeled by stable linear difference equation under additive output measurement noise 18 p2672 A72-36056

Maximum likelihood identification of time varying and random system parameters. 18 p2673 A72-36822

Recursive stochastic approximation of autocorrelation function for stationary random process based on mean-square error and maximum likelihood methods 19 p2824 A72-37285

Radar cross section fluctuation statistics description by generalized chi-square distribution, discussing target detection probabilities maximum likelihood estimates 19 p2763 A72-37293

Conditions for the effectiveness of adaptation algorithms based on an empirical Bayesian approach to statistics 19 p2825 A72-37440

Nonlinear on-line rapid estimation scheme with application to trajectory maneuvering vehicles. 19 p2781 A72-38258

A generalized method for the identification of aircraft stability and control derivatives from flight test data. 19 p2753 A72-38260

The observability of unforced physical systems by linear non-sequential estimators in the validation of linear error analysis. 20 p2910 A72-39123

Information criterion for optimal planning of reliability acceptance tests maximizing average effect 21 p3038 A72-40714

A bivariate normal theory maximum-likelihood technique when certain variances are known. 21 p3075 A72-40826

Radio pulse signal fixed source location estimate with nondirectional space diversity receivers in arbitrary configuration antenna array 23 p3263 A72-43430

Mean square invariant forecasters for the Weibull distribution. 24 p3418 A72-44664

MAXIMUM PRINCIPLE

German monograph on maximum principle application to optimum control of discrete problem 02 p0197 A72-11741

Jacketed tubular chemical reactor optimal startup control, presenting distributed maximum principle for diffusional parameter system 02 p0301 A72-12093

Second order parabolic equations C auchy problem solution with dissipation level, using maximum principle 04 p0538 A72-14626

Time optimal and fuel optimal control of spin stabilized space vehicle for body-fixed and gimbaled jets, using maximum principle 05 p0728 A72-16476

Differential equations system with right side dependent on constant parameters, obtaining approximate numerical solution by maximum principle of control theory 07 p1026 A72-18967

Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program 07 p1033 A72-19287

Soviet book on optimal trajectory synthesis covering second order linear control systems analysis based on Pontryagin maximum principle and Boltyanski theory 08 p1197 A72-20750

Adjoint control transformations advantages in optimal trajectories determination by Pontryagin maximum principle 10 p1547 A72-24879

Pontryagin maximum principle application to minimum deflection of cantilever beam under own weight 10 p1558 A72-24880

Optimal control problems characterized by nonlinear Volterra equations system, obtaining necessary conditions for extremality in maximum principle integral form 11 p1675 A72-25319

Associated system instability related to difficulties encountered in maximum principle application to optimization problems solution 13 p2003 A72-29069

Pontryagin maximum principle for optimal terminal velocity control of automatic space probe descent in Mars atmosphere 14 p2162 A72-30456

The maximum principle and controllability of nonlinear equations. 17 p2533 A72-34951

Optimality conditions of second and higher orders for discrete systems, discussing functional minimization and Pontryagin maximum principle limitations 17 p2534 A72-35725

Optimality conditions in a problem of heat transfer process control 18 p2741 A72-36809

Optimal control with partially specified input functions. 18 p2673 A72-36821

Necessary conditions for continuous parameter stochastic optimization problems. 22 p3198 A72-41932

A manifold imbedding algorithm for optimization problems. 23 p3268 A72-44197

Modelled time optimal control process investigation for system with relay components, noting Hausdorff maximum principle application for optimal linear control 24 p3386 A72-45389

Maximum principle and penalty function technique for flight optimization, noting optimal control for climbing flight 24 p3369 A72-45444

MAXIMUM USABLE FREQUENCY

Sporadic E layer shielding frequency correlation to limiting reflection frequency calculated by diurnal data from nine ground stations 02 p0221 A72-12522

Angles of arrival and skip distances prediction of radio waves near MUF, using monthly forecasts of quiet and perturbed ionospheric parameters and N/h profiles 11 p1594 A72-26276

HF radio signal reception behavior near maximum usable frequency during evening and at midnight, noting SNR 14 p2085 A72-30656

A study of the dependence of the maximum usable frequency on the electron content. 23 p3266 A72-44333

MAXWELL EQUATION

Book on microwave techniques covering Maxwell equations, electromagnetic wave propagation in conducting media, complex notation, plane polarized waves transmission and reflection, wave equations, etc 01 p0043 A72-11275

Nonlinear equations for M-type amplifiers derived from Maxwell equations 02 p0189 A72-11567

Radiative heat transfer across vacuum gap between two closely spaced metal bodies with arbitrary dielectric properties, solving Maxwell equations 02 p0300 A72-11672

Computer solution to vector variational formulation of electromagnetic Maxwell equations for dielectrically loaded rectangular waveguide 03 p0335 A72-12429

Guided gravitational wave possibility from analogy to Maxwell electromagnetic equations 04 p0574 A72-14979

Maxwell equation spinor formulation for Schwarzschild gravitational field effects on spherical electromagnetic waves propagation 05 p0689 A72-16165

Einstein and Einstein-Maxwell equations solutions by zero coupling transformations 09 p1349 A72-22201

Cylindrically guided hybrid TE and TM electromagnetic wave reflection and transmission from Maxwell equations and boundary value problems solution 09 p1278 A72-22605

Clebsch transformation in relativistic MHD, considering Maxwell equations in vacuum and electromagnetic perfect fluid in isentropic flow 10 p1519 A72-24126

Plane electromagnetic wave diffraction on ideally conducting convex body of large electrical dimensions, obtaining Maxwell equations asymptotic solution 10 p1436 A72-24577

MPD thruster diagnostics and interpretation of electric current distribution, applying integral form of Maxwell equation for moving Hall probe [AIAA PAPER 72-498] 11 p1711 A72-26221

Existence and uniqueness of general solutions of initial value problem for nonlinear Maxwell-Boltzmann equation with finite time interval 12 p1836 A72-27122

Electromagnetic plane field cumulation by heavy conducting shells implosion with quasi-relativistic velocity, solving Maxwell equations by characteristics method 12 p1851 A72-27396

Relativistic treatment of Dirac-Hestenes and Maxwell equations 13 p1987 A72-29787

Charge and mass densities relation for stationary charged dust distribution in general relativity, investigating Einstein-Maxwell equations for stationary gravitational field 15 p2275 A72-31591

Iterative procedure for Maxwell equations exact solution for anisotropic birefringent medium, applying result to limiting polarization problem 16 p2425 A72-33490

Maxwell equations solution for electromagnetic field in circular cylindrical tubes, deriving recursion formulas for computer processing 16 p2364 A72-33668

Continuity, motion and Maxwell equations for steady MHD flow under constant magnetic flux 17 p2588 A72-34765

Weak electromagnetic fields around a rotating black hole. 17 p2612 A72-35391

Isotropic, space-like, Maxwellian particles of real mass and of time-like velocity 18 p2710 A72-36472

Vlasov and Maxwell equations solution for surface waves dispersion in semiinfinite hot plasma 18 p2716 A72-36925

Analysis and prediction of coupling between collocated antennas. 20 p2902 A72-38999

Atmospheric turbulence induced optical effects due to refractive index fluctuations, solving Maxwell equations for instantaneous intensity distribution function 20 p2948 A72-39055

Vector wave solution of light beam propagating along lenslike medium. 20 p2903 A72-39266

Maxwell electromagnetic field theory review, emphasizing relationship between integral forms of Faraday and Ampere laws in conventional space and time concepts 20 p2904 A72-39778

Exact solutions of the Einstein-Maxwell equations for an accelerated charge. 20 p2955 A72-40008

On Maxwell's equations in three-dimensional anisotropic periodic media - Tensor formulation of the problem and the N-beam approximation. 20 p2962 A72-40019

Analytical model for a polarizable medium at radio and lower frequencies. 22 p3155 A72-42467

Equations of motion of a viscous fluid with relaxation properties 24 p3393 A72-45256

MAXWELL FLUIDS

Rheological properties of Maxwell fluid-St Venant solid model for solids, noting slip lines direction during plastic flow 02 p0259 A72-12238

Rectangular channel flow of two immiscible viscoelastic Maxwell fluids with transient pressure gradient, deriving interface velocity, flow rate and wall resistance components 04 p0514 A72-15705

Maxwell rheological creep model verification by tensile tests on Mg alloy at 150 C under step loadings, treating thermodynamics of ideal creep 16 p2412 A72-34111

MAXWELL-BOLTZMANN DENSITY FUNCTION

Quasi-static surface waves at Maxwellian plasma boundary with diffuse electron scattering, considering plasma electromagnetic oscillations 02 p0266 A72-12577

Electron and ion drift rate effect on floating double probe characteristics in Maxwellian plasmas 02 p0266 A72-12768

Initial viscous heat conducting gas dynamic state one dimensional decay problem solution, using kinetic theory with Boltzmann equation 04 p0512 A72-14982

Hard X ray emission by thermal plasma, applying relativistic corrections to photon bremsstrahlung Maxwell distribution and cross section 06 p0873 A72-18004

Linear analysis of gravitational perturbations in strongly collisional initially homogeneous and Maxwellian medium 10 p1536 A72-24138

Nonlinear analysis of gravitational stability perturbation based on Maxwellian velocity distribution 10 p1538 A72-24214

Ionized plasma electron velocity distribution function relaxation numerical calculation to validate local Maxwellian form during transport process 11 p1693 A72-25523

Bremsstrahlung photon emission rate from Maxwellian plasma, determining soft X ray diagnostic techniques applicability for laser produced plasmas 15 p2285 A72-32271

Solar wind heat flux measurements comparison with collision dominated heat transfer theory in ionized medium, noting deviations from Maxwellian velocity distribution 16 p2449 A72-33908

MAXWELLIAN DISTRIBUTION [DENSITY]

U MAXWELL-BOLTZMANN DENSITY FUNCTION

MCDONNELL MILITARY AIRCRAFT

U MILITARY AIRCRAFT

MEAN FREE PATH

Mean free path and particle size distribution in dispersion hardened nickel-thoria alloys, obtaining interparticle spacing by Scheil method 02 p0245 A72-12549

Energy transport within stellar structure, discussing radiative transfer and opacity relationship to mean free path of radiation 07 p1078 A72-19924

Solar protons propagation from instantaneous injection source and inhomogeneities interaction description by mean free path and scattering angle specification 07 p1063 A72-20627

Phonon limited mean free path in Cd by limiting point method, proposing model with elastic anisotropy 08 p1217 A72-21592

Topside ionosphere characteristics, discussing particle mean free path and geomagnetic field effects on conductivity, plasma anisotropies and latitudinal variations 10 p1473 A72-24704

Laser coupling through nonlinear gas filled absorber cell, discussing molecules mean free path 15 p2246 A72-31883

Rarefied gas flow problems, discussing mean free path effects on sharp nosed conical and bluff bodies drag and heat transfer coefficients 15 p2218 A72-32314

Studies of the free path of the current carriers in molybdenum 17 p2568 A72-35517

Charged particles propagation in magnetic field and scattering medium with constant and variable transport mean free path, applying to proton propagation for solar flares 24 p3435 A72-45076

NT LEBESGUE THEOREM

NT NUMERICAL INTEGRATION

NT RUNGE-KUTTA METHOD

NT WEIGHTING FUNCTIONS

Integrability of rotating satellite differential equation of motion in axially symmetric gravitational field 01 p0122 A72-10008

Reproduction by substitutions of ordinary differential equations integrable in elementary and special functions 03 p0383 A72-14373

Computer program for construction and integration of chemical reaction rate equations, applying to nitric oxide formation and decomposition [WSCIP PAPER 71-27] 04 p0482 A72-14583

Asymptotic integration method solution of heat transfer equation with constant wall temperature for low speed slip flow regime [ASME PAPER 71-WA/HT-5] 05 p0599 A72-15866

Nonlinear differential equation of second order, investigating integrability criteria 06 p0838 A72-17553

Conditional expectation and integral of random closed convexity in probability space 06 p0839 A72-17555

Triaxial space station orbit around oblate earth, presenting equations of motion, Hamiltonian and integration methods

06 p0878 A72-17663

Iteration procedure for approximate integration of nonlinear system of partial differential equations with time lag, presenting upper and lower estimates

07 p1028 A72-20209

Coefficients estimation in nonlinear differential equations by direct integration followed by unconstrained nonlinear programming

08 p1197 A72-20854

Integral relations derivation for stationary and nonstationary potential motions in cases of zero and infinite conductivity, applying to wave expansion in cylindrical waveguide

08 p1212 A72-20966

Sretenskii-Chaplygin integral in polynomial form for solution to gyrostat motion problem

08 p1208 A72-21356

Third order nonlinear differential equation invariants use to obtain integrable forms

10 p1504 A72-24053

Integrability and identity relations for Newman-Penrose formalism equations in spinor description, assuming Einstein equations validity for vacuum

10 p1510 A72-24105

Rectilinear impulsive motion of compressible boundary layer on infinite plate, deriving integration method for differential equations of motion under energy dissipation neglect

10 p1465 A72-24203

Radar detection performance calculation with post-detection integration using single valued loss and ideal curves in terms of SNR

10 p1437 A72-24689

Nonlinear transformation for improper integral calculation, noting faster convergence than linear methods

10 p1506 A72-24997

Measurable multiapplications and convex integrals properties in complete probability and Banach spaces

11 p1678 A72-26476

Multistage pursuit-evasion game on circle, constructing player optimal strategies via measure theory

12 p1836 A72-27511

Fourth order polynomial method and computational algorithm for direct integration of n body systems, discussing two body encounters and binary systems

12 p1875 A72-27917

Dynamic equations integration with constraint factors, discussing Hamilton-Jacobi method applicability conditions

13 p2003 A72-28724

Delayed argument linear partial differential equations system integration, constructing asymptotic solution in nonresonant case

13 p1988 A72-30084

Steepest descent path of integral describing transient plane wave propagation in anisotropic cold plasma, relating to evanescent wave arrival

15 p2285 A72-32109

Integration of equations of motion for nonconservative holonomic systems with pulsed coupling factors

19 p2825 A72-38192

One realization of Liapunov's method for integrating linear equations

19 p2827 A72-38469

Book - Weak convergence of measures: Applications in probability.

20 p2946 A72-39730

Gas turbine engine performance measurement via parameters averaging method, noting integration time determination for given error limits

23 p3325 A72-43669

Integration scheme for two-dimensional impulsive waves in a linear acoustic medium.

23 p3314 A72-44250

MEASURE THEORY

U MEASURE AND INTEGRATION

MEASUREMENT

Standard linear estimation and control problem with quadratic loss, optimizing information rate by minimizing total measurements number through Riccati equation singular solution

08 p1144 A72-20859

Linear stochastic system optimal measurement strategy and matched Kalman type filter computation via transformation into deterministic control problem

18 p2674 A72-37100

Fluidic device for measuring angular velocities based on pressure output proportional to shaft revolutions per unit time, discussing equivalent circuit

01 p0064 A72-10171

Ultrasonic rotameter for wind velocity circulation measurement, using cylindrical electroacoustic capacitor converter with solid dielectric for radiators and receivers

01 p0094 A72-10560

Instrument and technique for Gaussian mode laser beam parameters measurement

03 p0367 A72-13444

Universal perception meter for measurements in work psychology laboratories, discussing characteristics and operation

03 p0322 A72-13884

Hydraulic systems and components stationary operating conditions determination, discussing measuring apparatus, test equipment and interpretation methods

03 p0312 A72-13961

Ultrasonic resonance thickness gage sensitivity and accuracy, noting damper, piezoelectric plate, protector and frequency band influence

03 p0361 A72-13986

Book on EMI test instrumentation and automatic measuring systems covering shielded enclosures, emission and susceptibility antennas and spectrum analyzers

04 p0486 A72-14611

Automatic instrumental measurement of runway visual range at airport

04 p0508 A72-14679

- ALSEP lunar heat flow experiment, describing instrument for temperature and thermal conductivity measurements in lunar subsurface
11 p0577 A72-15098
- Computer servocontrolled granite stage and measuring microscope, discussing mechanical and optical construction, control electronics and applications
11 p0522 A72-15477
- Measuring apparatus for differential cross sections of charge transfer and elastic scattering of atomic projectiles by gas targets
11 p0553 A72-15539
- Low inertia instrument for ozone density measurement in atmosphere near ground
11 p0525 A72-15624
- Distortion measuring equipment for determining FM signal transmission errors due to amplitude and group delay frequency response deficiencies and AM/PM conversion
11 p0626 A72-16299
- Pyroelectric laser power meter with built-in calibration based on reference heating by If current, describing operation, design and testing
11 p0662 A72-16347
- Transit instrument system year-to-year stability in astronomical time determination, considering seasonal wave causes and star coordinate errors
11 p0885 A72-18037
- Measuring device for holographic virtual image reconstruction deformations due to relative orientation errors between reference beam and holographic plate
11 p0818 A72-18329
- Convective conductance meter for continuous measurement of outdoor exposed surface convection coefficient, using electrically heated plaques with known surface radiation properties
11 p0981 A72-18821
- Low pressure gauge with compensation of dry friction forces in servomechanism with respect to mean value
11 p0982 A72-18929
- Stress relaxation measurement assembly for polymer film and fiber samples under tensile stresses at 213-573 K
11 p0986 A72-19779
- Adhesives use for assembly of mechanical, optical, nucleonic and electronic instruments including printed and integrated circuits
11 p0992 A72-20576
- Fatigue life gages to determine cumulative fatigue damage due to variable cyclic strain history on unmatched materials
11 p1163 A72-20915
- Fatigue life gages planning and application to airplane cyclic fatigue test, describing automatic data acquisition system
11 p1163 A72-20916
- F-14 naval fighter aircraft flight test programs, discussing instrumentation and low-speed test results
11 p1108 A72-21005
- Component evaluation of linearity error of measuring instruments
11 p1284 A72-22241
- German monograph on electron beam focusing in partial pressure analyzer with two compartment ion source, eliminating residual gas-filament interaction
11 p1306 A72-22318
- Multihole flow probe measurement data evaluation by multidimensional approximation of calibration curves and surfaces
11 p1260 A72-22631
- Capacitance depth gage for thin liquid films thickness measurement, noting application to interface waves amplitude and frequency measurements
11 p1316 A72-23410
- Measuring instrument for minute pressure differences, noting accuracy
11 p1317 A72-23692
- FM measurement system with linear resistance-to-frequency converter realized in RC oscillator form, discussing design problems
11 p1482 A72-24598
- Electromagnetic position sensor for magnetically supported model in wind tunnel, discussing design, operation principles and performance
11 p1462 A72-24773
- Atmospheric temperature measurement up to 2 km height, reviewing sounding equipment and techniques
11 p1508 A72-25091
- Test assembly for Brinell microhardness measurements of metal and alloy surfaces under tension during vacuum heating and in protective gas media
11 p1612 A72-25490
- Transit instrument system year-to-year stability in astronomical time determination, considering seasonal wave causes and star coordinate errors
11 p1719 A72-25973
- Methyl alcohol-ethylene glycol self mixing antifreeze solution for precipitation gages
11 p1682 A72-26088
- Retarding potential analyzer errors and performance degradation due to grid plane potential depressions
11 p1634 A72-26411
- Measuring information systems optimization, considering first order system with time lag
11 p1611 A72-26436
- Discrete automatic monitoring and measuring systems with discrete random sequence and continuous process reconstructed output signals, deriving probability criteria for reading frequency determination
11 p1611 A72-26438
- Monotypic signal rejection by connecting line insertion to sensor and central electrical measuring device input galvanic decoupling
11 p1611 A72-26440
- Image-to-signal conversion by TV tube in automatic contactless measuring systems, producing mosaics of object by optical, X ray and ultrasonic techniques
11 p1634 A72-26460
- Thermistor anemometers design and measurement of displacement or dispersion coefficients
11 p1636 A72-26699
- Thermal conductivity measuring apparatus for small multispecimen thermoelectric materials
11 p1795 A72-27467
- Device for comparing powders friability to ascertain quality of compacts fabricated on automatic sintering presses, noting applications in ceramic, chemical and pharmaceutical industry
11 p1795 A72-27468
- Dynamic systems as models for electronic measuring instruments computerized development and design
11 p1791 A72-27579
- High temperature skin friction meter design for drag measurements, using motor-transducer air core assembly
11 p1812 A72-27959
- Light scattering media optical characteristics measurement techniques and equipment
11 p1955 A72-28515
- Ionospheric radio adsorption measuring device with readout data convenient for visual and computer processing, discussing block and circuit diagrams
11 p1955 A72-28602
- Instrument to measure thermodynamic, electrical and optical properties of gases and liquids, describing thermostat for 83-923 K range
11 p1956 A72-28633
- Compressor blade vibration indicator measurement by positioning one inductive sensor by rotor blades and another by toothed gear on rotor shaft
11 p1956 A72-28784
- Digital microwave power measuring device with automatic range selection
11 p1931 A72-29267
- Broadband correlation meter with multiplier using vacuum thermal converters for 1.5 KHz-15 MHz range and variable signal delay
11 p1961 A72-29920
- Microwave device phase and amplitude frequency response measuring equipment with wide range test pulse generation, discussing design and performance
11 p1934 A72-30091
- Apollo 15 manned lunar landing, discussing geological data and surface experiment package and instruments
11 p2310 A72-31983
- Sensor design and principles for atomic oxygen concentration measurement in dissociated gases, using Ag thin film electrical resistance change during oxidation
11 p2390 A72-33162
- Crack depth measuring instrument for fatigue crack propagation study in notch tests, noting application at high temperatures
11 p2391 A72-33234
- Instrumentation for space-time correlated measurement of explosion induced dynamic effects, discussing framing cameras, flash X-ray systems, pin switches and piezoresistive gages
11 p2392 A72-33360
- Computerized aircraft landing measurement system for civil airport, using optical, seismic and IR sensors
11 p2374 A72-33627
- Instrument for Hall and Gauss effects measurement in semiconductors and metals, noting instrument error analysis
11 p2529 A72-34758
- Contact-type level gauge with a transistorized decimal code converter
11 p2529 A72-34764
- Use of special gauges for determining crack growth rate in fatigue in the AU4G1 aluminum alloy
11 p2567 A72-34890
- Contactless parameter measurements of a vibrating bar.
11 p2554 A72-35148
- Digital methods of frequency measurement - A comparison.
11 p2530 A72-35363
- Dynamic characteristics of electrical measuring instruments and transducers, discussing static calibration curve, dynamic tests and parameters determination
11 p2557 A72-35757
- An equipment for measuring thermophysical quantities by means of heat-pulse methods in the temperature region between 20-300 C.
11 p2557 A72-35758
- Measuring instruments for gas pressure determination in vacuum systems, noting application of thermal conductivity or ionization characteristics of gas molecules
11 p2692 A72-36835
- Choice of parameters for measuring devices in a closed-loop linear control system
11 p2777 A72-37319
- Electromechanical measurement systems using analog transducers with ohmic resistance, electric and magnetic fields and digital/frequency and stochastic outputs
11 p2800 A72-37755
- Measurements of radiation flux at the moment of ignition of a solid propellant
11 p2800 A72-37759
- High-sensitivity resonant-quartz scales operating in high vacuum at very low temperature - Application to the study of gas-solid interactions
11 p2800 A72-37834
- Analysis of the performance of a single-half-period synchronous relay detector with an active-capacitance load
11 p2801 A72-37963
- Rational selection of structures and parameters for photoelectric meters and follow-up systems
11 p2801 A72-37964
- Investigation of the UIM-21 coordinate-measuring machine
11 p2802 A72-37988
- INTERKAMA 1971; International Congress with Exposition for Measurement Technology and Automation, 5th, Duesseldorf, West Germany, October 14-20, 1971, Reports
11 p2782 A72-38301
- Production measuring equipment and techniques for quality control, emphasizing measurement accuracy, speed and cost effectiveness maximization
11 p2802 A72-38304
- Measurement transducers in industrial process control, discussing requirements for dynamic properties, stability, linearity and computer applications
11 p2803 A72-38315
- Blade passage measurement with the aid of a graphite pin probe in the case of fluid flow engines
11 p2804 A72-38724
- Special features of the operation of ferroprobes with low-permeability core moulds at small excitation fields.
11 p2804 A72-38760
- Sensor selection for electromagnetic instrumentation system with sufficient sensitivity and bandwidth to demonstrate electroexplosive device compliance with MIL-E-6051D specified safety margin
11 p2962 A72-38979
- A small ELF electric field probe.
11 p2921 A72-38994
- The impact of gradiometer techniques on the performance of inertial navigation systems.
11 p2949 A72-39079
- A time-frequency localization system applied to acoustic certification of aircraft.
11 p2950 A72-39091
- An automated instrument for monitoring the quality of recovered water.
11 p2895 A72-39161
- A differential interferometer and its application to heat and mass transfer measurements.
11 p2927 A72-39683
- A new circuit for the contactless thickness measurement with the aid of pulse-excited LC measuring circuits
11 p2927 A72-39696
- Stress sensitive device based on anisotropic conductivity of multivalley semiconductor under uniaxial stress
11 p2961 A72-39713
- Installation for the simultaneous measurement of the functional properties of sliding contacts
11 p2928 A72-39936
- Apparatus for measurement and automatic graphical recording of variations of electrical characteristics of a metal-insulator-semiconducting structure
11 p3051 A72-40209
- A high-frequency dynamic phase metering instrument for ionospheric research.
11 p3051 A72-40214
- A meter giving the number of overshoots of the realization of a steady random process
11 p3058 A72-41732
- Recent progress regarding the measurement techniques in the hypersonic area
11 p3178 A72-42581
- Analysis of the structure of the flow downstream of a sudden widening
11 p3167 A72-42643
- International Aerospace Instrumentation Symposium, 18th, Miami, Fla., May 15-17, 1972, Proceedings.
11 p3178 A72-42676
- Comparative cut-bar thermal conductivity apparatus.
11 p3180 A72-42710
- Variable impedance transducer measuring instruments for in-flight aircraft performance tests under environmental thermal effects
11 p3180 A72-42711

Influence of noise on the accuracy of microwave phase meters 23 p3272 A72-43845

Experimental design algorithm based on information quantity optimization, noting measuring instrumentation synthesis adaptable to operational conditions 23 p3292 A72-44463

Ionospheric radio absorption measuring device with readout data convenient for visual and computer processing, discussing block and circuit diagrams 24 p3402 A72-45102

Optimal linear inertia-free processing of meter readouts with allowance for control-equipment signals 24 p3403 A72-45316

MECHANICAL DEVICES

German monograph on narrow band mechanical filter design, using resonant circuit and coupled four terminal network analogy 09 p1284 A72-22326

Hookes law formulation by multindex sequences for stereomechanical multiple system optimization 09 p1354 A72-23611

Jet compression role in high temperature mechanical energy conversion heat exchanger based on ejector principle 12 p1755 A72-27724

Mechanical fabrication of rectangular to cylindrical waveguide transitions for X band 13 p1932 A72-29475

Nondestructive technique for continuous recording of thickness or contour profiles, using mechanical probes 13 p2000 A72-29760

Structure-borne acoustic nondestructive testing for readiness assessment, fault isolation and automatic checkout of space vehicle mechanical devices 15 p2214 A72-31699

Mechanical system nonlinear perturbation effect on equations of motion solutions, deriving boundedness and stability conditions via inequality theorems 16 p2423 A72-33101

Low-explosive actuated mechanical devices to actuate switches and valves, sever cables or bolts, dispensing fluids, inflating bags or starting engines 16 p2442 A72-33359

Thermochemical techniques application to corrosion protection of metallic powders, mechanical parts and tools, describing chromizing, chromaluminizing, tantalizing and niobiumizing processes [ONERA, TP NO. 1049] 19 p2817 A72-37769

New modifications of manipulators for investigations using microelectrodes 22 p3149 A72-42073

Spectrally shaped transient forcing functions for frequency response testing 22 p3206 A72-42463

Evaluation of the danger of damage to mechanical systems exposed to random vibrations 24 p3459 A72-45449

MECHANICAL DRIVES

NT HELICOPTER PROPELLER DRIVE

Digital computer programmed numerical calculation based on admittance method for torsional forced vibration spectra of masses and stress distribution in transmission system 02 p0271 A72-12435

Gear transmission systems statistical characteristics under dynamic loads, noting normal Gaussian curve for operating conditions 04 p0585 A72-14614

Computer servocontrolled granite stage and measuring microscope, discussing mechanical and optical construction, control electronics and applications 04 p0522 A72-15477

Point contact realization between helical transmission wheels teeth 05 p0667 A72-17058

Multicircuit hf filters tuning drive with mechanical synchronization correction 06 p0774 A72-17749

Transmission locked differentials and variable ratio drive improvement effect on engine driven machine high speed performance and stability 08 p1113 A72-22097

Discrete model of dynamic forces between teeth of single stage transmission with parallel gear axes 09 p1404 A72-22772

Electromechanical system for wire drive along stellar right ascension of meridian circle of Odessa Astronomical Observatory 09 p1311 A72-23061

Mandelstam couplings theory for subdividing discrete mechanical system of three degrees of freedom gear transmission 09 p1409 A72-23614

German monograph on losses in gear pumps, discussing leakage, mechanical and hydraulic losses, measurement techniques and equipment, etc 10 p1422 A72-23774

Rolling radius of driven cylindrical wheel with solid rubber tire as function of normal load and tire dimensions 13 p2003 A72-28919

Nonlinear oscillations amplitude, frequency and instability regions of moving belt as function of longitudinal velocity 13 p1964 A72-29150

Dynamic structural analysis of system formed by engine, variable ratio differential and working machine, calculating differential ratio for constant shaft rotation speed 15 p2182 A72-31609

Gyroscope drive systems, discussing various ac and dc electric motor types and switching and control circuits 16 p2396 A72-34135

Use of digital computer graphics in gear design 17 p2520 A72-34338

Reduction of noise and acoustic-frequency vibrations in aircraft transmissions. 17 p2491 A72-34508

[AHS PREPRINT 661] Influence of coupling behavior on the quietness of multiply supported shaft systems 18 p2694 A72-36070

Optoelectronic speed control for replacing mechanical gear drives for precisely variable shaft speed ratios 21 p2997 A72-40259

Experimental procedure for determining the strength losses in the individual elements of wave-type toothed gears 22 p3182 A72-41866

MECHANICAL ENGINEERING

Electromagnetic field forces on finite conducting bodies, discussing heating rates and temperatures with ambient air convection and machine design recommendations 09 p1359 A72-22679

Design information for machinery to incorporate welding positions and joints, fatigue mechanisms, loads, combined stresses and plate and cast materials properties 09 p1409 A72-23621

Structural mechanics computer programs compendium covering subject oriented information according to structure type, load environment and analytical models 15 p2328 A72-31771

Mechanical and electrical technologies unification, discussing systems and balances 15 p2211 A72-31873

Experimental mechanics in research and development; Proceedings of the International Symposium, University of Waterloo, Waterloo, Ontario, Canada, June 12-16, 1972. Volumes I & 2. 18 p2732 A72-36352

Southeastern Conference on Theoretical and Applied Mechanics, 5th, North Carolina State University and Duke University, Raleigh and Durham, N.C., April 16, 17, 1970, Proceedings. 18 p2736 A72-37051

Israel Conference on Mechanical Engineering, 6th, Haifa, Israel, June 26, 27, 1972, Proceedings. 21 p3118 A72-40926

MECHANICAL IMPEDANCE

Mechanical impedance and phase angle time variation in restrained primate during prolonged sinusoidal vibration [ASME PAPER 71-WA/BHF-8] 05 p0616 A72-15946

Forced vibration and mechanical impedance of damped circular and annular membranes under central mass loads 05 p0739 A72-16615

Supine human body mechanical impedance under combined stress of vibration and sustained acceleration 12 p1765 A72-28270

Frequency method of mechanical impedance monitoring of natural frequency of transducer-article system under load in defectoscopy 13 p1956 A72-28923

Human hand-arm system vibration characteristics, describing mechanical impedance measurements for mathematical modeling 13 p1910 A72-29559

Human body or dummy mechanical impedance calculation by acceleration measurement at two point reference system with circular spring supporting mass 15 p2192 A72-32608

Signal analyzer for LF real time measurement of mechanical impedance by Fourier integral analysis 15 p2215 A72-32628

Liquid propellant rocket engines three dimensional nozzle admittance determination by impedance tube method from pressure distribution measurement, taking into account nozzle geometry effect [AIAA PAPER 72-666] 16 p2443 A72-34071

Damping coefficient measurement for sound waves inside cylindrical tube closed at one end and excited at other end by loudspeaker 17 p2582 A72-35426

Mathematical modeling assumptions and procedures in experimental mechanics, considering transfer function, impedance and human factor roles 18 p2709 A72-36353

Effect of electrode thickness on the frequency response of a piezoelectric transducer 18 p2693 A72-37218

Output impedance of a jet element 19 p2754 A72-37994

Measurement of specific mechanical impedance of the skin - Effects of static force, site of stimulation, area of probe, and presence of a surround. 21 p3005 A72-40347

New methods of measuring the parameters of multidimensional vibrations of linear mechanical systems 22 p3176 A72-42130

Low frequency measurement of mechanical impedance and frequency response. 22 p3164 A72-42700

Linear system proper frequencies and vibration dampings obtained by mathematical smoothing of mechanical admittance measurements 22 p3241 A72-43091

Useful range of a mechanical impedance technique for measurement of dynamic properties of materials. 23 p3294 A72-44126

On mechanical response of a non-uniform piezoelectric transducer under the influence of a body-force. 23 p3291 A72-44316

Frequency dependence of axially oscillated nozzles admittance real and imaginary parts for different Mach numbers, convergence angles and curvature radii, comparing theory and experiment 24 p3433 A72-45144

NT WIND MEASUREMENT

NT WIND VELOCITY MEASUREMENT

NT X RAY STRESS MEASUREMENT

Noncontact rotating shaft horsepower measurement, using phase displacement technique [ASME PAPER 72-GT-29] 11 p1630 A72-25625

Mechanical and electrical methods of measuring vibration rates, displacements, accelerations and time derivatives, examining magnetolectric and piezoelectric sensors characteristics 11 p1635 A72-26465

Thickness gage for continuous autographic record in nondestructive testing of irregular cross section specimens 13 p1959 A72-29759

Variable torque determination in precision work technology, discussing electronic measurements of length, shaft deformation, torsion angle and force 14 p2104 A72-30485

Systematic approach to study energy and information flow through measuring system in experimental mechanics, using transducer model 18 p2690 A72-36356

Photoelasticity, holography, moire and strain gage methods in European experimental mechanics research 18 p2733 A72-36357

Some uncommon electric transducers for the measurement of mechanical quantities. 18 p2690 A72-36369

Hybrid processing of empirical functions in mechanics 18 p2710 A72-36423

Application of N equalizing and compensating signals in a single-cell reciprocal magnetolectric transducer 24 p3386 A72-45315

MECHANICAL OSCILLATORS

NT GYROSCOPIC PENDULUMS

NT PENDULUMS

Self sustained oscillations of mechanical system with infinite number of degrees of freedom, considering application to diffusion in porous medium 02 p0258 A72-11496

Three-axis flight table with dc torque motors, discussing servo loops design and mechanical oscillations frequencies 02 p0257 A72-12541

Instability effect on aperiodic motion of nonlinear thermomechanical oscillator from periodic solutions 04 p0547 A72-14458

Optimal synthesis of multiparametric machine systems by LP search/determinate analog of random search/, applying to oscillatory models 06 p0821 A72-17726

Lightly damped nonlinear mechanical oscillators under random excitation, calculating stationary response frequency and autocorrelation by heuristic procedures 06 p0849 A72-18693

Mechanical systems with nonlinear position functions, elastic elements or self damping, investigating oscillation mode onset and stability conditions 06 p0850 A72-18701

Aerodynamic radial bearing analysis based on Reynolds equation, emphasizing gas bearing nonlinear oscillation stability 06 p0824 A72-18702

Mechanical system of elastically coupled bodies carrying identical vibrators, examining self synchronization behavior 06 p0850 A72-18713

Single frequency oscillations in nonlinear mechanical systems described by one dimensional mixed boundary value problems, using asymptotic methods 06 p0850 A72-18715

Nonlinear mechanical oscillation systems analysis by analog computer, exemplifying pendulum rotating about vertical axis 06 p0851 A72-18725

Autoparametric excitation in relation to divergence and flutter of autonomous mechanical cantilever systems under nonpotential circulatory forces 06 p0851 A72-18726

Optical bidirectional modulator for two beam spectrophotometer, using tuning fork as oscillatory system 07 p0988 A72-19962

Third-order resonance during oscillations of Hamiltonian system of nonlinearly coupled oscillators, obtaining equations of motion and phase portraits 07 p1035 A72-19978

Transcendental series solution of Chini-Painlevé nonlinear differential equations describing vehicle and meteorite oscillation during planetary atmospheric entry 07 p0964 A72-20594

German monograph on multielement linear mechanical oscillator analysis covering behavior of harmonically excited bar chains of arbitrary structure 09 p1350 A72-22337

Mechanical system with inertial vibration sensor and nonlinear spring, obtaining global asymptotic stability of zero solution of differential equations describing natural vibration 09 p1399 A72-22697

Holographic method for investigating piston type vibrations with phase modulated reference light beam 09 p1317 A72-23682

Inverted pendulum subjected to small amplitude sinusoidal periodic and stochastic base motion, determining stability boundaries by averaging method 12 p1844 A72-27247

Perturbation procedure for weakly coupled oscillators in connection with statistical mechanics ergodic problem and nonlinear interaction models 12 p1844 A72-27248

Multiple index Lagrange equations of motion of second kind, proving analogy between mechanical and stereomechanical effects 12 p1844 A72-27318

Linear oscillatory system, investigating effects of pulsed dynamic damper with mass vibrations bounded by limiters 12 p1887 A72-28235

Undesirable mechanical vibration control concepts for acoustic noise reduction, considering environment characteristics, attenuation degrees and passive and active control mechanisms 13 p2005 A72-29555

Random vibration of two multimodal mechanical systems with point coupling, obtaining power flow spectral density by statistical energy analysis 13 p2005 A72-29563

Mechanical oscillator model for experimental investigation of multistage electrical frequency multipliers subharmonic transient oscillations, considering energy flow under constant and/or phase modulated excitation 14 p2131 A72-30719

Generalized Thomson-Tait-Chetaev stability theorem for n-degrees-of-freedom mechanical oscillating systems with virtual nonconservative displacement forces 15 p2274 A72-31456

Single degree of freedom nonlinear mechanical system vibration characteristics calculation by averaging procedure, taking into account energy dissipation 16 p2424 A72-33279

Third-order resonance during oscillations of Hamiltonian system of nonlinearly coupled oscillators, obtaining equations of motion and phase portraits 20 p2956 A72-40034

The parameters of a two-mass oscillatory system in which one of the masses is acted upon by a complex working resistance 23 p3312 A72-43352

Experimental investigation of finite-amplitude acoustic oscillations in a closed tube. 23 p3314 A72-44124

Aerospace adhesives applications, discussing thermal and mechanical properties, and cryogenic, epoxy, urethane silicone and fluorocarbon types 01 p0090 A72-10188

High chromium ferritic stainless steels weldability and mechanical properties, showing C, N, Ti and residuals effects on recrystallization, toughness, tensile behavior and corrosion resistance 01 p0083 A72-10283

Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics 01 p0005 A72-10314

High temperature strength degradation of graphite and boron reinforced epoxy composites after room temperature aging 01 p0090 A72-10728

Thermal and environmental exposure effects on high temperature mechanical properties of graphite/polyimide composites 01 p0090 A72-10730

High temperature testing of metal matrix composites mechanical properties, noting aerospace structural applications 01 p0084 A72-10732

Coextruded Be fiber-Ti alloy matrix composite sheets for light weight structures, describing ultrasonic inspection and mechanical properties 01 p0084 A72-10734

Aluminum stiffening structural sections selectively reinforced with boron/epoxy composite materials, discussing mechanical properties, cost effectiveness and stress distribution 01 p0139 A72-10737

Fiber reinforced filament wound composites for pressure vessel applications, investigating mechanical properties 01 p0090 A72-10741

Fe, Ni and Co based high temperature thin gauge sheet alloys, discussing chemical and mechanical properties, fabrication and availability 01 p0084 A72-10742

Dispersion strengthened Ni-Cr alloys processing technique and mill products development, noting increased strength at elevated temperatures 01 p0075 A72-10744

Bare and coated Nb alloy in high temperature vacuum conditions, discussing tensile and bend tests and mechanical properties 01 p0084 A72-10747

Multiple reentry effects on space shuttle thermal protective superalloys mechanical properties, present-

ing cyclic simulation results for different temperatures, pressures and stresses 01 p0084 A72-10754

Ti alloy honeycomb core sandwich panels fabricated by brazing or spot diffusion bonding, investigating elevated temperature effects on mechanical properties [ASM PAPER W 71-23,3] 01 p0086 A72-10875

Graphite filament reinforced plastics strength, performance properties, fabrication processes and tooling concepts [SME PAPER EM 71-205] 01 p0076 A72-10968

Unidirectional glass/graphite fiber-epoxy resin composite, discussing fabrication and performance tests for mechanical properties [SME PAPER EM 71-192] 01 p0092 A72-10971

Metals mechanical behavior, considering plastic deformability, strain hardening, cohesion and engineering performance prediction 01 p0086 A72-10985

Mo and Zr additions induced mechanical strength increase of Ni-Al-Nb alloys in cast and deformed states at 20-1100 C 01 p0088 A72-11081

Mechanical strength and performance of combined multicomponent bonded materials, including laminar, fiber, flake filled and metal matrix composites 01 p0093 A72-11086

Ti-Al-V alloy powders electrically activated pressure sintering /spark sintering/, considering mechanical properties and economic factors 02 p0240 A72-11428

Hydropressed sintered U-700 superalloy powder, noting weakened particle grain boundary conditions from mechanical properties and fracture studies 02 p0240 A72-11444

Composition, microstructure and mechanical properties of binder metal in cobalt bonded tungsten carbide 02 p0241 A72-11451

Carbon content effect on phase relationships and mechanical properties of sintered Fe-WC alloys, noting high strength 02 p0241 A72-11452

Corrosion effect on mechanical properties of sintered powder iron and bronze parts, describing test procedure for corrosion resistance determination 02 p0241 A72-11459

Sintering and heat treatment effects on mechanical properties of atomized and mixed powders of Ni-Mo steel 02 p0234 A72-11462

Low strength polymeric materials specimen geometry and lateral constraints effects on isothermal compressibility by compression tests [SESA PAPER 1935] 02 p0248 A72-11518

Lunar surface soil mechanical properties from computer simulation of Surveyor spacecraft observation data for each landing site, estimating cohesion 02 p0275 A72-11595

Soviet papers on strength and plasticity covering elasticity, creep, polymer mechanics, plates and shells, dynamic and high temperature stability, thermoelectricity, soil and free flowing media 02 p0288 A72-11601

Refractory materials strength testing equipment and techniques at high temperatures, covering creep, hardness, fatigue, ultrasonic, energy dissipation and loading tests 02 p0291 A72-11636

Thermoplasticity problems of materials with time dependent mechanical properties, obtaining approximate plastic deformation under cyclic loading 02 p0291 A72-11638

Macroscopic fracture mechanics of composite laminates, discussing flawed specimen static strength prediction 02 p0249 A72-11883

Microstructure and mechanical properties of iron base superalloys, examining precipitation hardening by gamma prime and secondary intermetallic compounds formation 02 p0245 A72-12505

Wrought superalloys microstructure and mechanical properties control by precipitating phases 02 p0245 A72-12506

Titanium and aluminum variations effects on eta and gamma prime solvus temperatures and on mechanical properties of iron-nickel superalloy 02 p0245 A72-12508

Temperature effects on strength and deformability of randomly reinforced fiberglass polyamides 02 p0250 A72-12678

Reinforcing fibers length effect on cross breaking strength and rupture area size at surface for silicoorganic glass reinforced plastic 02 p0250 A72-12681

Quenching effects on thoriated-dispersed Ni sheet plastic stress relaxation and room temperature mechanical properties 02 p0247 A72-12822

Superalloy compositions prealloyed powders strengthening by secondary gamma phase precipita-

tion, noting high temperature strength without ductility loss after thermomechanical treatment and aging
02 p0247 A72-12856

Tubular and rod extruded age hardenable Al alloys, determining mechanical anisotropic properties from yield loci and r values
03 p0369 A72-12957

Resistive force on moving dislocations at low temperature in solids and crystal defect studies by ultrasonic methods, determining temperature dependence of mechanical properties
03 p0362 A72-13224

Mechanical response of Al and Cu under complex strain histories conditions, using endochronic theory of viscoplasticity without yield surface
03 p0444 A72-13504

Tempered Fe-Cr-C-C steels microstructural and mechanical properties, investigating martensite and bainite
03 p0375 A72-13929

Soviet book on structural shape effects of machine parts on durability, covering production, gear transmissions shafts, axles, threaded joints, etc
03 p0364 A72-13966

Stress concentration at eccentric holes and effect on strength of full size rotating turbine disks
03 p0450 A72-14108

Alloying elements effects on aging response of austenitic-ferritic alloys in Fe-Cr-Mn-Ni base, determining mechanical properties dependence on processing and heat treatment
03 p0377 A72-14170

Alloy additions and heat treatment effects on mechanical properties and weldability of quenched and aged high strength Ni steels
03 p0378 A72-14173

Physicomechanical properties of metals at crystallization temperatures, considering density, viscosity, strength, hardness, elasticity and creep
03 p0378 A72-14219

Glass variables effect on polypropylene, polystyrene and Nylon-6 glass filled thermoplastic composites mechanical properties, discussing silane coupling agents and injection moulding machine conditions
04 p0537 A72-15085

Dislocation creep model for work hardening and recovery, deriving mechanical equation of states for various magnitudes and directions
04 p0589 A72-15160

Elastic stiffener bonded to elastic half plane with different mechanical properties, reducing governing integral equation to infinite system of linear algebraic equations
[ASME PAPER 71-APM-TT] 04 p0589 A72-15182

Substitutional dynamic strain aging effects on Fe-Nb alloys mechanical properties, attributing ductility reduction to work hardening and strain rate effects
04 p0534 A72-15576

Safe stressing of high strength and locally nonbrittle solid bodies, testing hard polymers at room temperature
04 p0593 A72-15656

Polyfluoroethylene-based composite materials mechanical properties, discussing strengthening mechanism of filler additions
05 p0682 A72-15989

Mechanical properties of heat treated hardened high strength steel, investigating microstructure relationship to breakdown characteristics
05 p0671 A72-15992

Metallurgical treatment control reliability in machine part mechanical properties quality evaluation
05 p0671 A72-15993

Strength margin estimation in materials sustaining cumulative static and damage under cyclic thermal loads
05 p0735 A72-15994

Large length-to-diameter ratio two layer blank bimetallic hard alloy product manufacture by extrusion die method, noting mechanical properties
05 p0666 A72-16098

Dissolved oxygen effect on structure and toughness of nonalloyed extruded steels, observing austenite recrystallization kinetics retardation after hot plastic deformation
05 p0672 A72-16143

Mechanical and microstructural properties of Be-base alloys consolidated by vacuum arc melting, reporting results of tensile tests, hardness measurements and microprobe analysis
05 p0674 A72-16389

Superalloys for gas turbine rotor and stator blades, testing long term heating effects on microstructure and mechanical and thermal fatigue properties
05 p0675 A72-16495

Strength analysis of hyperboloidal electric wire joint designs, expressing stress as function of contact loads
05 p0616 A72-17059

Alloying elements effects upon iron mechanical properties, investigating lattice parameters, temperature dependence of yielding and plastic flow, solid solution strengthening and softening, etc
05 p0676 A72-17101

Critique of microstructure effect on strength, toughness and stress corrosion cracking susceptibility of metastable beta titanium alloy, discussing recrystallization conditions
05 p0679 A72-17122

Mechanical, technological and physical properties of steel with and without molybdenum
05 p0679 A72-17204

Prolonged heatings effect on heat resistant magnesium alloys microstructure and mechanical properties
05 p0680 A72-17208

Homologous temperature method to compare mechanical properties of metals tested at different temperatures
06 p0827 A72-17399

Fe-Co alloy athermal transformation to bcc martensite at industrial cooling rates, investigating effects on mechanical properties
06 p0829 A72-17830

Fiber reinforced materials mechanical properties, showing strength dependence on stress-strain behavior of fibers and binders and fiber volumetric proportions
06 p0835 A72-18252

Structural and strength characteristics of carbon graphite materials, considering composites preparation and applications
06 p0836 A72-18361

Automatic testing machine for mechanical properties of metals under static loading
06 p0796 A72-18365

Anomalous temperature-strain rate dependence of Ni-Al intermetallic compound mechanical properties from plastic deformation mechanism
06 p0832 A72-18417

Isotropic and anisotropic materials strength criteria and boundary surfaces in invariant stress tensor spaces
06 p0898 A72-18553

Brittle strength characteristics of construction materials with cracks calculated by graphical analysis procedure, considering state of limiting equilibrium
06 p0899 A72-18560

Electrical contacts conduction principles, considering circuit voltage, current, variable resistance and resistive, mechanical, heating and adhesive properties
06 p0791 A72-18578

Carbon effects on strength, ductility, brittle transition and plastic strains of tungsten at high temperatures
06 p0833 A72-18634

Nonheat treated extruded Mo alloy under tension and vacuum conditions at various temperatures, investigating cylindrical samples size effects on mechanical properties
06 p0833 A72-18635

Semifinished product production technology influence on heat resistant alloys mechanical properties, considering forging, rolling, casting, melting, diffusion welding and powder metallurgy
06 p0834 A72-18647

Explosive shock loading effect on materials mechanical properties, describing test equipment
06 p0797 A72-18659

Thermocycling treatment influence on structural changes and strength in coarse grain Ni under creep tests
06 p0834 A72-18686

Structural changes, mechanical properties, electrical resistance and lattice constant during aging of Al alloys containing Mg, Li and Mn
06 p0834 A72-18743

Microstructural changes and mechanical properties of deformed Nb alloy during annealing process, observing low temperature plasticity increase
06 p0835 A72-18747

Economical methods for cast maraging steel production, describing composition, heat treatment and mechanical properties
07 p0100 A72-18970

Composite propeller blades with carbon fiber reinforced plastics spar for hovercraft, presenting mechanical properties test data for different composite configurations
07 p0912 A72-19062

Extruded superalloy powder structural shapes preparation by filled billet technique for improved chemical and mechanical properties
07 p0994 A72-19483

Cu contents effect on Ti-Cu alloys physical and mechanical properties, discussing beta phase decomposition during annealing
07 p0102 A72-19574

Real time computer aided mechanical testing and data analysis system for composites, confirming computer analysis by motion pictures of thin walled graphite/epoxy composite fracture
07 p0965 A72-19734

Oxygen effect on structure and mechanical, technological and corrosive properties of stainless steel melted in open and vacuum furnaces
07 p0103 A72-19739

Structure, hardness, density and electrical resistance of binary alloys V-Ti, V-Cr, V-Al and V-Sn
07 p0103 A72-19741

Mechanical properties of fiber reinforced heat resistant alloys
07 p0103 A72-19743

Heat resistant Nichrome composite alloy with tungsten filament reinforcement, discussing manufacture and mechanical properties at 1100 C
07 p0103 A72-19747

Cast and wrought Ti alloys Ar arc weldments microstructural and mechanical properties after different heat treatment sequences
07 p0103 A72-19750

Rupture strength of disk with surface crack under concentrated loads, applying integral equation to stressed state
07 p1092 A72-19777

Transition metals addition effect on Al-Cu alloy strength and aging characteristics, determining lattice constant increase by X ray microstructural analysis
07 p0104 A72-19841

High temperature strengthening of vacuum melted W-Ti alloys with Mo and Zr additions
07 p0104 A72-19843

Deformation rate and temperature effects on optimum strength and ductility of die forged and extruded Mo-Ti alloys
07 p0104 A72-19845

Book on materials low temperature mechanical properties covering metals, polymers, ceramics and composites, temperature effects on deformation processes, fracture mechanics, test methods, etc
07 p0105 A72-19909

Heat treatment effects on strength differential of high strength martensitic stainless and Ni maraging steels
07 p0105 A72-19926

Strength differential effect on microstructures of steels, using tensile and compressive stress-strain curves
07 p0105 A72-19927

Microstructure and high temperature mechanical properties of unidirectionally solidified pseudobinary Fe-Cr-Nb eutectic alloy
07 p0106 A72-19938

Carbide precipitation effect on strength of ausrolled hardenable hypoeutectoid and hypereutectoid stainless steels
07 p0106 A72-19943

Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities
07 p0107 A72-19930

Supermolecular structure artificial defects influence on mechanical strength of pyrographite
07 p0102 A72-20136

Chemically etched notches effect on Al-Mg alloy mechanical properties
07 p0108 A72-20139

Test temperature effect on phase composition, mechanical properties and resistance to cavitation of unstable austenitic steels, describing test facility
07 p0108 A72-20140

Nb and Nb alloys mechanical properties during plastic deformation and heat treatment, discussing grain size, dislocation structure and substructural changes effects
07 p0108 A72-20144

Metals and alloys breakdown toughness and mechanical properties predictions under various loading conditions, discussing interatomic bonds and plastic deformation zone size
07 p0109 A72-20146

Structural limitations of interstellar ramjet, investigating operation during travel in high matter number density space
07 p0104 A72-20249

Heat treatment of martensitically aging steels with Co, Ni and Mo, considering hardening effects and optimal conditions for high mechanical properties
07 p1020 A72-20414

Fe addition effects on structural and mechanical properties of heat resistant Ni-Cr alloys
07 p0102 A72-20416

Precipitation hardened Ni-Al alloy mechanical properties, relating ductility and strength to precipitate caused inhibition of microcrack initiation and propagation
07 p0101 A72-20438

Physicomechanical properties of steel with oxide, sulfide, silicon, phosphorus and mixed metal-non-metal inclusions
07 p0102 A72-20618

P-analytical functions application to strength analysis of zero moment shells of revolution with positive Gaussian curvature under concentrated loads
08 p1242 A72-20905

Soviet handbook on vibration absorbing properties of construction materials under cyclic straining, covering energy dissipation and dynamic strength
08 p1185 A72-20975

Materials ideal strength calculation compared with test results
08 p1242 A72-21185

Mellin transforms application to two dimensional elasticity problem for anisotropic wedge with continu-

ous mechanical characteristics under concentrated force

08 p1243 A72-21238

Monocrystals elastic anisotropy effects on polycrystalline sinter matrix minimum porosity, thermal conductivity, mechanical and elastic properties, thermal stress resistance and Hugoniot elastic limit

08 p1186 A72-21441

Thermal and mechanical properties of randomly reinforced fiber/resin composites including boron/epoxy, Thorne/epoxy and S glass/epoxy materials

08 p1192 A72-21682

Inorganic single crystal titanate whisker fibers with high modulus strength for plastic reinforcement, noting mechanical, thermal and physical properties

08 p1193 A72-21685

Composite processing, adhesive formulary, bonding processes and mechanical properties of low void content autoclave molded polyimide graphite composite stiffened titanium alloy structures

08 p1193 A72-21687

Graphite fiber reinforced composites with high mechanical strength and modulus at low weights, fatigue resistance, vibration damping and tailorable thermal expansion coefficient

08 p1193 A72-21689

Mechanical surface strengthening effect on small cycle fatigue life of Ti alloy weakened by stress raiser

08 p1186 A72-21725

Nondestructive determination of glass reinforced plastics normal elastic and shear moduli and strength characteristics by vibrational, pulsed and acoustic methods

08 p1195 A72-21773

Soviet papers on imperfections of crystalline structure effects on physical and mechanical properties of metals and alloys, covering radiation damage, microdeformations, X ray investigations, etc

08 p1187 A72-21785

Material properties nonuniformities effect on wound fiber glass reinforced plastic rings and cylinders thermoelastic residual stresses

08 p1196 A72-21858

Extremal mechanical properties directions in orthotropic glass fiber reinforced plastics symmetry planes

08 p1196 A72-21866

Copper, zinc and aluminum mechanical properties comparison by cyclic and steady state compressive load tests, noting stress-strain curve relationship to strain rate

08 p1188 A72-21921

Routine method for ultrathin carbon support film production for electron microscopy, noting mechanical stability and strength

08 p1172 A72-22020

Soviet book on corrosion cracking of carbon steels covering chemical composition, structure, mechanical properties, anode and cathode processes role and adsorption losses

08 p1190 A72-22163

Work hardening after ausforming and heat treatment effects on mechanical properties of metastable austenitic Ni-Cr steel

08 p1190 A72-22165

Surface active medium effect on free surface energy and strength of pyrographite in ethyl alcohol solution, using crack kinetics experiment

08 p1197 A72-22182

Mechanical properties anisotropy in heat resistant Ni alloys due to strengthening phase nonmetallic inclusions distribution, suggesting purification by vacuum melting

09 p1327 A72-22231

High temperature tests of graphite composites in air, determining material loss time dependence and correlation with observed strength data after oxidation

09 p1333 A72-22381

Thermomechanical treatment effects on microstructure and mechanical properties of Al alloy

09 p1327 A72-22470

Mg alloys compositions, melting points, mechanical properties and applications

09 p1327 A72-22479

Fiber thermoplastics matrix breakdown and mechanical properties enhancement, examining lateral and longitudinal strain during uniaxial tensile creep and recovery

[PI PAPER 4]

09 p1337 A72-22541

Pultrusion process for carbon fiber reinforced plastic, compared with wet lay up technique, noting mechanical properties

[PI PAPER 10]

09 p1318 A72-22545

Glass ceramics mechanical properties as function of temperature during bending, taking into account scale factor

09 p1337 A72-22742

Circumferential crack in closed shallow cylindrical shell under tension, computing stress singularities strength

09 p1404 A72-22912

Fiber composites mechanical properties - Conference, Teddington, England, November 1971

09 p1338 A72-23162

Strength and fracture energies and toughness in fibre reinforced ceramics

09 p1339 A72-23171

Plastic deformation effect on structure and properties of steel sheet under biaxial tension at liquid nitrogen temperature

09 p1330 A72-23187

Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickelide eutectic composite over range of solidification rates

09 p1330 A72-23376

Thermomechanical strengthening of gamma prime precipitation hardened nickel base superalloy, emphasizing working operation and dislocation substructure

09 p1330 A72-23377

Stress-strain characteristics of metal ductile filaments with elastic brittle coatings, noting strengthening effect on anodic oxide coated aluminum

09 p1330 A72-23379

Beta-III Ti alloy mechanical properties dependence on heat treatment and elevated temperature exposure, illustrating associated microstructures

09 p1331 A72-23384

Diffusion bonding compared to other processes, discussing mechanical properties, metallurgical condition, fatigue, pressure, temperature and production problems

09 p1320 A72-23633

Fe-Ni-C alloy mixed austeno-martensitic microstructure embrittlement, investigating mechanical properties after thermomechanical treatment

10 p1495 A72-24087

Metal matrix composites deformation and mechanical properties prediction from component phases information, examining interface role, residual stress effect and thermal degradation

10 p1553 A72-24176

S glass/epoxy composites strength retention properties under long duration tensile load, proposing use of stress rupture data for reliable safe structural design

10 p1501 A72-24263

Fiber reinforced materials mechanical properties calculation, taking into account various fiber orientations and multiaxial loads

10 p1501 A72-24493

Sintering and aging effects on mechanical behavior of low carbon copper steel

10 p1488 A72-24696

Low temperature resistant stainless steels mechanical properties, microstructure and weldability, discussing compositions and heat treatments

10 p1498 A72-24838

High strength steel strip reinforced aluminum, discussing fabrication techniques and mechanical properties

10 p1498 A72-24839

Mechanical characteristics of natural and synthetic rubber, noting features of cork filled urethane

10 p1502 A72-24861

Filler metal paste application effect on Hastelloy sheet brazing quality, describing results in terms of mechanical properties and microstructural characteristics

11 p1637 A72-25342

Dimensional stability and micromechanical properties of materials for use in OAO, investigating residual stresses, creep properties and stress relaxation

[AIAA PAPER 72-325]

11 p1653 A72-25362

Beryllium sheet and foil application to lightweight space structures, discussing mechanical properties

[AIAA PAPER 72-404]

11 p1726 A72-25425

Empirical multiaxial strength criteria for anisotropic composite materials

11 p1731 A72-25455

Tubular specimens for testing mechanical characteristics of fiber reinforced composites under axial loading, discussing design, fabrication and end attachment problems

11 p1670 A72-25456

Mechanical behavior of three dimensional reinforced ablative composites, including carbon-phenolic, quartz-phenolic and quartz-carbon materials

11 p1670 A72-25459

Bolted connections strength in graphite fiber-epoxy resin composites reinforced by colaminated boron film

11 p1672 A72-25476

B-Al composite mechanical properties improvement through heat treatment and steel addition

11 p1653 A72-25478

Metal matrix composites, testing neutron irradiation effects on mechanical properties for nuclear application feasibility

11 p1654 A72-25483

Mn content effect on mechanical properties and corrosion fatigue and stress corrosion cracking resistance of Al-Mg casting alloys

11 p1658 A72-25850

Book on carbon fibers in composite materials covering fiber testing and mechanical properties

11 p1674 A72-25924

Luna 16 automatic probe drilling experiment, obtaining lunar rocks physicochemical properties for comparison with terrestrial rocks

11 p1613 A72-25938

Mechanical, technological and physical properties of steel with and without molybdenum

11 p1660 A72-26139

Prolonged heating effect on heat resistant Mg alloys microstructure and mechanical properties

11 p1660 A72-26143

Organic matrices in structural composites, considering mechanical behavior, processability and properties in adverse environments

11 p1674 A72-26230

Fiber-matrix composites overall strength optimization, emphasizing matrix and interface effects

11 p1674 A72-26231

Organic and metal matrix composites physical and mechanical properties and application to spacecraft and missile components, considering cost effectiveness

11 p1674 A72-26233

Microstructure and mechanical properties of heat treated friction welds at high temperatures

11 p1641 A72-26489

Tungsten alloy wires strength, creep properties and fatigue limit, investigating fracture characteristics

11 p1663 A72-26807

Test device for reinforced plastics mechanical properties under heating and pressure with allowance for gas permeability

11 p1613 A72-26813

Mo-Hf alloys high temperature mechanical properties improvement by internal diffusion nitriding, noting precipitates effects

11 p1644 A72-26843

Oxygen, carbon and boron effect on liquid phase sintering behavior and mechanical properties of Ni base superalloys

11 p1645 A72-26848

Microstructure and mechanical properties of dispersion strengthened Co alloys, investigating heat treatment effects

11 p1664 A72-26851

Mg addition effect on high temperature mechanical properties of nickel-alumina alloy, studying particle coarsening mechanism changes

11 p1664 A72-26856

W-Ni-Mo alloys obtained by powdered metals sintering, investigating mechanical properties, phase distribution and composition

11 p1666 A72-26876

Carbon and other inclusions effects on cast W strength at elevated temperatures from microscopic observation

11 p1666 A72-26877

Carbon and oxygen distribution and content effects on Mo mechanical properties and embrittlement

11 p1666 A72-26878

Luna 16 Sea of Abundance rock volume weight, destruction pattern, compressibility, shear strength and carrying ability, comparing to terrestrial rock

11 p1724 A72-26910

Dislocation structure and strength of Ti at low and intermediate temperatures, investigating strain, grain size and interstitial solute hardening

11 p1666 A72-26927

Coherent phases transformations in alloys, investigating mechanical properties dependence on microstructural features

11 p1667 A72-26929

Carbide precipitation effect on structure and high temperature strength of Co based alloys

11 p1667 A72-26932

Mechanical properties, microstructural characteristics and fracture behavior of beta Ti-V-Cr-Al alloy

11 p1667 A72-26933

Deformation characteristics and mechanical properties of superplastic alloys, stressing metallographic techniques

11 p1739 A72-26936

Mica glass ceramics mechanical properties and thermal shock behavior in terms of microstructural variables, discussing fracture propagation and secondary cracks formation

11 p1675 A72-26949

Glass sample mechanical strength testing, considering abrasion process, concentric ring stress calculation and laser light scattering techniques

12 p1832 A72-27007

Chemically strengthened glass for eject-through frangible canopy design in aircraft emergency escape systems, noting protection against ejection injuries

12 p1813 A72-27016

Polymer testing machine for simultaneous structural and mechanical properties measurement of specimens subjected to uniaxial tensile loads for broad temperature range

12 p1795 A72-27465

Flexible solar cell array module design technique, discussing electric welding procedure and equipment parameters effects on breaking strength and reliability

12 p1758 A72-28036

Fabrication, and physical, mechanical and ablation properties of three dimensional carbon-carbon cylinder composite materials

12 p1834 A72-28086

Fiber reinforced Mod 3 carbon-carbon composites mechanical and thermal properties comparison with polycrystalline bulk graphite

12 p1834 A72-28087

Resin bonded B-Al composites, discussing fabrication techniques and mechanical properties

12 p1815 A72-28098

Composite materials mechanical and thermal properties for ATS reflector supporting truss, noting graphite fiber reinforced epoxy plastic design, fabrication and tests

12 p1886 A72-28158

Fusion silicide protective coatings performance for Ta alloys under simulated reentry conditions, noting oxidation rate, ductile brittle bend transition temperature and mechanical properties

[ASM PAPER W 72-13,6] 12 p1835 A72-28162

Molecular-mechanical theory of external friction, taking into account surface roughness, time and temperature dependent mechanical properties and chemical processes

12 p1818 A72-28195

Low carbon steel prior plastic deformation effects on mechanical hysteresis loop shape

12 p1887 A72-28234

Engineering formula relating crack tip stress intensity coefficient to mechanical properties and structural element size

12 p1887 A72-28236

Crack and notch induced stress concentrations effect on steel mechanical properties at 20-293 K, using static and dynamic test methods

12 p1831 A72-28240

Rare earth metals addition effect on mechanical properties of electrolytic hydrogen-refined Cr, noting low temperature ductility

12 p1831 A72-28241

Russian book on hard alloys strength covering WC-Co and WC-TiC-Co alloys microstructure, thermal stresses and fracture mechanism

12 p1831 A72-28348

Haynes high strength heat resistant Ni-Cr-W alloy metallurgical and structural relationship, mechanical and physical properties, oxidation and corrosion behavior and fabrication processes

13 p1973 A72-28649

Mechanical properties of thick Be plate produced by diffusion bonding of thin sheets from ingot material

13 p1973 A72-28655

Ultrafine grained microstructures and mechanical properties of alloy steels developed by cold working followed by annealing

13 p1974 A72-28662

Mechanical properties of nitrified austenitic steels at low temperatures, noting improved tensile strength

13 p1977 A72-29017

Ti-V and Ti-Nb alloys mechanical strength and stress concentration resistance at low temperatures

13 p1977 A72-29018

Cr and V additions effects on Mn steels mechanical properties and wear resistance, noting strength limit increase

13 p1977 A72-29021

High temperature strength of low ductile refractory metals, describing test equipment

13 p1978 A72-29446

Borated steels strength under static bending, cyclic flexure and torsion and impact loads, correlating fatigue strength, residual stresses and core properties

13 p1979 A72-29477

High stress state mechanical properties of steels with different carbon contents and heat treatments

13 p1979 A72-29478

Combined thermal, vibrational and dimensional treatments effect on WC-Co alloy physical and mechanical properties, noting tensile and impact strength increase

13 p1979 A72-29480

Phase composition, structure and strength properties of aluminizing coatings on Ni-Al alloys, noting plasticity increase due to Ta addition

13 p1980 A72-29485

Effect on physical and mechanical properties of hard metals due to gas sorption by metallic films spray-coated on surfaces, describing vacuum apparatus

13 p1939 A72-29488

High strength carbon fiber reinforced plastics, discussing fabrication techniques, fiber structural, physical and mechanical properties and potential technological applications

13 p1984 A72-30075

Microstructure and mechanical properties of molecular cermets produced from slip-cast fused silica of different porosity by alumothermal reduction method

13 p1967 A72-30115

Cobalt-base superalloys powder-metallurgical fabrication techniques and related effects on physical and mechanical properties

13 p1982 A72-30126

Mechanical strength of interstitial solid tantalum-oxygen solutions obtained by electron beam fusion,

thermal cycling and saturation as function of temperature and oxygen contents

14 p2112 A72-30163

Optimal mechanical properties of Ti alloys with Cr, Mo, V, Nb and Ta additions, considering tensile strength, impact toughness, elongation and flattening

14 p2113 A72-30164

Ni-Cr-Mo stainless maraging steel, investigating yield strength, toughness, corrosion resistance and weldability

14 p2113 A72-30270

Ni, Si and Mn alloying effect on structural transformations, phase composition and mechanical properties of cast Cr-Ni steels

14 p2114 A72-30273

Sn alloying effect on heat resistant Ni-Cr alloys plastic strain resistance and strength at room and high temperatures

14 p2114 A72-30274

Hot worked Al alloy machine elements mechanical properties scattering, discussing quality control procedures

14 p2114 A72-30275

Aluminum-stainless steel and Ni-Mo composites prepared by dynamic hot pressing, determining bond strength between fibers and reinforced metal matrix

14 p2107 A72-30431

High speed testing of materials mechanical behavior over range of loading rates

14 p2165 A72-30441

High temperature mechanical properties - Conference, Clermont-Ferrand, France, October 1970

14 p2116 A72-30526

Welded Al alloys at temperatures above 100 C, discussing traditional and powder metallurgy and mechanical properties dependence on time, temperature and creep

14 p2116 A72-30528

Sintering and melting preparation effects on mechanical properties of refractory W-Re alloys, considering sigma phase in solid alpha solution

14 p2116 A72-30530

Chemical and mechanical properties relationship to stress corrosion in high strength Al-Cu and Al-Zn-Mg alloys, emphasizing grain boundaries cleavage energy

14 p2117 A72-30536

Heat resistant Ni alloys grain boundaries precipitates as function of composition and heat treatment, noting effects on mechanical properties

14 p2118 A72-30589

Quenching rate and alloying element content effects on precipitation extent and corrosion resistance of Al-Cu alloys, discussing microstructure, chemical composition and mechanical properties

14 p2119 A72-30604

Gamma radiation effects on composite propellants stability, investigating polyurethane, polybutadiene, silicone and polyisoprene binders mechanical properties

14 p2144 A72-30760

Carboxy-terminated polybutadiene/ammonium perchlorate base solid propellants aging properties under long time storage conditions at 243-353 K, considering mechanical, dimensional and combustion properties

14 p2145 A72-30763

Atmospheric humidity, temperature, vibrational and static loads effects on composite and double base rocket propellants strength and safety characteristics

14 p2145 A72-30764

Case bonded solid rocket propellants mechanical strength characteristics determination by photoelastic stress measurements or viscoelastic calculation

14 p2145 A72-30765

Polyester bonded explosives mechanical and thermal properties, noting need for desensitizing against shock and friction effects

14 p2145 A72-30768

Ta-W-Hf alloy mechanical properties impairment from oxygen contamination, noting hafnium dioxide precipitate in reaction zone

14 p2121 A72-30769

Iron carbide single crystal growth texture due to anisotropy of interatomic interactions associated with oriented covalent Fe-C bonds

14 p2121 A72-30774

Binary Al alloys intermetallic phases effects on microcracks nucleation and propagation at 300 C in uniaxial tension, considering alloying elements influence on mechanical properties

14 p2124 A72-31036

Heat treated light alloy bar deformation, temperature and time factor effects macrostructure and mechanical properties

14 p2124 A72-31038

Composition, strength and plasticity of ultralight Mn-Li alloys with two-phase alpha-beta base

14 p2125 A72-31040

Li addition effects on Mg mechanical properties temperature dependence and notch sensitivity of binary Mg-Li alloys

14 p2125 A72-31041

Combined heat treatment and machining effects on Mg-Nd alloys structure and mechanical properties, noting strain hardening mechanism

14 p2125 A72-31042

Material constants for strain hardened polycrystalline metals calculated from mathematical model for plastic deformation

15 p2322 A72-31361

Mechanical properties of composite materials, discussing elastic deformation and failure modes

15 p2260 A72-31442

Composite materials for engineering component and structure design, considering mechanical properties and cost-effective performance

15 p2260 A72-31443

High temperature oxidation resistance and mechanical properties of Fe-Al-Cr alloys with Ti and Mo additions

15 p2253 A72-31520

Plastic deformations accumulation and breakdown initiation in notched steel specimens, discussing effects of mechanical properties, geometry and heat treatment

15 p2256 A72-31607

Mechanical properties of high temperature steels and alloys for gas turbine rotors, disks and blades

15 p2256 A72-31703

Ultrasonic sound influence on metal physical and mechanical characteristics, utilizing in testing and manufacturing procedures

15 p2275 A72-31832

Complex Ca lubricants strength, colloidal and mechanical stability and thermal hardening relationship to dispersion medium viscosity

16 p2413 A72-33172

High strength fine grain structural steels fracture characteristics from notch-bar impact and tensile tests, determining inclusions effect on mechanical properties

16 p2406 A72-33236

Tensile strength, toughness and corrosion resistance of dross aluminized carbon steel specimens under static, cyclic and impact loads

16 p2406 A72-33267

Porosity effect on mechanical properties, airtightness, corrosion resistance and moisture absorption of glass fiber reinforced plastics

16 p2414 A72-33270

Flame retardant glass reinforced thermoplastic polyester Celanex processing and performance, considering flammability, and electrical/mechanical properties

16 p2415 A72-33420

Strain rate and temperature effects on supersaturated Al-Cu-Mg solid solution mechanical properties, considering ultimate tensile strength and hardening

16 p2407 A72-33443

Cold rotatory forging and subsequent heating effects on microstructure, texture and mechanical properties of dispersion hardened Ni specimens obtained by hot extrusion

16 p2407 A72-33530

Graphic procedure for strength test data conversion from test temperature to design temperature based on equivalent damageability concept

16 p2411 A72-33847

Carbon fibers for composite materials reinforcement, discussing mechanical properties and economic factors

17 p2569 A72-34188

Crack opening displacement and the rate of fatigue crack growth

17 p2565 A72-34255

The effect of firing temperature on properties of natural steatite and pyrophyllite

17 p2569 A72-34666

Carbon fibre composites with ceramic and glass matrices. I - Discontinuous fibres

17 p2570 A72-34668

Carbon fibre composites with ceramic and glass matrices. II - Continuous fibres

17 p2570 A72-34669

Transition metal-modified matrix resins for composite materials

17 p2570 A72-34672

Effect of end attachment on the strength of fiber reinforced composite cylinders.

[SESA PAPER 1994A]

17 p2630 A72-34817

Re applications technology, discussing production methods, mechanical and physical properties, plasma spraying, annealing and alloying techniques

17 p2567 A72-34825

High-temperature resistant cobalt alloys

17 p2567 A72-35173

Stress analysis of axisymmetric solids with asymmetric properties

17 p2632 A72-35227

Composite materials technology utilization in structural design, considering stiffness, strength, weight, fatigue properties, adhesive joining and structural reliability

17 p2633 A72-35283

Russian book on metal alloys structure and properties covering structural changes in solid bodies, metals

atomic structure, diffusion, phase transformations and composite materials
17 p2568 A72-35446

Mechanical properties of carbon filament wound carbon matrix composite from tensile tests, noting reinforcement efficiency
17 p2573 A72-35669

Physical-mechanical properties of beryllium oxide and investigation of its electrical resistance under irradiation in a reactor
18 p2703 A72-36147

The stability of structure of physical mechanical properties of molybdenum and tungsten after irradiation and thermal influence
18 p2698 A72-36153

Studies of physical-mechanical properties of monocrystal molybdenum and tungsten and electrical characteristics of TIC /thermionic converter/
18 p2698 A72-36154

The strength of fibre composites.
18 p2703 A72-36268

Coupled glass-fibre/polypropylene composite - An initial evaluation.
18 p2703 A72-36269

Substitutional-interstitial interactions in bcc alloys.
18 p2699 A72-36396

Kinetics and annealing and mechanical properties of W chemical vapor deposition, discussing high temperature tests
18 p2656 A72-36398

Phase stability and mechanical properties of carbide and boride strengthened chromium-base alloys.
18 p2700 A72-36579

The structure and properties of thermomechanically treated beta-III titanium.
18 p2700 A72-36586

Techniques to curb static austenite recrystallization rate in martensitic sheet steel during high temperature thermomechanical treatment through minute Ti or Zr additions
18 p2701 A72-36702

Effects of work hardening on the structural hardening of T-A6V6E2 titanium alloy
18 p2702 A72-36706

Transition metals physical and mechanical properties, production, refining and vacuum processing techniques
18 p2696 A72-36840

Russian book - Automation of the monitoring and study of metals
19 p2795 A72-37299

Program-controlled machine for the investigation of mechanical properties of materials under a complex stress.
19 p2795 A72-37575

Characterization of commercial titanium powders.
19 p2815 A72-37595

Investigation of the effect of some surface-active media on the variations in strength characteristics of steel U8 in a high strength state
19 p2817 A72-37738

Investigation of the influence of surface treatment purity and procedure on the strength of the Kh18Ni10T and Kh16N6 steels and the AMG6 alloy at normal and low temperatures
19 p2819 A72-38016

Inflatable mandrels use to manufacture filament wound casings examined in terms of suitable mandrel materials and required mechanical properties
19 p2808 A72-38167

A method of improving the physico-mechanical properties of filled epoxy compounds by treatment in an ultrasonic field
19 p2823 A72-38184

Electronic control systems for industrial applications, discussing electrical and mechanical properties, circuit reliability and mechanical design features
19 p2782 A72-38314

Computerized finite element three dimensional stress analysis, taking into account mechanical and thermal stresses
19 p2878 A72-38649

Strength factors of fiber reinforced composites under tension, compression, shear, bending and plane stress
20 p2944 A72-38947

Super-alpha Ti alloy development, measuring physical and mechanical properties
20 p2936 A72-39205

Reinforced metals - Mechanical property considerations.
20 p2936 A72-39210

Structure-property relationships in polymeric materials.
20 p2944 A72-39212

Factors affecting acoustic emission response from materials.
20 p2924 A72-39279

Influence of boron on the structure and certain properties of electron-beam melted molybdenum
20 p2939 A72-39313

Boron and carbon fibers fabrication and properties for composite materials reinforcing elements, noting

strength and stiffness dependence on stress orientation
20 p2944 A72-39437

The fiber and filament reinforcement of plastic and brittle matrix materials
20 p2944 A72-39438

Production and properties of carbon fiber-reinforced aluminum
20 p2940 A72-39442

Mechanical properties of boron fiber reinforced aluminum matrix composite, describing experimental and control techniques
20 p2940 A72-39447

Mechanical and microstructural properties of steels for effective surface cementation, suggesting Mo and Cr optimal contents
20 p2941 A72-39576

Mechanical properties improvement of Al alloys for machine construction applications, suggesting Ti, Zr and Be additions optimal rate
20 p2941 A72-39577

An interpretation of radiation effects on mechanical properties of carbon fibres based on a 'sheath' and 'core' model of fibre structure.
20 p2944 A72-39794

Mechanical properties of Ti-Mo alloys at low temperatures
20 p2942 A72-39824

Installation for the simultaneous measurement of the functional properties of sliding contacts
20 p2928 A72-39936

Russian book - Handbook of aircraft materials.
21 p3072 A72-40459

Extension Seminar on High Temperature Strength of Metals, Kyoto, Japan, August 21, 1971, Preprints.
21 p3068 A72-41007

The properties and structures of a heat resistant 1Cr-Mo-V steel and alloy A-286 after long time exposures at elev. temps.
21 p3069 A72-41012

Mechanical properties of titanium strengthened by monodirectional molybdenum wires
21 p3069 A72-41354

Random function theory method for estimation of tensile, compressive and shear strength and elastic constants of monodirectional fiberglass reinforced plastics
21 p3073 A72-41708

Investigation of the influence of multiple-pass welding on the mechanical properties of welded joints of VT6s and VT14 titanium alloys
22 p3182 A72-41861

Influence of temperature on the mechanical properties of metallic compounds
22 p3191 A72-42804

Binary and multicomponent Re alloys with W, Mo, Ni, Co and Cr, noting elastic and strength properties for torsional suspension structures
22 p3191 A72-42805

Alloying and impurity effects on mechanical and recrystallization properties of Ta obtained by arc, electron beam and zone melting
22 p3191 A72-42809

Effect of rare earth metals on the structure and properties of aluminum and its alloys
22 p3192 A72-42818

Deformable magnesium alloys with scandium and yttrium
22 p3192 A72-42820

Mechanical and thermophysical properties of heat resistant Nb alloys, noting application for thermionic cathodes
22 p3192 A72-42821

Effect of the process of crystallization of the liquid phase under pressure on the properties of Silumin
22 p3192 A72-42959

Fabrication and properties of graphite fiber reinforced magnesium.
22 p3193 A72-43035

The limiting strength of worn metal surfaces.
22 p3194 A72-43039

Enhanced strengthening of a spinodal Fe-Ni-Cu alloy by martensitic transformation.
22 p3194 A72-43040

Determination of the mechanical properties of steels by short-time rupture in hydrogen at high temperatures and pressures
22 p3195 A72-43160

Physico-mechanical properties of fiber carbides
23 p3299 A72-43291

Fiber composite columns under compression.
23 p3344 A72-43494

Mechanical properties of titanium alloys with isomorphous beta-stabilizing elements
23 p3300 A72-43590

Mechanical properties of heat and corrosion resistant nonmagnetic Ni-Cr-Nb spring alloys with W addition tested in aggressive and nitric acid base media
23 p3300 A72-43595

Diffusive metal coatings stress-strain state effect on composite Mo material strength, ductility and creep characteristics
23 p3306 A72-43732

Material properties, metallurgy, production technology and operational factors effects on machinery structural strength
23 p3347 A72-43733

Heat resistant steels long time strength determination by graph-analytical time-temperature extrapolation
23 p3301 A72-43739

Brittle ceramic materials strength, showing porosity effect dependence on Weibull homogeneity parameter value
23 p3306 A72-43750

Heat resistant ZhS6K alloy precision and ground cast specimens, determining short and long term strength and fatigue
23 p3301 A72-43761

Increasing the boundary strength of electron-beam-melted cast molybdenum by vanadium microadditions
23 p3302 A72-43967

Influence of the cooling rate after sintering on the structure and properties of the ZhGr1.5D2.5 cermet
23 p3303 A72-44014

Investigation of the process of D16-alloy quenching in liquid nitrogen
23 p3294 A72-44095

Dislocation-substructure-strengthening and mechanical-thermal treatment of metals.
23 p3304 A72-44299

Cumulative damage stochastic models and distributions of strength of steels and graphite.
24 p3412 A72-44673

Book - A review of the science of fibre reinforced plastics.
24 p3417 A72-44674

Two-dimensional problem of elasticity theory for an anisotropic inhomogeneous wedge
24 p3459 A72-45263

Relationship between the strength properties and the phase composition of annealed titanium alloys
24 p3414 A72-45383

A study of the hardening of the subspinoidal alloy Fe-Ni-Al
24 p3415 A72-45395

Soil mechanical properties at the Apollo 14 site.
24 p3447 A72-45556

Polyfluoroethylene-based composite materials mechanical properties, discussing strengthening mechanism of filler additions
24 p3417 A72-45731

Mechanical properties of heat treated hardened high strength steel, investigating microstructure relationship to failure characteristics
24 p3416 A72-45734

Metallurgical treatment control reliability in machine part mechanical properties quality evaluation
24 p3416 A72-45735

Strength margin estimation in materials sustaining cumulative static and cyclic damage under thermocyclic loads
24 p3460 A72-45736

V and Al addition effects on mechanical properties of oxygen rich Ti alloys
24 p3416 A72-45745

Structural and strength characteristics of carbon materials, considering composites preparation and applications
24 p3418 A72-45748

Automatic testing machine for mechanical properties of metals under static loading
24 p3389 A72-45751

Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities
24 p3416 A72-45756

Supermolecular structure artificial defects and bond strength influence on mechanical strength of pyrographite
24 p3418 A72-45761

Chemically etched notches effect on Al-Mg alloy mechanical properties
24 p3417 A72-45764

MECHANICAL RESONANCE
U RESONANT VIBRATION
MECHANICAL SHOCK
NT HYDRAULIC SHOCK

Averaging method for systems with shocks, assessing exact and approximate solutions discrepancy over finite time intervals
08 p1206 A72-20967

Low temperature shock effects on lunar glass spherules from two beam interferometry, discussing mechanical and thermal causes of fragmentation
14 p2149 A72-30266

New mechanical device for producing traumatic shock in dogs - Circulatory and respiratory responses.
22 p3142 A72-42490

MECHANICAL TWINNING
Ni-NiNb intermetallic unidirectional eutectic alloy crystal structure and high temperature behavior, considering mechanical twinning relationship to strain hardening and ductility
05 p0677 A72-17108

- Stress-strain behavior of steel under elastic compression at 4.2 K, observing discontinuous twinning
07 p1020 A72-20413
- Various restraint dislocation distributions effect on mechanical twinning behavior in purified Nb single crystals
10 p1497 A72-24824
- Slip and mechanical twinning in nickel-nickel niobide directionally solidified eutectic alloy, showing variation with temperature of stress-strain curves
11 p1667 A72-26935
- Mechanical twins formation process, distinguishing between deformation and strain and between crystal structure and lattice
20 p2961 A72-39991
- MECHANICS [PHYSICS]**
- Nonlinear mechanics and stability - Conference, Rome, February 1970
02 p0251 A72-11492
- Applied mechanics - Conference, University of Calgary, Canada, May 1971
02 p0292 A72-12001
- Book on applied mechanics covering hydrodynamics, biomechanics, transonic and hypersonic shock structures, random vibrations, plasticity, viscoplasticity, etc
06 p0896 A72-17958
- Nonlinear oscillations in mechanics - Conference, Kiev, U.S.S.R., August 1969
06 p0849 A72-18692
- Dimensional analysis proportionalities method parallel to formal similitude method for accelerative mechanics problems
10 p1503 A72-23919
- Modeling process for mathematical representation of mechanical problems, deriving design information in digital or graphic form
13 p2000 A72-28450
- Axiomatic development of mechanics from geometrically formulated kinematics to statics of rigid bodies and systems, using virtual rate of work and reaction principles
13 p2000 A72-28477
- Mechanics fundamentals in aerodynamical aircraft analysis, noting force concept and Newton theory
14 p2073 A72-30817
- Russian book on averaging method in nonlinear mechanics covering algorithms and schemes based on variables change, asymptotic methods and applications
15 p2273 A72-31274
- Applied mathematics and mechanics - Conference, Mannheim, Germany, April 1971
15 p2323 A72-31451
- Standardization of positive directions for parameters in materials strength theory, noting systems of coordinates, moments, forces, angles and stresses
15 p2325 A72-31502
- Inertial crosscouplings effect on orientation process dynamics of solid body investigated by nonlinear mechanics, noting centrifugal moments of inertia effects
15 p2275 A72-31730
- Papers on elasticity and thermoelasticity covering contact problems, stress effects on elastic wave propagation velocity, self excited thermal waves, diffraction, nonlinear thermoelasticity, etc
15 p2329 A72-32280
- Theory of nonlinear viscoelasticity and its applications
17 p2631 A72-35109
- Variational and probabilistic methods for multiphase media, noting applications in electrodynamics, nonlinear plasticity and mechanics

03 p0313 A72-13068

- Biotelemetry applications in medicine, animal experiments and ecology, including ergonometics, internal bleeding detection, fetal monitoring, animal brain implantations, animal movement tracking, etc
07 p0931 A72-19916

- Collaboration of World Health Organization and various international astronomical organizations for space technology applications to man-environment relationships and medical and communication sciences
07 p0933 A72-20300

- Clinical observations as a research method in physiology
17 p2504 A72-35017

- Pigs role as ideal experimental animal in human biomedical research, discussing investigations to emphasize similarities
18 p2649 A72-36440

- Russian book - Theory and practice of aviation medicine
19 p2760 A72-37447

MEDICAL SERVICES

- NASA sponsored medical R and D programs for space applications, stressing benefits to earthbound medical services
06 p0769 A72-18626

- Civil aviation physician duties for airline personnel and passenger benefit, discussing medical advice, health precautions, first aid training, etc
08 p1125 A72-21269

- A model corporate pilot physical program.
20 p2897 A72-39746

- Airport medical design guide /with comment on certain operational matters/.
22 p3150 A72-42500

- Application of planetary quarantine methodology and spacecraft sterilization technology to improved health care delivery.
24 p3375 A72-45148

MEDITERRANEAN SEA

- Mars surface features Schiaparelli nomenclature from Mediterranean Sea area classical geography
04 p0569 A72-14500

- Numerical wind profiles calculation over Mediterranean based on satellite photograph sequences of clouds
15 p2220 A72-31235

MEDIUM SCALE INTEGRATION

- Medium scale integration /MSI/ modules for arithmetic section in small, medium and process computers, emphasizing carry-lookahead procedure
13 p1926 A72-30053

- Techniques for control of long-term reliability of complex integrated circuits. II - A technique for the prediction of failure rates for MSI and LSI devices.
17 p2528 A72-34687

- Modularized digital controller for closed loop systems using MOS, MSI and LSI components
17 p2521 A72-34703

- High performance 16-bit computer organization.
17 p2523 A72-35580

MEETINGS**U CONFERENCES**

- MEISSNER EFFECT
U DIAMAGNETISM
U SUPERCONDUCTIVITY

MELLIN TRANSFORMS

- Direct method for dual and triple integral equations involving inverse Mellin transforms in potential mixed boundary value problems
01 p0094 A72-11390

- Mellin transforms application to two dimensional elasticity problem for anisotropic wedge with continuous mechanical characteristics under concentrated force
08 p1243 A72-21238

- Mellin transforms for finite elastic disk radial crack stress intensity factor and energy formulae in terms of Fredholm equation solution, considering constant loading case
11 p1738 A72-26724

- Inverse filtering for linear shift-variant imaging systems.
18 p2658 A72-36259

The torsion of a circular cylinder containing a symmetric array of edge cracks. 23 p3350 A72-44048

MELTING

NT ARC MELTING
NT FUSION [MELTING]
NT VACUUM MELTING

Melting atmosphere, atomizing media and consolidation techniques effects on Co base alloy powder products physical properties 02 p0240 A72-11436

Melting effect on recrystallization of overheated tempered steel, discussing rectification under conditions favoring formation of silicon-oxygen compounds 03 p0376 A72-14017

Hypersonic melting ablation waves simulation near stagnation region by frozen oil models [AIAA PAPER 72-92] 05 p0750 A72-16977

Gas content determination in metals by melting and vaporizing measured microvolumes using laser microprobe and magnetic mass spectrometer 07 p1006 A72-19549

Nonferrous metals melting, discussing solid and gaseous impurities removal, halide function and grain and Al-Si eutectic refinement method 07 p0999 A72-20570

BiTe crystal critical growth rate calculation based on theory for diffusional supercooling of melt with excess Te 08 p1217 A72-21338

Work hardening and recrystallization grain structure of sintered and electron bombardment melted Ta after annealing 11 p1644 A72-26839

Powder metallurgy versus melting and casting of high temperature alloys, tool steels and specialty alloys 11 p1646 A72-26869

Russian papers on physical chemistry of surface effects in melts covering binary and multicomponent alloys, silicates, oxides and salts at high temperatures 15 p2253 A72-31220

Metal melting heat relationship to diffusion activation energy with vacancy mechanism equal numerically to crystal internal energy maximum change 15 p2259 A72-32691

X-ray diffraction studies on liquids at very high pressures along the melting curve. I, II. 21 p3084 A72-40558

Influence of boron on the structure and properties of electron-beam melted molybdenum 24 p3414 A72-45380

Boron and carbon contents effect on elastic properties strength and ductility of electron beam melted Mo-B alloys 24 p3414 A72-45381

MELTING POINTS

Ta and Nb addition effects on W solid solution strengthening, determining W-Nb-Ta alloys phase diagram and melting point 03 p0375 A72-13943

Gamma irradiation effects on temperature of reversible solid-to-liquid phase transformation in Al 08 p1185 A72-21075

Powder materials heating and melting temperatures calculation in free turbulent nitrogen and argon plasma jets 08 p1181 A72-22098

Mg alloys compositions, melting points, mechanical properties and applications 09 p1327 A72-22479

Oxidation and substructural effects on low stress creep of Al near melting point 09 p1331 A72-23507

Melting points and phase diagrams for various tungsten oxide systems, noting alkaline earth and transition and trivalent metal tungstates 10 p1497 A72-24731

Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory [AIAA PAPER 72-313] 11 p1743 A72-25247

Liquid Rb and Cs density and thermal expansion measurements near fusion point, discussing temperature dependence and gamma ray irradiation method 11 p1746 A72-26237

High melting point alloy and metal powder production by vacuum atomization, using rotary vane and electron beam melting techniques 11 p1645 A72-26860

Thermoplastic materials casting procedures to mold high melting point metal compound powders 11 p1645 A72-26861

Hf binary systems phase diagrams, noting components effect on melting point, polymorphous transformations and mutual solubility 14 p2122 A72-30979

Dynamic elastic moduli of diffusion saturated high melting point nitrides, carbides and borides of Ti, Zr, Nb, W, Mo and Ta 15 p2252 A72-31199

Graphite wetting with liquid V, Nb and Mo as function of metal melting point and sample temperature 15 p2243 A72-31223

Chemical inhomogeneity of high melting metals and alloys of Ti, Zr, Nb and Cr from radio isotopic and nuclear emission studies 15 p2255 A72-31576

Measurement of melting point and electrical resistivity /above 3600 K/ of tungsten by a pulse heating method. 20 p2941 A72-39722

Surface tension, density, and volume change on melting of Al₂O₃ systems, Cr₂O₃, and Sm₂O₃. 24 p3417 A72-44925

NT SKIN [STRUCTURAL MEMBER]

Free radicals participation in cell membrane biopotential generation mechanism, comparing properties of protein molecules with semiconductors 02 p0169 A72-12348

Axisymmetric circular membranes large deflections, solving nonlinear partial differential equations by iterative method in conjunction with finite difference approximations 02 p0296 A72-12526

Prismatic shells membrane and bending fields induced by concentrated forces, applying Fourier analysis to semiinfinite plates geometry 02 p0296 A72-12527

Beam theory application to cylindrical and conical shells bending, deriving flexibility functions from membrane equations 02 p0296 A72-12529

Stability control of rotating circular plates with edge slots and membrane stresses by finite element method [ASME PAPER 71-WA/AUT-2] 05 p0733 A72-15951

Forced vibration and mechanical impedance of damped circular and annular membranes under central mass loads 05 p0739 A72-16615

Teflon diffusion membrane for in vivo blood and intramyocardial tissue gas tension measurement by mass spectroscopy without chemically bonded heparin surface 08 p1124 A72-20901

Natural oscillation frequencies of piecewise homogeneous L-shaped membranes, determining eigenvalues of second order elliptical differential operator 08 p1241 A72-20903

Membrane and bending moment stresses distribution at elliptical hole in circular cylindrical shell, solving boundary value problems 08 p1243 A72-21234

Elastic-plastic deformation of thin membrane shells 08 p1244 A72-21290

Myocardium excitation-contraction mechanism in heart regulation, discussing surface membrane structure and cell action potential 09 p1264 A72-22222

Creep ratchetting deformation and rupture damage from thermal transient stress cycle and constant membrane force under high temperature metal creep conditions 09 p1406 A72-23197

Artificial heart-lungs model with contractile polymer membrane as synthetic muscles to react with gases and liquids, discussing design features 10 p1431 A72-24640

Book on continuous elements dynamics covering membrane, torsional, string and elastic beam vibration, four pole techniques, periodic forced motion and surface waves 10 p1557 A72-24674

Intermediate length open noncircular cylindrical shells analysis based on Vlasov semimembrane theory 10 p1559 A72-24992

Shearing stresses in rod under torsion, using Prandtl membrane analogy and moire interference fringes 13 p2053 A72-28397

Ionic and hydrophobic interactions effects on Micrococcus lysodeikticus membrane stabilization process 14 p2075 A72-30595

Transverse impacts of hard cones on elastic membranes for various apex angles, using high speed photography 15 p2323 A72-31445

Nonlinear stress-strain-curvature problem applied to noncircular cylindrical membrane shell under lateral pressure 16 p2464 A72-32917

Membrane and bending stress analysis for thin circular cylindrical shells with elliptic hole 16 p2464 A72-32918

Longitudinal and transverse waves propagation and decay in elastic membranes with allowance for coupling effects, using Hadamard method 16 p2465 A72-32983

Strain energy methods for stability of finitely deformed elastic membranes under conservative loading 16 p2465 A72-33002

Singular perturbation methods for deflections, frequencies and eigenmodes of statically loaded or freely vibrating circular or annular membrane 16 p2467 A72-33106

Three dimensional photoelastic analysis of edge loaded ring reinforced rotating shells with zero bending, assuming pure membrane stress field 18 p2733 A72-36365

The radiation of sound from vibrating composite membranes. 18 p2711 A72-36757

Stress analysis of shell junctions fabricated by the filament-winding method. 19 p2877 A72-38169

Spherelike deformations of a balloon. 19 p2878 A72-38716

Experiments concerning the contact surface in a membrane shock tube 20 p2911 A72-39017

The long fluid storage bag - A contact problem for a closed membrane. 20 p2980 A72-39691

On the asymptotically spherical deformations of arbitrary membranes of revolution fixed along an edge and inflated by large pressures - A nonlinear boundary layer phenomenon. 21 p3118 A72-40840

Nonlinear equilibrium equations for hinged flat circular and spherical membranes under large axisymmetric elastic deformations due to internal pressure 21 p3125 A72-41516

Hydrodynamic forces acting on rigid disk and circular membrane vibrating in ideal incompressible fluid, noting dependence on phase shift between vibration modes 21 p3126 A72-41552

Large deflections of flat arbitrary membranes. 22 p3235 A72-42604

A simple formula for the maximum stress in a twisted angle or channel. 22 p3240 A72-42894

Lower and upper bounds for the lowest characteristic value of the elastically supported membrane 23 p3347 A72-43717

The coupled transverse vibrations of a spinning membrane disk with a central hub. 23 p3355 A72-44367

Review and forecast of electron microscope studies of membrane systems in terms of fundamental problems of biomedical research and molecular biology 24 p3371 A72-44869

Hemoglobin-facilitated diffusion of oxygen - Interfacial and thickness effects.

18 p2650 A72-36569

Studies of the electron transport chain of extremely halophilic bacteria. VII - Solubilization properties of menadiene reductase.

19 p2755 A72-37649

Study of the conductivity of the motor neuron membrane during supraspinal stimulation

21 p2999 A72-40585

Unsteady state description of living corneal mass transport modes, elucidating cornea thickness control mechanism

21 p3001 A72-40912

The effect of membrane parameters on the properties of the nerve impulse.

22 p3140 A72-41936

MEMORY

Selective attention and short term memory encoding, using tachistoscopic visual display arrangements of capital letters

02 p0166 A72-11549

Human immediate memory adaptation to speed stress, discussing response time and performance accuracy relationship to stimuli complexity and input speed

06 p0766 A72-17716

Short-time memory and electrographic effective and trace processes relationship from visual and Rolandian cortical regions activity and Tarkhanov galvanocutaneous reaction

06 p0764 A72-17993

Hippocampus neuron reactions and memory function realization with incoming information and stored imprints comparison by brain

08 p1122 A72-22191

Review of biology and biochemistry of memory, suggesting molecular level mechanism of cerebral information processing

10 p1424 A72-23925

Sleep deprivation effects relation to work duration, time of day, circadian rhythm, memory function, task performance, environmental factors, drug use and age

11 p1580 A72-26678

Object code storage in the static portion of a short-term memory

19 p2759 A72-37423

Operative memory mechanism as visual system neuron chain storage of stimuli from image recognition time measurements

20 p2891 A72-38936

Characteristics of certain parameters of memory for visual signals in lower monkeys

21 p3001 A72-40804

Visual experience as a determinant of the response characteristics of cortical receptive fields in cats.

21 p3003 A72-41461

Some effects of cognitive similarity on proactive and retroactive interference in short-term memory.

22 p3142 A72-42548

Content and time aspects of short and long term memory operation theories, relating attention and memory spans

24 p3373 A72-45243

MEMORY STORAGE UNITS

U COMPUTER STORAGE DEVICES

U CORE STORAGE

MENISCI

Abastumani Observatory 70 cm meniscus telescope, determining performance from primary focus field data

03 p0359 A72-13498

MENTAL HEALTH

Psychiatric preventive intervention in emotional crisis situations during patients aeromedical evacuation and transportation, discussing personnel shortage

10 p1429 A72-23743

MENTAL PERFORMANCE

Soyuz 9 flight crew physiological data, discussing mental and physical performance and adaptation and readaptation to space-earth environments

01 p0020 A72-10933

Skill acquisition in performance of three phase code transformation task

01 p0021 A72-11193

Time sharing three phase code transformation multitask effects on sustained performance

01 p0021 A72-11194

Human mental and psychomotor performance measurements in compressed oxygen-helium atmosphere pressure chamber for dive between 100 and 1500 feet

02 p0166 A72-11701

Inert gas narcosis under hyperbaric conditions relationship to mental performance and auditory and visual evoked responses in man

02 p0166 A72-11705

A-1144

Human mental working capacity estimation relation to functional state, discussing brain performance tests

03 p0316 A72-13721

Operant conditioning for producing gross motor responses, discussing application to physical medicine and rehabilitation with mentally retarded Downs syndrome children

04 p0478 A72-14706

Short and long term mental and physical work effects on central nervous system and motor apparatus in young people

04 p0474 A72-15230

Time shortage as stress factor affecting mental activity of operator in man-flying vehicle system, discussing control signal handling efficiency

05 p0622 A72-16638

Psycho-physical theory of human mind, discussing molecular biological processes of neuron recording in terms of quantum mechanics

06 p0769 A72-18191

Mental rehearsal and physical practice relation to learning rate for rotary pursuit tracking skill acquisition

07 p0925 A72-18801

Sex differences of chronic effect of environmental stress on blood pressure and information processing in rats, observing neurotic hypertonic blood pressure irregularity

07 p0925 A72-20660

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition

09 p1270 A72-23129

Acceptable load standards in ATC tasks, defining moments of conscious brain control as mental load measure

09 p1271 A72-23139

Ergonomic simulators for testing individual mental working capacity, using stress-strain and fatigue relation

09 p1272 A72-23140

Visual search model from perceptual theory, animal studies and search data, discussing selection, inspection and naming single cued letters in visual array

09 p1270 A72-23647

Mental performance tests in sleep deprived subjects for indication of recuperative function of slow wave and REM sleep stages

11 p1580 A72-26682

Cumulative partial sleep deprivation effects on human performance in auditory vigilance, routine addition and running digit span tests, observing circadian rhythms

11 p1581 A72-26683

Project Pegasus vigilance tasks for mental performance aspects of time zone change effects on human circadian rhythms

11 p1589 A72-26695

Time zone transition induced circadian rhythm disturbance effect on military personnel mental and physiological performance

11 p1589 A72-26696

Vigilance effects for noise or vibration stimuli duration judgment task performed with or without simultaneous mental arithmetic task

14 p2080 A72-30964

Noise and vibration stress combined effects on human mental performance as function of time of day, taking into account circadian rhythm factor

14 p2081 A72-31083

Frontal cerebrum region and elementary mental activity

18 p2649 A72-36400

Manipulation of projected afterimages by means of the physiological theory imposed on the observer.

18 p2654 A72-36920

Mental and physical workload measure and differentiation in man machine systems

21 p3012 A72-41427

The function of external respiration in mental activity

22 p3150 A72-42284

Some data on the interrelations of conscious and unconscious reactions

23 p3257 A72-44076

Involuntary eye movements during the performance of mental tasks

23 p3260 A72-44077

Content and time aspects of short and long term memory operation theories, relating attention and memory spans

24 p3373 A72-45243

Learning and solving complex problems of reasoning - A test-theoretical investigation of the complexity of compound problems of predictive logic

24 p3373 A72-45244

MENTAL STRESS

U STRESS [PSYCHOLOGY]

MERCATOR PROJECTION

Polar navigation with transverse mercator technique for aircraft using secant geared ground position indicators

01 p0097 A72-10181

MERCURY [METAL]

NT MERCURY VAPOR

Excited Hg atom and electron concentration measurement behind shock front in nonstationary plasma by continuous displacement recording of interference bands

03 p0357 A72-13374

Fast acting nonmechanical self healing mercury fuse for high current circuit protection

03 p0335 A72-14203

Temperature pulsation spectra of turbulent mercury flow in horizontal pipe at various Reynolds numbers, showing dependence on magnetic field

07 p1100 A72-19882

Gaseous or solid particle Hg from fumaroles, suggesting natural and industrial sources of Hawaiian air pollution

09 p1305 A72-23648

Acoustic measurement of solid-liquid interface motion and solidification during freezing of Hg and paraffins

10 p1563 A72-25044

Optical radiation from Hg bombardment ion thrusters downstream regions due to excited atoms radiative decay, examining exhaust interference with star tracker

[AIAA PAPER 72-441]

11 p1707 A72-26182

Spacecraft thermal control coating damage by energetic Hg ion bombardment, using absorbance measurements

[AIAA PAPER 72-445]

11 p1746 A72-26183

Computer aided thermomechanical design of mercury bombardment ion thrusters, involving heat transfer, vibration and stress analysis

[AIAA PAPER 72-431]

12 p1860 A72-27420

Argon and mercury ion engines operation, performance and control, evaluating safety and ease of handling from laboratory test data

13 p2026 A72-28931

Energetic Hg ion bombardment erosive and chemical effects on spacecraft surfaces downstream of electrostatic rockets

[AIAA PAPER 72-446]

13 p1983 A72-28944

Combined hydrostatic suspension Hg cushion effects on gyrocompass response precision during irregular roll of platform

13 p1961 A72-30022

Mercury embrittlement of age-hardened Cu-1.9 wt pct cobalt and Cu-3.6 wt pct titanium.

20 p2938 A72-39296

A study of the liquid-vapor phase change of mercury based on irreversible thermodynamics.

[ASME PAPER 72-HT-A]

20 p2983 A72-39481

MERCURY [PLANET]

Computerized series solution of relativistic motion of planet Mercury for Schwarzschild and isotropic coordinates

02 p0260 A72-12306

Mariner Venus/Mercury 1973 flyby mission imaging experiment, discussing mission constraints, objectives and use of real time transmission vidicon camera and high resolution UV photography

04 p0568 A72-14494

Mercury isophotometric measurements in white and H alpha light during transit across sun on 9 May 1970

04 p0573 A72-14904

Mercury radar scattering properties, producing Fourier power spectrum from echo signals

06 p0880 A72-17864

Mercury trajectory across solar disk plotted by telephoto lens cameras, for determining position angles, disk contact times and relative angular velocity

06 p0882 A72-17934

Quantum and classical gravitation theory Mercury perihelion motion dependence on fourth order potential in scalar and Dirac fields

07 p1084 A72-20689

Relativistic explanation for excess motion of Mercury perihelion in terms of solar oblateness and interior rotation mechanism

[AD-745666]

11 p1715 A72-25350

Solar electric low thrust unmanned Mercury orbiter missions, considering spacecraft subsystems and ballistic and swingby trajectories

[AIAA PAPER 72-425]

11 p1721 A72-26170

Mercury topography and scattering characteristics from 3.8 cm radar observations, comparing to Mars and Venus

12 p1865 A72-27098

Contact time determinations during 9 May 1970 Mercury passage across solar disk

14 p2153 A72-30498

Unipolar steady electromagnetic bow shock interaction of Mercury with solar wind, calculating planetary surface temperature

15 p2303 A72-31305

Mercury magnitude determination near superior conjunction with aid of coronagraph photography and photometric calibration

15 p2312 A72-32090

Mercury diameter measurement by photoelectric Hertzprung method during transit on 9 May 1970

15 p2312 A72-32091

Mercury perihelion advance determination from radar echo delays measurement

16 p2453 A72-33190

Mercury trajectory across solar disk plotted by telephoto lens cameras to determine position angles, disk contact times and relative angular velocity
18 p2730 A72-37158

Photospheric faculae brightness influence on solar gravitational oblateness determination, considering criticism of Dicke-Goldenberg argument on Mercury excess perihelion motion
19 p2855 A72-37239

Right ascensions of the sun, Mercury, and Venus observed with the transit instrument at Nikolaev during 1966-1967
19 p2861 A72-37982

Declinations of the sun, Mercury, and Venus in the FK4 system as deduced from observations with the vertical circle of the Nikolaev Observatory during 1966-1967
19 p2861 A72-37983

Contact time determinations during 9 May 1970
Mercury passage across solar disk
19 p2864 A72-38327

Mission design and navigation for a 1977-1978 Venus Swingby/Mercury Orbiter.
[AIAA PAPER 72-941]
21 p3113 A72-41577

Determination of parameters related to the interior of Mercury.
24 p3436 A72-44696

Low thrust constant acceleration trajectories for a Mercury orbit.
24 p3441 A72-45208

MERCURY ALLOYS
Cadmium mercury telluride photovoltaic cell features, noting gigahertz range frequency response, heterodyne sensitivity, operating temperature and nonstoichiometric p-n junction preparation
07 p1003 A72-19224

MERCURY ARCS
Dense low temperature Ar and Hg plasmas, observing correlation between electrical conductivity and optical emission
10 p1517 A72-23835

Hg flow and hollow cathode temperature effects on ion thruster neutralizer stability and lifetime capability, using bell jar tests
[AIAA PAPER 72-422]
13 p2026 A72-28937

Hg fed hollow cathode ion thruster thermal and plasma heating characteristics, using Wiener-Kalman filtered temperature measurements
[AIAA PAPER 72-476]
13 p2027 A72-28947

Influence of single-pulse emission from a ruby laser on the plasma of a mercury vapor lamp
22 p3184 A72-42105

MERCURY COMPOUNDS
NT MERCURY TELLURIDES
Phase matched nonlinear frequency conversion of laser light in tetragonal mercury thiocyanate complex crystals
12 p1854 A72-27549

Mercuric chloride, bromide and iodide gas phase UV absorption spectra, discussing correlation with intermolecular charge transfer transitions
16 p2360 A72-32926

Venus high albedo, discussing compound reflecting layer and liquid Hg cloud models
24 p3436 A72-44692

MERCURY FLIGHTS
Guidance and navigation techniques for a solar electric Mercury orbiter.
[AIAA PAPER 72-917]
21 p3082 A72-41562

MERCURY LAMPS
Laser and mercury lamp outputs spatial coherence measurement by speckle patterns produced with ground glass as random inhomogeneous medium
17 p2565 A72-35752

MERCURY SPACECRAFT
Cruise guidance, trajectory and navigation analysis for solar electric Mercury orbiter, considering engine performance, thrust and terminal errors
[AIAA PAPER 72-427]
11 p1684 A72-26172

MERCURY TELLURIDES
L_f noise measurements of mercury telluride and Cd-Hg-Te semiconducting thin films using vacuum tube preamplifier and step-up transformer
02 p0268 A72-11523

Hall and resistance measurements on single crystal Hg-Te-In-Te alloy systems for high pressure phases in terms of conduction state, band structure and impurity effects
19 p2844 A72-37464

Mercury-cadmium telluride photoconductive detectors array for S-192 multispectral scanner for Skylab earth scanning experiments
23 p3288 A72-43879

Mercury-cadmium telluride multispectral photoconductive detectors, discussing fabrication techniques and performance characteristics
23 p3288 A72-43880

Mercury-cadmium telluride photodiode detectors for near IR laser receivers, discussing time response and I-V characteristics as function of temperature
23 p3296 A72-43881

MERCURY VAPOR
Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations
03 p0395 A72-13572

Thin electrostatically self focusing electron streams in mercury vapor, analyzing energy distributions of ions and electrons ejected radially from beam
04 p0554 A72-14407

Mercury electron bombardment ion thrusters research program, discussing mission requirements, size, propulsion type and beam current range
04 p0565 A72-14434

Hg vapor condensation on cooled vertical steel cylinder at 70-185 C, considering heat flux relation to saturated vapor/cooling surface temperature difference
06 p0903 A72-18190

Cs and Hg vapors compressibility factor in supercritical range as function of density, considering charged particles and atoms polarization interactions in ionized metal vapors
07 p1040 A72-18943

Plasma diagnostics of inductively coupled RF Hg discharge in RIT-10 ion thruster
[AIAA PAPER 72-472]
11 p1709 A72-26203

Porous-tungsten mercury vaporizers design and tests for flow rate, liquid intrusion pressure level and mechanical strength
[AIAA PAPER 72-484]
11 p1710 A72-26210

Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations and atom-atom collision cross sections
11 p1699 A72-26760

Model for mercury vapor electron bombardment ion thruster hollow cathodes operation and effects on thrust subsystem performance predictability
[AIAA PAPER 72-420]
13 p2026 A72-28936

Hg vapor absorptivity dependence on wave number, atomic density and temperature in 2537 A resonance line region, discussing measurement by magnetic scanning or monochromator
14 p2131 A72-30853

Contaminated Langmuir probes LF admittance measurements in mercury vapor plasma, considering dielectric relaxation in insulating layers
15 p2241 A72-32516

Ionization of mercury vapor and cesium vapor in a nuclear reactor.
18 p2713 A72-36208

Secondary ionization coefficients in a low-pressure discharge in mercury vapour.
19 p2836 A72-37459

Mercury Hall ion engine principles and design, discussing plasma ion acceleration, mercury evaporation and ionization and acceleration channel electrical and thermal insulation
20 p2963 A72-39937

MERIDIANS
U LATITUDE
U LONGITUDE
MERIDIONAL FLOW
Meridional thermospheric wind effect on auroral atomic oxygen red line profile, noting inadequacy of diffusion hypothesis
01 p0052 A72-10079

Meridional currents intensity in equatorial electrojet region, computing electric and magnetic fields
01 p0063 A72-10924

Tropospheric processes effects on Northern Hemisphere stratospheric meridional transformations in geopotential field and air circulation
02 p0253 A72-11732

Model calculation for seasonal effects on minor neutral constituents distribution in mesosphere and lower thermosphere, suggesting large scale meridional circulation role
09 p1274 A72-22354

Mass flow and current distribution in magnetic MPD accelerator thruster plumes calculated from meridional flow stream function equation
[AIAA PAPER 72-501]
11 p1696 A72-26224

A temperature adjustment process in a Boussinesq fluid via a buoyancy-induced meridional circulation.
21 p3044 A72-40112

Temporal behavior of hemispherically averaged geostrophic zonal and meridional flow from dynamic climatology studies of Northern Hemisphere large scale circulation
21 p3077 A72-40251

Direct observation of a complete unit of meridional circulation from the equatorial belt up to the polar front - Synthesis of concepts of the pseudofront, of the equatorial mesosystem, and of the subsidence well
21 p3078 A72-41344

Longitudinal magnetospheric currents contribution to auroral electrojet from satellite observation data, noting magnetosphere electric field excitation of meridional Pedersen and Hall currents
22 p3169 A72-42225

Application of cascade and actuator disc theories to computer aided design of fans.
24 p3363 A72-45359

Flow analysis in the axial-flow compressor impeller with meridional stream acceleration.
24 p3394 A72-45371

MEROMORPHIC FUNCTIONS
NT ELLIPTIC FUNCTIONS
NT RATIONAL FUNCTIONS
Bounded operators solution in locally convex topological vectorial spaces with meromorphic properties
13 p1987 A72-29778

MESON-NUCLEON INTERACTIONS
Meson exchange effects on solar pion-production process, using low energy Adler theorem with cross section correction factor
16 p2456 A72-33476

MESONS
NT MUONS
NT PIONS
Atmospheric primary and secondary cosmic ray propagation with close reference to two-fire-ball, H-quatum and excited baryon models of multiple meson production
01 p0121 A72-11122

Multiple meson production in 250 GeV nucleon-nucleon collisions in LiH targets, noting 40 per cent formation of heavy meson cluster fireballs
06 p0868 A72-17259

Time invariance violation in charge asymmetry experiment, showing K-meson decay rate difference reversal from world to antiparticle with particle unchanged
14 p2130 A72-30265

Static black hole noninteraction with exterior world by meson fields, noting baryon number conservation in general relativity
17 p2612 A72-35388

Characteristics of cosmic ray diurnal variation from Deep River neutron and meson data and temperature effects.
17 p2601 A72-35400

Atmospheric effects on the surface cosmic ray meson intensity recorded in London.
22 p3218 A72-42369

High energy nucleon inelastic collision characteristics dependence on secondary particle energy and meson velocity, using Wilson chamber measurement
23 p3291 A72-44445

Angular and impulse characteristics of negative-pion interactions at an energy of 60 GeV in the emulsion
23 p3292 A72-44446

MESOPAUSE
Noctilucent clouds in daytime - Circumpolar particulate layers near the summer mesopause.
22 p3173 A72-42515

MESOSPHERE
Ionospheric ion mobilities and densities measurements over Sardinia, using parachute mesosphere probe
01 p0055 A72-10436

Mesospheric OH volume density profile measurements by rocket-borne high resolution polarized Ebert-Fastie spectrometer
01 p0062 A72-10912

Mesosphere and lower thermosphere photochemical composition, allowing for molecular and eddy diffusion
03 p0345 A72-12980

Mesospheric models - Conference, Frascati, Italy, July 1970
03 p0345 A72-13376

Photochemical models of aeronomic formation and dissociation of hydrogen and ozone in mesosphere and stratosphere
03 p0346 A72-13377

Meridional model of oxygen and hydrogen compounds reactions in mesosphere and lower thermosphere, determining diurnal variations and vertical profiles
03 p0346 A72-13378

Oxygen, hydrogen and nitrogen constituents in mesosphere, investigating ionization process in D region at midlatitudes
03 p0346 A72-13379

Energy conversions and mean vertical motions in high latitude summer mesosphere and lower thermosphere, observing reaction kinetics
03 p0346 A72-13380

Dynamic modeling of stratospheric and mesospheric circulation and thermal structure
03 p0346 A72-13382

Mesosphere meteorological sounding by acoustic grenade and pitot probe techniques, investigating seasonal and latitudinal variations
03 p0383 A72-13384

Solar UV radiation role in mesosphere, investigating absorption cross sections of ozone and molecular oxygen
03 p0411 A72-13385

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratospheric temperature rises
03 p0383 A72-13477

Atmospheric model for mesosphere odd-nitrogen concentration relation to NO dissociation rate and downward flux through mesopause

03 p0350 A72-13526

Free atmosphere vertical temperature structure at mesoscale, using continuous recording sonde [AD-739147]

04 p0519 A72-15158

Stratospheric rocket sounding on global scale for studies of atmospheric circulation in equatorial zone, polar regions and hemispheres

06 p0840 A72-17620

Laser radar observations of mesosphere and lower thermosphere optical scattering cross section variations due to tide-caused atmospheric density fluctuations

08 p1156 A72-21100

Semiannual latitude dependent mesospheric wind patterns from meteor trail observations, suggesting heat inputs from solar radiation and magnetic storm related auroral heating

08 p1159 A72-21227

Mesospheric temperature and wind profiles during stratospheric warming from rocket grenade experiments

08 p1160 A72-21533

Planetary scale circulation systems effects on photochemistry and transport processes of minor neutral constituents in mesosphere and lower thermosphere

09 p1274 A72-22353

Model calculation for seasonal effects on minor neutral constituents distribution in mesosphere and lower thermosphere, suggesting large scale meridional circulation role

09 p1274 A72-22354

Mesospheric ozone measurement for altitude profiles, comparing rocket and ground based observations of 1.27 micron emission band at twilight

09 p1296 A72-22355

Mesosphere region positively and negatively charged particles concentration and mobility measurements by sounding rocket experiments

09 p1375 A72-22361

Supersonic and subsonic measurements of mesospheric ionization at night, using Arcas rocket parachute borne nose-tip and blunt probes

09 p1296 A72-22362

Mesosphere ozone number densities from rocket photometric measurement of lunar UV radiation absorption

09 p1385 A72-22583

Day, night and sunset mesospheric nitric oxide concentrations during polar cap absorption from rocket measurements of cation composition and charged particle densities

[AD-741709]

09 p1300 A72-23026

Thermal stratification of mesosphere and lower thermosphere at low latitudes with allowance for turbulent mixing, showing molecular oxygen and ozone radiative heating prevalence

09 p1347 A72-23589

Mesospheric clouds composed of molecular complexes of extraterrestrial origin, considering chemical reactions, hydroxyl luminescence, thermospheric water vapor and auroras

09 p1347 A72-23590

Wind velocity distribution structural laws in vertical and horizontal planes for large mesospheric and atmospheric processes

09 p1347 A72-23591

Mesosphere and lower thermosphere heating and associated solar UV radiation absorption calculation based on diurnally varying photochemical diffusive model

10 p1475 A72-24943

Noctilucent cloud kinematics as indicators of mesospheric circulation and turbulence characteristics, discussing need for international scientific cooperation

10 p1476 A72-25006

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratospheric temperature rises

11 p1682 A72-26247

Ground based synoptic measurement of mesospheric electron densities, noting variations relationship to solar radiation changes

11 p1626 A72-26424

Corpuscular radiation intensity relationship to midlatitude mesosphere temperature from rocket and balloon sounding and ground measurements

13 p2029 A72-28603

Mesosphere and stratosphere density and temperature variability with seasons and altitude

13 p1947 A72-28830

Rocket sounding of ozone diurnal variations in upper stratosphere and lower mesosphere

13 p1947 A72-28831

Daily difference analysis of magnitude, vertical and latitudinal structure of irregular mesospheric wind variations due to gravity waves

13 p1948 A72-28832

Semiannual equatorial wind oscillations in upper stratosphere and lower mesosphere dependence on temperature variations in high and middle latitudes

14 p2099 A72-30259

Aircraft atmospheric flow measurements of horizontal and vertical motions on mesoscales, using inertial reference system

14 p2127 A72-30300

Wind tunnel tests for correction of temperature profile data in stratosphere and lower mesosphere obtained from SKUA rocket sounding

14 p2105 A72-30807

Temperature and density data deviation from stratosphere and mesosphere mean season model values at high latitudes

15 p2225 A72-31907

Mesosphere and lower thermosphere temperature measurement by rocket-borne manometer, relating temperature variations to corpuscular flux intensity and sun generated geomagnetic excitations

15 p2225 A72-31910

Mesospheric air density and temperature measurements from rocket-borne resistance thermometers based on free molecular flow

15 p2225 A72-31911

Mesospheric and lower thermospheric composition from neutral atmospheric particles measurement by rocket-borne instrument consisting of RF quadrupole mass spectrometer

15 p2228 A72-31967

Electrical conductivity in mesosphere and upper stratosphere from rocket sounding by blunt probe technique, suggesting electron density profiles dependence on dissociative recombination variations

15 p2228 A72-31972

Molecular oxygen concentrations from solar Lyman alpha radiation absorption profile in mesosphere, using rocket-borne nitric oxide filled ion chamber

15 p2230 A72-32264

Summer upper mesosphere and lower thermosphere positive ion composition at high latitudes from Nike Cajun rocket soundings

16 p2383 A72-32966

Solar radiation induced molecular oxygen photodissociation rate as function of column density and temperature in mesosphere and lower thermosphere

16 p2383 A72-32967

Features of zonal circulation in the stratosphere and lower mesosphere of the equatorial region during the period of increasing solar activity [1967-1968]

19 p2790 A72-37999

The solar X-ray spectrum deduced from a proportional counter experiment and the resultant production of ionization in the mesosphere.

22 p3170 A72-42368

Ozone measurements in the mesosphere during the solar proton event of 2 November 1969.

22 p3173 A72-42509

Mesospheric noctilucent clouds: tables listing weather stations geographical coordinates, observation time periods, elevation above northern horizon and azimuth

22 p3173 A72-42575

Corpuscular radiation intensity relationship to midlatitude mesosphere temperature from rocket and balloon soundings and ground measurements

24 p3435 A72-45103

MESSAGES

Message distortions analysis in PCM communications systems due to phase fluctuations of synchronization signal

11 p1598 A72-26728

METABOLIC WASTES

NT HUMAN WASTES

NT URINE

Food ration effect on metabolite elimination rate in humans wearing isolation garment at rest or performing physical labor

05 p0622 A72-16644

Calorimetric measurements of human body temperature and of hot saline solution drinking effects on sweating rate

09 p1267 A72-23440

Viking Lander detection of metabolically produced radioactive labeled gas in Mars surface samples

10 p1540 A72-24386

High temperature biowaste resistojets with electrically conducting ceramic heaters, discussing lifetime and space station power systems adaptability [AIAA PAPER 72-454]

11 p1708 A72-26190

Human immunobiological status during prolonged maintenance in bioregenerative life support system, discussing possible allergic reaction to chlrella gaseous metabolites

13 p1910 A72-29312

Human waste management system evaluation in zero gravity flight tests, presenting design concept for collection by air flow technique

15 p2189 A72-31825

Myth of nitrogen equality in respiration - Its history and implications.

19 p2758 A72-38708

Bosch CO2 reduction unit research and development. [ASME PAPER 72-ENAV-10]

20 p2896 A72-39167

Influence of a high oxygen content on the rate of formation and elimination of gaseous wastes in albino rats

23 p3255 A72-43906

Long term bed rest effect on humans and primates, detailing cardiovascular metabolic and musculoskeletal physiological systems [AD-737557]

01 p0014 A72-10932

Starvation effects on male rats, mice and guinea pigs hepatic drug metabolism, discussing ethylmorphine, p-nitroanisole and aniline

01 p0015 A72-11262

Flavin photoreceptor participation in contemporary organism metabolic systems

04 p0469 A72-14781

Primitive earth model of ion selective enzymatic asymmetric synthetic membrane for accelerated nutrients and metabolites transfer studies

04 p0469 A72-14787

Preglycolitic energy metabolism in biochemical evolution, concerning anaerobic oxidation of pyruvate and acetaldehyde to acetate and ATP

04 p0471 A72-14799

Metabolic control of temperature compensation in circadian rhythm of *Euglena gracilis* strain

07 p0919 A72-19538

Yeast glycolytic pathway oscillations relation to concentration of diphosphopyridine nucleotide and other metabolites, noting analogy to behavioral and physiological rhythms

07 p0920 A72-19541

Glucose and fatty acid metabolic response during impending myocardial infarction in animals

07 p0921 A72-20175

Gaseous nitrogen production in humans under steady-state conditions, relating expired nitrogen minute volume increase after protein consumption to possible gastrointestinal and metabolic effects

08 p1122 A72-20882

Electrophysiological, neurophysiological, metabolic, vegetative, psychological, chemical and pathological aspects of sleep, noting disturbance and wakefulness mechanisms for various clinical disorders

09 p1264 A72-22223

Energetic motor activity rule hypothesis for physiological mechanisms of certain ontogenesis patterns, suggesting motor activity as excess anabolism induction factor

09 p1264 A72-22225

Work-rest schedules endocrine and metabolic effects on aircrews during 50 hour flight missions in C-141 aircraft, using urinary test techniques [AD-740992]

10 p1428 A72-23737

Thermodynamics of human body metabolism, discussing energy conversion calorimetric measurements, body size, food intake, age, sex, endocrine and nervous effects

11 p1584 A72-26072

Human body thermoregulatory processes under varying environmental conditions and metabolic rates, discussing role of blood circulation, sweating, nervous stimuli, hormones, etc

11 p1584 A72-26073

Dimensional analysis and similarity theories application to biological organisms relationships between body size and metabolism

11 p1585 A72-26074

Physical training effect on rat cardiac function and metabolic response to hypoxia

11 p1581 A72-26701

Energy metabolism and ATP balance characteristics during muscular activity as function of organism adaptation to activity

13 p1902 A72-28640

Diurnal changes in gas exchange and metabolic rate under normal and inverted day-night schedule conditions, studying human adaptation to shifted schedule

13 p1904 A72-29318

Human physiological function variations dependence on hyperthermia levels in high temperature environment

14 p2074 A72-30257

Red blood cell metabolite 1,3 diphosphoglycerate determination method by rapid deproteinization, concentration by precipitation and enzymatic reaction

15 p2190 A72-32488

Long term weightlessness-induced physiological response normalization by muscle bioelectrostimula-

tion, muscular tissue energy load increase and mineral metabolism stabilization

16 p2354 A72-33543
Cerebral blood flow and metabolic changes during wakefulness, sleep, coma and epileptic seizures in terms of homeostatic mechanisms

16 p2356 A72-33558
Thermal neutral temperature of rats in helium-oxygen, argon-oxygen, and air.

17 p2500 A72-34728
The uptake, metabolism and release of C/14-taurine by rat retina in vitro.

17 p2500 A72-34881
Metabolism of the hypoxic and ischaemic heart; Proceedings of the Symposium, Geneva, Switzerland, June 14-17, 1971. Part 1.

17 p2501 A72-34976
Normal and hypoxic myocardium mitochondrial metabolism process, studying electron transport system

17 p2501 A72-34978
The influence of exogenous ATP on cardiac metabolism in acute hypoxia.

17 p2501 A72-34987
Magnetic field effects in enzymes, tissue respiration and some metabolism characteristics of an intact organism

17 p2503 A72-35003
Book - Energy metabolism of human muscle.

20 p2893 A72-39700
Metabolic energy requirements for pushing loaded handcarts, measuring expenditure during treadmill and outdoor asphalt circuit walking

21 p3005 A72-40419
Muscle metabolism of ATP, CP, glycogen and lactates at rest and during submaximal and maximal exercise

21 p3005 A72-40421
Muscle metabolism during isometric exercise performed at constant force.

21 p3005 A72-40425
Determination of oxygen consumption by use of the paramagnetic oxygen analyzer.

21 p3006 A72-40429
Cortical metabolism regulation and effector systems of the adaptation process

21 p3000 A72-40760
Chemical energy transformation to mechanical energy and heat in muscles during exercise, considering energy sources for contraction, oxidations, glycolysis and alactic anaerobic mechanism

21 p3003 A72-41470
Specific ATP action on metabolism of isolated heart - Influence of pH, divalent cation concentration and stability of complexes.

22 p3147 A72-42986
Studies on weightlessness in a primate in the Biosatellite 3 experiment.

23 p3253 A72-43388
Cardiac output, hemodynamic and gas exchange variations as function of basal metabolism during bed rest in hypokinetic recumbent or antihorostatic position

23 p3255 A72-43915
Metabolic changes in healthy humans caused by prolonged bed rest in horizontal position, noting prevention by physical exercises and electric muscle stimulation

23 p3260 A72-43921
Biochemical and physiological evaluation of nourishment of subjects feeding on dehydrated products in test chamber with regenerative life support system, discussing metabolic data and hormone function

24 p3375 A72-45128

METAGALAXY

U UNIVERSE

METAL AIR BATTERIES

NT ZINC-OXYGEN BATTERIES

16 p2350 A72-33670
Metal-air batteries with alternately polarizable oxygen electrodes, discussing current state of technology

METAL ALLOYS

U ALLOYS

METAL BONDING

NT METAL-METAL BONDING

Bond zone wave formation in explosion cladding, predicting critical collision velocity and angle with fluid flow model

01 p0077 A72-11031
Composition, microstructure and mechanical properties of binder metal in cobalt bonded tungsten carbide

02 p0241 A72-11451
Au-Al wire bond, discussing intermetallic phase formation under elevated temperature treatments and reliability design limitations

03 p0364 A72-14284
Thermal deformation effects on metal bond fatigue failure modes in small signal transistors, micro and LSI circuits

03 p0365 A72-14291

Forging techniques and applications for YF-12A aircraft Ti alloy bulkhead production, considering diffusion bonding and die shimming

04 p0527 A72-14914
Fatigue strength optimization of bonded double strap metal joints, attributing stress concentration to plastic relaxation

05 p0731 A72-15791
[ASME PAPER 71-MET-Q]
Permanent electric connections by alloy and solid phase bonding and fusion welding, considering surface contamination, interface contact, activation energy and connection stability

06 p0822 A72-18581
Maximum allowable time between Ti metal surface preparation and agent application in adhesive bonding

07 p1024 A72-20254
Water effect at epoxy resin-steel interface on adhesive bond strength as function of vitrification temperature

08 p1196 A72-21863
Bonding conditions effects on wave mode formed at explosive bonded interfaces from experiments with bullets fired at thin metal targets

09 p1321 A72-23642
High alumina ceramics metallization and hard soldering to metals for manufacturing vacuum jacket of transmitting thermionic tubes

10 p1488 A72-24642
Adhesive bonded clad Al corrosion penetration rates from accelerated tests

11 p1656 A72-25600
[SAE PAPER 720344]
Solid state joining in gas turbine engines, discussing diffusion bonding, friction welding and coextrusion metal bonding

11 p1639 A72-25656
[ASME PAPER 72-GT-74]
Complex bipolar IC logic circuits realization by economical high speed techniques using metal bonding or cells available in library

11 p1606 A72-26548
Nonmetallized aluminum oxide ceramics brazing with metals under pressure using copper solder, noting optimum conditions for Kovar

15 p2243 A72-31225
Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance

15 p2245 A72-32429
Fracture mechanics approach to adhesive joints.

17 p2633 A72-35282
Nondestructive ultrasonic inspection of braze bonds in high current electrical contact assemblies.

18 p2695 A72-36116
Acoustic emission technique as NDT method for quality control of brazed metal-ceramic bonding

18 p2695 A72-36458
Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures

18 p2695 A72-36526
[SME PAPER AD 72-710]
Use of the third-harmonic method for the selection of metal-bonded polycarbonate capacitors which are stable in time

18 p2669 A72-37115
Adhesion and transfer of PTFE to metals studied by Auger Emission Spectroscopy.

19 p2807 A72-37646
Holographic interference as a means for quality determination of adhesive bonded metal joints.

21 p3060 A72-41131
[ICAS PAPER 72-06]
On the diffusion of a load from a semi-infinite stringer bonded to a sheet.

22 p3238 A72-42833
Al powder bonding during compaction by explosively driven plates, measuring shock wave amplitudes, pressure drop, layer separation and critical pressures in spall plane

22 p3184 A72-43183
Diffusion bonded columbium panels for the shuttle heat shield.

24 p3406 A72-44889

METAL CARBIDES

U CARBIDES

METAL COATINGS

NT ALUMINUM COATINGS

NT GOLD COATINGS

NT NICKEL COATINGS

NT ZINC COATINGS

Niobium alloy for reentry vehicle heat shields, describing slurry coating process reliability

01 p0077 A72-10982
Diffusion aluminide protective coating formation mechanisms on Ni-base superalloys observed from microstructures and compositions in Ni-Al intermetallics

01 p0089 A72-11165
Lateral surface heat transfer effect on thermophysical characteristics in thin layer coatings, discussing temperature gradients in corundum and zirconium oxide on copper

02 p0304 A72-12864
Steel coatings produced by plasma jets on experimental machine parts, determining friction wear resistance by successive tests

03 p0363 A72-13548

NbN thin film stabilization by metal overlays with reduction in ac losses, discussing superconducting reversibility to normal transition

04 p0560 A72-14542
Ni-Cr-Al-Si and Fe-Cr-Al-Y oxidation resistant claddings for superalloys, comparing to commercial aluminide coatings by cyclic furnace and high velocity burner rig tests

04 p0533 A72-14700
Vacuum diffused Cr, Si, Ti and combined coatings effect on heat resistance of Nb and Nb alloys

04 p0534 A72-15660
Wear, bending and corrosion resistance of stainless steels with Cr thermal vacuum diffused coating

04 p0535 A72-15661
Ground plane curvature effect on aperture admittance of waveguide fed axial slot on teflon coated metal cylinder for underdense plasma

06 p0771 A72-17354
High temperature tests of creep rupture strength of W composite cast with heat resistant alloy coatings

06 p0829 A72-17947
Hot corrosion resistant Pt-Al coating for high temperature aircraft engine Ni alloy components, presenting cyclic sulfidation and thermal shock test results

07 p1012 A72-19573
Emission energy of positrons thermalized in moderators and coated with Au, suggesting Au negative work function existence

08 p1217 A72-21339
Residual shrinkage and thermal stresses in adhesion bond models of metal coatings and cemented seams

08 p1248 A72-21865
Metal deposition - Conference, Vilnius, Lithuanian SSR, April 1971

09 p1318 A72-22526
Metallic coatings effect on high-strength steels fatigue properties, noting beneficial effect of shot peening

10 p1494 A72-24024
Axial, circumferential and radial residual stresses calculation in polycrystalline coatings and cylindrical elements during surface layer removal by electrochemical processing

11 p1737 A72-26263
Residual stresses and stress relaxation determination in electrochemical galvanic coating with automatic strain curve plotter

11 p1613 A72-26264
Composite powders preparation by metals deposition from aqueous solution onto core materials by gaseous hydrogen at high temperature and pressure, noting coating application

11 p1646 A72-26875
Oxide thin films effects on surface layers deformation and wear resistance of coated metals under friction, noting electrical resistance changes in annealing

12 p1818 A72-28189
Russian papers on alloying and properties of heat resistant alloys covering creep, solid solution and dispersion hardening, chemical interactions and protective coatings

15 p2254 A72-31557
Re applications technology, discussing production methods, mechanical and physical properties, plasma spraying, annealing and alloying techniques

17 p2567 A72-34825
Work function change of tungsten /110/ planes as function of Mo coverage.

18 p2656 A72-36134
Evaluation of sublimed molybdenum collector coatings for additive diode operation.

18 p2646 A72-36202
Determination of the emission potential of cesium-coated surfaces at high temperatures with a plane-parallel cesium diode. I - Technology. II - Physical foundations and measurement results

19 p2754 A72-37779
Study of tungsten and molybdenum coatings obtained by arc discharge in a vacuum

19 p2808 A72-38186
Vacuum-friction temperature resistance and durability of a molybdenum-disulfide coating deposited on steel by the detonation method

19 p2809 A72-38290
Developments in the field of metallic diffusion protective layers employed against high-temperature corrosion

20 p2944 A72-39450
Structure and properties of nickel-phosphorus coatings as a function of the temperature and annealing time

20 p2929 A72-39583
A comparison of the effect of inward and outward diffusion aluminide coatings on the fatigue behavior of nickel-base superalloys.

21 p3067 A72-40916
Oxidation protection of tantalum and tantalum alloys at up to 1500 C

22 p3188 A72-41973
Investigation of the wear resistance carbonized chromium coatings on various brands of steel

22 p3195 A72-43159

- Diffusive metal coatings stress-strain state effect on composite Mo material strength, ductility and creep characteristics 23 p3306 A72-43732
- METAL COMBUSTION**
Chemical efficiency improvement of aluminum combustion with nitric acid in organic solid fuel 03 p0405 A72-13540
- Al powder burning in flame jets produced by ballistite powder N, using scanning spectrographic system for combustion temperatures, products and dynamics 06 p0903 A72-18209
- Superheating in Zr-oxygen combustion system during autoignition period 08 p1128 A72-21219
- Ignition delay time and combustion mechanism of Al-Mg alloys single particles in combustion products of oxidizer-fuel mixture 09 p1373 A72-22885
- Visual and motion picture studies of ignition and burning characteristics of Mg particle clusters in flames of gas mixtures 09 p1411 A72-22886
- Pressure effect on combustion rate of Mg particles in water vapors 09 p1411 A72-22887
- Burning process of low boiling Mg particle moving in relation to gaseous oxidizer, assuming heat and mass transfer occurrence by diffusion-conduction mechanism 09 p1411 A72-22888
- Autonomous combustion of Al sphere in controlled atmospheres oxygen-argon, nitrogen and air, identifying products 10 p1562 A72-24238
- Magnesium particle combustion in rarefied air during pressure changes, discussing combustion time decrease with pressure increase 14 p2170 A72-30236
- Boron reaction characteristics in ducted rockets under varying primary chamber conditions detailing various gaseous propellants effects 15 p2296 A72-32311
- Laser ignition and combustion of boron particles, developing oxide coating and droplet burning models for low and high temperature stages respectively 15 p2296 A72-32582
- Aerogel combustion kinetics and continuous flame formation on coal, Mg, Al and Al alloy powders, using track method 16 p2476 A72-33252
- Mg ignition in nitrous oxide at 600-800 C, determining induction period as function of particle mass and gas stream temperature 16 p2476 A72-33254
- Multicomponent system combustion of Al suspensions in kerosene, determining ignition temperature as function of metal particle size and concentration 16 p2476 A72-33256
- Al and Zr single thin strands burning rates at various total oxygen pressures, comparing photographic observation to computations 16 p2479 A72-34003
- Boron ignition and combustion in air-augmented rocket afterburners. 17 p2636 A72-34902
- Combustion propagation in cylindrical aluminum alloy specimens and some peculiarities of the aluminum combustion mechanism 19 p2847 A72-37362
- Influence of pressure on the combustion process of aluminum powders 19 p2847 A72-37368
- Induction period, particle size distribution and medium temperature effects on thermal ignition of metal particles under exothermal oxidation reaction on surface 20 p2987 A72-40040
- Burning of particles of an aluminum-magnesium alloy 20 p2987 A72-40041
- Propagation of the front of an exothermic reaction in condensed mixtures whose components interact through a high-melting layer 22 p3245 A72-43177

- High purity Al single crystal orientation explained by Rowland transformation model, observing recrystallization grains 12 p1828 A72-27300
- Phase matched nonlinear frequency conversion of laser light in tetragonal mercury thiocyanate complex crystals 12 p1854 A72-27549

Second harmonic conversion of CW YAG-Nd laser radiation on lithium metaniobate crystals, discussing conversion coefficient optimization 12 p1825 A72-27886

Crystals deformation and orientation effects on Al polygonization process, noting dislocation densities dependence on stress axis orientation 13 p1972 A72-28464

Statistical adsorption kinetics model with electron desorption of oxygen on polycrystalline W, noting sticking coefficients 13 p1912 A72-28523

Electron paramagnetic resonance investigation of III-V compound semiconductor crystals, observing large magnetic moments, heteropolar chemical bonding and impurities 13 p2021 A72-28572

Ni single crystal growth by Czochralski method, investigating growth rate, direction and initial structures effects on substructure 13 p1976 A72-28906

Hydrostatic pressure effect on tensile creep and creep rupture of polycrystalline metals at high temperatures 13 p2058 A72-29450

Small amplitude plane wave speed variation with pressure for Na and K at absolute zero temperature, using crystal strain energy formulation 13 p2006 A72-29675

Plastic deformation in bcc metal single crystals, discussing glide and work hardening, dislocations, core structure and atomic calculations 13 p2061 A72-29874

Low and medium strain rates and temperature effects on bcc structure polycrystalline Nd and Mo, determining mechanical properties of yield and flow 14 p2114 A72-30367

Electric current pulses effect on Zn monocrystals plastic deformation before brittle rupture, noting critical normal stresses increase 14 p2115 A72-30411

Temperature dependent optical constants of Ti and W crystal surfaces cleaned by ion bombardment in ultrahigh vacuum 15 p2274 A72-31376

Steady creep and delayed fracture dependence on metal structure and composition, considering strain hardening at small strain rate and elevated temperature 15 p2254 A72-31559

Metal hardening level evaluation on basis of volume dislocation structure from stress field of dislocation loops 15 p2254 A72-31562

Alloying effects on high temperature softening due to crystal lattice, stacking fault energy and decreased mobility interactions 15 p2254 A72-31564

Polycrystalline Mo-Re alloy under cold longitudinal, transverse, cross and pack rolling, noting twin and dislocation microstructures 15 p2256 A72-31669

Theoretical model for HF mechanical waves interaction with crystal lattices based on measurements of high amplitude ultrasonic waves attenuation in metal crystals 15 p2292 A72-31835

Fcc metal defect structure due to ultrasonic fatigue observation via transmission electron microscopy for dislocations 15 p2256 A72-31836

Clean Ge crystal surface oxidation process investigation by LEED and conductivity measurements 15 p2292 A72-31868

Angular force models with electron-ion interaction applied to bcc and fcc metals, calculating phonon dispersion curves for V, Nb and Ta 15 p2258 A72-32226

Coherent potential approximation generalization for disordered alloy systems, showing different results for propagator and locator formalisms in multiple site approximation 15 p2293 A72-32229 [ONERA, TP NO. 1126]

Grain orientation and nonmetallic inclusion distribution and identification by color etching of single crystal and polycrystalline Mo 16 p2407 A72-33532

Deformed Cu-Au single crystal surface slip bands fine structure, determining separation distance between individual slip lines 16 p2408 A72-33774

Tensile deformation of Co single crystal in high temperature fcc phase, noting dislocations effect on work hardening 16 p2410 A72-33819

Second harmonic conversion of CW YAG-Nd laser radiation on lithium metaniobate crystals, discussing conversion coefficient optimization 16 p2404 A72-33995

Strengthening mechanism in metals during creep under variable stress for dislocation network structure studies 16 p2475 A72-34164

Work functions of some emitting and collecting refractory metal single crystals. 17 p2595 A72-34601

Orientation dependence of slip in tantalum single crystals. 17 p2567 A72-34748

Mo-Nb alloys single crystals work function, obtaining thermionic emission pattern 17 p2567 A72-34863

Effects of disorientation of grains on the viscoplastic behavior of fcc polycrystals 17 p2634 A72-35407

Work function dependence on crystal orientation for W with special emphasis to the variation near the /110/ orientation. 18 p2656 A72-36130

Work function, thermal stability, and atomic structure of electropositive films adsorbed on single crystals of metals 18 p2656 A72-36132

Impurity controlled deformation mechanism for softening control of interstitial bcc alloys, discussing low temperature and composition effects 18 p2699 A72-36341

Nucleation and growth of deformation twins in Mo-35 at. % Re alloy. 18 p2702 A72-36748

Surface energy and cleavage plane observation of brittle fracture for W single crystal in tension as function of orientation and temperature 18 p2702 A72-36750

Viscoplasticity of face-centered-cubic metals 18 p2703 A72-37017

The plastic deformation behavior of Mo single crystals under compression. 19 p2816 A72-37689

Estimation of the cleavage strength of polycrystalline metals from the internal energy 19 p2818 A72-38010

Electron microscope double contrast images to identify Burgers vectors of close packed metal crystal dislocations 19 p2846 A72-38590

Nickel single crystal target ionization by high voltage electron beam bombardment, using flight time mass spectroscopic analysis 19 p2835 A72-38666

Configuration determination method for metal crystal superdislocation anchored at two points and under stress in sliding plane, calculating critical stress related to double source unlocking 20 p2978 A72-39005

The influence of the surface orientation on yield in Mo single crystals. 20 p2935 A72-39007

A LEED investigation of the chemisorption of nitrous oxide on a tungsten /100/ surface. 20 p2898 A72-39188

Tensile and compressive stress coarsening effects on coherent gamma prime precipitate yield strength of Ni-base superalloy single crystals 20 p2938 A72-39299

Domain structures in metal crystals, investigating ordering in Ni-Mo alloys 20 p2962 A72-39997

Crystal structure and shear strength of solids and imperfections in metals in framework of X ray diffraction and dislocation theory 20 p2942 A72-39998

The mechanisms of diffusion in metals and alloys. 20 p2962 A72-39999

Recrystallized Al monocrystals applications to optics and X ray spectroscopy, describing preparation methods 21 p3065 A72-40085

Recrystallization and polygonization conditions in high purity metals, noting critical temperature and additives effect 21 p3065 A72-40093

Resonance between spin waves and magnetohydrodynamic waves in antiferromagnetic semiconductors and metals 21 p3096 A72-40415

Investigation by the mass transfer method of the diffusion of nickel at a /110/ surface of tungsten single crystals 21 p3068 A72-40955

Investigation of tantalum-compound films at the surface of acicular tungsten microcrystals 21 p3068 A72-40964

High energy electrons monokinetic beam propagation in Cu and Al crystals, investigating critical voltage effect on contrast 21 p3069 A72-41342

Theory of slow elastic-plastic deformation of polycrystalline metals with micro-stresses as latent variables descriptive of the state of the material. 21 p3124 A72-41508

Martensite formation temperature decrease and grain size reduction caused by martensite crystals interaction with barriers in Fe alloy containing austenite beta phase particles 21 p3070 A72-41679

Rheological properties of molybdenum and platinum of bamboo structure under bending loads 21 p3071 A72-41712

Gas adsorption by refractory metal single crystals. 22 p3187 A72-41940

Chemisorption of CO on tungsten /100/ - Combined flash desorption and electron stimulated desorption study. I. 22 p3152 A72-42297

Crystal structures and transition temperatures of polymorphous metals, discussing mechanical properties, thermal conditions for deformation and metal working by pressure 22 p3190 A72-42803

Physicochemical investigation of the thermionic emission properties of metals and alloys 22 p3191 A72-42811

Rotational hysteresis in single crystals of powdered nickel 22 p3192 A72-43011

Martensitic transformation in filamentary cobalt crystals 22 p3192 A72-43017

Deformation mechanism of aluminum and zinc single crystals during low-temperature cavitation 22 p3192 A72-43019

Determination of mosaic-block disorientations in the creep of aluminum by the method of low-angle X-ray scattering 23 p3299 A72-43341

Increasing the boundary strength of electron-beam-melted cast molybdenum by vanadium microadditions 23 p3302 A72-43967

Changes in the physical properties of metals subjected to elastoplastic deformation 23 p3303 A72-44199

Dislocation-substructure-strengthening and mechanical-thermal treatment of metals. 23 p3304 A72-44299

High-temperature creep of polycrystalline chromium. 23 p3304 A72-44449

Field-ion microscopic study of the interstitial plasticity of tungsten single crystals 23 p3304 A72-44484

Oxidation of W/110/. I - LEED study of the oxide formation at 1000 K. 24 p3378 A72-44952

A study of the effect of grain orientation misfit on the viscoplastic behavior of polycrystalline metals /fcc system/ 24 p3414 A72-45251

Energy spectra of Cs+ ions scattered by the surface of a tungsten single crystal 24 p3429 A72-45501

Low temperature slip discontinuity and strength of pure Al crystals as function of strain rate 24 p3416 A72-45742

Crystallographic texture of sheet Mo alloys, analyzing angular dependence of Young modulus 24 p3416 A72-45752

METAL CUTTING

Multilead electrical spark discharge machining for mass production technology, noting carburetor slot cutting and data processing equipment applications 01 p0078 A72-11097

Residual stress formation mechanism in two phase Ti alloys under cutting and plastic deformation, showing phase transformation composition and structure effects 03 p0363 A72-13467

Arc-air method application to groove planing, cutting and beveling, describing manual, semiautomatic and full-automatic units 07 p0994 A72-18932

Steel cutting suitability test, determining optimum cutting conditions for pure iron used in magnetic applications 07 p0994 A72-18973

High power carbon dioxide laser beam applications to deep penetration metal welding, including cutting tests 07 p0994 A72-19214

Adiabatic reversion of Ni martensitic steel to austenite under shear in orthogonal cutting 07 p0996 A72-19934

Plasma beam cutting of Al sheets, discussing heat effect on surface oxides and microstructure and plasmagenic gas influence 08 p1176 A72-21047

Plasma generator with Ar as ionizing medium for metal cutting and welding, discussing protection against secondary arc formation 08 p1176 A72-21048

German monograph on plasma arc machining and cutting of metallic materials on lathe as function of electric power and torch performance 09 p317 A72-22327

Electron beam machine for thin metal plates welding and cutting under space conditions, noting design features and performance 11 p1639 A72-25809

Leading angle effects on cutting force components, temperature and surface roughness in drawing of Ti alloys 13 p1963 A72-28746

Force distribution in refractory Ti alloy cutting with circular self turning blades, noting effects of feeding speed, cut area and cutter angle 13 p1966 A72-29467

Deep diffused layer sintering of metal-ceramic cutting alloys with variable Co content for increased wear resistance and tensile strength

13 p1982 A72-30112

Economics of material cutting and removal by plasma torches, presenting cutting rates as function of plate thickness for different materials

15 p2243 A72-31321

Some considerations on the residual stresses in orthogonal cut surface of aluminium.

20 p2978 A72-38884

Ti fabrication advances in forging, diffusion bonding, hot forming, chemical milling and laser cutting

21 p3061 A72-41335

Magnetic control of arc plasma and its application for welding.

24 p3406 A72-44777

Residual stress formation mechanism in two phase Ti alloys under cutting and plastic deformation, showing phase transformation composition and structure effects

24 p3407 A72-44942

METAL DRAWING

Tungsten wire deformation structure from swaging or rolling and drawing processes, noting cylindrical texture superimposed on fiber texture

03 p0375 A72-13933

Ferritic stainless steel metal ductility, investigating yield and fracture stresses after heat treatment

11 p1661 A72-26494

Deformation drawing textures of bcc metals, including W

11 p1644 A72-26838

Deformation limits in thin and thick walled metal blanks axisymmetric drawing process, determining stress-strain state based on prescribed velocity field

13 p1963 A72-28743

Leading angle effects on cutting force components, temperature and surface roughness in drawing of Ti alloys

13 p1963 A72-28746

Deep drawing of circular mild steel and aluminum sheets with polyurethane or rubber rings, examining strain distribution, shape and surface roughness

15 p2244 A72-32145

Deformation modes for deep drawing of extramild steel sheets, noting susceptibility and rupture criteria

16 p2396 A72-32872

Work hardening and anisotropy coefficients effects on deep drawing limit curves for extramild steel, noting rupture strain and deformation trajectories

16 p2396 A72-32873

METAL FATIGUE

Tensile and fatigue tests on steel, brass and aluminum with starter cracks, showing relation of strength and ductility to crack propagation and stress cycles

01 p0083 A72-10392

Inconel 718 surface integrity from various manufacturing processes, tabulating data on surface finish effects on fatigue, microhardness and metallurgical properties

[SME PAPER IQ 71-239]

01 p0076 A72-10967

Steel and Ti-Al-V alloy surface integrity during various machining methods, considering microstructures, residual stress profiles and fatigue characteristics

[SME PAPER IQ 71-237]

01 p0076 A72-10972

Ni, Fe and Ti alloys creep rupture characteristics in high temperature, high pressure gaseous hydrogen and helium

01 p0086 A72-10979

Cast high temperature Ni base alloy Udimet 500 low cycle fatigue, determining total stress and strain range vs fatigue life at elevated temperatures

01 p0087 A72-11030

Ti-Al-V alloy under vacuum fatigue tests, examining temperature and chemical environment effects on fatigue crack growth

01 p0087 A72-11034

Fatigue crack initiation and growth in sharply notched mild steel, showing specimen size, geometry and loading effects on fatigue life

01 p0142 A72-11098

Hot formed Cr-Ni-Mo and Ni-Mo prealloyed steel powders fatigue and toughness properties, determining hardness effects by varying draw temperature from 400 to 1000 F

02 p0240 A72-11435

Residual buckling strength of Al alloy elastic column with fatigue crack

[SESA PAPER 1914A]

02 p0288 A72-11511

Annealed pure Al polycrystals fatigue behavior data under elevated temperatures, using transmission electron microscopy

02 p0242 A72-11525

Automatic device for thermal and thermomechanical fatigue tests of steel specimens, noting crack nucleation and growth by hardening due to lattice defects

02 p0200 A72-11996

Impending metal fatigue failure holographic detection by optical correlation of coherent light reflection from deformed surface structure as function of time

02 p0294 A72-12442

Tension-compression cycling effects on fatigue crack growth in high strength alloys

[ASME PAPER 71-PVP-2]

02 p0294 A72-12469

Papers on metal fatigue damage covering basic mechanisms, detection, field practices for repair, avoidance and control

02 p0295 A72-12495

Metal fatigue mechanisms in subcreep temperature range, discussing response to cyclic loading including hardening, softening and inhomogeneous plastic strain development

02 p0295 A72-12496

Metal fatigue time and cycle dependent deformation and fracture mechanisms in creep range from cumulative damage law standpoint for lifetime prediction

02 p0295 A72-12497

Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results

[AD-741977]

02 p0296 A72-12498

Jet engine component overhaul procedures for fatigue damage repair, detailing distressed metal removal, replacement and welding techniques

02 p0271 A72-12499

Metal fatigue damage avoidance, control and repair, considering design, metallurgical and service factors

02 p0296 A72-12500

Cumulative damage in metal fatigue, suggesting unified theory applicable to stress or strain controlled conditions

03 p0442 A72-12922

Automatic recording of cyclic creep and strain curves for metals under low cycle static tension

03 p0444 A72-13468

Austenitic steel under combined bending and torsion, showing fatigue strength dependence on temperature, load cycle asymmetry and stress concentration

03 p0371 A72-13469

Strain gage measurements of stress intensity factor for crack propagation in fatigue cracked thin metal sheets

03 p0444 A72-13542

Microfractographic fatigue fracture analysis of steels, aluminum, brass, nickel and molybdenum by scanning electron microscope

03 p0372 A72-13543

Soviet conference papers on fatigue of metals, alloys and composite materials covering breakdown mechanisms, failure kinetics, cyclic strength and hardening

03 p0372 A72-13587

Fatigue failure under cyclic stress, analyzing surface and temperature effects

03 p0372 A72-13588

Fatigue breakdown and energy dissipation dependence on stress during bending of cylindrical steel and iron specimens

03 p0372 A72-13589

Cyclic deformation and energy dissipation during fatigue breakdown in steels under tension-compression and torsion

03 p0372 A72-13590

Surface layers and aging influence on Bauschinger effect in profiled low carbon steel under low tension-compression load cycles

03 p0445 A72-13591

Secondary fatigue curves for determining service life of metal specimens under unsteady loads

03 p0445 A72-13592

Crack propagation rates during bending fatigue tests on flat hardened steel as function of stress intensity and plasticity area

03 p0445 A72-13593

Beta structure effect on cyclic fatigue strength in Ti alloy under various heat treatments

03 p0372 A72-13595

Optimal cyclic fatigue strength of low C steel from critical deformation rate during thermomechanical treatment

03 p0372 A72-13597

Stepwise thermomechanical treatment effect on improved cyclic fatigue strength of Ni-Cr sheet steel with tension and rolling deformations

03 p0372 A72-13598

Steels fatigue life tests as function of stress level, confirming Wohler curves mathematical model

03 p0373 A72-13673

Grain orientation effect on fatigue crack propagation in notched test specimens cut from cold rolled prestressed annealed brass plate

03 p0375 A72-13934

Fatigue cracks nucleation in steel bearings subjected to cyclic contact stresses

03 p0377 A72-14020

Corrosion fatigue cyclic crack growth rate above and below environmental threshold stress in steels as function of frequency and potentials, indicating hydrogen embrittlement

03 p0377 A72-14172

Cu single crystal fatigue life explanation by work hardening using statistical theory of slip

03 p0379 A72-14258

Ultrasonic fatigue at small strain amplitudes in Ti, deposing solitary slip band microcracks

04 p0533 A72-14539

Mean stress and overload effects on mild steel service life, using fatigue damage summation method

04 p0592 A72-15475

Impact fatigue testing apparatus, presenting results for stainless steel

04 p0524 A72-15549

Dislocation substructure in fatigued Al and Ni polycrystals surface layer and interior due to high and low stress cycling, discussing stacking fault energy influence

04 p0534 A72-15577

Titanium alloy microstructure effect on fatigue strength under symmetric bending load cycles in air and NaCl solution

04 p0535 A72-15663

Fatigue crack propagation rates for aluminum alloy plates under mode I extensional loads and transverse mode II bending loads

[ASME PAPER 71-MET-J]

05 p0732 A72-15793

Al and Al-Zr coating effects on heat resistant alloy turbine blades high temperature fatigue resistance under bending-torsion cyclic loads

05 p0671 A72-15990

Anodic layer thickness effect on fatigue crack initiation and fracture mode in mono and polycrystalline aluminum

05 p0672 A72-16015

High temperature low cycle fatigue of Cr-Mo-V steel, observing crack growth rate correlation with crack tip stress

05 p0673 A72-16321

Purity effect on fatigue crack growth in high strength steel at room temperature

05 p0674 A72-16325

Plastic zone formation and fatigue crack propagation rate during high cyclic bending of metals

05 p0674 A72-16326

Hydrogen environment effects on fatigue crack growth rates in Ti-Al-V weldments over low ambient temperature range

05 p0678 A72-17116

Zircaloy plastic properties and fatigue fracture modes under strain controlled push-pull cyclic loads, noting plastic anisotropy changes for warm cross rolled and recrystallized materials

05 p0678 A72-17120

Fatigue and fatigue-corrosion properties of high strength stainless maraging martensitic structural and stainless austenitic steels

05 p0680 A72-17206

High purity polycrystalline Al hf low strain fatigue measurements by piezoelectrically driven exponential horn, estimating critical point defect concentration

06 p0893 A72-17420

Microvolume decohesion hypothesis for crystal lattice defects explaining metal fatigue under variable stresses

06 p0829 A72-17743

Creep behavior during and immediately after loading of Nimonic 90 and H 46 Cr steel under various stresses, temperatures and rates

06 p0829 A72-17801

Semibrittle tears and fractures by progressive cracking in metallic structures, discussing metal fatigue and environmental stress

06 p0897 A72-18297

Slip band formation and crack initiation in Ti as function of cyclic loading frequency, considering plastic strain amplitude or distribution as causes

[DFVLR-SONDDR-149]

06 p0832 A72-18425

Refactory and structural steels and Al alloys, obtaining low cyclic plastic deformation and breaking stress curves

06 p0898 A72-18549

Deformation kinetics and failure of refractory Nb and Mo base alloys in plastic state under low cyclic fatigue

06 p0833 A72-18631

Nickel base alloy under axisymmetric tension compression tests, obtaining breaking load diagrams and fatigue and creep curves

06 p0833 A72-18638

Fractographic analysis of failure kinetics and crack formation in Al alloys, showing microfatigue intrusions and extrusions for various initial stress levels

06 p0834 A72-18653

Thermostable and heat resistant steels and alloys vibration loading frequency effects on fatigue at high temperatures

06 p0834 A72-18688

Static and fatigue strength in tension of welded joints composed of low carbon and austenitic steel

07 p0996 A72-19767

Static hydrogen fatigue of high strength steels, deriving relationship between time to cracking and tensile stresses magnitude for cadmium-plated steel

07 p1014 A72-19774

Test equipment with variable deflection and twist for metal fatigue microcrack initiation and growth detection

07 p0987 A72-19849

- Prestressing effect on stress corrosion resistance of fatigue precracked high strength steels
07 p1016 A72-19941
- Stepwise fatigue testing of high temperature alloy, noting strain hardening phenomena in prestressed samples
07 p1017 A72-20129
- Analytical model for surface fatigue crack configuration during propagation into thick plate under cyclic loading
[AD-741575] 07 p1095 A72-20242
- Metals and alloys for aerospace applications, emphasizing creep and fatigue properties and oxidation resistance at high temperatures
08 p1185 A72-21171
- Mechanical surface strengthening effect on small cycle fatigue life of Ti alloy weakened by stress raiser
08 p1186 A72-21725
- Machine metals fatigue life, creep theory and stress and strain kinetics in severe environments, formulating physical equations
08 p1246 A72-21805
- German monograph on computerized statistical analysis of Al alloy fatigue test data, considering welded samples and thin plates
08 p1188 A72-21848
- Fatigue striation formation and crack propagation mechanism in Al alloy films from electron microscope studies
09 p1328 A72-22917
- Crack propagation and substructure formation near fatigue crack in austenitic stainless steel observed by X ray diffraction and replica electron microscopy
09 p1329 A72-23148
- Metal creep fatigue analysis and life prediction by inelastic strain ranges partitioning into reversed tensile and compressive plasticity and creep components
09 p1406 A72-23198
- Time and cycles to failure diagrams for strain rate and hold periods effects on high temperature metal creep fatigue in design analysis
09 p1407 A72-23199
- Mathematical model and inelastic stress analysis for metal creep-fatigue interaction and progressive deformation in breeder reactors operation
09 p1407 A72-23200
- Welded structures fatigue, - Conference, Abington, England, July 1970
09 p1332 A72-23615
- Fracture mechanics application to welded structures fatigue, using crack propagation law
09 p1409 A72-23616
- Welded high strength maraging steels fatigue performance, stressing nondestructive testing technique
09 p1332 A72-23617
- Cumulative fatigue damage in Al-Zn-Mg alloy fillet welded joints, analyzing constant amplitude and programmed load fatigue test results
09 p1332 A72-23618
- Fatigue indicators with analytic or visual notched and cracked coupons techniques and strain multipliers for welded structures
09 p1316 A72-23620
- Design information for machinery to incorporate welding positions and joints, fatigue mechanisms, loads, combined stresses and plate and cast materials properties
09 p1409 A72-23621
- Diffusion bonding compared to other processes, discussing mechanical properties, metallurgical condition, fatigue, pressure, temperature and production problems
09 p1320 A72-23633
- Fatigue crack propagation theory based on linear accumulation of metallurgical damage in plastic region
10 p1553 A72-24098
- Transmission electron microscope examination of deformation microstructures adjacent to fatigue cracks in Al alloys
10 p1497 A72-24823
- Fatigue crack propagation relation to plasticized zone formation at crack tip in ferritic carbon steels and in Cr-Ni austenitic stainless steels
10 p1558 A72-24855
- Mean stress effect on fatigue crack propagation rate in half inch thick Al alloy specimens of high and low fracture toughness
10 p1498 A72-24884
- Carbon steel fatigue crack propagation rate dependence on strength and stress history, discussing conditions for crack nonpropagation
10 p1499 A72-24889
- Environmental sensitivity effect on crack propagation rates in steels and Al and Ti alloys, discussing corrosion fatigue
10 p1499 A72-24899
- Fatigue crack initiation and growth in filament reinforced Al alloys, noting interface crack tip stress distribution effects
11 p1654 A72-25480
- Test assembly design for microstructural studies of metal and alloy fatigue in vacuum during heating, describing electrical resistance measurement and stroboscopic illumination
11 p1612 A72-25492
- Ni fatigue crack propagation under low cyclic loads at high temperature in vacuum after annealing and mechanical treatment
11 p1655 A72-25497
- Liquid environments effect on mild steel fatigue strength, discussing effects of viscosity, compressibility and entry rate into cracks
11 p1656 A72-25738
- Locati and Prot methods for metal fatigue limits evaluated by axial and rotating bending tests on steel specimens
11 p1657 A72-25824
- Creep and low cycle fatigue dynamic behavior, noting stress concentration time dependence, strain hardening and local plastic deformations in dead annealed Al thin walled tubes
11 p1658 A72-25829
- Polycrystalline Mo fatigue behavior under cyclic stresses, discussing grain size effect on fatigue life and relationship between cycle dependent yield and French damage line
11 p1658 A72-25830
- Fatigue life cumulative damage prediction procedure for engineering metals subjected to complicated stress-strain histories, noting errors in average mean stress method
11 p1658 A72-25831
- Mn content effect on mechanical properties and corrosion fatigue and stress corrosion cracking resistance of Al-Mg casting alloys
11 p1658 A72-25850
- High power ultrasonics in metal fatigue studies, considering crack propagation and slip patterns for high and low frequencies
11 p1639 A72-26053
- Fatigue and fatigue-corrosion properties of high strength stainless maraging, martensitic structural and stainless austenitic steels
11 p1660 A72-26141
- Theoretical fatigue test procedure for reliability analysis of machine parts, calculating fatigue probability in load carrying components
11 p1640 A72-26244
- Fatigue properties of Ni-Al-W alloy with gamma-prime matrix, noting high endurance limit/yield strength ratio at room temperature
11 p1661 A72-26653
- Pulsating heat source model for physical processes in metal surface layer under fatigue limit stress level, calculating critical volume to limit energy buildup
11 p1738 A72-26801
- Cyclic loads frequency and environmental effects on fatigue crack propagation rate, comparing theoretical results with Al alloy thin plates experimental data
11 p1663 A72-26802
- Tungsten alloy wires strength, creep properties and fatigue limit, investigating fracture characteristics
11 p1663 A72-26807
- Diamond burnishing effect on surface quality and fatigue strength of steel, noting work hardening increase and compressive residual stresses buildup in surface layer
11 p1642 A72-26811
- Ti alloys fatigue strength, stress concentration sensitivity and grain sizes effects at normal and high temperature under cyclic loads
11 p1663 A72-26821
- Udimet 500 alloy dislocation substructure and fracture surface topography during deformation to failure in low cycle fatigue at high temperatures
11 p1667 A72-26938
- Low cycle fatigue deformation of lamellar eutectic and cast Ni-Sr alloys, noting microstructure and chemical composition effects on fracture energy
11 p1668 A72-26939
- Reversible stress effects in theory of plastic flow in strain hardened metals at high temperatures
12 p1879 A72-27159
- Fatigue failure tests of low carbon Mn steel, analyzing structural damage under cyclic loads in relation to temperature curve
12 p1829 A72-27458
- Cyclic stress ratio effects on stainless steel fatigue crack propagation at 1000 F, using linear elastic fracture mechanics
12 p1829 A72-27663
- Steel components contact fatigue kinetics measurement by emf increase of inductive sensor
12 p1887 A72-28245
- Metal fatigue strength testing under programmed temperature regimes, using HF induction generator
12 p1796 A72-28247
- High temperature low cycle fatigue of alloys as process of crack nucleation and growth to ultimate failure
13 p2058 A72-29445
- Microscopic substructure in high temperature fatigued fcc austenitic steel and aluminum, studying cross slip lines and crack initiation
13 p1979 A72-29448
- Temperature and strain rate dependence of austenitic stainless steel fracture by low cycle fatigue at high temperatures, studying striations with scanning electron microscopes
13 p1979 A72-29449
- Borated steels strength under static bending, cyclic flexure and torsion and impact loads, correlating fatigue strength, residual stresses and core properties
13 p1979 A72-29477
- Paint coatings aging effect on D16T type alloy corrosion fatigue in NaCl solution, noting protective efficiency decrease
13 p1984 A72-29486
- Aviation fuels and additives effect on steel endurance limit at room temperature
13 p1980 A72-29487
- Model for metal fatigue fracturing, noting crack initiation and two stages of propagation, emphasizing experimental fractographic /electron microscopy/ research
13 p2061 A72-29773
- Literature survey of fatigue behavior of Al alloy welded joints, discussing testing and analysis methods
14 p2113 A72-30250
- Resonance type facility using dynamic hysteresis loop method to test metal fatigue and anelasticity in torsion at room and high temperatures
14 p2092 A72-30443
- Fatigue crack growth rate in precracked steel samples observed at 100 C by etching technique, noting flow stress and yield in plastic zone
14 p2119 A72-30608
- Crystal lattice defects induced by cyclic straining in quenched Al-Zn alloy, noting fatigue effects on dislocations accumulation and grain boundary migration
14 p2120 A72-30610
- Fcc metal defect structure due to ultrasonic fatigue observation via transmission electron microscopy for dislocations
15 p2256 A72-31836
- Ultrasonic metal fatigue, discussing crack initiation and growth and frequency effects
15 p2256 A72-31837
- Microcrack initiation and propagation in ductile metals at low cycle and ultrasonic frequencies, investigating fatigue fracture mechanism by scanning electron microscope
15 p2256 A72-31838
- Metal fatigue tests at various frequencies to observe surface structure, dislocations in crack vicinity, plastic deformation and ultrasonic resonance techniques
15 p2257 A72-31839
- Rotating bending fatigue limit correlation with non-propagating crack for steel specimens with hole
15 p2329 A72-32140
- Prestraining effect on metal fatigue strength, showing increase relation to yield strength and ultimate strength
16 p2463 A72-32903
- Safe stress range for metal fatigue deformation preceding fracture under combined cyclic and steady push-pull loads
16 p2468 A72-33228
- Temperature effect on fatigue crack growth in high strength annealed Ti-Al-V alloy in water, oxygen/hydrogen and vacuum environments
16 p2406 A72-33320
- Deformation substructures in stainless steels under low cycle high strain fatigue tests evaluation for application as fuel cladding for fast breeder reactors
16 p2411 A72-33825
- Understressing and coaxing cycles effect on deeply notched carbon steel fatigue behavior, emphasizing crack initiation and breakdown
16 p2472 A72-33947
- Crack opening displacement and the rate of fatigue crack growth.
17 p2565 A72-34255
- Russian book on metal fatigue and inelasticity covering structural inhomogeneities, static and dynamic loading, failure mechanisms, deformation, temperature effects and test methods
17 p2566 A72-34649
- Effects of thickness on fatigue crack initiation and growth in notched mild steel specimens.
17 p2627 A72-34747
- Ultrasonic tests for incipient fatigue, hardness and elastic constants-tensile strength relationship in metals
18 p2690 A72-36125
- The effect of high vacuum on the low cycle fatigue law.
18 p2700 A72-36582
- The effects of environment on the elevated temperature fatigue behavior of nickel-base superalloy single crystals.
18 p2700 A72-36587
- Temperature effects on the strainrange partitioning approach for creep-fatigue analysis.
19 p2815 A72-37638
- Creep damage role in governing elevated temperature strain cycling fatigue lives of heat resistant stainless steel and cobalt alloy
19 p2817 A72-37712
- Evaluation of the tendency to brittle fracture of turbine rotors made from steels of medium strength
19 p2876 A72-38001
- Effect of the loading frequency on the fatigue strength of metals
19 p2818 A72-38012

Surface cold-working as a means of increasing the short-term fatigue endurance of machine elements
19 p2808 A72-38015

Relation between the reliability and allowable stress amplitude in fatigue design.
20 p2977 A72-38879

Microscopic substructure in face centered cubic metals fatigued at elevated temperatures.
20 p2935 A72-38880

Environmental acceleration of fatigue-crack growth in a high-strength steel.
20 p2935 A72-39140

Effect of thickness and orientation on fatigue crack growth rate in 4340 steel.
20 p2937 A72-39294

Thermal fatigue resistance of KHN70VMuT boronized alloy
20 p2941 A72-39585

Review - Fatigue-crack propagation in metallic and polymeric materials.
20 p2980 A72-39793

Vibrational shot peening as a method of increasing the fatigue strength of critical aircraft elements
20 p2929 A72-39802

Fatigue strength of welded aluminum-connections - Investigation with the aid of multiparameter life length lines
20 p2930 A72-39941

Fatigue-crack propagation characteristics of aluminum alloys in thick sections.
20 p2942 A72-39951

Metal fatigue crack propagation under cyclic loads, assuming specific energy dissipation as material constant
20 p2981 A72-39953

Criteria for valid plane strain fracture toughness testing dealing with straightness of fatigue crack front of metal specimens
20 p2981 A72-39958

Effect of notch root radius on the initiation and propagation of fatigue cracks.
20 p2981 A72-39960

Study of fatigue crack initiation from flaws using fracture mechanics theory.
20 p2981 A72-39961

Designing to avoid stress-corrosion and/or fatigue failures.
[AICHE PAPER 15C] 21 p3116 A72-40125

A comparison of the effect of inward and outward diffusion aluminate coatings on the fatigue behavior of nickel-base superalloys.
21 p3067 A72-40916

Fatigue cumulative damage in cases of rotating-bending and torsional multistep loading.
21 p3118 A72-40933

Isothermal deformation behavior of structural metals in laboratory creep, relaxation and low cycle fatigue tests at high temperatures
21 p3119 A72-41009

Temperature and strain rate dependencies of low cycle fatigue life at high temperatures of austenitic stainless steel, examining crack behavior and stress-strain relations
21 p3069 A72-41010

Low carbon steel S-N diagram for stresses ranging to fatigue limit, noting cyclic creep, macroplastic cyclic stress and fatigue failure
21 p3122 A72-41353

Influence of the cycling frequency and directional anisotropy on the fatigue strength of AMg6BM aluminum-alloy sheet
21 p3070 A72-41356

Resonant frequency, fatigue and energy dissipation relations for endurance limit determination in Al alloy specimens under vibrational loads
21 p3070 A72-41368

Book - Metal matrix composites.
21 p3070 A72-41528

Investigation of fatigue-failure mechanisms and inelastic deformation of metals in torsion
21 p3071 A72-41703

Facility for measuring and recording the electrical resistance of metallic samples during mechanical tests
21 p3043 A72-41718

Cyclic hardening of Al-Zn single crystals at constant plastic strain amplitude, observing similarity between fatigue hardening and work hardening
22 p3189 A72-42439

Brittle striation formation role in corrosion fatigue crack propagation mechanism in Al-Zn-Mg alloy from test in NaCl solution under reversed anodic-cathodic current
22 p3193 A72-43033

Effect of cyclic stress wave form on corrosion fatigue crack propagation in Al-Zn-Mg alloys.
22 p3194 A72-43043

Influence of the cycling frequency on the fatigue and corrosion fatigue of steel samples with bushings
22 p3242 A72-43155

Inelastic effects during metal fatigue
22 p3195 A72-43156

Investigation of the kinetics of low-cycle fatigue of steels in a hydrogen atmosphere and in vacuum
22 p3195 A72-43161

Gas turbine blades of cast ZhS6K heat resistant alloy, investigating structural strength from fatigue test data
23 p3347 A72-43734

Gas turbine blade models of heat resistant ZhS6K alloy under operational temperature variations, observing fatigue strength
23 p3347 A72-43735

Failure and crack formation in gas turbine engine compressor disks under variable stresses from fatigue tests, considering safety factors
23 p3347 A72-43736

Solid powder metallurgy tungsten alloys, determining scale factor effect on bending strength and fatigue limit
23 p3301 A72-43751

Fatigue strength of two phase Ti alloys, considering work hardening, electrochemical finishing, electropolishing and protective media
23 p3301 A72-43757

Heat resistant ZhS6K alloy precision and ground cast specimens, determining short and long term strength and fatigue
23 p3301 A72-43761

Energy dissipation in metals during high-frequency fatigue tests. I
23 p3302 A72-43963

Energy dissipation in metals during high-frequency fatigue tests. II
23 p3302 A72-43964

Machine with programmed load control for studying the fatigue and inelasticity of metals at room and elevated temperatures
23 p3278 A72-43969

Low cycle fatigue under biaxial strain controlled conditions.
23 p3354 A72-44259

Fatigue behavior of a titanium 8Al-1Mo-1V alloy in a dry argon environment.
23 p3304 A72-44261

Fatigue crack propagation in A514 base plate and welded joints.
23 p3354 A72-44309

A comparison of the axial and reversed-torsional strain cycling low-cycle fatigue strength of several structural materials.
23 p3304 A72-44397

The difference in the plastic deformation of the surface and bulk layers of polycrystalline iron under fatigue loading
23 p3304 A72-44490

Estimates of creep-fatigue interaction in irradiated and unirradiated austenitic stainless steels.
24 p3412 A72-44554

Fatigue-crack growth in 20% cold-worked Type 316 stainless steel at elevated temperatures.
24 p3435 A72-44555

The stress-strain relation in the low-cycle fatigue of metallic materials under rotating-beam bending.
24 p3454 A72-44626

The cyclic plastic strain and cumulative fatigue damage - Fatigue damage caused by the stress below the fatigue limit.
24 p3454 A72-44628

The application of Ti-6Al-4V titanium to helicopter fatigue loaded components.
24 p3366 A72-44732

Estimation of creep and fatigue behaviour under cyclic loading.
24 p3456 A72-44793

Plane-stress fracture toughness testing using a crack-line-loaded specimen.
24 p3456 A72-44810

Ultrasonic detection of fatigue damage.
24 p3457 A72-44820

Development and present-day state of the fatigue-damage theories.
24 p3457 A72-44873

Automatic recording of cyclic creep and strain curves for metals under low cycle static tension
24 p3458 A72-44943

Austenitic steel under combined bending and torsion, showing fatigue strength dependence on temperature, load cycle asymmetry and stress concentration
24 p3414 A72-44944

Al and Al-Zr coating effects on heat resistant alloy turbine blades high temperature fatigue resistance under bending-torsion cyclic loads
24 p3415 A72-45732

Stepwise fatigue testing of high temperature alloy, noting strain hardening phenomena in prestressed samples
24 p3416 A72-45755

Method for applying a fatigue crack to impact test specimens made from tough materials.
24 p3417 A72-45765

METAL FILMS

Au thin film effective optical constant calculation from measured reflection and transmission coefficients and thickness by approximate formulas
03 p0401 A72-13363

Superferromagnetism in thin polycrystalline Gd and Gd-Au films having Curie points near room temperature
03 p0401 A72-13583

Alloying elements and grain size effects on thermally induced surface reconstruction of Al film metalization on Si devices from thermal cycling tests
03 p0364 A72-14285

High resolution electron microscope observation of voids in amorphous Ge films, noting density dependence on substrate temperature
04 p0562 A72-15152

NbN film superconducting properties measured as function of thickness, discussing transition temperature, critical current and magnetic field
04 p0562 A72-15294

Al finished and Au plated triple calibration sphere as multispectral optical sensor for testing Cook hypothesis concerning satellite drag dependence on surface material
04 p0500 A72-15305

X ray spectral analysis of microchemical changes in surface films of titanium alloys during diffusive interaction with silicon carbide abrasive
04 p0534 A72-15654

Optical resonators using lossy anisotropic metal film linear polarizer for oscillation mode selection
[CLEA PAPER 6.3] 07 p1004 A72-19382

A-15 superconducting films preparation cosputtering method, noting alloying effects and crystal structure stability determinations applications
09 p1368 A72-22559

Noncrystalline Ge film preparation by rf sputtering onto substrate with explosive crystallization triggered by localized transient energy pulse at room temperature
09 p1369 A72-22625

Diffusion coefficient and distribution of Ti atoms in thin Al film from electric current vs time curves for oxidation of solid solution
09 p1329 A72-23036

Polymorphism in Ta vacuum condensates, observing beta-alpha phase transformation in films
09 p1329 A72-23041

Metal stress corrosion crack propagation rate theory based on film rupture mechanism
11 p1735 A72-25852

Transition temperature and other superconducting properties of annealed Nb-Al-Ge thin films
12 p1853 A72-27038

Low pressure hydrogen and titanium thin film reaction rate measurement, using flow technique
12 p1778 A72-27046

Vacuum deposition process relation to thin metal film properties, discussing current conducting mechanism
12 p1854 A72-27275

Epitaxial and textured Pb films on mica and glass, using reflection electron diffraction, etching and optical microscopy for structure study
12 p1854 A72-27289

Effect on physical and mechanical properties of hard metals due to gas sorption by metallic films spray-coated on surfaces, describing vacuum apparatus
13 p1939 A72-29488

Shielding metallic interlayer technique to protect MIS device against degradation due to ionizing radiation effects
13 p2023 A72-29836

High light transmission electrically conducting Hyviz and gold film laminates for aircraft windshields and window heating applications
13 p1898 A72-30038

Niobium and molybdenum carbide film deposition on steel substrates by open arc welding with partial carbon burnout
14 p2107 A72-30156

Electron work function for metallic sphere and thin film on dielectric substrate as function of radius, thickness and dielectric constant
15 p2290 A72-31222

Vacuum UV reflectance dependence of Re and W vapor-deposited films on substrate temperature during deposition, film thickness and aging in air
15 p2274 A72-31377

Strain analysis of thin metallic films on low modulus structural substrate by light intensity measurement
15 p2325 A72-31526

Soft X ray appearance potential spectrometer construction and operation for metal film diffusion detection in microcircuit technology
15 p2241 A72-32442

Sensor design and principles for atomic oxygen concentration measurement in dissociated gases, using Ag thin film electrical resistance change during oxidation
16 p2390 A72-33162

Structural and orientation study of sequentially evaporated MnBi thin films on glass substrates using electron diffraction and transmission microscopy
16 p2441 A72-33207

Diffusion limitation avoidance at high current densities by fuel cell preparation via Pt thin film sputtering on porous vycor substrates
16 p2352 A72-33893

Photoemissive properties of bismuth-cesium films
17 p2595 A72-34754

Theory for the excitation of SHF elastic waves by multiple-film transducers /Allowance for the influence of metallic and dielectric layers/
17 p2529 A72-34843

Contribution to the study of creep in thin permalloy films.
17 p2596 A72-35759

Off-axis hologram recording on thin bismuth film with picosecond pulse train from mode-locked Nd-glass laser
17 p2558 A72-35817

Work function, thermal stability, and atomic structure of electropositive films adsorbed on single crystals of metals
18 p2656 A72-36132

Crystal orientation effect on electron work function in chemical vapor deposited W layers on thermionic converter cylindrical emitters
18 p2717 A72-36142

Possibility of an inhomogeneous charge distribution in an adsorbed layer
18 p2713 A72-36176

On the radiation of discontinuous gold films by electric current transmission.
18 p2718 A72-36349

Laser machining of thin films. I - Irradiation characteristics of a focused Q-switched YAG laser beam.
18 p2695 A72-36518

Changes of electrical and structural properties of Au thin films obtained by sputtering during the annealing process.
18 p2720 A72-36955

Determination of the time of hole formation in a metallic film under the action of single-pulse laser radiation
19 p2812 A72-38540

Dependence of critical supercurrent on normal layer thickness in S-N-S structures.
19 p2846 A72-38631

Possible uses of plasma oscillations in thin metal films.
20 p2959 A72-39053

Investigation by the method of secondary ion-ion emission of the initial phase of the formation process of a silver vacuum condensate on a nickel substrate
21 p3068 A72-40960

Auger spectroscopic observation of Si-Au mixed-phase formation at low temperatures.
22 p3178 A72-42616

High value thin-film-on-silicon resistors for hybrid applications.
22 p3160 A72-42825

Magnetic flux penetration into superconducting thin films.
23 p3323 A72-43271

Electrical resistivity changes in nichrome films sintering of various thickness with different heat treatment conditions, noting heat stability and thermal shock tests
23 p3292 A72-43280

Magnetostriction of porous nickel films
23 p3299 A72-43340

Optical properties of thin cesium films over the wavelength range from 0.3 to 0.9 microns and their electrical resistance
24 p3426 A72-44801

METAL FINISHING
NT ELECTROPOLISHING
NT SHOT PEENING

Fatigue strength of two phase Ti alloys, considering work hardening, electrochemical finishing, electropolishing and protective media
23 p3301 A72-43757

METAL FOILS
Electrochemical thinning of metal disks for electron microscopic thin foils preparation
04 p0527 A72-15492

Dislocation loops in thin W foil due to ion irradiation, using electron microscopic analysis
09 p1331 A72-23505

Radiation damage in bcc metal Mo and W foils under energetic Au ion irradiation, noting vacancy dislocation loops
09 p1331 A72-23506

Lunar surface darkening caused by solar wind effect, noting Fe valence state changes evaluation from photoelectronic spectroscopy of foil samples exposed to ion bombardment
09 p1394 A72-23665

High intensity laser radiation absorption in plasma produced from thick metal targets and thin Au foil
10 p1490 A72-23967

Metallic foils effects on thermal joint resistance of interface between lathe turned and optically flat surfaces, noting optimal thickness
[AIAA PAPER 72-283] 11 p1685 A72-25223

Beryllium sheet and foil application to lightweight space structures, discussing mechanical properties
[AIAA PAPER 72-404] 11 p1726 A72-25425

Damping additions for plates using constrained thin viscoelastic sheets and metallic layers
11 p1688 A72-26063

High temperature low pressure reaction kinetics of nitrogen sorption by titanium foil, using ultrahigh vacuum microbalance
12 p1777 A72-27045

Be foil electrical resistance change during and after pulsed laser irradiation and annealing
12 p1853 A72-27067

Orientation and elongation effects on grain boundary correction term in foil surface energy measurement by zero creep, using virtual work method
15 p2258 A72-32637

Secondary electron emission and molecule passage during in-depth interaction of high energy molecular beam with thin gold foil
16 p2430 A72-33067

Iridium and tantalum foils for spaceflight neutron dosimetry.
17 p2558 A72-35901

Microcracks observed in hydrogenated niobium foil.
21 p3069 A72-41300

Spontaneous magnetization of Ni foils in high pressure H gas, noting Hall voltage measurement in ferromagnetic foils and thin plates
23 p3324 A72-44140

The direct study of crack formation in metals in a high-voltage electron microscope
24 p3401 A72-44717

Be foil electrical resistance change during and after pulsed laser irradiation and annealing
24 p3432 A72-45720

METAL FORGING
U FORGING

METAL FORMING
U FORMING TECHNIQUES
U METAL WORKING

METAL GRINDING
Electron microscope study of hard alloy surface layer formation characteristics during diamond grinding with electrolysis
12 p1814 A72-27766

METAL HALIDES
NT ALKALI HALIDES
NT ALUMINUM FLUORIDES
NT BARIUM FLUORIDES
NT CALCIUM FLUORIDES
NT CESIUM IODIDES
NT IRON CHLORIDES
NT LANTHANUM FLUORIDES
NT LITHIUM CHLORIDES
NT LITHIUM FLUORIDES
NT MAGNESIUM FLUORIDES
NT POTASSIUM CHLORIDES
NT SILVER BROMIDES
NT SILVER HALIDES
NT SODIUM CHLORIDES
NT SODIUM FLUORIDES
NT SODIUM IODIDES
NT TUNGSTEN FLUORIDES
NT URANIUM FLUORIDES

Metals and metal oxides powders mixture formation by mixed metal halides gelation in alcohol solution
02 p0233 A72-11455

METAL HARDENING
U HARDENING [MATERIALS]

METAL HYDRIDES
NT LITHIUM HYDRIDES

Solar MgH isotopic abundance ratios and photo-spheric lines, correcting previous overestimation for sunspot spectra analyses
07 p1071 A72-19179

Interstitial phases, crystal structure and chemical bonds of titanium, vanadium and niobium carbides, comparing with transition metal carbides
15 p2252 A72-31195

Chemical and spectroscopic activity of germanium tetrahydride in Jovian atmosphere in 4.7 micron window
15 p2312 A72-32094

Volumetric analysis of Th, Zr and Li hydrides precipitation in Mg alloys, determining rate equation and activation energy
15 p2257 A72-32118

Investigations concerning metal-hydride technology and hydrogen transport in the incore thermionic reactor /ITR/-core.
18 p2699 A72-36157

A possible problem in measuring hydrogen diffusivity at low temperatures by the Gorsky effect.
22 p3190 A72-42443

METAL INSULATOR SEMICONDUCTORS
U MIS [SEMICONDUCTORS]

METAL IONS
NT FERRIC IONS
NT MANGANESE IONS

Positive Fe ion concentration relationship to equatorial spread F fromOGO 6 satellite observation near magnetic equator
01 p0062 A72-10902

Garnet crystal structure type microwave ferrites with V and In ions, investigating ferromagnetic resonance linewidth reduction effect
03 p0400 A72-12971

Solar corona transition probabilities in intermediate coupling between Fe XVII configurations, including full configuration mixing
03 p0416 A72-13006

Electron impact broadening of ionized Be and Ba lines in electric shock tube plasma, measuring electron density and temperatures
03 p0393 A72-13020

Alkali ion scattering by NbTi alloy and SiC and components, comparing scattering coefficients
03 p0401 A72-13424

Quantum mechanical calculations of autoionization structure in ionization of Ba positive ions by electron impact
03 p0391 A72-13746

Photoluminescence of Er cations in CdS, observing group I co-dopants sensitizing behavior and broad-band emission spectra
04 p0563 A72-15472

Metallic ion convergent flow role in sporadic E layer formation in auroral and equatorial ionosphere
06 p0810 A72-18730

Zeeman patterns and energy level Lande g factors from spectrograms of As ion electrodeless discharge tubes in presence of 24,025 G magnetic field
07 p0987 A72-19832

Carbon like spectra and ground energy levels of Sc, Ti and V ions in 16-22 A range, using vacuum spark source
07 p1037 A72-19833

Mg ion excitation by electron collision in solar chromosphere studies, calculating scattering cross sections
07 p1081 A72-20234

Hyperfine interactions of Fe cations in ilmenite determined by Mossbauer spectroscopy, noting internal magnetic field and quadrupole coupling constant
09 p1367 A72-22457

Multiple charge Al and C ions X-UV spectra use for studying laser produced plasmas build up and expansion regions
09 p1359 A72-22830

Optical and inner shell X ray transitions in highly ionized Cu, Fe and Ti observed from point plasma source generated in linear vacuum discharge
09 p1360 A72-22833

Be and Mg ion generation and p-type layer electrical properties production by implantation in GaAs substrates
09 p1372 A72-23245

Tuned radar laser detection and ranging of high altitude Ba ion cloud by photon counting, discussing SNR requirement
10 p1440 A72-24963

Wind shear and midlatitude sporadic E layer theories, discussing metal ions production and loss
10 p1477 A72-25158

Metal ion sheaths in midlatitude sporadic E layer caused by vertical redistribution of neutral ionization, discussing wind shear discontinuities
10 p1477 A72-25159

Atmospheric metal ion chemistry, tabulating thermal energy binary and three body reaction rate data
10 p1434 A72-25160

Spacecraft thermal control coating damage by energetic Hg ion bombardment, using absorbance measurements
[AIAA PAPER 72-445] 11 p1746 A72-26183

Magnetically unaffected Fe I line profiles in sunspots from high resolution photographic spectra observation
12 p1867 A72-27205

Secondary autoionization reduction of recombination coefficient during dielectronic recombination process, considering importance in Fe ions
12 p1864 A72-27747

Monovalent K and Na and bivalent Ca and Mg plasma ion ratio effect on thrombocyte electrokinetic potential
13 p1901 A72-28635

West German-United States Barium Ion Cloud Project meteorological support at Wallops Station, discussing magnetospheric magnetic and electric fields
13 p1947 A72-28802

Energetic Hg ion bombardment erode and chemical effects on spacecraft surfaces downstream of electrostatic rockets
[AIAA PAPER 72-446] 13 p1983 A72-28944

Fourier transformation for natural abundance C 13 free induction decays of cyclic antibiotic valinomycin and K ion complex, noting chemical shift differences
13 p1913 A72-29862

Nickel ion charge sign and magnitude estimation in Ni-Cr alloy by electron transfer method
14 p2116 A72-30415

Fe and Ti ion bands in lunar pyroxenes and olivines single crystals polarized absorption spectra
14 p2154 A72-30510

Singly ionized Ca and Mg electron impact broadened resonance lines from rapid scanning Fabry-Perot spectrometer measurements in shock tube generated high temperature plasma
15 p2282 A72-32643

Solar Fe XIII IR lines intensity ratio at 10747 and 10798 Å, deriving electron density as function of dilution factor with allowance for proton impact effect
15 p2318 A72-32784

Solar corona Ca ion abundance from emission line measurements and electron density determination
15 p2318 A72-32785

Doubly ionized Mg, Ca and Ba atoms termolecular association rate constants with various molecular neutrals, comparing doubly charged with singly charged ions cluster reaction rates
16 p2360 A72-32924

Photoelectric observations of Fraunhofer ionized metal lines in sunspot spectrum relating to umbral dots
16 p2458 A72-33687

Charge carriers interaction with metal ions studied from electrical transport of Fe and Co in Fe-Cr alloy
17 p2569 A72-35521

Biomembrane hydration mechanism of Na-K ion pump of living cell based on fractionation at air-sea interface
18 p2649 A72-36441

Ion-atom scattering and interatomic potentials for ions of noble metals and period II elements incident on neon and argon with energies in the range 8-25 keV
19 p2837 A72-37883

Plasma formation on Al target surface by ruby laser beam irradiation, discussing electron and ion velocities as functions of beam power density
19 p2811 A72-38197

Fourier transform C-13 nmr analysis of some free and potassium-ion complexed antibiotics
20 p2898 A72-39399

Influence of cerium additions on the luminescence of europium and samarium ions in NaF single crystals
20 p2932 A72-39414

Metal ions effect on sporadic E layer formation, noting magnesium ions profile redistribution by vertical gradient in neutral particles wind
23 p3284 A72-43376

METAL JOINTS

NT SOLDERED JOINTS

NT SPOT WELDS

NT WELDED JOINTS

Book on vacuum brazing covering dissimilar metals joining, stress cracking, corrosion resistance, joint design, heat treatment and production engineering problems
01 p0073 A72-10165

Continuous seam diffusion bonding application to Ti and superalloys lap, butt and T joints production [ASME PAPER AD 71-264]
01 p0076 A72-10970

Impact effect on strength of glued metal joints mounted in groove cut in baseplate and pressed by yokes
01 p0144 A72-11380

Fatigue strength optimization of bonded double strap metal joints, attributing stress concentration to plastic relaxation [ASME PAPER 71-MET-Q]
05 p0731 A72-15791

Pipe joint flexible metal seal development and testing for Concorde Olympus 593 under thermal and pressure cycling
08 p1178 A72-21938

Ar-H microplasma welding of thin Cr steel sheets with narrow seams for aircraft engines and precision equipment casings
09 p1318 A72-22548

Thermal behavior of explosively welded metals, describing test facility for temperature measurements of joints
09 p1319 A72-22891

Tensile and fatigue tests of dissimilar metal joints made by friction pressure welding
09 p1321 A72-23640

Dimensionless thermal contact conductance parameter for determination of interstitial thermal contact materials effectiveness for metallic junctions [AIAA PAPER 72-284]
11 p1741 A72-25224

ESRO findings on optimal resistance welding of solar cell interconnections for silver coated metals and pure silver
12 p1814 A72-28030

A preliminary investigation of joining methods for aluminum-graphite composites.
17 p2561 A72-35665

German monograph - Contribution to the ultrasonic seam welding of metals
19 p2807 A72-37655

Calculation of the tightness of threshold joints of gas turbine engine rotor bearings
20 p2979 A72-39589

Theoretical interpretation of emf generation between noncompressed parts of bimetallic junction traversed by shock wave, taking into account radiation pressure of phonon gas
22 p3207 A72-43050

Non-destructive testing of adhesive bonded metal-to-metal joints. I.
24 p3408 A72-45289

METAL MATRIX COMPOSITES

Continuous casting of metallic tubular structural elements reinforced with boron filaments, stressing application to space shuttle structures
01 p0074 A72-10731

High temperature testing of metal matrix composites mechanical properties, noting aerospace structural applications
01 p0084 A72-10732

Metal matrix fabrication processes, considering plasma sprayed and diffusion bonded tapes and consolidated sheet material
01 p0074 A72-10733

Coextruded Be fiber-Ti alloy matrix composite sheets for light weight structures, describing ultrasonic inspection and mechanical properties
01 p0084 A72-10734

Buckling of boron/aluminum and graphite/resin fiber composite anisotropic plates, giving load vs fiber orientation angle for various plate aspect ratios
01 p0139 A72-10739

Space shuttle oriented polyimide reinforced Ti matrix composites properties, noting weight saving
01 p0139 A72-10785

Mechanical strength and performance of combined multicomponent bonded materials, including laminar, fiber, flake filled and metal matrix composites
01 p0093 A72-11086

Alumina dispersions structural stability in Fe and Ni based alloys metal matrices
02 p0241 A72-11445

Matrix hardening in dispersion strengthened powder products, discussing dispersion, grain boundary and solid solution hardening
02 p0241 A72-11457

Low cost metal matrix composition fabrication techniques, considering plasma spraying and continuous casting
03 p0364 A72-14236

High strength, stiffness and low density properties of boron/aluminum matrix composites in flight structures
04 p0585 A72-14745

Boron/aluminum composite sheet quality evaluation by radiography, ultrasonic C-scanning and micro-ohm resistance measurement, correlating with resistance weld strength
04 p0526 A72-14839

Ceramic whisker and fiber reinforcement of metals, discussing manufacturing and testing problems
04 p0533 A72-15088

Directionally solidified Al-AlNi intermetallic eutectic composites creep tests, identifying time dependent fracture mechanism
05 p0678 A72-17114

High temperature tests of creep rupture strength of W composite cast with heat resistant alloy coatings
06 p0829 A72-17947

Tensile strength of tungsten reinforced nickel, determining temperature effect on fibers deformation after vacuum rolling simultaneously with plastic matrix
06 p0832 A72-18362

Compressive strength of Cu-W fiber metal matrix composite as function of temperature, comparing to cermets
06 p0832 A72-18363

Scanning electron microscope for metal matrix composite materials structure examination, emphasizing matrix behavior, filament under load and interface
07 p1011 A72-19485

Mechanical properties of fiber reinforced heat resistant alloys
07 p1013 A72-19743

Nichrome matrix composites with W and Mo reinforcing fibers
07 p1013 A72-19744

Tungsten alloy filaments as reinforcing agent of heat resistant composite chromium alloy, investigating long term high temperature effects
07 p1013 A72-19745

Heat resistant Nichrome composite alloy with tungsten filament reinforcement, discussing manufacture and mechanical properties at 1100 C
07 p1013 A72-19747

Steady state creep model for high activation energy role in interstitial formation and migration in particle strengthened alloys
08 p1185 A72-20992

Metallic matrix stress-strain properties from phenomenological model based on idealized behavior of system components, noting dependence on fiber volume content
08 p1185 A72-21183

Composite processing, adhesive formulary, bonding processes and mechanical properties of low void content autoclave molded polyimide graphite composite stiffened titanium alloy structures
08 p1193 A72-21687

Helically bound wire reinforced sprayed Al tubes and rings, investigating failure mechanism dependence on fracture modes from tensile and bending tests
09 p1330 A72-23174

Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickelide eutectic composite over range of solidification rates
09 p1330 A72-23376

Metastable austenitic steel fiber to increase Al matrix strength to density ratio and fracture toughness
09 p1331 A72-23385

Metal matrix composites deformation and mechanical properties prediction from component phases information, examining interface role, residual stress effect and thermal degradation
10 p1553 A72-24176

Elastoplastic analysis of unidirectional filament reinforced boron/aluminum and boron/epoxy composites under longitudinal loading, using finite element techniques
10 p1555 A72-24254

High strength steel strip reinforced aluminum, discussing fabrication techniques and mechanical properties
10 p1498 A72-24839

Compressive strength of Ti alloy airframe skin stringer panels reinforced with B-Al composite by brazing [AIAA PAPER 72-359]
11 p1729 A72-25387

B-Al metal matrix composites joining together and to Al and Ti, considering soldering, brazing, bonding and mechanical fastening [AIAA PAPER 72-360]
11 p1638 A72-25388

Space shuttle heat shield metallic refractory, superalloy and composite materials joining, discussing vacuum furnace brazing of Al/B matrix structures [AIAA PAPER 72-387]
11 p1638 A72-25408

Composite F-111 fuselage design, analysis and testing, considering graphite, boron and glass-epoxy and boron-aluminum systems
11 p1575 A72-25453

Fracture toughness of anisotropic heterogeneous filamentary boron/aluminum composites, correlating test results with acoustic emissions from filament breakage
11 p1672 A72-25470

Pendulum impact resistance of tungsten fiber-metal matrix composites, noting heat treatment and test temperature effects
11 p1653 A72-25473

B-Al composite mechanical properties improvement through heat treatment and steel addition
11 p1653 A72-25478

Off axis and transverse tensile properties of boron reinforced Al alloys, correlating metallurgical structures with stress-strain curves and fractographic studies
11 p1654 A72-25479

Fatigue crack initiation and growth in filament reinforced Al alloys, noting interface crack tip stress distribution effects
11 p1654 A72-25480

Critical aspect ratio of W fiber in copper matrix for stress rupture applications
11 p1654 A72-25482

Metal matrix composites, testing neutron irradiation effects on mechanical properties for nuclear application feasibility
11 p1654 A72-25483

High temperature metal fiber reinforced ceramic matrix composites for turbine vanes, showing strength toughness and crack depths dependence on interfacial bond [ASME PAPER 72-GT-51]
11 p1704 A72-25643

Tensile properties of continuously cast aluminum-carbon fiber composites, discussing fiber outgassing and metal coating for wetting promotion
11 p1659 A72-25859

Multilevel structural analysis for multilayered fiber-epoxy and metal matrix composites, using FORTRAN IV
11 p1601 A72-26033

Organic and metal matrix composites physical and mechanical properties and application to spacecraft and missile components, considering cost effectiveness
11 p1674 A72-26233

Young modulus of TiC-Co and TiC-Ni hard composites as function of volumetric fraction, using bending tests
11 p1660 A72-26487

Al alloy-graphite composites brazing and welding feasibility, tabulating spot welding parameters
11 p1641 A72-26491

Reinforcing fibers precise alignment and uniform distribution in metal matrix
11 p1645 A72-26854

Alloying addition effects on structural stability and particle-matrix cohesion in metal-alumina composites
11 p1665 A72-26864

Ordered growth and etching of uranium and zirconium oxide-tungsten fiber refractory composites, using X ray diffraction and scanning electron microscopy
11 p1668 A72-26943

Filament reinforced boron-aluminum composites multiple fracture behavior dependence on cross section geometry from tensile test
11 p1668 A72-26944

Metal matrix composites radiography in NDT, discussing parameters optimization and uses of microfilm, densitometers and high resolution vidicon tubes
12 p1813 A72-27199

Boron nitride coated boron fibers for metal matrix composite reinforcement, discussing surface nitriding process by heating
12 p1815 A72-28088

Metal matrix composites application to aircraft structures, describing design, analysis and fabrication of aircraft bulkhead with B-Al as main structural material 12 p1886 A72-28096

Resin bonded B-Al composites, discussing fabrication techniques and mechanical properties 12 p1815 A72-28098

Chemical interaction effects on single crystal sapphire filament strength in Ni and Ni alloy matrices during heat treatment in inert atmosphere 13 p1974 A72-28661

Fusion welding of Ti-W and Ti-graphite composites, determining weldability and effect of weld thermal energy on fiber matrix reactions 13 p1966 A72-29423

Diffusion kinetics and thermodynamic characteristics of solid phase interactions in systems cobalt-transition metal carbides 13 p1981 A72-30104

Dispersion hardening of Nb, Cr, Mo and W by inserting dispersed particles of refractory compounds into metal matrix 14 p2112 A72-30152

Aluminum-stainless steel and Ni-Mo composites prepared by dynamic hot pressing, determining bond strength between fibers and reinforced metal matrix 14 p2107 A72-30431

Refractory fiber metal reinforcement and matrix incorporation, considering SiC fiber reinforced Al 14 p2107 A72-30532

High temperature composite turbine blade materials, discussing service conditions and fiber/matrix selection, noting cast Ni and Mo based alloy fibers 14 p2125 A72-30533

Stress analysis of boron fiber-reinforced and isotropic Al panels under identical loading conditions 15 p2323 A72-31479

Steady state creep measurements of lead-phosphor bronze discontinuous fiber composites under nonuniform deformation, comparing to fiber and matrix alone 15 p2261 A72-32299

Steady state creep theory for discontinuous fiber composites, considering rigid and creeping fibers and sliding interface 15 p2261 A72-32300

Multifilamentary superconducting Nb-Sn composites wires in ductile metal matrix, determining transition temperature and critical current density 15 p2294 A72-32534

Temperature effect on bonding strength between ceramic whiskers or fibers and metal matrices attributed to thermal expansion coefficients disparity 16 p2413 A72-33206

Fracture-surface energy model for Cu-W fiber metal matrix composites, using plastic flow analysis 16 p2470 A72-33613

Plastic flow, yield strength and fracture of unidirectional Al-B fiber composite sheet under biaxial tension 16 p2411 A72-33821

Aluminum oxide high temperature equilibrium morphology in Ni matrix prepared via vapor deposition and internal oxidation methods 16 p2411 A72-33824

Thermal conductivity of W wire reinforced Cu as function of W content 16 p2411 A72-34017

Initial yield surface of a unidirectionally reinforced composite. [ASME PAPER 71-APMW-19] 17 p2623 A72-34301

One-dimensional wave pulses in steel-epoxy composites. [SESA PAPER 1945] 17 p2631 A72-34823

Ultrasonic wave propagation in metal-matrix composites. 17 p2560 A72-35287

Composites technology, costs and performance review covering metal matrix composites, ceramic reinforced plastics and whisker composites 17 p2571 A72-35652

Fractography of fiber reinforced metal composites. 17 p2560 A72-35654

Fracture of boron filaments in an aluminum matrix. 17 p2571 A72-35655

Sapphire filament mechanical property considerations of importance to Al2O3 reinforced metals. 17 p2572 A72-35658

Boron- and graphite-epoxy and boron-aluminum composites forming, processing and costs for aircraft structural materials 17 p2560 A72-35663

Fabrication of boron/aluminum tubes, I-beams, and other structural shapes from tape materials. 17 p2560 A72-35664

A preliminary investigation of joining methods for aluminum-graphite composites. 17 p2561 A72-35665

Fatigue of boron-aluminum and carbon-aluminum fibre composites. 18 p2701 A72-36625

Fracture behavior of stainless steel fibers in Sn-Pb alloy matrix. 19 p2820 A72-38373

The matrix fatigue behaviour of fibre composites subjected to repeated tensile loads - Application to B/Al 6061 composites. 20 p2936 A72-39208

Reinforced metals - Mechanical property considerations. 20 p2936 A72-39210

The transverse tensile properties of boron fiber reinforced aluminum matrix composites. 20 p2938 A72-39302

Production and properties of carbon fiber-reinforced aluminum 20 p2940 A72-39442

Problems and possibilities of the production of fiber-reinforced metallic components by thermal spraying 20 p2929 A72-39444

Mechanical properties of boron fiber reinforced aluminum matrix composite, describing experimental and control techniques 20 p2940 A72-39447

Prospects for the development of technically usable fiber-reinforced high-temperature materials 20 p2940 A72-39448

Transverse tensile properties of an unbonded model composite. 20 p2941 A72-39790

Interfacial characteristics of silicon carbide-coated boron-reinforced aluminium matrix composites. 20 p2941 A72-39791

The versatility of resistance welding machines for joining boron/aluminum composites. 21 p3060 A72-40847

Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures [ICAS PAPER 72-38] 21 p3120 A72-41163

Bursting strength and toughness of wire reinforced composite tubes under uniaxial/hoop stress. 21 p3120 A72-41208

Bursting of wire reinforced composite tubes under biaxial tension stresses. 21 p3121 A72-41209

Changes in the phase composition of metal-glass materials depending on the sintering temperature 21 p3073 A72-41370

Metal fiber composites electrical resistivity as function of fiber volume proportion, evaluating vacuum cast Cu/W 21 p3073 A72-41373

Book - Metal matrix composites. 21 p3070 A72-41528

Fabricating aluminum matrix composites. I - A survey of aluminum matrix composites. 22 p3182 A72-41996

Spectroscopic study of the interaction of oxides with metallic surfaces. II - SiO2-Fe/Cu, Al, Ni, Co, Ti, W/ systems 22 p3189 A72-42197

Stress-strain diagrams and fracture characteristics of fiber-reinforced aluminum alloys 22 p3189 A72-42300

Superconducting alloys of niobium and vanadium 22 p3191 A72-42808

Fabrication and properties of graphite fiber reinforced magnesium. 22 p3193 A72-43035

Optimization of the range of elastic behavior of unidirectional composites by prestraining. 22 p3194 A72-43041

Composite Al- and Ni-base alloys strengthened by B and W/Mo fibers respectively for reduced weight wing spars and high temperature applications 22 p3197 A72-43139

Calculation of radial pressures in metal-fiber-reinforced materials during compacting 23 p3298 A72-43277

High strength boron and boric fiber reinforced aluminum composites. 23 p3299 A72-43491

Effects of hydrostatic stress on the yielding of cold rolled metals and fiber-reinforced composites. 23 p3299 A72-43496

Aluminum matrix composites fracture mechanism dependence on static loading conditions and reinforcing filament type, investigating failure modes in tension and compression tests 23 p3299 A72-43497

Fracture mechanics of composites. 23 p3345 A72-43509

Microstructural aspects of the fracture of two-phase alloys. 23 p3299 A72-43510

Fiber reinforced metallic matrix composite under creep, discussing rigidity, stress distribution, rupture strength and failure time 23 p3306 A72-43727

Fibers-matrix force interaction effects in metal composites, analyzing stress-strain state of reinforced plate 23 p3306 A72-43728

Diffusive metal coatings stress-strain state effect on composite Mo material strength, ductility and creep characteristics 23 p3306 A72-43732

Heat resistant Ni-base composite stiffened with W wires, investigating interaction between alloy and fibers from metallographic and X ray diffraction microscopy data 23 p3301 A72-43740

Thermal diffusion annealing improved Ni-B composite electrolytic coatings with uniform B distribution over bulk matrix 23 p3303 A72-44012

Some strength characteristics of graphite/zirconium carbide composites 23 p3307 A72-44013

Making a product from composites. II. 24 p3412 A72-44556

Fracture of WC-Co from a continuum viewpoint. 24 p3413 A72-44815

Precise alignment and uniform distribution of fibres in a metal matrix. 24 p3413 A72-44898

Utilization of advanced composite materials for spacecraft and space shuttle applications. 24 p3417 A72-45153

Fiber and filament reinforcement of plastic and brittle matrix materials 24 p3414 A72-45276

The effect of annealing temperature on certain properties of molybdenum and tungsten fibers 24 p3415 A72-45396

Tensile strength of tungsten reinforced nickel, determining temperature effect on fibers deformation after vacuum rolling simultaneously with plastic matrix 24 p3416 A72-45749

Compressive strength of Cu-W fiber metal matrix composite as function of temperature, comparing to cermets 24 p3416 A72-45750

METAL OXIDE SEMICONDUCTORS

Low driving power resistive gate MOSFET microwave switch with performance approaching P-I-N diode 01 p0038 A72-10658

Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation 02 p0193 A72-12342

Failure modes of IC containing MOS devices, considering threshold voltage variations, oxide and silicon defects and leakage 02 p0194 A72-12443

Ferrite core memory for space flight devices, comparing 1 bit storage capacity power consumption with MOS cell [DGLR PAPER 71-090] 02 p0196 A72-12734

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution 02 p0196 A72-12761

Dual-gate MOS transistor structure, operational principles and electrical characteristics, noting suitable properties for use in low noise microwave amplifier 03 p0330 A72-12969

Two dimensional analysis of carrier circulation in MOS transistors for arbitrary polarization, including surface effects 03 p0330 A72-13166

Al, Mo and Cr radiation resistance as gate electrodes and corresponding MOS devices, discussing radiation behavior model revision 03 p0403 A72-14079

P-channel MOS devices radiation hardening by thermal silicon dioxide gate insulator optimization, applying to circuit fabrication 03 p0403 A72-14082

P-channel MOS/silicon-on-sapphire transistor logic circuits for aerospace systems, investigating radiation hardness and performance potential 03 p0334 A72-14086

LSI/MOS logic circuits radiation effects prediction from modeling studies of individual devices on test chip 03 p0334 A72-14087

Random access memory based on multichip array with MOS-bipolar device combinations by hybrid techniques, bypassing handling and cost limitations 03 p0329 A72-14185

MNOS transistors charge storage properties at high electric field strengths and current densities near gate insulator breakdown, determining reliable operating limits 03 p0336 A72-14277

Metal-alumina-oxide-semiconductor capacitor flat band bias voltage measurement before and after thermal stressing, noting potential barrier in structure model 03 p0336 A72-14278

MOS Si-gate arrays for static, dynamic and programmable read-only memories, investigating information storage reliability 03 p0336 A72-14282

N-channel MOS FET, measuring X ray irradiation effects on drain current and transfer characteristics at room temperature

05 p0634 A72-16033

MOS components technology with low threshold voltage, noting wafer surface planarity and smallness of parasitic capacitances and layer resistivity

05 p0702 A72-16181

N-channel Si MOS microwave transistor, discussing fabrication, design, power gain, stability, noise figure, equivalent circuit and applications

05 p0636 A72-16361

Si MOSFET substrate resistivity effect on surface state noise spectra

06 p0783 A72-17609

Electron irradiation effects on MOS structures at vlf, considering inversion layer cut-off frequency and surface state density

06 p0865 A72-17610

Microwave receiver double diffused MOS transistor /D-MOST/ device advantages over bipolar device

06 p0790 A72-18485

MOS inversion layer mobility theory and surface charge scattering mechanism

07 p0954 A72-19121

Switching characteristics of MOS channel transistors, solving nonlinear differential equations describing current and potential distribution

08 p1140 A72-21267

Junction and MOS FETs noise sources interaction with small signal model parameters and signal source admittance parameters, investigating amplifier If performance

08 p1141 A72-21428

MOS IC reliability based on p-channel enhancement mode transistors, discussing failure modes and mechanisms

08 p1142 A72-21588

Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation

08 p1143 A72-21948

Book on digital and analog monolithic IC systems, covering manufacturing methods, component design, MOS logic, arithmetic, error correction, codes, applications, etc

09 p1286 A72-23044

MOS transistor low level background flicker noise equivalent voltage relationship to gate voltage and input capacitance and interface state density

09 p1286 A72-23108

P-channel MOS transistor LF background noise components analysis for different dependencies on gate bias and temperature

09 p1286 A72-23109

Six channel integrated MOS switch, discussing MOS transistor operation and circuits structure

09 p1288 A72-23363

Burn in technique in nonvolatile metal oxide semiconductor /MOS/ memory using ionizing radiation of reprogrammable electron beam

10 p1443 A72-23927

Ion implantation doping of MOSFET and IC for wafer production, using automatic vacuum pumpdown and cycle control

10 p1447 A72-23950

Reliability prediction for MOS/LSI devices based on chip circuit configurations evaluation, extrapolating bipolar IC failure rate model

10 p1447 A72-24009

Homogeneous computing media, examining microelectronic fabrication, interconnection and control problems for MOSFET, bipolar transistors and IC structures

10 p1448 A72-24277

MOS transistor current fluctuation relation to capture centers surface density, energy position and gate potential, determining spectral amplitude distribution

10 p1449 A72-24284

Multichannel integral commutators with MOSFET as switching elements, calculating transmission errors

10 p1449 A72-24288

Statistical analysis of MOS integrated circuits from initial data of electrophysical and geometric distribution laws and covariance matrix

10 p1449 A72-24289

MOS transistor logic circuits pulse noise stability dependence on transient response, emphasizing supply voltage effect

10 p1449 A72-24290

MOSFET for input impedance measuring amplifier, discussing input stage temperature drift and protection from overvoltage

10 p1482 A72-24599

Radio electronic equipment IC and microelectronics development trends, considering bipolar and MOS transistors applications in digital and analog computers and telemetry

10 p1454 A72-25176

Complementary metal oxide semiconductor applications, noting device power dissipation, high noise immunity, good switching speeds and cost reduction

11 p1701 A72-26386

MOS specifications and application to shift registers, considering maximum ratings, clock pulse level and width and pulse rate

11 p1611 A72-26387

High performance low power complementary MOS memories based on silicon-on-sapphire technology, noting quiescent power dissipation

11 p1606 A72-26565

Integrated metal-nitride-oxide-silicon /MNOS/ semiconductor storage units characteristics, design and operation in FETs

12 p1791 A72-27574

P channel MOS transistors hardening against ionizing radiation based on positive space charge density and electrode injection efficiency

13 p2023 A72-29837

Two dimensional numerical solution of semiconductor steady state transport equations, applying to MOS and bipolar transistors

14 p2142 A72-30847

MOS transistor injection level dependent theory, calculating drain region saturation conductance by iterative procedure

15 p2205 A72-31318

MOS junction transistor turn-off behavior calculation based on model with carrier source and drain for channel formation

15 p2207 A72-31891

Physical phenomena limitations on MOS IC miniaturization, considering gate oxide breakdown, drain source punch through, doping fluctuations, power dissipation and metal migration

16 p2370 A72-34102

Advances in LSI technology.

17 p2527 A72-34569

Modularized digital controller for closed loop systems using MOS, MSI and LSI components

17 p2521 A72-34703

Advantages of MOS/LSI computers in avionics systems.

17 p2523 A72-35579

French monograph - Experimental characterization and analysis of the effect of ionizing radiation on the electrical properties of MOS transistors

17 p2531 A72-35650

Current and capacitance transient responses of MOS capacitor. I - General theory and applications to initially depleted surface without surface states.

18 p2718 A72-36346

Thermal effects in JFET and MOSFET devices at cryogenic temperatures.

18 p2666 A72-36453

Limitations in microelectronics. II - Bipolar technology.

18 p2667 A72-36980

Si MOSFET elementary channel resistances before saturation onset from one dimensional theory, investigating current noise

18 p2668 A72-37037

Charge injection into the gate dielectric of MOS transistors during junction avalanche.

18 p2668 A72-37104

Industrial production of high-quality active semiconductor components

18 p2670 A72-37123

Quality and reliability evaluation method for integrated circuits using MOS transistors - Option: Circuits on request

18 p2671 A72-37141

Development of a complementary MOS technology of high reliability

18 p2671 A72-37142

A measuring method for MOST transconductance and its variation.

19 p2773 A72-37901

An elegant method for measuring MOST drain-source conductance in the saturated current region.

19 p2773 A72-37902

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution

20 p2907 A72-39067

Measurements of the field-effect and effective mobilities in MOS transistors.

20 p2907 A72-39272

A precise method for measuring low-frequency small-signal conductance parameters of an MOS transistor.

20 p2907 A72-39273

Differential negative resistance /DNR/ in n-channel MOSFETs of silicon.

20 p2961 A72-39711

Technology and performance of n-channel MOS-LSIs using depletion-type load elements.

20 p2961 A72-39712

Some results of testing M.O.S. transistors at elevated temperatures.

20 p2909 A72-39774

Mathematical model for MOS transistor circuit analysis, noting parameters measurement and environmental effects representation

20 p2909 A72-39783

Hybrid monostable delay circuit based on bipolar and low threshold voltage MOSFET transistor

20 p2910 A72-39788

Analysis of the characteristics of an MOS transistor as a switching element

21 p3025 A72-40163

The effects of X-ray irradiation on MAS diodes.

21 p3032 A72-40695

Carrier transport and storage effects in Au ion implanted SiO₂ structures.

21 p3097 A72-40699

Conductance associated with interface states in MOS tunnel structures.

21 p3032 A72-40701

The distribution of gate-channel capacitance between source and drain in the equivalent circuit of a MOS transistor

21 p3035 A72-41490

Forward and reverse characteristics of self-aligned double-diffused M.O.S. transistors.

22 p3160 A72-42754

MOS logic circuit design simplification by replacing series and parallel transistor networks by equivalent single transistor inverter circuit

23 p3271 A72-43843

Capacitance voltage characteristics instability of metal-aluminum oxide-silicon dioxide-silicon /MAOS/ structures, suggesting polarization effect in layer formed during deposition and annealing

23 p3324 A72-44070

On the determination of minority carrier lifetime and surface recombination velocity from the transient response of MOS capacitors.

23 p3324 A72-44071

Metal-oxide varistor - A new way to suppress transients.

23 p3272 A72-44100

Dependence of MOS transistor parameters on carrier mobility

23 p3272 A72-44139

MOS devices instability caused by water and hydroxyl molecules on silicon dioxide surface, noting optimal conditions for chemical stabilization

24 p3431 A72-44821

Circuit analysis and operation of analog multipliers with MOSFET, applying to industrial automatic control systems and measuring instruments

24 p3384 A72-44896

Shielded silicon gate complementary MOS integrated circuit.

24 p3385 A72-44972

Characteristics of P-channel MOS field effect transistors with ion-implanted channels.

24 p3385 A72-44981

METAL OXIDES

NT ZIRCONIUM OXIDES

Metals and metal oxides powders mixture formation by mixed metal halides gelation in alcohol solution

02 p0233 A72-11455

Niobium anomalous oxidation below 600 C, noting suboxide formation between solid solutions and heat resistance reduction

02 p0243 A72-12214

Fine scale surface oxide film roughness effects on metal substrate-oxide film system hemispherical emittance

02 p0303 A72-12319

Transition metal oxides hot extrusion sintering, discussing temperature and pressure effects on compacting density

02 p0244 A72-12349

Refractory metal oxides hot microhardness and thermal stability over wide temperature range, noting softening rate variation with temperature
02 p0244 A72-12350

Metal oxide powder surface measurement using modified Kozeny-Karman formula, considering porous space, gas kinetic slip and air permeability effects
05 p0665 A72-16087

Hot pressing of sintered refractory metal oxide powders of Ti, Zr, U, Nb and Cr, showing improved compacting by raising temperature
06 p0822 A72-18427

Formation kinetics, phase composition and structure of oxide films in binary and ternary iron-base chromium aluminum alloys, studying hydrogen penetration characteristics
07 p1013 A72-19771

Catalytic action of metal oxides on isopropylbenzene hydroperoxide decomposition in liquid phase
08 p1129 A72-22094

Hubbard mathematical model for metal-insulator transition due to electrons correlations, noting schematic phase diagram and transition metal oxides
10 p1527 A72-24939

Book on binary metal oxides covering non-stoichiometry, electrical conductivity, diffusion theory, point defects, high temperature creep and electrochemical transport properties
10 p1527 A72-25075

Zirconium rich metal oxides mineral group in Apollo 14 and 15 lunar rocks from feldspar-phryic basalt and pyroxene ferrobasalt, noting optical and chemical properties
11 p1717 A72-25868

Transition series oxides metal-insulator phase transition based on electron phonon interaction model
11 p1701 A72-26024

Metal surface smoothing during electrochemical dissolution prior to polishing, involving electrolyte diffusion processes or semiconductor oxide film formation
11 p1640 A72-26259

Oxide content and sheet microstructure directionality effects on Be powder and ingot sheets notch strength, noting thickness dependence
[ASM PAPER W-72-12.6] 12 p1830 A72-28164

Oxide thin films effects on surface layers deformation and wear resistance of coated metals under friction, noting electrical resistance changes in annealing
12 p1818 A72-28189

High refractory gadolinium oxide-strontium oxide system phase diagram and transition temperature by X ray and differential thermal analyses
13 p1984 A72-30109

Conditions for obtaining high porosity materials of complex carbides by combined reduction-carbideization of metal oxides with soot in vacuum
13 p1967 A72-30114

Chain reaction mechanisms of fuel combustion in presence of metal oxides for ores reduction application
15 p2335 A72-31850

Oxide inclusions induced reductions in Nabarro-Herring creep and sintering rates of metals, discussing effect of inclusions diffusional mobility in metal matrix
15 p2257 A72-32112

High temperature oxide scale adherence on Fe-Cr-Al alloys with Y or Sc additions as promoting agents
16 p2410 A72-33817

The formation of metal-oxygen compounds for additive thermionic converters.
17 p2595 A72-34600

Chemical composition, refractivity and temperature dependence of blackness levels of aluminum oxide-chromium oxide-phosphorus oxide ceramic coatings flame sprayed on steel
21 p3072 A72-40384

Vapor phase formation during high temperature oxidation.
21 p3066 A72-40551

Phenomena and interpretation of the transients caused by temperature change on capacitance of metal-oxide-metal systems.
21 p3097 A72-40690

Excess metal buildup kinetics and work function of oxide thermionic cathode activated by emission current, noting effect of metal and oxygen concentrations
21 p2997 A72-40789

Growth rate of refractory oxide particles in nickel cermets
23 p3299 A72-43290

METAL PARTICLES
NT METAL POWDER
NT POWDERED ALUMINUM
Argon-hydrogen plasma seeded with submicron tungsten particles, measuring composition, temperature, radiant heat output and opacity
01 p0112 A72-11343

Mechanical constraints effects on loose spherical metal particles sintering rates, considering one, two and three dimensional arrays
02 p0232 A72-11433

Focused laser beam interaction with liquid metal particles, discussing fluid phase light screening effect,

droplet evaporation and mass expulsion characteristics
03 p0368 A72-13668

Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations
08 p1232 A72-21152

Maximum volatile solute vaporization escape prior to droplet solidification during metal vapor chemical release process
08 p1128 A72-21618

Ignition delay time and combustion mechanism of Al-Mg alloys single particles in combustion products of oxidizer-fuel mixture
09 p1373 A72-22885

Visual and motion picture studies of ignition and burning characteristics of Mg particle clusters in flames of gas mixtures
09 p1411 A72-22886

Pressure effect on combustion rate of Mg particles in water vapors
09 p1411 A72-22887

Burning process of low boiling Mg particle moving in relation to gaseous oxidizer, assuming heat and mass transfer occurrence by diffusion-conduction mechanism
09 p1411 A72-22888

Ignition and incendiarity of laser irradiated single micron size Mg particles suspended in stoichiometric methane air mixture
10 p1564 A72-25140

Phase structure of Cr rich Cr-Ni, Cr-Fe, Cr-Co and Cr-Ni-Fe alloy particles produced by evaporation in Ar using X ray diffraction
13 p1974 A72-28660

Metal particle decomposition products composition in slags from smelted Cr, Ti, Ni and Zr alloys, using X ray microanalysis
14 p2112 A72-30157

Reaction rate and activation energy of low temperature oxidation of Mg particles in nitrous oxide
16 p2476 A72-33253

Mg ignition in nitrous oxide at 600-800 C, determining induction period as function of particle mass and gas stream temperature
16 p2476 A72-33254

Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations
20 p2969 A72-39257

Heavy metal particle detection in noctilucent clouds by rocket experiments, using Pandora inflight shadowing technique
20 p2964 A72-39373

Condensed zinc particle size determined by a time discrete sampling apparatus.
20 p2913 A72-39608

Induction period, particle size distribution and medium temperature effects on thermal ignition of metal particles under exothermal oxidation reaction on surface
20 p2987 A72-40040

Electron diffusion across a shock wavefront in metals
22 p3208 A72-43184

METAL PLATES
Dynamic and plastic behavior of mild steel and Al wide beams and rectangular flat plates
02 p0291 A72-11964

Al and steel plate penetration, perforation and fragmentation under hard steel sphere impact at and above ballistic velocities, investigating velocity and strain histories
05 p0672 A72-16115

Dimpling behavior of metal plate with mode I edge crack, relating flaw depth, applied stress level and crack tip plastic zone
05 p0673 A72-16305

Environment acoustic resonant frequencies effect on flat steel plate vibration under direct and air flow vortex shedding excitations
06 p0894 A72-17768

Two dimensional dynamic thermal stresses in Al plate, allowing for Newtonian surface heat transfer
06 p0899 A72-18642

Al alloy plates and D-nosed specimens indentation and penetration under hail impact test
07 p1086 A72-18764

Acoustic loads effect on carrying capacity and vibration stability of longitudinally stiffened cylindrical metal panels, investigating fatigue strength and stress-strain state
07 p1091 A72-19760

Hypersonic gas flow around asymmetric triangular metal plate with blunt leading edges, using two layer model
07 p0909 A72-19985

X ray and resistance strain gage techniques for bar and metal plate simultaneous residual stress determination
07 p0993 A72-20606

Electrode vertex angle effect on fused weld bead geometry related to plate thickness in tungsten inert gas (TIG) welding
09 p1320 A72-23634

Thick steel plate diffusion welding in air with dead-weight loading and autogenous surface cleaning
11 p1637 A72-25343

Electron beam machine for thin metal plates welding and cutting under space conditions, noting design features and performance
11 p1639 A72-25809

Schlieren visualization of radiated wave fronts for Al plates illuminated with short acoustical pulses in water, comparing with Lamb theory
11 p1687 A72-26057

Al alloy plate material microstructural variations and specimen orientation effects on tensile and fracture toughness properties
12 p1830 A72-28080

Cumulative damage and structural changes in friction contact areas of steel plates under cyclic pulsed loads, noting microhardness distribution and surface layers microstructure
12 p1818 A72-28191

Surface roughness effects on seizure and friction of contacting metal plates under atmospheric pressure and vacuum
12 p1819 A72-28197

Mechanical properties of thick Be plate produced by diffusion bonding of thin sheets from ingot material
13 p1973 A72-28655

Fluid jets formation in collisions between metal plates for large angles at subsonic velocities
13 p1963 A72-28771

Powder combustion on metal plate at constant pressure based on two-phase model of condensed system thermal decomposition
13 p2065 A72-29879

Lamb acoustic surface wave method for rapid non-destructive evaluation of rolling texture in arbitrarily thick metal sheets and plates
14 p2107 A72-30615

The apparent heat transfer coefficient of plate heat exchangers
20 p2984 A72-39649

Experimental investigation of the stability of compressed heated three-layer plates beyond the proportional limit
20 p2981 A72-39920

Fluid jets formation region in subsonic collisions between metal plates at large angles
21 p3059 A72-40262

Stress-strain state of thin circular perforated Cu plate under uniform tensile load, showing applicability of small elastoplastic finite deformation theory
21 p3122 A72-41351

Mechanical properties of titanium strengthened by monodirectional molybdenum wires
21 p3069 A72-41354

Metal barrier maximum puncturable thickness dependence on high velocity meteorite particle impact parameters
22 p3234 A72-42217

Chladni's patterns for random vibration of a plate.
22 p3236 A72-42758

Energy measurement of primary particles from shower formation in solids, discussing ultrasonic waves generation in metal plates and electromagnetic waves excitation in ferrites
23 p3291 A72-44437

Non-steady shock waves in metals with phase transitions and hardening by explosion.
24 p3414 A72-45025

METAL POLISHING

NT ELECTROPOLISHING

METAL POWDER

NT POWDERED ALUMINUM

Chloride process produced tungsten powder for tungsten carbides production, discussing impurities, particle shape and size distribution, carburization behavior and applications
02 p0239 A72-11427

Ti-Al-V alloy powders electrically activated pressure sintering /spark sintering/, considering mechanical properties and economic factors
02 p0240 A72-11428

Dislocations forces during sintering of loose and cold-pressed metal powders, using photoelasticity for stress estimation and electron microscopy for defects structure
02 p0232 A72-11430

Metal powders sintering activation mechanism, considering heterogeneous metals particles diffusion flow, mutual solubility and crystal lattices distortion
02 p0232 A72-11432

Hot formed Cr-Ni-Mo and Ni-Mo prealloyed steel powders fatigue and toughness properties, determining hardness effects by varying draw temperature from 400 to 1000 F
02 p0240 A72-11435

Melting atmosphere, atomizing media and consolidation techniques effects on Co base alloy powder products physical properties
02 p0240 A72-11436

Ti powder technology, discussing pressed and sintered parts, forging and extrusion preforms and composites

02 p0233 A72-11437

High energy rate compacting methods in powder metallurgy, considering use of high explosives in water or air and impulse pressing of metal powders

02 p0233 A72-11438

Hot pressed Ti alloy powders, evaluating strength and toughness at cryogenic temperatures

02 p0240 A72-11439

Holes dispersion hardening in sintered metal powder, discussing dispersed particle effects

02 p0233 A72-11446

Metals and metal oxides powders mixture formation by mixed metal halides gelation in alcohol solution

02 p0233 A72-11455

Coextrusion of metal powder and ceramic dispersions clad alloyed Al as function of cartridge density and reactor core length

02 p0233 A72-11456

Matrix hardening in dispersion strengthened powder products, discussing dispersion, grain boundary and solid solution hardening

02 p0241 A72-11457

Material characteristics effect on compaction behavior of metal powders, stressing density and pressure measurements

02 p0242 A72-11460

Presintering effects on dimensional change of iron powder compacts, using dilatometric, thermogravimetric, differential thermal analyses and resistivity measurements

02 p0233 A72-11461

Sintering and heat treatment effects on mechanical properties of atomized and mixed powders of Ni-Mo steel

02 p0234 A72-11462

Oxygen determination in cemented carbides, metal powders and presintered and finished sintered products by vacuum fusion method, comparing with neutron activation method

02 p0245 A72-12548

Superalloy compositions prealloyed powders strengthening by secondary gamma phase precipitation, noting high temperature strength without ductility loss after thermomechanical treatment and aging

02 p0247 A72-12856

Metal powder materials at high loading rates, obtaining stress state diagram from Cauchy problem solution with inertia components in equilibrium equations

05 p0672 A72-16088

Temperature and compression rate effects on metal powder packing density, obtaining activation energy from Boltzmann equation

05 p0665 A72-16089

Metal powder hot compacting under vacuum and ultrasound action, considering porous body three dimensional viscous flow

05 p0665 A72-16091

Quality control of powdered metal parts, considering chemical, atomization, electrolytic and mechanical production stages, tool inspection and test patterns

06 p0822 A72-18070

Titanium powder metallurgy in ordnance applications, discussing hardware, weight economies and market development

06 p0822 A72-18071

Hot pressing /extrusion/ of rods from metal-ceramic Ti, using pure and cermet powders with tungsten carbide

06 p0822 A72-18426

Fe powder preform hot rolling, investigating mechanical properties, microstructure and internal oxidation resistance as function of final density

10 p1488 A72-24695

Slip casting process for ceramics, cermets and metal powders, discussing slurry preparation, deflocculating agents, binders and molding process

10 p1502 A72-24733

Thermal conductivity of two- and three phase solid mixtures of silicone rubber and Al, Pb, Ni and Bi powders, using line source method

11 p1744 A72-25264

Mercury porosimetry for iron powders void and internal particle porosity change as function of compacting pressure, noting compressibility improvement by precompacting and annealing

11 p1639 A72-25828

Russian book on powdered metals toxicity covering industrial dust, physiological effects, safety standards, electron configurations and crystalline structure

11 p1584 A72-26067

Iron base powders material requirements and forging processes, discussing powder composition, inclusions effect and preform densification

11 p1639 A72-26241

Ni powder artificial dielectric in waveguide transverse magnetic field, noting nonreciprocal nature of microwave attenuation and phase shift

11 p1607 A72-26786

Metal powder mixing, examining friction effects and optimal particle sizes, shapes and amounts

11 p1642 A72-26828

Refractory metal powders spherical agglomerates growth and strength in rotating tumbler, noting particle size dependence on binder

11 p1643 A72-26829

Continuous hot pressing of high density reactive ceramic and metal powder materials in alumina die

11 p1643 A72-26832

Explosive compaction of metal powders by direct method with emphasis on W

11 p1643 A72-26833

Mo powder sintering kinetics and disperse mechanism in isothermal and nonisothermal conditions

11 p1643 A72-26836

Microstructural properties of Ni-Al powder synthetic material from transmission and photoemission electron microscopy, discussing low and high temperature strength characteristics

11 p1645 A72-26855

High melting point alloy and metal powder production by vacuum atomization, using rotary vane and electron beam melting techniques

11 p1645 A72-26860

Chemical and physical activation mechanisms of sintering metal powder compacts

11 p1645 A72-26862

Fracture micromechanism in liquid-phase sintered W-Fe-Ni powder composites, using scanning electron microscopy

11 p1668 A72-26942

Oxide content and sheet microstructure directionality effects on Be powder and ingot sheets notch strength, noting thickness dependence

[ASM PAPER W 72-12.6] 12 p1830 A72-28164

Optimization of high temperature supersonic gas jets for metal powders production by melts atomization, discussing excess air ratio effect on gas parameters

13 p2025 A72-29133

Iron powder specific surface and particle size effect on shrinkage during sintering

13 p1966 A72-29800

General analysis and synthesis of alloys and materials with inhomogeneous physical properties, noting thermal physicochemical methods for laminates and metal powders

16 p2405 A72-33095

Notch sensitivity of sintered stainless steel powder as function of density from application of sharp crack fracture mechanics methods to plane strain fracture toughness

16 p2408 A72-33700

Electric spark activated hot pressing application for sintered composite structures, noting process parameters optimization for superalloy powders

16 p2411 A72-34093

The dry wear behaviour of porous cobalt

18 p2696 A72-36795

Hot forging of sintered stainless steel

19 p2815 A72-37592

Deformation, densification and material fracture characteristics for powder preform design for hot forging

19 p2806 A72-37593

Characterization of commercial titanium powders

19 p2815 A72-37595

Creep of porous nickel in oxidizing and neutral media

19 p2819 A72-38287

Strength properties of highly porous materials made of metallic fibers

19 p2820 A72-38288

Chromium-based powdered alloys used in highly alloyed steel welding

19 p2809 A72-38289

Mg-Al powder mixtures sintering and coining, describing fabrication procedure, microstructure and mechanical properties

21 p3067 A72-40832

Ferromagnetic tau phase structure of Mn-Ac alloy with powder anisotropy related to platelet formation and twinning orientation

21 p3068 A72-40965

Phase diagrams, microhardness and composition of sintered binary B compounds with Zr, Hf, Ta, Cr, Mo, W, Re, Fe, Ni, and Si

21 p3070 A72-41371

Particle temperature and flight velocity during gas-powder buildup

22 p3182 A72-42194

Gas permeability of high-porosity nickel cermet

22 p3188 A72-42196

Rotational hysteresis in single crystals of powdered nickel

22 p3192 A72-43011

German monograph - Contribution to the investigation of the fatigue strength of sintered iron

22 p3194 A72-43066

Iron-nickel-molybdenum carbonyl powders

23 p3298 A72-43276

Study of the process of powder knurling to articles

23 p3292 A72-43279

Characteristics of the state of particles of titanium and vanadium mononitrides after nitriding and heat treatment

23 p3298 A72-43282

Magnetic properties of the powders of highly dispersed iron-cobalt-nickel alloys

23 p3299 A72-43288

Thermophysical properties of highly porous thermochemically treated metal-ceramic iron

23 p3299 A72-43295

Influence of the nature of the particle distribution of the hardening phase in powders on the thermal stability of dispersion-strengthened nickel

23 p3302 A72-44011

Pores visualization in porous materials by liquid filling and subsequent solidification and basic material removal, observing porous samples of sintered W and nichrome powders

23 p3290 A72-44016

METAL PROPELLANTS

Metallized solid propellants burning rate augmentation by internal ballistics effect of spinning rocket motor, deriving relationship between burning rate, pressure level and acceleration

13 p2025 A72-29302

METAL SHEETS

Coextruded Be fiber-Ti alloy matrix composite sheets for light weight structures, describing ultrasonic inspection and mechanical properties

01 p0084 A72-10734

Fe, Ni and Co based high temperature thin gauge sheet alloys, discussing chemical and mechanical properties, fabrication and availability

01 p0084 A72-10742

Endurance tests of D16AlMo alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading

03 p0371 A72-13470

Strain gage measurements of stress intensity factor for crack propagation in fatigue cracked thin metal sheets

03 p0444 A72-13542

Sheet metal biaxial creep testing, using edge clamped circular diaphragm deflected by lateral hydrostatic pressure

03 p0373 A72-13649

Lamellar tearing and testing of steel sheets in direction of short side by Brodeau test

04 p0527 A72-15561

Bend tests for minimum radius/thickness ratio of Ti and Be alloy sheets in pressurized fluid

[ASME PAPER 71-WA/PT-8] 05 p0671 A72-15913

Crossing points computed curves from metal sheet response to pulsed eddy currents, suggesting independent lift-off distance variation possibility

05 p0666 A72-17049

Al sheet weld cracking, discussing hold-down, localized heating, welding speed and gap effects

06 p0820 A72-17702

Cr and U contents effect on high strength Cr-Mo-Va alloy steel sheet hot cracking susceptibility, using Huxley test method

06 p0820 A72-17704

Stress fields around moving weld arc on Al sheet from isotherm map, calculating compressive and tensile stresses from heat induced material expansion

06 p0820 A72-17705

Crystallographic texture of Mo sheet, analyzing angular dependence of Young modulus

06 p0832 A72-18366

Steel sheet creep, plastic deformation and service life under temperature and stress cycles

06 p0899 A72-18558

Temperature dependent directional differences of modulus of elasticity of Mo sheet, using resonance technique

06 p0833 A72-18632

Sheet metal fatigue test method for transverse 100-1000 Hz bending at normal and high temperatures, applying to 1.5 mm Ti alloy sheet

06 p0900 A72-18671

Spot and seam welding of Cr ferritic stainless steel thin sheets, discussing electric current loading in relation to sheet thickness and contact pressure

07 p0995 A72-19575

Vacuum hot press diffusion welding of nickel-chromium-thorium dioxide sheet, describing specimen preparation, welding procedure and welded joints photomicrographic microstructure

07 p0997 A72-20002

Plasma beam cutting of Al sheets, discussing heat effect on surface oxides and microstructure and plasmagenic gas influence

08 p1176 A72-21047

Ar-H microplasma welding of thin Cr steel sheets with narrow seams for aircraft engines and precision equipment casings

09 p1318 A72-22548

Optical mirror method for bending strains study in welding cycles with applications to sheet metal thermal stress strain rates

09 p1318 A72-22738

Metal inert gas (MIG) welding of thin sheets, using Si controlled rectifier power source

09 p1320 A72-23627

Ti alloy sheets diffusion brazing, describing chemical cleaning, auxiliary metal cladding, heating and pressure augmented fusion processes involved in high quality joints production

10 p1497 A72-24658

Beryllium sheet and foil application to lightweight space structures, discussing mechanical properties [AIAA PAPER 72-404]

11 p1726 A72-25425

Surface textures in rolled Al sheets, investigating friction and reduction

11 p1638 A72-25509

Elastic r-value variation in Ti sheet from direct measurement of width and thickness strains

11 p1659 A72-25895

Thermal conduction anomalies and electron phonon interaction in thin metallic sheet at low temperatures

12 p1888 A72-27182

Oxide content and sheet microstructure directionality effects on Be powder and ingot sheets notch strength, noting thickness dependence [ASM PAPER W 72-12.6]

12 p1830 A72-28164

Plane plastic deformation during single pass rolling of corrugated metal sheet, determining stress-strain fields for first and second passes

13 p1964 A72-29148

Iron content and stress level effect on flaking corrosion of Al alloy sheets, describing experimental technique

13 p1980 A72-29826

Flat Ti alloy sheet creep under variable loads at 300-400°C, comparing prediction with test data

14 p2116 A72-30434

Lamb acoustic surface wave method for rapid non-destructive evaluation of rolling texture in arbitrarily thick metal sheets and plates

14 p2107 A72-30615

Shock heating caused material phase transformation effects on bumper shield performance, studying thin metal sheets response to like-material spheres impact

14 p2168 A72-30921

Deep drawing of circular mild steel and aluminum sheets with polyurethane or rubber rings, examining strain distribution, shape and surface roughness

15 p2244 A72-32145

Anelastic damping of cold worked Nb sheet as function of vibration frequency, temperature, rolling rate and oxygen content

15 p2258 A72-32638

Deformation modes for deep drawing of extramild steel sheets, noting susceptibility and rupture criteria

16 p2396 A72-32872

Lamb wave technique for bond strength testing of laminated or clad metal sheets, calculating displacement and stress dispersion and amplitude distribution for different modes

16 p2391 A72-33230

German papers on crack propagation in metal sheets, resonant vibration of cylindrical shells and stress concentration in plastic plates

16 p2470 A72-33676

Crack propagation in Al-Cu-Mg alloy sheet under vibratory bending loads, noting crack length to loading cycles number relationship

16 p2408 A72-33677

Material thinout in deformed metal sheet specimens under explosive forming, using air cell effect

16 p2399 A72-33775

Ways of reducing porosity in argon-arc welding of thin titanium sheets.

18 p2695 A72-36428

Techniques to curb static austenite recrystallization rate in martensitic steel during high temperature thermomechanical treatment through minute Ti or Zr additions

18 p2701 A72-36702

Fabrication of Hastelloy B sheet by powder metallurgy using blends of elemental powders and homogenization/deformation processing.

19 p2815 A72-37596

Optimization of thermo-mechanical deformation parameters for Ti-6Al-4V.

19 p2821 A72-38385

Fe-Ni sheet with austenitic cube texture by rolling and annealing, investigating plastic deformation during martensitic transformation

21 p3065 A72-40090

Sheet metal economics in aircraft construction based on strength/weight and stiffness/weight comparison of Al alloys and Ti alloys in relation to cost and structural weight considerations

21 p3060 A72-41071

Influence of the cycling frequency and directional anisotropy on the fatigue strength of AMg6BM aluminum-alloy sheet

21 p3070 A72-41356

Influence of stress raisers in the form of circular holes on the endurance in symmetric bending of AMg6BM aluminum-alloy sheet

21 p3071 A72-41704

Composite materials obtained by depositing boron layers under vacuum on aluminum sheets

22 p3190 A72-42646

On the diffusion of a load from a semi-infinite stringer bonded to a sheet.

22 p3238 A72-42833

Studies on sizes and shapes of tensile test specimens for thin sheet materials of aluminum alloys.

22 p3195 A72-43125

Al alloy sheet panel tests for cracks emanating from stress concentration areas at holes or cutout edge

23 p3347 A72-43713

Width/thickness ratio effect on steel, brass and molybdenum sheet specimens plasticity and deformation under tension at room temperature

23 p3301 A72-43758

Experimental and theoretical study of the fracture of sheet materials in the presence of cracks

23 p3349 A72-43958

Structure of the 01420 alloy with zirconium

23 p3303 A72-44094

Fatigue crack closure at positive stresses.

24 p3457 A72-44819

Endurance tests of D16AMO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading

24 p3414 A72-44945

Hydraulic sand blasting and annealing effects on Ti alloy sheet bending fatigue strength

24 p3416 A72-45744

Crystallographic texture of sheet Mo alloys, analyzing angular dependence of Young modulus

24 p3416 A72-45752

METAL SHELLS

Elastoplastic stress distribution in thin spherical metallic shells with cylindrical branch pipe under internal pressure

03 p0448 A72-13905

Plastic strain and rupture characteristics of thin walled tubular Ni samples under complex loading and biaxial tension

04 p0588 A72-15058

Approximate buckling load of orthotropic hyperbolic paraboloid metal shells, using energy approach

06 p0897 A72-17970

METAL SPRAYING

Problems and possibilities of the production of fiber-reinforced metallic components by thermal spraying

20 p2929 A72-39444

Particle temperature and flight velocity during gas-powder buildup

22 p3182 A72-42194

METAL STRIPS

Flattening, heat treatment and machining of narrow rectangular vacuum melt Mo strips for microwave devices

01 p0078 A72-11087

Thermomechanical conditions of plasticity-to-brittleness transition temperature for optimal rolling of cermet W strips

01 p0078 A72-11088

Equivalent dielectric properties of infinite two dimensional periodic metal tape structures in presence of electromagnetic waves propagating in various directions

05 p0628 A72-16410

Metal strip with circular hole under tension, calculating plastic strain and stress concentration coefficients

06 p0899 A72-18567

Stress-strain characteristics of metal ductile filaments with elastic brittle coatings, noting strengthening effect on anodic oxide coated aluminum

09 p1330 A72-23379

Dynamic stress concentration of notched strips.

21 p3117 A72-40715

Magnetic properties and texture of a thin strip of nickel-iron-molybdenum alloys

22 p3192 A72-43012

METAL SURFACES

Extruded anodized AlMgSi alloy matrix precipitate surface defects, noting wood grain effect, segregated bands, microstructural stains and heterogeneous zones

01 p0077 A72-11042

Extruded AlMgSi alloy manufacturing conditions effect on strength, surface finish and anodized appearance, discussing evenly distributed fine hardening precipitates, metal purity, etc

01 p0077 A72-11043

Breakdown surfaces of thin Ti alloy specimens under tension as function of composition and heat treatment temperature

01 p0088 A72-11079

Metal-semiconductor-metal Schottky barrier microwave diode impedance and shot noise calculation

02 p0191 A72-11894

Fine scale surface oxide film roughness effects on metal substrate-oxide film system hemispherical emittance

02 p0303 A72-12319

Ductile metal surface erosion by hard abrasive grains striking at grazing angles

03 p0373 A72-13650

Surface potential effects on splitting of p- and d-orbitals of atoms and ions approaching bcc and fcc substrates

03 p0393 A72-14340

Intermittent ion emission enhancement from tungsten surface in He-W field-ion microscope upon Ne addition to imaging gas

04 p0552 A72-14547

Dry heat resistance of bacillus spores on spacecraft metal surfaces for different pressures, atmospheres and materials

04 p0475 A72-15261

Filmform corrosion of steel, magnesium and aluminum coated and uncoated surfaces in humid and corrosive atmospheres

04 p0536 A72-15735

Scattering of arbitrarily impinging monochromatic electromagnetic waves by thin infinitely long isotropic, dielectric and metal rods of elliptic cross section

05 p0628 A72-16412

Smooth curved metal surfaces thermal conductance at high vacuum, verifying contacting surfaces plastic deformation

05 p0666 A72-16868

Elastic-plastic strain measurement on flat steel surfaces by moiré gratings, using electroluminescent source and crossing jig

06 p0818 A72-18323

Sputtered molybdenum disulfide lubrication on polished metal surfaces with low friction coefficient, strong adherence, high density and small particle size

06 p0824 A72-18607

Exoelectronic emission method for examining deformation induced structural changes and interactions with ambient medium of metals and alloys surfaces

07 p0989 A72-20157

Solid lubricant additives effects in oils and fats, discussing molybdenum disulfide and zinc pyrophosphate solid film formation on metal surfaces under contact friction conditions

07 p1024 A72-20395

Phase composition changes, crater formation and metal ejection during erosion by pulsed laser beam

07 p1009 A72-20610

Surface structure changes in metal worked by electroerosion, discussing temperature and electrical tension effects

08 p1174 A72-21036

Metal structure effect on anodic dissolution and surface microgeometry formation during electrochemical machining

08 p1175 A72-21040

Mechanical surface strengthening effect on small cycle fatigue life of Ti alloy weakened by stress raiser

08 p1186 A72-21725

Soviet book on temperature resistance of lubrication boundary layers and solid lubrication coatings during friction of metals and alloys

08 p1179 A72-22023

Corrosion tests by ellipsometer, discussing apparatus design and bare metal surface and thin film properties

08 p1172 A72-22110

German monograph on lattice and solid metal surface transport processes, discussing atom migration, activation energies, impurity atom diffusion, Kossel-Stranski model, etc

08 p1212 A72-22173

Amorphous chromate and phosphate conversion coatings of Al, providing inert surface for painting

09 p1317 A72-22480

Loading path effect on yield surfaces of pure Al at elevated temperatures under tension

09 p1328 A72-22993

Local level filling and Fermi distribution in metal semiconductor contact as function of voltage and level location

09 p1372 A72-23355

High intensity laser radiation absorption in plasma produced from thick metal targets and thin Au foil

10 p1490 A72-23967

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc

10 p1487 A72-24488

Metal adhesive forces to clean Fe surface measured with LEED and Auger emission spectroscopy, noting binding energy correlation to oxygen

10 p1497 A72-24821

Hail damage to aircraft, predicting metal surfaces dent depth and deformation shape with computer program

11 p1574 A72-25370

Test assembly for Brinell microhardness measurements of metal and alloy surfaces under tension during vacuum heating and in protective gas media

11 p1612 A72-25490

Hardcoat anodizing of Al surfaces, discussing preparation, racking, equipment and post treatments [SAE PAPER 720341]

11 p1638 A72-25598

Computational technique for crack growth prediction in metal subjected to variable amplitude cyclic loading, taking into account yield zone ahead of crack tip

11 p1735 A72-25876

Metal surface smoothing during electrochemical dissolution prior to polishing, involving electrolyte diffusion processes or semiconductor oxide film formation
11 p1640 A72-26259

Metal surface layer and microetching process along grain boundaries during electrochemical precision processing, verifying steel microcrack depths with mathematical model
11 p1640 A72-26260

Ti alloys processability by electrochemical method, showing output rate and surface quality improvement from increased current density and electrolyte temperature
11 p1640 A72-26261

Electrochemical precision metal processing accuracy, analyzing electrode gap size and surface nonuniformities effects on prescribed configuration
11 p1640 A72-26262

Pulsating heat source model for physical processes in metal surface layer under fatigue limit stress level, calculating critical volume to limit energy buildup
11 p1738 A72-26801

Helicopter rotor blade spars shot peening in centrifugal vibrator, optimizing Cr-Mo-Ni steel surfaces work hardening
11 p1642 A72-26820

X ray determination of thermal microstresses in metal specimens surfaces
12 p1807 A72-27447

Electron microscope study of hard alloy surface layer formation characteristics during diamond grinding with electrolysis
12 p1814 A72-27766

Low photon IR photovoltaic response of CdS-metal junction, noting energy conversion efficiency
12 p1855 A72-28009

Russian book on work hardening of surface components of heat resistant and Ti alloys for high temperature operation
12 p1816 A72-28156

Three dimensional heat propagation problem of copper electrode destruction under concentrated heat flux with allowance for metal evaporation
12 p1890 A72-28175

Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration
12 p1817 A72-28183

Metal surface layers structural changes under external friction, noting hardening, softening and phase transformations of active layer material
12 p1818 A72-28190

Clean metallic surfaces adhesion coefficients in vacuum at 77-293 K as function of load, loading time and contact cycles
12 p1818 A72-28193

Low energy electron diffraction structures due to CO and oxygen adsorption on clean Re surfaces produced by Ar ion bombardment at 20 to 920°C
13 p2020 A72-28522

Temperature effects on synthetic rubber sliding friction characteristics against smooth steel surfaces under compression loads in vacuum and air at 10-140°C
13 p1962 A72-28554

Sulfur dioxide and carbon dioxide interaction with clean silver surface at ultrahigh vacuum, using Auger electron spectroscopy and work function measurement
13 p1912 A72-28684

High temperature contact creep tests in vacuum and in metal melts, noting adsorption effect on surfaces plastic deformation
13 p1963 A72-28768

Chemical reactions between solids during boundary friction, presenting literature review on mechanochemical or tribo-chemical reactions between solid lubricants and metal surfaces
[ASLE PREPRINT 72AM 1] 13 p1964 A72-28969

Ice adhesive shear strength to steel bearing surfaces coated with bonded solid lubricants, describing low temperature test apparatus and results
[ASLE PREPRINT 72AM 4] 13 p1964 A72-28970

Metal-dielectric-semiconductor junction transistor HF response analysis by digital computer, deriving switching time as function of impurity concentration and electrode voltage
13 p1932 A72-29294

Cu surface contamination effect on hot crack susceptibility and weldability of Co based superalloys
13 p1965 A72-29419

Rarefied gas flows effect on metals creep properties, examining molecular flow density distribution as function of specimen surface distance from nozzle
13 p1979 A72-29483

Effect on physical and mechanical properties of hard metals due to gas sorption by metallic films spray-coated on surfaces, describing vacuum apparatus
13 p1939 A72-29488

Hydrogen evolution and ferric ion corrosion inhibition by synergistic action of substituted thioureas and thioamides to minimize metal corrosion during acid cleaning
13 p1980 A72-29624

Antifriction phase structure of friction formed thin surface layer of sulfurized iron-graphite metal-ceramic materials, using transmission microscopy
13 p1967 A72-30108

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field
14 p2136 A72-30302

Temperature distribution of structural element with heat shield and metallic layer, determining ablation process for thermal flux at surface
14 p2170 A72-30593

Coating materials for metal surface wear inhibition by adhesive and abrasive interactions minimization, discussing laminar solids, plastics, ceramics and soft metals
[ASME PAPER 72-DE-48] 14 p2108 A72-30874

Temperature dependent optical constants of Ti and W crystal surfaces cleaned by ion bombardment in ultrahigh vacuum
15 p2274 A72-31376

Reactional diffusion in metal surface layers due to chemically active external media involving solid reaction products formation
15 p2255 A72-31570

Diffusion layer formation on metallic surfaces, discussing saturation, crystallization, phase structure, chemical reactions, thermal and contact conditions
15 p2255 A72-31571

Energy and angular distribution of hydrogen and rare gas ions backscattered from polycrystalline metal surfaces
15 p2276 A72-31852

Surface damage induced by ion bombardment of monocrystalline W and Mo, determining degradation rate dependence on collisional energy transfer
15 p2276 A72-31853

Absolute intensity LEED spectra for clean Ni surfaces, discussing measurement uncertainties
15 p2276 A72-31854

Kinematic intensity recovery from LEED data of specular and nonspecular beams from Ni(111) surface, noting multiple scattering interference elimination
15 p2276 A72-31855

Debye-Waller factors measurement for Mo and Cr surfaces near normal incidence based on LEED
15 p2292 A72-31857

Carbon monoxide adsorption on nickel surface, determining preferential orientation by extended Huckel calculations
15 p2276 A72-31867

Edge and surface modification of Nb alloys prior to coating with fused silicide for oxidation life extension
15 p2244 A72-32134

Optical nondestructive surface flaw detection for steel plates using oblique angle illumination combined with high pass spatial filter
15 p2238 A72-32153

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation
15 p2295 A72-32549

Hydrogen atom ground state ionization probability derivation as function of electric field strength and distance to metal surface
15 p2279 A72-32699

Oxygen chemisorption effect on rare gas beams reflection from refractory metals polycrystalline surfaces, interpreting experimental results by simple correlation model
16 p2431 A72-33068

Carbon fibers reinforced polymer wear rate decrease in organic fluids associated with films development on steel counterface, noting application in lubricated systems
16 p2397 A72-33124

Molybdenum disulfide lubricating effectiveness due to surface film properties, suggesting chemical reaction effect with sliding metal surface
16 p2397 A72-33125

Mo and stainless Ni-Cr steel surfaces chemical composition determination by Auger electron spectroscopy during heating in high vacuum
16 p2406 A72-33251

Anodic oxide films separation from Al alloy surface using ethyl bromide at temperatures below 40°C
16 p2397 A72-33274

Field-ion microscopy as experimental metallurgical technique for metal surface atomic structure studies, discussing image formation, ionization and field evaporation
16 p2392 A72-33444

Conduction electron phonon scattering effect on electrical resistance of metallic contacts during pressure welding
16 p2370 A72-33952

Metal-insulator-metal tunnel junctions, investigating effect of nonparabolic band structure energy-momentum relation on I-V characteristics
16 p2370 A72-34101

Electron currents injected through dielectrics
17 p2529 A72-34753

Electric contact phenomena in ultra clean and specifically contaminated systems
18 p2717 A72-36115

Thermodynamic analysis of metal surfaces covered by electropositive adsorbates.
18 p2656 A72-36126

Electric contact between metal and n-type semiconductor, investigating contact pressure effects on electron tunneling and phonon conduction to provide band structure
18 p2718 A72-36488

An investigation of impurities segregation to the /001/ nickel surface during thermal treatment - Work function changes and Auger electron spectroscopy using the LEED camera.
18 p2720 A72-37022

Synthesis of a resin-metal damper whose characteristic shows minimum deviation from a constant-frequency response
19 p2806 A72-37429

A new morphological element on the viscous breakdown microsurface of hypoeutectoid steels
19 p2817 A72-37737

Investigation of the effect of some surface-active media on the variations in strength characteristics of steel U8 in a high strength state
19 p2817 A72-37738

Nature of ion generation during the action of laser emission on a solid body
19 p2811 A72-38193

A helium-neon laser active element with a metallic inner wall surface
19 p2814 A72-38785

The influence of the surface orientation on yield in Mo single crystals.
20 p2935 A72-39007

Developments in the field of metallic diffusion protective layers employed against high-temperature corrosion
20 p2944 A72-39450

Radiation heat transfer between closely spaced metal surfaces at low temperature - The impact of discrete modes of the radiation field.
[ASME PAPER 72-HT-O] 20 p2983 A72-39483

Image point formation in field ion microscopy of metal surfaces, using atom probe detection of noble gas apex adsorption
21 p3050 A72-40086

Electrochemical protection potential of metals and alloys in pitting, intergranular corrosion and stress corrosion cracking in presence of chlorides
21 p3065 A72-40087

Habit plane interpretations of surface martensite transformation and orientation measurements compared with invariant plane strain /IPS/ theory
21 p3065 A72-40088

An experimental investigation of yield surfaces at elevated temperatures.
21 p3117 A72-40678

Investigation of tantalum-compound films at the surface of acicular tungsten microcrystals
21 p3068 A72-40964

The magnetic field of eddy currents above a surface crack in metal with excitation of them by an applied inductor.
21 p3057 A72-41722

Antiscratch properties of nitrided layers of creep-resisting steels at high temperatures
22 p3187 A72-41868

Experimental setup for the investigation of the spectral radiative capability of metals
22 p3175 A72-41893

Surface effects during high-speed impact of metals
22 p3188 A72-42163

Spectroscopic study of the interaction of oxides with metallic surfaces. II - SiO₂-Fe /Cu, Al, Ni, Co, Ti, W/ systems
22 p3189 A72-42197

Nature of radiation defects formed by ruby laser emission on the surface of solids
22 p3185 A72-42273

Influence of the properties of the materials on junction tunnelling characteristics.
22 p3214 A72-42454

Photoelectron energy distributions from clean polycrystalline W, observing surface state
22 p3190 A72-42477

Photoemission from surface states on tungsten.
22 p3190 A72-42478

Brazing furnaces and heat treatment under vacuum
22 p3163 A72-42635

The limiting strength of worn metal surfaces.
22 p3194 A72-43039

Manifestation of the effect of adsorptive reduction in strength under conditions of selective transport during boundary friction
22 p3183 A72-43138

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field
23 p3317 A72-43204

Study of the dependence of the spectral and integral radiation properties of bodies on the surface roughness.
23 p3357 A72-44538

The kinetics of the reaction between oxygen and sulfur on a Ni(111) surface.
24 p3378 A72-44951

Transition of the oxide film on a molybdenum surface from the two-dimensional to the three-dimensional phase 24 p3432 A72-45503

Al and Ti alloy fatigue after temperature reduction to 253, 77 and 4 K as function of surface purity after machining 24 p3416 A72-45743

METAL VAPORS

NT MERCURY VAPOR

NT SODIUM VAPOR

Theoretical model for radiating metallic gas produced around iron meteor entering earth atmosphere, presenting temperature, pressure and density distributions [AIAA PAPER 72-204] 05 p0721 A72-16884

Negative hydrogen ion production during charge exchange between protons in thick Li, Na, K and Mg vapor jets 06 p0863 A72-18410

Bulk vapor formation processes during laser beam heating of metals, considering effect on mass transfer 07 p1000 A72-18939

Maximum volatile solute vaporization escape prior to droplet solidification during metal vapor chemical release process 08 p1128 A72-21618

Nonequilibrium ionization theories for high pressure discharge in inert gas-alkali metal vapor 10 p1515 A72-24414

Collisional ionization cross sections measurement for gaseous metal atoms in hydrogen-oxygen flames at 2000-2800 K 11 p1591 A72-26659

Chemical vapor deposition of W and Mo by hydrogen reduction of hexafluorides, noting crystal structure and microporosity 11 p1644 A72-26837

Phase composition and lattice constants of carbide films from vaporized Zr interaction on graphite surface at 1700 C 13 p1912 A72-28566

Vacuum gap discharge conditions as function of electron beam parameters and metal vapor pressure 13 p2017 A72-29611

Nonlinear radiation absorption and resonance molecular fluorescence of saturated diatomic Rb vapors excited by Q switched ruby laser 14 p2109 A72-30353

Liquid film condensation of low pressure metal vapors on isothermal vertical flat plates, obtaining equations for heat transfer rate prediction 14 p2173 A72-31059

Stefan problem of metal evaporation duration after intense heat flux termination as function of thermophysical properties 15 p2334 A72-31504

CW laser transitions in singly ionized Te vapor spectrum at 4843-9378 A, indicating charge transfer as dominant excitation mechanism 16 p2401 A72-33394

Ellipsometry for the study of equilibrium cesium adsorption. 17 p2552 A72-34599

Compatibility of brazed joints with potassium and vacuum. 17 p2567 A72-34938

Ultra-high vacuum coater for thin film research 18 p2676 A72-36839

Condensed zinc particle size determined by a time discrete sampling apparatus. 20 p2913 A72-39608

Vapor deposition in vacuum under conditions of constant vapor flow with the aid of electron emission current control 20 p2954 A72-39694

He-Cd lasers using recirculation geometry. 21 p3061 A72-40239

Design of high-temperature liquid-metal systems. [ASME PAPER 72-AERO-13] 22 p3204 A72-43149

Alkali metal vapor Q switches for synchronizing mode-locked laser pulse trains with external events. 23 p3297 A72-44189

Evaporation of metallic targets by intense optical radiation 23 p3297 A72-44485

Metal vapor plasma as working medium in MHD generator, discussing hydrodynamic relations, power efficiency and thermodynamic cycle 24 p3428 A72-45169

METAL WHISKER REINFORCEMENT

U WHISKER COMPOSITES

METAL WORKING

NT AUSFORMING

NT CLADDING

NT COINING

NT EXPLOSIVE FORMING

NT FORGING

NT MAGNETIC FORMING

NT METAL DRAWING

Integrity control procedures for machining, drilling and grinding of steel and Ti alloy aircraft parts, discussing nondestructive inspection method [SME PAPER IQ 71-238] 01 p0076 A72-10969

Soviet papers on deformation of metals and alloys covering rolling, mechanical properties and plastic deformation of W, Mo and Ni alloys 01 p0077 A72-11076

Physical inconsistencies of mechanico-mathematical concepts of metal deformation, considering friction forces, lubricant action and plastic tensors and deviators 01 p1012 A72-11077

Two component flow and optimal strength ratios between core and shell materials during extrusion of composite bimetallic specimens into circular tubes 01 p0077 A72-11078

Deformation and compression characteristics of W wire rolled from flattened vacuum melts 01 p0077 A72-11084

Plastic deformation, heat treatment and grinding of set blank W casts for strip and foil production 01 p0088 A72-11085

Flattening, heat treatment and machining of narrow rectangular vacuum melt Mo strips for microwave devices 01 p0078 A72-11087

Fabricable high strength Inconel 706 precipitation hardening superalloy, noting savings in Ni, Nb and Mo content 02 p0245 A72-12507

Superalloys ductility and workability improvements without sacrificing elevated temperature strength for aircraft engine applications 02 p0246 A72-12561

Rolled metals and alloys with various lattice types and packing defect energies, showing elastic properties isotropy and Young modulus anisotropy 03 p0371 A72-13188

Rolling workability of pure W single crystals grown by electron beam zone melting technique, discussing crack occurrence 03 p0374 A72-13718

Forming of 7075-T6 Al in high pressure environments, predicting fracture occurrence via finite element stress analysis computer programs and pressure dependent model [ASME PAPER 71-WA/PT-11] 05 p0671 A72-15912

Metallurgical treatment control reliability in machine part mechanical properties quality evaluation 05 p0671 A72-15993

Ti alloys evaluation technique of arc melting, processing and testing of miniature ingots, discussing alloying and microstructural effects and correlation with plate properties 05 p0674 A72-16390

Mechanical, technological and physical properties of steel with and without molybdenum 05 p0679 A72-17204

Adherent solid lubricant films electrochemical deposition, noting method application to metal forming techniques 06 p0824 A72-18606

Plastic strain and fracture of metals by specific internal energy change method, investigating mechanical work and heat release 06 p0900 A72-18691

Economical methods for cast maraging steel production, describing composition, heat treatment and mechanical properties 07 p1010 A72-18970

Stainless steels with improved formability developed through assessment of stress-strain curve slope and plastic strain ratio 07 p1011 A72-19477

Se and Te additions effects on low carbon steels formability and machinability from metallurgical examination and workability tests 07 p0994 A72-19480

Impurities and crystal lattice role in metal brittleness, discussing stress concentration and relaxation, crack initiation and plastic deformation 07 p1018 A72-20145

Metals and alloys breakdown toughness and mechanical properties predictions under various loading conditions, discussing interatomic bonds and plastic deformation zone size 07 p1019 A72-20146

Plastic stress-strain anisotropy of metals under forming for mild steel, austenitic stainless steel and Mg, showing nonconformability with Hill criterion 07 p1020 A72-20432

Metals cold working mechanics about stress state and yield points, proposing theoretical model for mechanism and applications in extrusion molding, drawing and hollow forging 07 p0999 A72-20599

Metal working technology - Conference, Timisoara, Rumania, October 1971 08 p1173 A72-21026

Dimensional metal working by material erosion involving stereomechanical energy transmission to surface of nonrigid mechanical body 08 p1173 A72-21027

Electrical erosion efficiency of metal working under increased pressure in discharge gap in air and water 08 p1174 A72-21029

Automatic control of electroerosion machining by process computer, using pulse-voltage-metal removal relation 08 p1174 A72-21030

Technological characterization of electric discharge machines by metal removal rate, volumetric electrode wastage and machined surface roughness 08 p1174 A72-21031

Dielectric sulfur activated liquids for high productivity electroerosion machining of steels and metallic carbides, comparing with petroleum 08 p1174 A72-21034

Surface structure changes in metal worked by electroerosion, discussing temperature and electrical tension effects 08 p1174 A72-21036

Metal working by plasma beam in turning machine, applying to high strength alloys 08 p1175 A72-21045

Metal cold working mechanics, discussing model based on equality of internal and external forces needed for plastic deformation 08 p1176 A72-21439

Thermal diffusivity and conductivity and specific heat of hard electrode graphite intermediate medium in hydraulic hot extrusion of metals 08 p1181 A72-22072

Metal forming - AIME Conference, Cleveland, October 1970 08 p1250 A72-22193

Plastic flow properties and stress measurement for metal working conditions with flat ring compression specimens and interfacial friction consideration 08 p1250 A72-22196

Workability tests from material deformation stress determination and fracture strain rate relation for forging, extrusion and rolling limits predictions 08 p1190 A72-22198

German monograph on plasma arc machining and cutting of metallic materials on lathe as function of electric power and torch performance 09 p1317 A72-22327

Al addition effect on thermal and mechanical stability, forgeability, cold workability, aging and oxidation resistance of Ti-Mo beta alloys 11 p1656 A72-25516

Metal forming techniques for gas turbine engines, considering isothermal, radial and powder metallurgy preform forgings, contoured cross and form rolling, and squeeze casting [ASME PAPER 72-GT-58] 11 p1638 A72-25649

Torsion testing machine for hot metal workability tests at constant strain rate 11 p1639 A72-25820

Numerical calculation of temperature distribution and tempering depth for inductive hardening process with automatic material feed, taking into account temperature dependent material properties 11 p1639 A72-25898

Mechanical, technological and physical properties of steel with and without molybdenum 11 p1660 A72-26139

Furnace technology review, stressing need for higher sintering temperatures, better automatic atmosphere controls and faster preforms transfer to forging operation 11 p1640 A72-26242

Hot isostatic pressing techniques for thin wall Be tubes manufacture 11 p1643 A72-26831

Solid state reactions in powder metallurgical production and working of Mo alloy, considering sintering process 11 p1644 A72-26846

Rolling operations in vacuum for protection of metallic materials underprocessing 11 p1645 A72-26867

Metal rolling speed effect on force and friction reduction by ultrasonic vibrations imposed on rollers, noting coefficient of friction dependence on deformation 12 p1814 A72-27645

Elastic deformations of porous Cu, Mo and W fiber materials after pressing and sintering due to residual stress relaxation 14 p2106 A72-30151

Squeeze casting for precision shaping mechanical properties, surface finish and cost reduction in metal working [ASME PAPER 72-DE-7] 14 p2108 A72-30862

Electrohydraulic and electromagnetic metal forming, using capacitor stored energy conversion into hydraulic shock waves or magnetic pressure to deform sheet metal components, pipes, etc 15 p2243 A72-31323

Kinetic forming of conical Al component from solid cylindrical billet, analyzing forming and inertia stresses, impact velocity and displacement-time history 15 p2244 A72-31708

Technical and economic aspects of explosive metal fabrication, considering requirements for close tolerances, nonsymmetrical shapes, large size workpieces and unusual material properties 16 p2398 A72-33354

- Fabrication of refractory metals.
17 p2559 A72-34187
- Metal working and testing of nuclear rocket engine components with Mo as structural material and uranium dioxide as fuel, discussing Mo-W interdiffusion
17 p2559 A72-34617
- Mathematical models for metallic plastic strain hardening under cyclic loads, introducing internal state parameters
17 p2632 A72-35111
- Testing the impact accuracy of the NEK-8 HERF machine
18 p2695 A72-36274
- Effects of combined high and low temperature deformation processing of beta III titanium.
18 p2701 A72-36590
- Transition metals physical and mechanical properties, production, refining and vacuum processing techniques
18 p2696 A72-36840
- Polish aircraft industry production and fabrication techniques, discussing metal working, digital controlled machining and cost reduction
18 p2696 A72-37010
- Thermochemical techniques application to corrosion protection of metallic powders, mechanical parts and tools, describing chromizing, chromaluminizing, tantalizing and niobiumizing processes [ONERA, TP NO. 1049]
19 p2817 A72-37769
- Dispersion hardening fabrication of hollow cooled blades of thin cermet layer and embedded plastic metal core, using aluminum oxynitrate in water-alcohol solution
19 p2809 A72-38282
- Metals and alloys solidification concepts, applying to casting techniques development
20 p2936 A72-39211
- Nucleation of new grains in recrystallization of cold-worked metals.
20 p2930 A72-39995
- Effects of hydrostatic stress on the yielding of cold rolled metals and fiber-reinforced composites.
23 p3299 A72-43496
- Fatigue-crack growth in 20% cold-worked Type 316 stainless steel at elevated temperatures.
24 p3435 A72-44555
- Making a product from composites. II.
24 p3412 A72-44556
- Metallurgical treatment control reliability in machine part mechanical properties quality evaluation
24 p3416 A72-45735

METAL-GAS SYSTEMS

- Hydrogen partial molar volume in metal-hydrogen two component systems under externally applied uniform hydrostatic stress field, using thermodynamic analysis
01 p0083 A72-10205
- Hydrogen chemical permeation through iron and steel as function of compressive and tensile stress
01 p0083 A72-10206
- Gas saturated surface layer deformation in rolled Ti alloys as function of specimen thickness reduction
01 p0077 A72-11080
- Phase oriented precipitation patterns of Ti in Ti-C-O system, discussing composition independence and dislocation networks
01 p0089 A72-11184
- Equilibrium states difference of ternary metal-boron-nitrogen systems, taking into account chemical bond type and crystal structure of boride and nitride atoms
14 p2112 A72-30154
- TiC high temperature oxidation and thermodynamic equilibria in air, using metallographic and X ray analyses
14 p2112 A72-30155
- Thermodynamics and phase relations in refractory metal solid solutions containing carbon, nitrogen, and oxygen.
18 p2699 A72-36576
- Relation between hydrogen embrittlement and the formation of hydride in the group V transition metals.
18 p2700 A72-36578
- Equilibria and degassing kinetics in the systems Mo-N, W-N, and Re-N
18 p2701 A72-36596
- Thermodynamic description of the metal-rich part of the system niobium-molybdenum-nitrogen
18 p2701 A72-36597
- Standard Ti bars samples for spectral determination of H concentration and distribution in Ti alloys, using mathematical statistical method
23 p3287 A72-43676
- Relationship between the electrical resistivity and solute concentration in the solid solution of tantalum-hydrogen system.
24 p3412 A72-44718
- Influence of oxygen and hydrogen on the strength of titanium alloys
24 p3414 A72-45379

METAL-METAL BONDING

- Continuous seam diffusion bonding application to Ti and superalloys lap, butt and T joints production [SME PAPER AD 71-264]
01 p0076 A72-10970

Bonding mechanisms and failure modes in thermocompression bonds of Au plated leads to Ti-Au metallized substrates, discussing Cu lead frames plated with Ni and Au
03 p0365 A72-14292

Ultrasonic bond formation between soft fcc metals, observing dislocation processes
04 p0526 A72-14837

Nondestructive examination of steel plate weld specimen, comparing ultrasonic and X ray techniques
04 p0527 A72-14840

Adhesive bonded components in aircraft and aerospace structures, discussing manufacturing, metal surface preparation, inspection and environmental exposure
06 p0835 A72-17325

Explosive welding of heat exchanger tubes and detonation produced compressive joining of cables as applications of explosive metalworking procedures
07 p0994 A72-18931

Plasma spraying process effects on carbon steel coatings structure and bonding, considering optimal parameters, properties control and phase transformations
07 p0996 A72-19966

B-Al metal matrix composites joining together and to Al and Ti, considering soldering, brazing, bonding and mechanical fastening [AIAA PAPER 72-360]
11 p1638 A72-25388

Aluminum-stainless steel and Ni-Mo composites prepared by dynamic hot pressing, determining bond strength between fibers and reinforced metal matrix
14 p2107 A72-30431

Lamb wave technique for bond strength testing of laminated or clad metal sheets, calculating displacement and stress dispersion and amplitude distribution for different modes
16 p2391 A72-33230

Slurry explosives for metal cladding, discussing applications to pipe joints, bearing sleeves, recoil rods, gun barrels and cylinder liners
16 p2398 A72-33357

Study of reliability of Al-Au thermocompressions by measurement of resistance
18 p2668 A72-37105

On some aspects of low-temperature and anodic oxidation of metals and semiconductors.
21 p3067 A72-40914

Bonded joints - Squeeze-out /flash/ effect on fatigue strength.
23 p3353 A72-44248

Investigation of the possibility of using radiant solar energy for welding and soldering of materials
24 p3407 A72-45126

Non-destructive testing of adhesive bonded metal-to-metal joints. I.
24 p3408 A72-45289

Non-destructive testing of adhesive bonded metal-to-metal joints. II.
24 p3408 A72-45290

METAL-WATER REACTIONS

- Partial pressure gage to measure water vapor-produced hydrogen content in metal samples, using reference gas evolution curves
12 p1807 A72-27451
- Temperature dependent aluminum-water reaction generation of free hydrogen and aluminum hydroxide
16 p2362 A72-34159
- Active corrosion in aqueous solutions, discussing reactions, adsorption, intergranular attack, pitting, crevice corrosion and stress corrosion cracking
19 p2815 A72-37446

METALLIC HYDROGEN

- Statistical mechanics of light elements at high pressure. II - Hydrogen and helium alloys.
21 p3106 A72-41044

METALLIC PLASMAS

- NT CESIUM PLASMA
NT URANIUM PLASMAS
Unstable sound waves in uranium plasma, taking into account fission power density, radiation diffusion and ionization variations
01 p0112 A72-11336
- Uranium arc plasma visible and near UV emission coefficients as function of U partial pressure and corresponding temperatures
01 p0112 A72-11337
- High temperature U plasma generation at near gas core reactor conditions by sliding spark discharge into capillary channel lined with sintered uranium dioxide
01 p0112 A72-11338
- Uranium and tungsten plasmas emission and absorption properties at shock tube generated pressures of 3-48 atm and temperatures of 7,000-12,000 K
01 p0112 A72-11339
- Organic dye lasers radiation nonlinear interaction with alkali metals spark discharge plasma, showing angular and spectral broadening
04 p0532 A72-15573
- Cylindrical alkali metal plasma column structure in single ended Q device under axial magnetic field
06 p0854 A72-17503

Density and flux measurements by Langmuir probes in uranium plasma produced in single ended Q device, noting application to isotope separation
06 p0855 A72-17506

Electrostatic wave propagation and damping in thermally ionized collisionless alkali plasma, determining electron and ion densities, electron temperature and ion distribution function
06 p0856 A72-17521

Collisional drift instability dependence on parallel wavelength in potassium Q device plasma
06 p0857 A72-17528

Collisionless drift waves in thermally ionized Li plasma column under variable shear magnetic field
06 p0857 A72-17535

Hf fluctuations in density gradient of alkali plasma within Q device
06 p0858 A72-17536

Single ended Q machine Ba plasma probe measurements of ion temperatures perpendicular to magnetic field, electron temperatures and plasma densities and potentials
06 p0859 A72-17550

Electrical conductivity of nonideal low temperature plasma as function of metalization densities, applying to semiconductors and mercury vapor systems
07 p1043 A72-19880

Absorption by Nd laser generated ionized Al plasma of extreme UV radiation due to inverse bremsstrahlung and photoionization
09 p1360 A72-22831

Heavy ion acceleration from strong electron beam in metallic plasma obtained with ruby laser and positive voltage pulses
10 p1524 A72-25034

Nonideal dense plasma properties, discussing electrostatic shielding, many particle clusters, phase transitions, metalization and electrical conductivity [AIAA PAPER 72-414]
11 p1695 A72-26164

Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations and atom-atom collision cross sections
11 p1699 A72-26760

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations
13 p2017 A72-29618

Electrical conductivity of nonideal low temperature plasma as function of metalization densities, applying to semiconductors and mercury vapor systems
17 p2590 A72-35129

Volt-ampere characteristics of Ba-Cs plasma thermionic converter with W emitter and Ta collector
18 p2646 A72-36199

Pulsed metallic-plasma generators.
20 p2958 A72-39781

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations
21 p3091 A72-40671

Recombination continuum in a lithium plasma spectrum
22 p3210 A72-42171

Glow discharge in rare-gas and metal vapour mixture. I - Distribution functions and kinetic coefficients in He-Cd mixture discharge.
23 p3322 A72-44320

Metal vapor plasma as working medium in MHD generator, discussing hydrodynamic relations, power efficiency and thermodynamic cycle
24 p3428 A72-45169

METALLIZING

- Alloying elements and grain size effects on thermally induced surface reconstruction of Al film metalization on Si devices from thermal cycling tests
03 p0364 A72-14285
- Anodized aluminum metallization for reducing electromigration induced failure modes in silicon wafers
03 p0365 A72-14286
- Deposition of Ni-B coatings with specified electrical resistance onto fiberglass cloth reinforced plastics
09 p1318 A72-22528
- High alumina ceramics metalization and hard soldering to metals for manufacturing vacuum jacket of transmitting thermionic tubes
10 p1488 A72-24642
- Thermal analysis of high performance devices mounted on dielectric substrates.
17 p2527 A72-34677
- Plastic packages for complex microcircuits.
17 p2528 A72-34717
- Electrical conductivity of nonideal low temperature plasma as function of metalization densities, applying to semiconductors and mercury vapor systems
17 p2590 A72-35129
- Au alloys metalization system as alternative to aluminumizing for junction transistor reliability improvement, considering metal migration, microcracking and current leakage
18 p2666 A72-36554

Study of the process of niobium carbide production in a fluidized bed
23 p3293 A72-43294

METALLOGRAPHY

Metallographic and fractographic analyses of cracking in T53-L13 gas turbine engine compressor disks

01 p0085 A72-10816
Ti structures controlled path resistance welding, discussing welded joints metallographic and mechanical properties

07 p0996 A72-19996
Metallographic properties of vacuum brazed, heat treated and gas quenched Al alloys, low alloy steels and corrosion resistant steel alloys

07 p1017 A72-20001
Metallographic study of denuded zones from diffusional flow in hydrided Mg superplastic alloy with Zn and Zr

09 p1331 A72-23383
Advances in metallography - Conference, Leoben, Austria, October 1970

10 p1493 A72-23822
Soviet papers on high temperature metallography techniques and equipment covering test assemblies for fatigue and microhardness measurements

11 p1654 A72-25489
High temperature metallographic methods in microstructure study of austenitic heat resistant steel under plastic deformation and heat treatment

11 p1654 A72-25495
Metallographic examination of stainless steel specimens exposed to long term creep rupture tests, noting carbides precipitation and stress induced grain boundary migration

11 p1658 A72-25832
Deformation characteristics and mechanical properties of superplastic alloys, stressing metallographic techniques

11 p1739 A72-26936
Annealed and quenched Fe-Mo-Co system, defining phase relationships in Fe-rich corner at 2200, 2000 and 1800 F

13 p1973 A72-28650
Russian papers on phase diagrams of metallic systems covering thermodynamic, X ray and metallographic alloys analysis

14 p2122 A72-30976
Ce-N alloys phase diagram from durometric, X ray, metallographic and differential thermal analyses

14 p2123 A72-30991
Chemical inhomogeneity of high melting metals and alloys of Ti, Zr, Nb and Cr from radio isotopic and nuclear emission studies

15 p2255 A72-31576
Phase diagrams for W-Ta-Ti alloys at 1600 C from metallographic and X ray analysis

16 p2407 A72-33533
An electron microscopy study of carbide precipitation in vanadium.

18 p2699 A72-36577
Secondary recrystallization of nickel 270 work-hardened by tension

18 p2702 A72-36704
Investigation of defects and damage in metallic materials by metallographic examinations

20 p2941 A72-39573

METALLURGY

Monograph on electron beam welding covering space charge effect, equipment, metallurgical and mechanical aspects, production engineering, economics and applications

01 p0073 A72-10167
Cb alloy processing technology from ores to manufactured finished fabricated, joined and coated hardware, discussing reduction methods, annealing, forming, joining, etc

01 p0075 A72-10745
Metallurgical defects in hot extruded aluminum alloys, describing investigation methods and remedies

01 p0077 A72-11041
Selected microarea electron diffraction technique in high voltage electron microscopy, discussing applications in crystallography and metallurgy

04 p0523 A72-15490
Book on electrochemical machining covering metallurgical effects, electrolytes, tool design, rotating surfaces and operating costs

06 p0821 A72-17819
Metallurgy and metal science - Conference, Moscow, May 1968

07 p1011 A72-19543

Russian book on Nb in ferrous metallurgy covering physicochemical properties, steels, slags, ore reduction and smelting for Nb alloys production

11 p1659 A72-26048
Russian papers on electrochemical treatment of metals covering anode and cathode processes, electromechanical precision processing of machine parts and wear resistant electrolytic alloys

11 p1640 A72-26254
Haynes high strength heat resistant Ni-Cr-W alloy metallurgical and structural relationship, mechanical and physical properties, oxidation and corrosion behavior and fabrication processes

13 p1973 A72-28649
Superplastic alloys based on Al, Cu, Zn, Mg, Ti and carbon or stainless steels, discussing macroscopic properties and manufacturing cost reduction

14 p2120 A72-30622
Ultrasonic sound influence on metal physical and mechanical characteristics, utilizing in testing and manufacturing procedures

15 p2275 A72-31832
Russian book - Automation of the monitoring and study of metals

19 p2795 A72-37299
Physical and metallurgical factors causing embrittlement and creep rupture life reduction determined by tests, discussing crystal and grain boundary deformation and notch effects

19 p2874 A72-37711
Material properties, metallurgy, production technology and operational factors effects on machinery structural strength

23 p3347 A72-43733

Metals mechanical behavior, considering plastic deformability, strain hardening, cohesion and engineering performance prediction

01 p0086 A72-10985
Graphite, Mo, Ta and W thermal radiation total emittance measurement in 1200-2400 K range, evaluating recorded data by computer program

02 p0243 A72-12101
Metal ductile facies fracture study of cups formation from cracks by cleavage, noting roles of dislocations and inclusions

02 p0246 A72-12600
Quasi-static measurement and electron phonon interpretation of specific heat of metals at low temperature

03 p0456 A72-13843
Pure metals creep or self diffusion activation energy from hot-hardness data, noting temperature and elastic modulus effects

03 p0375 A72-13931
Metals thermophysical characteristics temperature dependence determination by analog computer, using one dimensional temperature fields in thin infinite plates and cylindrical or spherical surfaces

03 p0458 A72-14165
Physicomechanical properties of metals at crystallization temperatures, considering density, viscosity, strength, hardness, elasticity and creep

03 p0378 A72-14219
Statistical thermodynamics models for determining vacancy concentration and atoms and vacancies arrangement in metals and alloys under thermal equilibrium

03 p0378 A72-14255
Book on metallic and dielectric antennas covering planar, cylindrical and plasma types for symmetrical, dipole and ring excitations

04 p0497 A72-14612
Metal wear mechanism during electromechanical processing explained by configurational localization model

05 p0665 A72-16094
One dimensional two phase flow transpiration cooling through porous metals [AIAA PAPER 72-24]

05 p0749 A72-16915
Homologous temperature method to compare mechanical properties of metals tested at different temperatures

06 p0827 A72-17399
Automatic testing machine for mechanical properties of metals under static loading

06 p0796 A72-18365
Metals, insulators, semiconductors and ceramics thermophysical parameters measurement during monotonic heating or cooling at 123-3273 K

06 p0904 A72-18514
Small elastoplastic cyclic strain effects on internal friction and energy dissipation in metals during vibrations

06 p0834 A72-18679
Idealized model for anisotropy of metals inelastic characteristics due to plastic deformation, demonstrating applicability to polycrystalline materials

06 p0900 A72-18685
Test facility for studying temperature dependence of thermal diffusivity and true heat capacity of metals between minus 150 and plus 400 C

07 p0982 A72-18941

Gas content determination in metals by melting and vaporizing measured microvolumes using laser microprobe and magnetic mass spectrometer

07 p1006 A72-19549

Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities

07 p1017 A72-20130

Reversible hydrogen brittleness development conditions in metals, deriving equations for hydrogen content effect on plasticity dip

07 p1018 A72-20132

Nonferrous metals melting, discussing solid and gaseous impurities removal, halide function and grain and Al-Si eutectic refinement method

07 p0999 A72-20570

Laboratory metal corrosion testing, considering reasons, conditions and damage assessment

08 p1189 A72-22104

High temperature testing of metals, discussing specimen preparation and oxidation behavior evaluation by gravimetric, volumetric and optical techniques

08 p1189 A72-22107

Fluorescent X ray spectroscopy for K and L emission band structures of Mg, Al and V and metal compounds

09 p1370 A72-22839

Microscopic perturbations of metals electron density complex dynamic matrix, deriving electroconductivity and kinetic coefficients

09 p1329 A72-23039

Energy operator diagonalization of interacting valence electrons in semiconductor and metal models

09 p1352 A72-23356

Metal creep under multiaxial stress states, proposing technique for numerical stress analysis data collection

[SMRT PAPER L 1/3]

10 p1556 A72-24395

Metallic materials for delta wing space shuttle configuration with metallic thermal protection system

10 p1498 A72-24876

Inhomogeneous sink distribution effect on vacancy annealing kinetics and activation energy in metals

10 p1499 A72-24983

Space shuttle orbiter thermal protection system metal interaction with chemical environment during reentry, emphasizing degradation in dissociated oxygen

[AIAA PAPER 72-262]

11 p1590 A72-25206

Hexagonal metals stress corrosion cracking fractographs interpretation, noting striations as prominent feature of transgranular fractures

11 p1652 A72-25288

Pure metals bulk modulus pressure dependence from detonation generated shock wave data, using empirical relations between propagation velocity and material flow rate

11 p1662 A72-26741

Electrothermal NDT of metal structures by IR scanning camera or thermal image transducer

12 p1813 A72-27200

Mathematical model to describe complete creep process in metal from hardening and brittle failure theories

12 p1828 A72-27322

Electronic heating test arrangement for high temperature testing of metals and electrically conducting ceramics in vacuum, describing temperature control systems

12 p1796 A72-28249

Reversed creep deformation behavior of metals, observing acceleration at high temperatures due to grain boundary sliding enhancement

13 p1978 A72-29444

Cryogenic liquids cavitation erosion of plastic and cold-short metals at 77 K, determining vapor pressure effect

13 p1979 A72-29479

Reflectivity of metals at high temperatures based on Drude theory and electron-phonon scattering, detailing temperature dependence and optical constants

14 p2129 A72-30183

Shock induction melting and vaporization in metals, investigating initial porosity effect

14 p2113 A72-30185

Elastic effects in metal hardness testing with blunt indenter, considering indentation in rigid plastic manner

14 p2113 A72-30268

Metal creep activation energy determination during plastic deformation process, using temperature differential method

14 p2115 A72-30412

Degenerate electron gas magnetic properties implications for metals, white dwarfs and neutron stars, discussing nonmagnetic state for thermal equilibrium

14 p2158 A72-30728

Pavel stony meteorite microspectral analysis to obtain metallic elements weight percentages in chondrules, matrix and core, using laser source for local vaporization and excitation

14 p2159 A72-30785

Temperature aftereffect in heating and cooling of metals with cubic and noncubic lattices in relation to relaxation and hereditary deformation

14 p2143 A72-30952

Plastic deformation in metals and highly crystalline polymers as function of shear strain, strain rate, frequency and vibrational amplitude

15 p2328 A72-31840

Sound velocity and ultrasonic attenuation in anharmonic metal for collision dominated regime

15 p2277 A72-31889

Electron contribution to phonon damping in anharmonic metal for collision-free regime, evaluating relaxation times

15 p2277 A72-31890

Growth analysis curve of halo subdwarf Groombridge 1830 relative to sun, noting metal abundance

15 p2314 A72-32373

Metal melting heat relationship to diffusion activation energy with vacancy mechanism equal numerically to crystal internal energy maximum change

15 p2259 A72-32691

Metal fracture by electron pulse generated stress waves, noting intergranular fracture mechanism

16 p2472 A72-33845

Metal creep tests in thin walled ring shaped specimens for geometrical constancy under variable weights

16 p2472 A72-33850

Metal catalyst theory for electrocatalysis in alkaline hydrogen oxygen fuel cells, using Tafel equation

16 p2351 A72-33880

Instrument for Hall and Gauss effects measurement in semiconductors and metals, noting instrument error analysis

17 p2529 A72-34758

Metallic abundances in the solar chromosphere

17 p2613 A72-35498

Analysis of grain- and particle-size distributions in metallic materials

17 p2569 A72-35922

Dependence of emission on work function variation in metals under tension

18 p2699 A72-36350

New measurement and evaluation method for the determination of the diffusion coefficient of hydrogen in solid metals

18 p2692 A72-36841

Measurement of the damping capacity and dynamic modulus of high-damping metals under direct cyclic stresses

19 p2795 A72-37460

Effect of stress amplitude and number of vibration cycles on the damping decrement in metals

19 p2878 A72-38217

Metal-insulator-semiconductor-insulator-metal structure light pulse amplification investigating power gain and photocurrent dependences on applied voltage and applicability as radiation detector

20 p2960 A72-39517

Investigation of defects and damage in metallic materials by metallographic examinations

20 p2941 A72-39573

Autoclaves for the study of the effects of deformation on the high temperature aqueous corrosion of metals

21 p3039 A72-40216

Determination of copper, iron, cobalt, nickel, and manganese in biological samples of vegetable origin

23 p3260 A72-43924

Metallic solid material transient displacement field measurement by moire fringe photographic recording technique with computer program for data analysis

24 p3401 A72-44611

Temperature change direct measurement and annealing experiment via differential power analysis to determine stored energy release in metal plastic flow during compression

24 p3405 A72-44613

Automatic testing machine for mechanical properties of metals under static loading

24 p3389 A72-45751

Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities

24 p3416 A72-45756

Reversible hydrogen brittleness development conditions in metals, deriving equations for hydrogen content effect on plasticity dip

24 p3416 A72-45758

METAMORPHISM [GEOLOGY]

Shock transformed chondrite texture observed in thin plates by UV fluorescence

05 p0722 A72-17151

Alfanello meteorite inspection by optical microscopy for petrological features of shock metamorphism in chondrites

05 p0722 A72-17152

Shock metamorphism in Luna 16 soil sample, indicating regolith formation by meteorite impact

09 p1380 A72-22259

Savonoski crater, Alaska - A possible meteorite impact structure

19 p2790 A72-37861

Mineralogical and chemical researches on L-chondrites - Girsenti

19 p2858 A72-37862

Evidence for vapor fractionation in the origin of chondrules

23 p3339 A72-44134

METASTABILITY

U METASTABLE STATE

METASTABLE ATOMS

Metastable He atoms concentration in plasma from absorption characteristics at temperatures 4-300 K and pressures 1-70 mm Hg

05 p0696 A72-16612

Ground state and metastable atoms and ions optical pumping, presenting critical survey on pumping and relaxation mechanisms, light propagation and spin exchange

14 p2109 A72-30325

Metastable ²S/ atoms production by electron impact induced dissociative excitation of molecular deuterium, measuring total cross section via Lyman alpha flux

15 p2282 A72-32645

Fast metastable hydrogen atom beam production by proton beam-Cs vapor charge exchanges

16 p2429 A72-33057

Excitation transfer and Penning ionization reactions between helium metastables and carbon monoxide

18 p2713 A72-36563

Absolute detection and collisional destruction of 2.5-keV metastable hydrogen atoms produced by a charge-exchange process in cesium vapor

19 p2837 A72-37547

Metastable atomic oxygen deactivation in upper atmosphere by inelastic collisions and by spontaneous irradiation, noting airglow intensity dependence on red lines irradiation

19 p2792 A72-38633

Calculation of photoabsorption processes in helium

24 p3426 A72-45012

METASTABLE STATE

Transmission electron microscopic investigation of heterogeneous nucleation of Al-Ag alloys metastable gamma prime phase, noting association with four dislocation types

01 p0083 A72-10209

Al-Mn system constitution, discussing metastable phase, high and room temperature modifications and transformation equilibrium

01 p0088 A72-11045

Orion and planetary gaseous nebula helium atoms metastable triplet states population calculations

04 p0578 A72-15314

Semiconductor film compound decomposition, chemical composition and metastable modifications presence during condensation in vacuum, discussing defect formation in crystal structure

05 p0701 A72-15752

Collisional radiative model of population densities of metastable electron levels of orthohelium in low pressure rf helium plasma

05 p0694 A72-15998

Metastable Fe-Cr-Ni austenitic stainless steels, demonstrating step phenomenon at elastic limit

05 p0672 A72-16011

Dissociative excitation of CO and metastable fragments by electron impact on carbon dioxide, investigating cross sections

06 p0803 A72-17447

Ground state He long range interaction with triplet metastable He, discussing gerade and ungerade states

07 p1037 A72-19495

Metastable argon-carbon dioxide dissociation and electronic excitation of carbon monoxide or oxygen

07 p1037 A72-19496

Transition metals distribution of IV-VI and VIII groups in metastable refractory nickel alloys gamma and gamma-prime phases

07 p1012 A72-19678

Order-disorder transition in metastable splat cooled Ti-rich Ti-Fe alloys from phase formation, constitution and crystal chemistry viewpoint

09 p1330 A72-23378

Metastable austenitic steel fiber to increase Al matrix strength to density ratio and fracture toughness

09 p1331 A72-23385

Population inversion through metastable ion formation by atomic inner shell electrons photoionization, determining effectiveness relationship to emission source plasma composition

11 p1648 A72-26332

Pulsar speed increase mechanism as metastable flow state transition in neutron star superfluid core

11 p1724 A72-26705

Ti alloy metastable phases classification, including alpha-prime, secondary alpha, omega, beta and alpha phases

12 p1828 A72-27290

Liquid quenched Sb-transition metal binary alloy constitution, finding metastable phases in quenched Cr-Sb and Mn-Sb alloys

13 p1975 A72-28672

Ni-Mn alloy phase transformation characteristics from neutron diffraction and small angle scattering

studies, showing ordered nearly stoichiometric metastable phase for entire temperature range
13 p1976 A72-28903

Metastable coesite crystal growth in highly strained quartz under 5-20 kb pressures and 450-900 C
14 p2099 A72-30322

Ti alloy volume reduction during decomposition of metastable alpha-prime, alpha-two and beta phases after cooling from beta range
14 p2114 A72-30401

Maraging Fe-Ni-Co-Mo alloy ordered metastable omega phase formation during martensite aging from electron microscopic investigation, noting Co addition effects and precipitation
14 p2115 A72-30404

X ray and metallographic analyses of Ni-Mo, Ni-Ta, Ni-Nb, Ni-Zr and Ni-Ti alloys crystallized at high cooling rates, observing metastable phases
14 p2115 A72-30405

Mutual solid solubilities of rare earth metals with Zr extended by splat quenching, noting metastable low temperature allotropic forms of solid solutions
14 p2119 A72-30609

Phase diagrams of Ni-C and Co-C systems with metastable equilibrium lines, investigating microstructure and microhardness of carbide eutectic
14 p2123 A72-30990

Crystal lattice disarrangement by melting In-Ti alloy, noting fcc and bcc metastable phases formation during rapid crystallization
16 p2441 A72-33536

Lifetime and quenching of metastable CO produced by dissociative recombination of positive carbon dioxide ions in He afterglow
16 p2432 A72-33771

Nd-glass laser interaction with singly stimulated two-photon emission and anti-Stokes Raman scattering from metastable state He, calculating cross sections
17 p2565 A72-35831

Finite tested optically thin radiating plasma stability analysis, deriving luminosity function for metastable state existence from mathematical model
20 p2958 A72-39456

Metastable phases in very rapidly solidified aluminum-germanium alloys
21 p3070 A72-41644

Metastable growth patterns in some terrestrial and lunar rocks.
23 p3339 A72-44133

METAZOA

METEOR HAZARDS

U METEOROID HAZARDS

METEOR TRAILS

Wind profile determinations at 90-100 km from meteor trail drift and ionosphere inhomogeneity radar data, noting semidiurnal harmonics in wind components
01 p0058 A72-10563

Numerical analysis of radio echoes decay rate from randomly ionized meteor trails
01 p0130 A72-10913

Photometric meteor mass determination, using models relating radiation intensity, meteor velocity, atmospheric density and instantaneous luminous flux
02 p0282 A72-12334

Linear electron density distribution along faint meteor trail, discussing radio echo time-amplitude characteristics and ionization curve
02 p0282 A72-12335

Meteor trail forms diversity explanation from magnetic pressure and Reynolds number and plasma diffusion in magnetic fields, discussing geomagnetic effect on trail shape
02 p0282 A72-12336

Geomagnetic field effect on radar echoes from meteor trains during Geminid shower
03 p0345 A72-12982

Upper atmosphere He, Ne, Na and K atoms collisions with molecular oxygen, determining ejected electron energy during fast Na, K, Rb and Cs ionization for meteor phenomena modeling
03 p0438 A72-13980

Telescopic meteors light curves, showing maximum point brightness distribution in visible trajectory with respect to stellar magnitudes
03 p0438 A72-13985

Spectral line data on terminal flare and wake of double-station meteor 38421
04 p0574 A72-14922

Meteor observation and counting, discussing meteor stream formation along comet orbit
05 p0712 A72-15975

Antenna azimuthal radiation patterns and meteor radiant distribution effects on wind velocity measurement by radar observation of meteor trains
05 p0715 A72-16251

Wind velocity vertical component determination through meteor trail drift observation, presenting mean diurnal measurements data
05 p0657 A72-16272

Aerodynamic characteristics of hypersonic velocity meteor traveling in earth atmosphere and shock wave propagation generated by explosion in air and on ground
07 p1081 A72-20094

Galactic cosmic ray modulation region evaluation from meteoroid orbit, velocity and radioactive dating data
07 p1065 A72-20644

Radio meteors observability and wave reflection from trails, discussing velocities, deceleration and vertical distribution
08 p1130 A72-20712

Radar verification of sporadic E layer formation from meteoritic atoms and ions production by meteoritic ablation
08 p1154 A72-20728

Multicomponent meteoritic composition effects on meteor trails radio wave reflections, obtaining ionospheric electron concentration distribution
08 p1131 A72-20805

Semiannual latitude dependent mesospheric wind patterns from meteor trail observations, suggesting heat inputs from solar radiation and magnetic storm related auroral heating
08 p1159 A72-21227

Soviet papers on ionospheric propagation and meteor trail drifts during IQSY, covering Doppler frequencies recording and mountains effect on radio transmission
08 p1238 A72-21881

Air masses circulation in atmospheric upper layers during IQSY from meteor trail drifts observation by radar tracking method
08 p1161 A72-21882

Radio meteor measurements of ionospheric drifts by two separated stations, obtaining wind velocities mean hourly values correlation coefficient
08 p1238 A72-21883

One dimensional expansion of hot vapor and gases remaining behind meteor body
08 p1238 A72-21884

Mean monthly statistical characteristics of wind regime from meteor trail drifts observations
08 p1162 A72-21885

Optimal variant of meteor wind patrol radar station for atmospheric circulation study
08 p1147 A72-21886

Sectorial radio measurement of meteor trail drifts with If radar signals, determining Doppler shift sign and period
08 p1238 A72-21887

Diurnal and seasonal variation of ambipolar diffusion coefficient in meteor trail zone within upper atmosphere
08 p1238 A72-21888

Mountains located on meteor propagation path of radio waves, investigating effect on transmission region size
08 p1239 A72-21891

Meteor trails radar ranging system with circular vernier scanning and brightness indication with high accuracy
09 p1308 A72-22507

Leonid meteor trail drift measurements in upper atmosphere, comparing radar system with precise goniometric capabilities to photographic methods
09 p1383 A72-22509

Photometric parameters of Leonid meteor ionized trail and turbulent diffusion in M zone, determining electron attachment rate
09 p1384 A72-22510

Electron attachment, photodetachment and turbulent diffusion deionization effects on duration distribution of Geminid meteor radio echoes
09 p1384 A72-22512

Electron attachment rate relation to altitude in radar observation of meteor trails
09 p1384 A72-22513

Radio transmitter characteristics for radar sounding of upper atmosphere and meteor trails
09 p1278 A72-22874

Meteor trail photoobservations for atmospheric small scale turbulences vertical profile, determining eddy minima velocities and turbulent energy dissipation in M zone
09 p1393 A72-23650

Upper atmospheric dynamics and electrodynamic processes for evaluation of meteor trail radar observations in synoptic meteorology
10 p1473 A72-24702

Meteor trail winds over Europe, discussing continuous wave radar observations and measurement errors with respect to height and time
10 p1474 A72-24708

Radio meteor winds determination in Southern Hemisphere from vertically emitted continuous wave radiation, considering diurnal variations and wind and turbulence effects
10 p1474 A72-24709

Meteor trail wind radar measurements over Illinois, discussing scattering properties and monostatic vs multistatic coherent systems
10 p1474 A72-24710

Stanford pulse Doppler radar and digital data acquisition system for meteor trail wind measurements
10 p1438 A72-24711

Meteor trail radar operated under digital controller synchronization and programmed for alternate and simultaneous two orthogonal directions search
10 p1438 A72-24715

Meteor trail radar data processing for upper atmosphere research, proposing dissemination for dynamic synoptic exploration
10 p1438 A72-24716

Multiplicative noise envelope distribution for ionospheric scatter channel from single and diversity radio reception, noting meteor trails effects on electromagnetic wave propagation
12 p1782 A72-27627

Radar facility for weak meteor observation, describing antennas, transmitters, receivers, filters, calibration techniques and recording instruments
13 p1919 A72-29026

Aircraft measurements of radiation pattern of radar antenna system used for meteor height observation
13 p1919 A72-29027

Pulse radar equipment for meteor height measurement from nonsaturated trails by phase difference method
13 p1929 A72-29028

Optimal radar recording systems for meteor trail observations providing signal detection, processing and storage triggering and echo discrimination
13 p1929 A72-29030

Optimal selectivity digital recorders for meteor trails radar observations, considering input process quantization rate and spectral width selection
13 p1929 A72-29031

Atmospheric turbulence anisotropy from meteor trails radar observations statistics, presenting plots of velocity field transverse structure
13 p2038 A72-29036

Photometric meteor mass determination, using models relating radiation intensity, meteor velocity, atmospheric density and instantaneous luminous flux
13 p2039 A72-29218

Linear electron density distribution along faint meteor trail, discussing radio echo time-amplitude characteristics and ionization curve
13 p2039 A72-29219

Meteor trail forms diversity explanation from magnetic pressure and Reynolds number and plasma diffusion in magnetic fields, discussing geomagnetic effect on trail shape
13 p2039 A72-29220

Celestial pole region photographs obtained with TV equipment, emphasizing observations of faint meteoroids and gas trails
13 p2044 A72-29648

Upper atmosphere horizontal wind velocity from meteor trails radio echoes, noting structural function anisotropy
14 p2127 A72-30263

Meteoritic particle movement in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces
14 p2152 A72-30493

Ejected lunar particles in meteoric sporadic background, noting brightness relation to yearly particle concentration
14 p2153 A72-30495

Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants
14 p2153 A72-30499

Fe light emission for simulated meteor conditions, measuring ionization and spectral emission cross sections for Fe reactions with nitrogen and oxygen for 350-2000 eV
14 p2156 A72-30562

Meteor trail drifts at 95 km over Turkmenistan from November 1969-August 1970 radar observations, comparing to Frunze, Dushanbe and Kharkov wind data
15 p2305 A72-31372

Signal generator designed for calibration and control of interferometric radar station to observe and study radar echoes induced by meteor trails
17 p2519 A72-35959

Determination of upper atmosphere parameters by measuring the ambipolar diffusion coefficient by the method of meteor trail radar observations
18 p2688 A72-36862

Determination of the predominant wind vector from meteor radar observations
19 p2857 A72-37740

Meteoritic particle motion in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces
19 p2864 A72-38322

- Ejected lunar particles in meteoric sporadic background, noting brightness relation to yearly particle concentration 19 p2864 A72-38324
- Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants 19 p2864 A72-38328
- Radio meteors observability and wave reflection from trails, discussing velocities, deceleration and vertical distribution 19 p2765 A72-38340
- Radar verification of sporadic E layer formation from meteoric atoms and ions produced by meteoroid ablation 19 p2791 A72-38356
- Particle fragmentation, mass distribution and chemical composition of cometary meteoroids in earth orbit, noting collisional erosion and similarity to stony meteorites 24 p3445 A72-45459
- The possibility of a trans-Saturnian belt of particulate matter. 24 p3446 A72-45472

METEORITE COLLISIONS

- Crater 9 meteorite /Argentina/ entry trajectory and orbital calculations, determining masses and velocities from dynamic conditions at impact 02 p0275 A72-11599
- Comet collisions in planetary nebulae as source of organic compounds in universe in preplanetary era, noting nucleic acid bases in carbonaceous meteorites 04 p0471 A72-14802
- Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations 08 p1232 A72-21152
- Lunar regolith glassy particles formation processes modeling with molten soil samples, emphasizing liquid particles spattering with subsequent cooling during meteoritic impact 13 p2036 A72-28767
- Lunar rock and mineral shock melting and vaporization from hypervelocity meteoroid impacts, calculating entropy, phase changes and thermal equilibrium 14 p2155 A72-30520
- Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations 20 p2969 A72-39257
- Lunar regolith glassy particles formation processes modeling with molten soil samples, emphasizing liquid particles spattering with subsequent cooling during meteoritic impact 21 p3102 A72-40268
- Gas dynamics of the flight and explosion of meteorites. 24 p3439 A72-45020

METEORITE COMPRESSION TESTS

- U COMPRESSION TESTS
- U MECHANICAL PROPERTIES
- U METEORITES

METEORITE CRATERS

- Lunar crater population and distribution time development under meteoroid and solar wind bombardment, developing model for absolute formation ages 01 p0124 A72-10056
- Structure and characteristics of craters and pits in Sikhote-Alin iron meteorite shower, searching for meteor and meteorite dusts and micrometeorites 01 p0125 A72-10101
- Lunar far side crater Tsiolkovsky geology, indicating formation by meteoroid, asteroid or comet impact explosion 06 p0887 A72-18222
- Lunar crater origin mechanisms, considering single and multiple meteor impact and volcanic explosions, low velocity excavation, collapse and material emission 06 p0887 A72-18223
- Martian crater abundance correlation with surface albedo, discussing relative age of light and dark terrains 08 p1230 A72-20983
- Meteorite flux at lunar surface as function of position and earth-moon distance, applying to crater counting 10 p1531 A72-23703
- Stopfenheim Kuppel area as part of meteorite crater event forming Reis Kessel and Steinheim Basin from quartz grain shock feature analysis 10 p1537 A72-24159
- Impact glass-like objects as evidence of meteoritic origin of Lomar Crater /India/, discussing physical, chemical and optical properties 11 p1723 A72-26521
- Siberian Popigay river basin hollow as meteoritic explosion crater, discussing pseudovolcanic properties 13 p1947 A72-28754

- Transstructural topographic and gravity profiles of three Mauritanian meteorite craters, showing residual negative gravity anomalies 13 p1947 A72-28756
- Mars doublet cratering by impacting meteoroid breakup due to stresses in gravitational field, using Monte Carlo simulation 14 p2149 A72-30317
- Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center 14 p2153 A72-30496
- Geometric similitude of lunar and terrestrial craters. 17 p2615 A72-35681
- Displacements within impact craters. 17 p2549 A72-35686
- Savonoski crater, Alaska - A possible meteorite impact structure. 19 p2790 A72-37861
- Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center 19 p2864 A72-38325
- Sand deposition due to wind action in Martian craters, comparing to terrestrial analogs 20 p2969 A72-39389
- Lunar crater origins due to external impact of particles moving within earth-moon gravitational dipole during earliest history stage 22 p3226 A72-42538

- Accretion processes leading to formation of meteorite parent bodies. 24 p3444 A72-45454

METEORITIC COMPOSITION

- Pu-244 fission Xe isotopic composition parameters in achondrite meteorites, using lunar spallation systematics 01 p0124 A72-10058
- L-chondrite Assam, determining He, Ne and Ar concentrations and isotopic compositions and galactic and solar flare irradiation track densities 01 p0124 A72-10060
- Hibonite /Ca-Al-Ti-rich xenoliths/ from Leoville and Allende polymict brecciated HL group chondritic meteorites 01 p0125 A72-10067
- Iron River meteorite, discussing history, physical characteristics, element distribution and Widmanstätten structure 01 p0126 A72-10105
- Chemical analysis of iron meteorites, tabulating Ni, Co, P and C content 01 p0126 A72-10108
- Chondrules occurrence in iron meteorite, investigating bulk chemical composition and mineral properties 01 p0127 A72-10294
- Siderophilic element content relation to oxidation state of ordinary chondrites, using Ir/Ni concentrations from neutron activation analysis 02 p0277 A72-11896
- Oxygen isotope ratios in iron meteorites magnetite crust and cosmic spherules as indicators for atmospheric oxygen development 02 p0279 A72-12117
- Mineralogical and chemical compositions of Markovka chondrite 02 p0280 A72-12284
- Silicate microspherules distribution anomaly in peats of Tunguska meteorite fall area 02 p0281 A72-12293
- Organic cosmochemistry evolution, discussing radio astronomical observations, lunar soil samples, meteorite analysis and interstellar gas cloud molecules 03 p0320 A72-13171
- Xe and Kr abundance and isotopic composition in silicate inclusions of iron meteorites 03 p0435 A72-13690
- Al 26 production rates from Al, Si, S, Mg and Ca in Bruderheim chondrite by weighted least squares analysis 03 p0435 A72-13691
- Meteorite structure and chemical composition, describing investigation methods, origin and evolution 03 p0438 A72-13976
- Magnetite forms in Orgueil meteorite, observing platelets, stackings and framboids by scanning electron microscope 04 p0569 A72-14506
- Lunar Imbrian Basin formation, discussing micrometeorite component composition of Apollo 14 soil samples 05 p0715 A72-16160
- Alfianello meteorite inspection by optical microscopy for petrological features of shock metamorphism in chondrites 05 p0722 A72-17152
- Johnstown achondrite meteorite composition, presenting published and unpublished data on minor and trace elements 05 p0722 A72-17154
- Uranium content and radiogenic ages by fission track analysis in hypersthene, bronzite, amphibole and carbonaceous chondrites 06 p0878 A72-17791
- Meteorites fall in Germany, discussing composition, size and color classification, frequency and locations 07 p1070 A72-19124
- Oxygen isotopic temperatures and mineral compositions of equilibrated ordinary chondrites 07 p1076 A72-19588
- Oxygen isotopic abundances and equilibrium temperatures of meteoritic minerals, chondrules, meteorites and planets 07 p0985 A72-19589
- Organic origin of meteoritic hydrocarbons in early solar system related to Fischer-Tropsch reaction 07 p1076 A72-19590
- Meteorite genesis and formation processes from composition characteristics, discussing age determination methods and mineralogical classifications 07 p1082 A72-20302
- Xe and Kr mass fractionation and isotopic anomalies in ordinary chondrites, analyzing meteorite samples by mass spectrometry 07 p1084 A72-20497
- Multicomponent meteoritic composition effects on meteor trails radio wave reflections, obtaining ionospheric electron concentration distribution 08 p1131 A72-20805

Microscopic, chemical and morphological studies of ultralarge meteorite spherules in Yakut ASSR, noting composition 08 p1229 A72-20838

Volatile and siderophile elements in achondrites and ocean ridge basalts from radiochemical neutron activation analysis 09 p1385 A72-22598

Trapped He, Ne and Ar isotopic variations presence in meteorites due to rare gas ions implantation by solar wind and flares 09 p1385 A72-22599

Extraterrestrial abiogenic organic hollow spheres of Orgueil meteorite evaluated according to intrinsic and extrinsic criteria 09 p1385 A72-22640

Orgueil meteorite examination by mass spectroscopy and gas chromatography, identifying amino acids of extraterrestrial origin 09 p1393 A72-23549

Rare gases concentrations and isotope ratios in Haverø ureilite meteorite, including He, Ar, Ne, Kr and Xe 10 p1538 A72-24167

High C 13 content in carbonaceous phases of carbonaceous chondrites accounted for by Rayleigh distillation with oxidized and reduced forms of carbon 10 p1547 A72-24951

Allende carbonaceous chondrite composition analysis, suggesting formaldehyde presence and significance about possible origins 10 p1549 A72-25022

X ray fluorescence spectrometric analysis of carbonaceous chondrites for chemical subgroups 11 p1723 A72-26525

Thermal release patterns and activation energies of spallogenic He, Ne and Ar from Carbo iron meteorite 12 p1866 A72-27116

Nonprotein amino acids from spark discharges, comparing with Murchison meteorite amino acids 12 p1778 A72-27749

Handbook on elemental abundances in meteorites covering individual elements, emission and X ray spectrography, colorimetry, neutron activation and isotope dilution 12 p1876 A72-28204

Microprobe analysis of Timmersoi hypersthene chondrite from Niger Republic, noting equilibrium between olivine and orthopyroxene at 850 C 13 p2035 A72-28751

Microprobe analysis of Murchison and Vigarano meteorites, noting fractionation processes for Ca distribution in olivines 13 p2036 A72-28752

Xenolithic origin for silicate inclusions in anatase of Landes meteorite from West Virginia 13 p2036 A72-28753

Artificial meteor ablation on iron oxides by arc heated air plasma stream for product and environment identification studies 14 p2150 A72-30319

Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center 14 p2153 A72-30496

Neutron activation data for Ru, Os, Ir, Pt and Pu in iron meteorites, noting correlation 14 p2157 A72-30582

Ar-39/Ar-38 cosmic ray exposure age calculation from Sikhote-Alin meteorite fall fragment content of Ar-39, Ar-38, Ne-21 and He-3 14 p2157 A72-30584

Model for textural features and mineralogical composition of Ca and Al-rich inclusions in C3 chondrites during condensation in primitive solar nebula 14 p2157 A72-30585

Pavel stony meteorite microspectral analysis to obtain metallic elements weight percentages in chondrules, matrix and core, using laser source for local vaporization and excitation 14 p2159 A72-30785

Chondrule like spherules from supercooled molten oxide and silicate droplets by carbon dioxide laser heating compared with meteoritic chondrules 15 p2303 A72-31306

Abiotic origin of organic compounds in carbonaceous chondrites, analysing Murchison and Murray meteorites by combined gas chromatography-mass spectroscopy technique 15 p2306 A72-31625

Chondrite Pawel microspectral analysis with laser beam vaporization of sample from microzone 16 p2450 A72-32850

Enstatite chondrite Abee isotopic ratios of Gd, Sm and Eu comparison with terrestrial samples 16 p2457 A72-33566

Platinum and gold in chondritic meteorites. 17 p2610 A72-35149

The isotopic composition and elemental abundance of gallium in meteorites and in terrestrial samples. 18 p2723 A72-36061

Gas retention chronology of Petersburg and other meteorites. 18 p2723 A72-36062

Mineralogy, bulk chemistry and sample shape and mass of Seoni /India/ chondrite, observing extensive recrystallization 19 p2858 A72-37860

Mineralogical and chemical researches on L-chondrites - Gergenti. 19 p2858 A72-37862

Elemental abundances in stone meteorites. 19 p2858 A72-37863

Geochemistry of amino acid enantiomers - Gas chromatography of their diastereomeric derivatives. 19 p2762 A72-38224

Sikhote-Alin meteorite shower individual specimens mass distribution with respect to distance from crater center 19 p2864 A72-38325

Ordinary chondrite chemical and mineralogical properties establishment during solar system formation, noting fractionation events 20 p2969 A72-39334

Rocks and meteorites analysis techniques evaluation, using Apollo 11 fines results to evaluate activation analysis for geochemistry and cosmochemistry applications 20 p2899 A72-39827

Multielement neutron activation analysis of geological and lunar material using chemical group separations and high resolution gamma spectrometry. 20 p2899 A72-39830

Neutron activation techniques for nondestructive analysis of meteorites and lunar rocks, noting types of nuclear reactions for geochemical application 20 p2899 A72-39832

Non-destructive activation analysis of some elements in stony meteorites by proton- and bremsstrahlen-irradiation. 20 p2899 A72-39833

Neutron activation and mass spectrometry methods for geochemical analysis of rare earth elements in meteoritic, lunar and terrestrial materials 20 p2899 A72-39835

On the determination of trace elements in meteoritic phases by neutron activation analysis. 20 p2900 A72-39838

Elemental abundance trends in the australite strewn field by non-destructive neutron activation. 20 p2900 A72-39839

A re-examination of relationships among pyroxenepagioclase achondrites. 20 p2900 A72-39840

Coincidence counting applied to the activation analysis of meteorites and rocks. 20 p2900 A72-39841

Iron transport in chondrites - Evidence from the Warrenton meteorite. 21 p3104 A72-40491

Chondrite and achondrite Nb abundance from spark source mass spectroscopic analysis 21 p3104 A72-40492

Cosmic abundance of iron and nature of primitive material in meteorites. 22 p3220 A72-41963

Instrumental neutron-activation analysis of the troilite of the Sikhote-Alin meteorite 22 p3225 A72-42472

Depth distributions of cosmic ray produced radionuclides in chondrites and achondrites, determining aphelia from Al 26 activities 22 p3228 A72-42861

Isotopic compositions of rare gases in the carbonaceous chondrites Mokoia and Allende. 22 p3229 A72-42899

Chondrite Al-Ir abundance association for L compositional class consistent with Larimer condensation mechanism 23 p3335 A72-43266

Shock damaged zircon, corundum, rutile, monazite and quartz crystalline inclusions in Muong Nong-type indochinite /tektite/, noting production from detrital sedimentary materials as possible terrestrial origin 23 p3335 A72-43398

Spectrographic, photometric and chemical identification of Giacobinid /Draconid/ meteoroids, noting compositional similarity to carbonaceous and olivine-bronzite chondrites 23 p3336 A72-43600

Determination of Ni, Ga, and Ge in iron meteorites by X-ray fluorescence analysis. 23 p3262 A72-44128

Mundrabilla meteorites geographical location, external appearance, microstructure and chemical composition, suggesting shower occurrence 23 p3339 A72-44130

Rare earth and other abundances in the Murchison carbonaceous meteorite. 23 p3262 A72-44131

Minerals discovered in meteorites, tabulating formula and occurrence and plagioclase composition 23 p3262 A72-44132

Evidence for vapor fractionation in the origin of chondrules. 23 p3339 A72-44134

Determination of the coefficient of electron attachment to particles of meteor material 23 p3339 A72-44169

The chemical classification of iron meteorites. VI - A reinvestigation of irons with Ge concentrations lower than 1 ppm. 24 p3436 A72-44697

Irradiation history of grain aggregates in ordinary chondrites - Possible clues to the advanced stages of accretion. 24 p3444 A72-45455

Conditions in the early solar system, as inferred from meteorites. 24 p3445 A72-45458

Particle fragmentation, mass distribution and chemical composition of cometary meteoroids in earth orbit, noting collisional erosion and similarity to stony meteorites 24 p3445 A72-45459

METEORITIC DAMAGE

Tunguska explosion of 30 June 1908, determining air waves propagation velocity 03 p0438 A72-13981

Meteoritic cosmic catastrophe, interpreting flat depression in northern Siberian plateau Khatanga river basin 05 p0713 A72-15977

Apollo 14 lunar breccia samples, observing chondrules from meteoritic impact event 05 p0715 A72-16161

Shock metamorphism in Luna 16 soil sample, indicating regolith formation by meteorite impact 09 p1380 A72-22259

Siberian Popigay river basin hollow as meteoritic explosion crater, discussing pseudovolcanic properties 13 p1947 A72-28754

Lunar dumbbell shaped glass globules formation due to rotation and surface tension effects of ejecta from meteoric impacts 15 p2306 A72-31628

Lunar ash flows - Isothermal approximation. 18 p2723 A72-36026

Seismic data from lunar geophysical stations network, noting moonquakes and meteoroid impacts 18 p2724 A72-36283

Savoniski crater, Alaska - A possible meteorite impact structure. 19 p2790 A72-37861

Metal barrier maximum puncturable thickness dependence on high velocity meteorite particle impact parameters 22 p3234 A72-42217

Impact tests for aid in data interpretation of measured meteor particles impact on spacecraft structures, noting transducer response dependence on impact angle 22 p3234 A72-42218

METEORITIC DUST

U MICROMETEORIODS

METEORITIC IONIZATION

U ATMOSPHERIC IONIZATION

U METEOR TRAILS

METEORITIC MICROSTRUCTURES

Meteorite structure and chemical composition, describing investigation methods, origin and evolution 03 p0438 A72-13976

Shock transformed chondrite texture observed in thin plates by UV fluorescence 05 p0722 A72-17151

Phosphorus effect on Widmanstätten pattern in iron meteorites, using Fe-Ni-P phase diagram and cooling experiments 06 p0878 A72-17792

Mundrabilla meteorites geographical location, external appearance, microstructure and chemical composition, suggesting shower occurrence 23 p3339 A72-44130

METEOROID CONCENTRATION

Monte Carlo method application to meteor stream formation by meteor material ejection from comet nucleus, determining age of Draconids 02 p0282 A72-12333

Meteor count by naked eye and binocular visual observation in Crimea, obtaining luminosity functions 06 p0881 A72-17932

Frost rule for meteoroid spatial sorting as basis for Allende meteorite shower strewn field examination of fragment mass and position 08 p1237 A72-21651

Radio echo determination of meteor body distribution by mass with allowance for electron attachment and overestimated nighttime values 09 p1383 A72-22505

Meteorite flux at lunar surface as function of position and earth-moon distance, applying to crater counting 10 p1531 A72-23703

Monte Carlo method application to meteor stream formation by meteor material ejection from comet nucleus, determining age of Draconids 13 p2039 A72-29217

Ejected lunar particles in meteoric sporadic background, noting brightness relation to yearly particle concentration 14 p2153 A72-30495

Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants

14 p2153 A72-30499
Quadrantid underdense and dense meteors observations during sunrise on 16.67 MHz pulsed radar
15 p2312 A72-32197
Meteor count by naked eye and binocular visual observation in Crimea, obtaining luminosity functions
18 p2730 A72-37157
Ejected lunar particles in meteoric sporadic background, noting brightness relation to yearly particle concentration

19 p2864 A72-38324
Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants

19 p2864 A72-38328
Meteoroid bodies particle density from basal photographs, noting dependence on orbital parameters

20 p2969 A72-39395
Allowance for the striking angle of a meteoric body with penetration-depth and piezoelectric sensors in the evaluation of the spatial density of meteoric matter

22 p3234 A72-42219
Results of a comparison between radar meteor wind measurements and simultaneous lower ionosphere drift measurements in the same area.

22 p3154 A72-42361
Interplanetary objects in review - Statistics of their masses and dynamics.

24 p3435 A72-44688
The possibility of a trans-Saturnian belt of particulate matter.

24 p3446 A72-45472

Shower structure in sporadic meteor background from statistical analysis of radar range-time photographs, noting unidentified radiants activity

15 p2313 A72-32366

Determination of the coefficient of electron attachment to particles of meteor material

23 p3339 A72-44169

A meteor spectrum in the infrared region.

23 p3341 A72-44473

Meteor streams orbital elements dispersion from photographic data, and asteroid stream percentage variation with concentration of orbits to ecliptic plane.

24 p3445 A72-45462

METEORIODS

NT DRACONID METEORIODS

NT GEMINID METEORIODS

NT LEONID METEORIODS

NT METEOROID DUST CLOUDS

NT MICROMETEORIODS

NT ORIONID METEORIODS

NT PERSEID METEORIODS

NT QUADRANTID METEORIODS

NT RADIO METEORIODS

NT SPORADIC METEORIODS

Electron attachment rate determination by combined photographic and radar observation of meteors

01 p0128 A72-10601

Meteor spectrum analysis, presenting tables for Soviet observations

03 p0438 A72-13979

Meteor observation and counting, discussing meteor stream formation along comet orbit

05 p0712 A72-15975

Meteor passage time determination by optical shutter with wedge-shaped blades for light flux periodic intersection and production of two discontinuous lines for identification

06 p0816 A72-17930

Meteor streams effect on atmospheric motions turbulence intensity based on radar observations

06 p0842 A72-18045

Meteorite genesis and formation processes from composition characteristics, discussing age determination methods and mineralogical classifications

07 p1082 A72-20302

Galactic cosmic ray modulation region evaluation from meteoroid orbit, velocity and radioactive dating data

07 p1065 A72-20644

Wind measurements in lower thermosphere by meteor radar method, presenting models of prevailing circulation in meteor zone over Eurasia and Arctic

08 p1161 A72-21538

Radar measurement of meteor bodies mass distribution parameter

08 p1239 A72-21889

Meteor method for determining errors in rate measurement of electron attachment to neutral air particles based on nonexistent recombination, turbulent diffusion and photodetachment

09 p1383 A72-22503

Nighttime radar method of meteor radio echo observation to determine electron attachment rate to neutral air particles

09 p1383 A72-22504

Radar equipment complex in Dushanbe for upper atmosphere wind measurements in meteor physics studies

09 p1308 A72-22506

Multibeam indicator with block diagram description for meteor ranging radar and photofilm based recording system

09 p1308 A72-22508

Meteor-induced magnetic effect on cosmic ray intensity for meteor streams with orbits normal or parallel to interplanetary magnetic field lines of force

13 p2029 A72-28592

Celestial pole region photographs obtained with TV equipment, emphasizing observations of faint meteoroids and gas trails

13 p2044 A72-29648

Cosmic ray irradiations study of gas rich meteoroid aubrites by track method, comparing with lunar soils

15 p2303 A72-31308

Atmospheric ion composition analysis by RF mass spectrometer during rocket ionosphere sounding, discussing meteor ionization layers

15 p2225 A72-31915

Meteor passage time determination by optical shutter with wedge-shaped blades for light flux periodic intersection and production of two discontinuous lines for identification

18 p2693 A72-37155

The effect of meteoric ion processes on radio studies of meteoroids.

23 p3336 A72-43558

Flyby missions to comets, asteroids and meteors for obtaining solar system geological information, considering space dynamics feasibility

23 p3340 A72-44351

Interplanetary objects in review - Statistics of their masses and dynamics.

24 p3435 A72-44688

Meteor-induced magnetic effect on cosmic ray intensity for meteor streams with orbits normal or parallel to interplanetary magnetic field lines of force

24 p3435 A72-45092

Particle fragmentation, mass distribution and chemical composition of cometary meteoroids in earth orbit, noting collisional erosion and similarity to stony meteorites

24 p3445 A72-45459

METEOROLOGICAL BALLOONS

Balloon-borne radiometer-sonde measurement of stratospheric downward emission in absorption spectral region of water vapor rotational band

07 p0982 A72-19105

Eole satellite relay system for weather balloon location and data collection and transmission to ground stations

09 p1394 A72-22600

Upper wind measurement by balloon-borne targets or radiosondes tracking by primary and secondary radars and radio theodolites

13 p1917 A72-28697

Meteorological rising balloon systems accuracy limitation, noting response to wind field changes, aerodynamic self oscillations and radar tracking errors

13 p1990 A72-28817

Small scale atmospheric turbulent motions sensing by FPS-16 Radar-Jimsphere meteorological balloon system, analyzing wind velocity data from dual radar measurements

13 p1990 A72-28818

French tetrahedral and spherical meteorological balloons, discussing projects Eole and Essov to sound Southern Hemisphere and stratosphere respectively

13 p1897 A72-28828

Eole satellite observed meteorological balloon data analysis, obtaining mean zonal velocity, meridional velocity and temperature vs latitude from statistical estimates

15 p2266 A72-31980

Data system in Eole satellites program, discussing balloon localization, UHF information transmission and reception, distance measurement and data acquisition

15 p2268 A72-31981

Report to COSPAR on Argentina space program covering sounding rockets and balloons and Experimental Inter-American Meteorological Network meteorological rocket launchings

15 p2338 A72-32015

Behavior of spherical balloons in wind shear layers.

18 p2643 A72-36963

Wind tunnel investigation of shapes for balloon shelters.

20 p2885 A72-38967

METEOROLOGICAL CHARTS

Weather map numerical analysis for Northern Hemisphere, describing program with flow field for geopotential value checking

01 p0094 A72-10196

Digital simulation of general atmospheric circulation via spatial finite difference dense grid, considering surface properties and pressure distribution maps

02 p0252 A72-11652

Mesosphere meteorological sounding by acoustic grenade and pitot probe techniques, investigating seasonal and latitudinal variations

03 p0383 A72-13384

Computerized synoptic weather map forecasting of heavy snowfall in Colorado

04 p0542 A72-14685

Nimbus 4 satellite-borne selective chopper radiometer design characteristics, obtaining maps of stratospheric warmings in both hemispheres

08 p1173 A72-22168

Weather analysis for mountainous terrain from potential temperature surface maps and vertical cross sections

09 p1344 A72-22431

Precipitation exceedance rates charts for various risks, using statistical models

13 p1989 A72-28811

Gravity waves on leeward side of Continental Divide in Colorado, noting generation by winds and storms

14 p2128 A72-30343

Method of constructing a forecast chart of H sub 500 anomalies on the basis of several analogs

19 p2828 A72-38000

Annual height and temperature distribution charts of polar and tropical tropopause over Northern Hemisphere

23 p3310 A72-43534

METEOROLOGICAL FLIGHT

Operational aviation meteorological requirements, reviewing aircraft categories, ATC systems and avionics and navigational aids

10 p1508 A72-25078

East African low level cross equatorial air current exploration, using light aircraft-borne Doppler radar wind finding equipment

12 p1840 A72-27703

High level Canberra flight for three dimensional picture of wind and temperature fields, showing CAT, gravity waves and smooth flight characteristics

12 p1841 A72-27709

Thunderstorm penetration by F-100 aircraft to study turbulence hazard relation to updraft size and short period fluctuation-induced acceleration changes

13 p1992 A72-28852

Lower stratospheric turbulence and horizontal temperature gradients from RB-57F aircraft meteorological measurements

13 p1993 A72-28864

Aircraft laser radar measurements of atmospheric backscattering coefficients for cloud and underlying surface studies

15 p2266 A72-31908

Water vapor flux periodic and spatial variations from airborne measurements, confirming height variation of maximum spectral density wavelength for crosswind runs

18 p2706 A72-36632

Theoretical model, laboratory experiments and in situ measurements by instrumented sailplane for investigating cloud and precipitation formation physics relationship to atmospheric pollutants cleansing

23 p3311 A72-44263

METEOROLOGICAL INSTRUMENTS

NT CLOUD HEIGHT INDICATORS

NT IONOSONDES

NT RADIOSONDES
NT RAIN GAGES
NT RAWINSONDES
NT WEATHER DATA RECORDERS
NT WIND VANES

Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments 04 p0542 A72-14680

Standardized automatic telemetering hydrometeorological station, discussing structure, operation, working principles and sensors 10 p1462 A72-25009

Automatic remote transmitting meteorological station, discussing development, working principle, technological features and sensors 10 p1462 A72-25010

Air hygrometer with heated electrolytic sensor for atmospheric humidity determination by automatic meteorological stations 10 p1483 A72-25016

Sensors measurement accuracy for rainfall amount and duration determination by automatic remote transmitting meteorological station 10 p1483 A72-25017

Mean wind direction determining circuit for meteorological data collecting system 10 p1484 A72-25018

Classification of automatic meteorological ground stations networks in populated areas, discussing required equipment, data transmission, real time operation and costs 10 p1507 A72-25021

Meteorological observations and instrumentation - AMS Conference, San Diego, March 1972 10 p1507 A72-25076

Momentum anemometer for wind velocity and vorticity measurement, discussing design principle and performance advantages 10 p1484 A72-25089

Low cost meteorological sounding rocket evolution, including Arcas, Lokidart and Viper Dart systems for various altitude ranges 10 p1552 A72-25090

Airport meteorological instrumentation, discussing ground wind, visibility, cloud height, air temperature and humidity detectors and radar equipment 10 p1484 A72-25093

Precision radiometric techniques in meteorology and geostrophysics, discussing references, pyrohelimetric scale, transfer calibrations and solar radiation measurements 10 p1485 A72-25097

Automatic ceilometer systems for sky state reporting, discussing computerized cloud simulation model, instrumentation and data sampling 13 p1992 A72-28850

Aeronautical requirements for meteorological reporting and instruments at aerodromes, discussing surface wind, visibility, runway range, weather, temperature and pressure observations 13 p1938 A72-28868

Azimuth display of attenuation instrument used with weather radar to measure rain induced attenuation over slant paths 15 p2207 A72-32101

Measurement of unsteady hydrometeorological processes on inertial devices 19 p2830 A72-38774

Air temperature measurement errors due to instrument inertia under various meteorological conditions and atmospheric stratification 23 p3310 A72-43536

METEOROLOGICAL PARAMETERS

Acoustic echo sounder as real time monitor of airport environmental meteorological parameters 01 p0103 A72-11137

Microwave propagation anomalies due to meteorological factors, discussing superrefractive atmospheric layers effects on radar data reliability and undesirable echoes appearance on display screen 02 p0182 A72-12746

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratospheric temperature rises 03 p0383 A72-13477

Stationary-nonstationary temporal sampling for synoptic meteorological networks, illustrating oceanic wind speed measurements 06 p0842 A72-18436

Meteorological tests for mathematical models in study of climate changes 06 p0843 A72-18451

Refractive index structural constant relationship to atmosphere mean meteorological parameters, observing phase difference fluctuations of radio propagation in atmospheric surface layer 06 p0778 A72-18750

Meteorological elements vertical profiles under cloud cover condition by solving heat and humidity transfer equations based on satellite data 07 p1029 A72-18860

Atmospheric attenuation due to rain based on links experiment and statistical study of equivalent precipitation for given path length and time percentage 07 p0939 A72-19188

Meteorological effects on cosmic rays, deriving muon and pion intensity and meteorological coefficient formulas and computer calculation scheme 07 p1066 A72-20654

Computerized numerical calculation of muons production spectrum, angular distribution and Coulomb scattering in determining meteorological factors effects on cosmic rays 07 p1067 A72-20655

Atmospheric pressure, temperature, humidity and 200-mb level changes effects on cosmic ray neutron component intensity, using multifactorial regression analysis 08 p1225 A72-20702

Internal atmospheric gravity wave effects on ionospheric parameters obtained by vertical sounding, considering electron concentration isoline pattern 08 p1154 A72-20735

Lin parameter and eddy viscosity of atmospheric vortex streets, using TIROS and Gemini data 08 p1200 A72-21621

Global radiation flux and energy sum calculation from turbidity factor and cloud cover parameters, comparing with measurements in tropics and polar region 08 p1201 A72-21797

Probabilistic-statistical method for recognition and short term forecasting of convective clouds, spring floods, hail, thunderstorms and showers 08 p1202 A72-22115

Hydrometeorological parameters spatial-temporal variations analysis and forecasting based on association functions and conditional probability distribution functions 08 p1202 A72-22116

Averaging period parameters determination for weather climatic norms forecasting with minimum mean square error 08 p1202 A72-22117

Atmospheric surface layer meteorological elements representative values determination as optimal filtration problem, examining data correlation with errors in initial statistical characteristics 08 p1203 A72-22121

Meteorological measurements representativeness and analog discrete filters synthesis with optimal data processing and weighting function averaging procedures 08 p1203 A72-22123

Rainfall rate estimation by radar reflectivity measurements based on atmospheric parameters obtained from radiosonde data 09 p1345 A72-22449

Parameterization of turbulent flux of momentum, heat and moisture at ground in baroclinic planetary boundary layer 09 p1346 A72-22810

Aspiration condenser spectrometry of small ion mobility as function of height and atmospheric conditions 09 p1346 A72-23267

Wind and temperature fields periodic updating, considering error reduction as function of time intervals between updates 09 p1348 A72-23659

Viking Lander meteorology experiments to measure Martian atmosphere pressure, temperature, wind speed and direction and water vapor content 10 p1540 A72-24388

Temperature indetermination and large scale weather patterns in winter from 70 year temperature records 10 p1507 A72-25003

Automatic hydrometeorological stations standardized sensors, describing data converters for atmospheric pressure, precipitation, humidity and wind and water and soil temperature measurements 10 p1483 A72-25014

Reference radiosondes for quality control of global high altitude temperature, pressure and humidity measurements, discussing dual soundings and synoptic comparison 10 p1484 A72-25077

Radar echo maximum intensity display by digital comparator with shift register video signals storage in National Severe Storms Laboratory 11 p1591 A72-25762

Snow accumulation determination from snow intensity based on visibility estimates, noting application to forecasting 11 p1682 A72-26085

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratospheric temperature rises 11 p1682 A72-26247

Stochastic dynamic prediction of meteorological fields in deterministic and indeterminate atmosphere 12 p1838 A72-27020

Meteorological reference level location without wind information for use in numerical weather prediction 12 p1838 A72-27024

Millimeter to meter waves propagation conditions prediction in horizontally inhomogeneous coastal foreground by meteorological parameters, considering wind effects on refractivity 12 p1784 A72-27798

Earth atmosphere boundary layer nonstationary problems, considering diurnal changes of meteorological fields and nonperiodic evolution of elements from wind variations 12 p1841 A72-27988

Earth atmosphere general circulation model based on planetary boundary layer parameterization, considering surface stress and heat and moisture flux 13 p1988 A72-28442

F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number 13 p1946 A72-28597

Parameterized daily profile characterization of global atmospheric conditions to minimize computer storage, discussing mathematical representations, wind, density and temperature profiles 13 p1989 A72-28806

Model determining system responses to nominal profiles of atmospheric parameters from orbital to 25 km altitudes 13 p1989 A72-28807

Cost analysis of high altitude meteorological network data with respect to research effectiveness and data reduction 13 p1990 A72-28820

Acoustic ray path method for computing atmospheric conditions effect on aircraft noise propagation, using digital computer 13 p1897 A72-28840

Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement 13 p1991 A72-28841

Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables 13 p1994 A72-28867

Meteorological information requirements for V/STOL aircraft design, airport location, runway orientation, aircraft operations and ATC simulation 13 p1994 A72-28869

Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort 13 p1994 A72-28876

Thermospheric parameters seasonal and latitudinal variations calculation based on atmospheric model with components ionization and molecular oxygen dissociation as main heat sources 14 p2128 A72-30463

Precision frequency standards practical utility under field operating conditions, discussing propagation effects due to atmospheric and frequency parameters 15 p2199 A72-32066

Global meteorological data analysis using Gram-Schmidt generated orthogonal polynomial base functions 15 p2266 A72-32719

Geomagnetic and meteorological elements lunar daily variation calculation by modified Chapman-Miller method, estimating confidence limits for parameters reliability 16 p2384 A72-32972

Local climatic forecasts via influence equations based on past meteorological data as initial conditions, obtaining solution by operational analysis methods 16 p2418 A72-33379

Meteorological data analysis for CAT encounter of Boeing 747 flight over Nantucket Island on 4 November 1970 16 p2418 A72-33525

Stepwise multiple regression techniques for Nimbus 3 IR interferometer-spectrometer (IRIS) data inversion, obtaining radiation predictors of meteorological parameters 16 p2418 A72-33666

Russian book on atmosphere studies covering determination of periodic variations in meteorological elements to assess seasonal pressure, temperature and wind variations 17 p2546 A72-34975

Meteorological effects on SST performance, considering temperature, wind, turbulence, hydrometeors, ozone and radiation effects 17 p2577 A72-35790

Dependence of the optical transfer function of a turbulent atmosphere on the averaging time 18 p2707 A72-36968

High level atmospheric refraction of electromagnetic waves as function of elevation and meteorological element vertical stratification 19 p2764 A72-37349

Dynamic meteorological problems solution by four dimensional analysis, discussing information deficiency effect on boundary value problems analysis in numerical weather forecasting 19 p2828 A72-37997

Atmospheric pressure, temperature, humidity and 200-mb level changes effects on cosmic ray neutron

component intensity, using multifactorial regression analysis

19 p2852 A72-38330

Internal atmospheric gravity wave effects on ionospheric parameters obtained by vertical sounding, considering electron concentration soline pattern

19 p2791 A72-38363

Zenith angle dependence of the meteorological corrections coefficients for cosmic ray hard component.

19 p2852 A72-38632

The determination of the vertical structure of the atmosphere from satellite measurements

19 p2792 A72-38700

Atmospheric pressure, density and scale height calculated from H Lyman-alpha absorption allowing for the variation in cross-section with wavelength.

19 p2793 A72-38859

Photogrammetric refraction equation and integral interpretation for actual atmosphere, climate and weather conditions suitable for photographic flights

20 p2927 A72-39739

Computerized long term weather forecasting via mathematical modeling of atmospheric processes based on meteorological parameters worldwide observational data

20 p2948 A72-39939

On the hydrographic response to transient meteorological disturbances.

21 p3077 A72-40465

Ground humidity and wind velocity effects on terrestrial scintillation, considering adiabatic temperature stratification factor

21 p3007 A72-40738

Techniques for dealing with the effects of bad weather in satellite communications systems.

21 p3017 A72-40856

Climatology of the occurrences of thundery weather over Gauhati Airport.

22 p3202 A72-42887

Earth atmosphere boundary layer nonstationary problems, considering diurnal changes of meteorological fields and nonperiodic evolution of elements from wind variations

22 p3202 A72-43002

Allowance for the influence of orography in a dual-layer model of the atmosphere

23 p3310 A72-43343

Reproduction of the climatic distribution of meteorological elements on the basis of a nonadiabatic spectral model of the atmosphere

23 p3311 A72-43626

A method of calculating meteorological elements for mesoscale processes

24 p3420 A72-44633

Determination of refraction in the propagation of electromagnetic waves at the earth's surface

24 p3379 A72-44865

F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number

24 p3398 A72-45097

METEOROLOGICAL PROBES

U SONDES

METEOROLOGICAL RADAR

Radar meteorology, discussing equipment design, radar observation station net need, aeronautical applications and laser devices utilization

02 p0254 A72-12783

Radar accuracy for precipitation measurements, discussing error sources

02 p0254 A72-12784

Remote meteorological elements sensing in terminal area, discussing radar, ceilings, thunderstorm warning, slant range visibility, low level winds and wind shear

04 p0543 A72-14692

Combined radar-acoustic system for lower atmosphere temperature sounding, considering use in air pollution studies and short range weather forecasting

05 p0663 A72-16690

Peak reading and thresholding in radar weather data processing, describing PPI map

06 p0843 A72-18440

Radar observing apparent land breeze front off Wallops Island, giving temperature and wind profiles

06 p0843 A72-18441

Broadbeam S band radar application to quantitative analysis of severe storms, calculating liquid water content

06 p0843 A72-18442

Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions

07 p1029 A72-18838

Meteorological radar measurements, noting missile tracking radio interferometer noise due to stochastic refractive ray bending and associated multipath conditions

08 p1136 A72-21978

Soviet papers on cloud seeding effects and meteorological radar studies covering precipitation formation, atmospheric model and reflected signal statistical characteristics

08 p1201 A72-21992

Meteorological radar signal reflectivity probability and quantization error dependence on incoherent storage device parameters from computer simulation

08 p1201 A72-21995

Cloud and precipitation dynamic processes effects on reflected radar signal statistical characteristics

08 p1137 A72-21996

Cloud and precipitation elementary processes effects on reflected radar signal fluctuation spectrum during hydrometeor formation

08 p1201 A72-21997

Automatic meteorological stations development in populated areas, foreseeing data gathering by sensors with satellite and radar efficiency taken into account

10 p1507 A72-25008

Single engine aircraft-borne weather radar with electronically scanned steerable phased array antenna [SAE PAPER 720315]

11 p1591 A72-25579

Wavelength choice for ground based operational weather radar systems as function of reflectivity dependence on scattering hydrometeors/raindrops, hailstones/

13 p1917 A72-28694

Meteorological formations investigation with lidar, discussing laser beam interaction with clouds, fog and precipitation with allowance for multiple scattering

13 p1995 A72-29595

Weather radar observations of Alps foothill region convective precipitation development and lifetime

13 p1996 A72-30088

Azimuth display of attenuation instrument used with weather radar to measure rain induced attenuation over slant paths

15 p2207 A72-32101

Airborne ground mapping and meteorological radar with steerable phased array antenna without mechanical scanners

15 p2200 A72-32216

Radar meteorology in the Soviet Union - 1970.

18 p2707 A72-36719

Studies of vertical motions in cloud systems by using a coherent pulse radar in the decimeter wavelength range

19 p2829 A72-38773

Investigation of moisture content in the atmosphere by the method of ground radar thermal measurements

20 p2949 A72-39945

Altitudinal dependence of upper atmosphere winds according to radar and ionosphere data

20 p2920 A72-40074

Aircraft radar for weather data, ground mapping, avoidance modes and independent landing monitor function, presenting straight and slant approach simulation data

21 p3080 A72-40290

METEOROLOGICAL ROCKETS

U SOUNDING ROCKETS

METEOROLOGICAL SATELLITES

NT AEROS SATELLITE

NT ELEKTRON SATELLITES

NT EOLE SATELLITES

NT ESSA SATELLITES

NT NIMBUS SATELLITES

NT SAN MARCO SATELLITE

NT SYNCHRONOUS METEOROLOGICAL

SATELLITE

NT TIROS SATELLITES

ESRO polar orbiting meteorological satellite, discussing design features and operational instruments

01 p0126 A72-10186

Atmospheric thermal sounding from meteorological satellites, reviewing measurement accuracy, equation kernel, spectral resolution, optimum measuring condition and interpretation techniques

01 p0070 A72-10959

Soyuz manned spacecraft meteorological observations, dealing cloud cover in various climatic zones, atmospheric turbidity and snow cover in mountain areas

02 p0253 A72-11731

AEROS aeronomy satellite solar cell array power supply system simulation tests under space conditions

04 p0466 A72-15650

Storm forecasts by meteorological satellites, describing TV monitoring of cyclones and hurricanes

05 p0683 A72-15978

Meteorological satellite stabilization and attitude control in synchronous equatorial orbit for two years life, emphasizing nutation damper optimal dynamic characteristics

05 p0725 A72-16437

Facsimile bandwidth compression by picture elements reduction with contrast preservation, discussing analog processing algorithm and application to weather satellite photographs

06 p0772 A72-17406

Meteorological satellites TV, visual and IR cloud imaging and atmospheric sounding techniques for short and long range weather forecasting

06 p0892 A72-18066

Meteorological satellites data gathering equipment including TV cameras, temperature humidity, ozone and radiation measuring devices, discussing data processing and evaluation for weather forecasting [DGLR PAPER 71-131]

06 p0892 A72-18231

Educational and social applications of communication and meteorological satellite data dissemination, discussing learning and teaching model development

06 p0777 A72-18624

Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions

07 p1029 A72-18838

Meteorological elements vertical profiles under cloud cover condition by solving heat and humidity transfer equations based on satellite data

07 p1029 A72-18860

Satellite system and data processing center feasibility for carrying out meteorological surveys in Mediterranean area

07 p0993 A72-20605

Meteosat geostationary satellite international program for earth cloud cover observation and meteorological data relays between ground stations as part of Global Atmospheric Research Program

08 p1241 A72-21204

Eole satellite relay system for weather balloon location and data collection and transmission to ground stations

09 p1394 A72-22600

Continuous scan diffraction spectrometer for thermal sounding experiment on Meteor satellite, presenting vertical temperature and humidity profiles

09 p1347 A72-23588

German-French DIAL aeronomy satellite project, describing geocoronal radiation, electron density and equatorial electrojet measurements

10 p1535 A72-24029

DIAL aeronomy satellite design and operational features, describing in-flight behavior

10 p1551 A72-24030

ESSA satellite observation of meridional circulation, noting roles of subsidence sinks, storm depressions and melting fronts

10 p1506 A72-24059

Automatic meteorological stations development in populated areas, foreseeing data gathering by sensors with satellite and radar efficiency taken into account

10 p1507 A72-25008

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning

10 p1508 A72-25096

French-U.S. Eole meteorological satellite project to map Southern Hemisphere winds, describing system based on pressurized balloons for data acquisition

11 p1680 A72-25813

Weather satellite data use to obtain forecasts for aircraft and ships in Southern Hemisphere and for Antarctic research stations

11 p1683 A72-26896

Meteorological satellite information and communication aspects, stressing METEOSAT European project for permanent cloud cover observation in visible and IR bands

12 p1839 A72-27370

Space techniques application to meteorological prediction, noting Meteosat and Eole satellites capabilities

12 p1840 A72-27506

Hybrid forecast model for hydrometeors short range prediction based on meteorological satellites cloud pattern observations and quasi-Lagrangian advection analog

13 p1993 A72-28858

Global atmospheric circulation barotropic spectral model application to satellite asymptotic data continuous processing

14 p1217 A72-30258

Space technology development effect on meteorology progress, discussing earth resources technology satellites and meteorological satellites

15 p2220 A72-31234

Stable air clouds localization from meteorological satellite photographs, noting atmospheric air pollution

15 p2265 A72-31236

Geographical interpretations of ESSA and Nimbus weather satellite pictures for earth resources applications, noting ERTS project

15 p2221 A72-31248

Barbados oceanographic meteorological experiment /BOMEX/ sea air interaction program in equatorial Atlantic, using real time synchronous satellite information

15 p2225 A72-31808

Report to COSPAR on Australian space program covering earth atmosphere, cosmic and synchrotron radiation, X ray astronomy, weather satellites, deep space and sounding rockets

15 p2338 A72-32007

Use of satellites for the transmission of meteorological data and the tracking of observation stations

17 p2603 A72-34399

The collection of data by geostationary meteorological satellites

17 p2622 A72-35719

NASA developed geostationary weather and environmental satellite for launch in 1973, discussing

ground station equipment, antenna system and data collection service

- 23 p3343 A72-43551
- Weather satellites - Their role in the application of environmental services to the marine industries.
- 24 p3420 A72-44648
- Polar orbiting operational weather satellites.
- 24 p3451 A72-45197

METEOROLOGICAL SERVICES

Meteorological information assistance for Concorde aircraft test flights, discussing high tropospheric turbulence and lower stratospheric temperature predictions and instruments

- 04 p0542 A72-14680
- Aircraft in-flight monitoring instruments for meteorological service in U.S.

Automated meteorological telemetry and interrogation response system with terminal extensions for Paris airport

- 04 p0464 A72-14687
- Meteorological observations and instrumentation - AMS Conference, San Diego, March 1972
- 10 p1507 A72-25076

Aerospace and aeronautical meteorology - AMS Conference, Washington, D.C., May 1972

- 13 p1988 A72-28801
- West German-United States Barium Ion Cloud Project meteorological support at Wallops Station, discussing magnetospheric magnetic and electric fields
- 13 p1947 A72-28802

Computer and meteorological satellite effects on weather support for manned space missions, discussing Gemini 5 and Apollo 11 landing weather predictions and cloud climatology

- 13 p1989 A72-28804
- Man machine system to repackage weather information for easy assimilation, considering computer driven keyboard CRT displays
- 13 p1924 A72-28872

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means

- 13 p1994 A72-28874
- Worldwide weather data system as important factor for search and rescue operations implementation
- 17 p2488 A72-34432

Automatic position reporting, ATC communication, weather information and message identification via digital ground-air-ground data link, discussing operational and maintenance requirements

- 21 p3080 A72-40286
- Meteorological and takeoff and landing information transmission by proposed automated meteorological and information service, discussing air-ground data link
- 21 p3080 A72-40287

Nonmeteorological scientists and engineers views on meteorology and weather forecasting, discussing uses, problem areas and knowledgeability

- 03 p0384 A72-13637
- Tadzbakhsh method of meteorological data assimilation for numerical weather forecast analyses, testing validity under condition of one of three dependent variables being observed
- 03 p0384 A72-14141

Past meteorological data assimilation in dynamical analysis, computing initial condition with time sequential data for error reduction

- 04 p0541 A72-14455
- Various updating effects on meteorological data analysis accuracy, using balanced barotropic model
- 04 p0541 A72-14456

Meteorological fields matching by Sasaki method combined with optimum interpolation, using weighting functions

- 05 p0683 A72-16724
- Periodic aspects of nonphenemeral Euroatlantic blocking systems persistence, noting dominant role played by cyclonic vortices
- 05 p0684 A72-16794

Handbook on aviation meteorology covering atmospheric structure and composition, standard atmospheres, heat transfer, adiabatic processes, winds, cloud formations, precipitation, ice formation, fog, visibility, etc

- 08 p1200 A72-21479

Running average method of data smoothing effect on persistence tendency change in meteorological time series

- 10 p1507 A72-25004
- Large data processing systems for requirements of meteorology, environmentalogy, earth resources inventories and hydrology in 1980s
- 10 p1446 A72-25095

Space technology development effect on meteorology progress, discussing earth resources technology satellites and meteorological satellites

- 15 p2220 A72-31234
- Radiation measurements and thermal IR and photographic imaging techniques in meteorology and earth resources survey applications
- 15 p2221 A72-31241

Report to COSPAR on French space program covering ionospheric and magnetospheric physics, meteorology, earth resources and exobiology

- 15 p2337 A72-32003
- Report to COSPAR on West German space program covering meteorology, aeronomy, ionospheric physics, magnetosphere, solar wind and radiation, solar system and life sciences
- 15 p2338 A72-32014

Independent random test values effective sample numbers for mean and variance distributions in meteorological and geophysical statistical tests

- 16 p2385 A72-33382
- Bandpass-filtered geophysical and meteorological time series data statistical evaluation by comparison with filtered test series with same variance and autocorrelation function
- 16 p2363 A72-33383

The potentialities of space technology in relation to oceanography and surface meteorology.

- 19 p2790 A72-37924
- Dynamic programming technique for simultaneous measurement and dynamic control optimization for stochastic systems
- 19 p2779 A72-38233

A square equal-area map of the world.

- 20 p2915 A72-38961

METEORS

U ACRYLIC RESINS

METHANE

Supersonic diffusion flame in duct configuration to study mixing with combustion of two parallel methane and air flows

- 03 p0405 A72-13545
- Jovian planets methane and ammonium absorption bands spectrophotometric investigation, noting Saturn spectral variations
- 03 p0436 A72-13819

Uranus IR spectral albedo, discussing methane absorption

- 04 p0580 A72-15365
- Slush, boiling methane and methane mixture characteristics, noting advantages as potential rocket, aircraft and motor vehicle fuels
- 04 p0564 A72-15542

Kr, Ar, methane and nitrogen physisorption isotherms on stainless steel in low pressure cryogenic baths calculating mean adsorption energies

- 05 p0624 A72-16395
- Photoelectric spectrophotometric measurements of Jupiter atmosphere optical properties and structure, showing methane absorption band intensity latitudinal variations
- 06 p0881 A72-17928

Methane pyrolysis in glow discharges /cold plasmas/, discussing chemical reactions initiated by high energy electrons inelastic collisions with gas molecules

- 07 p0937 A72-20286
- Frequency stability of free running methane stabilized He-Ne lasers with dc excitation, comparing to rf excitation
- 07 p1008 A72-20562

Methane contribution to thermal opacity in Uranus and Neptune atmospheres for atmospheric model synthesis

- 09 p1383 A72-22293
- Methane, hydrogen and oxygen adsorption and displacement on crystal surface of W investigated by thermal desorption and work function changes
- 09 p1276 A72-22807

Bromine additions effect on normal laminar flame propagation velocity of methane-air mixture at high pressures

- 09 p1411 A72-22889
- Carburization kinetics of Nb in acetylene or methane at high temperatures and low pressure
- 09 p1319 A72-22985

Flame structure studies of stabilizing region of near stoichiometric laminar burner methane-air flame

- 09 p1411 A72-23147
- Methane absorption line profile, intensity and width studied with magnetically tuned He-Ne laser
- 10 p1490 A72-24041

Temperature effects on kinetics of methane decomposition on carbon fiber at high temperatures, showing characteristics relationship to carbon gasification reactions

- 10 p1433 A72-24086
- Jupiter spectral observations, discussing presence of deuterated methane in atmosphere and comparison with solar spectra for telluric features identification
- 10 p1539 A72-24347

IR spectrophotometric data for Jupiter, determining limb darkening nature and ammonia and methane absorption variations over belts, zones and Red spot

- 10 p1548 A72-24971
- Stratospheric methane measurements over North America from solar absorption spectra observed from aircraft
- 11 p1622 A72-25911

Methane concentration of air sample from stratosphere measured by gas chromatography, discussing sample integrity, analysis method and results

- 12 p1802 A72-27505
- Shock heated methane-oxygen-argon mixtures ignition delay time from reaction kinetics calculations
- 12 p1778 A72-27852

Hydrogen atom exchange in ion-molecule reactions of methane and ethylene determined from reaction products distribution, using ion cyclotron resonance techniques

- 14 p2084 A72-30522
- Methane spectral band tetrahedral fine structure analysis, using vibration-rotation Hamiltonian
- 14 p2084 A72-30523

Methane collision broadened rotational fundamental line, calculating line width dependence on temperature

- 14 p2135 A72-30893
- Azomethane and azomethane-d6 IR and Raman spectra, discussing fundamental modes vibrational assignment based on band contours, isotopic shift ratios and group frequency correlations
- 16 p2360 A72-32923

Band model and scaling approximation validity for computation of transmission profile in V4 band of methane in Jovian atmosphere

- 16 p2461 A72-34099
- Photoelectric spectrophotometric measurements of Jupiter atmosphere optical properties and structure, showing methane absorption band intensity latitudinal variations
- 18 p2730 A72-37153

Aromatic hydrocarbons - Methane ignition inhibitors

- 19 p2879 A72-37364
- Influence of water vapor on the normal flame velocity of a methane-air mixture at high pressures
- 19 p2882 A72-38459

Detonation and burning characteristics of liquid oxygen-liquid methane mixtures.

- 19 p2848 A72-38834
- Jupiter atmosphere methane deuterium/hydrogen ratio estimate from exchange reaction and temperature studies
- 20 p2968 A72-39242

Resonance absorption of laser emission by methane behind the shock front

- 21 p3063 A72-40986
- New observations on the Kuiper bands of Uranus.
- 21 p3106 A72-41043

Jupiter atmospheric C12/C13 ratio for methane from equivalent width measurements in R[2] multiplet

- 21 p3107 A72-41273
- Chromium carbides synthesis by carburizing chromium hydroxide or oxalate in hydrogen-methane gas mixture at temperatures below 1000 C
- 22 p3188 A72-41974

Uranus methane brightening at limb and south pole explained by Rayleigh scattering and haze in upper atmosphere

- 22 p3228 A72-42573
- 3.39 micron resonance line absorption in shocked methane.
- 24 p3410 A72-45044

METHIONINE

Incorporation of methionine-S 35 in the proteins of the digestive organs of rabbits under the action of radiation and vibration

- 21 p2998 A72-40440

METHOD OF CHARACTERISTICS

Poincare-Lighthill-Kuo perturbation method and method of characteristics equivalence in one dimensional fluid motion due to ideal piston periodic oscillation

- 03 p0341 A72-13239
- Method of characteristics calculations of inviscid free jet flow with low specific heat ratios for perfect gas at 1.10 Mach number
- 03 p0309 A72-13926

Lagrange method extended to method of characteristics for solving first order hyperbolic partial differential equations, applying to ionospheric ion density distribution

- 04 p0539 A72-14885

Three dimensional supersonic flow about space shuttle, comparing method-of-characteristics and shock-capturing computations [AIAA PAPER 72-191] 05 p0729 A72-16845

Characteristic schemes comparison for three dimensional steady isentropic supersonic flow [AIAA PAPER 72-190] 05 p0605 A72-16846

Geometrical methods in fluid mechanics, solving quasi-linear nonelliptic systems by method of characteristics 07 p0969 A72-20063

Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus [AIAA PAPER 72-377] 11 p1730 A72-25401

Two dimensional cascades supersonic exit flow field, using Oswatitsch method of characteristics and conservation laws [ASME PAPER 72-GT-49] 11 p1570 A72-25641

Method of characteristics for solution of quasi-linear hyperbolic partial differential equations, analyzing frequency response 11 p1678 A72-26551

Method of characteristics for three dimensional supersonic flow of guiding center plasma, noting application to solar wind-moon interaction 11 p1573 A72-26601

Inward radial flow turbines under unsteady flow conditions with full and partial admission, predicting performance by method of characteristics 12 p1751 A72-27349

Electromagnetic plane field cumulation by heavy conducting shells implosion with quasi-relativistic velocity, solving Maxwell equations by characteristics method 12 p1851 A72-27396

Isoenergetic and irrotational planar supersonic cascade ideal gas flow computation by analytic method of characteristics 15 p2178 A72-31466

German monograph on supersonic flow past blunt sharp edged cones, comparing Van Dyke and method of characteristics results with schlieren photos and shadowgraphs 16 p2343 A72-33505

Supercritical pressure convergent nozzle performance prediction by time dependent method of characteristics solution to mixed flow problem, adapting Moretti-Abbott technique [AIAA PAPER 72-680] 16 p2346 A72-34061

The numerical solution of hyperbolic systems using bicharacteristics. 17 p2574 A72-34449

Method of characteristics application to supersonic jet and nozzle gas flow with allowance for equilibrium and nonequilibrium condensation 17 p2544 A72-35929

Conical and cylindrical shell deformation with nonlinear one dimensional wave processes, describing algorithm for method of characteristics application 18 p2735 A72-36664

A study of thermoelastic waves by the method of characteristics. 18 p2737 A72-37068

Method of characteristics for nonlinear equations of perturbed motion of fluid near contact point between shock and diffraction waves 20 p2912 A72-39023

Two dimensional underexpanded free jet flow into static medium, presenting wind tunnel nozzle experimental data and graphic solutions from method of characteristics 20 p2885 A72-39619

Method of characteristics for ideal gas flow in annular space of axisymmetric plug nozzle, noting flow visualization by schlieren photography 22 p3166 A72-42263

Use of characteristics for boundaries in time dependent finite difference analysis of multidimensional gas dynamics. 24 p3359 A72-44879

Method of characteristic application to curved beam motion under pulse type loading, investigating photoelastic fringe patterns and pulse propagation 24 p3458 A72-44888

Characteristics and constants of motion method for collisional kinetic equations. 24 p3426 A72-44984

METHODOLOGY

System methodology application to filter design for inertial reference unit calibration in digital test station for FB-111 aircraft navigation system 10 p1456 A72-23820

Analytical foundations of experimental mechanics - Trends in analytical mechanics. 18 p2732 A72-36354

METHODS

U METHODOLOGY

METHOXY SYSTEMS

Differential neurophysiological and psychological effects of subanesthetic concentrations of cyclopropane, diethyl ether, methoxyflurane and ethrane in conscious man 04 p0480 A72-15220

Molecular complexes of methoxyindoles with 1,3,5-trinitrobenzene and tetracyanoethylene /Spectroscopy/association constants/NMR/. 17 p2512 A72-35649

METHYL ALCOHOLS

Methanol and formaldehyde photoionization by UV irradiation, determining ion yields as function of wavelength by mass spectrometric analysis 07 p1038 A72-20498

Methyl alcohol-ethylene glycol self mixing antifreeze solution for precipitation gages 11 p1682 A72-26088

Miniaturized electronic system for controlling methanol concentration in aqueous electrolyte during fuel cell operation 12 p1755 A72-27723

Raney Pd-Ag catalysts for methanol oxidation in alkaline electrolyte in fuel cells 16 p2361 A72-33879

Alloying component effect on Pt catalytic activity in anodic oxidation of methanol for fuel cells 16 p2361 A72-33881

Electrodes converting hydrogen, methanol or oxygen for use in fuel cells with alkaline electrolyte, using Ag-Pd, Ni, Si and C catalysts 16 p2351 A72-33885

Effect of chloride on the anodic dissolution of titanium in methanolic solutions. 21 p3013 A72-40842

METHYL CHLORIDE

Photodissociation cross sections of methyl chloride and nitrous oxide cations, using ion cyclotron resonance technique 07 p0936 A72-19492

METHYL COMPOUNDS

NT METHYL NITRATE

NT METHYL POLYSILOXANE

Mass spectrometric studies of solvent extractable acid methyl esters of oil shale from Colorado Green River Formation 03 p0320 A72-13742

Molecular process and pressure effects on hydrogen formation in methyl acetylene photolysis at 1236 Å 11 p1590 A72-26011

Vibrational analysis of electronic absorption spectra of 3-methyldiazirine and 3-methyl-3-diazirine in vapor phase 18 p2657 A72-36566

METHYL NITRATE

Thermal conductivities of gaseous binary mixtures of methyl nitrate with helium, neon, argon and nitrogen 07 p1051 A72-19365

METHYL POLYSILOXANE

Methyl phenyl polysiloxane bonded solid film lubricants, discussing air curing at ambient temperatures and performance tests 06 p0836 A72-18592

METRIC SPACE

NT HILBERT SPACE

Gravitational field of bounded and isolated material in empty four-dimensional locally Minkowskian space-time, emphasizing radiation zone and gravitational waves 04 p0570 A72-14556

Steepest ascent method for function optimization in arbitrary direction by selecting distance metric and scale dependency 04 p0540 A72-15683

Euler-Lagrange equation construction to obtain phenomenological description of quasi-equilibrium systems in metrics, noting solution coincidence with Onsager equations 07 p1102 A72-20665

Toroidal gravitational waves in general relativity, considering analog to imploding-exploding cylindrical waves, linear field equations and symmetric metric 08 p1210 A72-21922

Minimal dynamic systems invariant Borel probabilistic measure with metric space and topological entropy equality 08 p1210 A72-22187

Metric tensors as alternate to coordinate transformation equations for computer program inputs in automatic problem formulation 10 p1443 A72-23923

Flat homogeneous isotropic relativistic cosmological two fluid model, using Robertson-Walker metric 15 p2307 A72-31795

Anisotropic and isotropic descriptions of physical process speeds in special relativity theory space-time metric 15 p2279 A72-32768

Regge calculus representation existence for solutions of initial value problem for spaces with axial symmetry 16 p2422 A72-32879

Conformally flat linear axisymmetric chronometrically invariant cosmological models, discussing various types of spaces realized during model evolution 18 p2724 A72-36327

Universe expansion induced electromagnetic wave backscattering absence in Robertson-Walker space-

time as consequence of motion equations conformal invariance 18 p2711 A72-36711

Polarization effects during electron scattering in the gravitational field of a rotating source 18 p2712 A72-36967

On the cosmological equations in a universe with small scale condensations. 22 p3220 A72-41998

Metric gravitation theories classified according to field type and interaction mode, constructing post-Newtonian limit 22 p3206 A72-42567

Trajectory bundles in metric space for objects motion study in dynamic pursuit games, noting Pontryagin and Pshenichnii methods for differential games solution 23 p3308 A72-43415

Estimates of derivative solutions of linear nonhomogeneous elliptic-type equations of arbitrary order near the domain boundary in the L2 metric 23 p3309 A72-44041

Degree of approximation of functions by integral operators in an infinite domain as related to the Hausdorff metric 23 p3310 A72-44163

A 'length and area principle' type inequality for images in which certain integral functionals remain bounded in an n-dimensional space 24 p3419 A72-45261

METROLOGY

German book on liquids flow rate measurement techniques covering physical principles of flow measurement including pressure, magnetic or inductive and ultrasonic methods 02 p0230 A72-12299

Metrology and radio performance of steerable antenna paraboloidal reflector, considering profile measurements by optical range finder and laser methods 04 p0493 A72-15518

Metrology and technology for sounds intense enough for physiological distress and mechanical structure damage, discussing accompanying high temperature and vibration [ONERA, TP NO. 1009] 05 p0661 A72-16024

Information theory in metrology, comparing measurement techniques and calculating quantity of measurement information 06 p0817 A72-18164

Papers on laser applications covering holography, metrology, geodesy, etc 07 p1007 A72-20220

Laser applications in metrology and geodesy, discussing use of beam directionality for alignment purposes, interference patterns and interferometry, modulated light methods, optical Doppler methods, etc 07 p1007 A72-20222

Temperature effects on low pressure calibration in vacuum gage metrology 09 p1312 A72-23249

Time metrology achievements review, discussing time unit development, atomic and molecular frequency standards, atomic clocks, time scales and time signal broadcasting 10 p1481 A72-24399

Metrological techniques reliability for industrial production processes, plotting quality control curves 11 p1637 A72-26823

Thermodynamic limiting relations between physical measurement accuracy and measurement performance energy dissipation, considering equilibrium and nonequilibrium dynamic models 13 p2003 A72-28761

Cloud height measurement with rotating beam ceilometers, discussing precision and representativeness 13 p1992 A72-28849

French book on industrial acoustics elements and metrology covering transmission, absorption, noise and complex sound measuring apparatus and preventive measures 15 p2275 A72-31524

Dynamic errors of a metering system with successive correction of the sensor's time constant for certain types of aperiodic input 17 p2557 A72-35787

Electro-optical TV technique with laser source illumination to provide engineering metrology and NDT procedure resembling real time holographic interferometry 20 p2930 A72-39038

Italian national time scale design and operation, discussing frequency standards, comparisons with national and international laboratories and time keeping 20 p2925 A72-39430

Analysis of the basic metrological characteristics of Vernier time-pulse converters 21 p3035 A72-41729

METROPOLITAN AREAS

U CITIES

MICA

NT BIOTITE

Epitaxial and textured Pb films on mica and glass, using reflection electron diffraction, etching and optical microscopy for structure study
12 p1854 A72-27289

Mica polymorph distribution among space groups from unit layer and stacking sequence characteristics
12 p1802 A72-27512

Radiometer with protective mica window for radiant flux densities measurement of near IR sources, noting reading independence of sources spectra characteristics
21 p3059 A72-41821

MICE
Relative biological effectiveness of energetic protons for somatic effects induction in mice during whole body irradiation, using mean energy of solar event protons
[CERN-71-16] 02 p0161 A72-12054

Mitotic index and aberrant mitose frequency in mice corneal and intestinal epithelial cells exposed to 50-630 MeV protons, estimating relative biological efficiency coefficients
[CERN-71-16] 02 p0161 A72-12055

MICHELSON INTERFEROMETERS
Multimode Q switched ruby laser temporal coherence, comparing theoretical with experimental results from Michelson two-beam interferometer measurements
01 p0080 A72-10849

Ultrasonic excitation induced vibration measurement for detecting incipient electrical breakdown in transducers, using laser-Michelson interferometer
01 p0081 A72-11018

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc
02 p0223 A72-11402

Coarsely stabilized spacecraft-borne Michelson interferometer, obtaining high resolution by computerized spectrum reconstruction with fast Fourier transform
03 p0354 A72-13055

Separation measurement between two distant partially reflecting parallel surfaces using Michelson interferometer
03 p0358 A72-13435

Two dimensional time resolved and real time IR interferograms obtained with pulsed Nd doped glass laser illuminated Michelson interferometer
03 p0362 A72-14200

Relaxation processes in Michelson interferometer as integral part of carbon dioxide laser cavity in phase Q switching regime
04 p0530 A72-14990

Optical sweep generator using single frequency He-Ne lasers with Michelson interferometer for mode selection to provide smooth tuning throughout Doppler width
07 p1000 A72-19010

Field compensated Michelson spectrometer systems, discussing tolerances, usefulness, resolution luminosity products, stigmatism and astigmatism
09 p1513 A72-23328

Michelson interferometer application for continuous gas analysis in far IR
10 p1480 A72-24174

Nonrectilinearity evaluation of twin wave Michelson interferometer mirror displacement
10 p1481 A72-24498

Double passed Michelson interferometer with polarizing beam splitter, quarter wave plates and cube corner reflectors to obtain immunity to mirror misalignment
11 p1635 A72-26500

Q switched carbon dioxide laser based on PM by rotating mirror in one arm of Michelson interferometer, establishing phase relationships
13 p1968 A72-29287

Laser mode suppression arrangements consisting of Michelson interferometers with polarization prism as beam splitting element
18 p2697 A72-36112

High resolution Michelson interferometer for spectral investigations of lasers.
21 p3062 A72-40610

Identification and removal of phase errors in interferometry.
23 p3287 A72-43259

Measurement of small strain amplitudes in internal friction experiments by means of a laser interferometer.
24 p3402 A72-44947

Spaceborne astronomy by synthetic aperture optics for high resolution without cost and weight disadvantages of large telescopes, considering Michelson stellar interferometer
24 p3404 A72-45541

MICROANALYSIS
Microprobe analysis of Timmersoi hypersthene chondrite from Niger Republic, noting equilibrium between olivine and orthopyroxene at 850 C
13 p2035 A72-28751

Microprobe analysis of Murchison and Vigarano meteorites, noting fractionation processes for Ca distribution in olivines
13 p2036 A72-28752

Electron probe microanalysis of Mo-Pd system diffusion at 1000-1600 C, measuring chemical diffusion coefficient as function of temperature, concentration and activation energy
13 p1978 A72-29221

Solid bodies microanalysis by mass spectrum microscopy based on secondary ion-ion emission, discussing ion source and focusing systems
14 p2104 A72-30449

Chondrite Pawel microspectral analysis with laser beam vaporization of sample from microzone
16 p2450 A72-32850

Acute hypoxia of the myocardium - Ultrastructural changes.
17 p2501 A72-34982

Changes in energy stores in the hypoxic heart.
17 p2501 A72-34985

Morphological alterations in the ischaemic heart.
17 p2502 A72-34995

Microscopic and electron-microscopic investigation of the catalysis of ammonium perchlorate combustion
22 p3216 A72-43186

MICROBALANCES
Particle mass monitor system based on piezoelectric microbalance combined with electrostatic precipitator collector, considering applications to air quality monitoring, laboratory aerosol research, process control, etc
[AIAA PAPER 71-1100] 01 p0067 A72-10548

Test facility for electric microthrusters, describing microbalance for thrust and propellant mass flow rate measurement
09 p1292 A72-23404

Thermogravimetric design, using electromagnetic microbalances and turbomolecular pump for automatic sorption isotherm measurements in surface area and pore size analyses
11 p1636 A72-26788

Piezoelectric quartz crystal microbalance for material outgassing and optical element contaminant film measurements
12 p1806 A72-27043

Quartz microbalance studies of an adsorbed helium film.
18 p2719 A72-36675

Utilization of the CACTUS microaccelerometer as a detector of micrometeorite impacts
22 p3181 A72-43097

MICROBE
U MICROORGANISMS
MICROBEAMS
Electron microbeam testing for large microcircuit arrays, using analog voltage signal injection into isolated contact and digital voltmeter readout
10 p1446 A72-23938

Radial transport instability during intense microbeam heating of thin plasma column, noting maximum temperatures and phase coherence cut-off effect
15 p2286 A72-32306

MICROBIOLOGY
NT BACTERIOLOGY
Planetary quarantine microbiological and engineering problems, discussing cost, international policies, contamination and sterilization
01 p0019 A72-10818

Microbiological examination of space hardware, discussing viable organisms neutralization buried inside solid materials, sampling procedures and culture media
01 p0019 A72-10820

Terrestrial biosphere back contamination from outer space organisms, discussing microbiologic control and prevention requirements
01 p0020 A72-10825

Hereditary endosymbiotic model of microbial evolution of Precambrian prokaryotic and eukaryotic cells
04 p0471 A72-14800

Paleomicrobiological analysis of northwest Scotland Stoer Formation black shale pre-Paleozoic spheroidal unicellular fossils as probable form of marine phytoplankton
05 p0655 A72-16042

Thin layer chromatography technique for rapid quantification of bacterial cell adenosine triphosphate, using microscope ultraviolet photometer
06 p0763 A72-17872

Fine structure of *Pseudomonas saccharophila* at early and late log phase of growth, using electron microscopy and various culture techniques
07 p0922 A72-20238

Cellular evolution investigation using molecular biology, microbial physiology and ecology
08 p1119 A72-22011

Antarctica dry valley microbiology investigation for Martian life model
12 p1802 A72-27258

Modular microbiology laboratory design considerations and zero gravity experiments to investigate microbial culture systems behavior
12 p1765 A72-28280

Interval scanning photomicrography for recording growth of microbial cell populations during incubation
13 p1911 A72-29749

Optimal temperature control for microbial inactivation by composite environment of heat and gamma radiation, using quadratic technique
18 p2649 A72-36313

Microflora accumulation prevention methods during spacecraft flight, noting bacterial filters for air purification and wiping with disinfectants for surface contamination reduction
24 p3376 A72-45213

MICROCALORIMETERS
U CALORIMETERS
MICROCIRCUITS
U MICROELECTRONICS
MICROCLIMATOLOGY
Diurnal variation in energy balance microclimate across coastal beach, noting surface moisture effect
21 p3078 A72-40468

MICROCRACKS
Ultrasonic fatigue at small strain amplitudes in Ti, developing solitary slip band microcracks
04 p0533 A72-14539

Microfibrillar superlattice with vacancy defect and point dislocation in microcrack formation and propagation in nylon 6 fibers
05 p0681 A72-16308

Plate microcracking of ferrous martensites containing Mn, Cr and Ni, discussing austenite grain size variations
05 p0678 A72-17119

Thermally activated crystal microcrack initiation by fusion of leading and following dislocations
06 p0898 A72-18551

Test equipment with variable deflection and twist for metal fatigue microcrack initiation and growth detection
07 p0987 A72-19849

Crack initiation and propagation microscopic and phenomenological characteristics, discussing breakdown, plasticity and microcrack convergence
07 p1094 A72-20147

Precipitation hardened Ni-Al alloy mechanical properties, relating ductility and strength to precipitate caused inhibition of microcrack initiation and propagation
07 p1021 A72-20438

Tensile stress effect on formation of suboxide needles, microcracks and oxide wedges during low temperature Nb oxidation
11 p1658 A72-25854

Microcuts as equivalent mechanical stress concentrators for breakdown energy estimation in flat polymethyl methacrylate glass specimens under impact bending loads
13 p1983 A72-28563

Binary Al alloys intermetallic phases effects on microcracks nucleation and propagation at 300 C in uniaxial tension, considering alloying elements influence on mechanical properties
14 p2124 A72-31036

Microcrack initiation and propagation in ductile metals at low cycle and ultrasonic frequencies, investigating fatigue fracture mechanism by scanning electron microscope
15 p2256 A72-31838

Mechanical properties and residual stresses in and adjacent to interface of explosively welded Al-Zn-Mg alloy with steel, noting microcracks effect on weld strength
15 p2257 A72-32111

Two-phase crystal structure microdeformation measurement by combined holographic interferometry and X ray diffraction
18 p2690 A72-36358

Acoustic emission testing and microcracking processes.
20 p2924 A72-39277

Microcracks observed in hydrogenated niobium foil.
21 p3069 A72-41300

Fiber glass reinforced plastics elastoplastic behavior due to microcrack propagating across matrix, using elastic index of work done
22 p3232 A72-41943

Glass fracture mechanics, discussing microcrack stress concentration, Griffith theory, statistical failure theories, static fatigue and strength measurements
23 p3305 A72-43502

MICRODENSITOMETERS
Automated photometric wetland mapping using aerial color film microdensitometric analysis and computer techniques
02 p0215 A72-11886

Microdensitometer system analysis by partial coherence theory, determining optical transfer function for linear operation
07 p0987 A72-19830

- Partially coherent imaging in microdensitometer, investigating conditions for linear operation from difference between high and low contrast edge images
09 p1309 A72-22608
- Black and white aerial photographs quantitative evaluation for differentiation and identification of land use patterns by microdensitometry, using statistical methods
09 p1313 A72-23306
- Automation of aerial photointerpretation based on application of photometric, microdensitometric and digital computer technology
09 p1313 A72-23308
- MICROELECTRONICS**
NT LARGE SCALE INTEGRATION
NT MEDIUM SCALE INTEGRATION
Optimal design of logic networks in homogeneous microelectronic structures, using shortest link search and graph continuity parameters
01 p0034 A72-10300
- Book on microelectronics covering integrated circuits, semiconductors, p-n junctions, transistors, Schottky and MOS structures, epitaxy, ion implantation, photomechanical operation, fabrication techniques, etc
02 p0194 A72-12574
- Book on field effect electronics covering junction and insulated gate transistors and allied devices, monolithic and film IC and design techniques
03 p0333 A72-13846
- Microstrip double down-converter receiver in civil satellite earth stations for reduced interface problems, increased reliability and minimum initial cost
03 p0334 A72-14074
- Microelectronic computer system with image data cross correlation generation for real time video pattern abstraction, discussing design and operating characteristics
03 p0329 A72-14178
- Microcircuit failures due to electrical overstress, covering current density, thermally induced burn-out, junction shorts and second breakdown with nonuniform heat flow
03 p0336 A72-14290
- Thermal deformation effects on metal bond fatigue failure modes in small signal transistors, micro and LSI circuits
03 p0365 A72-14291
- Mathematical model for reciprocal and nonreciprocal magneto-optical effects in magnetized ferrite-filled microstrip transmission lines
04 p0502 A72-15434
- Planar coax micropackaging of minicomputers for aircraft navigation and military systems, noting environmental tests
05 p0632 A72-15772
- Microwires and microstrips fabrication from high strength deformation resistant aluminum alloys
05 p0680 A72-17207
- IC microcircuit for time-pulse voltage converter for conversion of dc voltage into electric pulses of length proportional to input signal
06 p0784 A72-17836
- Multilayer thin film microcircuits and printed circuits partial capacitance and potential coefficient approximate calculation by matrix method
07 p0953 A72-19016
- High power series voltage regulators, discussing power hybrid microelectronic design techniques
08 p1112 A72-21415
- IC technology review, considering computer applications and microelectronics prospects
08 p1142 A72-21843
- Reactivity evaporated titanium nitride resistors for thin film microcircuits, discussing nitrogen gas pressure and substrate temperature effects on electrical properties during evaporation
09 p1286 A72-22902
- Low energy scanning electron beam gun with retarding field mode for microelectronic device evaluation
10 p1446 A72-23936
- Electron microbeam testing for large microcircuit arrays, using analog voltage signal injection into isolated contact and digital voltmeter readout
10 p1446 A72-23938
- Computer controlled electron beam machine for microcircuit fabrication, using digital technique capable of working on complex patterns
10 p1459 A72-23956
- Electron image projection system using converter tube technique for microcircuit lithography, discussing performance tests and design changes
10 p1447 A72-23957
- Laser welding theory and applications to microelectronics, nuclear and aerospace fields
10 p1485 A72-23968
- Homogeneous computing media, examining microelectronic fabrication, interconnection and control problems for MOSFET, bipolar transistors and IC structures
10 p1448 A72-24277

- Electron-optical system with electro- and magneto-static lenses, ensuring large image reduction for producing printed microcircuits
10 p1482 A72-24589
- Monolithic, thin film and LSI technology development trends in microelectronics, noting heteroepitaxy, ion implantation and laser beam techniques
10 p1454 A72-25175
- Radio electronic equipment IC and microelectronics development trends, considering bipolar and MOS transistors applications in digital and analog computers and telemetry
10 p1454 A72-25176
- Microwires and microstrips fabrication from high strength deformation resistant Al alloys
11 p1660 A72-26142
- Common collector micropower monolithic transmitter for single or multichannel biomedical telemetry
11 p1586 A72-26563
- Monolithic micropower command receiver to extend lifetime of implanted biotelemetry system
11 p1586 A72-26564
- Micropower IC approach based on complementary transistor-transistor logic
11 p1606 A72-26566
- Automatic electrostatic contour welding of IC microcircuit metallic casings, using contact and electrode voltage feedback signals
13 p1963 A72-28921
- Reliability tests on miniature ceramic capacitors encapsulated by epoxy-novolac block polymer compounds
13 p1919 A72-29061
- Microelectronic devices liquid cooling by free and forced convection, investigating component size effects on heat transfer by boundary layer analysis and experiment
14 p2091 A72-31172
- Active RC circuit synthesis by state model method, minimizing capacitances of admittance matrix for microelectronic circuit technology
15 p2210 A72-31595
- Soft X ray appearance potential spectrometer construction and operation for metal film diffusion detection in microcircuit technology
15 p2241 A72-32442
- Nonideal component parts effect on behavior of digital microstrip closed circuit X band phase shifter, presenting detailed network analysis
15 p2201 A72-32471
- Computer thermal analysis of hybrid microcircuits.
17 p2521 A72-34679
- Microelectronic module application to LSI set for implementation of digital filters, division and square root operations, polynomials, matrix computations, etc
17 p2522 A72-34704
- Plastic packages for complex microcircuits.
17 p2528 A72-34717
- Laser beam welding of small components
17 p2559 A72-34925
- Russian book on radio component design covering radio equipment component properties, effects of geometry and materials, technological processes and microelectronics
17 p2531 A72-35496
- X- and Ku-band microelectronic phase shifters
17 p2531 A72-35767
- Optimization of the functions of a circuit with lumped and distributed RC parameters
17 p2535 A72-35785
- Report on Flip Chip and Beam Lead bonding for electronic circuits.
[SAE AIR 1141]
18 p2666 A72-36528
- Limitations in microelectronics. II - Bipolar technology.
18 p2667 A72-36980
- Survey of current component reliability problems and methods for prevention.
18 p2668 A72-37102
- Department of Defense Reliability Analysis Center.
18 p2676 A72-37131
- Applications of holographic nondestructive testing techniques in engineering.
19 p2806 A72-37608
- Frequency-selective networks suitable for microelectronic realization. II.
19 p2773 A72-37874
- Production of prototype hybrid micro-electronic modules using thin film substrates.
20 p2908 A72-39493
- Design and manufacturing considerations in hermetic microcircuit enclosures.
20 p2908 A72-39495
- Heat transfer coefficient measurement and thermal network analysis computer program for improving performance and reliability of microelectronic package/board and chip/substrate systems
20 p2908 A72-39497
- Microelectronic component system temperature distribution measurement by IR microscale and electrical technique to determine beam-lead IC thermal performance
20 p2908 A72-39498

- The computation of dynamic equilibrium temperature distributions on substrates having a temperature-dependent thermal conductivity.
20 p2908 A72-39499
- Electronic packaging techniques in housing spaceborne computer, digital telemetry and other microelectronics for protection against severe aerospace environment
20 p2909 A72-39767
- Microelectronic component reliability prediction technique with near Wiebull method accuracy in absence of detailed sampling life test results
20 p2930 A72-39857
- Potential measurement and stabilization of an isolated target using electron beams.
21 p3087 A72-40700
- Analysis and synthesis of visual phenomena in microscopic vision - with particular reference to visual acuity.
21 p3084 A72-40748
- Microelectronics developments and limitations, considering bipolar IC, metal-dielectric-semiconductor structures and optoelectronic communication links
21 p3033 A72-40940
- High value thin-film-on-silicon resistors for hybrid applications.
22 p3160 A72-42825
- National Electronic Packaging and Production Conference, Anaheim, Calif., February 8-10, 1972 and New York, N.Y., June 13-15, 1972, Proceedings of the Technical Program.
22 p3161 A72-43171
- Fine line multilayer system packaging using hybrid thick film processing and materials
22 p3161 A72-43174
- A survey of the costs of hermetic packaging and testing microcircuits.
22 p3161 A72-43175
- Information theory application for structural complexity measure of microelectronic logic circuits for digital computers, noting elements standardization for design quality criteria
23 p3269 A72-43441
- Microstrip matching networks synthesis for microwave integrated circuits, calculating passband of configurations with lumped and distributed elements
23 p3269 A72-43445
- MICROFIBERS**
Microfibrillar superlattice with vacancy defect and point dislocation in microcrack formation and propagation in nylon 6 fibers
05 p0681 A72-16308
- Microfiber extrusion of plasticized mixtures based on titanium and silicon carbides, showing optimum extrusion rate dependent on deformation and strengthening
13 p1967 A72-30105
- Isotropic fiber coarsening in unidirectionally solidified eutectic alloys, showing effect on alloy microstructure
16 p2409 A72-33802
- Effective separation technique for small diameter whiskers.
17 p2572 A72-35662
- MICROFILMS**
Vesicular films in electron and laser beam recording suitable for computer output microfilm duplication and graphic arts
10 p1488 A72-23930
- MICROGRAPHY**
U PHOTOMICROGRAPHY
MICROHARDNESS
Inconel 718 surface integrity from various manufacturing processes, tabulating data on surface finish effects on fatigue, microhardness and metallurgical properties
[SME PAPER IQ 71-239]
01 p0076 A72-10967
- Luna 16 lunar soil sample tests, comparing friction coefficients and microhardness with terrestrial analogs
02 p0280 A72-12286
- Refractory metal oxides hot microhardness and thermal stability over wide temperature range, noting softening rate variation with temperature
02 p0244 A72-12350
- Equilibrium state and microhardness of phase diagrams in Mg-rich region of Mg-Nd-Zn system
03 p0370 A72-13185
- Steels gas-powder facing with boron carbide, testing microhardness and wear resistance
03 p0363 A72-13547
- High temperature creep of niobium alloy, obtaining creep limit, microhardness and gas analysis data
06 p0833 A72-18637
- Stainless steel saturation with Al and Cr, investigating structure, microhardness, linear expansion and contact surface seizure reduction
07 p1020 A72-20419
- Nonstoichiometric solid solutions based on ZrC and NbC, investigating microhardness variation due to differing valences of atoms in metal sublattices
08 p1188 A72-22100

Sn additions influence on Te structural characteristics relation to microhardness and current carrier mobility variations
09 p1322 A72-22204

Crystalline ceramics compressive fracture strength and microhardness tests at room temperature, suggesting microplasticity role in failure mechanisms
09 p1334 A72-22388

Cermet coating with enhanced microhardness by Ni electroplating with fine corundum particles, presenting optimum electrolytes
09 p1318 A72-22527

Temperature dependence of Ge solubility in CdSb single crystals from microstructural observations and measurements of microhardness and electrical properties
09 p1372 A72-23480

Luna 16 lunar soil sample tests, comparing friction coefficients and microhardness with terrestrial analogs
10 p1532 A72-23755

Hot-stage optical microscopes for microhardness measurements at elevated temperatures, describing techniques to determine heat resistant alloys mechanical and physical properties temperature dependence
10 p1478 A72-23827

Al and oxygen effects on commercially pure Ti microhardness and microstructure, noting interstitial and substitutional atom inclusions effects on hexagonal cell dimensions
10 p1494 A72-23831

Soviet papers on high temperature metallography techniques and equipment covering test assemblies for fatigue and microhardness measurements
11 p1654 A72-25489

Test assembly for Brinell microhardness measurements of metal and alloy surfaces under tension during vacuum heating and in protective gas media
11 p1612 A72-25490

Temperature dependence of Ni and Ni alloys and solid solutions microhardness, noting strengthening effect of Ti, Cr, Al and B additions
11 p1654 A72-25491

Cumulative damage and structural changes in friction contact areas of steel plates under cyclic pulsed loads, noting microhardness distribution and surface layers microstructure
12 p1818 A72-28191

Microhardness anisotropy of hardened and aged Be single crystal as function of purity
13 p1978 A72-29023

Steels structural and microhardness changes by pulsed laser beam induced local heat treatment, noting needleshaped grain refinement
13 p1979 A72-29482

Aluminum oxide reproducible layers plastic deformability or microhardness from molecular beam scattering distribution
16 p2430 A72-33064

Phase diagrams, microhardness and composition of sintered binary B compounds with Zr, Hf, Ta, Cr, Mo, W, Re, Fe, Ni, and Si
21 p3070 A72-41371

MICROINDENTATION
U MICROHARDNESS
MICROINSTRUMENTATION
Microaccelerometer for satellite drag measurement and compensating thrust control
06 p0892 A72-18260

Electrolyte hydrostatic pressure measurement in limited volume biological compartments by fluid filled glass micropipette used in microtransducer capacity
11 p1587 A72-26623

MICROMANOMETERS
U MANOMETERS
MICROMETEOROLIDS
NT METEOROID DUST CLOUDS
Structure and characteristics of craters and pits in Sikhote-Alin iron meteorite shower, searching for meteor and meteorite dusts and micrometeorites
01 p0125 A72-10101

Fluorinated ethylene propylene encapsulated N/P Si solar cells, investigating simulated micrometeoroid exposure effects on I-V performance in shock tube
01 p0006 A72-10381

Interplanetary medium spherical solid component model from radio meteor orbit catalog, discussing density of interplanetary dust, meteor matter and cosmic fallout on sun
02 p0282 A72-12332

Shock wave contributions from micrometeorites, meteors, meteorites and thunder to organic compounds formation in primeval atmosphere
04 p0572 A72-14760

Lunar Imbrian Basin formation, discussing micrometeorite component composition of Apollo 14 soil samples
05 p0715 A72-16160

Micrometeoroid simulation by accelerated microparticles bombardment of metal targets, discussing energy partition as function of impact velocity
09 p1409 A72-23667

Book on earth environment covering atmospheric structure, terrestrial magnetic field, solar radiation, micrometeorites, ionosphere and van Allen belts
10 p1478 A72-25173

Surface orientation reconstruction of Apollo 14 lunar rocks from microstereoscopic studies of microcraters, soil covers and glass coatings, determining micrometeoroid erosion
11 p1719 A72-25975

Lunar glass particle micrometeorite crater morphology, showing radial fracture and spallation zone relationships
13 p2036 A72-28755

Interplanetary medium spherical solid component model from radio meteor orbit catalog, discussing density of interplanetary dust, meteor matter and cosmic fallout on sun
13 p2039 A72-29216

Meteorite particle movement in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces
14 p2152 A72-30493

Micrometeorite flux observed by rocket-borne electroacoustic transducers
15 p2308 A72-31931

Micrometeorite and cosmic dust flux rates for near earth orbit and interplanetary space from satellite and ground based measurements
15 p2309 A72-31955

Lunar rock abrasion and catastrophic rupture lifetimes for near earth micrometeoroid flux determination, using hypervelocity impact tests
15 p2309 A72-31956

Satellite Prospero onboard micrometeoroid detector data analysis for near earth flux
15 p2310 A72-31987

A possible mechanism for the capture of micrometeoritic particles by the earth and other planets of the solar system.
17 p2619 A72-35939

Some space instruments for the study of micrometeoroids.
17 p2558 A72-35940

Meteorite particle motion in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces
19 p2864 A72-38322

Chronology of first phases of formation of solar system solid objects, meteorites and primitive lunar rocks, describing models
19 p2867 A72-38548

Utilization of the CACTUS microaccelerometer as a detector of micrometeorite impacts
22 p3181 A72-43097

MICROMETEOROLOGY
Two dimensional dynamic model numerical simulation for micro- and macrostructures of moist convective clouds, comparing to field observations
12 p1839 A72-27028

Fine structure of temperature stratification in the troposphere and stratosphere
21 p3079 A72-41799

Time dependent one dimensional numerical model of hail-bearing cumulus cloud, using microphysical process parameterization and exponential raindrop and hailstone size distributions
22 p3201 A72-42513

MICROMETEORS
U MICROMETEOROLIDS
MICROMETERS
Stellar pair scale technique for determining multiplying factor of ocular micrometer drum in universal astronomical instrument
01 p0064 A72-10197

Comparison of several methods for determining the magnitude of turn for the screw of a positional contact micrometer in an astronomical universal instrument
19 p2795 A72-37347

Investigation of the screw turn magnitude of a contact micrometer attached to the Toepfer meridian circle on the basis of observed right ascensions of stars
19 p2802 A72-37975

A program of wide scale pairs for determining the micrometer screw turn magnitude of the Pulkovo ZTL-180 wide-angle zenith telescope
19 p2802 A72-37979

MICROMILLIAMMETERS
Quadratic logarithmic converter used with linear microammeter for decibel scale noise measurements
09 p1306 A72-22344

MICROMINIATURIZATION
NT LARGE SCALE INTEGRATION
Aircraft microminiature ILS with transmitter and localizer antenna to provide pilot with bearing and glide slope information for alignment with runway
12 p1842 A72-27106

Physical phenomena limitations on MOS IC miniaturization, considering gate oxide breakdown, drain source punch through, doping fluctuations, power dissipation and metal migration
16 p2370 A72-34102

Microminiaturization, microprogramming, multiprocessing, and processing and memory module design technology of aerospace computers in different size ranges
21 p3025 A72-41113

Physical limits of semiconductor devices miniaturization for electronic computers, considering thermal energy dissipation, electrical resistance and high current density induced electromigration effects
23 p3273 A72-44332

MICROMINIATURIZED ELECTRONIC DEVICES
NT MICROMODULES
MICROMODULES
Miniature modular wideband parametric amplifier for centimeter range, using IC optimal coupled circuit with passband dependent on diode time constant
07 p0956 A72-19570

Miniature modular wideband parametric amplifier for centimeter range, using Q optimal coupled circuit with passband dependent on diode time constant
22 p3158 A72-42088

Thermal design of hybrid modules and assemblies.
22 p3161 A72-43172

MICROORGANISMS
NT AEROBES
NT AMOEBA
NT ANAEROBES
NT BACILLUS
NT BACTERIA
NT BACTERIOPHAGES
NT CLOSTRIDIUM BOTULINUM
NT ESCHERICHIA
NT FLAGELLATA
NT HYDROGENOMONAS
NT PROTOZOA
NT PSEUDOMONAS
NT PSYCHROPHILES
NT SPORES
NT VIRUSES
Papars on planetary quarantine covering microbial survival in deep space, contamination by nonsterile flight hardware and sterilization
01 p0019 A72-10817

Planetary quarantine microbial contamination control, considering clean room concept and microbiological barrier techniques
01 p0019 A72-10821

Microbial survivability in deep space environmental simulation experiments, describing aerospace ecology and panspermia avoidance
01 p0019 A72-10823

Inorganic polyphosphates effect on phosphorus metabolism evolution in primary living organisms, noting polyphosphate glucokinase distribution in various microorganisms
04 p0470 A72-14797

Microorganism life in extreme high temperature, PH and solute concentration environments, noting salt effect on enzyme activity
04 p0471 A72-14801

Monograph on Jurassic and Cretaceous Hagias-tridae from Blake-Bahama Basin and Great Valley Sequence in California
04 p0519 A72-15255

Paleomicrobiological analysis of northwest Scotland Stoer Formation black shale pre-Paleozoic spheroidal unicellular fossils as probable form of marine phytoplankton
05 p0655 A72-16042

Protein-rich food substitute from microalgae cultures for human nutrition, describing experimental production, protein value determination, special diets and food shortage relief
06 p0768 A72-18159

Temperature effects on microorganism survival in deep space vacuum, using molecular sink test
09 p1265 A72-22641

Microorganisms effects on oxygen and compounds cycles, leading to changes in oxygen distribution in earth crust, hydrosphere, atmosphere and biomass
09 p1267 A72-23592

Hermetic chamber medico-engineering experiment for long term isolation effects on human intestinal microflora, showing reduction and disappearance of certain microbe populations
13 p1904 A72-29323

Environmental chamber simulation to show terrestrial microorganisms survival under Jovian atmospheric conditions
15 p2183 A72-31293

Effects of magnetic fields on microorganisms
17 p2503 A72-35004

A re-evaluation of material effects on microbial release from solids.
23 p3253 A72-43383

Effects of aeolian erosion on microbial release from solids.
23 p3253 A72-43384

Microflora accumulation prevention methods during spacecraft flight, noting bacterial filters for air purification and wiping with disinfectants for surface contamination reduction
24 p3376 A72-45213

MICROPARTICLES

- Analysis methods for microsize atmospheric aerosols and particulate contaminants from natural and industrial sources, discussing electron microscopy, electron probes, X-ray diffraction, etc [AIAA PAPER 71-1104] 01 p0067 A72-10550
- Micrometer particle formation by water vapor photolysis at 1500-1700 Å, noting particle production rate and implications to planetary atmosphere physics 02 p0220 A72-12207
- Fine oxide particle inclusions in mild steel weld metal deposited by carbon dioxide shielded metal arc process, using electron microscopy and diffraction pattern photography 06 p0820 A72-17706
- Enzymically synthesized homopolynucleotide and lysine-rich proteinoid microparticles effect on aminoacyl adenylate condensation as basis for genetic code origin 06 p0770 A72-17724
- Nonrelativistic quantum concept of electromagnetic field interaction with charged microparticles 11 p1692 A72-26093
- Dispersed particle shape effect on elastic behavior of magnesium oxide composites at low graphite concentrations 15 p2260 A72-31585
- Profile and depth of microcraters formed in glass. 18 p2736 A72-36972
- A method for the study of wear particles in lubricating oil. 19 p2803 A72-38376

Microscale MHD wave and stationary structure fluctuations in interplanetary medium solar wind, considering theoretical constraints 01 p0129 A72-10883

Periodic micropulsations in amplitude and bandwidth observed in long duration vlf whistler mode signals from ground stations, considering explanations 03 p0322 A72-13530

Geomagnetic micropulsation activity relationship to magnetospheric processes and interplanetary magnetic field, investigating time dependence of telluric current 04 p0515 A72-14927

High latitude ionospheric transmission and reflection properties for oblique hydromagnetic plane waves at micropulsation frequencies for daytime and nighttime conditions 13 p1951 A72-29390

Diurnal variations of micropulsation activity polarization parameters in horizontal plane, describing experimental technique 15 p2230 A72-32258

MICROCKET ENGINES

Ten mlb concentric tubes biowaste resistojet thrust performance for hydrogen, water, methane, carbon dioxide and biopropellant mixtures, discussing vibration, shock and acceleration tests [SAE PAPER 710769] 01 p0116 A72-10263

Two constituent gaseous propellant micropropulsion engines for satellite orbit correction and attitude control, discussing thermodynamic and reaction kinetics problems [DGLR PAPER 71-102] 02 p0271 A72-12711

Pulsed electric microthruster with solid fuel feed system, noting electrode geometry effects on performance and ablation patterns [AIAA PAPER 72-210] 05 p0705 A72-16799

Test facility for electric microthrusters, describing microbalance for thrust and propellant mass flow rate measurement 09 p1292 A72-23404

Parallel rail solid fuel pulsed electric microthruster performance, noting mathematical model for mass ablation and plasma acceleration mechanism [AIAA PAPER 72-458] 11 p1708 A72-26194

Solid propellant pulsed plasma microthruster performance tests, describing engine design and operation [AIAA PAPER 72-460] 13 p2026 A72-28945

Light scattering by the medium created by a spacecraft. I - Luminescence of the gas jets of the spacecraft microthrusters 22 p3230 A72-42216

MICROSCALES

U MICROBALANCES

MICROSCOPES

NT ELECTRON MICROSCOPES

NT ION MICROSCOPES

NT OPTICAL MICROSCOPES

Symmetrical three component pancreatic system with intermediate constant image plane and linear displacement of components 03 p0360 A72-13562

Automated microdynamometer for thin plastic specimens microtension tests with continuous microscopic observation and automatic diagram plotting 11 p1633 A72-26288

The effect exerted on pictorial-analytical measurements at the television microscope by subjective contrast enhancement with color filters 21 p3055 A72-40749

MICROSCOPY

Holography applications and processes, discussing holographic microscopy, particle analysis, high speed photography, data storage and retrieval, interferometry, nondestructive testing, etc 07 p0989 A72-20221

TV microscopic system for on-line measurement of cat omentum microvessels diameter relative to heart action 11 p1587 A72-26621

Investigation of the structural content and the determination of the optimal image of focus series in light and electron microscopy with the aid of Fraunhofer diffraction/structure spectroscopy/ 21 p3055 A72-40747

Analysis and synthesis of visual phenomena in microscopic vision - with particular reference to visual acuity. 21 p3084 A72-40748

MICROSEISMS

Continuous natural background sources of microseismic motions due to atmospheric and ocean loading, wind, flowing water and local disturbances [AIAA PAPER 72-819] 20 p2915 A72-39104

Stable microprecision test platforms construction and microseismic effects on motion sensing instrument calibration including gyroscopes and inertial navigation and guidance systems [AIAA PAPER 72-893] 20 p2911 A72-39110

The theory of motion of the horizontal pendulum with a Zoellner suspension and some indications for the instrumental design. 21 p3084 A72-40495

MICROSONICS

Telecommunications ultrasonic resonators, electromechanical and piezoelectric filters and microacoustic surface elastic wave devices 09 p1281 A72-23468

MICROSTRUCTURE

NT METEORITIC MICROSTRUCTURES

NT WIDMANSTATTEN STRUCTURE

Saint Venant problem solutions of cylindrical beam in linear theory of micropolar elasticity in terms of three functions 01 p0137 A72-10318

Electrochemical potential microstructure and stress intensity factor effect on aqueous stress corrosion crack propagation rate in high strength Ti alloy 01 p0085 A72-10776

Ni maraging steel microstructure effects on strength and fracture toughness 01 p0087 A72-11024

Beryllium microstructure and hexagonal close packed polycrystal material residual thermal stresses, calculating thermal expansion coefficients 01 p0087 A72-11028

Precipitation hardened Al-Cu alloy microstructure relation to fatigue and tensile properties, emphasizing particle size and distribution, moving dislocations and grain boundary effects 01 p0088 A72-11044

Ni base superalloy powder with refractory oxide particle dispersion, presenting high temperature creep, stress rupture, microstructure activation energy and processing history 02 p0240 A72-11442

Composition, microstructure and mechanical properties of binder metal in cobalt bonded tungsten carbide 02 p0241 A72-11451

Microstructure of prealloyed and premixed specimens of sintered steel 02 p0242 A72-11463

Continuum mechanics models of microscopically inhomogeneous elastic medium with microstructure, using moment theory 02 p0288 A72-11608

Hardened steel inhibited crack propagation mechanism, observing striation in microstructure on fracture surface 02 p0243 A72-12212

Inhomogeneous microstructure elastoplastic medium, examining strain and work in plastic deformation 02 p0293 A72-12427

Microstructure and mechanical properties of iron base superalloys, examining precipitation hardening by gamma prime and secondary intermetallic compounds formation 02 p0245 A72-12505

Wrought superalloys microstructure and mechanical properties control by precipitating phases 02 p0245 A72-12506

High strength low alloy type ferrite pearlite steel microstructural and compositional variations effect on work hardening, ductility and impact toughness 02 p0246 A72-12558

Equilibrium state and microhardness of phase diagrams in Mg-rich region of Mg-Nd-Zn system 03 p0370 A72-13185

Solid materials inelastic constitutive relations, developing internal variable thermodynamic formalism for microstructural rearrangements 03 p0446 A72-13710

Heat treated microstructures relation to equilibrium diagram in beta and alpha Ti alloys 03 p0374 A72-13715

Ta-Co system phase diagram from differential thermal, X ray, and microstructural analyses, determining composition, temperature, structural type and lattice constant 03 p0374 A72-13740

Tempered Fe-Cr-C-Co steels microstructural and mechanical properties, investigating martensite and bainite 03 p0375 A72-13929

Tungsten wire deformation structure from swaging or rolling and drawing processes, noting cylindrical texture superimposed on fiber texture 03 p0375 A72-13933

Fibrous structure of precipitates produced at bottom of trace due to friction in work hardened Al-Cu alloy solid solution 03 p0376 A72-13970

Structural features of heat resistant Ni-Cr alloy from electron diffraction microscopy, observing coherent lattice bond and plastic deformation 03 p0376 A72-14015

Substructure of cast alloys based on Al-Mg system from electron diffraction microscopy 03 p0377 A72-14023

Phosphorus-containing austenitic stainless steel, investigating quenching defects and precipitation from microstructure by transmission electron microscopy 03 p0379 A72-14260

X ray spectral analysis of microchemical changes in surface films of titanium alloys during diffusive interaction with silicon carbide abrasive 04 p0534 A72-15654

Titanium alloy microstructure effect on fatigue strength under symmetric bending load cycles in air and NaCl solution 04 p0535 A72-15663

Mechanical properties of heat treated hardened high strength steel, investigating microstructure relationship to breakdown characteristics 05 p0671 A72-15992

Holocene Bahamian oolites examination by scanning electron and light microscopy, observing aragonite crystals morphology, orientation and modification by boring activities of endolithic algae 05 p0654 A72-16037

Impact breccias in carbonate rocks of Sierra Madera /Texas/, investigating microstructure, chemical composition, petrography and mineralogy 05 p0654 A72-16038

Ni-based metal graphite materials, investigating sintering process control variables effects on structure and phase composition responses 05 p0665 A72-16090

Dissolved oxygen effect on structure and toughness of nonalloyed extramild steels, observing austenite recrystallization kinetics retardation after hot plastic deformation 05 p0672 A72-16143

Mechanical and microstructural properties of Be-base alloys consolidated by vacuum arc melting, reporting results of tensile tests, hardness measurements and microprobe analysis 05 p0674 A72-16389

Ti alloys evaluation technique of arc melting, processing and testing of miniature ingots, discussing alloying and microstructural effects and correlation with plate properties 05 p0674 A72-16390

Superalloys for gas turbine rotor and stator blades, testing long term heating effects on microstructure and mechanical and thermal fatigue properties 05 p0675 A72-16495

Large deflection microstructure continuum model for composite beam flexural wave propagation and free vibration, deriving equations of motion [AIAA PAPER 72-140] 05 p0741 A72-16937

Directionally solidified Al-AlNi intermetallic eutectic alloy microstructural characteristics and effects on creep fracture 05 p0678 A72-17115

Critique of microstructure effect on strength, toughness and stress corrosion cracking susceptibility of metastable beta titanium alloy, discussing recrystallization conditions 05 p0679 A72-17122

Impurities effect on microstructure alignment in unidirectionally solidified Al-AlNi eutectic intermetallic, noting fiberless region defects 05 p0679 A72-17123

Ductile fracture development in steel due to microcracks and pores formation 05 p0679 A72-17205

Prolonged heatings effect on heat resistant magnesium alloy microstructure and mechanical properties 05 p0680 A72-17208

Ti-Zr-O ternary alloys radiocrystallographic analysis, relating microstructure to composition and thermal treatment 06 p0827 A72-17569

Fe-Co alloy athermal transformation to bcc martensite at industrial cooling rates, investigating effects on mechanical properties 06 p0829 A72-17830

Incompressible micropolar fluid flow equations, deducing stable periodic solutions existence by energy method 06 p0799 A72-17917

Electron transmission microscope study of quenched Mo-N alloys supersaturated solid solution low temperature aging behavior, investigating recovery processes 06 p0830 A72-18056

Texture, mineralogy and metamorphic history of lunar anorthosite 15415 06 p0889 A72-18272

Internal friction and plastic microstrains in martensitic transformation of Fe-Ni, Co-Ni, and Fe-Cr-Ni alloys 06 p0830 A72-18294

Microstructure properties of heat resistant alloy for gas turbine blades as function of operational time 06 p0832 A72-18360

Thermocycling treatment influence on structural changes and strength in coarse grain Ni under creep tests 06 p0834 A72-18686

Aging kinetics in Co-Ni-Ti alloys, noting three dimensional periodically modulated structure development 06 p0834 A72-18742

Structural changes, mechanical properties, electrical resistance and lattice constant during aging of Al alloys containing Mg, Li and Mn 06 p0834 A72-18743

X ray study of structural changes in Ni single crystals during recrystallization process after uniaxial deformation under compression loads with high loading rates 06 p0834 A72-18744

Microstructural changes and mechanical properties of deformed Nb alloy during annealing process, observing low temperature plasticity increase 06 p0835 A72-18747

Rutile creep resistant substructure recovery at 1000-1040 C, discussing stress relaxation mechanism due to dislocation walls or subgrain boundaries migration 07 p1023 A72-18800

Scanning electron microscope for metal matrix composite materials structure examination, emphasizing matrix behavior, filament under load and interface 07 p1011 A72-19485

Austenitizing conditions effects on hardness and microstructure of tempered steel, emphasizing martensite structure and grain size changes produced by controlled heat treatment 07 p0995 A72-19486

Oxygen effect on structure and mechanical, technological and corrosive properties of stainless steel melted in open and vacuum furnaces 07 p1013 A72-19739

Gas saturation of Ti alloy in air and vacuum at 750-1050 C for 1-6 hr, discussing surface layer microstructure change after heat treatment 07 p1013 A72-19742

Phase and microstructure changes during nitriding process of Fe-Ti alloys, stressing Ti concentration effect 07 p1013 A72-19749

Cast and wrought Ti alloys Ar arc weldments microstructural and mechanical properties after different heat treatment sequences 07 p1013 A72-19750

Strength differential effect on microstructures of steels, using tensile and compressive stress-strain curves 07 p1015 A72-19927

Mechanical strength and microstructural characterization of sapphire ribbons and continuous filaments for composite materials 07 p1023 A72-19929

Hf addition effects on grain boundary structure of cast Ni-base superalloys 07 p1015 A72-19931

Environmental hydrogen embrittlement of Ti-Al alloy as function of test displacement rate and microstructure variation 07 p1016 A72-19933

Microstructure and high temperature mechanical properties of unidirectionally solidified pseudobinary Fe-Cr-Nb eutectic alloy 07 p1016 A72-19938

Plasma spraying process effects on carbon steel coatings structure and bonding, considering optimal parameters, properties control and phase transformations 07 p0996 A72-19966

Hf-Co-Al system phase equilibria determination by partial microstructural and X ray analysis 07 p1017 A72-19991

Vacuum hot press diffusion welding of nickel-chromium-thorium dioxide sheet, describing specimen preparation, welding procedure and welded joints photomicrographic microstructure 07 p0997 A72-20002

Time independent incompressible micropolar fluid flow existence 07 p0970 A72-20082

Thermoelastic characteristics and crystal phase distribution effect on microstructural stresses and thermal expansion of polycrystalline refractory materials 07 p1018 A72-20133

Nb and Nb alloys mechanical properties during plastic deformation and heat treatment, discussing grain size, dislocation structure and substructural changes effects 07 p1018 A72-20144

Nb-Ga system equilibrium phase diagram determination by differential thermal, tempering microstructural and X ray analysis techniques, discussing various compounds formation temperatures and characteristics 07 p1050 A72-20161

Rapidly and unidirectionally solidified Al alloys microstructure, discussing crystal dislocation origins and patterns 07 p1019 A72-20240

Heat treatment effect on elastic properties of steel clad material for devices in sulfuric acid, discussing structural changes and optimal conditions 07 p1020 A72-20415

Fe addition effects on structural and mechanical properties of heat resistant Ni-Cr alloys 07 p1020 A72-20416

Diffusion creep influence on grain boundary-adjacent precipitate free zone formation in Ni-Cr alloys subjected to high temperature tensile and creep tests 07 p1021 A72-20437

Internal oxidation behavior of Cu-Cr-Si ternary alloys microstructure comparison with Cu-Si binary alloys, discussing oxide-matrix interface nucleation 07 p1021 A72-20439

Austeno-martensitic steel with 25 percent delta ferrite, examining microstructural changes due to aging at 550 C by thin slide electron microscopy 07 p1021 A72-20484

Circular elastoplastic beam under combined torsion and tension via Mindlin elastic model for materials with microstructure, taking into account work hardening 07 p1097 A72-20534

Cast Nb-C alloys carbon solubilities of 1.4 and 0.25 percent at 2100 and 1200 C, showing molten microstructure and measuring procedures 07 p1023 A72-20669

Metal structure effect on anodic dissolution and surface microgeometry formation during electrochemical machining 08 p1175 A72-21040

X ray study of /Y-La-Ce/-Al-Si-B ternary systems structure at 500 C, noting binary compound presence 08 p1217 A72-21713

Precipitation effect on microstructure, coercive force, resistivity and cell formation changes in heterogeneous decomposition of supersaturated solid solutions and aging alloys 08 p1218 A72-21777

Explosive loading effect on Cr-Ni stainless steel structure with electron microscope study of gamma, alpha and epsilon phases 08 p1187 A72-21780

Ni-Cr-Nb alloys structure and phase composition changes from W-Mo additions and hardening by intermetallic Ni-Nb precipitated from supersaturated solid solution 08 p1187 A72-21782

Impurities and temperature effects on microdeformation of Mo single crystals under dynamic loads 08 p1188 A72-21789

Structural changes of nitrated steel diffusion zone, showing alpha solid solution and hard nitride phases mixture 08 p1188 A72-21880

Electron microscopy application to dynamic wear studies of Ni on Ni surface and subsurface topography and microstructure in nitrogen atmosphere 08 p1179 A72-21943

Ti-alloyed SiC based material microstructure investigation by X ray metallography, optical and electron microscopy 08 p1188 A72-22099

High temperature alloy deformation superplasticity and formability relation with microstructure, fine structure and load requirements for hot working with high strain rate 08 p1250 A72-22200

Oxide scale formation on zirconium diboride materials, observing microstructural features as function of temperature and reaction time [AD-737020] 09 p1333 A72-22380

Alumina microstructure, grain size and impurities effects on ballistic performance, discussing results in terms of microplasticity 09 p1334 A72-22390

Fractography of high boron ceramics under ballistic impact, suggesting macroscopic and microscopic textures relationship to stress states and microstructure 09 p1334 A72-22391

Ceramic materials stress-strain behavior dependence on microstructural factors, discussing point defects, pore size and grain boundaries 09 p1334 A72-22392

Sintered cadmium sulfide films microstructure analyzed by X rays, discussing structural changes effects on dark resistance and photosensitivity 09 p1366 A72-22414

Thermomechanical treatment effects on microstructure and mechanical properties of Al alloy 09 p1327 A72-22470

X ray method characteristics in thermal interphase microstresses determination, considering spherical silicon inclusion surrounded by concentric Al matrix envelope 09 p1309 A72-22638

Mathematical thermodynamic theory for plastic deformation induced internal structure changes in rheological material, describing homogeneous response by temperature and deformation gradients 09 p1403 A72-22761

Pinning force of vortex lines and microstructural inhomogeneities in superconductors, using magnetization and critical current measurements 09 p1369 A72-22796

Explosive strain hardening of hard metal-ceramic alloy, presenting photographs of carbide and cobalt phases structural changes after impact loading 09 p1337 A72-22892

Transmission electron microscope investigation of Al-Mg-Si alloy precipitation, showing Guinier-Preston zone visibility due to matrix elastic strain introduction 09 p1328 A72-22983

Extruded dispersion strengthened Mg-MgO alloys microstructure, discussing high temperature creep effect on dislocation structure changes 09 p1328 A72-22984

Microstructural transformations in preaged Ti alloys with unstable beta phase under external tensile stresses

09 p1328 A72-23032

Anomalous structural dependence of elastic limit in Mo, determining mechanisms responsible for deviations from Peck law

09 p1329 A72-23037

Crack propagation and substructure formation near fatigue crack in austenitic stainless steel observed by X ray diffraction and replica electron microscopy

09 p1329 A72-23148

Ni carbon steel microstructure changes in retained austenite phase and crack observation during low cycle fatigue testing

09 p1330 A72-23150

Aligned fibrous composites microstructural parameters, showing fiber thickness effect on fracture, fabrication, matrix cracking, creep resistance and fatigue

09 p1338 A72-23163

Plastic deformation effect on structure and properties of steel sheet under biaxial tension at liquid nitrogen temperature

09 p1330 A72-23187

Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickel eutectic composite over range of solidification rates

09 p1330 A72-23376

Beta-III Ti alloy mechanical properties dependence on heat treatment and elevated temperature exposure, illustrating associated microstructures

09 p1331 A72-23384

Linear theory of elasticity application to wave propagation in homogeneous isotropic material with deformable microstructure, presenting approximate solution method

09 p1353 A72-23552

Photomicroscopy of sintered refractory alloys and nonmetals of B-Si-C-N system, discussing microstructural interactions between binder metal and refractory component

10 p1493 A72-23824

Electron microscopic, area diffraction and spectral analyses of carbide precipitates in Cr-Mo steels with different heat treatments and microstructures

10 p1494 A72-23828

Electron microscopic study of cyclically deformed Al, Cu, Al-Mg-Zn alloy and carbon steel dislocation structure

10 p1494 A72-23830

Al and oxygen effects on commercially pure Ti microhardness and microstructure, noting interstitial and substitutional atom inclusions effects on hexagonal cell dimensions

10 p1494 A72-23831

Magnetic susceptibility of ternary Al-Mn alloys with Ti, V, Cr, Fe, Co, Ni, Cu and Zn, describing microstructure and aging experiments

10 p1494 A72-23832

Fe-Ni-C alloy mixed austeno-martensitic microstructure embrittlement, investigating mechanical properties after thermomechanical treatment

10 p1495 A72-24087

Micrographic observation of Al and Al-Cu intermetallic dendrites shape at birth in liquid of nearly eutectic composition

10 p1496 A72-24239

Transmission electron microscope examination of deformation microstructures adjacent to fatigue cracks in Al alloys

10 p1497 A72-24823

Low temperature resistant stainless steels mechanical properties, microstructure and weldability, discussing compositions and heat treatments

10 p1498 A72-24838

Fracture energy and deformation of unidirectionally and randomly oriented lamellar Al-Cu eutectics from surface microstructure studies

10 p1499 A72-24893

Filler metal paste application effect on Hastelloy sheet brazing quality, describing results in terms of mechanical properties and microstructural characteristics

11 p1637 A72-25342

Acoustic emission monitoring of postweld heat treatment cracking in Rene 41 weldments, correlating relative crack susceptibility of different microstructures

11 p1653 A72-25345

Test assembly design for microstructural studies of metal and alloy fatigue in vacuum during heating, describing electrical resistance measurement and stroboscopic illumination

11 p1612 A72-25492

Ni and Ni alloys microstructure under tensile stress, determining Cr and Ti effects on plastic deformation at high temperature

11 p1654 A72-25494

High temperature metallographic methods in microstructure study of austenitic heat resistant steel under plastic deformation and heat treatment

11 p1654 A72-25495

Fe-Cr-Mn alloys structural changes during high temperature oxidation, noting subscale layer thickening and alpha phase detection after heat treatment

11 p1655 A72-25498

Microsegregation in Ti-Mo, Ti-V and commercial Ti alloys, investigating cooling rate and alloying elements contents effects

11 p1655 A72-25506

Al microsegregation in Ti-Al and commercial Ti alloys, investigating effects of cooling rate from beta phase and of Al content

11 p1655 A72-25507

Transitional microstructure of machined surface layer due to built-up edge disintegration

11 p1638 A72-25508

Hardened steel inhibited crack propagation mechanism, observing striation in microstructure on fracture surface

11 p1656 A72-25710

Cold rolled Zircaloy 2 sheet microstructure, microstrains and hardness by X ray diffraction and electron microscopy

11 p1657 A72-25757

Transitional ferrite phase formation in Fe-Cr-Ni alloy evidenced on electron micrographs and diffraction patterns

11 p1657 A72-25760

Ductile fracture development in steel due to microcracks and pores formation

11 p1660 A72-26140

Prolonged heating effect on heat resistant Mg alloys microstructure and mechanical properties

11 p1660 A72-26143

Microstructure and mechanical properties of heat treated friction welds at high temperatures

11 p1641 A72-26489

Supergranular motions source of Alfvén waves dominating solar wind microstructure at earth orbit

11 p1724 A72-26530

Low carbon ultrafine grain steel tensile behavior, noting critical grain size for stable/unstable plastic flow transition

11 p1661 A72-26651

Ti alloys fatigue strength, stress concentration sensitivity and grain sizes effects at normal and high temperature under cyclic loads

11 p1663 A72-26821

Ultrasonic oscillations effects on alloy castings grain size and heat resistance, suggesting waveguide direction for oriented solidification

11 p1642 A72-26822

Chemical composition, physical properties, microstructure and production of 1300 kg powder metallurgy forged billets

11 p1644 A72-26845

Microstructure and mechanical properties of dispersion strengthened Co alloys, investigating heat treatment effects

11 p1664 A72-26851

Microstructural properties of Ni-Al powder synthetic material from transmission and photoemission electron microscopy, discussing low and high temperature strength characteristics

11 p1645 A72-26855

Fog and cloud microstructure and density distributions from directional light scattering coefficient /halo indicatrix/

11 p1683 A72-26883

Electron microscopy and structure of materials - Conference, University of California, Berkeley, September 1971

11 p1666 A72-26926

Zone refined prism slip oriented Be single crystals deformation substructure analysis by synergetic method combining transmission electron microscopy, X ray topography and X ray diffraction profile analysis

11 p1666 A72-26928

Coherent phases transformations in alloys, investigating mechanical properties dependence on microstructural features

11 p1667 A72-26929

High temperature Ni base alloys microstructure via transmission electron microscopy and electron diffraction contrast theory, predicting yield and creep strength

11 p1667 A72-26931

Mechanical properties, microstructural characteristics and fracture behavior of beta Ti-V-Cr-Al alloy

11 p1667 A72-26933

Low cycle fatigue deformation of lamellar eutectic and cast Ni-Sr alloys, noting microstructure and chemical composition effects on fracture energy

11 p1668 A72-26939

Fracture micromechanism in liquid-phase sintered W-Fe-Ni powder composites, using scanning electron microscopy

11 p1668 A72-26942

Microstructural effects on high strength Mg, Al and Ti alloys stress corrosion crack growth in aqueous environments, discussing correlations relative to composition and preferred orientation

11 p1668 A72-26946

Dislocation bands in electrolytically hydrogen charged fcc Ni-Co alloy, describing band structure in terms of band axis and planes and Burgers vector

11 p1669 A72-26947

Mica glass ceramics mechanical properties and thermal shock behavior in terms of microstructural variables, discussing fracture propagation and secondary cracks formation

11 p1675 A72-26949

Shock deformation microstructures in Apollo 14 breccia and comparative terrestrial minerals, using transmission electron microscopy

11 p1724 A72-26951

Lunar and terrestrial pyroxenes phase structure electron microscopic investigation, using ion-thinned samples

11 p1725 A72-26952

Aitken condensation nuclei clouds microstructure and area contamination profiles, discussing small sources pollution and plumes polyfurcation [AIAA PAPER 71-1125]

11 p1628 A72-26989

Epitaxial and textured Pb films on mica and glass, using reflection electron diffraction, etching and optical microscopy for structure study

12 p1854 A72-27289

Nitride phase microstructure in ferrochromium nitrided in liquid state, comparing electrolytic etching and film coloration methods

12 p1829 A72-27454

Micromechanics of deformed continua, discussing atomic structure effects on stress concentrations in composite materials, framed structures and grids

12 p1884 A72-27640

Isothermal profiles for Nb-Zr-C and Nb-Ti-C alloys from microstructural and X ray analyses, noting Widmanstatten structure, and second phase formation

12 p1829 A72-27643

Al alloy plate material microstructural variations and specimen orientation effects on tensile and fracture toughness properties

12 p1830 A72-28080

Oxide content and sheet microstructure directionality effects on Be powder and ingot sheets notch strength, noting thickness dependence [ASM PAPER W 72-12.6]

12 p1830 A72-28164

Haynes high strength heat resistant Ni-Cr-W alloy metallurgical and structural relationship, mechanical and physical properties, oxidation and corrosion behavior and fabrication processes

13 p1973 A72-28649

Ultrafine grained microstructures and mechanical properties of alloy steels developed by cold working followed by annealing

13 p1974 A72-28662

Tempered or recrystallized chromium steels tensile behavior at 0 to 700 C, showing strength dependence on martensite transformation induced dislocation structure

13 p1975 A72-28667

Polycrystalline microstructure changes of corundum during high temperature creep tests, using optical microscopy

13 p1983 A72-28775

Hardened coarse-grained steels recrystallization during fast heating, investigating martensite phase macro- and microstructural changes by X ray analysis

13 p1977 A72-28908

Plane longitudinal displacement wave reflection from fixed surface in micropolar elastic half space, presenting reflection laws and amplitude ratios for specific cases

13 p2056 A72-29001

Microscopic substructure in high temperature fatigued fcc austenitic steel and aluminum, studying cross slip lines and crack initiation

13 p1979 A72-29448

Steels structural and microhardness changes by pulsed laser beam induced local heat treatment, noting needleshaped grain refinement

13 p1979 A72-29482

Phase composition, structure and strength properties of aluminizing coatings on Ni-Al alloys, noting plasticity increase due to Ta addition

13 p1980 A72-29485

Stress wave propagation and fracture in composites, discussing micromechanical and homogeneous-continuum theories

13 p2060 A72-29692

Directionally reinforced composites treated as homogeneous continuum with microstructure, deriving displacement equations of motion by Hamilton principle

13 p2060 A72-29694

Interacting continua theory for stress wave propagation in composites with microstructural stress and displacement fields, discussing elastic and viscoelastic materials behavior

13 p2060 A72-29695

High strength carbon fiber reinforced plastics, discussing fabrication techniques, fiber structural, physical and mechanical properties and potential technological applications

13 p1984 A72-30075

- Microstructure and mechanical properties of molecular cermets produced from slip-cast fused silica of different porosity by aluminothermal reduction method 13 p1967 A72-30115
- Ti-Mo-Ni system polythermal section microstructure, hardness, resistivity and thermal expansion characteristics 14 p2112 A72-30153
- Ni, Si and Mn alloying effect on structural transformations, phase composition and mechanical properties of cast Cr-Ni steels 14 p2114 A72-30273
- Microstructure effects on thermomechanically processed dispersion strengthened Ni alloys yield strength at various temperatures 14 p2114 A72-30368
- Al-Cu alloy structural changes after long term natural aging by X ray diffraction analysis 14 p2115 A72-30413
- Microstructural changes relationship to corrosion susceptibility in ternary Al alloy obtained from stress corrosion cracking tests and electron metallography, noting precipitate-free region 14 p2118 A72-30542
- Primary recrystallization in TD-nickel bars on sublight optical level identified by transmission electron microscopy examination of deformation and annealing substructures 14 p2119 A72-30601
- Macroparametric, microstructural and general rationales methods for fatigue resistant materials, noting crack propagation and fracture mechanics 14 p2120 A72-30612
- Modified Al-Si eutectic solidification behavior and microstructure, investigating LF mechanical vibration effects 14 p2120 A72-30617
- W-Nb-C system phase diagram from X ray and microstructural analyses, noting solid solubility, hardness and isothermal cross section 14 p2122 A72-30983
- Mo-W-C system high temperature phase equilibria from X ray and microstructural analysis, noting decrease of C solid solubility with temperature 14 p2123 A72-30984
- Mo-Ni-Al system phase equilibria at 600 C from X ray and microstructural analysis, noting hardness dependence on composition 14 p2123 A72-30985
- Nickel-trinickel alumide-trinickel niobumide system polythermal cross sections from X ray and microstructural analysis, noting electrical resistivity increase with Al content 14 p2123 A72-30988
- Laminated plate continuum theory with microstructure, studying one dimensional harmonic wave propagation in infinite laminate 14 p2169 A72-31147
- Electron microscope study of precipitated lines of austenitic steel containing V and N, noting heat treatment effect on fcc crystal structure 15 p2254 A72-31523
- Carbon distribution effect on cast Mo and alloys structure studied by electron microscopy, microdiffraction and X ray analysis, noting annealing from eutectic temperature 15 p2255 A72-31575
- Polycrystalline Mo-Re alloy under cold longitudinal, transverse, cross and pack rolling, noting twin and dislocation microstructures 15 p2256 A72-31669
- Electron microscopic investigation of Al-Mn alloy precipitate structure and morphology after annealing induced decomposition 15 p2257 A72-32114
- Dynamic boundary value problems for elastic materials with microstructure reduction to tensor equations of motion subject to initial and boundary conditions 15 p2329 A72-32283
- Nonlinear anisotropic elastic constitutive equations for micromorphic and micropolar mixtures, investigating plane wave propagation via field equations with restricted coupling 15 p2278 A72-32446
- Strain release method for investigating thermally activated microflow mechanisms in solids, discussing technique for activation energy and relaxation strength measurements 16 p2372 A72-32822
- Nitride precipitate platelets and dislocation loops formation in Nb-N alloys during aging at 535 C from electron microscope observations of structural changes 16 p2405 A72-32999
- Supermolecular scale microscopic dynamic model for solid body macroscopic friction and wear effects 16 p2398 A72-33367
- Cold rotatory forging and subsequent heating effects on microstructure, texture and mechanical properties of dispersion hardened Ni specimens obtained by hot extrusion 16 p2407 A72-33530
- Isotropic fiber coarsening in unidirectionally solidified eutectic alloys, showing effect on alloy microstructure 16 p2409 A72-33802
- Reliable nondestructive microstructure testing via surface ultrasonic waves 16 p2399 A72-33822
- Deformation substructures in stainless steels under low cycle high strain fatigue tests evaluation for application as fuel cladding for fast breeder reactors 16 p2411 A72-33825
- Alfven wave propagation in interplanetary medium for solar wind microscale fluctuations, using stationary spherically symmetrical model 16 p2449 A72-33912
- Microstructural damage effect on high temperature materials creep life, considering Robinson and Odqvist correlation laws 16 p2474 A72-34127
- The effect of firing temperature on properties of natural steatite and pyrophyllite. 17 p2569 A72-34666
- Carbon fibre composites with ceramic and glass matrices. I - Discontinuous fibres. 17 p2570 A72-34668
- Carbon fibre composites with ceramic and glass matrices. II - Continuous fibres. 17 p2570 A72-34669
- Flexure of micropolar elastic beams. 17 p2631 A72-35056
- Contributions to the study of the macro- and microstructures of semiconductor materials fabricated in our country 17 p2595 A72-35123
- Electron-microscopic investigation of the development of a cellular structure in molybdenum during hydroextrusion 17 p2569 A72-35524
- Structure, electrical conductivity and electron transport mechanisms in chalcogenide glasses 17 p2596 A72-35750
- Analysis of grain- and particle-size distributions in metallic materials. 17 p2569 A72-35922
- Geometric concepts for microstructure change processes dynamics, considering time variation determination of system topological and metrical properties and particle size distribution evolution 18 p2718 A72-36397
- The structure and properties of thermomechanically treated beta-III titanium. 18 p2700 A72-36586
- Microinhomogeneous elastic media with moduli tensor as coordinate random function, investigating stress and strain tensors 18 p2735 A72-36668
- The effect of dislocation tangles on superconducting properties. 18 p2719 A72-36746
- Quantitative microstructural measurements by room temperature photoemission electron microscopy, discussing relief contrast, edge effect, resolution and information depth 18 p2719 A72-36831
- New developments in the study of fiber superalloys obtained by directional solidification 18 p2702 A72-37015
- Variational principle based three dimensional elasticity theory of micropolar anisotropic sandwich plates, considering transverse shear and strains and rotatory inertia 18 p2737 A72-37057
- Effect of structural parameters and temperature on the effective thermal conductivity of plasma-sputtered aluminum oxide 18 p2696 A72-37188
- Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. III - Effect of aging in the temperature range from 203 to 304 K on microplastic deformation at 77 K 19 p2814 A72-37419
- Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. IV - Effect of transformation plasticity on microplastic deformation at 77 K 19 p2815 A72-37420
- Phenomenology and engineering significance of creep recovery in heat resistant steels, stressing ductility and microstructural effects 19 p2816 A72-37707
- A new morphological element on the viscous breakdown microsurface of hypoeutectoid steels 19 p2817 A72-37737
- Microstructure and differential thermal analyses of ternary system Co-Mn-Al, presenting phase diagrams 19 p2818 A72-37852
- Influence of the structure of VTZ-I and VT-18 alloys on the fatigue strength for an asymmetrical loading cycle 19 p2819 A72-38017
- Relations between mechanical properties and microstructures in TiC-Mo2C-Ni alloy. 19 p2821 A72-38375
- Structural features of plasma and gas-flame deposited aluminum oxide coatings 19 p2810 A72-38680
- Microscopic substructure in face centered cubic metals fatigued at elevated temperatures. 20 p2935 A72-38880
- Dislocation motion as a source of acoustic emission. 20 p2924 A72-39280
- Influence of boron on the structure and certain properties of electron-beam melted molybdenum 20 p2939 A72-39313
- Fog and cloud microstructure and particle size distributions from directional light scattering coefficient /halo indicatrix/ 20 p2948 A72-39570
- Mechanical and microstructural properties of steels for effective surface cementation, suggesting Mo and Cr optimal contents 20 p2941 A72-39576
- The effect of Si, Zr, Al and Mo on the structure and strength of Ti martensite. 20 p2941 A72-39792
- Beta to omega phase transformation and structure in Zr and Ti alloys bcc solid solutions by dark field electron microscopy, diffraction and ultrasonic technique 21 p3065 A72-40092
- Corundum polycrystalline microstructure changes during high temperature creep tests, using optical microscopy 21 p3072 A72-40269
- Investigation of the structural content and the determination of the optimal image of focus series in light and electron microscopy with the aid of Fraunhofer diffraction/structure spectroscopy/ 21 p3055 A72-40747
- Fracture toughness of the heat-affected zone in 14CrMoV69 steel and 18Ni maraging steel. 21 p3067 A72-40850
- Deformation microstructure of fine grained and plate-like structure two phase Ti alloys, noting plasticity decrease in beta phase presence 21 p3068 A72-40963
- Ferromagnetic tau phase structure of Mn-Ac alloy with powder anisotropy related to platelet formation and twinning orientation 21 p3068 A72-40965
- A study on the correlation between thermal fatigue and low-cycle fatigue at elevated temperatures. 21 p3119 A72-41008
- The properties and structures of a heat resistant 1Cr-Mo-V steel and alloy A-286 after long time exposures at elev. temps. 21 p3069 A72-41012
- The effect of alloying elements on creep rupture strength and microstructure of 12 percent chromium heat resisting steel. 21 p3069 A72-41014
- The influence of grain and twin boundaries in fatigue cracking. 21 p3069 A72-41350
- Metastable phases in very rapidly solidified aluminum-germanium alloys 21 p3070 A72-41644
- Structural and reaction kinetic characteristics of /W, Ti and Ta/C-Co systems, considering solubility, surface energy, diffusion, segregation and grain growth 21 p3071 A72-41849
- Peculiar absorption and emission microstructures in the type IV solar radio outburst of March 2, 1970. 22 p3217 A72-42044
- Light scattering studies in amorphous media. 22 p3206 A72-42798
- Effect of rare earth metals on the structure and properties of aluminum and its alloys 22 p3192 A72-42818
- Thermomechanical manipulation of precipitate shape in a titanium-base alloy. 22 p3194 A72-43044
- German monograph - Influence of programmed welding cycle temperatures on the microstructure formation and corrosion behavior of austenitic corrosion-resistant steels. 22 p3195 A72-43075
- Microscopic aspects of fracture in ceramics. 23 p3305 A72-43504
- Microstructural aspects of the fracture of two-phase alloys. 23 p3299 A72-43510
- X ray, microstructural and differential thermal analysis for binary Zr alloys, noting formation of ternary phases and solid solutions 23 p3300 A72-43588
- Investigation of the structural state of the InDk40T7 high-coercivity alloy 23 p3300 A72-43594
- Investigation of the state of the structure of turbine-disk materials after operation 23 p3302 A72-43965
- Increasing the boundary strength of electron-beam-melted cast molybdenum by vanadium microadditions 23 p3302 A72-43967
- Influence of the cooling rate after sintering on the structure and properties of the ZnGr1.5D2.5 cermet 23 p3303 A72-44014

- Structure of the 01420 alloy with zirconium
23 p3303 A72-44094
- Phase extraction and analysis in superalloys - Summary of investigations by ASTM Committee E-4 Task Group I.
23 p3304 A72-44257
- Mechanical properties of heat treated hardened high strength steel, investigating microstructure relationship to failure characteristics
24 p3416 A72-45734
- Microstructure properties of heat resistant alloy for gas turbine blades as function of operational time
24 p3416 A72-45747
- Thermoelastic characteristics and crystal phase distribution effect on microstructural stresses and thermal expansion of polycrystalline refractory materials
24 p3416 A72-45759
- MICROTHRUST**
- Ten mlb concentric tubes biowaste resistojet thrust performance for hydrogen, water, methane, carbon dioxide and biopropellant mixtures, discussing vibration, shock and acceleration tests
[SAE PAPER 710769] 01 p0116 A72-10263
- RF ion microthruster discharge vessel and plasma holder material investigation, considering quartz, boron nitride and aluminum oxide
[AIAA PAPER 72-473] 11 p1709 A72-26204
- Cs contact ion microthrusters, neutral fraction measurements, analytical methods and testing procedures
[AIAA PAPER 72-495] 11 p1711 A72-26218
- MICROTOPOGRAPHY**
- U. TERRAIN**
- MICROWAVE AMPLIFIERS**
- Transferred electron microwave oscillators / three-level and LSA relaxation types/ and amplifiers / reflection and traveling wave types/ fabrication, technology and performance capabilities
01 p0035 A72-10627
- Supercritically doped transferred electron microwave amplifiers stabilization mechanisms, considering cathode contact, anode diffusion current and active region temperature gradient roles
01 p0036 A72-10636
- Doping profile effects on reflection-type IMPATT diode microwave amplifiers, presenting power-gain vs frequency curves
01 p0037 A72-10643
- Broadband high efficiency mode /HEM/ TRAPATT amplifiers for S band, discussing bandpass and input-output characteristics with Ichebycheff filter
01 p0038 A72-10652
- Wideband microwave parametric amplifier using balanced circuits to relax isolation requirements between signal, idler and pump circuits
01 p0038 A72-10655
- Gain vs bandwidth characteristics of broadband microwave parametric amplifiers
01 p0038 A72-10656
- S band transistor power amplifier design and performance, noting application for 960 telephone channel radio relay system
01 p0038 A72-10657
- Computer program for design optimization of three-stage wideband low-noise integrated microwave amplifier
01 p0041 A72-10690
- Large signal nonlinear modeling and digital simulation of microwave transistor power amplifier and GaAs Gunn relaxation oscillator
01 p0041 A72-10691
- Gunn and IMPATT diodes applications for microwave power oscillators and amplifiers in radio link equipment
01 p0042 A72-10711
- Microwaves and optical generation and amplification - Conference, Amsterdam, September 1970, covering microwave tubes, solid state devices and quantum electronics
01 p0044 A72-11278
- Electron motion equations for threshold input signal of M type amplifiers with secondary emission cathode in interaction space
02 p0190 A72-11571
- Varactor diode microwave parametric amplifiers for radio astronomy interferometer, discussing system design features for gain and phase stabilities
02 p0192 A72-12043
- Dual-gate MOS transistor structure, operational principles and electrical characteristics, noting suitable properties for use in low noise microwave amplifier
03 p0330 A72-12969
- Book on microwave electronics covering electron beam microwave devices and solid state microwave oscillators and amplifiers
03 p0331 A72-13233
- Narrow band medium power X, Ku and C band solid state amplifiers, demonstrating TWT replacement with GaAs and avalanche diodes
03 p0334 A72-14072
- Gunn diode large signal admittance dependence on bias and frequency, discussing computer simulation and broadband oscillator and amplifier design
04 p0497 A72-14712

- High power reflection-type pulsed microwave amplifier using high efficiency antiparallel avalanche diode pair connected at transmission line ends
04 p0497 A72-14714
- Avalanche transit time diodes noise mechanisms and performance in microwave amplifier, oscillator and mixer applications
04 p0500 A72-15302
- Millimeter and submillimeter wave molecular beam masers amplification principles and Doppler and collisional broadening elimination capability
04 p0532 A72-15597
- Microstrip configuration for microwave GaAs IMPATT diode oscillators and power amplifiers
05 p0633 A72-15782
- Distributed unidirectional microwave IMPATT diode amplifier and CW tests for X and C band circuits
05 p0633 A72-15783
- Microwave IC power amplifiers for radio relay, telemetry, phased array radar and TWT replacement
05 p0634 A72-15784
- Frequency characteristics theory for two-stage electron tube microwave amplifiers coupled by transmission line on order of wavelength
05 p0634 A72-15827
- Ultralow noise microwave parametric amplifiers in communication satellite earth terminals, discussing technology basis of millimeter wave paramps
06 p0784 A72-17741
- Broadband uhf power amplifier for AM signals output power of 100 W, using eight parallel transistors
06 p0774 A72-17750
- Wideband tunnel diode microwave amplifier design with coaxial line, considering band-edge stability and impedance matching
06 p0785 A72-18310
- High power L-band microminiaturized hybrid type integrated transistor amplifier design and realization by computer
06 p0785 A72-18314
- Microwave thin film microstrip IC tunnel diode amplifiers for broadband high performance receivers, discussing design, construction and performance
06 p0786 A72-18374
- IMPATT diode microwave oscillators and amplifiers calculating noise sideband correlation factor at randomly large signal frequencies
06 p0788 A72-18464
- Medium power high gain, CW transferred electron microwave amplifiers at C band, describing bandwidth, saturation, intermodulation distortion and dynamic range characteristics
06 p0789 A72-18483
- Large signal analysis of stabilized supercritically doped transferred electron microwave amplifiers, considering diffusion and lattice temperature effects
06 p0790 A72-18484
- Power generation and low noise amplification devices development during past decade, considering avalanche diodes, transferred electron and acoustoelectric devices and microwave transistors
07 p0952 A72-18825
- Gigahertz reflection amplifiers with low cost avalanche transit time diodes, measuring characteristics of amplification by synchronization at center frequency
07 p0955 A72-19191
- Miniature modular wideband parametric amplifier for centimeter range, using IC optimal coupled circuit with passband dependent on diode time constant
07 p0956 A72-19570
- Waveguide cavity Gunn microwave power amplifiers, predicting maximum small signal gain and FM and AM noise performance
07 p0958 A72-19921
- Symmetrical amplitude-frequency characteristics of microwave reflection amplifiers with active resonators connected in series by nonhalf wave transmission line
08 p1138 A72-20791
- Five layer resonant transparent semiconductor device structures for microwave amplifiers, reactive elements, low current rectifiers and filters
08 p1139 A72-21059
- Transistor power amplifier for 2.5 GHz range directional transmitters, noting cooling problems elimination
08 p1140 A72-21306
- Multichannel junction gate FET /Gridistor/ for microwave power amplifier, discussing design, fabrication and performance
08 p1141 A72-21429
- Solid state microwave power amplifier with unidirectional transmission line loaded by negative resistance diode series, calculating large signal characteristics
08 p1142 A72-21558
- Millimeter wave pumped X band balanced diode type parametric amplifier using GaAs Schottky barrier varactors for operation at room temperature
09 p1289 A72-23417
- Supercritical CW GaAs transferred electron broadband reflection amplifier power gain and noise figure at 34 GHz
10 p1449 A72-24301

- CW circuit stabilized InP microwave reflection amplifiers in Q band, determining power gain and noise figure
10 p1450 A72-24308
- Multistage broadband microwave amplifier design based on bipolar transistors cascade coupling, using scattering parameters
10 p1451 A72-24572
- Transistorized microwave amplifier/limiter for upper part of decimeter wave range, suggesting limitation in automatic gain control transistor
10 p1451 A72-24588
- Nonlinear microwave power amplifiers with IMPATT diodes in stable and injection locked modes, predicting behavior for comparison with experiment
10 p1451 A72-24592
- Noise measurements of AM and FM microwave generators and amplifiers in nonlinear regime
10 p1452 A72-24643
- Stabilization bandwidth reduction in microwave parallel tuned tunnel diode amplifier circuits synthesis
10 p1453 A72-24910
- Minimum noise coefficients of M-type microwave beam amplifiers with crossed fields, taking into account delay system distributed losses
10 p1453 A72-24913
- Complex gain nonlinearity of transmitting microwave amplifiers in single and multicarrier operation
10 p1454 A72-25147
- High quality GaAs varactor diodes for double diode low noise wideband parametric amplifiers at idler frequencies up to 43 GHz without refrigeration
12 p1788 A72-27174
- Tunnel diode amplifier for 8 GHz band, considering gain, bandwidth, noise factor and stability characteristics
12 p1790 A72-27533
- Solid state InP sources for microwave transferred electron oscillators and amplifiers with improved conversion efficiencies, comparing with GaAs
13 p2020 A72-28432
- Microwave amplifier with internal negative feedback, using IF output for frequency modulation of mixer oscillator signal
13 p1930 A72-29057
- Parametric regeneration in Josephson superconducting point contacts for combination frequency signal amplification and conversion in microwave application
13 p1932 A72-29298
- Design and performance of microwave single stage relaxing avalanche diode reflection amplifier
14 p2088 A72-30918
- Transistorized microwave amplifiers with dissipative equalizing networks, describing transistor equivalent circuit
15 p2206 A72-31659
- Phase and gain response of wideband coaxial X band microwave avalanche diode amplifiers
16 p2368 A72-33073
- Parametric amplifiers for satellite microwave communication systems, discussing frequency stability, noise temperature and gain relationships
16 p2369 A72-33520
- Russian book on microwave electronics covering linear-beam and cross-field backward and traveling wave amplifiers and oscillators, klystrons, masers, plasma devices, etc
17 p2532 A72-34650
- Broadband high power L-band phased array amplifier chain.
17 p2528 A72-34710
- Modular I-band solid-state microwave amplifier.
17 p2528 A72-34711
- Series stabilization reflection type tunnel diode microwave amplifier synthesis with allowance for real circulator reactance
18 p2665 A72-36107
- Spaceflight-qualified tunable C-band parametric amplifier system.
19 p2770 A72-37253
- 18 GHz paramps with both liquid helium and room temperature operations and with triple-tuned gain characteristics.
19 p2770 A72-37254
- An X-band paramp with 0.85 dB noise figure /uncooled/ and 500 MHz bandwidth.
19 p2770 A72-37258
- A C-band all ferrite integrated wideband high power GaAs avalanche diode amplifier.
19 p2771 A72-37264
- Intermodulation characteristics of X-band IMPATT amplifiers.
19 p2771 A72-37265
- Millimeter-wave solid-state exciter-modulator-amplifier module for gigabit data-rate.
19 p2771 A72-37267
- Design considerations of a 3.1-3.5 GHz GaAs FET feedback amplifier.
19 p2771 A72-37269
- Single and dual gate GaAs FET integrated amplifiers in C band.
19 p2771 A72-37270

Dynamic behavior of nonlinear power amplifiers in stable and injection-locked modes.

19 p2773 A72-38293

Combinational distortions and cross distortions in parametric microwave systems

19 p2768 A72-38665

Microwave low noise amplifiers for use in radar systems.

20 p2907 A72-39220

Digital p-i-n diode microwave drive amplifier design guidelines, discussing sharp switching pulses and short circuit protection features

20 p2904 A72-39734

High-power microwave amplifier using IMPATT diodes.

20 p2909 A72-39776

IMPATT diode circuits operation as microwave amplifiers, presenting data on intermodulation distortion, amplitude to pulse modulation conversion and reliability

20 p2910 A72-39851

Low-noise parametric amplifiers for radio astronomical observations at 18 to 21 cm wavelengths

21 p3025 A72-40303

Low noise microwave parametric amplifier design for space communication receivers, using inverted diode balanced mixers

21 p3025 A72-40304

Miniature modular wideband parametric amplifier for centimeter range, using Q optimal coupled circuit with passband dependent on diode time constant

22 p3158 A72-42088

Frequency characteristics theory for two-stage electron tube microwave amplifiers coupled by transmission line on order of wavelength

23 p3268 A72-43435

Theory of microwave amplification with electron transfer

23 p3269 A72-43550

Linear theory of a microwave distributed amplifier based on an avalanche transit-time diode

23 p3271 A72-43776

Stability criteria for phase-locked oscillators.

23 p3272 A72-44192

Microwave phase shifting with gain using IMPATT diodes.

24 p3385 A72-44963

Reflection amplification in thin layers of n-GaAs.

24 p3385 A72-44971

MICROWAVE ANTENNAS

NT HORN ANTENNAS

NT LENS ANTENNAS

NT SLOT ANTENNAS

Pulse IMPATT diode Ka band microwave rf head mechanically steered antenna array for airborne monopulse tracker applications

01 p0039 A72-10661

Electronically scanned monopulse cavity backed quadratic spiral antenna array at 1.54-1.66 GHz for maritime satellite communications

01 p0039 A72-10662

X-band linear phased array tracking antenna with digital phase shifters and beam steering, evaluating beamwidth, gain and direction error

01 p0028 A72-10663

Multifunction integrated microwave array antenna design emphasizing interlacing multifrequency bands into single aperture and mutual interaction effects reduction between elements

01 p0039 A72-10667

Tubular traveling wave antenna array for radar applications and microwave television transmitters, describing computer program for design

01 p0039 A72-10668

Limited scan microwave antenna design, discussing angular coverage, feed motion and focal field distribution

01 p0039 A72-10670

Reflector antennas with very high front-to-back ratio - Theory and experiments on models.

01 p0029 A72-10673

Dielectric cone feeds design for microwave antennas, presenting radiation patterns

01 p0029 A72-10675

Short backfire antenna gain increase, considering construction case, reflector arrangement and circular polarization

01 p0040 A72-10684

Microwave breakdown prediction models for antenna system in ionized reentry environment

04 p0486 A72-14531

Modes propagating inside tubular microwave antenna, studying canonical problems by asymptotic and modal techniques

04 p0501 A72-15430

French book on antenna application to radars and space techniques covering UHF techniques, mathematical theories and apparatus development

05 p0626 A72-16287

Microwave antennas, feed systems, strip transmission lines and test instrumentation, examining radiation patterns, design and polarization characteristics

05 p0635 A72-16330

Polarization changes with distance from microwave antenna in near and intermediate zones for circularly and elliptically polarized fields in square and rectangular apertures

05 p0635 A72-16335

Dispersion and energy characteristics of azimuthally asymmetrical waves in microwave logarithmic or arithmetical spiral antenna deposited on isotropic magnetodielectric layer

05 p0636 A72-16338

Low cost automated digitized measurement for microwave antenna feed power gain and relative phase, using computer facilities

05 p0637 A72-16420

Microwave antenna efficiency measurement by integrated isotropic levels comparison, featuring elimination of error due to specular ground reflections

05 p0637 A72-16421

Four uhf antennas buried beneath refractory concrete, discussing design, fabrication and power gain and azimuthal pattern measurements

06 p0771 A72-17345

Multifrequency array antenna of interlaced open ended waveguide elements for L, S and C bands, reducing mutual interaction by cross polarization

06 p0782 A72-17360

Microwave holography using transmitting and receiving antenna for generation of synthetic aperture in angular direction

06 p0814 A72-17486

Papers on microwave engineering covering surface finish importance for waveguide propagation, parametric amplifiers and voltage breakdown of microwave antennas

06 p0783 A72-17737

Voltage breakdown of microwave antennas, discussing ionization rates in hot air and breakdown suppression by electron flow

06 p0783 A72-17739

Single slotted waveguide linear arrays, discussing microwave antenna design and feeding and cross polarization suppression

06 p0784 A72-17740

Microwave attenuation due to ohmic losses in periodic linear arrays of metallic cylinders, ribbons and slots in metallic ground plane

06 p0786 A72-18372

Step-scan landing system technique, using microwave fixed linear array for area coverage with pattern of narrow overlapping individually coded sequentially switched beams

06 p0846 A72-18397

K and Ka bands standard electromagnetic horn gain measurement and error analysis at different wavelengths by two-antenna method

07 p0957 A72-19784

X band microwave attenuation measurements in high density air plasma layer at aperture antenna in rectangular shock tube

07 p0949 A72-20560

Phased directional surface wave splitters and microwave and integrated optics elements based on single mode, dielectric and rectangular waveguides

08 p1131 A72-20935

Reflected signal and receiver noise interference error in antenna temperature and calibration measurements by artificial moon method in centimeter and decimeter bands

08 p1142 A72-21726

Microwave two reflector rectangular backfire antenna with dielectric surface wave structure as waveguide prolongation, obtaining far field radiation pattern

11 p1604 A72-25749

Microwave antenna radiation patterns from far field measurements by radio holograms with probe

11 p1598 A72-26718

Communication satellites microwave circular array antenna for wideband circularly polarized isotropic radiation

[AIAA PAPER 72-529]

12 p1789 A72-27419

Receiving and transmitting antennas directional gain effect on microwave long distance tropospheric propagation

12 p1783 A72-27632

Microwave horn and lens antennas radiation spatial coherence characteristics, noting effect on picture contrast

13 p1928 A72-28475

Pyramidal-horn primary element axial position effect on dual mirror Cassegrain microwave antenna main lobe pattern, obtaining optimal position

13 p1929 A72-29040

Narrow antenna radiation beam used for size and location determination of solar microwave radio burst observed with radio telescope

13 p2048 A72-29743

Microwave antenna near field apparent image and phase-amplitude distribution measurement with photocontrolled semiconductor panel

15 p2209 A72-32672

Fourier transform /subtractive/ holographic imaging technique for microwave antenna apertures

16 p2368 A72-33072

Blunt nose cone flow field characteristics microwave measurement at stagnation point during atmospheric reentry, using plasma diagnostic sensors with antennas and electrostatic probes

[AIAA PAPER 72-693]

16 p2345 A72-34049

A millimeter wave receiving antenna with an omni-directional or directional scannable azimuth pattern and a directional vertical pattern.

17 p2525 A72-34364

Broadband high power L-band phased array amplifier chain.

17 p2528 A72-34710

SHF airborne distributed phased array antenna system.

17 p2531 A72-35572

Antenna array analysis of arbitrarily-located, parallel center-fed dipoles with terminals in a common plane.

18 p2666 A72-36328

Low noise microwave receiving systems on a 64 m antenna.

19 p2763 A72-37255

Design of Cassegrain antennas employing dielectric cone feeds.

19 p2772 A72-37847

Prediction of near-field antenna coupling in the presence of obstacles.

20 p2902 A72-38998

Reflector profiles for the pencil-beam Cassegrain antenna.

20 p2903 A72-39221

Faraday rotation dual-mode ferrite reciprocal phaser with performance and cost advantages over toroidal type for microwave phased array applications

20 p2909 A72-39733

Radiation characteristics of dielectric cones.

20 p2904 A72-39773

A rectangular beam waveguide resonator and antenna.

21 p3026 A72-40358

Cross polarizing effects of a water film on a parabolic reflector at microwave frequencies.

21 p3027 A72-40375

Experimental investigation regarding Archimedean spiral antennas for the L-band, and radiator groups constructed from them whose radiation directions are controlled by a conduction matrix

21 p3028 A72-40510

Two-hybrid mode feed design procedure and performance for small and large f/D ratio reflectors of microwave telescope

21 p3029 A72-40515

A 3-meter Cassegrain antenna for the frequency range from 2.1 to 2.3 GHz

21 p3029 A72-40521

Luneburg lens spherical antenna microwave radiation pattern, computing Maxwell equations via Tai method

21 p3030 A72-40529

A dual frequency, dual polarized feed for radioastronomical applications.

21 p3034 A72-41400

Design of radiating elements for large planar arrays - Accomplishments and remaining challenges.

23 p3269 A72-43571

Geometrical optics approximation for angular error calculation of microwave antenna radome, noting boresight error proportionality to walls electrical thickness

23 p3271 A72-43837

MICROWAVE ATTENUATION

Rain droplet size distribution effects on microwave attenuation at millimeter wavelengths, comparing calculation with measurement

01 p0027 A72-10406

Waveguide channel microwave bandpass filters for radio relay systems, discussing methods of improving group delay in passband and attenuation at harmonic frequencies

01 p0041 A72-10694

Venus lower atmosphere from Venera 4, 5 and 6 and Mariner 5 data, evaluating greenhouse effect by microwave absorption and by nongray radiative model

01 p0129 A72-10795

Nonparabolic n-InSb semiconductors, presenting microwave conductivity dc field induced anisotropy

04 p0560 A72-14543

Circularly polarized microwave damping at electron cyclotron frequency in low density magneto cesium plasma, investigating power absorption coefficient and refractive index

04 p0555 A72-14853

Air-filled elliptical waveguide with nonmagnetic metal wall, determining dominant TE mode attenuation by perturbation method with Bessel function

04 p0491 A72-15426

Microwave attenuation due to ohmic losses in periodic linear arrays of metallic cylinders, ribbons and slots in metallic ground plane

06 p0786 A72-18372

Nonlinear microwave absorption by plasma between cyclotron and hybrid frequencies for critical magnetic field

06 p0776 A72-18408

- Microwave absorption by longitudinally inhomogeneous plasma, noting waveguide excitation in critical concentration region 06 p0776 A72-18409
- Atmospheric attenuation due to rain based on links experiment and statistical study of equivalent precipitation for given path length and time percentage 07 p0939 A72-19188
- Earth-space path attenuation statistics and fade duration at 15.3 GHz, using ATS 5 satellite transmission and radiometric sun/sky techniques 07 p0948 A72-20496
- X band microwave attenuation measurements in high density air plasma layer at aperture antenna in rectangular shock tube 07 p0949 A72-20560
- Microwave signal attenuation in II oscillation plasma beam discharge, comparing to braking cyclotron absorption effect 08 p1212 A72-20792
- Microwave absorption in high pressure hydrogen based on radio astronomical measurements of Uranus brightness temperature 08 p1239 A72-22088
- Microwave attenuation factor of TE and TM modes in hollow conducting elliptical waveguides, using first order perturbation formula for calculation 10 p1451 A72-24594
- Venus lower atmosphere enhanced microwave attenuation explained by water vapor and droplet layer, calculating mass density distributions 11 p1724 A72-26762
- Ni powder artificial dielectric in waveguide transverse magnetic field, noting nonreciprocal nature of microwave attenuation and phase shift 11 p1607 A72-26786
- Eigenfunctions, eigenvalues and microwave attenuation constants in square and rectangular waveguides with rounded corners 11 p1607 A72-26994
- Line-of-sight radio link attenuation by atmospheric precipitation and phase interference fading during multipath propagation in 7-15 GHz range 12 p1785 A72-27802
- Theoretical and measured rainfall attenuation of millimeter waves, correlating attenuation coefficients, rain rate and drop size distributions 12 p1785 A72-27803
- Microwave acoustic surface waves attenuation at solid and monatomic gas boundary, detailing frequency, molecular weight, pressure and temperature effects 15 p2278 A72-32505
- Molecular absorption of microwaves by atmospheric impurity gases ozone, carbon monoxide and nitrous oxide up to 20 km 16 p2364 A72-33483
- Microwave absorption in high pressure hydrogen based on radio astronomical measurements of Uranus brightness temperature 17 p2606 A72-34651
- Nonlinear microwave absorption by plasma between cyclotron and hybrid frequencies for critical magnetic field 17 p2588 A72-34858
- Microwave absorption by longitudinally inhomogeneous plasma, noting waveguide excitation in critical density region 17 p2588 A72-34859
- Phenomenological model for incoherent microwave scatter attenuation from turbulent plasma, establishing relation between plasma parameters and attenuation coefficient 17 p2517 A72-35622
- Absorption of the 4- to 6-millimeter wavelength band in the atmosphere. 18 p2689 A72-36961
- Heat conduction as mechanism for solar microwave bursts attenuation, noting effect of gyromagnetic absorption layers 19 p2852 A72-38497
- An ultra-broadband probe for RF radiation measurements. 20 p2921 A72-38993
- MICROWAVE CIRCUITS**
- Microwave module circuit design for airborne phased array radar with distributed power generation, reception and phase shift functions, considering performance, reliability and cost 01 p0028 A72-10660
- Computerized optimization procedure for microwave circuits without tuning elements, applying to high pass filter design 01 p0040 A72-10686
- Microwave oriented circuit analysis program /MODMAN/ to handle nonlinear, time-varying, lumped and distributed elements in time domain, using transmission line modeling algorithm 01 p0045 A72-10687
- Computer program for microwave circuit scattering matrix sensitivity, applying to stripline elliptic low pass filters and thin-film negative resistance transistor amplifier 01 p0034 A72-10688
- REDAP 31 network analysis program for design of S-band phase shifter with P-I-N diodes for phase array antennas 01 p0040 A72-10689
- Coaxial connector standard interfaces for optimum microwave performance, discussing single connector reflection coefficient measurement equipment and procedures 01 p0041 A72-10693
- Nonreciprocal microwave ferrite device design, outlining loss-free, cyclic symmetrical, multipoint junction circulator theory 01 p0041 A72-10695
- Ferrite-loaded waveguide Y-junction field mode identification by eigenvalue phase-frequency characteristics measurement, applying to millimeter wave circulator synthesis 01 p0041 A72-10697
- Hybrid microwave integrated circuits, discussing distributed circuits with strip transmission lines and lumped element circuits with inductors and capacitors 01 p0045 A72-10698
- GaAs, Si and alumina performance as substrates in integrated microwave circuits 01 p0046 A72-10700
- Directional couplers design for broadband microwave integrated circuits 01 p0046 A72-10702
- Interference control in microwave circuit design, discussing coupling element, antenna terminals, radiated interference susceptibility and electromagnetic environments 02 p0189 A72-11558
- Dual gate GaAs microwave FET, measuring second gate voltage effects on power gain and noise 02 p0191 A72-11893
- Metal-semiconductor-metal Schottky barrier microwave diode impedance and shot noise calculation 02 p0191 A72-11894
- Dual-gate MOS transistor structure, operational principles and electrical characteristics, noting suitable properties for use in low noise microwave amplifier 03 p0330 A72-12969
- GaAs Schottky barrier and germanium backward diodes in microwave integrated circuit applications, describing design and performance as frequency changers and low level detectors 03 p0334 A72-14073
- Low cost ferrite remanence microwave phase shifter design using periodic loading structures 04 p0497 A72-14716
- Lumped capacitors, inductors, resistors and gyrators for use at microwave frequencies, discussing design and applications up to X band 04 p0497 A72-14717
- Gaussian envelope microwave pulse generation using absorption p-i-n diode modulator, predicting performance by digital simulation 04 p0498 A72-14718
- Reciprocal dual mode millimeter wavelength phase shifter design for use in phased array antennas, calculating phase shift and insertion loss vs frequency 04 p0498 A72-14719
- Wideband microwave acoustic delay line design featuring superior bandwidth, phase linearity, spurious echo and insertion loss characteristics 04 p0521 A72-14720
- Distributed unidirectional microwave IMPATT diode amplifier and CW tests for X and C band circuits 05 p0633 A72-15783
- Hf and microwave hybrid circuits encapsulation, discussing hermetic seals formation 05 p0634 A72-16182
- Coaxial and stripline wideband microwave hybrid ring junctions equivalent to magic Tees with improved electrical properties 05 p0636 A72-16344
- N-channel Si MOS microwave transistor, discussing fabrication, design, power gain, stability, noise figure, equivalent circuit and applications 05 p0636 A72-16361
- Conical cavity resonator design for submillimeter wave electron beam devices, investigating mode and resonant frequency dependence on cavity size 05 p0636 A72-16364
- Microwave lumped element impedance measurements from 1 to 12 GHz by resonant transmission line frequency and Q perturbation technique 05 p0637 A72-16419
- Multicircuit hf filters tuning drive with mechanical synchronization correction 06 p0774 A72-17749
- L- and X-band Y junction waveguide circulators for medium and peak high powers in radar applications, discussing operation principle and design 06 p0785 A72-18311
- Microwave frequency multiplier construction by hybrid circuits based on quasi-lumped components, calculating characteristics from equivalent circuit 06 p0785 A72-18313
- Bulk semiconductor material complex microwave conductivity and dielectric constant measurements by cavity perturbation techniques 06 p0786 A72-18371
- Microwave biased millimeter and submillimeter wave detector with n-type InSb, using down conversion process and free carrier absorption for detection 06 p0866 A72-18384
- Harmonic power extraction from series-stacked high efficiency avalanche diodes at superhigh frequencies on simple microstrip circuits 06 p0788 A72-18468
- Microwave parametric amplification and conversion in circuits with Josephson junctions, describing stable oscillation measurements 06 p0866 A72-18477
- Microwave IC front end receiver synthesis for radio relay system, considering low noise figure achievement by Si Schottky barrier diodes 07 p0955 A72-19356
- IR radiation detection by microwave biased photoconductor, lead-tin telluride photovoltaic detector and thermal imaging pyroelectric detector and array system 07 p1034 A72-19425
- Schottky barrier semiconductor devices characteristics, fabrication and application to pulse microwave diodes and IC elements 08 p1139 A72-21053
- Small signal microwave transistors design with arsenic and phosphorus diffused emitters, comparing performance in terms of power gain-bandwidth product, maximum frequency and noise figure 08 p1142 A72-21743
- Microwave transistor noise factor measurement for various geometries and parameter values correlation with predictions 09 p1286 A72-23104
- Junction transistor equivalent circuit small signal parameters determination at VHF and UHF 10 p1450 A72-24324
- Schottky barrier crystal microwave video diodes design and fabrication to maximize burnout resistance and dynamic range for given detection sensitivity 10 p1450 A72-24553
- X band high power ferrite phase shifter design and performance 10 p1451 A72-24595
- Wideband microwave device with diode and single component correction circuits Q factors measurement from frequency dependence of input traveling wave coefficients 10 p1453 A72-24918
- High conversion efficiency microwave second harmonic generator using negative resistance nonlinearity of n-type GaAs 11 p1591 A72-25741
- Lossless distributed rectangular microwave structure with dielectrics interposed between two conductive metallic layers, noting existence of transmission zeros and filter properties 11 p1607 A72-26990
- Pulsed IMPATT diode oscillators, pulse power capabilities, considering microwave circuit, dc and pulse biasing, power limitation and circuit anomalies 13 p1931 A72-29109
- Microwave circuits for multiplexing applications, discussing optimal design in terms of economic, mechanical and electrical parameters 13 p1934 A72-30089
- Schottky diode microwave down-converter conversion loss calculation as function of image terminal with consideration of barrier capacitance, series resistance and voltage drop 14 p2088 A72-30586
- Nonlinear microwave circuit feedback model analysis by describing function in control theory, applying to oscillator phase locking problem 15 p2210 A72-31355
- Microwave waveguide semiconductor modulator with p-n-n diode as control element, taking into account semiconductor control element conductivity change along waveguide wall 15 p2206 A72-31662
- German monograph on microwave broadband tunnel diode mixers theory and design, taking into account parasitic elements as part of filter networks 16 p2368 A72-33507
- Microwave integrated circuits. 17 p2527 A72-34570
- Ceramic waveguide microwave integrated circuits. 17 p2534 A72-35570
- Microwave power junction transistor design factors effects on long and short term reliability and MTBF 18 p2666 A72-36552
- Microwave junction transistor geometric design factors effect on reliability and performance, comparing overlay, interdigitated, mesh and inverse overlay structures 18 p2666 A72-36553
- Low noise high power bipolar and field effect transistors monolithic integration potentials for microwave applications 19 p2771 A72-37261

P-i-n variable attenuator with low phase shift.
19 p2773 A72-38294

A comparison of manufacturing techniques for hybrid microwave circuits.
20 p2908 A72-39496

Low noise compact down converter for 12 GHz to UHF based on waveguide mounting microwave ICs, measuring conversion loss for GaAs Schottky diode
21 p3033 A72-40885

Automatic measurement of microwave-cavity parameters using stable sampled control loops.
21 p3034 A72-41465

Variable-bandwidth frequency-modulation chirp pulse compression using a longitudinal acoustic-wave convolver at 1.3 GHz.
21 p3023 A72-41468

Computation of single-conductor and symmetric and asymmetric two-conductor stripline characteristics by the relaxation method.
21 p3036 A72-41831

Microstrip matching networks synthesis for microwave integrated circuits, calculating passband of configurations with lumped and distributed elements
23 p3269 A72-43445

Accuracy of measuring the noise figure of microwave two-ports
23 p3273 A72-44313

MICROWAVE COUPLING
NT COUPLING CIRCUITS

Mutual microwave coupling effects on element VSWR in linear dipole log periodic antenna array
01 p0043 A72-11242

Top wall and multiple branch hybrid junction waveguide couplers for millimeter wavelengths, measuring insertion loss performance
06 p0787 A72-18378

LSA oscillators performance and control optimization, discussing multiaxis radial microwave cavity effectiveness in oscillation starting and coupling to coaxial transmission line
06 p0789 A72-18481

Rectangular and orthogonal circular waveguides hybrid junction with magnetized ferrite resonators along axes, discussing design and applications
07 p0952 A72-18844

Q factor over temperature range of microwave resonator coupled with drifting indium antimonide plasma
09 p1285 A72-22895

Multimode dielectric slab waveguide power coupling due to core-cladding interface irregularities, obtaining power distribution and radiation losses
11 p1603 A72-25270

Rare gas ion laser excited by electrodeless microwave discharges, noting external magnetic field effects on output
11 p1651 A72-26571

Decoupled formulation of vector wave equation in orthogonal curvilinear coordinates, applying to ferrite-filled and curved waveguide of general cross section
11 p1607 A72-26995

Scattering matrix derivation for parallel plate waveguide array terminated in infinite plane, determining neighboring guides TEM modes mutual coupling
13 p1921 A72-29345

Signal distortion minimization for random waveguides with frequency-dependent optimum coupling based on transfer function covariance and impulse response time domain statistics
15 p2194 A72-31352

Multimode dielectric waveguide with random coupling, discussing pulse dispersion improvement and loss penalty from power spectrum derivation
20 p2901 A72-38923

Prediction of near-field antenna coupling in the presence of obstacles.
20 p2902 A72-38998

A quasi-optical directional coupler.
20 p2907 A72-39222

Reflectivity dependence of triple polarization grid on elements spacing and wires orientation, noting bandwidth of ray guide matching transformer
23 p3269 A72-43446

MICROWAVE EMISSION

Extragalactic radio source 3C 1202 microwave flux density variations suggesting superrelativistic expansion
17 p2611 A72-35295

The effect of contacts on microwave emission from InSb.
19 p2844 A72-37728

Microwave emission from geological materials - Observations of interference effects.
20 p2917 A72-39477

Some characteristics of microwave type IV radio bursts and the acceleration of solar cosmic rays.
23 p3328 A72-43616

Ferrite microwave devices design, covering non-reciprocal circuit and electrical tuner
01 p0041 A72-10696

MHD boundary waves properties, noting application to traveling wave nonreciprocal devices and planar structures based on microwave integrated circuits
01 p0029 A72-10703

Equivalent circuit model for electroacoustic surface microwave transducer, discussing radiation properties determination from excitation fields distribution
01 p0041 A72-10704

Zinc oxide longitudinal acoustic microwave transducer, measuring untuned insertion loss and electroacoustic coupling constant
01 p0042 A72-10705

Thick overlay elastic rectangular microwave guides, investigating layer thickness effect, energy partition and higher modes
01 p0042 A72-10706

Frequency planning for Symphonie German-French telecommunication satellite microwave equipment
01 p0030 A72-10710

Flattening, heat treatment and machining of narrow rectangular vacuum melt Mo strips for microwave devices
01 p0078 A72-11087

Microwave half blinder for sidelobe reduction in large horn reflector antennas in E plane radiation for horizontal polarization
01 p0043 A72-11243

Temperature compensated high dielectric constant material, discussing low loss at microwave frequencies, reproducibility and mechanical properties
01 p0044 A72-11308

Gain and bandwidth properties of microwave and optical devices with isotropic active medium, investigating transmission coefficient
02 p0189 A72-11566

Two stage resonant slow wave structure synthesis for microwave device applications, deriving conditions for required dispersion and coupling impedance characteristics
02 p0190 A72-11574

Prototype compact ruggedized crystal-controlled L-band artillery telemetry transmitter design and performance
02 p0192 A72-12156

Navy uhf telemetry transmitter production system, discussing test program contribution to quality control
02 p0177 A72-12322

Microwave aircraft landing system development, discussing contract definition, feasibility, prototype development, management planning and program costs
02 p0304 A72-12377

Microwave precision coaxial connectors in terms of dimensional specifications, material properties, surface characteristics and other parameters for transmission standards effects
03 p0330 A72-13230

Book on microwave semiconductor devices, considering point contact crystal, varactor, Schottky-barrier, tunnel, backward and p-i-n diodes, transistors, Gunn effect devices and integrated circuits
03 p0333 A72-13845

Semiconductor devices potential interference and biological exposure hazards in microwave leakage field, considering shielding and filtering methods for reducing susceptibility
03 p0320 A72-14032

Solid state tunnel diode amplifier-rectifier expander for microwave pulse regenerators
03 p0335 A72-14184

High speed digital communication at millimeter wavelengths, discussing system requirements, digital computer use, transmission data rate and equipment development
04 p0485 A72-14481

ATC technology impact on flight operations and public value of aviation, discussing microwave landing system economic aspects
04 p0544 A72-14810

Aircraft landing microwave guidance and control systems, considering general dynamic model for aircraft translational motion determination in earth fixed coordinate system
04 p0545 A72-14821

Submillimeter waves development, discussing materials research, lasers, semiconductor and electron tube sources, system components and applications in space communication, imagery, metrology and sensing
04 p0550 A72-15591

Millimeter and submillimeter wave applications, considering environment remote sensing, radar communication, tracking and imagery, wideband communication, plasma diagnostics and spectroscopy
04 p0550 A72-15592

Microwave-range optical heterodyne system with magnetically tuned /Zeeman effect/ laser emissions mixing and AFC
05 p0668 A72-16345

Proposed microwave ILS, discussing continuous step and Doppler scanned radar scanning beams
06 p0846 A72-18396

Microwave Doppler scanning landing guidance system with radar beam comparison and signal format simplification suggestion
06 p0846 A72-18398

Microwave instrument landing systems based on continuous radar scanning technique, using pulse format for data transmission
06 p0846 A72-18399

IMPATT driven pumps replacement of klystron for parametric amplifiers producing over 100 mW at 38-40 GHz with good stability and noise performance
06 p0788 A72-18470

Microwave receiver double diffused MOS transistor /D-MOST/ device advantages over bipolar device
06 p0790 A72-18485

Microwave signals detection with virtual cathode in klystron repeller by electrons screening at velocity modulated electron beam
08 p1136 A72-21766

Solid state microwave devices, discussing varactor, varistor, tunnel, Gunn, IMPATT and TRAPATT diodes and power transistors characteristics and applications
09 p1285 A72-22567

Noncontacting measurements by miniature CW Doppler radar with semiconductor microwave generator
09 p1285 A72-22691

Microwave equipment and technology application for instrument landing, terminal ATC, millimeter wave CAT detection and satellite communications
10 p1509 A72-24036

Microwave equipment for electron density profiles determination used in ionization relaxation start study of shock induced Ar plasma
10 p1519 A72-24067

Microwave frequency mixer using two inverted tunnel diodes in series connection
10 p1450 A72-24519

Three centimeter balanced ring modulator with carrier and sideband suppression using amplitude and phase relations
11 p1605 A72-26321

Self balanced microwave static calorimeter with substantial delay time, discussing system instability conditions
11 p1634 A72-26450

Microwave power transistors and active two terminal devices performance, describing representative applications
11 p1607 A72-26983

Spatial and time dependence of electron velocity in short channel microwave FET, using Monte Carlo method
12 p1790 A72-27434

Maximum transmission delay in microwave TWT delay lines as function of electron beam size, current, shape and velocity distribution
12 p1782 A72-27436

Cryogenic microwave equipment for solids study provided with adiabatic demagnetization cooling system, noting relaxation time measurement in magnetic fields
12 p1796 A72-27856

Broadband superconducting quantum microwave magnetometer design, operation and performance
12 p1812 A72-28219

Regional microwave ground distribution facility for TV service organized for satellite relay transmitted video signals accommodation
13 p1918 A72-28984

Digital microwave power measuring device with automatic range selection
13 p1931 A72-29267

Mechanical fabrication of rectangular to cylindrical waveguide transitions for X band
13 p1932 A72-29475

Telecommunication satellites microwave components, emphasizing reliability requirements in multiplex systems
13 p1933 A72-29835

Microwave device phase and amplitude frequency response measuring equipment with wide range test pulse generation, discussing design and performance 13 p1934 A72-30091

Microwave pulse frequency shift and frequency modulation in YIG bar magnetostatic delay line with adiabatically varying parameters 13 p1923 A72-30095

Ferrite materials for microwave applications, discussing frequency and temperature limit extension, power level increase and loss reduction 14 p2088 A72-30833

Microwave semiconductor device technology review and development prospects in terms of fabrication processes and materials 14 p2088 A72-30834

Correlation between internal noise sources of microwave transistors at low collector currents 14 p2088 A72-30917

Microwave scale model of ILS glide path, considering interference and aircraft taxing effects 14 p2129 A72-30944

Nonlinear plasma oscillations effect on electron bunching in microwave devices, noting space charge waves of finite amplitude 14 p2089 A72-31106

In and Gd substitution effect in calcium-vanadium garnets as potential microwave materials, discussing magnetic properties, resonance linewidth and temperature stability 15 p2293 A72-32243

Calculations showing the reduction in the frequency dependence of a two-element array antenna fed by microwave transistors. 17 p2514 A72-34369

Microwave Doppler radar spectrum-based design parameters. 17 p2515 A72-34422

Microwave technology - A five year prospective. 17 p2528 A72-34709

The absolute calibration of periodic microwave phase shifters without a standard phase shifter. 17 p2531 A72-35470

Design of a 14/12 GHz transponder for the Communications Technology Satellite. 18 p2660 A72-36540

Microwave varactors for communications satellites. 18 p2670 A72-37122

Microwave and optoelectronic devices performance and component reliability, considering varactors, p-i-n, avalanche and Gunn diodes, ICs, FETs, light emitters and liquid crystals 18 p2720 A72-37137

Physical parameters and structure of microwave power transistors, noting scanning electron microscope analysis of fine structure 18 p2671 A72-37144

High burnout gallium arsenide Schottky barrier diodes. 19 p2770 A72-37259

Room temperature operation of microwave acoustic delay lines with magnesium aluminate spinel, discussing acoustic mode conversion and shear wave piezoelectric transducers 19 p2800 A72-37875

High power microwave nanosecond pulse generator with waveguide standing wave resonator, noting power gain and pulse shape 19 p2776 A72-38672

Microwave landing system effect on the flight guidance and control system. 20 p2952 A72-40057

ILS replacement by microwave landing system, considering landing phase range from acquisition to touchdown, terminal approach handling by airborne navigation system and economic advantages 21 p3081 A72-40294

Design and frequency characteristics of cylindrical waveguide diode for microwave range, noting semiconductor junction effect on device efficiency 21 p3036 A72-41837

Mathematical description and calculation of the steady-state regime of a microwave power stabilizer with a semiconductor attenuator 23 p3270 A72-43766

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics 23 p3270 A72-43768

Possible impact of area navigation upon MLS requirements for azimuth angular coverage and range. 24 p3422 A72-44643

Solid state microwave devices, discussing varactor, varistor, tunnel, Gunn, IMPATT, and TRAPATT diodes and power transistors characteristics and applications 24 p3384 A72-44746

MICROWAVE FILTERS

Computerized optimization procedure for microwave circuits without tuning elements, applying to high pass filter design 01 p0040 A72-10686

Waveguide channel microwave bandpass filters for radio relay systems, discussing methods of improving

group delay in passband and attenuation at harmonic frequencies 01 p0041 A72-10694

Hybrid IC at 30 GHz, considering IMPATT oscillators, circulators, frequency multipliers and filters configuration and performance 01 p0046 A72-10699

Quasi-optical 30-60 GHz varactor doubler circuit filters, waveguide tuners and mounts for frequency multipliers 04 p0507 A72-15617

Dissipative loss effects on frequency response and miniaturization limits for minimum loss conditions in microwave filters with Chebyshev characteristics 05 p0638 A72-17188

Multicircuit hf filters tuning drive with mechanical synchronization correction 06 p0774 A72-17749

Weighted acoustic surface wave dispersive microwave filter apodized interdigital array design modification for phase error correction to reduce distortion 06 p0787 A72-18380

Unified design charts for communication systems filter networks with inverse Chebyshev and elliptic function responses 06 p0787 A72-18400

Steepened microwave bandpass filters with bypass and flattened reflection coefficient and delay, discussing design and implementation 07 p0954 A72-19175

Narrow bandpass waveguide filters synthesis, using orthogonal mode cavities to realize negative coupling elements 10 p1451 A72-24591

Lossless distributed rectangular microwave structure with dielectrics interposed between two conductive metallic layers, noting existence of transmission zeros and filter properties 11 p1607 A72-26990

Susceptance inductive loaded evanescent mode waveguide filters with reduced length, using quartz tuned elements 12 p1792 A72-27697

Ferrite microwave limiter-filters and circulators using resonant rotation of polarization plane 13 p1927 A72-28409

Minimum amplitude and phase distortion selective bandpass filters/equalizers for satellite communications, noting realizability in UHF and microwave bands 14 p2089 A72-31048

Inexpensive microwave high density channel filters to meet amplitude and phase requirements without external equalization 15 p2210 A72-31181

German monograph on microwave broadband tunnel diode mixers theory and design, taking into account parasitic elements as part of filter networks 16 p2368 A72-33507

YIG filter banks for ECM and communications. 19 p2772 A72-37523

Dissipative loss effects on frequency response and miniaturization limits for minimum loss conditions in microwave filters with Chebyshev characteristics 19 p2775 A72-38624

Microwave filters in antenna circuit feeder systems of space vehicles 21 p3026 A72-40318

Microwave filter of interdigital or comb construction, calculating attenuation coefficient relationship to impedance of slabline with cylindrical inner conductor 21 p3032 A72-40628

Correction of diffraction errors in acoustic-surface-wave pulse-compression filters. 21 p3034 A72-41464

MICROWAVE FREQUENCIES

Natural and artificial snowpacks microwave brightness temperature variations with snow depth, free water content and underlying material characteristics 02 p0212 A72-11832

Wideband spectrum utilization above 10 GHz for high speed digital communications and ecological monitoring 02 p0176 A72-12182

Microwave photoconductivity and photodiode effect in organic semiconductors 04 p0561 A72-15083

Frequency characteristics theory for two-stage electron tube microwave amplifiers coupled by transmission line on order of wavelength 05 p0634 A72-15827

Ultrasensitive measurement technique for low microwave susceptibility on ferrite samples featuring feedback scheme for signal klystron locking 07 p0955 A72-19320

Hydrogen plasma generation by microwave field in magnetic-mirror device due to electron cyclotron resonance, measuring transverse diffusion coefficient dependence on magnetic field 07 p1046 A72-20506

Antimony compounds single crystal whiskers permittivity determination at microwave frequencies from power reflection and transmission coefficients 09 p1366 A72-22417

Chemistry and performance characteristics of flash photolysis and microwave discharge initiated CW carbon disulfide/oxygen lasers 09 p1325 A72-23236

Radar IF voltage in-phase and quadrature components detection thresholds, evaluating square and octagonal approximations to circle for false alarm probabilities 10 p1438 A72-24693

Sea foam emission and reflection characteristics at microwave frequencies from radiometric measurements, correlating data as functions of frequency and angle 10 p1475 A72-24749

Low noise power level measurement at microwave frequencies, noting Nyquist equation applicability and cooled-to-uncooled element connections effects in receivers 12 p1779 A72-27175

Microwave breakdown calculation on symmetrically excited conical reentry vehicle based on variational technique, comparing with experimental data 13 p1916 A72-28536

Analog simulation of Josephson superconducting junctions dc characteristics for two mixed microwave frequencies, discussing signal detection sensitivity improvement 13 p2021 A72-28648

Polarization method for measuring small phase difference variations in microwave range, developing rules for optimum selection of multiplication factor 13 p1928 A72-28790

Phase error magnitudes due to individual microwave elements imperfections and multiple reflections in phase difference measurements by polarization method in microwave range 13 p1928 A72-28791

Titanium nitride powder obtained by hydrogen reduction of titanium tetrachloride in nitrogen flow heated in microwave electrodeless discharge 13 p1967 A72-30111

Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies 14 p2137 A72-30311

High microwave voltage effects on p-i-n junction conductance under inverse dc bias, noting role of hole generation and accumulation by impact ionization 15 p2206 A72-31643

Piezoelectric substrate covered with semiconductor layers, calculating sound amplification characteristics at microwave frequencies 15 p2197 A72-31895

Microwave measurements on high permittivity materials with slotted waveguides excited in E mode 15 p2207 A72-31894

Low cost microwave scanning beam landing systems for interim instrument landing system replacement in civil aviation 15 p2272 A72-32217

Oxygen molecule parameters from frequency data in microwave, submillimeter and IR spectroscopy 15 p2283 A72-32654

Millimeter-wavelength frequency multipliers employing gallium arsenide diodes 17 p2529 A72-34851

A revision of Jupiter brightness temperatures in the frequency interval 18.5-24.0 GHz /1968/. 17 p2610 A72-35119

Multifunction microwave apertures - Concepts and potential. 17 p2531 A72-35574

Magnetic dipole matrix elements for atomic transitions between Zeeman levels at microwave frequencies 17 p2585 A72-35769

He-Ne laser radiation modulator at 1.5 GHz using X and Z cut lithium niobate crystals in toroidal microwave cavity 18 p2697 A72-36113

UHF and microwave dielectric properties of an amorphous semiconductor. 18 p2718 A72-36311

Quasi-linear theory of plasmas situated in a weak UHF electric field and a constant magnetic field 18 p2715 A72-36654

Numerical analysis of microwave heat generation in disc-shaped Luneberg lenses. 21 p3032 A72-40627

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations 21 p3091 A72-40671

Study of the thermal self-focusing of electromagnetic waves in a plasma 22 p3211 A72-42652

Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies 23 p3318 A72-43213

Low frequency oscillations of cesium and mercury vapor plasmas, noting intensity distribution, radiation

pattern and polarization characteristics of microwave emission

23 p3319 A72-43411

Frequency characteristics theory for two-stage electron tube microwave amplifiers coupled by transmission line on order of wavelength

23 p3268 A72-43435

Influence of noise on the accuracy of microwave phase meters

23 p3272 A72-43845

MICROWAVE IMAGERY

Diffraction theory of microwave holography, presenting computer aided imaging approach for alleviating optically reconstructed image distortion

01 p0068 A72-10707

Microwave hologram CW radar system, discussing theory and flight test imagery, optical processors and alignment procedures

02 p0171 A72-11819

Microwave holography using transmitting and receiving antenna for generation of synthetic aperture in angular direction

06 p0814 A72-17486

Subtractive microwave holography application to plasma discharge diagnostics

07 p0981 A72-18889

Low energetic efficiency of semiconductor microwave scanning converters for radio images of fog obscured objects

13 p1932 A72-29297

Airborne microwave hologram radar system, discussing along- and cross-track direction resolution realization by synthetic aperture technique and phased receiving array respectively

15 p2196 A72-31788

Microwave holographic imaging techniques for aircraft landing aids and airport security applications, discussing real time operation

19 p2798 A72-37625

Experimental investigation of direct quasi-optical radiovision of small objects

19 p2768 A72-38673

Image quality of binary and multigradation microwave holograms, noting HF components and background noise

21 p3055 A72-40794

Dark field method for phase diffraction grating visualization by microwave holography, using radio lens for object microwave spectrum formation

21 p3055 A72-40795

MICROWAVE INTERFEROMETERS

Microwave holographic interferometry with optical wave front reconstruction for visual mapping of large objects deformation

01 p0072 A72-11236

Varactor diode microwave parametric amplifiers for radio astronomy interferometer, discussing system design features for gain and phase stabilities

02 p0192 A72-12043

Plasma density profiles by microwave interferometry technique in Sirius stellerator divertor for two magnetic field configurations and injection methods

04 p0555 A72-14619

High resolution Galactic center interferometric observations at 5 GHz, showing compact components in Sagittarius A

04 p0580 A72-15511

High resolution stabilized superheterodyne microwave interferometer, noting noise figure and dynamic range

07 p0993 A72-20590

Interferometer investigations of Cassiopeia linear polarization at centimeter wavelengths, explaining results by source model incorporating Faraday depolarization

12 p1865 A72-27094

Microwave interferometry as plasma diagnostic technique to measure electron densities in partially ionized dense gases

14 p2103 A72-30177

Comparative electron density measurements in positive low pressure He discharge column with Langmuir probes and microwave interferometer and cavity

14 p2105 A72-30808

Ku band radio interferometer for discrete radio sources mapping, discussing construction and incorporated PDP-8 computer for pointing, tracking, delay compensation and data analysis

15 p2207 A72-32107

How to measure surface and atmospheric conditions on Venus by microwave interferometry

17 p2611 A72-35321

Precision interferometric observations of Venus at 11.1-centimeter wavelength

17 p2611 A72-35322

A new, earth-based radar technique for the measurement of lunar topography

18 p2659 A72-36277

Two-frequency microwave holographic interferometry

20 p2927 A72-39784

The measurement of the local electron density by means of direct reading microwave interferometer

21 p3056 A72-41220

A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma

23 p3292 A72-44543

MICROWAVE OSCILLATORS

NT BACKWARD WAVE TUBES

NT GAS DISCHARGE TUBES

Tunnel diode microwave oscillator design by circle diagrams of operational and load characteristics

01 p0035 A72-10048

Microwave Gunn oscillator frequency modulation in quenched domain mode, calculating signal admittance as function of bias voltage and amplitude

01 p0035 A72-10224

Transferred electron microwave oscillators /three-level and LSA relaxation types/ and amplifiers /reflection and traveling wave types/ fabrication, technology and performance capabilities

01 p0035 A72-10627

Planar Gunn effect devices for microwave oscillators, discussing impedance matching and diode conductivity profile effect on output power

01 p0028 A72-10628

Transferred electron microwave oscillator diodes with n-n-n structure by liquid phase epitaxy, reducing high resistance layer in interfaces and crystal defects

01 p0036 A72-10629

High power Q-band pulsed Gunn diode microwave oscillator constructed from thin GaAs sandwich layers grown by vapor phase epitaxy

01 p0036 A72-10630

Liquid phase epitaxial GaAs transferred electron microwave oscillators with high dc to rf conversion efficiencies dependent on frequencies

01 p0036 A72-10631

Bulk InP three level transferred electron microwave oscillators, observing current-controlled instabilities and operation modes

01 p0036 A72-10632

CW and pulsed InP transferred electron microwave oscillators, discussing fabrication techniques and electrical properties

01 p0036 A72-10633

High efficiency transferred electron microwave oscillators operated in short LSA mode, noting pulse-operated diode power appearance time delay behavior

01 p0036 A72-10634

L-band Gunn oscillator using nonsinusoidal device voltage /switching mode/, comparing efficiency and output power with sinusoidal mode

01 p0036 A72-10635

Electronic tuning of transverse Gunn effect microwave oscillators by varying voltage on third electrode incorporated between cathode and anode

01 p0036 A72-10637

Output power, efficiency and fundamental frequency resistance of Gunn microwave self oscillator in single and multiresonant mode

01 p0037 A72-10638

Lf noise spectrum of Gunn oscillators due to direct modulation of rf admittance for constant voltage bias source

01 p0037 A72-10639

Gunn diode microwave oscillator postcoupling to waveguide, deriving theory based on equivalent circuit for load impedance assessment

01 p0037 A72-10640

CW X-band Gunn oscillator in coaxial cavities, investigating frequency variation with ambient temperature

01 p0037 A72-10641

Microwave oscillator detector Gunn diode as inexpensive alarm device for Doppler radar application

01 p0028 A72-10642

AM and FM noise reduction of cavity and injection stabilized microwave Gunn and avalanche diode oscillators

01 p0037 A72-10644

Phase locked IMPATT diode microwave oscillator transients for reflection amplifier or pulse modulated source applications

01 p0037 A72-10646

Wideband modulation feedback technique for IMPATT diode oscillator AM-FM noise suppression

01 p0037 A72-10647

Synchronized multiple microwave oscillators power and noise characteristics at microwave and millimeter frequencies, discussing magic T configuration

01 p0037 A72-10648

CW power of single cavity multiple IMPATT diode oscillator at 9.1 GHz, comparing with moding of multiple device oscillators

01 p0038 A72-10649

X band power, bandwidth, efficiency and temperature performance of one watt CW microwave integrated avalanche diode oscillator

01 p0038 A72-10650

Resonant traveling wave IMPATT oscillators wave propagation and power output characteristics, taking into account metal conductor and semiconductor substrate losses

01 p0038 A72-10651

Voltage and current waveforms monitoring on sampling oscilloscope for TRAPATT microwave oscillator performance optimization

01 p0038 A72-10653

MICROWAVE OSCILLATORS

Microwave TRAPATT oscillator efficiency, using avalanche diode in coaxial cavity, slug and tapered sleeve

01 p0038 A72-10654

Hybrid IC at 30 GHz, considering IMPATT oscillators, circulators, frequency multipliers and filters configuration and performance

01 p0046 A72-10699

Gunn and IMPATT diodes applications for microwave power oscillators and amplifiers in radio link equipment

01 p0042 A72-10711

Low noise phase locked power microwave sources for solid state radio links with 960 voice channels, discussing design

01 p0006 A72-10712

Phase stable locked local oscillators for K band radiometers for long baseline interferometric measurements, emphasizing construction technique

01 p0044 A72-11307

High efficiency GaAs transferred electron device operation and microwave oscillator design by simple static I-V characteristics description for time domain computer simulation

02 p0193 A72-12230

Book on microwave electronics covering electron beam microwave devices and solid state microwave oscillators and amplifiers

03 p0331 A72-13233

CW avalanche diode microwave oscillator frequency modulation, using injected rf signal

03 p0334 A72-14075

High intensity ionizing gamma ray pulsed radiation effects on Gunn diode microwave oscillator failure modes

03 p0334 A72-14089

Ionizing radiation effects in cavities of microwave Gunn oscillators, noting large dose rate effects on circuit performance

03 p0335 A72-14094

Three terminal voltage-tunable Gunn effect microwave oscillator, discussing depletion depth and electric field control modes for frequency

04 p0496 A72-14479

Gunn diode large signal admittance dependence on bias and frequency, discussing computer simulation and broadband oscillator and amplifier design

04 p0497 A72-14712

Gunn diode microwave oscillator with moving reflector as self-excited mixer and load variation detector, analyzing performance by I-V characteristics model

04 p0497 A72-14713

Si p-n-p and Cr-n-p junction transit time diode oscillators microwave and dc characteristics comparison, noting similarity

04 p0499 A72-15206

Avalanche transit time diodes noise mechanisms and performance in microwave amplifier, oscillator and mixer applications

04 p0500 A72-15302

Transit time and LSA oscillations at millimeter and submillimeter wavelengths in n-type GaAs

04 p0563 A72-15593

Electron tube with Fabry-Perot cavity resonator with grooved and smooth mirrors for millimeter and submillimeter wave generation

04 p0503 A72-15598

Josephson junction as 100 GHz oscillator-mixer for heterodyne frequency conversion in millimeter and submillimeter regions, observing I-V characteristics

04 p0503 A72-15604

Large signal IMPATT diode microwave oscillator lumped model, considering steady state oscillation

04 p0503 A72-15672

Microstrip configuration for microwave GaAs IMPATT diode oscillators and power amplifiers

05 p0633 A72-15782

Computer simulation in optimized 5-GHz Gunn diode oscillator design

05 p0633 A72-16360

CW millimeter wave power generation with spiraling electron beams, investigating energy spread effects on performance limitation

05 p0636 A72-16363

Vapor-grown GaAs transfer electron microwave oscillator, discussing design, fabrication and CW power conversion efficiency

05 p0637 A72-16366

Fast frequency switching for shift keying pulse code modulation with two cavity modes for Gunn oscillator frequency states

05 p0631 A72-17072

Noise spectra of double sided CW silicon TRAPATT oscillator comparable to silicon IMPATT oscillator

06 p0783 A72-17482

Noise effect in IMPATT and Gunn diode oscillators on phase/frequency fluctuation using series/parallel connected multiple active devices

06 p0783 A72-17483

Analytical model of Gunn diode oscillating in resonant mode with domain quenching, determining current harmonics

06 p0783 A72-17573

Double heat sinking high power CW TRAPATT diode oscillators using integral metallic heat spreaders
06 p0784 A72-17788

InP transferred electron microwave oscillators, observing higher efficiency than IMPATT and GaAs devices
06 p0784 A72-18063

Transistorized automatic feedback power level control for centimeter band reflex klystron oscillator for electron paramagnetic resonance studies
06 p0784 A72-18166

Microwave IC oscillators design for broadband high performance receivers, exemplifying thin film Gunn effect, step- and varactor-tuned transistor oscillators
06 p0786 A72-18373

K band Gunn oscillator with high frequency stability, discussing construction, performance, output power and frequency saturation effect
06 p0786 A72-18375

IMPATT diode avalanche region microwave self oscillation mechanism explanation by cavity resonator and feedback theories
06 p0787 A72-18383

GaAs IMPATT diode with plated heat sink for microstrip circuit applications, exemplifying X band oscillator experiment
06 p0787 A72-18385

Transferred electron effect in GaAs, presenting three level solid state microwave oscillator advantages
06 p0866 A72-18454

High efficiency microwave avalanche diode oscillators circuit design in TRAPATT mode
06 p0787 A72-18455

System potential of microwave solid state generation and amplification, comparing IMPATT, TRAPATT, Gunn, LSA, transistor and transistor-multiplier devices
06 p0787 A72-18456

Computer simulation data on pulsed IMPATT microwave oscillator performance improvement via double-drift diodes and second harmonic tuning
06 p0788 A72-18463

IMPATT diode microwave oscillators and amplifiers calculating noise sideband correlation factor at randomly large signal frequencies
06 p0788 A72-18464

Pulsed and CW solid state microwave oscillator EM noise as function of power level and locking parameters
06 p0788 A72-18465

IMPATT diode oscillator injection locking behavior from model, comparing results with experiment
06 p0788 A72-18469

X band IMPATT and Gunn oscillator, calculating injection lock time, modulation bandwidth, noise and FM suppression and dynamic response
06 p0788 A72-18471

Transferred electron microwave oscillators design for various peak and average power levels, considering tradeoff between operating mode and device configuration
06 p0789 A72-18475

S band module with Gunn diode oscillators in series connection used as phased array radar 250 W power sources with efficient heat sink
06 p0789 A72-18476

Varactor tuned high performance Gunn oscillators, emphasizing specifications for level power output with frequency, tuning linearity and rate
06 p0789 A72-18479

Solid state Ku-band local Gunn oscillator for airborne radar applications, discussing design and batch process fabrication
06 p0789 A72-18480

LSA oscillators performance and control optimization, discussing multi-axis radial microwave cavity effectiveness in oscillation starting and coupling to coaxial transmission line
06 p0789 A72-18481

High power GaAs LSA transmitter oscillator refinements, noting pulsers development to change load and thermal environment frequency stability
06 p0789 A72-18482

Power generation and low noise amplification devices development during past decade, considering avalanche diodes, transferred electron and acoustoelectric devices and microwave transistors
07 p0952 A72-18825

Transit effects in grid plate gap of triode for generating microwave oscillations in regime similar to IMPATT diode
07 p0953 A72-19015

Low noise Ku band klystron oscillators for Doppler radar, discussing FM noise induced frequency deviation, spurious modulation and countermeasures
07 p0954 A72-19049

Low frequency modulation noise generation due to conductance fluctuations in Gunn oscillators, measuring noise spectra temperature dependence
07 p0954 A72-19050

Si p-n-p punchthrough X band oscillator, discussing wideband tuning and low noise properties and applications
07 p0955 A72-19252

Resonator second harmonic influence on Gunn oscillator parameters for transit and hybrid modes, discussing bias voltage, harmonic amplitudes, phase difference, doping level and frequency
07 p0955 A72-19254

YIG tuning of X band Gunn effect stripline oscillator circuit, noting application to microwave ICs
07 p0955 A72-19357

Gunn diode microwave oscillator thermal resistance reduction for increased output power and efficiency
07 p0958 A72-20685

IMPATT diode microwave oscillator stabilized by two external resonant circuits, investigating self oscillation characteristics
08 p1138 A72-20745

Optimal output power of avalanche transit time diode oscillator in millimeter band as function of electric field and diode geometry
08 p1141 A72-21378

Stationary statistical model for microwave oscillator flicker frequency noise, leading to power spectral density and time domain frequency instability
08 p1141 A72-21431

Digital frequency shift keying modulation of Gunn microwave oscillator by cavity placed between output and transmission line
08 p1141 A72-21432

German monograph on frequency noise of microwave transistor power oscillators covering generation mechanism and spectral density determination
09 p1285 A72-22340

Inexpensive solid state microwave sources development and applications considering spectrum allocations, health hazards and reliability problems
09 p1285 A72-22595

Cavity resonator frequency detuning effects on FM and AM noise in cavity stabilized Gunn microwave oscillator
09 p1285 A72-22651

Subharmonically injected phase locked microwave IMPATT oscillator
09 p1285 A72-22894

Random frequency FM noise model for microwave Gunn effect oscillators
09 p1288 A72-23122

Bulk effect diodes combination with YIG elements to provide oscillator operation up to 18 GHz, discussing design, circuit diagrams and performance
10 p1448 A72-24037

Double balanced frequency converter design for selective microwave generation by combination of CW or swept signal with local oscillator source
10 p1448 A72-24038

Short and long term frequency stability improvement in X band klystron oscillator stabilized by high Q superconducting cavity
10 p1449 A72-24303

Power-combining methods for synchronous detuned solid state microwave oscillators with stable large signal locking characteristics, noting feasibility
10 p1449 A72-24306

Coupled line microstrip circuit for high power and efficiency L and S band TRAPATT diode oscillators
10 p1450 A72-24307

CW X band Gunn microwave oscillators, measuring frequency variation relationship to ambient temperature
10 p1450 A72-24555

GaAs abrupt junction IMPATT diode large signal operation analysis, noting oscillation efficiency HF fall-off characteristics
10 p1450 A72-24557

YIG tuned Gunn oscillator phase locking and shifting over 3 GHz range in X band, using feedback control
10 p1451 A72-24596

Computer simulation for TRAPATT circuit response to periodic current impulse, noting avalanche diode microwave oscillation efficiency
10 p1458 A72-24935

Bulk negative resistance devices equivalent noise temperature derivation via diffusion-impedance field noise formula, obtaining Gunn oscillators SNR approximate value
10 p1454 A72-25106

Multi-axis radial circuits for transferred electron microwave oscillator performance optimization to obtain wideband CW amplification, discussing LSA tests
11 p1604 A72-25745

Si Pd-n-p-plus/ transit time diode microwave oscillator, discussing fabrication, FM noise spectrum and bias current fluctuation
11 p1604 A72-25748

High efficiency CW performance of InP transferred electron microwave oscillator with anomalous I-V characteristics temperature dependence
11 p1604 A72-25750

Epitaxial InP diode for high efficiency circuit controlled microwave oscillator, discussing solution growth technique, layers electrical properties and I-V performance
12 p1854 A72-27162

Stacked TRAPATT diodes oscillator with microstripline circuit to obtain 1 kw peak power at 1 GHz
12 p1788 A72-27163

Continuous wave Doppler radar with microwave oscillator for ATC measurements and surveillance
12 p1789 A72-27403

Encapsulation influence on Gunn effect devices from circuit analysis of wideband tunable transferred electron microwave oscillators
12 p1790 A72-27440

K band Read avalanche diodes fabricated by epitaxial deposition and diffusion processes, measuring capacitance-voltage characteristics and oscillator power efficiency
12 p1790 A72-27441

Microwave and optical quantum electronic sources for frequency standards, noting primary Cs reference and multimode laser-RF oscillator beat technique
12 p1824 A72-27867

C and X band CW GaAs Schottky barrier IMPATT oscillators with nichrome as barrier metal, noting high power efficiency and low noise performance
12 p1793 A72-27966

Microwave source four hundredth order harmonic mixing with laser radiation, using Josephson junction and maser
12 p1827 A72-28221

Solid state InP sources for microwave transferred electron oscillators and amplifiers with improved conversion efficiencies, comparing with GaAs
13 p2020 A72-28432

Pulsed IMPATT diode oscillators, pulse power capabilities, considering microwave circuit, dc and pulse biasing, power limitation and circuit anomalies
13 p1931 A72-29109

CW Gunn oscillator cavity loading and bias voltage effects on external negative differential conductance
13 p1933 A72-29825

Liquid and two phase liquid-gaseous hydrogen density determination via dielectric constant measurement by open-ended microwave cavity
14 p2103 A72-30197

Millimeter and submillimeter radiation produced by diffraction phenomena during charged particle passage near periodic structures, discussing physical properties and oscillator development
14 p2088 A72-30598

Microwave power generation via semiconductor devices, discussing circuit problems due to negative resistance
14 p2088 A72-30832

CW oscillator model for laser amplifier, including nonlinear effect of gain saturation
14 p2111 A72-30896

Correlation measurements of LF current noise and frequency fluctuations in Gunn oscillators, emphasizing generation-recombination noise component
14 p2088 A72-30916

Amplitude and frequency characteristics of avalanche diode microwave oscillator loaded with resonant circuits, noting Q value effect on self oscillations
14 p2089 A72-31109

Self oscillations of microwave autodyne oscillator loaded by two resonant cavities, noting radio spectroscopic applications
14 p2089 A72-31110

Two cavity self exciting SHF microwave oscillator with resistance coupling through low Q-factor resonant diaphragm, noting frequency stability
14 p2090 A72-31121

Prototype local oscillator for X band communication satellite, discussing electrical and mechanical characteristics and temperature and noise measurements
15 p2204 A72-31182

EHF double-drift IMPATT oscillator small and large signal behavior analysis with computer program, noting second harmonic tuning and single frequency operation possibilities
15 p2204 A72-31314

Equivalent circuit characterization of waveguide-mounted IMPATT diode oscillators and associated circuit parasitics at millimeter wave frequencies
15 p2205 A72-31315

Generalized locking equation for microwave oscillator bandwidth prediction for arbitrary cavity configurations and waveforms, considering strong harmonics presence
15 p2205 A72-31358

High efficiency X band pulse operation of transferred electron oscillator in hybrid mode, noting high material quality and optimum impedance match
15 p2206 A72-31548

Pulsed IMPATT diode oscillators RF oscillations growth rate and frequency shift behavior during build-up period, comparing equivalent circuit derived electrical properties with measurements
15 p2208 A72-32472

Gunn diode elements design, operation, performance, efficiency, heat dissipation, lifetime and applications as microwave oscillators
15 p2208 A72-32500

Avalanche generation process interpretation for nontransit frequency oscillations association with current runaway in bulk InP microwave diode oscillators
16 p2369 A72-33755

High efficiency and power S-band pulsed oscillator using avalanche diode and microstrip circuit
16 p2369 A72-33759

Frequency stabilized self-oscillating microwave up-converter with transferred electron diodes, noting maximum power output and bandwidth
16 p2369 A72-33764

Microwave and optical quantum electronic sources for frequency standards, noting primary Cs reference and multimode laser-RF oscillator beat technique
16 p2403 A72-33976

Noise-to-carrier ratio and rms frequency deviation evaluation for X band Gunn and Si and GaAs avalanche diode oscillators
16 p2370 A72-34177

Simple Doppler radar using the CL8630 Gunn effect oscillator for the observation of small rotating objects.
17 p2524 A72-34245

BARITT, IMPATT, TRAPATT and Gunn diodes, discussing power, noise and thermal dissipation problems
17 p2526 A72-34465

Pulsed Impatt diode oscillator circuit design and operation frequency prediction for high Q coaxial structures from equivalent circuit
17 p2526 A72-34466

Avalanche diode oscillators.
17 p2526 A72-34563

Russian book on microwave electronics covering linear-beam and cross-field backward and traveling wave amplifiers and oscillators, klystrons, masers, plasma devices, etc
17 p2532 A72-34650

Characteristics of Gunn elements CGY 11 to 14 and their application as microwave oscillators. II
17 p2530 A72-35150

Superconducting-cavity-stabilised oscillator of high stability.
17 p2530 A72-35386

Electrical characteristics of bulk n-InP oscillators.
18 p2666 A72-36456

Frequency/temperature characteristics of Gunn devices.
18 p2667 A72-36684

Frequency-modulation sensitivity and frequency-pushing factor of a Pd-n-p/+/- punchthrough microwave diode.
18 p2667 A72-36686

LSA diode relaxation oscillator loading effect on oscillation damping, calculating optimum loading as function of conductance
18 p2667 A72-36690

The behaviour of a Gunn oscillator in the domain-delayed mode.
18 p2667 A72-36945

Synchronization and noise performance of mutually coupled oscillators.
18 p2668 A72-37036

Thermal modulation and FM noise of Gunn oscillators.
18 p2668 A72-37038

Endurance test results for microwave avalanche diode oscillators
18 p2671 A72-37146

Improved injection locking of microwave FM-oscillators.
19 p2771 A72-37262

K-band high power single-tuned IMPATT oscillator stabilized by hybrid-coupled cavities.
19 p2771 A72-37263

A 22 percent C.W. efficiency solid state microwave oscillator.
19 p2771 A72-37266

German monograph - Measurement of 'oscillation impedances' and optimization of frequency noise effects of microwave-semiconductor oscillators tunable over a wide frequency range
19 p2772 A72-37477

Some tuning characteristics and oscillation conditions of a waveguide-mounted transferred-electron diode oscillator.
19 p2772 A72-37569

The effect of junction temperature on the output power of a silicon IMPATT diode.
19 p2773 A72-38145

An analytical equivalent circuit representation for waveguide-mounted Gunn oscillators.
19 p2773 A72-38291

A solid-state transponder source using high-efficiency silicon avalanche oscillators.
19 p2774 A72-38400

Some problems of microwave electromagnetic oscillation phase control by using an inductance transistor
19 p2776 A72-38670

Acousto-optic modulation with coupled Gunn oscillator-piezoelectric structure.
20 p2960 A72-39702

A general analysis of noise in Gunn oscillators.
20 p2909 A72-39782

Current and voltage waveform measurements with sampling oscilloscope and capacitive voltage-divide probe to verify TRAPATT diode oscillator theoretical model
21 p3032 A72-40635

Analysis of large-signal noise in Read oscillators.
21 p3032 A72-40698

Temperature effects on modulation sensitivity and vibrational spectra in Gunn diode oscillators, suggesting frequency stability improvement method
21 p3032 A72-40792

Intermodulation distortion of FDM-FM in injection locked oscillator.
21 p3020 A72-40899

A regenerative high multiplicity tunnel-diode frequency multiplier
21 p3034 A72-41122

Effects of tunneling on an IMPATT oscillator.
21 p3034 A72-41382

Calculation of the electronic readjustment of a tunnel-diode oscillator by a varactor
22 p3159 A72-42246

Low temperature characteristics of the Gunn diode.
22 p3159 A72-42307

Plasma diagnostics by means of microwave cavity resonators
22 p3212 A72-42950

Frequency-variable semiconductor-oscillator in the microwave region.
23 p3272 A72-43948

Stability criteria for phase-locked oscillators.
23 p3272 A72-44192

A single-tuned oscillator circuit for Gunn diode characterizations.
23 p3272 A72-44194

Signal frequency distortions in frequency-modulated oscillators with feedback delay
23 p3266 A72-44209

Reciprocal synchronization of generators connected by a long line section
23 p3272 A72-44210

Amplitude dependence of frequency in oscillators.
24 p3385 A72-44964

Frequency stability of Gunn oscillators with variation of ambient temperature.
24 p3385 A72-44980

MICROWAVE PHOTOGRAPHY
Meteorological precipitation and earth surface under cloud characteristics from airborne microwave radiation measurements using millimeter and centimeter waves
02 p0216 A72-11889

Swept frequency resolution and optical processing in propellant grain flaw detection by microwave holography, using Vander Lugt filter imaging
19 p2798 A72-37626

MICROWAVE PLASMA PROBES
Double Langmuir probe, microwave cavity and upper hybrid frequency measurements of plasma density in hydrogen, helium, neon and argon
01 p0110 A72-11190

Microwave measurements of plasma parameters in medium pressure gas discharges in absence of constant magnetic field and in weak electromagnetic field
01 p0072 A72-11215

Electron density microwave measurements in helium-neon laser plasma, discussing population inversion during glow discharge
01 p0081 A72-11216

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes
02 p0263 A72-11412

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, presenting block diagrams of meter, detector and oscillator
02 p0223 A72-11414

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications
02 p0223 A72-11416

Phase measurements at if in microwave plasma diagnostics, examining phase stabilization processes
02 p0223 A72-11417

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators
02 p0223 A72-11418

Numerical method for cylindrical microwave cavities calibration for plasma diagnostics, noting computer programs applicability for arbitrary electron density radial distributions
05 p0662 A72-16418

Self action penetration of electromagnetic wave through dense collisionless plasma layer in high vacuum, using antenna microwave probes
05 p0695 A72-16601

Hydrogen plasma production, using linearly polarized microwaves with superimposed magnetic field
13 p2010 A72-28683

Heat-pipe plasma oven for microwave and spectroscopic measurements.
20 p2912 A72-39433

Calibration procedure to correct for the effects of dielectric containers in microwave plasma density measurements.
21 p3056 A72-41377

Spatial measurement of the magnetic field direction in plasma.
21 p3094 A72-41633

Electron density and temperature in microwave plasmas at higher pressures.
22 p3211 A72-42479

A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma.
23 p3292 A72-44543

MICROWAVE PROBES
NT MICROWAVE PLASMA PROBES
Remote passive microwave sensing of ocean surface wind fields, discussing sea microwave brightness temperature dependence on wind speed
02 p0214 A72-11864

Microwave time of flight method for measuring electron drift velocity in GaAs semiconductor
12 p1855 A72-27667

Ultrabroadband probe design for microwave radiation intensity measurement in harmful exposure study
15 p2191 A72-32574

MICROWAVE RADIATION
U MICROWAVES
MICROWAVE RADIOMETERS
Atmospheric humid cover measurement with airborne/spaceborne microwave radiometric sounding, considering radiothermal radiation models
02 p0253 A72-11733

Earth surface and atmosphere remote sensing by airborne microwave measurements, noting ocean surface emittance dependence on temperature, surface conditions and pollution
02 p0207 A72-11779

Subsurface discontinuity detection by microwave radiometry, noting microwave temperature correlation with moisture patterns
02 p0209 A72-11792

Ground based passive remote sensing of low altitude vertical temperature profiles by microwave radiometry
02 p0211 A72-11807

Narrow beam millimeter wave radiometer with real-time TV display for terrain mapping, analyzing contours blurring caused by antenna pattern and output integration
02 p0191 A72-11821

Oil spills remote detection by multispectral photography, IR scanner imagery and microwave radiometry
02 p0226 A72-11830

Passive microwave remote sensing, discussing thermal imaging, radiometer tracking and image deterioration due to antenna imperfections
02 p0214 A72-11865

Microwave measurement and interpretation of oceanic thermal emission in terms of molecular temperature
02 p0214 A72-11866

Surface temperature measurement by microwave radiometry, noting sensitivity reduction due to moisture effects for resolution cell size targets
02 p0214 A72-11867

Soil surface moisture content and temperature profile determination by remote microwave sensing
02 p0214 A72-11871

Calibration technique for low energy IR radiometers, calculating detector field of view energy content or photons number from mirror reflectivity and temperature
03 p0359 A72-13441

Dicke-type microwave radiometer for daily measurements of 2800 MHz solar flux, discussing antenna system and dynamic range
04 p0522 A72-15163

Radar and radiometric millimeter wave signal systems in near earth environment for remote detection purposes
04 p0494 A72-15610

Combined FM CW radar and radiometer at millimeter wavelengths, investigating objects signatures measurement
04 p0494 A72-15611

Microwave and IR radiometer surveillance of oil spills, discussing sources tracking, sea surface oil volume and flow rate determination and terminal location prediction
05 p0658 A72-16599

Earth resources applications of multispectral remote sensing techniques for airborne and satellite-borne imaging systems, discussing microwave radiometer augmentation of visual and IR data
06 p0813 A72-17430

Airborne or satellite-mounted millimeter wave radiometer for atmospheric water vapor determination noting accuracy advantage over IR measurement
06 p0814 A72-17589

Microwave radiometer and scatterometer sensing for earth surface and subsurface measurements
06 p0815 A72-17784

Superheterodyne radiometers for millimeter and submillimeter waves, using Mach-Zehnder inter-

- ferometer frequency mixer for parasitic signal suppression
08 p1140 A72-21265
- Sea surface roughness mapping by airborne microwave radiometry with correction for viewing angle and atmospheric effects
09 p1297 A72-22525
- Calibrator for millimeter wave horn radiometers, using radiation from lead immersed in liquid nitrogen
09 p1310 A72-22652
- Constraint on astrophysical sources of gravitational waves, using microwave radiometers
11 p1721 A72-26124
- Microwave radiometer performance analysis, deriving input noise power relation to instrument indication in terms of noise parameters
14 p2105 A72-30587
- Microwave radiometry for celestial body emitted or reflected radiation observation, discussing radar cartography with emphasis on side-looking and synthetic aperture radars advantages
15 p2232 A72-31251
- Microwave /60 GHz/ radiometer for air temperature measurement outside aircraft during icing conditions
16 p2393 A72-33631
- Microwave spectrograph with broadband superheterodyne total-power radiometer for time-shared recording solar burst dynamic spectra
17 p2552 A72-34191
- Solar tracking via automatic 5-GHz radiometer with paraboloid antenna, using continuous polar axis rotation in one direction
18 p2691 A72-36433
- S-band radiometer design for high absolute precision measurement.
19 p2794 A72-37252
- Ground-based sensing of temperature profiles from angular and multi-spectral microwave emission measurements.
23 p3285 A72-44147
- Remote sensing of earth resources by microwave radiometry.
24 p3402 A72-45107
- ### MICROWAVE REFLECTOMETERS
- Visual/graphical recording microwave reflectometer for measuring reflection coefficient along waveguide component, based on Fourier transform evaluation by real time analog method
06 p0786 A72-18369
- RF time domain nonreal time reflectometer operating as nanosecond radar with pulse spectrum lines reflections measured and stored for echo computation
19 p2770 A72-37256
- ### MICROWAVE RESONANCE
- Resonance rail line scattering range using flat parallel conductor transmission line for radar cross section measurement
01 p0032 A72-11251
- Garnet crystal structure type microwave ferrites with V and In ions, investigating ferromagnetic resonance linewidth reduction effect
03 p0400 A72-12971
- Arbitrarily located inclined resonant slot in waveguide antenna, obtaining condition for circularly polarized radiation from scattering parameters analysis
04 p0499 A72-15205
- Vibration-rotation double resonance transitions in symmetrical top molecules in millimeter range under chopped laser radiation
04 p0532 A72-15615
- Temperature inhomogeneity effect on plasma column microwave resonant behavior in presence of axial magnetic field, ascribing spectral shifts to electron density and temperature profiles changes
06 p0854 A72-17417
- Dielectric substrate layer surface wave parasitic resonance effects on microstripline waveguide conductor
07 p0958 A72-18855
- Ionization wave propagation in inert gas due to microwave resonance quanta diffusion, explaining plasmaguide phenomena
07 p1040 A72-18916
- Resonator second harmonic influence on Gunn oscillator parameters for transit and hybrid modes, discussing bias voltage, harmonic amplitudes, phase difference, doping level and frequency
07 p0955 A72-19254
- Shf resonator small resonant frequency shift and Q factor changes measurement based on FM signal envelope shape analysis
07 p1046 A72-20508
- End holes effects on dielectric constant measurement of long glass tubes by cylindrical microwave resonant cavity
08 p1164 A72-20940
- YIG-tuned microwave transistor oscillator design and performance, considering resonance phenomena and magnetic circuit effects on applications
08 p1139 A72-20985
- Microwave resonators excited in coupled and E sub zero modes, determining equivalent circuit and Sommerfeld resonator Q factor and guide wavelength
11 p1605 A72-26369
- Mode chart and unloaded quality factor of elliptic microstrip resonator operating in inverse or radial TM modes
11 p1607 A72-26996
- Dual resonant cavity absorption cell composed of Fabry-Perot interferometers excited by microwave sources, observing spectroscopic double resonance effects
12 p1806 A72-27264
- Ferrite loaded X band waveguide Y junctions eigenvalue frequency dependence measurement to identify modal resonance and arrange displacement for circular operation
12 p1790 A72-27508
- Rietz-Kantorovich method reduction of scalar problem for wave propagation along direction surface to boundary value problem, discussing parametric resonance and periodic waveguides
14 p2132 A72-31118
- Millimeter band open cavity resonator using trihedral reflector diffraction grating and inclination control for mode selection
16 p2364 A72-33491
- Natural frequencies of a cylindrical microwave cavity containing a coaxial cylindrical dielectric sample
17 p2513 A72-34334
- Propagation of ionization wave in rarefied noble gases due to microwave resonance quanta diffusion, explaining plasmaguide phenomena
20 p2957 A72-39382
- Plasma diagnostics by means of microwave cavity resonators
22 p3212 A72-42950
- Problem of error estimation during solution of internal boundary value problems in microwave electrodynamics
23 p3265 A72-44201
- ### MICROWAVE SCATTERING
- Pulsar PSR 0833-45 linear polarization measurements at 300 and 1420 MHz, showing frequency invariance with interstellar scattering and Faraday rotation allowance
01 p0133 A72-11119
- Nonlinear scattering of microwave signals incident on unmagnetized cold plasma column
06 p0859 A72-17547
- Deschamps graphical method application to multipoint waveguide junction scattering coefficient measurement with averaging and least square fitting for error reduction
06 p0787 A72-18379
- Airborne radar measurement of 2.25 cm backscatter from sea surface, obtaining wind speed by computerized clustering data analysis techniques
09 p1296 A72-22312
- Backscattering by turbulent irregularities derived in context of single scattering corresponding to weak microwave reflections observed in atmospheric sounding
09 p1280 A72-23412
- Multistage broadband microwave amplifier design based on bipolar transistors cascade coupling, using scattering parameters
10 p1451 A72-24572
- Electromagnetic wave diffraction by dielectric steps in waveguides, calculating microwave scattered field by modified residue calculus technique
10 p1451 A72-24593
- Density fluctuations and ion acoustic two stream instability characteristics of RF generated plasma derived from electromagnetic scattering at 24 GHz
10 p1523 A72-24800
- Spatial distribution of electron beam excited plasma wave spectrum, determining wavenumber, amplitude and frequency by incoherent microwave scattering
11 p1693 A72-25564
- Superhigh frequency electromagnetic waves diffraction by conducting screen circular aperture with phase change by dielectric disk and multiple internal reflections, noting patterns and backscattering apparatus
11 p1597 A72-26371
- Characteristics of nonuniform regions responsible for microwave signals auroral scattering, noting observations with two sidelobe radio interferometer
13 p1946 A72-28584
- Electron density effect on microwave scattering from turbulent plasma, observing change from volume to surface scattering at critical density value
13 p2012 A72-29130
- Galactic structure, ionized gas distribution and radio source diameter studies from interstellar scattering at 81.5 MHz, comparing with pulsars
13 p2050 A72-29962
- Statistical correlation of X-band microwave scattering by overdense intermittently turbulent ionized Ar jet with flux fluctuations from electrostatic probe observations
16 p2440 A72-34065
- Phenomenological model for incoherent microwave scatter attenuation from turbulent plasma, establishing relation between plasma parameters and attenuation coefficient
17 p2517 A72-35622
- Microwave-analogy tests regarding light scattering at cosmic dust particles
19 p2804 A72-38507
- Lunar radar backscattering measurement of 0.86 cm circularly polarized radiation, noting echo polarization ratio and depolarization variations with incidence angle
19 p2868 A72-38735
- Microwave scattering from a radially propagating ion acoustic wave in a positive column.
21 p3089 A72-40201
- Stationary expressions for scattering coefficients of rectangular waveguides with dielectric plugs constituting a finite planar array.
21 p3027 A72-40371
- Study of microwave scattering in a plasma-beam discharge
23 p3321 A72-44212
- Characteristics of nonuniform regions responsible for microwave signals auroral scattering, noting observations with two sidelobe radio interferometer
24 p3397 A72-45084
- ### MICROWAVE SENSORS
- Microwave spectrometer remote sensing of atmospheric temperature and water vapor, discussing cloud, topography and sea state effects and multiple regression statistical method
02 p0228 A72-11859
- Microwave temperature sensor for radiation environment use, discussing cavity resonator design and operation, thermal cycling tests and comparative radiometer technique
07 p0993 A72-20677
- Plasma magnetoresistance in variable magnetic field measured on n-type InSb sample for SHF inertialess power sensor development
16 p2436 A72-33482
- ### MICROWAVE SPECTRA
- Trace gas pollutant monitoring by microwave rotational absorption spectroscopy, discussing test results with Gunn diode cavity spectrometer
01 p0023 A72-10524
- H I radio recombination line observation in H II region NGC 2024 microwave spectrum, detailing radiation frequency dependence
01 p0133 A72-11143
- Radio variable sources PKS 0727-11 and 1514-24 observation at 2295 MHz, presenting flux measurements and drift curves
01 p0134 A72-11161
- Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements
02 p0223 A72-11409
- Stratospheric and lower mesospheric temperature measurement by ground based passive microwave sensing, calculating oxygen absorption band lines brightness temperature emission spectra
02 p0213 A72-11861
- Vacuum UV spectra of free plasma column in microwave field at high pressures for discharge in helium-deuterium mixture
03 p0394 A72-13084
- Interstellar molecular microwave observations, emphasizing theoretical production rates and modes
03 p0419 A72-13119
- Diffuse cosmic background radiation measurements, emphasizing microwave and X ray spectra and excitation mechanism
03 p0409 A72-13138
- Solar turbulent magnetic field in lower corona associated with expanding limb microwave burst of 30 March 1969
03 p0410 A72-13325
- Submillimeter wave stratospheric emission spectra measurement by aircraft- or balloon-borne phase modulated Fourier spectrometry, noting SNR and small errors
03 p0348 A72-13399
- Oso-3 satellite observation of solar flare associated EUV bursts, comparing with microwave radio bursts [AD-739641]
03 p0413 A72-13529
- Microwave spectrometer crystal current leveler for broadband video detector and rotary wave attenuator control
04 p0524 A72-15541
- Solar microwave bursts impulsive and gradual rise and fall type comparison, noting frequency response and distribution
05 p0713 A72-16022
- Partial solar eclipse observation at 9 mm wavelength on 25 February 1971, noting limb brightening
05 p0718 A72-16509
- Magnetic field decay in solar microwave burst region evaluated from circular polarization degree time profile
06 p0891 A72-18505
- Microwave radiation intensity and spectral frequencies of Knudsen discharge in cesium plasma
07 p1046 A72-20515
- Atmospheric vertical temperature profile inference from ground based measurement of microwave thermal emission spectrum from atmospheric oxygen
08 p1161 A72-21824

Microwave induced dc voltages across unbiased Josephson tunnel junctions, showing power spectra dependence on magnetic field 09 p1367 A72-22458

Spectrum studies of extragalactic diffuse background radiation fields consisting of X ray and thermal or microwave background 10 p1529 A72-23914

Simultaneous observations of radio flares from beta Persei on 25-25 January 1972 at 2.8, 3.7 and 11.1 cm, noting spectral characteristics different from quasi-steady component 10 p1547 A72-24945

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft 10 p1476 A72-25023

Holographic Fourier spectroscopy for microwave radiation spectra of toroidal plasma with turbulent heating 12 p1850 A72-27135

Heavily obscured galaxy IC 10 21-cm line observation with radio telescope and neutral hydrogen diameter measurement for distance estimation 12 p1868 A72-27215

Interstellar atomic hydrogen observations in radio nebula W 3 direction, noting 21-cm absorption line profile coincidence with Cn alpha recombination line in radial velocity 12 p1868 A72-27219

Dual resonant cavity absorption cell composed of Fabry-Perot interferometers excited by microwave sources, observing spectroscopic double resonance effects 12 p1806 A72-27264

Microwave recombination lines from emitters with mass greater than 12 amu in Orion B and W3A regions 13 p2041 A72-29415

Vacuum UV spectra of free plasma column in microwave high pressure discharge in helium-deuterium mixture 13 p2015 A72-29434

Galactic background continuous radiation observation at 15 GHz, determining brightness temperature and thermal radiation component 15 p2313 A72-32348

Radio maps of extragalactic sources at 2.7 and 5.0 GHz presented with physical data for various components 16 p2458 A72-33718

Soft X-ray and microwave observations of hot regions in solar flares. 17 p2608 A72-35089

Possible long-period oscillations in solar radio emission at microwaves. 17 p2608 A72-35091

Spectral observations of Venus in the frequency interval 18.5-24.0 GHz - 1964 and 1967-68. 17 p2610 A72-35120

The electromagnetic radiation near the ion plasma frequency emitted by a turbulently heated plasma. 18 p2715 A72-36598

Microwave celestial water-vapor sources. 18 p2729 A72-36990

The structure of the Crab Nebula at 2.7 and 5 GHz. I. 19 p2855 A72-37340

Expanding ring in Galactic center from analysis of microwave spectroscopic data, measuring expansion and rotation velocities 20 p2972 A72-39860

Low-temperature part of a spectrometer for gigahertz-ultrasonics and ultrasonic paramagnetic resonance. 21 p3051 A72-40215

Dark field method for phase diffraction grating visualization by microwave holography, using radio lens for object microwave spectrum formation 21 p3055 A72-40795

Observations of linear polarization of radio sources at 7.2 cm. 21 p3109 A72-41326

Application of holographic Fourier spectroscopy to the analysis of the microwave radiation spectrum 21 p3058 A72-41733

Spectral analysis of microwave pulses by a ferrite transducer 22 p3158 A72-42119

Brightness temperature of the terrestrial sky at 2.66 GHz. 22 p3173 A72-42516

Cross correlated interstellar scintillation patterns of circumpolar pulsar PSR 0329+54 at 408 MHz, interpreting transverse velocities in Galaxy 23 p3334 A72-43253

Microwave generation with high energy electrons in magnetic undulator with transverse electromagnetic field, calculating frequency distribution of undulator radiation 23 p3265 A72-44158

Observations of the interplanetary medium and of the structure of radio sources using higher moments of interplanetary scintillations. 24 p3437 A72-44830

Microwave spectrum of compressed O2-foreign gas mixtures in the 48-81 GHz region. 24 p3378 A72-44871

Microwave observations of a partially ionized interstellar cloud. 24 p3447 A72-45551

MICROWAVE SWITCHING

Low driving power resistive gate MOSFET microwave switch with performance approaching P-I-N diode 01 p0038 A72-10658

Moderate power GaAs FET switching experiment, obtaining rise and fall times 07 p0952 A72-18826

Microwave diode switch operating at 35 GHz for spin lattice relaxation time measurement, discussing insertion loss, and rise and decay times characteristics 16 p2369 A72-33623

The use of semiconductor diodes to protect a radar receiver 18 p2663 A72-37217

S-band high power microstrip switches with p-i-n diodes for spacecraft radio systems 19 p2770 A72-37257

A multi-channel rotary joint for spacecraft applications. 19 p2770 A72-37260

Semiconductor diodes for microwave power control 21 p3033 A72-40939

MICROWAVE TRANSMISSION

Rain, snow and hail precipitation effects on radio link signal attenuation, scattering and fading along various transmission paths at millimeter and centimeter wavelengths 01 p0027 A72-10407

FM radio link superposed parabolic antenna systems adjustment for space diversity reception for scatter propagation and broadband multichannel transmission in 1.9 GHz range 01 p0027 A72-10410

Microwave propagation on nonlinear transmission lines by examination of energy dissipation in shock front, considering distributed and lumped-parameter models 01 p0029 A72-10692

Microwave communication via satellites, discussing FDMA and TDMA transponders design 01 p0029 A72-10709

Book on microwave techniques covering Maxwell equations, electromagnetic wave propagation in conducting media, complex notation, plane polarized waves transmission and reflection, wave equations, etc 01 p0043 A72-11275

Real time programmable video data compression system for microwave transmission of ATS satellite pictures between acquisition station and central computer processing 02 p0173 A72-12128

Circuit design techniques used for wideband signal processing systems, considering 1000 MB/S microwave communication link 02 p0176 A72-12163

Signal modification of microwaves propagating transversely in underdense turbulent plasma jet 02 p0265 A72-12365

Microwave propagation anomalies due to meteorological factors, discussing superrefractive atmospheric layers effects on radar data reliability and undesirable echoes appearance on display screen 02 p0182 A72-12746

Millimeter wave pulse signal transmission path length modulator with P-I-N diode switch, discussing system design and experimental results 02 p0196 A72-12798

Microwave propagation through laminated metallic media with gyromagnetic effects, applying dc magnetizing field normal to film plate [IEEE PAPER 31.6] 03 p0323 A72-13784

Angle modulation distortions and measurements in broadband FM microwave links 04 p0485 A72-14466

Zwischenmedium concept application to electromagnetic diffraction problems in waveguides with one or more interfaces and continuity condition met by orthogonal expansion 04 p0488 A72-15378

Intermodulation noise distortion due to multipath transmission over FM/FDM microwave links, deriving distortion probability distribution for Nakagami-Rice randomly distributed signal reception 04 p0493 A72-15517

Cut-off frequencies of degenerate LSE and LSM modes in rectangular waveguides containing dielectric layers in H plane 04 p0502 A72-15526

Semiconductor slab electroconductivity measurement based on circularly polarized microwave propagation in circular waveguide 04 p0502 A72-15533

Millimeter wave and laser space-to-space communication links comparison, considering ehf system based on size, weight, power consumption and communication parameters calculations 04 p0493 A72-15609

Pollution free electrical power generation from solar energy, discussing microwave transmission to earth, power shortages, thermal pollution and solar cell manufacture cost [ASME PAPER 71-WA/SOL-2] 05 p0614 A72-15892

Microwave dispersive line structures with nonlinear phase characteristics, considering use of empty waveguide segment near cut-off 06 p0785 A72-18312

Radio attenuation above 10 GHz based on theoretical model of equivalent precipitation on path using intensity spatial distribution function within rain cell 07 p0940 A72-19189

High resolution measurement of microwave refraction including arrival and fire angles on short line-of-sight tropospheric paths 07 p0946 A72-19790

Integral relations derivation for stationary and nonstationary potential motions in cases of zero and infinite conductivity, applying to wave expansion in cylindrical waveguide 08 p1212 A72-20966

Microwave transmission loss prediction formula for obliquely incident plane wave leakage through perforated flat metal plate 08 p1135 A72-21559

Fixed frequency or wideband real time measurements of microwave reflection and transmission coefficients and fields in open or closed structures 09 p1289 A72-23425

UHF band satellite TV broadcasting system with FM, calculating required field strength and transmitter power 10 p1435 A72-24033

Microwave amplitude modulation during propagation through RF plasma under perpendicular low intensity time dependent magnetic field 10 p1520 A72-24345

Microwave diagnostics of P doped Si semiconductor crystal prism determining relation between complex permittivity and reflection factor by variational method 10 p1450 A72-24404

Microwaves propagation through circular waveguide partially filled with lossless cold electron plasma dielectric, presenting computed dispersion curves for waveguide and plasmaguide modes 10 p1522 A72-24677

Complex gain nonlinearity of transmitting microwave amplifiers in single and multicarrier operation 10 p1454 A72-25147

Single sideband AM microwave analog transmission systems using frequency division multiplex techniques 11 p1595 A72-26289

Lossless distributed rectangular microwave structure with dielectrics interposed between two conductive metallic layers, noting existence of transmission zeros and filter properties 11 p1607 A72-26990

Skylab communications system, discussing voice, data, TV and command mission requirements and microwave instrumentation [AIAA PAPER 72-543] 12 p1781 A72-27366

Receiving and transmitting antennas directional gain effect on microwave long distance tropospheric propagation 12 p1783 A72-27632

GaAs semiconductor devices role in microwave communications, discussing physical properties and potential applications 12 p1792 A72-27736

Microwave radio link transmission loss Rayleigh-like long term distribution explained by two-path propagation model 12 p1784 A72-27796

Ground terminals spatial diversity for earth satellite mm wave communication systems to avoid attenuations by rainfall 13 p1989 A72-28810

Wall-impedance waveguide propagation constant determination from Rayleigh-Schroedinger power expansion of perturbed eigenvalues 15 p2194 A72-31549

SHF signal propagation through troposphere at low elevation angles, comparing fading measurements in winter and summer 15 p2194 A72-31550

Microwave propagation delay due to atmosphere in satellite-to-earth communication based on spherical smoothly varying model and geometrical optics techniques 15 p2200 A72-32102

Slant path radar attenuation events due to rain during summers at 10 GHz, obtaining statistics on frequency of occurrence, extent in azimuth and duration 15 p2200 A72-32103

Microwave transmission phenomenon and application to NDT, discussing various methods and examples 16 p2391 A72-33233

Love wave tapping in isotropic microacoustic surface waveguide by partial transduction into bulk wave at discontinuity 16 p2428 A72-34178

Experimental investigation of the parameters of a statistical Gaussian field model for centimeter waves beyond the radio horizon

17 p2515 A72-34834

Determination of the dielectric constants of microwave-striplines

17 p2530 A72-35429

Controversy surrounding Sirio satellite project related to microwave atmospheric propagation above 10 GHz with possible application in earth-to-space communication systems

17 p2623 A72-35918

UHF radio signals refraction angles and group delay times for biexponential model of ionospheric electron density profile

18 p2657 A72-36101

Simplified method of calculating microwave diffraction loss over spherical earth.

18 p2660 A72-36517

Reflection of microwave through laboratory plasma.

18 p2716 A72-36947

Calculation of the transmission factor of a parametric microwave transistor multiplier

19 p2774 A72-38423

Electromagnetic compatibility and interference problems of radar altimeters, collision avoidance systems and air and marine mobile satellite communication equipment in 1600 MHz region

20 p2901 A72-38977

A variation-iteration technique for the design of wall-impedance waveguides.

20 p2903 A72-39429

Wave scattering at a step in a circular multiwave waveguide

21 p3016 A72-40781

Experimental investigation of the propagation of electromagnetic waves in a rectangular waveguide partially filled with n -InSb in the presence of a transverse magnetic field

21 p3016 A72-40796

Geostationary satellite direct TV broadcasting system extension to 12 GHz band, considering receiving installations, antennas, performance and costs

21 p3018 A72-40876

Reliability aspects of fading in microwave line of sight using digital transmission.

21 p3019 A72-40887

Automatic landing and microwave guidance system potential.

21 p3040 A72-41072

Magneto-microwave free-carrier absorption in germanium in the Faraday configuration.

21 p3097 A72-41379

Propagation loss of centimeter and millimeter waves in rainfall.

21 p3023 A72-41833

State of the art in the detection of intelligent extraterrestrial signals.

24 p3441 A72-45190

NT THERMIONIC DIODES

NT TRAVELING WAVE TUBES

Grid controlled 100 W microwave transmitter power triode for space applications, noting high reliability and stability through use of metal dispenser cathode

01 p0009 A72-11223

Spatially periodic coupled cavity slow wave structures for multibeam microwave tube stabilization without absorber

02 p0190 A72-11575

Electron tube with Fabry-Perot cavity resonator with grooved and smooth mirrors for millimeter and submillimeter wave generation

04 p0503 A72-15598

Optimal hf triode oscillation tripler with allowance for power limitation by thermal losses on plate and grid electrodes

05 p0638 A72-17184

Twin triodes type parameters stability in microwave region as function of cathode service life and temperature

09 p1284 A72-22243

Broadband electrostatically focused klystron for airborne radar application, discussing focusing cell design, amplification and efficiency

10 p1446 A72-23821

Noise temperature and admittance of space charge limited double cathode tube with transit time effects at microwave frequencies

10 p1454 A72-25105

Vacuum tube developments for radar, TV and communication applications, discussing microwave, traveling wave, cathode ray, memory and vidicon tubes, magnetrons, klystrons and tetrodes

11 p1606 A72-26544

Experimental determination of ion density trapped by electron beam.

21 p3034 A72-41463

MICROWAVES

NT DECIMETER WAVES

NT MICROWAVE EMISSION

NT MILLIMETER WAVES

Type 3 and 3/5 solar radio bursts coupling with microwave bursts, considering connection with H alpha flares and X ray emission

01 p0118 A72-10414

Microwave emission characteristics of oil slicks, showing dependence on oil type, film thickness and sea state

[AIAA PAPER 71-1071]

01 p0057 A72-10533

Microwaves - Conference, Stockholm, August 1971, Volumes 1 and 2

01 p0035 A72-10626

Book on microwave techniques covering Maxwell equations, electromagnetic wave propagation in conducting media, complex notation, plane polarized waves transmission and reflection, wave equations, etc

01 p0043 A72-11275

Chronic microwave irradiation effects on experimental animal blood forming systems, examining peripheral blood count changes and nuclei and mitosis abnormalities in erythroblastic and lymphoid cells

02 p0158 A72-11708

Satellite solar power stations, considering energy conversion, microwave generators and beam transfer to earth

02 p0155 A72-11770

Polarization distribution and inversion of solar impulsive microwave bursts at 17 GHz

03 p0407 A72-12940

Microwave solar radio bursts occurrence and intensity distribution at 19 GHz during July 1967-December 1969

03 p0407 A72-12941

Papers on microwave advances covering precision coaxial connectors, O-type linear beam devices, electron dynamics and energy conversion and junction circulators

03 p0424 A72-13229

Cataractogenesis from microwave radiation exposure, discussing protection, legislation and Western and Soviet literature review

06 p0767 A72-17877

Third harmonic generation in Ge induced by conduction nonlinearity during bulk heating of charge carriers by microwave fields

07 p1047 A72-19023

Cosmos 243 microwave radiation analysis over cultivated terrain, showing radio brightness temperature dependence on soil temperature and humidity effect on emissivity

09 p1297 A72-22495

Microwave, X ray and corpuscular emission by gas discharges in coaxial plasma gun, measuring pressure and current distribution

09 p1362 A72-23212

Atmospheric humidity vertical profile determination by measuring microwave radiation from satellite

11 p1620 A72-25274

Lower atmosphere vertical temperature profiles determination from clear air ground based measurements of microwave thermal emission by oxygen

11 p1591 A72-25764

Lunar microwave emission, constructing thermophysical models for radio observations and brightness temperature variations

12 p1869 A72-27327

Statistical analysis of solar microwave bursts, examining radiation source development and emission mechanism

12 p1872 A72-27814

Neuroendocrine responses in microwave radiation exposed rats, correlating thyroid and thyrotropic activity

12 p1767 A72-28321

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations

13 p2017 A72-29618

Flux density variations incidence among extragalactic sources found by 3.8 cm sky survey

13 p2048 A72-29830

Earth velocity through microwave background, discussing absolute and relative motion, inertial frame and distant matter distribution and Mach principle

14 p2157 A72-30624

Standardization of microwave irradiation experiments on animals, discussing power density level evaluations and local vs whole-body irradiation effects

14 p2080 A72-30746

Microwave induced cutaneous heat and pain perception thresholds, noting usefulness as possible radiation hazard warning

15 p2188 A72-31506

Irradiation system for animal and human subjects exposure to controlled microwave radiation in environmental tests

15 p2191 A72-32573

Microwaves interaction with ultrashort laser pulse generated traveling refractive index changes in liquids with orientational Kerr effect

15 p2252 A72-32652

Microwave modulated incoherent light for large volume scenes holography, noting object image reconstruction by coherent light transillumination of hologram

15 p2242 A72-32675

Expanding loops of H alpha filaments in peculiar galaxy M 82 investigated by microwave radio map, suggesting thermal and nonthermal radiation sources

15 p2317 A72-32757

Time-of-flight measurements of molecular and atomic beams produced by cooled microwave discharge source, using hydrogen, helium, argon and nitrogen

16 p2430 A72-33061

Cosmic microwave background radiation origin by energy dissipation associated with primordial chaotic universe

16 p2459 A72-33770

Microwave radiation - Biophysical considerations and standards criteria.

17 p2507 A72-34299

Emission of coherent microwave radiation from a relativistic electron beam propagating in a spatially modulated field.

17 p2589 A72-34874

X ray sources associated with galactic clusters resulting from relativistic electrons Compton scattering on microwave background radiation

17 p2599 A72-35072

Short cesium plasma discharge diode as physical model for thermionic converter, studying ionization, recombination and microwave radiation

18 p2714 A72-36212

Observations on microwave hazards to USAF personnel.

18 p2653 A72-36522

Observation of linear polarization of solar microwave bursts.

18 p2722 A72-36997

International Microwave Symposium, Arlington Heights, Ill., May 22-24, 1972, Proceedings.

19 p2770 A72-37251

Microwave hologram radar imagery.

19 p2764 A72-37602

Nonthermal emission of a magnetoactive plasma in the field of super-high-frequency pumping wave

21 p3090 A72-40407

Deposition of finishes and dyes in materials dried using microwave heating.

22 p3183 A72-42480

Progress in the efficiency of free-space microwave power transmission.

22 p3140 A72-42481

Comparison of microwave-induced constant-voltage steps in Pb and Sn Josephson junctions.

23 p3323 A72-43272

MICROWEIGHING

U WEIGHT MEASUREMENT

MICTURITION

U URINATION

MDAIR COLLISIONS

Vertical dipole antenna design for CW Doppler radar midair collision avoidance system

05 p0629 A72-16571

Aircraft midair collision prevention in dense air traffic environments, suggesting problem solution based on proximity warning system

08 p1204 A72-21090

Aircraft collision near misses under IFR and VFR conditions, discussing ATC coordination, equipment failure and personal and planning problems

09 p1349 A72-22977

Pilot warning systems for visual midair collision avoidance, noting reaction to imminent threats, scanning patterns and display sector size effects [SAE PAPER 720312]

11 p1583 A72-25576

Collision avoidance techniques for midair collisions reduction, discussing airborne and ground based systems

15 p2272 A72-32213

Midair collision causes and prevention, considering pilot responsibilities, anticollision devices and procedures

19 p2831 A72-37800

Design, operation and performance of time-frequency midair collision avoidance system, noting air traffic controller backup for departure, enroute and arrival control

21 p3081 A72-40295

Operation principles, capabilities and tests of midair collision avoidance system with aircraft separation control by nonsynchronous techniques

21 p3081 A72-40296

- Midair collision prevention independent of ATC, discussing aircraft lighting, collision avoidance systems and proximity warning indicator
21 p3081 A72-40297
- Air traffic, collision risks, defense zones, airspace structure and central planning agency for flight safety problems reform
[DGLR PAPER 72-038] 24 p3467 A72-44617
- Midair collision prevention for Army aircraft.
24 p3422 A72-44645
- SECANT midair collision avoidance system based on nonsynchronous microsec pulse transmission and receiving via randomly selected frequency, describing modular components and operating principles
24 p3422 A72-44647
- MIDAS SATELLITES**
U.S. reconnaissance satellites development, discussing RAND project, Agena, Discoverer, Samos and Midas
12 p1876 A72-27109
- MIDCOURSE GUIDANCE**
White Sands Missile Range and Range-Rate system design and verification to meet midcourse tracking requirements under severe target dynamics
08 p1133 A72-21402
- Interplanetary spacecraft midcourse guidance stochastic control, deriving algorithm for computing optimum velocity correction and execution time with allowance for correction-dependent errors
10 p1508 A72-23778
- Optimum aim point biasing in case of a planetary quarantine constraint.
20 p2968 A72-39196
- An approximation to midcourse correction direction errors.
22 p3203 A72-42870
- Analysis of the Radio Astronomy Explorer lunar orbit mission.
[AIAA PAPER 72-940] 24 p3444 A72-45437
- MIDCOURSE TRAJECTORIES**
Maneuver strategies for multi-planet missions.
[AIAA PAPER 72-914] 24 p3443 A72-45431
- MIDDLE EAR**
Cat and rabbit middle ear muscles contraction by electric stimulation of motor nerves, noting sound transmission reduction
08 p1115 A72-21136
- Cat middle ear muscles motor units (twitch tension and contraction time in response to motor neuron threshold stimulation
08 p1116 A72-21137
- Stapedectomy postoperative complications as flying hazard, discussing pilot reaction to middle ear pressure changes
14 p2082 A72-31094
- MIDLATITUDE ATMOSPHERE**
Midlatitude D layer observations during sunspot minimum, emphasizing atmospheric ionization and ozonospheric parameters
01 p0055 A72-10433
- Radio communication accuracy characteristics in calculation of maximum frequency, skip distance and emission angle by transmission curves for midlatitude ionosphere
01 p0028 A72-10600
- Midlatitude ionospheric trough characteristics from computer analysis of Ariel 3 electron density data, correlating with geomagnetic phenomena
01 p0120 A72-10921
- Middle geographic latitude sporadic E-layer initial height variations during 1957-1968 solar cycle
01 p0064 A72-11103
- DR-current belt dynamics during magnetic storm based on ground observation data on midlatitude red arcs
02 p0217 A72-11929
- Midlatitude ionospheric radio wave absorption measurements, using radio astronomical polarization method
02 p0172 A72-11945
- Cosmic noise ionospheric absorption measurements with riometers, showing mid and low latitudinal variation
02 p0221 A72-12464
- Vertical motions of midlatitude F 2 layer during magnetospheric substorms, investigating electric field distribution
03 p0349 A72-13519
- Long wave radiation and surface friction effects on midlatitude cyclone development in eight-level primitive equation orographic model
03 p0385 A72-14229
- Auroral behavior observation at midlatitude station, exhibiting correlation with solar activity as regards solar cycle recurrence and phase
[AD-739061] 04 p0515 A72-14882
- Geomagnetic effects on lower ionosphere at lower midlatitude station, discussing long wave propagation
04 p0516 A72-14939
- Magnetic baylike disturbances and multiple midlatitude 6300-A auroral arcs during geomagnetic storm recovery phase and concurrent ionospheric current system
05 p0630 A72-16620
- Ionospheric ion density distribution at 600 km height and medium and low latitudes from Cosmos 184 satellite data analysis
05 p0659 A72-16766
- Rocket-borne vector magnetometer measurements of midlatitude ionospheric currents near sporadic E, noting nearly uniform vertical distribution
06 p0804 A72-17459
- Variance spectral techniques in detecting wave modes of synoptic scale tropospheric wind in midlatitudes and tropics
06 p0841 A72-17634
- Midlatitude F region wavelike disturbances detection by hf radio echo techniques, discussing correlation with jet stream associated tropopause wind patterns
07 p0974 A72-18885
- Midlatitude geomagnetic micropulsations polarization and spectral characteristics, explaining behavior in terms of MHD wave propagation theories
07 p0975 A72-19152
- Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances
08 p1152 A72-20706
- Vertical distribution of electron density seasonal anomaly and storm effects in daytime midlatitudes topside ionosphere from Alouette 1 data
08 p1155 A72-20814
- Midlatitude and equatorial geomagnetic micropulsations during 13-14 January 1967 world-wide magnetic storm from ground and satellite observations
08 p1157 A72-21107
- Seasonal variation in ionospheric horizontal drift velocities under normal E and sporadic E conditions for middle latitudes
08 p1157 A72-21115
- Wind shear theory of midlatitude sporadic E formation, using wind profiles from artificial luminous cloud observations
08 p1161 A72-21540
- Model calculation for electron production rates due to photoionization and particle precipitation below 100 km at midlatitude during solar minimum and maximum years
09 p1375 A72-22357
- Nightglow evidence of precipitating energetic electrons in midlatitude nighttime D region based on intensity determination from satellite and rocket data
09 p1375 A72-22358
- Midlatitude auroral zone positive ion mass spectrometer observations in E region, noting diurnal variation and sporadic E events
09 p1375 A72-22364
- Synoptic measurement of midlatitude D region electron density diurnal and seasonal variations under quiet conditions, using differential absorption partial reflection experiment
09 p1376 A72-22372
- Tropical storms generated midlatitudinal cloud bands relation to autumnal large scale circulation, analyzing heat and moisture injection effects
09 p1344 A72-22429
- Vlf hiss with lower hybrid resonance cut-off recorded by Alouette 1, emphasizing midlatitude events and electromagnetic energy transportation by multion duct in topside ionosphere
09 p1279 A72-23007
- VLF waves propagation dependence on ionospheric horizontal electron density gradients associated with midlatitude depression from FR-1 satellite observation
10 p1472 A72-24060
- Sporadic E layer critical frequency relationship to ionospheric wind direction for midlatitudes in summer period
10 p1472 A72-24079
- Midlatitude sporadic E layer observed by rocket and radio sounding, deriving plasma frequency from peak electron density
10 p1477 A72-25156
- Wind shear and midlatitude sporadic E layer theories, discussing metal ions production and loss
10 p1477 A72-25158
- Metal ion sheaths in midlatitude sporadic E layer caused by vertical redistribution of neutral ionization, discussing wind shear discontinuities
10 p1477 A72-25159
- F 2 layer midlatitude local centers of anomalous noontime ionization during winter and summer solstices
11 p1623 A72-26283
- Strong pitch angle scattering of energetic electrons in presence of electrostatic waves due to ion cyclotron instability above midlatitude ionospheric trough region
11 p1714 A72-26398
- Midlatitude stable auroral red arcs observation from OV1-10, showing generation at plasmopause due to turbulent dissipation of ring current energy
11 p1624 A72-26401
- Mass spectrometer measurements of hydrogen, helium, nitrogen, oxygen and nitrogen oxide ion concentrations vertical profiles in ionosphere at midlatitudes
11 p1628 A72-26906
- Electron precipitation in upper atmosphere at midlatitudes from positive ionized nitrogen molecules electrophotometric observation and night airglow and geomagnetic field measurements
12 p1802 A72-27302
- Seasonal atmospheric composition changes relation to midlatitude F 2 layer seasonal anomaly during high solar activity
12 p1803 A72-27776
- Corpuscular radiation intensity relationship to midlatitude mesosphere temperature from rocket and balloon sounding and ground measurements
13 p0229 A72-28603
- DR-current belt dynamics during magnetic storm based on ground observation data on midlatitude red arcs
13 p1948 A72-29241
- Midlatitude ionospheric radio wave absorption measurements, using radio astronomical polarization method
13 p1920 A72-29257
- Infrasonic excitation of red oxygen emission at 6300 A during geomagnetic storms at middle latitudes
14 p2098 A72-30146
- Midlatitude upper atmosphere wind, tide and turbulence measurements, using radar observations of meteor trails
14 p2099 A72-30248
- Composition of radiation excess over primary cosmic ray background recorded by Cosmos satellites below midlatitude belt region
14 p2147 A72-30626
- Midlatitude VLF emissions intensity relationship to dayside auroral particle precipitation flux
15 p2194 A72-31437
- Midlatitude nighttime sporadic E layer relationship to geomagnetic field, considering wind shear theory
15 p2224 A72-31798
- Polar/midlatitude model of atmospheric density variations from LOGACS low altitude satellite accelerometer experiment
15 p2229 A72-32000
- Imposed southern boundary experimentation for large scale Northern Hemisphere midlatitude atmospheric flow numerical prediction, discussing factors contributing to model success
15 p2267 A72-32726
- Ionospheric electron content semiannual and seasonal variations as function of solar and geomagnetic activity from low and mid-northern latitude observations
16 p2385 A72-33378
- Ionospheric ion density distribution at 600 km height and medium and low latitudes from Cosmos 184 satellite data analysis
17 p2548 A72-35269
- Midlatitude red arc observations by satellite and ground station, suggesting thermal conduction theory of formation from ionospheric electron and ion temperatures and densities
18 p2685 A72-35989
- Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances
19 p2790 A72-38334
- Mid-latitude D-region ionization associated with the 'slot' in radiation belt electrons.
20 p2964 A72-39533
- Magnetically symmetric detection of the midlatitude electron density trough by Ariel 3 satellite.
22 p3170 A72-42372
- Geomagnetic storm and seasonal effects on spread of monthly distribution and average behavior of midlatitude F region electron peak density and slab thickness
22 p3172 A72-42434
- Relative movements of mid-latitude trough and scintillation boundary.
23 p3282 A72-43267
- Midlatitude VLF emissions in magnetosphere due to plasma resonance instability near plasmopause, using ground, rocket and satellite observations, estimating electron energy
23 p3263 A72-43515
- Corpuscular radiation intensity relationship to midlatitude mesosphere temperature from rocket and balloon soundings and ground measurements
24 p3435 A72-45103
- Tropospheric wave motions with baroclinic basic flow in equatorial latitudes.
24 p3399 A72-45485
- MIDLATITUDES**
U TEMPERATE REGIONS
MIE SCATTERING
NT RAYLEIGH SCATTERING
Extinction curves for Mie scattering by interstellar grains, including refractive index differences in vacuum UV for methane, ammonia and water ice absorption
02 p0284 A72-12633
- Mie scattering by spherical particles in low loss glasses for fiber optic waveguides, discussing angular dependence
03 p0359 A72-13445

Spherical scatterers extinction efficiency effect on photometer optical systems transmittances, using Mie equation and numerical methods

07 p0987 A72-19831

Mie scattering models of zodiacal light based on spherical particles, commenting on inadequacy for nonspherical particles at elongations above 120 deg

19 p2792 A72-38506

Light attenuation coefficient measurement in water of various turbidity with AR and Kr lasers, interpreting results by Mie scattering theory

20 p2931 A72-39270

MIE THEORY

U MIE SCATTERING

MIGRATION

Binary alloys concentration distribution determination in migrating liquid-solid plane phase interfaces range during crystallization

07 p1022 A72-20571

Laser stimulated Raman scattering and IR absorption on crystal defects leading to atomic migration in solids

11 p1647 A72-26144

MILITARY AIR FACILITIES

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning

10 p1508 A72-25096

Integrated civil/military ATC system for upper airspace control (UAC) center at Karlsruhe

16 p2421 A72-34108

Mediator plan for joint civil/military ATC organization at London center, discussing sectorization, control and radar facilities, flight plan processing and communications

16 p2421 A72-34109

Design of a military air cargo transportation system by use of a large scale mathematical programming model

24 p3466 A72-44577

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models

24 p3466 A72-44578

MILITARY AIRCRAFT

Industry assisted state of art assessment of high lift turbofan configurations for USAF STOL tactical transport technology program

[SAE PAPER 710758]

01 p0003 A72-10255

Military aircraft inertial navigation system design, discussing gyroscope, gyro compassing alignment, accuracy and performance

04 p0545 A72-15666

Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts

[AIAA PAPER 72-124]

05 p0612 A72-16922

Civil and military aircraft forced diversion, discussing legal counters and aircraft restoration

05 p0753 A72-17166

Military aircraft operations and logistics computerized simulation for support and maintenance cost estimates

06 p0758 A72-17974

Structural demonstration flight testing (U.S. Navy/ of new aircraft, presenting maneuver checklist

06 p0759 A72-18489

National Environmental Policy Act (PL 91-190) impact on Army aircraft turbine engine development in terms of performance, additional cost and time

07 p1053 A72-18773

French, British, Italian, U.S., German and Israeli military aircraft, presenting design and performance data

07 p0913 A72-20308

Linear programming application to aircraft selection for tactical airlift fleet contingency planning

[AD-736074]

08 p1256 A72-21468

Naval aircraft optimal repair and replacement policies determination for operation cost minimization by dynamic programming

[AD-736094]

08 p1256 A72-21470

Survival rates in USAF accidents during 1965-69, noting visual sighting as primary rescue factor

08 p1109 A72-21564

Aircraft fuel system gunfire vulnerability and fire and explosion protection techniques

08 p1112 A72-21579

Mitsubishi XT-2 jet trainer aircraft, presenting design, structural and performance data

10 p1421 A72-25107

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics

[ASME PAPER 72-GT-73]

11 p1704 A72-25655

Propulsion control systems design for military and commercial V/STOL aircraft, considering power management performance with minimum weight and maximum reliability and maintainability

[ASME PAPER 72-GT-79]

11 p1705 A72-25659

Integrated display system design with navigation update, weapon delivery, reconnaissance, bomb damage

assessment, threat and terrain avoidance capabilities for multicrew military aircraft

11 p1684 A72-26292

Structural design and optical problems of external vision and cockpit transparencies in military aircraft

12 p1753 A72-27002

Emergency escape from high performance military aircraft in flight and on ground, using explosive cord for transparent canopy material breakup

12 p1753 A72-27017

Anthropometric data utilization for military pilot/aircraft compatibility evaluation, discussing cockpit exclusion code development and implementation

12 p1777 A72-28324

Tethered autostabilized rotor platform for military surveillance, target location and communication, discussing flight vehicle, tethering cable, ground station and guidance-control system

13 p1898 A72-30078

Management information system role in cost effective civil and military aircraft operations, discussing hardware modification and human resources and communication system adaptation

15 p2339 A72-32458

Fokker VTOL transport aircraft designs, considering payload, range, runway conditions, noise, military capabilities and operational costs

16 p2347 A72-33048

Low level night operations of Army aircraft

[AHS PREPRINT 631]

17 p2488 A72-34481

Status of U.S. Navy stall/post-stall/spin flight testing

19 p2749 A72-38104

Investigation of the commonality in development of military and commercial STOL transports

[AIAA PAPER 72-808]

19 p2750 A72-38114

Tactical aircraft weapon system development, describing navigation, target acquisition, release point guidance and delivery modes

[AIAA PAPER 72-896]

20 p2951 A72-39107

STOL performance criteria for military transport aircraft

[AIAA PAPER 72-806]

20 p2889 A72-40055

Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems

24 p3369 A72-45450

MILITARY AVIATION

Instrument landing systems specifications for civil and military aviation, suggesting replacement type development based on existing configurations

12 p1842 A72-27110

Ejection injuries from U.S. Navy aircraft, discussing statistical distribution of vertebral, shoulder, arm/hand, knee, leg, head and face injuries

12 p1774 A72-28273

Statistical survey of barosinusitis incidence in U.S. Navy flying personnel during altitude chamber training, discussing diagnostic methods and clinical management

12 p1765 A72-28274

USAF V-51R noise protector earplugs modification to allow for pressure equalization during aircraft climb and descent

12 p1774 A72-28276

Central nervous system symptoms and simple bends in gas decompression sickness cases during USAF operational flying

12 p1775 A72-28283

Change in Naval Flight Officer operational role due to modern equipment design in weapons systems, sensors and navigational aids

12 p1775 A72-28291

USAF aircraft accidents/incidents involving aircrewmembers with medical waiver on various visual, cardiopulmonary and other chronic pathological and psychiatric conditions

12 p1776 A72-28315

Review of aeromedical records for grounding USAF flying personnel during 1956-1970, noting increased age factor effect

12 p1776 A72-28316

Air Force Global Weather Central computer simulation of specific aircraft flight plans, using update weather information for specified route profile

13 p1924 A72-28873

Flight psychiatry in NATO countries, discussing organization and facilities with respect to military and civil aviation

13 p1911 A72-29858

Military aviation navigator training, discussing objectives, methods, instructors and equipment

15 p2272 A72-32207

USAF Academy air navigation training program, discussing systems development course and descriptive and applied astronomy

15 p2272 A72-32210

Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria

15 p2338 A72-32215

Time parameter in military air operations, discussing weapon systems R and D, all-weather capa-

bility, communications, reliability and maintainability, manpower training, etc

15 p2339 A72-32453

ATC system organization in terms of optimal operating conditions for civil and military airspace users, discussing navigation systems, human factors, equipment reliability, etc

15 p2272 A72-32455

An air traffic controller's view on area navigation and ATS requirements related thereto

21 p3081 A72-40299

Midair collision prevention for Army aircraft

24 p3422 A72-44645

Simulation procedure for mission and maintenance planning of an air force wing

24 p3365 A72-44663

Naval helicopters applications to search and rescue, ASW, ground support and other roles, considering reliability and maintenance

24 p3365 A72-44685

Keratoconus incidence in USAF flying personnel, discussing diagnosis, etiology and therapy

24 p3378 A72-45663

Paranasal sinus barotrauma in military flying personnel, discussing radiographic diagnostic methods and hypobaric test procedures for flight status restoration time determination

24 p3378 A72-45664

MILITARY HELICOPTERS

General aviation patient transportation, investigating military helicopter airlift performance

01 p0022 A72-11298

Flight testing of Army helicopters terrain following and/or avoidance systems concepts for operational capability, performance and cost evaluation

05 p0686 A72-16658

Rotary wing aircraft design features and performance, discussing military and civilian helicopters and future developments

05 p0612 A72-16734

Attack helicopters engine failure problems, discussing flight test results in transition from powered high speed flight to autorotational flight

08 p1108 A72-21011

Combat jet helicopter maneuverability, considering aircraft flying characteristics, pilot capability, flight configuration, altitude and load factor

10 p1421 A72-24923

Hydrofluidic stability augmentation system (HYSAS) development for military helicopters, discussing test program and technical feasibility

12 p1754 A72-27407

Military transport helicopter optimum secondary power system, considering onboard auxiliary power unit, electric or hydraulic engine start system, environmental control, etc

17 p2494 A72-34480

Flight test evaluation of a forward looking radar system for search and rescue applications

17 p2490 A72-34499

Critical review of Mil-F-83300 V/STOL flying qualities specifications as applied to helicopter design and missions, suggesting inappropriateness for Navy helicopters

17 p2490 A72-34503

Helicopter/ship dynamic interface testing for launch and recovery capabilities under sea environment conditions, discussing visual landing aids, wind, visibility and ship motions

17 p2491 A72-34505

Results of the reliability and maintainability demonstration of the OH-58A light observation helicopter

17 p2491 A72-34507

Hydrofluidic stability augmentation system for U.S. Army helicopters, emphasizing reliability, maintainability and reduced cost

17 p2492 A72-34928

Low level light TV camera with Si intensifier target tube for fire control system to improve AH-1G Cobra helicopter night reconnaissance and attack capabilities

17 p2557 A72-35555

Naval helicopters applications to search and rescue, ASW, ground support and other roles, considering reliability and maintenance

24 p3365 A72-44685

MILITARY PSYCHIATRY

U MILITARY PSYCHOLOGY

MILITARY PSYCHOLOGY

Wake-sleep cycle importance in military service, considering drugs effects on wakefulness

07 p0922 A72-20383

California psychological inventory as a predictor of success in the Naval flight program

24 p3377 A72-45655

MILITARY SPACECRAFT

NT MIDAS SATELLITES

Earth satellite legal aspects under space treaty, discussing orbiting military remote sensing devices, national obligations and security issues

07 p1105 A72-19476

Electric propulsion systems assessment for military spacecraft, discussing ion, colloid, pulsed and quasi-steady plasma thrusters

[AIAA PAPER 72-493]

11 p1711 A72-26217

Reliability role in commercial and military telecommunication satellite system planning, discussing economic factors, earth station redundancies and maintenance, spare levels and control systems
13 p2051 A72-28352

Military geostationary communication satellite Skynet 2 subsystems design development and testing
13 p2052 A72-29856

Satellites for long distance telecommunications, noting ATIS, Intelsat, military systems and Canadian domestic system Amik
14 p2085 A72-30363

Error correcting codes applied to satellite channels.
21 p3018 A72-40874

MILITARY TECHNOLOGY

Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport
01 p0003 A72-10302

Paratroop type parachutes breathing oscillations and stability characteristics, using high speed cinematography and kinetheodolites to track during steady state descent
01 p0004 A72-10307

Tactical optical ground communication systems, discussing use of GaAs and carbon dioxide lasers and ultrawideband data links
04 p0485 A72-14482

Missile systems of U.S., U.S.S.R. and other nations, discussing ground-to-ground, ground-to-air, air-to-ground and air-to-air missiles
05 p0728 A72-16740

Military pulsed range finder design involving modularity, cooling, optical system and solid state receiver. [CLEA PAPER 9.2]
07 p0942 A72-19384

Leads and booster explosives replacements for tetryl, discussing military specifications and safety criteria of various newly developed compounds and mixtures
08 p1220 A72-20770

Soviet book on radio receiver design covering military applications, bandwidth requirements, network synthesis and AM, FM, SSB, Doppler, phase metering, PCM and radar equipment
11 p1604 A72-26045

Military R and D organization questionnaires data analysis to obtain relationship between job productivity, satisfaction, ability, age and salary
12 p1891 A72-27655

Worldwide satellite navigation system for precise position and velocity of military aircraft, ships and ground vehicles
13 p1996 A72-28758

U.S. Army missile systems rocket motors life cycle reliability programs based on propellant laboratory analyses, motors static tests and field firings statistical evaluation
14 p2146 A72-30759

Navy program for composites technology development in aircraft structures, discussing design, reliability and cost
[ASME PAPER 72-DE-3] 14 p2073 A72-30860

Materials characteristics relevance for USAF technology, discussing processing conditions, environment simulation, real time techniques, ultrasonic and X ray inspection methods, etc
16 p2404 A72-32823

Military system and equipment Level of Repair optimization for minimum life cycle costs, considering weapon systems deployment, operation level and mobility requirements
16 p2482 A72-33793

Book on man machine system experiments covering ATC, air defense, logistics organizations, space flight, battlefield operation, police dispatching, communications, etc
16 p2359 A72-33796

Dc power supply for military electronics applications, describing circuit design for well regulated and filtered output dc voltage from various ac dc sources
17 p2497 A72-34708

Flight tests correlation with mathematical models to predict electro-optical viewing systems capability for military missions
17 p2557 A72-35553

USAF development of electrostatic gyros for inertial air navigation, noting flight tests and associated airborne digital computer
17 p2578 A72-35558

Aircraft FDM and TDM systems, considering signal processing, cable requirements and applications to aircraft weapon systems and telemetry
[SAE AIR 1207] 18 p2692 A72-36529

Department of Defense Reliability Analysis Center.
18 p2676 A72-37131

Defense Documentation Center independent R and D data bank for evolution and maintenance of creative technology oriented defense industry
21 p3132 A72-40974

The design and operation of the Air Force Flight Dynamics Laboratory Ballistic Impact Test Facility. [AIAA PAPER 72-998]
21 p3041 A72-41584

Effects of projectile damage on critical helicopter components.
24 p3454 A72-44609

The problems of reliability growth and demonstration with military electronics.
24 p3384 A72-44670

Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft.
24 p3368 A72-44745

MILKY WAY GALAXY

Milky Way Galaxy spiral structure determination, presenting arms anatomy, gas and star kinetics and radio astronomy data
03 p0417 A72-13104

He production from H to maintain Galactic luminosity, discussing interstellar gas enrichment
03 p0419 A72-13116

Cepheid variables compared for Milky Way and Small and Large Magellanic Clouds, discussing amplitudes, period-luminosity relations and light curves
03 p0425 A72-13255

Magellanic Clouds cepheid variables compared to Milky Way cepheids, discussing evolution tracks
03 p0425 A72-13261

Magellanic Clouds and Galactic nucleosynthesis from chemical composition
03 p0426 A72-13263

Stellar orbits in galactic symmetry plane, using gravitational potential theories
03 p0434 A72-13496

Galactic plane 100 micron survey, detecting continuum radio sources, bright and dark nebula and IR stars
04 p0570 A72-14524

High resolution Galactic center interferometric observations at 5 GHz, showing compact components in Sagittarius A
04 p0580 A72-15511

Large aperture ratio wide field VCN-UV camera exploration of night sky, presenting isophotes of zodiacal light and Milky Way
04 p0525 A72-15685

Gravitational intensification due to focusing of massive rotating gravitational wave emitting oblate object in galactic center
06 p0880 A72-17887

Cyclonic turbulence generation of large scale magnetic field of Galaxy, using Steenbeck differential rotation mechanism
06 p0883 A72-18017

High radial velocity neutral hydrogen outside galactic plane, noting inability to correlate with radio spurs, absorption and emission regions
07 p1069 A72-19082

Faint planetary nebulae classification and measurement in northern Milky Way between Cygnus and Perseus from Schmidt camera survey
07 p1070 A72-19084

Stellar extinction and genesis with Galaxy, discussing L1 role in nucleosynthesis and degenerate star structure theory
07 p1073 A72-19427

Stellar dynamical and density wave theories for spiral pattern persistence in Galaxy with differential rotation
07 p1074 A72-19430

Long period Cepheids in galactic spherical component, confirming two groups according to spectral characteristics
09 p1384 A72-22514

Precessional corrections, solar motion and galactic rotation determination from proper motions by maximum likelihood method, taking into account stars visual magnitude
09 p1391 A72-23535

Cassiopeia region galactic structure study via objective prism, cataloging stars radial velocities and distances
09 p1391 A72-23539

Galactic center radio, IR, X ray, gamma ray and molecular spectral features, considering models for source component emission mechanisms and energy densities
10 p1533 A72-23887

Spectral indications of activity in galactic center, discussing radio source Sagittarius A and expanding hydrogen clouds
10 p1541 A72-24568

Galactic plane distance effect on interstellar reddening in north galactic polar cap, discussing line blanketing and surface gravity role
10 p1546 A72-24834

Satellite photometric observation of diffuse celestial sources such as Milky Way, zodiacal light and gegenschein
10 p1546 A72-24863

Gravitational wave antenna response to linear, mixed and randomly polarized sources, discussing Weber signals galactic nucleus source
11 p1717 A72-25882

Gravitational wave observation interpretations, discussing Weber theory of galactic nucleus isotropic radiation and synchrotron radiation sources in terms of black hole existence
11 p1717 A72-25883

Cyclonic turbulence generation of large scale magnetic field of Galaxy, using Steenbeck differential rotation mechanism
11 p1718 A72-25953

Diffuse galactic light observation, suggesting emanation from discrete sources
11 p1720 A72-26113

Galactic center region neutral hydrogen self absorbing cold cloud, discussing matter, spatial and radial velocity distributions and cloud temperature and density
12 p1867 A72-27208

Hydromagnetic wave scattering of high energy cosmic rays in highly ionized interstellar gas to confine cosmic rays to Milky Way
12 p1864 A72-27745

Milky Way spiral structure and star distribution, discussing photometric methods
12 p1875 A72-27967

Interstellar gas motions and density and temperature variations, discussing galactic structure, radiation fields and cosmic ray effects
13 p2038 A72-29009

Stellar population in Galactic nuclear bulge, considering interstellar reddening and variable stars
13 p2038 A72-29011

Habing galactic model extension and confirmation from observations of high velocity neutral hydrogen clouds and outer spiral arm structure
13 p2048 A72-29817

Galactic astronomy - Conference, State University of New York, Stony Brook, June-July 1968, covering Galactic structure, spiral shape theories, star migration, etc
14 p2152 A72-30486

Galactic spiral arm hypothesis for positive velocity neutral hydrogen clouds above galactic plane, surveying distribution
14 p2158 A72-30732

Spiral structure density wave model of inner parts of Galaxy, calculating density, potential and velocity perturbation and dispersion in gas and stars
14 p2161 A72-30914

Relativistic theory gravitational analogue to electromagnetic radiation, suggesting black hole collision as galactic center flux mechanism
15 p2273 A72-31286

Spherical mirror camera for southern galaxy planar photometry, discussing photographic calibration methods
15 p2306 A72-31597

Lunar orbital photography of astronomical and geophysical phenomena during Apollo 15 flight, noting solar corona and Milky Way
15 p2236 A72-31974

Distribution of high velocity hydrogen near Galactic center due to free-free emission from exploding hot gas or cosmic ray pressure
15 p2317 A72-32756

Book on stellar astronomy covering H-R diagram, solar system, nuclear energy sources, Milky Way Galaxy, quasars, cosmology, planetology, etc
16 p2453 A72-33275

The gravitational acceleration perpendicular to the galactic plane.
17 p2603 A72-34441

On the kinematic distribution of galactic neutral hydrogen.
17 p2606 A72-34572

High energy gamma radiation from the galactic centre region.
18 p2722 A72-36998

Central galactic plane, interstellar medium and spiral arm conditions for star formation in Milky Way
19 p2855 A72-37249

Kinematics of faint M stars near the north galactic pole, and the mass density in the solar neighbourhood.
19 p2855 A72-37341

Soft X-ray emission from intergalactic gas in the neighbourhood of the Galaxy.
19 p2855 A72-37345

Extragalactic origin of the transient X-ray sources.
19 p2856 A72-37502

Pulsars as stellar population, considering physical models, pulse emission radiation mechanism and use in galaxy studies
19 p2865 A72-38476

Density wave detection by local hydrogen gas and young stars radial velocities comparison with Lin theory of galactic spiral structure
19 p2866 A72-38494

Galactic structure at galactic longitudes from 230 to 355 deg on the basis of photoelectric UVB H beta photometry of 55 southern open star clusters
19 p2867 A72-38513

Interstellar gas electron temperature determination from recombination line spectra observations along galactic ridge
20 p2971 A72-39858

Expanding ring in Galactic center from analysis of microwave spectroscopic data, measuring expansion and rotation velocities
20 p2972 A72-39860

Structure and motions in the Carina spiral feature.
20 p2973 A72-39880

- A study of the interstellar extinction in the Carina-Centaurus region. 20 p2973 A72-39881
- Circular polarisation measurements of the zodiacal light. 20 p2920 A72-39899
- Wide-angle photographs of the southern sky as a contribution to the planar photometry of the Galaxy. 21 p3102 A72-40275
- Nebulae of the Southern Milky Way - An atlas. 21 p3114 A72-41847
- Red variables in globular clusters, in the galactic centre and in the solar neighbourhood. 22 p3222 A72-42135
- Spiral and halo structure of our galaxy on the basis of optical distance determinations. 22 p3222 A72-42136
- Estimate for the frequency of novae in the Andromeda Nebula and our Galaxy. 23 p3333 A72-43229
- Cross correlated interstellar scintillation patterns of circumpolar pulsar PSR 0329+54 at 408 MHz, interpreting transverse velocities in Galaxy. 23 p3334 A72-43253
- Calculation of stellar and diffuse radiation for a plane-parallel semiinfinite model of the Galaxy. 23 p3338 A72-44027
- On the possible existence of different interstellar extinction laws in the spiral arms and in the field regions. 24 p3438 A72-44836
- An H I velocity-longitude diagram for the Southern Milky Way. 24 p3438 A72-44845
- Emission and absorption spectral behavior observation by millimeter radio telescopes for molecules in interstellar space of Milky Way galaxy spiral arms. 24 p3439 A72-44905
- Spectral classification of stars with respect to non-broadened low-dispersion spectra. III - Classification method and criteria. 24 p3447 A72-45678
- ### MILLIMETER WAVES
- Rain droplet size distribution effects on microwave attenuation at millimeter wavelengths, comparing calculation with measurement. 01 p0027 A72-10406
- Synchronized multiple microwave oscillators power and noise characteristics at microwave and millimeter frequencies, discussing magic T configuration. 01 p0037 A72-10648
- Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements. 02 p0223 A72-11409
- Millimeter wave sky noise temperature measurement with 16 and 35 GHz radiometers, including antenna loss and rain and cloud effects. 02 p0171 A72-11665
- Low loss reactive wall rectangular and circular waveguides with periodic dielectric structures for millimeter wave and high power applications. 02 p0190 A72-11678
- Low loss wideband circular wave guide bend characteristics and branching filters for millimeter wave large capacity digital transmission. 02 p0190 A72-11682
- Dielectric surface waveguides for millimeter and optical wavelength applications, discussing technologies, materials, fabrication and measurement. 02 p0191 A72-11683
- Beam guides for optical and millimeter wave communication, discussing optical pipelines and iris, lens and reflector waveguides. 02 p0191 A72-11684
- Mm and sub mm wave generation by semiconductor devices, showing power vs frequency plots for IMPATT, Gunn and LSA oscillator diodes. 02 p0268 A72-11694
- Narrow beam millimeter wave radiometer with real-time TV display for terrain mapping, analyzing contours blurring caused by antenna pattern and output integration. 02 p0191 A72-11821
- Solid state components for millimeter wave systems, including IMPATT diode power sources and amplifiers, P-I-N diode modulators and switches and Schottky barrier mixers. 02 p0192 A72-12183
- ATS-F satellite short and long term data processing, detailing millimeter wave propagation experiment. 02 p0177 A72-12384
- Millimeter wave pulse signal transmission path length modulator with P-I-N diode switch, discussing system design and experimental results. 02 p0196 A72-12798
- Solar active region properties at millimeter wavelengths, suggesting chromospheric magnetic field measurement possibility from polarization. 03 p0432 A72-13348
- High speed digital communication at millimeter wavelengths, discussing system requirements, digital computer use, transmission data rate and equipment development. 04 p0485 A72-14481
- Point contact Josephson junctions arrangement for millimeter and submillimeter region, showing mechanical stability. 04 p0561 A72-14919
- Millimeter and submillimeter wave applications, considering environment remote sensing, radar communication, tracking and imagery, wideband communication, plasma diagnostics and spectroscopy. 04 p0550 A72-15592
- CW 100 GHz Si IMPATT diodes with nearly abrupt junctions, discussing output power and dc and small signal analyses. 04 p0502 A72-15594
- Millimeter and submillimeter wave molecular beam masers amplification principles and Doppler and collisional broadening elimination capability. 04 p0532 A72-15597
- Electron tube with Fabry-Perot cavity resonator with grooved and smooth mirrors for millimeter and submillimeter wave generation. 04 p0503 A72-15598
- Horn lens antennas for millimeter wave radiometric applications, discussing medium gain polystyrene lens design to obtain low peak sidelobes. 04 p0503 A72-15608
- Millimeter wave and laser space-to-space communication links comparison, considering ehf system based on size, weight, power consumption and communication parameters calculations. 04 p0493 A72-15609
- Radar and radiometric millimeter wave signal systems in near earth environment for remote detection purposes. 04 p0494 A72-15610
- Combined FM CW radar and radiometer at millimeter wavelengths, investigating objects signatures measurement. 04 p0494 A72-15611
- Visible displays of millimeter and submillimeter wave images for all-weather ground surveillance, discussing image conversion [AD-736578]. 04 p0494 A72-15612
- Vibration-rotation double resonance transitions in symmetrical top molecules in millimeter range under chopped laser radiation. 04 p0532 A72-15615
- Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field. 05 p0625 A72-15826
- Dispersion characteristics of laminated cylindrical dielectric waveguide in millimeter band, noting application to permittivity measurement. 05 p0627 A72-16341
- CW millimeter wave power generation with spiraling electron beams, investigating energy spread effects on performance limitation. 05 p0636 A72-16363
- Partial solar eclipse observation at 9 mm wavelength on 25 February 1971, noting limb brightening. 05 p0718 A72-16509
- Venus 8.2 mm radio emission dependence on sun-light phase angle, considering implications regarding day/night atmospheric temperature variations. 06 p0884 A72-18031
- Total atmospheric water vapor content from solar radiation absorption observation at millimeter wavelengths. 06 p0817 A72-18091
- Millimeter wave GaAs avalanche diode oscillator processing on plated Cu heat sinking block resulting in epitaxially grown p-n junctions. 06 p0788 A72-18467
- GaAs and Si millimeter wave Schottky barrier mixer diodes fabrication, noting low noise broadband mixer/preamp. 06 p0790 A72-18486
- Ring-plane type slow wave structure hot tested near 3 cm for scale modeling in mm range. 07 p0938 A72-18854
- Total flux and polarization of solar S-component at mm wavelengths, obtaining radio source optical depth by evaluation of QL propagation based on magnetoionic theory. 07 p1069 A72-19080
- Millimeter wave techniques for laser stabilization to frequency standards, using phase locked HCN laser and high resolution IR spectrometer [CLEA PAPER 6,7]. 07 p1004 A72-19383
- Millimeter and submillimeter band frequency conversion in nonlinear bulk n-InSb semiconductor at liquid helium temperature. 08 p1140 A72-21060
- Superheterodyne radiometers for millimeter and submillimeter waves, using Mach-Zehnder interferometer frequency mixer for parasitic signal suppression. 08 p1140 A72-21265
- Optimal output power of avalanche transit time diode oscillator in millimeter band as function of electric field and diode geometry. 08 p1141 A72-21378
- Magnetic spectra measurement of powdered hexagonal ferrites in millimeter wavelength range during grinding and after heat treatment. 08 p1218 A72-21875
- Aperture filtering effects on amplitude scintillation power spectra of paraboloid radio telescope over millimeter wave propagation path. 08 p1136 A72-21982
- Calibrator for millimeter wave horn radiometers, using radiation from load immersed in liquid nitrogen. 09 p1310 A72-22652
- Millimeter wave pumped X band balanced diode type parametric amplifier using GaAs Schottky barrier varactors for operation at room temperature. 09 p1289 A72-23417
- Venus 8.2 mm radio emission dependence on sun-light phase angle, considering implications for day/night atmospheric temperature variations. 11 p1719 A72-25967
- Short term frequency instability in mm wave reflex klystrons, obtaining rms frequency drift. 11 p1605 A72-26319
- Theoretical and measured rainfall attenuation of millimeter waves, correlating attenuation coefficients, rain rate and drop size distributions. 12 p1785 A72-27803
- Ground terminals spatial diversity for earth satellite mm wave communication systems to avoid attenuations by rainfall. 13 p1989 A72-28810
- Solar radial brightness distribution, using mm observations during 7 March 1970 solar eclipse for improved angular resolution. 13 p2042 A72-29531
- Solar radio emission map at 1.2 mm wavelength obtained with He cooled Ge bolometer connected radio telescope. 13 p2046 A72-29716
- Upper atmosphere mm emission spectrum from aircraft observation, comparing with rocket and ground based data. 13 p1923 A72-29963
- Millimeter wave scattering at turbulent density discontinuities in plasma from electrodeless inductive discharge. 14 p2136 A72-30174
- Millimeter and submillimeter radiation produced by diffraction phenomena during charged particle passage near periodic structures, discussing physical properties and oscillator development. 14 p2088 A72-30598
- Millimeter wave third harmonic generation and frequency multiplication in n-type InSb at 77 K. 14 p2142 A72-30799
- High resolution atmospheric millimeter wave spectrum of attenuated solar radiation from sea level observations, using Fourier type IR techniques. 15 p2224 A72-31671
- Lunar eclipse observations at millimeter wavelengths on 10 February 1971, determining surface cooling for Copernicus, Mare Serenitatis and highland region. 15 p2311 A72-32087
- Millimeter band open cavity resonator using trihedral reflector diffraction grating and inclination control for mode selection. 16 p2364 A72-33491
- Plasma electron density measurements using flat plate and semifocal millimeter wave Fabry-Perot interferometers [AIAA PAPER 72-672]. 16 p2440 A72-34067
- A millimeter wave receiving antenna with an omnidirectional or directional scannable azimuth pattern and a directional vertical pattern. 17 p2525 A72-34364
- Polarization measurements of radio sources at 9.55-mm wavelength. 17 p2603 A72-34439
- Magnetoelastic amplitude modulator of millimeter waves based on an antiferromagnetic/hematite/. 17 p2529 A72-34842
- Slowly varying component spectrum of the solar radio emission at millimetre wavelengths. 17 p2617 A72-35708
- Composite quasi-optical-broad waveguide transmission lines for millimeter and submillimeter waves with spectrum phase correction. 18 p2664 A72-36106
- Absorption of the 4- to 6-millimeter wavelength band in the atmosphere. 18 p2689 A72-36961
- Millimeter-wave solid-state exciter-modulator-amplifier module for gigabit data-rate. 19 p2771 A72-37267
- Effect of magnetic field on the performance of millimeter-wave detectors using bulk InSb. 19 p2772 A72-37570
- Radio astronomical observations in the 0.9 to 1.5 mm band using a 22-m radio telescope with an n-InSb receiver. 19 p2858 A72-37803

Structure of solar active zones in the mm wave range 19 p2866 A72-38496

A development study for a 65-m radio telescope for the mm wave range 19 p2804 A72-38510

A variation-iteration technique for the design of wall-impedance waveguides. 20 p2903 A72-39429

Spherical reflector as possible antenna for millimeter wave astronomy, discussing feed design for spherical aberration corrections 21 p3029 A72-40519

Dielectric coating effects on millimeter wave diffraction pattern of gratings, noting sharp anomalous dips in transmission intensity for P and S polarizations 21 p3031 A72-40604

Experimental investigation of a millimeter-wavelength n-InSb frequency converter at 4.2 K 21 p3016 A72-40786

The 20 and 30 GHz communications system for the ATSF millimeter wave experiment. 21 p3019 A72-40882

Atmospheric transmissivity in the 49- to 72-GHz band - Analysis and laboratory measurements. 21 p3021 A72-40906

Millimeter absorption features corresponding with H alpha dark filaments on disk and emissive regions in solar prominences, discussing electron temperatures and densities 22 p3221 A72-42035

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field 23 p3319 A72-43434

Radiation patterns and structural design of two mirror millimeter wave Cassegrain antennas with horn radiator 23 p3271 A72-43778

The quiet sun brightness distributions at millimeter wavelengths and chromospheric inhomogeneities. 24 p3438 A72-44840

MILLING [MACHINING]

Co and carbide containing alloys, investigating milling and sintering temperature effects on technological and physical properties 06 p0829 A72-17831

Milling, band grinding, final manual polishing and tumbler polishing effects on fatigue life and surface finish of steel compressor blades 06 p0824 A72-18651

WC powder milling and sintering, investigating strain and dislocation density effects on behavior by scanning electron microscope 08 p1176 A72-21440

The effect of mixed milling on the sintering of WC-Co hardmetals. 22 p3188 A72-41975

MINERAL OILS

Free and dissolved water contents determination in light petroleum products by modified Karl Fischer method using ethylene glycol solvent mixture 05 p0702 A72-16669

Lubricating mixtures of mineral oil with inorganic phosphates, hydroxides and sulfides, discussing lubrication mechanism and physical properties 06 p0837 A72-18603

Remote sensing of oil pollution on water by laser induced fluorescence, using airborne spectroscopy [AIAA PAPER 71-1076] 07 p0981 A72-18822

Properties of pyrolytic oil hydrogenated aromatic fraction, noting suitability for jet fuels applications 14 p2145 A72-31075

MINERALOGY

Chondrules occurrence in iron meteorite, investigating bulk chemical composition and mineral properties 01 p0127 A72-10294

Mineralogical and chemical compositions of Markovka chondrite 02 p0280 A72-12284

Electron microprobe analysis of plagioclase points and pyroxene grains of Apollo 15415 anorthositic genesis rock 02 p0282 A72-12411

Impact breccias in carbonate rocks of Sierra Madera /Texas/, investigating microstructure, chemical composition, petrography and mineralogy 05 p0654 A72-16038

Mineralogical and petrologic study of lunar anorthosite slide 15415,18 06 p0888 A72-18271

Texture, mineralogy and metamorphic history of lunar anorthosite 15415 06 p0889 A72-18272

Meteorite genesis and formation processes from composition characteristics, discussing age determination methods and mineralogical classifications 07 p1082 A72-20302

Opaque mineralogy of Luna 16 soil sample, emphasizing compositional variations of Fe-Ti-Cr-Al-Mg spinels 09 p1380 A72-22261

Luna 16 rock sample B-1 petrology, mineralogy and chemistry, noting fine grained ophitic basalt nature 09 p1380 A72-22262

Crystallization sequence, petrology and mineralogy of Apollo 12 basalt sample 12009 10 p1537 A72-24160

Zirconium rich metal oxides mineral group in Apollo 14 and 15 lunar rocks from feldspar-phryic basalt and pyroxene ferrobasalt, noting optical and chemical properties 11 p1717 A72-25868

Electron spectroscopy for chemical analysis /ESCA/ technique for nondestructive elemental analysis of lunar and terrestrial minerals 16 p2454 A72-33447

Lunar rock 12052 euhedral clinopyroxenes composed of honey yellow pigeonite cores overgrown by dark brown augite 16 p2454 A72-33448

Study by Mossbauer spectrometry of the iron distribution in mineralogical fractions separated from lunar rocks brought back by Apollo 12 17 p2607 A72-34917

Rock size, mineralogy and fines size distribution in lunar regolith 17 p2615 A72-35683

Petrologic comparisons of lunar terra materials. 17 p2615 A72-35684

Mineralogy, bulk chemistry and sample shape and mass of Seoni /India/ chondrite, observing extensive recrystallization 19 p2858 A72-37860

Mineralogical and chemical researches on L-chondrites - Girenti. 19 p2858 A72-37862

Ordinary chondrite chemical and mineralogical properties establishment during solar system formation, noting fractionation events 20 p2969 A72-39334

Phenocryst fabric in lunar basalt sample 12052 from the Ocean of Storms. 21 p3106 A72-41115

Changes in the phase composition of metal-glass materials depending on the sintering temperature 21 p3073 A72-41370

Czech book - Moldavites and tektites. 21 p3111 A72-41536

IR reflectance [or emittance] remote spectroscopy of mineral particulate surfaces, discussing particle size, surface roughness, porosity and mixing ratios effects 22 p3178 A72-42526

Mineralogy, petrology and chemistry of lunar rock 12039. 23 p3339 A72-44127

Minerals discovered in meteorites, tabulating formula and occurrence and plagioclase composition 23 p3262 A72-44132

Book on Apollo 11 lunar rocks and minerals covering mineralogy, petrology, chemical and isotope analyses, bioscience, organic geochemistry, physical properties and measurements 01 p0122 A72-10001

Visible and near IR reflectance spectra of soil mineralized trees, using multispectral photographic filters 02 p0209 A72-11789

Apollo 12 lunar crystalline rock and fines magnetic properties measurement, noting magnetic minerals composition 02 p0278 A72-12026

Amino acid-phosphate anhydrides polymerization in presence of clay minerals, noting reactions superposition and monomer diffusion 04 p0483 A72-14774

Geochemistry of lunar opaque minerals in Apollo 14 crystalline rocks, including FeNi metal, ilmenite, spinels, schreibersite, baddeleyite, fayalite and tranquillityite 10 p1538 A72-24164

U, Th, Pb and rare earth elements abundances and Pb 207/Pb 206 ages of Apollo lunar minerals by ion microprobe mass analysis 12 p1866 A72-27114

U bearing phase zirkelite in Apollo 12 and 14 lunar rocks, using electron microprobe 15 p2303 A72-31303

Chain reaction mechanisms of fuel combustion in presence of metal oxides for ores reduction application 16 p2461 A72-34163

Lunar rock 14310 whitlockite richness in rare earth elements relative to associated apatite 16 p2454 A72-33446

Diopside and Cr-Zr-armalcolite occurrence on moon from Apollo 14166.6 fines, using petrographic and electron microprobe examination 16 p2461 A72-34163

Craters formed in mineral dust by hypervelocity microparticles. 20 p2970 A72-39474

Osarsite, a new osmium-ruthenium sulfarsenide from California. 22 p3172 A72-42450

Shock damaged zircon, corundum, rutile, monazite and quartz crystalline inclusions in Muong Nong-type indochinite /tektite/, noting production from detrital sedimentary materials as possible terrestrial origin 23 p3335 A72-43398

MINES

Chromosome aberrations and germination speedup in Soyuz 5 carried oat seeds, noting stimulating effect by preflight ethylenimine treatment 05 p0623 A72-16777

MINES [EXCAVATIONS]

Subsurface electromagnetic fields of current carrying cable line source on flat earth conducting half space, considering mine rescue operations 01 p0060 A72-10840

Measurements of gradients of gravity in mines. 21 p3048 A72-40500

MINIATURE ELECTRONIC EQUIPMENT

Miniaturized micropower biomultiplexer telemetry system utilizing hybrid techniques 02 p0192 A72-12133

Minority carrier diffusion effect on current gain in miniature bipolar transistors 04 p0498 A72-15132

Planar coax micropackaging of minicomputers for aircraft navigation and military systems, noting environmental tests 05 p0632 A72-15772

Noncontacting measurements by miniature CW Doppler radar with semiconductor microwave generator 09 p1285 A72-22691

Electron microscope interfaced computer for generating, registering and fabricating microelectronic device and circuit patterns 10 p1459 A72-23955

Miniaturized electronic system for controlling methanol concentration in aqueous electrolyte during fuel cell operation 12 p1755 A72-27723

Voltage controlled miniaturized n-type negative resistance circuit based on junction transistor and FET without internal bias 21 p3038 A72-40998

Miniaturized IC semiconductor device fabrication and failure under electrical load, using scanning electron microscope 21 p3035 A72-41492

Miniaturized piezoelectric transducer electronics versus charge amplifiers - A comparison of the two systems in vibration and pressure applications. 22 p3159 A72-42702

Minicomputers application for long distance data transmission, noting multipurpose use of VT 1010/B computer in satellite operation program 24 p3382 A72-45391

MINIATURIZATION

NT MICROMINIATURIZATION

NT SUBMINIATURIZATION

Dissipative loss effects on frequency response and miniaturization limits for minimum loss conditions in microwave filters with Chebyshev characteristics 05 p0638 A72-17188

Vacuum mold preparation and flexural testing of miniature carbon fiber reinforced composite specimens 11 p1671 A72-25468

Miniature high gain photomultiplier for pulse counting applications in close-packed arrays and mosaics for scintillation imaging and spectrum analyzing 15 p2234 A72-31534

Electric relay spring design for miniaturization, deriving relation between length and thickness to minimize fiber stress under constant contacting force 19 p2775 A72-38617

Dissipative loss effects on frequency response and miniaturization limits for minimum loss conditions in microwave filters with Chebyshev characteristics
19 p2775 A72-38624

Viscously damped miniature piezoresistive biaxial accelerometer for operation in single cavity to 250 F
22 p3179 A72-42701

MINIMA

An algorithm for determining the absolutely minimum form of weakly determined functions
23 p3308 A72-43349

MINIMAX TECHNIQUE

Optimal nonlinear discrete filters with finite memory for polynomial signals, discussing synthesis with aid of minimax method
04 p0505 A72-14998

Minimax solution of linear regulator problem, presenting algorithm for numerical computation
05 p0682 A72-16451

Minimax terminal state estimator existence and structure for linear discrete system, applying to stochastic pursuit evasion games of LQG variety
07 p1027 A72-19283

Programmed minimax target acquisition in rendezvous game between conflictingly controlled motion and given set of vectors
07 p1028 A72-19969

Minimax optimal control problems with incomplete information, using dynamic programming and phase space location measurements
07 p0963 A72-19970

Optimal strategies conditions for game problems in conflictingly controlled system, discussing minimax technique and Bellman equation solution
07 p1028 A72-19971

Minimax feedback control of uncertain discrete time dynamic systems with set description, using dynamic programming
10 p1456 A72-23806

Variational minimum principle for two elastic bodies frictionless contact, discussing Hertzian and non-Hertzian normal half space problems
11 p1690 A72-26667

Spacecraft motion stabilization about mass center and optimal angular velocity control using minimax technique
11 p1684 A72-26903

Binary PSK signals optimized on minimax and quadratic criteria, noting design of coders and decoders on shift registers with external logic
13 p1914 A72-28415

Numerical algorithm for guaranteed minimax [max-min] estimates for multistep decision making processes, using ALGOL 60
13 p1924 A72-28708

Algorithm for minimax parameter optimization by linear and quadratic programming with application to earth orbiting satellite orbital transfer
16 p2366 A72-33191

On behavior strategy solutions in two-person zero-sum finite extended games with imperfect information. I - A method for determination of minimally complex behavior strategy solutions.
17 p2574 A72-34343

Minimax method of optimizing electric circuits in the absence of constraints on the variable parameters
19 p2777 A72-37309

Frequency response optimization of electric filters, modulators and impedance matching circuits using minimax criterion, noting nonlinear programming sequence
19 p2771 A72-37310

Optimal avoidance control to transfer dynamic system from initial to terminal state in maximin distance problem
19 p2778 A72-37724

Minimax technique for direct synthesis of Kalman-like filter under large uncertainties in a priority statistics of plant and measurement noises
20 p2907 A72-39120

Programmed minimax target acquisition in rendezvous game between conflict controlled motion and given set of vectors
20 p2947 A72-40026

Minimax technique in optimal control problems with incomplete information on phase vector, using dynamic programming and system position measurement refinements
20 p2911 A72-40027

Optimal strategies conditions for game problems in conflict controlled system, discussing minimax technique and Bellman equation solution
20 p2947 A72-40028

Optimal minimax regulation of a dynamic system.
23 p3276 A72-43860

MINIMIZATION

U OPTIMIZATION

MINIMUM DRAG

Optimal airfoil profile for minimum drag in supersonic linearized gas flow with allowance for random fabrication errors and surface melting and sublimation at high temperatures
05 p0610 A72-17136

Minimum drag bodies of revolution in supersonic flow obtained by combining steepest descent method with integral flow model
14 p2069 A72-30231

Optimum nonslender bodies of revolution minimum drag in free molecular flow under integral constraints
15 p2180 A72-32395

V-wings and diamond ring-wings of minimum induced drag.
21 p2992 A72-41263

Determination of slender bodies of minimum total drag in hypersonic flow using Newton-Busemann pressure coefficient law.
23 p3249 A72-44267

MINKOWSKI SPACE

Gravitational field of bounded and isolated material in empty four-dimensional locally Minkowskian space-time, emphasizing radiation zone and gravitational waves
04 p0570 A72-14556

Quasar luminosity due to unique big bang in specific space-time region, considering Minkowskian geometry
06 p0878 A72-17669

Space-time model locally identical with Minkowski space in geometrical and causality features, implying non-Doppler red shift and cosmology
12 p1868 A72-27218

Minkowski space-times for impulsive gravitational waves, considering idealized plane fronted wave form and limiting case of Robinson-Trautman null spherically fronted wave
20 p2955 A72-40007

Interaction between weak gravitational waves and a gas
21 p3084 A72-40402

Hyperbolic space criterion for cosmological model based on axioms conforming to special and general theory of relativity, noting coordinate transformation
24 p3439 A72-44969

MINORITY CARRIERS

Minority carriers similarity in graphite natural single crystals and pyrolytic samples
01 p0114 A72-11035

Quantum oscillations of minority Fermi surface carriers as function of magnetic field in Hall effect and thermoelectric power in pressure-annealed pyrolytic graphite
02 p0268 A72-11673

Minority carriers localized surface distribution effect on helicon propagation modes reflectivity in semiconductor
03 p0402 A72-13797

Minority carrier diffusion effect on current gain in miniature bipolar transistors
04 p0498 A72-15132

One dimensional model for drift transistor at low injection level with minority carrier mobility dependence on impurity concentration
08 p1140 A72-21063

Validity range of applied voltage relationship to majority carrier current in Schottky diodes, assessing minority carrier current importance
10 p1448 A72-24108

Cosmic radiation effects and damage on solar cells, discussing shielding, stability improvement, space environments, minority carrier lifetime and photosensitivity spectral distribution
10 p1422 A72-24312

Minority carrier diffusion length in liquid epitaxial GaP, noting dependence on dominant impurity and substrate growth orientation from Schottky diode photocurrent technique
10 p1526 A72-24551

Recombination diffusion length of minority carriers in thin layer cuprous sulfide solar cells
12 p1856 A72-28011

Electron irradiation of Li doped Ge at low temperatures, measuring Hall effect and minority carriers diffusion length
12 p1857 A72-28055

Effects of junction depth on the radiation damage of silicon solar cells.
17 p2594 A72-34388

Determination of the parameters of minority carriers in semiconductor photocells from a spectral sensitivity curve
17 p2498 A72-35512

Stability of the dynamic parameters of a transistor in a small signal mode superimposed on a static injection mode
17 p2594 A72-35801

Short-circuit current in silicon solar cells - Dependence on cell parameters.
19 p2753 A72-37567

Minority-carrier trapping and the luminescence time response of semiconductors.
19 p2844 A72-37946

Cooling associated with minority carriers exclusion effect in semiconductors, discussing influence of electroconductivity and forbidden bandwidth
21 p3097 A72-40788

On the determination of minority carrier lifetime and surface recombination velocity from the transient response of MOS capacitors.
23 p3324 A72-44071

MINUTEMAN ICBM

Computerized bias optimization of telemetry timing accuracy applied to Minuteman system
02 p0174 A72-12144

Minuteman HERO / hazards of electromagnetic radiation to ordnance/ preflight testing, describing ordnance monitoring system based on fiber optic data links
08 p1220 A72-20767

Three solid stage Minuteman ICBM, discussing all-inertial guidance system, ablative reentry vehicle and management arrangements
23 p3358 A72-44357

MINUTEMAN MISSILES

U MINUTEMAN ICBM

MIRAGE 3 AIRCRAFT

Mirage 3E liquid propellant auxiliary rocket engine, discussing intercept performance enhancement
05 p0705 A72-16708

MIRRORS

NT TELESCOPES

NT FRESNEL REFLECTORS

NT MAGNETIC MIRRORS

NT PARABOLOID MIRRORS

NT ROTATING MIRRORS

Laser with convex-plane resonator and cross sectional variable mirror transmission, showing effective transverse mode selection and diffraction divergence
02 p0239 A72-12767

Spectrophotometer and tristimulus mask calorimeter using double grating mirror dispersion system
03 p0358 A72-13427

Enhanced He-Ne laser frequency and output power stabilities obtained by constructing mirror and gas discharge tube as integral unit
04 p0529 A72-14603

Gas lasers mode locking, describing use of amplitude and frequency modulation and moving mirrors
04 p0530 A72-14738

Cast telescope mirror design with light metallic structures, examining possibilities offered by composite high modulus fiber structures
05 p0660 A72-15855

Cylindrical mirror electron energy analyzer, discussing theory, operation and design parameters [AD-745599]
07 p0984 A72-19322

Cer-Vit glass mirror replacement for AFCRL lunar laser observatory inverted Dall-Kirkham Cassegrain telescope, noting one arc sec resolution from wire and null optics tests
07 p0985 A72-19410

Anastigmatic optical systems with two high aperture ratio mirrors for UV image tubes
08 p1169 A72-21952

Ruby laser radiation modulation by mirror ultrasonic vibrations, discussing mechanism
09 p1326 A72-23681

Holographic correction of reflecting refracting telescope objective mirror deformation aberrations, noting interferometric attachment
10 p1479 A72-24049

Nonrectilinearity evaluation of twin wave Michelson interferometer mirror displacement
10 p1481 A72-24498

Optical mirrors contamination by condensation of outgassed spacecraft materials in vacuum under UV irradiation, describing test apparatus and results with various materials
11 p1637 A72-25208

Frequency stabilization of He-Ne two mode laser with internal mirror plasma tube
11 p1646 A72-25303

Double passed Michelson interferometer with polarizing beam splitter, quarter wave plates and cube corner reflectors to obtain immunity to mirror misalignment
11 p1635 A72-26500

Pulsed RF hydrogen plasma heating in mirror machine near ion cyclotron frequency and harmonics
11 p1699 A72-26703

Astronomical reflector telescope design, describing thermal effects on Al mirror and image intensification
12 p1807 A72-27428

Solid state laser resonator inhomogeneous dielectric and mirror elements matching effects on Q factor and output power
12 p1822 A72-27609

Approximate analytical method for diffraction losses and corrections to lower transverse modes and resonance condition in symmetrical stable cavities with round spherical mirrors
13 p1970 A72-29679

Spherical mirror camera for southern galaxy planar photometry, discussing photographic calibration methods
15 p2306 A72-31597

Operational tests of the AFCRL 152-cm telescope.
17 p2555 A72-35198

A gas laser with external mirrors generating non-polarized radiation
17 p2563 A72-35308

Determination of the quality of the reflective properties of mirrors used in photoelectric converter assemblies
17 p2498 A72-35510

- Holographic interferometer employing spherical mirrors. 18 p2692 A72-36699
- Excitation of a confocal spherical laser resonator. 19 p2810 A72-37403
- Reduction of the effect of mount deformation on the flexure of the telescope mirror 19 p2801 A72-37967
- Method for determining thermal strains in astronomical mirrors 19 p2801 A72-37968
- Scatterplate, artificial hologram, moire and null lens methods for aspheric mirror testing for space astronomy and laser communication 20 p2922 A72-39033
- Properties of metal interference filters for 1200-3000 A, of dichroic mirrors for 1700-3000 A and of multielectric narrow passband interference filters for 2000-3000 A 20 p2923 A72-39051
- Laser with convex-plane resonator and cross sectional variable mirror transmission, showing effective transverse mode selection and diffraction divergence 20 p2931 A72-39073
- Exit slit mirror system in rocket-borne scanning Ebert grating spectrometer, discussing imaging properties and required adjustments 21 p3053 A72-40606
- Investigation of optical inhomogeneities in large fields by holographic methods 22 p3176 A72-42106
- Spectrum of stimulated emission in a resonator with plane mirrors 22 p3184 A72-42154
- A large multiple mirror telescope (MMT) project. 22 p3180 A72-42988
- ## MIS [SEMICONDUCTORS]
- Metal-insulator-metal tunneling junction, calculating effect of localized impurity states in barrier on tunneling current 03 p0404 A72-12627
- MIS semiconductors radiation-hardening mechanisms and radiation effects on electrical properties and degradation 03 p0405 A72-12481
- Vacuum technology - Conference, Boston, October 1971 12 p1805 A72-27034
- Shielding metallic interlayer technique to protect MIS device against degradation due to ionizing radiation effects 13 p2023 A72-29836
- Binary information storage with bipolar transistors, tunnel diodes, MIS and glass semiconductors, considering Gunn effect devices application 20 p2905 A72-39425
- Apparatus for measurement and automatic graphical recording of variations of electrical characteristics of a metal-insulator-semiconducting structure 21 p3051 A72-40209
- Microelectronics developments and limitations, considering bipolar IC, metal-dielectric-semiconductor structures and optoelectronic communication links 21 p3033 A72-40940
- Measurement of substrate impurity profile of MIS field-effect transistors. 21 p3035 A72-41488
- ## MISALIGNMENT
- Misalignment effect on load distribution and fatigue life of tapered roller bearings [ASME PAPER 71-LUB-6] 02 p0234 A72-11532
- Control axes misalignment effects on spinning satellite wobble damping and requirements for active momentum exchange controllers 02 p0286 A72-12267
- Random filament misalignment effects on rigidity and tensile strength of unidirectional graphite composites under shear loading 08 p1192 A72-21681
- Random filament misalignment effect on reinforced composite strength, discussing bundle, tensile and shear strengths 11 p1673 A72-25486
- PSK signal cross-correlated receiver output SNR in presence of random misalignments with respect to carrier frequency and arrival signal time 13 p1921 A72-29283
- An automatic mass-trim system for spinning spacecraft. 20 p2977 A72-39603
- ## MISCIBILITY
- ## U SOLUBILITY
- ## MISFRES
- ## U FIRING (IGNITING)
- ## MISMATCH
- ## U IMPEDANCE MATCHING
- ## MISORIENTATION
- ## U MISALIGNMENT
- ## MISS DISTANCE
- Miss distance simulation for SAM guided by proportional navigation, using ASIM programming language for digital computer 03 p0386 A72-13611
- ## MISSILE ANTENNAS
- Unpredicted structural vibration in Comet and Electra aircraft, Graf Zeppelin dirigible, missile antennas, etc 02 p0292 A72-12002
- Electra method of plasma diagnosis around reentry vehicle head, describing onboard antennas impedance measurements and use of triple Langmuir probe mounted on telescopic mast 10 p1552 A72-24659
- ## MISSILE BODIES
- Finned missiles nonlinear rolling motion characteristics at large angles of attack, solving differential equation of motion by global nonlinear least squares method [AIAA PAPER 72-980] 22 p3134 A72-42333
- Periodicity in exothermic hypersonic flows about blunt projectiles. 24 p3463 A72-45035
- ## MISSILE CASES
- ## U MISSILE BODIES
- ## MISSILE COMPONENTS
- ## NT MISSILE ANTENNAS
- ## NT MISSILE BODIES
- Numerical control component insertion for missile IC electronic module, tabulating producer-user survey data for designs usage and machine tools 17 p2532 A72-35923
- ## MISSILE CONFIGURATIONS
- Minimum ballistic factor missile shapes. 19 p2746 A72-37522
- Generalized subharmonic response of a missile with slight configurational asymmetries. 22 p3134 A72-42339
- The effects of protuberances and scaling parameters on the aerodynamic characteristics of an air-to-air cruciform missile. [AIAA PAPER 72-969] 22 p3231 A72-42342
- Occurrence and inhibition of large yawing motions during high-incidence flight of slender missile configurations. [AIAA PAPER 72-968] 24 p3364 A72-45411
- ## MISSILE CONSTRUCTION
- ## U MISSILE STRUCTURES
- ## MISSILE CONTROL
- Three dimensional roll-controlled missile trajectory model for simple time-sharing digital or analog simulation, using wind-to-inertial axis transformation 01 p0130 A72-10964
- Harpoon air-sea/sea-sea all-weather missile system, describing two phase guidance system based on inertial platform initial phase and radar terminal guidance 07 p1085 A72-20312
- Hybrid computer simulation for telemetry data collected during missile flight control system model post-flight verification and hardware performance analysis 07 p1085 A72-20332
- Tactical missile controlled test vehicle flight test analysis by six-degree-of-freedom digital simulation 07 p1086 A72-20351
- Cassiopeia attitude control apparatus flight tests on Tacite rocket, describing aiming accuracy, target acquisition and gas consumption 15 p2321 A72-31824
- Rotating body linear dynamic control by complex transfer function approach with application to stability conditions for controlled gyro and homing missiles 17 p2583 A72-35528
- Gas bearing gyroscope for fluidic guidance and control system, satisfying missile and recoverable booster requirements 18 p2648 A72-36557
- Proportional navigation with a maneuvering target. 19 p2830 A72-37290
- Discrete optimal terminal control, with application to missile guidance. 19 p2780 A72-38257
- A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data. [AIAA PAPER 72-838] 20 p2950 A72-39089
- A new approach to a cruise navigator evaluation using sparse reference data. [AIAA PAPER 72-835] 20 p2950 A72-39092
- Computer simulation aided airborne attack missile launch system design for safe separation from carrier aircraft, discussing ejection and control systems design [AIAA PAPER 72-828] 20 p2951 A72-39099
- Virtual target steering - A unique air-to-surface missile targeting and guidance technique. [AIAA PAPER 72-826] 20 p2951 A72-39100
- Development and optimization of the SRAM guidance and control software. [AIAA PAPER 72-824] 20 p2951 A72-39102
- A simulation technique used in the development of a flight control system for an aerodynamically controlled missile. [AIAA PAPER 72-858] 20 p2976 A72-39136
- Aerodynamic characteristics of the slotted fin. 21 p2992 A72-41262
- ## MISSILE DEFENSE
- Parallel processing of ballistic missile defense radar data with PEPE. 24 p3383 A72-45667
- ## MISSILE DEFENSE SYSTEMS
- ## U MISSILE SYSTEMS
- ## MISSILE DESIGN
- Guided weapon systems design under cost restrictive conditions, discussing conceptual design planning and performance tradeoffs against cost and reliability 01 p0147 A72-11155
- Joint venture and international collaboration in guided weapon systems design, development and production, discussing cost sharing coordination between governments and contractors 01 p0147 A72-11156
- Missile destruct systems explosive transmission line manifolds, discussing designs for high reliability under severe environmental conditions 08 p1221 A72-20782
- Simply supported skew plates stability under combined loading, noting wing and tail design applications for high speed aircraft and missiles 10 p1555 A72-24196
- Minimum ballistic factor missile shapes. 19 p2746 A72-37522
- NASA ICBM/IRBM space program major management decisions and highlights concerning Atlas, Titan and Thor 23 p3358 A72-44356
- Three solid stage Minuteman ICBM, discussing all-inertial guidance system, ablative reentry vehicle and management arrangements 23 p3358 A72-44357
- ## MISSILE DETECTION
- ## NT RADAR DETECTION
- ## MISSILE ENGINE CASES

- ## MISSILE STRUCTURES
- Lightweight low pressure plastic hose assemblies in aircraft and missile petroleum base fuel and synthetic lubricating oil systems at 395-710 R and up to 200 psi [SAE ARP 1180] 01 p0006 A72-10388
- Data generation for engineering design with advanced composites. 17 p2571 A72-35653
- ## MISSILE SYSTEMS
- Missile systems of U.S., U.S.S.R. and other nations, discussing ground-to-ground, ground-to-air, air-to-ground and air-to-air missiles 05 p0728 A72-16740
- Earthbound missile propulsion systems, reviewing turbojet and ramjet engines, liquid, solid and hybrid propellant rocket engines and composite propulsion systems for special applications 05 p0705 A72-16741
- Polaris and Poseidon missile systems reliability assessment, discussing test programs, analytical techniques and data management 10 p1551 A72-24013
- U.S. Army missile systems rocket motors life cycle reliability programs based on propellant laboratory analyses, motors static tests and field firings statistical evaluation 14 p2146 A72-30759

Weapon system program choice for development in aerospace industry, considering cost effectiveness and ranking illustrated on stand-off tactical interdiction missiles

16 p2482 A72-33598

Computer simulation aided airborne attack missile launch system design for safe separation from carrier aircraft, discussing ejection and control systems design

[AIAA PAPER 72-828]

20 p2951 A72-39099

RF simulator design for missile systems performance tests, discussing requirements, target array and anechoic chamber

[AIAA PAPER 72-861]

20 p2911 A72-39125

MISSILE TEST LABORATORIES

U LABORATORIES

U MISSILE TESTS

MISSILE TEST RANGES

U MISSILE RANGES

MISSILE TESTS

Sidewall reflection induced boresight error in anechoic chamber used for missile test or simulation

08 p1141 A72-21421

Polaris and Poseidon missile systems reliability assessment, discussing test programs, analytical techniques and data management

10 p1551 A72-24013

RF simulator design for missile systems performance tests, discussing requirements, target array and anechoic chamber

[AIAA PAPER 72-861]

20 p2911 A72-39125

Evaluation of guided missile system in-service reliability.

24 p3448 A72-44658

MISSILE TRACKING

White Sands Missile Range and Range-Rate system design and verification to meet midcourse tracking requirements under severe target dynamics

08 p1133 A72-21402

Meteorological radar measurements, noting missile tracking radio interferometer noise due to stochastic refractive ray bending and associated multipath conditions

08 p1136 A72-21978

Lidar application to aircraft and missile tracking and ranging, describing results obtained with ONERA experimental equipment

10 p1436 A72-24655

Nonlinear filtering for random signals in statistically unknown noise, noting application to satellite orbit determination, aircraft navigation and missile tracking

11 p1611 A72-25986

Missile tracking laws for inhomogeneous linear-quadratic performance optimization

11 p1593 A72-25992

Refraction correction of rocket tracking radar inputs in near real time.

18 p2661 A72-36636

MISSILE TRAJECTORIES

Missile trajectory stochastic optimal control systems with fuel constraint by mean path deviation optimization

05 p0725 A72-16452

Hypersonic missile trail conductivity measurement on ballistic test stand, calculating electron concentration decrease

14 p2069 A72-30312

Proportional navigation with a maneuvering target.

19 p2830 A72-37290

Virtual target steering - A unique air-to-surface missile targeting and guidance technique.

[AIAA PAPER 72-826]

20 p2951 A72-39100

Free-flight projectiles aerodynamic characteristics and trajectories from yawsonde and radar track data, obtaining best fit coefficients by equations of motion numerical integration

[AIAA PAPER 72-978]

22 p3134 A72-42335

Hypersonic missile trail conductivity measurement on ballistic test stand, calculating electron concentration decrease

23 p3247 A72-43214

SAM-D control test vehicle trajectory planning and flight test analysis.

24 p3451 A72-45338

MISSILE VIBRATION

Vibration analysis of shaft supported low aspect ratio control surfaces on guided rockets, using Rayleigh-Ritz method

07 p1097 A72-20602

The effects of frictional drag on missile vibrations - A finite difference solution.

21 p3118 A72-40929

MISSILRY

U MISSILES

MISSILE PLANNING

Planetary quarantine cost and mission success constraints, formulating mathematical models for international goals and implementation systems

01 p0019 A72-10819

Delta and Thor/Agenda satellite launch vehicles, discussing costs, performance and mission planning based on booster design flexibility, incorporating computer programmed strapdown inertial guidance

01 p0136 A72-10953

Helios solar probe mission, describing project management, data reception system, trajectory monitoring and international cooperation

[DGLR PAPER 71-052]

02 p0284 A72-12720

German-American interplanetary solar probes Helios A and B mission characteristics and ground operations system, discussing planning phase

[DGLR PAPER 71-122]

02 p0285 A72-12741

Mission analysis of Helios spacecraft swingby past Venus to acquire extraelectric trajectory

[AIAA PAPER 72-50]

05 p0721 A72-16951

Earth resources technology satellite program, discussing mission requirements, payload, orbital characteristics, earth stations, data processing, system design and international features

[DGLR PAPER 71-139]

06 p0892 A72-18230

Regional communications coverage by controlled satellite constellations with low altitude circular orbits, developing analog or digital simulation method for mission planning

07 p0945 A72-19690

Skylab launch and mission program, describing modular components, crew training, checkout, launch and docking procedures, flight plan and crew working schedules, rescue and reentry procedures, etc

08 p1240 A72-21008

Linear programming procedure for efficiency and cost optimization in aerial survey mission

08 p1165 A72-21164

Skylab S-193 altimeter experimental mission objectives and spacecraft instrumentation, considering precision designs, oceanographic surface remote sensing and electromagnetic scattering measurement

09 p1306 A72-22317

Soviet interplanetary spacecraft Mars 2 and 3, describing design, mission objectives, onboard systems and instrumentation

09 p1395 A72-22974

Complex system mission worth optimization by redundancies discussing MISDGRAD computer program to evaluate cost-reliability for mission without maintenance

10 p1550 A72-23994

Design considerations and reliability analysis for long duration manned space missions, noting redundancy and inflight maintenance requirement

[AIAA PAPER 72-239]

10 p1487 A72-24446

Multimission capability of solar electric propulsion /SEP/ spacecraft, analyzing payload variations, propellant requirements, thrusting time limitations and throttling range

[AIAA PAPER 72-51]

10 p1552 A72-25125

Solar electric propulsion upper stage for multiple space exploration missions, discussing spacecraft performance, configurations and program plans

[AIAA PAPER 72-464]

11 p1709 A72-26199

Spacecraft nuclear electric propulsion system multimission performance evaluation, discussing launch mode and vehicle capability factors in system size selection

[AIAA PAPER 72-503]

11 p1685 A72-26226

Mars 1975 Viking mission profile, describing soft landing/orbiter probes and life detection experiments

12 p1877 A72-27687

German aeronomy research satellite Aeros mission objectives, discussing orbit layout, onboard equipment and operation

13 p2050 A72-30079

Mars 3 probe design and mission details, covering trajectory correction lander separation, engine start-up, aerodynamic braking and dust storm data

14 p2151 A72-30477

Deep space navigation requirements for interplanetary missions /1978-1990/

15 p2269 A72-32178

Resource allocation for minimum cost launch vehicle assignment to space missions, using network and dynamic programming algorithm

16 p2482 A72-33498

Long range planning for the development of space flight emergency systems.

17 p2620 A72-34428

Spacecraft rescue and recovery capabilities assessment based on anticipated U.S. space programs,

discussing mission design, recovery response, weather prediction and communications

17 p2620 A72-34429

Linear programming procedure for efficiency and cost optimization in aerial survey mission

17 p2521 A72-34455

Mission operations for unmanned nuclear electric propulsion outer planet exploration with a thermionic reactor spacecraft.

17 p2606 A72-34578

Lunar landing sites selection approach for Apollo missions, examining mission design requirements, launch vehicle considerations and lunar composition

19 p2857 A72-37700

Mission design and navigation for a 1977-1978 Venus Swingby/Mercury Orbiter.

[AIAA PAPER 72-941]

21 p3113 A72-41577

Two early missions to comets in 1977-1980 as precursors to more ambitious missions in 1984-1986, discussing exploration objectives and spacecraft configurations

23 p3340 A72-44352

Simulation procedure for mission and maintenance planning of an air force wing.

24 p3365 A72-44663

Space rescue operations planning requirements for 1980s manned satellite missions, discussing vehicles, equipment and various mission phases

24 p3449 A72-45129

Rescue operation capability for Skylab, discussing mission requirements, response time and vehicle configuration

24 p3449 A72-45132

Optimization of altitude and inclination change schedules during low thrust ascent to geosynchronous orbit.

24 p3440 A72-45150

NASA space science, exploration and applications plans and policies in view of space shuttle capabilities, emphasizing cost reduction

24 p3440 A72-45162

The Scout launch vehicle system.

24 p3450 A72-45165

Study of shuttle-based systems for high-energy planetary missions.

24 p3441 A72-45189

Design and operation objectives and constraints for German scientific spacecrafts, discussing orbital performance and reliability and quality control requirements

24 p3451 A72-45206

Mission objectives, hardware development and international cooperation aspects in U.S. future space flight programs, discussing space shuttle, space tug, Apollo 17 and Skylab

24 p3441 A72-45216

Mission strategy for combined comet-asteroid flybys.

[AIAA PAPER 72-939]

24 p3444 A72-45436

Mariner spacecraft Jupiter-Saturn 1977 gravity assisted flyby, discussing mission objectives and trajectory options

[AIAA PAPER 72-943]

24 p3444 A72-45438

Mariner Mars 1971 adaptive mission planning for scientific objectives flexibility based on planetary features observed, discussing plan change implementation

[AIAA PAPER 72-944]

24 p3444 A72-45439

Space astronomical observatory mission planning, analysis and operation and data utilization in terms of space and ground facility instruments and support subsystems

24 p3382 A72-45536

Unmanned OAO spacecraft series and experiment packages, discussing space astronomy scientific achievements, mission plans and space shuttle role

24 p3453 A72-45535

HEAO satellite to carry instruments required in high energy astrophysics missions, discussing observational objectives, configuration and experiments

24 p3453 A72-45538

MITOCHONDRIA

Normal and hypoxic myocardium mitochondrial metabolism process, studying electron transport system

Acute hypoxia of the myocardium - Ultrastructural changes.

17 p2501 A72-34978

Effect of chronic hypoxia on the kinetics of energy transformation in heart mitochondria.

17 p2502 A72-34993

Cytoplasmic heredity theory linking mitochondria origin to bacteria

19 p2758 A72-38549

Helium effect on cardiac mitochondria of mice.

19 p2759 A72-38712

Hypoxic acclimation effects on rats heart, liver and kidney mitochondria, measuring cytochrome oxidase and succinic dehydrogenase activities

22 p3144 A72-42673

MITOSIS

Mitotic index and aberrant mitose frequency in mice corneal and intestinal epithelial cells exposed to 50-630

MeV protons, estimating relative biological efficiency coefficients
[CERN-71-16] 02 p0161 A72-12055
Hypoxia effect on diurnal mitotic activity rhythm of marrow erythropoiesis system of guinea pigs in pressure chamber 05 p0618 A72-16631
Hyperoxia effect on kidney blood flow erythroproietic properties in rabbits, noting inhibiting effect on erythroblast cells mitotic activity in bone marrow culture 06 p0765 A72-18061
Pulsed and continuous rf irradiation effects on mitotic activity and chromosomal aberrations in regenerating rat liver tissue 07 p0917 A72-19443
Mitosis duration and mitotic activity diurnal rhythms in esophageal epithelium of rats given thyroxine 07 p0924 A72-20623

MIXED CRYSTALS
Optically pumped semiconductor lasers, discussing two photon absorption, emission from compounds and mixed crystals and smooth frequency variation 07 p1006 A72-20118
Two photon absorption of ruby laser emission in mixed zinc cadmium sulfide crystals, plotting laser light damping vs beam power density 09 p1322 A72-22212
Electronic configuration effect on wetting characteristics of hard material mixed crystals, investigating transition metals carbides, nitrides and oxides 11 p1665 A72-26873
Room temperature negative photoconductivity of p-type ZnTe-CdTe solid solutions mixed crystals within model with electron and hole capture levels 14 p2141 A72-30173

MIXED FLOW
U MULTIPHASE FLOW
MIXERS
Integrated receiver module for satellite transponders, including tunnel diode amplifier, Schottky barrier mixer, Gunn oscillator and low pass filter 01 p0041 A72-10701
GaAs and Si millimeter wave Schottky barrier mixer diodes fabrication, noting low noise broadband mixer/preamp 06 p0790 A72-18486

MIXING
NT COLLOIDING
NT DISSOLVING
NT HOMOGENIZING
NT LAMINAR MIXING
NT SIGNAL MIXING
NT SUSPENDING [MIXING]
NT TURBULENT MIXING
Fuel injection, mixing and combustion processes investigation in model cylindrical swirl chamber, describing flow visualization method for turbulence observation 15 p2297 A72-32297

MIXING CIRCUITS
Gunn diode microwave oscillator with moving reflector as self-excited mixer and load variation detector, analyzing performance by I-V characteristics model 04 p0497 A72-14713
Josephson junction as 100 GHz oscillator-mixer for heterodyne frequency conversion in millimeter and submillimeter regions, observing I-V characteristics 04 p0503 A72-15604
Computational model of post mixer spectra of periodic FM altimeters with area target returns, using radar scattering coefficient 05 p0637 A72-16568
Conversion coefficients of optical heterodyne receiver mixer for various amplitude-phase distributions of interfering signal 07 p1000 A72-19012
Parametric converter mixers with FM and AM signal and pump oscillator, investigating SNR behavior 07 p0956 A72-19658
Multiplication and mixing of electromagnetic waves in optically nonlinear anisotropic crystal media 07 p1007 A72-20119
Microwave frequency mixer using two inverted tunnel diodes in series connection 10 p1450 A72-24519
Input match conditions for broadband mixer conversion loss minimization, comparing optimization procedures 15 p2208 A72-32392
German monograph on microwave broadband tunnel diode mixers theory and design, taking into account parasitic elements as part of filter networks 16 p2368 A72-33507
Frequency conversion and limiter action for an angle-modulated wave with amplitude fluctuation in a half-wave linear mixer. 23 p3265 A72-44179

MIXING LENGTH FLOW THEORY
Turbulent boundary layer fluid dynamic behavior under transpiration and acceleration effects, presenting mean velocity profile data, skin friction and mixing length model [ASME PAPER 71-HT-F] 02 p0205 A72-12315
Two and three dimensional turbulent boundary layer development in incompressible and compressible flows, obtaining boundary layer equations similarity solutions via mixing length model [DGLR PAPER 71-066] 02 p0206 A72-12719
Turbulent mixing length formulation and velocity profiles for non-Newtonian power law fluids, determining friction factor for pipe flow at high Reynolds numbers 03 p0343 A72-14318
Finite difference schemes for surface and planetary boundary layer solutions using grid spacings proportional to mixing length and eddy viscosity 03 p0386 A72-14337
Planetary boundary layer mixing length flow hypothesis with dependence on Reynolds tangential stress permitting turbulent diffusion coefficient maximum values computation 04 p0519 A72-15458
Longitudinal curvature effects on laminar and turbulent boundary layer flows predicted from Navier-Stokes equations, noting mixing length assumption validity [ASME PAPER 71-WA/FE-37] 05 p0645 A72-15920
Pressure gradient effect on mixing length for equilibrium turbulent boundary layers, calculating eddy viscosity [AIAA PAPER 72-213] 05 p0651 A72-16855
Modified mixing length velocity distribution predictions for turbulent boundary layers with uniform mass transfer for low and high Reynolds numbers 08 p1150 A72-21622
Mixing length model for computing three dimensional turbulent boundary layers with small cross flow [ONERA, TP NO. 985] 09 p1294 A72-22817
Mixing length model for turbulent boundary layer in incompressible flow with fluid injection at wall, extending solution to compressible case 09 p1294 A72-22818
Two and three dimensional turbulent boundary layers integral calculation method, presenting similarity solutions based on extended mixing length model 10 p1469 A72-24653
Main sequence, red giant and white dwarf stars convective envelopes evolution, discussing mixing length theory inadequacy 10 p1545 A72-24826
Compressible turbulent boundary layer with arbitrary pressure gradients on solid or permeable surfaces, using extended mixing length theory 11 p1616 A72-25917
Book on turbulence covering Reynolds stresses, kinetic theory of gases, vorticity dynamics and mixing length models 11 p1616 A72-25925
Dynamic and thermal laminar compressible boundary layers on flat plate, noting interaction of two quasi-steady flows [ONERA, TP NO. 1068] 12 p1797 A72-27167
Turbulent mixing length velocity, temperature pulsations and viscous sublayer thickness in steady incompressible fluid flow past infinite plate 12 p1799 A72-28179
Massive red supergiants radial pulsations from adiabatic theory application to convective envelope models based on mixing length theory and H-He ionization zones 14 p2159 A72-30743
Mixing length theory derivation of barotropic planetary boundary layer profiles for geostrophic wind deviations, Reynolds stress, eddy viscosity and turbulent kinetic energy dissipation 15 p2224 A72-31675
Lower zero age main sequence star models uncertainties, comparing nonmixing and mixing length theory for various composition atmospheres 15 p2314 A72-32367
Turbulent mixing layers analytical and experimental mean velocity profiles, discussing Goetler eddy viscosity theory 16 p2374 A72-32832
Mixing processes of newly made elements in Galaxy, taking into account thermodynamics, galactic structure and nucleosynthesis parameters 18 p2727 A72-36732
Free gas jets turbulent mixing flow, considering development of submerged air jet with action of mechanical turbulence generator ahead of nozzle 20 p2913 A72-39367
A gradient method of expanding a group data handling method to new plants not studied by experiments 22 p3162 A72-42242
Mixing between stellar envelope and core in advanced phases of evolution. IV - Effect of super-adiabaticity in convective envelope. 23 p3335 A72-43486
Turbulent mixing of three plane isothermal jets with various velocity ratios, showing jet initial length shortening due to initial turbulence increase 23 p3279 A72-43657

Contributions to the study of turbulent flow in the vicinity of a flat wall 24 p3394 A72-45443

MIXTURES

NT SOLID SOLUTIONS
NT SOLID SUSPENSIONS
NT SOLUTIONS
Extremum search algorithm in multicomponent mixture optimization problem, using gradient method adaptation 13 p1924 A72-28460
Thermodynamic parameters and reacting multicomponent mixture composition, using state equations and energy conservation equations for reaction kinetics 21 p3013 A72-40989

MOBILE LOUNGES
Passenger transfer in airports with total separation between aircraft and permanent buildings for independent functioning, noting Dulles Airport mobile lounges 16 p2374 A72-34143

MOBILITY
NT ATOMIC MOBILITIES
NT ELECTRON MOBILITY
NT HOLE MOBILITY
NT IONIC MOBILITY
Elastic-plastic-viscous model for creep analysis of rheo-mobile materials, taking into account cracks and other defects 16 p2412 A72-34116
Measurement of mobility in high-resistivity semiconductor layers by the van Heek method 17 p2530 A72-35067

MODAL RESPONSE
Matrix formulation of free-free modal synthesis procedures for dynamic analysis of composite structural systems, giving flow charts [SAE PAPER 710783] 01 p0137 A72-10274
Direct-iterative eigensolution technique for simultaneous determination of structural system lowest frequencies and modal patterns, using reduced generalized coordinates and Stodola-Vianello method [SAE PAPER 710784] 01 p0137 A72-10275
Moving load effect on circular cylindrical shell in acoustic medium, discussing free axisymmetric vibration mode, shape and frequencies 02 p0290 A72-11627
Thick orthotropic off-axis laminated plates vibration equations solution, presenting natural frequencies spectra and modal functions 02 p0249 A72-11988
Dynamic analysis of shallow shells with doubly-curved triangular finite element, investigating natural frequencies, mode shapes and convergence 04 p0585 A72-14844
Free solid body kinetic moment vector effects on long period motion in resonant state during transition from rotational to somersaulting mode 06 p0849 A72-18699
Mode conversion effects on Gaussian laser beam in acousto-optical modulation for optical communications 07 p1004 A72-19225
Modal matching method evaluating planar surface waveguide junction transmission and reflection coefficients, comparing to integral equation method 07 p0955 A72-19253
Circular semiinfinite dielectric rod antenna, determining near- and far-zone fields, gain and beamwidth under excitation by HE/sub 11/ hybrid mode 07 p0956 A72-19782
Ideal liquid small oscillations natural frequencies and mode shapes in shell of revolution under weak gravitational field 08 p1148 A72-20956
Nonlinear modal response analysis of plate structures under random acoustic excitation, using finite element method and perturbation technique 08 p1245 A72-21607
Axisymmetric MHD equilibria with elliptical cross sections and flat current profile, obtaining criterion for stability to localized modes by numerical computation 09 p1361 A72-23047
Nonlinear microwave power amplifiers with IMPATT diodes in stable and injection locked modes, predicting behavior for comparison with experiment 10 p1451 A72-24592

Modal damping matrix off diagonal terms measurement in viscous damping exploration for dynamic analysis of linear structures 11 p1736 A72-25988

Radiation resistance for natural modes of rectangular panel from far field acoustic radiation energy distribution 11 p1687 A72-26059

Mode locked ruby laser having triangular ring cavity with four prisms to obtain reliable single-transverse-mode Q switched and normal operation 11 p1647 A72-26150

Ferrite loaded X band waveguide Y junctions eigenvalue frequency dependence measurement to identify modal resonance and arrange displacement for circulator operation 12 p1790 A72-27508

Structural evaluations and dynamic testing of solar electric propulsion components, surveying power conditioning panel modal frequencies by holographic interferometry technique [ALAA PAPER 72-442] 13 p1899 A72-28941

Zero moment stress effect on modal density spectrum of fluctuating thin cylindrical shells and cylindrical panels 15 p2327 A72-31737

Complex structures dynamic analysis by component mode technique, treating modal characteristics as random variables 15 p2331 A72-32555

Dynamically loaded elastic, viscous, plastic and rigid, viscoplastic structures instantaneous mode responses definitions and characterization by variational criteria with isometric constraints [ASME PAPER 72-APM-17] 17 p2628 A72-34799

Spectral theory of Taylor vortices. I - Structure of unstable modes. 19 p2788 A72-38550

Modal control theory for distributed parameter systems with multiengine assignment implemented for one dimensional diffusion equation 21 p3037 A72-40642

Linear distributed parameter systems modal analysis and design for low sensitivity optimal feedback control, using linear differential operators 21 p3037 A72-40646

Transient test techniques for modal survey testing. 22 p3163 A72-42698

Method of measuring modal characteristics of a structure subjected to a random excitation 22 p3242 A72-43095

MODE OF VIBRATION

U VIBRATION MODE

MODE SHAPES

U MODAL RESPONSE

MODE TRANSFORMERS

Thin film optical waveguides using magneto-optic GdIG as substrate, discussing computerized design for propagation mode converter efficiency [IEEE PAPER 3,6] 03 p0332 A72-13755

Read avalanche diode noise theory, showing carrier current modulation and lf and hf noise coupling in nonlinear regime 03 p0333 A72-13848

Mathematical expectation of angularly modulated signal in unsteady linear random noise, using Marchenko formula 07 p0939 A72-19020

Direct broadcasting communication satellites, discussing frequency allocation, modulation and data processing systems 07 p0948 A72-20266

Nonstationary and asymmetric cosmic ray modulation theory, discussing moving boundary problem and solar wind model with spherical singularity 07 p1065 A72-20643

Galactic cosmic ray modulation region evaluation from meteoroid orbit, velocity and radioactive dating data 07 p1065 A72-20644

Differential equation solution for plane self focusing and one dimensional self modulation of waves interacting in nonlinear media 08 p1209 A72-21718

Modulated electromagnetic wave transmission in dispersive medium with cubic nonlinearity, discussing solitary wave and instabilities in two-wave interaction 09 p1352 A72-23475

Technical standards for educational and community TV by satellite, considering picture quality requirement, modulations, SNR, threshold and fade margin, and channel width 10 p1435 A72-24034

Equivalent baseband and passband delay line and transversal equalizers derivation for linear modulation systems, obtaining relationship between tap coefficients 15 p2211 A72-31844

Digital communication system for analog signal transmission by digital modulation techniques, presenting detection schemes 15 p2201 A72-32565

Electron interferometer based on second order interference effects from laser modulated electron beam, applying quantum mechanical analysis 16 p2402 A72-33398

Grid modulation information encoding technique for image features extraction with simple Fourier filtering to replace heuristic method 16 p2365 A72-33752

A comparison of voice communication techniques for aeronautical and marine applications. 17 p2512 A72-34267

Rigidity dependence of cosmic ray modulation function at 2-13 Gv from C-130 aircraft survey flights data. 17 p2602 A72-35606

The theoretical amplification limit of modulation amplifiers with correlation detection 18 p2668 A72-37035

Uniqueness of the solution for identification of linear systems by the modulating function method 19 p2779 A72-38086

Acousto-optic modulation with coupled Gunn oscillator-piezoelectric structure. 20 p2960 A72-39702

Reductive perturbation method application to Vlasov equation governing one dimensional motion of collisionless plasmas, investigating nonlinear modulation of plasma waves 21 p3089 A72-40188

Effects of Landau damping on nonlinear wave modulation in plasma. 21 p3089 A72-40189

Temperature effects on modulation sensitivity and vibrational spectra in Gunn diode oscillators, suggesting frequency stability improvement method 21 p3032 A72-40792

Measurement of a radio signal nonenergetic parameter at high additive and modulation noise levels 21 p3022 A72-41117

External high-frequency modulation of an electron beam and heating of plasma ions in the case of beam-plasma instability in the magnetic trap 21 p3095 A72-41678

External high-frequency modulation of an ion beam and the absorption of beam-plasma instability oscillations in a plasma situated in a magnetic field of mirror configuration 21 p3095 A72-41683

Modulation transfer function for solar telescopes and atmospheric turbulence. 22 p3175 A72-42047

Influence of modulating /multiplicative/ noise on signal processing in a phased-array-antenna/receiver system 23 p3265 A72-44205

Nature of the long-term and short-term modulations of cosmic-ray intensity. 23 p3332 A72-44521

MODULATORS

VLF modulation/demodulation system performance prediction by atmospheric noise model, comparing results with measurements 01 p0025 A72-10327

Millimeter wave pulse signal transmission path length modulator with P-I-N diode switch, discussing system design and experimental results 02 p0196 A72-12798

Robust delta modulator configuration with minimal mean square error from signal statistics estimates, discussing design and performance by digital simulation 04 p0486 A72-14486

Gaussian envelope microwave pulse generation using absorption p-i-n diode modulator, predicting performance by digital simulation 04 p0498 A72-14718

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field 05 p0625 A72-15826

Optimum adaptive variable step size delta modulator-demodulator producing minimum error for Markov-Gaussian source 06 p0772 A72-17404

Performance characteristics of electro-optical material cadmium telluride for intracavity modulator of carbon dioxide lasers 07 p1003 A72-19223

T equivalent circuit magnetic modulator system with split excitation windings on four separate cores magnetized by HF source, noting null drift due to hysteresis 11 p1603 A72-25281

Three centimeter balanced ring modulator with carrier and sideband suppression using amplitude and phase relations 11 p1605 A72-26321

Microwave waveguide semiconductor modulator with p-n diode as control element, taking into account semiconductor control element conductivity change along waveguide wall 15 p2206 A72-31662

Liquid opticoacoustical modulator for laser radiation control operating on pulse amplitude modulated ultrasonic traveling waves with membrane partitions 16 p2400 A72-33081

Magnetoelastic amplitude modulator of millimeter waves based on an antiferromagnetic/hematite/ 17 p2529 A72-34842

Contactless relay circuits employing a branched-core magnetic modulator with second-harmonic output 19 p2771 A72-37302

Frequency response optimization of electric filters, modulators and impedance matching circuits using minimax criterion, noting nonlinear programming sequence 19 p2771 A72-37310

Space applications of Fabry-Perot modulator as alternative to mechanical devices, presenting optical and electrical performance data for different temperatures 21 p3055 A72-40824

Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint 21 p3018 A72-40866

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field 23 p3319 A72-43434

Local-oscillator-circuit optimisation for minimum distortion in double-balanced modulators. 23 p3270 A72-43603

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics 23 p3270 A72-43768

MODULATORS-DEMODULATORS

NT LUNAR MODULE

NT MICROMODULES

NT SERVICE MODULES

NT SPACECRAFT MODULES
 Modular fluidic elements in pneumatic logic system based on Coanda effect
 02 p0156 A72-11999

Flexible solar cell array module design technique, discussing electric welding procedure and equipment parameters effects on breaking strength and reliability
 12 p1758 A72-28036

Completely modular thermionic reactor ion propulsion system /trips/.
 18 p2721 A72-36177

MODULUS OF ELASTICITY
NT DYNAMIC MODULUS OF ELASTICITY
 Nondestructive determination of temperature dependence of elastic moduli of Al alloy and Ni and stainless steels by resonant frequency method
 01 p0084 A72-10518

High modulus high strength graphite composites for aerospace structures, noting materials, machining properties and applications
 [SME PAPER EM 71-191] 01 p0092 A72-10965

Stress waves propagation in woven-fabric composites, obtaining dynamic moduli and vibration damping coefficients by resonance technique
 [AD-736006] 02 p0291 A72-11984

Directional solidification of off-eutectic Al-Be alloy, obtaining ultimate strength, elastic modulus and concentration perturbation caused by freezing rate changes
 [AD-738212] 02 p0242 A72-11985

Ultrasonic measurement of orthotropic laminated composites elastic moduli, describing stress-strain response
 [AD-736007] 02 p0249 A72-11994

Hereditarily elastic body model with various tensile and compressive strengths, using elasticity theory with differing moduli
 02 p0294 A72-12429

Steels modulus of elasticity dependence on prestressing level produced by transverse and longitudinal tension
 03 p0371 A72-13462

Rigid and compliant walls longitudinal curvature and compliance effects on incompressible laminar boundary layer hydrodynamic stability
 03 p0342 A72-13854

Elastic plates with moduli of elasticity variable in tension and compression, deriving plane stress-strain relations
 03 p0451 A72-14118

Variable-modulus isotropic material finite elastic deformation, deriving two dimensional stress concentration by dual series expansion
 03 p0452 A72-14132

Heat treatable Al alloys tensile and compressive moduli of elasticities data from USAF programs, comparing to long-accepted typical values
 03 p0378 A72-14175

Elasticity theory relations for material with tension- and compression-varying modulus of elasticity, representing elastic strain energy as quadratic form potential
 04 p0586 A72-15009

German monograph on refractory materials elasticity modulus determination at elevated temperatures, describing device based on characteristic vibrations frequency relation to temperature
 04 p0510 A72-15698

First and second order moduli of elasticity for finitely deformed elastic materials, deriving acceleration waves propagation condition and growth equation
 05 p0735 A72-16028

Tensor calculus theorem application to elastic isotropic materials finite deformation, considering acceleration waves propagation and moduli of elasticity
 05 p0735 A72-16029

Preferred orientation effects on X ray stress measurement of Young modulus and Poisson ratio of Al alloy
 06 p0829 A72-17793

Crystallographic texture of Mo sheet, analyzing angular dependence of Young modulus
 06 p0832 A72-18366

Temperature dependent directional differences of modulus of elasticity of Mo sheet, using resonance technique
 06 p0833 A72-18632

High temperature tests of short time strength, hardness and moduli of elasticity of W-Mo alloys subject to plastic deformation and annealing
 06 p0833 A72-18633

Unidirectionally and cross rolled Ti alloys elastic properties anisotropy during cooling, discussing Young modulus distribution
 06 p0834 A72-18666

Elastic unbounded homogeneous layer separation from half plane under normal load pressures, determining contact area with base for elastic moduli relationships
 08 p1243 A72-21233

Carbon fibers elastic modulus inference from electrical conductivity inverse correlation with sound propagation rates
 08 p1191 A72-21498

Elastic filler rigidity effect on cylindrical glass fiber reinforced plastic shells stability loss and critical load value under axial compression
 08 p1245 A72-21503

Nondestructive determination of glass reinforced plastics normal elastic and shear moduli and strength characteristics by vibrational, pulsed and acoustic methods
 08 p1195 A72-21773

Contact problem of semiinfinite plate deflection on linearly deformed half space with depth dependent elasticity modulus
 08 p1247 A72-21808

Transient strain in axially impacted hollow non-homogeneous cone with axially varying modulus of elasticity and density
 10 p1555 A72-24195

Linear equations relating elastic compliance coefficients of anisotropic two-phase fiber reinforced composites
 10 p1556 A72-24262

Cross-ply laminates effective elastic moduli relations based on generalized Hooke's law
 10 p1556 A72-24264

Linear anisotropic composites with periodic spatial structure, determining elastic moduli and electrical conductivity variational bounds
 10 p1556 A72-24346

Random elastic modulus variability of building materials test pieces under compression and tensile loads
 10 p1557 A72-24403

Ring assembly with hinged cross section and uniform radial and transverse loads, determining deflection dependence on bulkheads and rigidity of supports
 [AIAA PAPER 72-355] 11 p1729 A72-25384

Young modulus of TiC-Co and TiC-Ni hard composites as function of volumetric fraction, using bending tests
 11 p1660 A72-26487

Longitudinal propagation of elastic disturbance in conical rod, discussing Young modulus, material density and periodic and impulsive stress
 11 p1737 A72-26589

Nb-Ti alloy elasticity modulus temperature dependence, considering foreign atoms interactions with dislocations
 11 p1662 A72-26737

Screw dislocation with free surface interaction in inhomogeneous elastic medium with continuously varying elastic moduli
 12 p1881 A72-27253

Electronic system for continuous automatic recording of internal friction and modulus of elasticity at high temperatures
 12 p1807 A72-27462

Stress relaxation in anelastic materials, calculating spectra, complex modulus of elasticity and internal friction
 12 p1883 A72-27541

Particulate fillers bulk effects on epoxy resin compositions flexural, compressive and tensile strengths and moduli
 12 p1834 A72-28089

Laplace transformation for mechanical response of piezoelectric composite transducer under action of thermal field and electric potential, noting time dependent modulus of elasticity
 13 p1955 A72-28621

Normal modulus of elasticity of filamentary silicon nitride crystals with three orientations, calculating elastic plibilities
 13 p1984 A72-30117

Porous cellular structure materials, investigating porosity effects on modulus of elasticity based on central monoporous model
 14 p2165 A72-30433

High modulus composites structural design applications, considering fatigue performance vs cost
 [ASME PAPER 72-DE-24] 14 p2167 A72-30866

Finite element method with compliance equations determining energy release rates and stress intensity factors for complex crack configurations and loadings
 14 p2168 A72-30908

Dynamic elastic moduli of diffusion saturated high melting point nitrides, carbides and borides of Ti, Zr, Nb, W, Mo and Ta
 15 p2252 A72-31199

Upper and lower bounds for complex elastic moduli of composite materials with isotropic linear viscoelastic phases behaving as homogeneous isotropic materials
 16 p2468 A72-33199

Approximate method for composite materials effective elastic moduli determination from uniform stress-strain field or as second derivative of average strain energy
 17 p2625 A72-34322

Plane problem of thermal creep at high temperatures
 17 p2636 A72-34473

Microinhomogeneous elastic media with moduli tensor as coordinate random function, investigating stress and strain tensors
 18 p2735 A72-36668

A photoelastic material with variable modulus of elasticity.
 19 p2822 A72-37731

Variations as a function of the temperature of the moduli of elasticity of monocrystalline P-type GaSb
 19 p2846 A72-38542

Determination of the elastic modulus of the left-ventricle myocardium with the aid of X-ray kymography
 20 p2893 A72-38940

Young and shear moduli of binary Fe base alloys as functions of composition and temperature by ultrasonic pulse echo technique
 20 p2937 A72-39287

Contribution of the invar anomaly and the elinvar effect to the formation of the thermal stability of the modulus of elasticity of iron-nickel invars
 21 p3068 A72-40952

Dependence of linear elasticity solutions on the elastic constants. II - Dependence on the shear modulus in elastostatics.
 21 p3119 A72-41106

Connexions between the moduli for anisotropic elastic materials.
 21 p3119 A72-41107

Dynamic inelastic properties of materials. I - Damping characteristics of fiber composites. II - Representation of time dependent characteristics of metals.
 [ICAS PAPER 72-28] 21 p3069 A72-41153

Stress differentiation procedure for screen technique studies in dynamic photoelasticity, giving expressions for elastic modulus and Poisson coefficient
 21 p3123 A72-41363

The modulus of elasticity of plastic materials at stress times between .001 and 10,000,000 seconds
 22 p3197 A72-42859

The use of a torsion machine to measure the shear strength and modulus of unidirectional carbon fibre reinforced plastic composites.
 23 p3306 A72-43562

Useful range of a mechanical impedance technique for measurement of dynamic properties of materials.
 23 p3294 A72-44126

Compliance calibrations of a contoured and face grooved double cantilever beam specimen.
 24 p3413 A72-44817

Steels modulus of elasticity dependence on prestressing level produced by transverse and longitudinal tension
 24 p3413 A72-44937

Crystallographic texture of sheet Mo alloys, analyzing angular dependence of Young modulus
 24 p3416 A72-45752

MOHR CIRCLES

U FRACTURE MECHANICS

MOIRE EFFECTS

Noncoherent moire contour-sum contour-difference and vibration analysis of three dimensional objects using grid projection and offset camera
 03 p0358 A72-13438

Elastic-plastic strain measurement on flat steel surfaces by moire gratings, using electroluminescent source and crossing jig
 06 p0818 A72-18323

Transient high speed deformations analysis of annealed Al under impact loads by three dimensional moire fringe techniques
 07 p0983 A72-19131

Double beam Mach-Zehnder interferometer, discussing optical element imperfection induced degradation elimination by Moire technique
 07 p0985 A72-19406

Experimental determination of torsional stresses in rod from moire patterns, describing facility and procedure
 07 p1091 A72-19762

Vibration measurement based on moire pattern fringes motion due to line gratings respective displacement, noting high accuracy and resolution
 09 p1315 A72-23388

Real time hologram-moire interferometry for visualization of turbulence phenomena in liquid flow through cylindrical pipe
 11 p1629 A72-25317

Retina visual acuity testing by zero and first order moire fringes, using square-wave amplitude gratings
 12 p1772 A72-27953

Shearing stresses in rod under torsion, using Prandtl membrane analogy and moire interference fringes
 13 p2053 A72-28397

Sensitivity limits in moire picture application to holographic interferometry
 13 p1958 A72-29514

Experimental development by holography of three dimensional moire fringes for very large deformations study
 13 p1960 A72-29781

Composite materials stress analysis techniques, discussing strain gages, photoelastic coatings moire and holographic applications
 [ASME PAPER 72-DE-6] 14 p2167 A72-30861

Principle of control of aspherical surfaces by holography and moires
 17 p2554 A72-34912

Photoelasticity, holography, moire and strain gage methods in European experimental mechanics research

18 p2733 A72-36357

Holographic interferometry analyzed from the point of view of moire patterns.

18 p2690 A72-36362

Flat beam linear vibration analysis from mode measurement and moire technique, applying to prototype turbine compressor blade

18 p2734 A72-36375

Use of a projected-ruling moire method for vibration and deflection measurements of three-dimensional structures.

19 p2799 A72-37629

Scatterplate, artificial hologram, moire and null lens methods for aspheric mirror testing for space astronomy and laser communication

20 p2922 A72-39033

Moire screens coded with pseudo-random sequences.

23 p3289 A72-43892

Mapping of large dynamic deflections of structures.

24 p3454 A72-44606

Metallic solid material transient displacement field measurement by moire fringe photographic recording technique with computer program for data analysis

24 p3401 A72-44611

MOISTURE

Surface moisture effect on dielectric properties of ultrafine barium titanate particulates of varying particle size

[ACSPAPER 7-E-69F] 02 p0269 A72-12416

Electrical measurement of moisture effects on adhesive bond strength, insulation resistance and hydrophilicity of cast epoxy and organosilicon adhesives

12 p1833 A72-27449

MOISTURE CONTENT

NT ATMOSPHERIC MOISTURE

Topmost soil layer moisture content measurement by reflected visible light polarization enhancement

02 p0209 A72-11794

Surface temperature measurement by microwave radiometry, noting sensitivity reduction due to moisture effects for resolution cell size targets

02 p0214 A72-11867

Soil surface moisture content and temperature profile determination by remote microwave sensing

02 p0214 A72-11871

Free and dissolved water contents determination in light petroleum products by modified Karl Fischer method using ethylene glycol solvent mixture

05 p0702 A72-16669

Gas dynamic laser technology advances, discussing water content, temperature and Na effects and nozzle design

[AIAA PAPER 72-143] 05 p0669 A72-16895

White thick layer anodic zirconium oxide water content determination by volumetric and thermogravimetric analysis of heated samples

05 p0667 A72-17051

Specific moisture contents in stratosphere over European Soviet Union from balloon measurements

06 p0806 A72-17734

Broadband S band radar application to quantitative analysis of severe storms, calculating liquid water content

06 p0843 A72-18442

Epoxy and polyester resin fatigue fracture tests for cyclic stress and moisture effects

08 p1192 A72-21680

Slag powdery material moisture content determination by absolute pyridine adsorption method of moisture extraction

12 p1813 A72-27450

Remote measurement of cloud ice and water content from Raman scattering of ground based laser signal

12 p1840 A72-27547

Cloud statistics stratification by climatological regime, month and time of day, extending simulation to drop size distributions and liquid water content

13 p1989 A72-28808

Coastal and inland fog microphysical features, discussing visibility, liquid water content, drop size distributions and haze droplet concentrations

13 p1991 A72-28842

Fluctuations of water vapour content in the troposphere as derived from interferometric observations of celestial radio sources.

17 p2545 A72-34690

Multispectral photography in soil moisture determination and soil series differentiation.

18 p2686 A72-36320

Cloud liquid water content measurement via digital radar system, presenting two dimensional display of storm system characteristics

21 p3077 A72-40250

MOISTURE DETECTORS

U MOISTURE METERS

MOISTURE METERS

NT HYGROMETERS

NT PSYCHROMETERS

Radiometric method for atmospheric moisture data retrieval above radiosonde hygrometer cut-off or during malfunction, inferring average moisture decrease through radiative transfer equation

09 p1307 A72-22441

Gage for solids and liquids moisture content measurement based on phase shift of UHF electromagnetic wave propagating through tested material, noting specimen thickness optimization

12 p1807 A72-27466

MOL [ORBITAL LABORATORIES]

U MANNED ORBITAL LABORATORIES

MOLDAVITE

Czech book - Moldavites and tektites.

21 p3111 A72-41536

MOLDING MATERIALS

Epoxy- and polyimide-graphite composites electrical dissipation factor and capacitance measurements as guide to molding quality, describing equipment

02 p0250 A72-12609

Explosives injection molding into stainless steel, aluminum, plastic and rubber tubes, considering applications to fuse and detonation transfer trains and small warheads

08 p1221 A72-20781

Thermoplastic polypropylene sandwich molds stiffness variation with time, noting three point bending and creep tests

11 p1673 A72-25550

Thermoplastic materials casting procedures to mold high melting point metal compound powders

11 p1645 A72-26861

Pure metal unidirectional solidification as function of liquid superheat, metal/mold heat transfer coefficient and mold material

16 p2399 A72-33804

Effects of modification and additional elements on the solidification of Al-Si alloy - Studies on the solidification of Al-Si alloys in a shell mold. II.

21 p3067 A72-40937

MOLECULAR ABSORPTION

Molecular continuity relationship relating discrete absorption oscillator strengths to photodissociation cross sections

01 p0104 A72-11115

Boundary effects on light incoherent scattering by dispersing molecules, using quantum statistics

04 p0490 A72-15398

Atmospheric molecular and aerosol absorption effects on submillimeter radio wave propagation using laser, BWT and liquid He receiver-transmitter devices

04 p0551 A72-15607

Molecular sieve adsorption sampler for stratospheric carbon 14 measurements from balloon collected carbon dioxide samples

06 p0807 A72-17824

Molecular gases absorption coefficients measurement in extreme UV, analyzing photoionization curves in energy range far beyond threshold

09 p1356 A72-22829

Intracavity gas cell for carbon monoxide laser oscillations restriction to lines coincident with atmospheric transmission bands, noting absorption by atmospheric water vapor

12 p1823 A72-27837

Luminous molecular absorption cross sections in aeronomy, considering photodissociation, actinic solar radiation attenuation and UV to IR analysis

14 p2097 A72-30135

Nonlinear radiation absorption and resonance molecular fluorescence of saturated diatomic Rb vapors excited by Q switched ruby laser

14 p2109 A72-30353

IR absorption coefficients of oxygen atom and molecule fields due to free-free electron transfers at specific elastic scattering cross sections

15 p2274 A72-31409

Molecular oxygen concentrations from solar Lyman alpha radiation absorption profile in mesosphere, using rocket-borne nitric oxide filled ion chamber

15 p2230 A72-32264

Molecular adsorption on semiconducting surfaces, discussing conditions for formation of local surface levels in forbidden gap

15 p2296 A72-32760

Molecular absorption of microwaves by atmospheric impurity gases ozone, carbon monoxide and nitrous oxide up to 20 km

16 p2364 A72-33483

Atmospheric transmissivity in the 49- to 72-GHz band - Analysis and laboratory measurements.

21 p3021 A72-40906

Calculation of the radiation of two plane isothermal layers of carbon dioxide and/or water vapor

22 p3242 A72-41884

Nonlinear molecular absorption cell for frequency stabilization of carbon dioxide laser radiation, discussing stability limit dependence on amplification, absorptivity and Q value

22 p3184 A72-42102

Total absorption cross sections of several gases of aeronomic interest at 584 Å.

22 p3152 A72-42419

Slab band absorptance for molecular gas radiation.

23 p3316 A72-44327

MOLECULAR BEAMS

Oscillation transient in molecular Q switched ammonia beam maser following Stark voltage pulse in resonant cavity

01 p0081 A72-11186

Ammonia beam maser with electret focuser providing semipermanent molecular separation under high vacuum for use in relaxation studies

01 p0081 A72-11187

Supersonic oxygen molecules nozzle beam reactive scattering on barium atoms, detailing exothermic reaction energy in barium oxide formation

02 p0170 A72-11912

Quantum mechanical analysis of detuning in cascaded cavity molecular beam masers

03 p0368 A72-13747

Molecular beams - Conference, Cannes, June-July 1971

03 p0392 A72-14051

Skimmer design optimization for maximum nozzle beam intensity yields in hypersonic flow

03 p0362 A72-14052

Nonsteady molecular beam approximation for strong shock structure problem, considering Boltzmann equation

03 p0399 A72-14053

Apparatus for emission spectroscopic studies on high density molecular jets excited by slow electron bombardment

03 p0392 A72-14054

Spatial distribution of gaseous nitrogen molecules scattered from metal surface, estimating beam capture coefficient

03 p0392 A72-14056

Digital computer simulation of rarefied gas molecular beam-rough metal surface interaction

03 p0392 A72-14057

Impulsive spatial interaction model between monoenergetic molecular beam and rough isotropic rigid metal surface in free molecule flow

03 p0392 A72-14058

Effective cross sections of ion collisions with gaseous target and argon atoms collision with argon target by molecular beam intensity attenuation method

03 p0392 A72-14060

Random method solution of Boltzmann equation for pseudoshock/relaxation mixing/, applying to random collisions of molecular beams

04 p0551 A72-14519

Millimeter and submillimeter wave molecular beam masers amplification principles and Doppler and collisional broadening elimination capability

04 p0532 A72-15597

Neutral unexcited gas atoms or molecules scattering at solid surfaces, interpreting molecular beam experimental results in terms of classical dynamics

07 p0969 A72-20065

Gas-surface interactions study by molecular beam technique, discussing measurement and target surface conditions control methods

07 p0969 A72-20069

Molecular beam continuum model for calculation of hypersonic flow past flat plate at zero incidence angle [AD-746387]

08 p1254 A72-21609

Molecular beam velocity distribution measurement from integral quantity, obtaining precise results in noisy environment and probability density function by numerical deconvolution

09 p1356 A72-22793

Adiabatic transition experimental implementation by molecular beam irradiating field frequency variation

10 p1491 A72-24210

Low energy elastic scattering cross section measurements for helium-nitrogen system, using two collimated aerodynamically intensified crossed molecular beams

10 p1515 A72-24338

Radiative displacement of molecular beam sidebands by spatiotemporal modulation of irradiating RF field

10 p1492 A72-24858

Elastic, inelastic and reactive scattering experiments with low, high and intermediate energy molecular beams

11 p1691 A72-25675

Molecular beams - Conference, Cannes, France, June-July 1971

16 p2429 A72-33051

Atomic and molecular beams fluid dynamic applications in rarefied gas flows exemplified by satellite drag coefficient measurement

16 p2429 A72-33052

Supersonic molecular jet improvement via expansion chamber residual gas pressure reduction and nozzle stagnation pressure increase

16 p2429 A72-33053

Gas mixtures separation in Kantrowitz-Grey underexpanded molecular jet background as function of rarefaction degree, using electron beam fluorescence technique for concentration measurements

16 p2429 A72-33054

Thermal molecular jets mixing produced by Knudsen effusion from porous wall, obtaining Boltzmann

equation approximate solution by moment method via assumed distribution function

16 p2429 A72-33055

Velocity distributions of molecular beams evaporating into vacuum from polycrystalline hexachlorobenzene and sulfur surfaces

16 p2429 A72-33058

High resolution spectroscopic studies of high density molecular beam production and emission spectrum excitation, using Ebert-Fastie vacuum spectrometer

16 p2430 A72-33059

High and medium energy molecular beam detection for large dispersion angle collision cross sections determination, using photographic plates

16 p2389 A72-33060

Time-of-flight measurements of molecular and atomic beams produced by cooled microwave discharge source, using hydrogen, helium, argon and nitrogen

16 p2430 A72-33061

Perturbations effects on plane symmetry supersonic molecular beam intensity as function of nozzle-skimmer geometry and nozzle pressures

16 p2430 A72-33062

Spatial distribution of nitrogen molecular beam scattering from solid nitrogen surface as function of beam energy and incidence angle

16 p2430 A72-33063

Aluminum oxide reproducible layers plastic deformability or microhardness from molecular beam scattering distribution

16 p2430 A72-33064

Face centered solid crystal cell spatial distribution effect on body surface-reflected molecular beam intensity distribution

16 p2430 A72-33066

Secondary electron emission and molecule passage during in-depth interaction of high energy molecular beam with thin gold foil

16 p2430 A72-33067

Oxygen chemisorption effect on rare gas beams reflection from refractory metals polycrystalline surfaces, interpreting experimental results by simple correlation model

16 p2431 A72-33068

Aerodynamic coefficients determination from momentum and energy exchange between low velocity molecular jet and solid surfaces, describing time of flight measurement technique

16 p2390 A72-33069

Differential collision cross sections for argon pairs with neon, methane and ethane at angular region of two crossed nozzle molecular beams

16 p2431 A72-33070

Nitrogen molecular beam rotational excitation by collision with argon beam, describing electron beam spectrographic experimental method and numerical simulation technique

16 p2431 A72-33071

Fcc in thin films and bcc in thick vacuum condensates deposited from Nb molecular beams obtained by evaporation and condensation in mass spectrometer

16 p2407 A72-33528

Velocity distribution and Mach number in a supersonic molecular beam of plane symmetry

17 p2486 A72-35423

Hydrogen and nitrogen desorption phenomena associated with a stainless steel 304 low energy electron diffraction /LEED/ and molecular beam assembly.

19 p2762 A72-38023

Properties of the electrostatic field of a system of annular electrets and possibilities of its application for focusing in molecular generators

19 p2804 A72-38538

Nozzle beam-mass spectrometer system for studying one-atmosphere flames.

20 p2921 A72-38975

[WSCI PAPER 72-9]

Molecular-beam-stabilized argon laser.

23 p3296 A72-43817

Electron impact ionization of ions trapped in a hollow electron beam.

23 p3316 A72-44343

MOLECULAR BIOLOGY

Cytochrome c X ray structure and molecular evolution rates, using amino acid sequence comparative data

02 p0158 A72-11763

Chemical evolution and life origin - Conference, Pont-a-Mousson, France, April 1970, Volume 1, Molecular evolution

04 p0467 A72-14751

Molecular paleontology of fossil organic remnants in Molluscan shell proteins

04 p0467 A72-14753

Molecular evolution of biological membrane from lipid film to lipoprotein particle assembly, using bacterial biochemistry

04 p0469 A72-14786

Genetic code numerical structure association with logarithmic optimization rule for hierarchy of structures from molecular biology experiments

04 p0470 A72-14794

Volumetric analysis of blood oxygen and CO, showing combination with hemoglobin without significant molecular volume increase

05 p0619 A72-16786

Psycho-physical theory of human mind, discussing molecular biological processes of neuron recording in terms of quantum mechanics

06 p0769 A72-18191

Conformal electron interactions in biopolymer and hypermolecular biological systems, discussing calcium ions effects, enzyme activity, muscle contractions and information theory

07 p0915 A72-18803

Molecular aspects of structural and functional circadian rhythms in chloroplasts of unicellular alga Acetabularia, emphasizing protein synthesis role

07 p0919 A72-19540

Statistical, physical and biotic theories on molecular chirality origin, considering catalytic processes and asymmetric processes with circularly polarized light

08 p1129 A72-22007

Cellular evolution investigation using molecular biology, microbial physiology and ecology

08 p1119 A72-22011

Review of biology and biochemistry of memory, suggesting molecular level mechanism of cerebral information processing

10 p1424 A72-23925

Evolutionary significance of primary amino acid or nucleotide base sequences of DNAs within various phylogenetic groups

12 p1759 A72-27160

Liver and muscle type isozymes of DPN-linked glycerol-3-P dehydrogenase in chickens in terms of tissue distribution, ontogeny and avian evolution

12 p1759 A72-27161

Ionic and hydrophobic interactions effects on Micrococcus lysodeikticus membrane stabilization process

14 p2075 A72-30595

Low molecular active hormones isolation from cat blood, obtaining eluates with phosphate buffer by chromatography

14 p2077 A72-30971

Molecular complexes of methoxyindoles with 1,3,5-trinitrobenzene and tetracyanoethylene /Spectroscopy/association constants/NMR/.

17 p2512 A72-35649

The resonance mechanism of the biological action of vibration

20 p2897 A72-39409

Biology and molecular biophysics progress review, discussing synthetic semibiological systems, molecular pathology, free radicals and longevity

22 p3142 A72-42474

Empirical support for a stochastic model of evolution.

23 p3254 A72-43565

Recently published protein sequences. I.

23 p3254 A72-43570

The state of water in muscle tissue as determined by proton nuclear magnetic resonance.

24 p3371 A72-44774

Review and forecast of electron microscope studies of membrane systems in terms of fundamental problems of biomedical research and molecular biology

24 p3371 A72-44869

Nucleic acid hybridization with RNA immobilized on filter paper.

24 p3379 A72-45773

MOLECULAR BONDS

U CHEMICAL BONDS

MOLECULAR CHAINS

Nonmetallic material properties effects on structural design for reliability, considering molecular chain folding, polymer crystallization, entropic molecular segregation, adhesion and intermolecular forces

01 p0092 A72-10986

Linear polyethylene irradiation, investigating chain scission processes importance, critical conditions for gelation and sol/gel partitioning

04 p0484 A72-15258

Ionizing radiation as effective energy in primordial organic synthesis, discussing small molecule formation and subsequent condensation into polypeptides and polynucleotides

05 p0617 A72-16127

Solid thermal motion influence on atom colliding with solid surface linear semifinite atomic chain, presenting accommodation coefficient calculation method

06 p0853 A72-18140

Free and stressed polymer molecules nonlinear vibrations, estimating three- and four-phonon processes contribution to linear chain vibration bands half width by numerical methods

08 p1195 A72-21851

Cooperative direction changing isomer movement on polymer chain lattice describing equations derivation procedure

14 p2125 A72-30962

Monte Carlo studies of the relaxation of vector end-to-end length in random-coil polymer chains.

20 p2898 A72-39599

Statistical mechanics of polymerized materials.

22 p3197 A72-42796

Polypophosphate and trimetaphosphate formation under potentially prebiotic conditions.

23 p3261 A72-43566

Recently published protein sequences. I.

23 p3254 A72-43570

MOLECULAR COLLISIONS

Fluid immersed body velocity fluctuations due to irregular molecular impacts

01 p0001 A72-10234

Molecular collision model, comparing generalized phase shift approximation method with classical trajectory calculations for rotational inelasticity

03 p0391 A72-13857

Upper atmosphere He, Ne, Na and K atoms collisions with molecular oxygen, determining ejected electron energy during fast Na, K, Rb and Cs ionization for meteor phenomena modeling

03 p0438 A72-13980

Spatial distribution of gaseous nitrogen molecules scattered from metal surface, estimating beam capture coefficient

03 p0392 A72-14056

Effective cross sections for charged and excited particles formation from He, Ne and Ar ion collisions with CO molecules, using mass spectrometry

03 p0393 A72-14065

Random method solution of Boltzmann equation for pseudoshock /relaxation mixing/, applying to random collisions of molecular beams

04 p0551 A72-14519

Scattering function of ellipsoidal gas molecules with translational and rotational degrees of freedom

04 p0552 A72-14629

Collision induced vibration-rotation transition probabilities for molecular motions, using state averaged potentials

06 p0851 A72-17299

Lyman alpha radiation emission cross sections due to H/2p and H/2s/ formation in protons and hydrogen atoms collisions with hydrogen molecules

07 p1038 A72-20678

Temperature dependence of scattering cross sections for cold and hot neutrons colliding with oxygen and deuterium molecules

08 p1211 A72-21872

Ion quadrupole effects in ion-molecule collisions, calculating capture cross sections and ion trajectories

09 p1354 A72-22658

Polyatomic ions interaction with neutral molecules in gases, calculating ion mobility as function of temperature from core model representation

09 p1355 A72-22788

Spectroscopic moments of molecular collision induced far IR and Raman spectra, stressing gas dimers contribution

09 p1276 A72-22859

Foreign gas collisional broadening of nitrous oxide absorption lines, obtaining optical collision cross sections

09 p1276 A72-23332

Collision operator behavior in linear Boltzmann equation model of molecular gas in Hilbert space

10 p1510 A72-24102

Binary collision loaded-sphere molecular model for diatomic gases computer simulation, obtaining normal shock waves velocity, density and temperature profiles

10 p1466 A72-24297

Attractive well potential effects on vibrational transition probability during atom-diatom molecule collinear collision

10 p1514 A72-24335

Reduced mass and asymmetry differences effects on elastic collision integrals and thermal diffusion factors for isotopic hydrogen molecules

10 p1515 A72-24340

Intermolecular collisions distribution on centerline of freely expanding axisymmetrical jet, using ellipsoidal statistical model and simplified transport equations

11 p1615 A72-25557

Population inversion in exothermal decomposition reactions of multiatomic molecules for chemical and collision laser systems

13 p1912 A72-28778

Internal rarefied gas flow, taking into account molecular backscattering due to wall surface roughness

13 p1942 A72-29117

IR radiation amplification due to high pressure colliding reacting molecular gas phototransitions

13 p1971 A72-29917

Na atoms D line radiation excited in collisions with molecular gases, noting transfer cross section dependence on kinetic energy for given quantum number change

13 p2009 A72-30063

Ion-molecule collision frequencies in gases by phase coherent pulsed ion cyclotron resonance spectrometry [ONERA, TP NO. 1071]

14 p2133 A72-30524

Simultaneous vibration-translation and vibration-vibration exchanges between colliding carbon dioxide and nitrous oxide excited molecules

15 p2280 A72-31686

- Generalized phase shift effect on classical limit of rotational excitation collision cross sections related to transport properties of diatomic gas molecules
16 p2428 A72-32925
- Mathematical models for depolarized light scattering by particle pair in gas, noting molecular collisions effect
16 p2423 A72-32952
- Nitrogen molecular beam rotational excitation by collision with argon beam, describing electron beam spectrographic experimental method and numerical simulation technique
16 p2431 A72-33071
- Molecular and atomic mechanisms for hydrogen-iodine exchange reaction dynamics, using classical trajectory analysis
16 p2360 A72-33581
- Vibrational energy transfer probabilities for inelastic collisions between diatomic molecules, considering system represented by harmonic oscillators coupled by time dependent interaction potential
16 p2431 A72-33582
- Entropy and chemical change. I - Characterization of product/and reactant/ energy distributions in reactive molecular collisions: Information and entropy deficiency.
17 p2511 A72-34738
- Triple collision effects in the transport properties for a gas of hard spheres.
17 p2585 A72-35157
- Excitation of molecular vibration on collision - Simultaneous vibrational and rotational transitions in hydrogen + argon at high collision velocities.
17 p2585 A72-35467
- Electron loss in atom-molecule collisions.
21 p3087 A72-40473
- Computer-graphics studies of dipole-dipole collisions - Evidence for neutral collisional complexes.
21 p3087 A72-40559
- Shapes and widths of ammonia lines collision-broadened by hydrogen.
21 p3013 A72-40817
- Collisional excitation of carbon monoxide in interstellar clouds.
22 p3227 A72-42553
- Molecular gas presence effect on electron energy balance in atomic gases, noting inelastic collisions loss factor in heated Ar plasma containing nitrogen molecules
22 p3213 A72-43110
- Charge state variation processes in hydrogen atom collisions with H₂ molecules
23 p3315 A72-43304
- A kinetic-theory description of a chemically reacting gas.
23 p3357 A72-44272
- Variation in the hyperfine state of a hydrogen atom during its collision with unsaturated hydrocarbons in the gaseous phase
23 p3317 A72-44477
- Classical calculations of H₂O rotational excitation in energetic atom-molecule collisions.
24 p3427 A72-45309
- MOLECULAR DIFFUSION**
- Mesosphere and lower thermosphere photochemical composition, allowing for molecular and eddy diffusion
03 p0345 A72-12980
- Molecular diffusion laser gain determination from interaction kinetics between diatomic and cold working gases, examining annihilation processes
10 p1491 A72-24360
- Molecular and eddy diffusion transport velocities for helium and hydrogen distributions in upper atmosphere
11 p1622 A72-25845
- Random walk atomic migration model for radon diffusion through lunar regolith into atmosphere
13 p2038 A72-28995
- Adiabatic effect of slow rotational molecular diffusion on perturbed angular correlations of gamma radiation for radioactive studies in viscous media
13 p2008 A72-29863
- Concentration profile derivation for fluid flow near rotating disk with chemical reactions, considering concentration gradient and barodiffusion effects
13 p1944 A72-30049
- Molecular diffusion laser gain determination from interaction kinetics between diatomic and cold working gases, examining annihilation processes
17 p2563 A72-34959
- Hemoglobin-facilitated diffusion of oxygen - Interfacial and thickness effects.
18 p2650 A72-36569
- On the role of density gradients in the continuum theory of mixtures.
18 p2712 A72-37076
- Analytical and low-speed experimental diffusion-thermo effects in turbulent binary boundary layers. [ASME PAPER 72-HT-56]
20 p2985 A72-39660
- Variance reduction in Monte Carlo analysis of rarefied gas diffusion.
21 p3046 A72-41183
- Effect of a flow with a stagnation point on the rate of variation of the total entropy of a fluid mixture
24 p3465 A72-45074

- MOLECULAR DISSOCIATION**
- U DISSOCIATION**
- MOLECULAR ELECTRONICS**
- NT LARGE SCALE INTEGRATION
- NT MEDIUM SCALE INTEGRATION
- Cyanide and carbon molecules and isotopes electronic systems opacity probability distribution functions for stellar equilibrium model atmospheres calculations
03 p0416 A72-13012
- Book on electronic processes in noncrystalline materials covering liquid metals, semimetals and semiconductors, Hall effect, phonons and polarons, thermoelectricity, photoconductivity, etc
06 p0866 A72-18516
- MOLECULAR ENERGY LEVELS**
- NT INTERMOLECULAR FORCES
- Interstellar OH formation through inverse predissociation from continuum to vibrational level of repulsive molecular state originating from asymptotic atomic ground state
01 p0133 A72-11141
- Pulsed nitrous oxide molecular laser upper energy level relaxation time measurement by afterglow pulse-gain technique
04 p0529 A72-14601
- Carbon dioxide-nitrogen-water or He mixtures expansion through supersonic nozzles, showing population inversion of vibrational energy levels
04 p0513 A72-15337
- Deactivation of A-state nitrogen molecules in auroras, reinterpreting rocket observations of nitrogen Vegard-Kaplan system in terms of atmospheric model based on mass spectrometer measurements
05 p0655 A72-16072
- Neutral monatomic rarefied gas-surface interaction at energy levels 0.1-10 eV, using Boltzmann equation
07 p0969 A72-20061
- Number of molecular hydrogen ion vibrational levels, using phase function method for scattering length and potential energy
08 p1211 A72-21293
- Binary system molar energy diagram plotting, covering superheated, saturation and liquid phase regions
08 p1255 A72-22170
- Molecular energy levels population inversions calculated from vibrational temperatures in carbon dioxide laser discharge plasma
11 p1649 A72-26339
- Boltzmann distribution of nitrogen ions according to rotational energy levels in nitrogen ionization by slow electrons impact
12 p1847 A72-27050
- Stellar OH radical emission amplification by maser effect raising low energy molecules to high energy by pumping
14 p2110 A72-30578
- Energy curves of negative carbon dioxide ion as function of bending angle
14 p2134 A72-30749
- Rutile titanium dioxide molecular orbital energy level diagram deduction from X ray emission and absorption band spectra, noting Ti and O states roles
15 p2295 A72-32539
- Molecular adsorption on semiconducting surfaces, discussing conditions for formation of local surface levels in forbidden gap
15 p2296 A72-32760
- Isotopic effect in photodissociation processes of triplet excited molecules
19 p2838 A72-38779
- Organic dye laser molecular sublevel relaxation effects on steady state pi pulse behavior and spectral hole burning from resonance radiation propagation analysis
20 p2932 A72-39503
- Energy exchange processes in a low temperature N₂-CO transfer laser.
22 p3184 A72-41993
- Photochemistry of the airglow continuum.
22 p3153 A72-42889
- Boltzmann distribution of nitrogen ions according to rotational energy levels in nitrogen ionization by slow electrons impact
24 p3427 A72-45703
- MOLECULAR EXCITATION**
- Collision excited carbon dioxide molecule vibrational relaxation rate constant based on statistical model
01 p0104 A72-10493
- Pulsed laser emission in carbon monoxide, calculating molecular excited state populations
02 p0237 A72-11471
- Resonance electron spectrometry experiments on electron collisions involving vibrational excitation, deactivation and attachment in molecular oxygen
03 p0347 A72-13391
- Rotational excitation of polyatomic molecule by electron collision attributed to polarization and electrostatic forces
04 p0552 A72-14852
- Vibrationally excited oxygen molecules formation and decomposition in upper atmosphere, calculating day and night equilibrium concentrations
05 p0657 A72-16252

- Dissociative excitation of CO and metastable fragments by electron impact on carbon dioxide, investigating cross sections
06 p0803 A72-17447
- Molecular nitrogen photoelectron impact excitation of Herman-Kaplan upper electronic state, considering cascade contribution to low lying states in electron auroras and dayglow
06 p0806 A72-17647
- Adiabatic-nuclei theory application to diatomic molecules excitation by electron impact, approximating fixed nuclei phase shifts dependence on internuclear separation
06 p0852 A72-17826
- Electron energy distribution in carbon monoxide lasers, considering excitation effects on exchange processes, power transfer to vibration levels and vibrationally excited molecules influence
07 p0999 A72-18883
- Atomic selective two step photoionization and molecular photodissociation by tunable laser radiation, experimenting on Rb vapor and HCl respectively [CLEA PAPER 12.4]
07 p1005 A72-19395
- Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines
07 p1006 A72-19634
- Carbon dioxide-air-helium molecular systems population excitation rates with current, gas composition and partial pressures dependence
08 p1183 A72-22028
- Excitation accompanying photoionization in atoms and molecules and relationship to electron correlation observed from rare gases inner and valence shell satellite lines measurements
09 p1356 A72-22835
- Post-threshold translational energy dependence of endoergic cross sections for vibrational excitation and reactive scattering of diatomic molecules by atomic or molecular impact
09 p1357 A72-22858
- Excitation and relaxation of upper laser state in carbon dioxide discharge from Q spoiled pulse-produced fluorescence measurements
09 p1326 A72-23577
- Electron impact excitation of nitric oxide in vacuum UV, measuring absolute cross sections for emission features [AD-742536]
10 p1515 A72-24341
- Chemical laser with deuterium and nitrogen fluorides mixture, examining excited molecules emission spectra
11 p1649 A72-26351
- Evanescent photons absorption and emission in light excited molecules fluorescence
11 p1691 A72-26745
- Light absorption by molecular crystals with dual zone of exciton states
12 p1847 A72-27226
- Electron impact excitation spectrum of molecular oxygen, investigating angular behavior of differential scattering cross sections and energy dissipation
12 p1848 A72-27851
- Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency
12 p1825 A72-27885
- Nonlinear light amplification in molecular nitrogen amplifier as function of input pulse delay relative to excitation start
13 p1969 A72-29522
- Hydroxyl vibration levels excitation rates calculation from transition probabilities and band sequence nightglow intensity measurements
13 p1954 A72-29816
- Absolute cross sections for Werner band system excitation of molecular hydrogen by electron impact, discussing relative spectral response calibration
13 p2009 A72-30065
- Quantum mechanical calculation of interaction potential energy surface role in vibrational excitation of diatomic molecules
14 p2134 A72-30750
- Hydrogen molecule highly excited electronic levels, developing transition probabilities estimation method
14 p2135 A72-30888
- Simultaneous vibration-translation and vibration-vibration exchanges between colliding carbon dioxide and nitrous oxide excited molecules
15 p2280 A72-31686
- Diatomic molecular vibrational excitation and dissociation effects on imploding shock waves, comparing shock tube data to prediction
15 p2192 A72-32148
- Transversely excited pulsed carbon dioxide laser with and without hydrogen addition, observing gain spatial and temporal dependence
15 p2251 A72-32529
- Metastable ²S/ atoms production by electron impact induced dissociative excitation of molecular deuterium, measuring total cross section via Lyman alpha flux
15 p2282 A72-32645

- High power carbon dioxide lasers review covering CW, Q switched and pulsed atmospheric pressure lasers and various excitation techniques
16 p2399 A72-32848
 - High energy resolution spectrometric measurement of relative emission cross section for electron impact excited molecular nitrogen second positive system bands
16 p2428 A72-32922
 - Generalized phase shift effect on classical limit of rotational excitation collision cross sections related to transport properties of diatomic gas molecules
16 p2428 A72-32925
 - Nitrogen molecular beam rotational excitation by collision with argon beam, describing electron beam spectrographic experimental method and numerical simulation technique
16 p2431 A72-33071
 - Hydrogen direct photoionization and photoexcited autoionization cross sections calculation for radiation in 600-800 Å region
16 p2431 A72-33579
 - Chemical laser with deuterium and nitrogen fluorides mixture, examining excited molecules emission spectra
16 p2402 A72-33704
 - Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency
16 p2404 A72-33992
 - Dissociative excitation of vacuum ultraviolet emission features by electron impact on molecular gases, III - CO₂
17 p2585 A72-34734
 - Rotational excitation of rigid rotor in argon-nitrogen system, measuring energy transfer moments by particle-body and perturbation technique
17 p2585 A72-34740
 - Rates of interaction of vibrationally excited hydroxyl ($v = 9$) with diatomic and small polyatomic molecules.
17 p2511 A72-35648
 - Tunable Raman excitation and vibrational relaxation in diatomic molecules.
17 p2586 A72-35802
 - Excitation of a long-pulse CO₂ laser with a short-pulse longitudinal electron beam.
17 p2565 A72-35815
 - Spectroscopic determination of the rotational temperature in a rarefied supersonic flow in glowing-discharge excited nitrogen.
17 p2544 A72-35928
 - Excitation modes and operating characteristics of electric discharge convection lasers
[AIAA PAPER 72-722] 17 p2565 A72-35962
 - Vibrationally excited nitrogen in upper atmosphere
18 p2688 A72-36865
 - Vibrational excitation in N₂ by electron impact in the 15-35-eV region.
19 p2837 A72-37546
 - Evaluation of rotational temperature at high vibrational temperature in electron beam fluorescence technique.
19 p2803 A72-38434
 - Isotopic effect in photodissociation processes of triplet excited molecules
19 p2838 A72-38779
 - Two-step photodissociation of ammonia molecules excited by laser radiation.
21 p3013 A72-40724
 - Analytic expressions for electron energy transfer rates for nitrogen and oxygen vibrational excitation in ionosphere, applying to atmospheric and ionospheric computer modeling
22 p3168 A72-42001
 - Collisional excitation of carbon monoxide in interstellar clouds.
22 p3227 A72-42553
 - Pulse energy and temporal/spatial distribution of carbon dioxide laser pumped by energy transfer from vibrationally excited DF produced by deuterium-fluorine chain reaction
22 p3185 A72-42617
 - Superradiant laser excitation at 3371 Å in molecular nitrogen second positive band system by high energy electron beam, noting 6 nsec pulse outputs to 24 MW
22 p3186 A72-42623
 - Coulomb approximation method for photoionization cross sections of hydrogen molecule singly excited states
22 p3208 A72-42718
 - Application of gasdynamic flows in laser technology
22 p3187 A72-43176
 - Effect of fluorescence observation geometry on lifetime measurement, including the development of an approximation to the detector collection efficiency integral.
23 p3288 A72-43884
 - Electronic excitation of N₂ and dissociative excitation of O₂ by proton impact.
23 p3317 A72-44250
 - Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines
24 p3408 A72-44566
 - Molecular crystals stationary Raman oscillators quantum model, deriving coupled nonlinear equations for excited modes polariton operators
24 p3409 A72-44912
- MOLECULAR FLOW**
- NT SLIP FLOW
- NT TRANSITION FLOW
- German monograph on gas type and nozzle flow conditions effect on condensed molecular jets properties
03 p0391 A72-13275
- Reference transfer method for in situ calibration of ionization gases, determining pressure ratio of molecular gas flow through fixed orifices
10 p1480 A72-24147
- Rarefied gas flows effect on metals creep properties, examining molecular flow density distribution as function of specimen surface distance from nozzle
13 p1979 A72-29483
- Hydrodynamic and molecular velocity characteristics of rarefied gas motion between infinite plane parallel emitting and absorbing surfaces, using Boltzmann equation
14 p2096 A72-31025
- Molecular flux distribution in cylindrical vacuum chambers with various inlet and pumping configurations under assumption of Knudsen law validity, describing computer program
15 p2183 A72-32382
- Study by phase detection of the velocity of a molecular jet
18 p2714 A72-37200
- Determination of the probability for passage of molecules through the working rotor of a turbomolecular vacuum pump with nonparallel walls of the channel between vanes
22 p3139 A72-41862
- MOLECULAR GASES**
- NT DIATOMIC GASES
- NT POLYATOMIC GASES
- Absorption cell heterodyne method for nondispersive IR detection of trace gases with molecular vibrational-rotational spectrum
01 p0023 A72-10532
- Triatomic hydrogen positive ions dissociation at 410, 510 and 550 keV in molecular hydrogen gas, measuring atoms yield as function of target thickness
01 p0104 A72-11148
- Electrically excited tunable IR molecular gas lasers with rotational lines overlapping due to high pressure broadening
03 p0366 A72-12965
- Scattering function of ellipsoidal gas molecules with translational and rotational degrees of freedom
04 p0552 A72-14629
- Molecular nitrogen dayglow emission in F region, noting volume emission rates, integrated overhead intensities and solar activity effects
04 p0518 A72-14959
- Atomic and molecular hydrogen mixture viscosity measurement, considering mutual diffusion coefficient, collision cross sections and interaction potentials
04 p0553 A72-15637
- Carbon dioxide laser Q switching by molecular gases intracavity Stark modulation with sine or square wave electric field, using methyl chloride and difluoroethane
05 p0669 A72-16609
- Intermolecular interaction potential parameters determination from gas compressibility data based on equation of state in kinetic theory
05 p0692 A72-17068
- Stable molecules spatial concentration profiles in high intensity combustion chamber, using quartz sampling probe and gas chromatograph
05 p0751 A72-17088
- Thermal conductivity of argon, helium, hydrogen, nitrogen, carbon dioxide, methane and ethane gases at high temperature and pressure
07 p1099 A72-19620
- Thermomolecular pressure gradients and temperatures in flow between parallel plates for statistical gas models at arbitrary Knudsen numbers
07 p1101 A72-20513
- Noble and molecular gases addition in reactions induced in ethylene by carbon dioxide-nitrogen-helium laser
07 p1009 A72-20693
- Molecular gases absorption coefficients measurement in extreme UV, analyzing photoionization curves in energy range far beyond threshold
09 p1356 A72-22829
- Kinetic equations derivation for rarefied chemically reacting monatomic or stable molecular gases
10 p1514 A72-23845
- Collision operator behavior in linear Boltzmann equation model of molecular gas in Hilbert space
10 p1510 A72-24102
- 50 MW laser amplifier at 3371 Å in molecular nitrogen via transverse electron pumping
10 p1491 A72-24225
- Binary collision loaded-sphere molecular model for diatomic gases computer simulation, obtaining normal shock waves velocity, density and temperature profiles
10 p1466 A72-24297
- Stellar absorption spectral line fineness indication for cold interstellar molecular clouds between observer and star
10 p1546 A72-24848
- IR radiation amplification due to high pressure colliding reacting molecular gas phototransitions
13 p1971 A72-29917
- Na atoms D line radiation excited in collisions with molecular gases, noting transfer cross section dependence on kinetic energy for given quantum number change
13 p2009 A72-30063
- Diatomic-monomeric molecular gas mixtures oscillation and rotation energies relaxation equations, taking into account transport and chemical reaction processes
14 p2083 A72-30327
- Quantum kinetic equation for monatomic and molecular gases optical characteristics calculation, considering spontaneous emission spectrum of atoms
14 p2110 A72-30358
- Hydrogen molecule highly excited electronic levels, developing transition probabilities estimation method
14 p2135 A72-30888
- Laser coupling through nonlinear gas filled absorber cell, discussing molecules mean free path
15 p2246 A72-31883
- Potential energy curves for exothermic reaction between oxygen cations and nitrogen molecules to form nitric oxide and atomic nitrogen
16 p2360 A72-32921
- Doubly ionized Mg, Ca and Ba atoms termolecular association rate constants with various molecular neutrals, comparing doubly charged with singly charged ions cluster reaction rates
16 p2360 A72-32924
- Numerically computed momentum and energy accommodation coefficients and angular distributions of gas molecules reflected from solid crystalline surfaces applied to satellite drag calculation
16 p2430 A72-33065
- Pulsed emission at pulse front in molecular hydrogen, deuterium and nitrogen at near IR electronic transitions, analyzing spectral, temporal and energy characteristics
16 p2401 A72-33298
- Interstellar molecular hydrogen formation on water, ice and solid CO, using laboratory adsorption energy measurements
16 p2461 A72-34160
- Mathematical model for nonequilibrium gas composed of hard spherical nonattracting molecules, deriving gas dynamics theory in terms of multiple integrals
17 p2538 A72-34424
- Time correlation functions for gases of linear molecules in a magnetic field.
17 p2589 A72-34894
- Molecular equilibrium abundances in interstellar H I gas clouds, noting formation dependence on gas density and degree of interstellar radiation extinction
19 p2854 A72-37230
- Detection of molecular oxygen in the Martian atmosphere.
21 p3103 A72-40451
- Molecular abundances and gas-to-electron pressure ratios as function of temperatures and pressures in solar composition gaseous mixture of late type stellar atmospheres
21 p3110 A72-41446
- Detection of molecular oxygen on Mars.
22 p3224 A72-42293
- Variation in the hyperfine state of a hydrogen atom during its collision with unsaturated hydrocarbons in the gaseous phase
23 p3317 A72-44477
- Transport properties of a gas of diatomic molecules. V - GPS calculation of the rotational relaxation time of the Ar-N₂ system.
24 p3427 A72-45307
- Multiphoton dissociation, predissociation, and autoionization of the hydrogen molecule.
24 p3427 A72-45476

MOLECULAR INTERACTIONS

NT MOLECULAR COLLISIONS

- Photochemical ion-molecule reactions in ionosphere by air exhaust device and RF mass spectrometer observation in geophysical rocket experiment
01 p0068 A72-10591
- Laboratory measurements of D region ion-molecule reactions using flowing afterglow system
03 p0347 A72-13388
- Model intermolecular interaction potentials constants determination for extrapolating thermodynamic properties of gases at high temperatures and pressures
05 p0692 A72-15842
- Reduced collision integrals for components of Venus and Mars type carbon dioxide atmospheres at 1000-11,000 K, using intermolecular interaction potentials
05 p0712 A72-15851

Free molecular flow heat transfer to rough surface, discussing surface/molecule interaction model for digital simulation

[ASME PAPER 71-WA/HT-8] 05 p0743 A72-15868
Intermolecular interaction potential parameters determination from gas compressibility data based on equation of state in kinetic theory

05 p0692 A72-17068
Small distance range anisotropic intermolecular interaction potentials for carbon dioxide and nitrogen oxide from beams elastic scattering data

06 p0852 A72-17983
Gas-surface interactions study by molecular beam technique, discussing measurement and target surface conditions control methods

07 p0969 A72-20069
Quantum mechanical transport equation for radiation interactions with molecules subject to perturber atom collisions, describing macroscopic density matrix evolution

[AD-739082] 07 p1039 A72-20683
Hydrogen protons and atoms interaction with hydrogen and nitrogen molecules, showing electron transfers agreement with Franck-Condon principle

08 p1210 A72-20835
Nonspherical and nonadditive interactions contribution to third virial coefficient of polyatomic gas, discussing anisotropy, shape factor, and intermolecular forces

08 p1211 A72-21292
Spectroscopic measurements of light emission from carbon dioxide positive ions and carbon monoxide in metastable He interaction with carbon dioxide

09 p1354 A72-22667
Molecular scattering in free jet expansion, using spherical source and two component background gas mathematical models

11 p1615 A72-25558
Molecular process and pressure effects on hydrogen formation in methyl acetylene photolysis at 1236 Å

11 p1590 A72-26011
Solar activity effects on biosphere processes, discussing radiation-induced molecular activation mechanisms in water and biological plasma calcium ion concentration changes

12 p1763 A72-28213
Inversion population distribution during nonexcited carbon dioxide and excited nitrogen molecules plane jets interaction in diffusion carbon dioxide laser

14 p2109 A72-30314
Hydrogen atom exchange in ion-molecule reactions of methane and ethylene determined from reaction products distribution, using ion cyclotron resonance techniques

14 p2084 A72-30522
Quasi-classical mechanical approximation in molecular scattering, using Monte Carlo methods for Jacobian determinant evaluation

14 p2134 A72-30836
Model intermolecular interaction potentials constants determination for extrapolating thermodynamic properties of gases at high temperatures and pressures

15 p2280 A72-31261
Reduced collision integrals for components of Venus and Mars type carbon dioxide atmospheres at 1000-11,000 K, using intermolecular interaction potentials

15 p2302 A72-31270
Secondary electron emission and molecule passage during in-depth interaction of high energy molecular beam with thin gold foil

16 p2430 A72-33067
Particle excitation processes in solar corona, ionosphere and astrophysics, discussing electron affinities, ion-molecule reactions, forbidden atomic transitions and Fe II problem

16 p2432 A72-34150
Molecular and atomic interaction forces as interfacial free energy sources, discussing molecular attachment kinetics and surface configuration models

18 p2718 A72-36393
Nonequilibrium transport equations for chemically reacting inhomogeneous gas mixtures, using Hermitian tensor polynomials of molecular velocities

18 p2713 A72-36895
Ion mobilities and ion-molecule reaction rates in oxygen.

19 p2836 A72-37457
Laboratory positive and negative ion composition measurements compared with D region ion-molecule reaction observations

20 p2917 A72-39527
Application of statistical methods to studies of the surface properties of polymers

21 p3072 A72-40080
Limiting properties of solutions of the Boltzmann equation.

21 p3086 A72-40264
Repulsive potential determination for alkali cations, halide anions and anisotropic molecules from scattering experiments and bond energy data

21 p3087 A72-40555
Scattering cross section glory undulations relationship to potential energy of interaction of two

molecules with minimum containing one or more bound states

21 p3087 A72-40561
Molecular orbital calculation of the isotropic hyperfine interactions in triatomic nitrogen radicals.

21 p3013 A72-40564
Predvoditelev critical revision of hydrodynamic and heat transfer theory based on Navier-Stokes and Boltzmann equations, developing statistical system of molecular interactions

22 p3165 A72-41951
Inversion population distribution during nonexcited carbon dioxide and excited nitrogen molecules plane jets interaction in diffusion carbon dioxide laser

23 p3294 A72-43217
Filler quantity and type effects on mechanical energy losses in polymers, discussing molecular interaction and chemical bond influences

23 p3306 A72-43731
Exact solution of the equations of molecular optics for refraction and reflection of an electromagnetic wave on a semi-infinite dielectric.

23 p3313 A72-43803
Laser-source spectroscopy. II - Experimental study of line broadening for the 00 1-10 0, 02 0/ transition of CO₂ disturbed by N₂: Application of the theory of Anderson, Tsao, and Cornette to the calculation of pure and N₂-disturbed CO₂ linewidths

23 p3298 A72-44535
Early stage condensation in planetary formation, discussing atomic and molecular reactions in interstellar space and earth outer atmosphere properties

24 p3444 A72-45452
Evidence for protonated cyclopropane intermediates in crossed-beam ion molecule reactions.

MOLECULAR IONS

Triatomic hydrogen positive ions dissociation at 410, 510 and 550 keV in molecular hydrogen gas, measuring atoms yield as function of target thickness

01 p0104 A72-11148
Hydrogen molecular ion g tensor calculation, determining approximate ground state wave functions

03 p0391 A72-13152
Elastic scattering without dissociation of nitrogen molecular ions by noble gas targets in 0.3-3 keV range, analyzing energy loss

03 p0393 A72-14357
Number of molecular hydrogen ion vibrational levels, using phase function method for scattering length and potential energy

08 p1211 A72-21293
Secondary molecular ion emission of Li as function of atoms number

11 p1701 A72-26506
Nitric oxide and oxygen molecular ion composition of lower ionosphere during solar eclipses from rocket measurements

[AD-744403] 12 p1801 A72-27150
Model potential method for calculating positively charged diatomic sodium molecular ions potential energy curves and resonance charge transfer cross sections

12 p1848 A72-28350
Diatomic carbon negative ion search in HD 201626 and solar spectra, noting rotational lines coincidence with absorption features

13 p2038 A72-29010
Electron impact induced aurene epoxides fragmentation, discussing ion formation, intermediates, thermal rearrangement and mass spectra

13 p1913 A72-29775
Relative cross sections for gas phase photodetachment of electrons from amide and arsenide ions using ion cyclotron resonance spectrometer

13 p1914 A72-30064
Atmospheric desorbed water molecules and ions number density vertical distribution in lower ionosphere and thermosphere

15 p2225 A72-31913
Lifetime and quenching of metastable CO produced by dissociative recombination of positive carbon dioxide ions in He afterglow

16 p2432 A72-33771
Emission spectra of comet tail carbon monoxide molecular ion indicating constant or slowly varying electron transition moment

17 p2618 A72-35826
Dissociation of molecular ions formed by charge exchange in an in-line tandem mass spectrometer.

19 p2763 A72-38801
Electronic and nuclear magnetic resonances of the oxygen and hydrogen labile negative molecular ions.

20 p2956 A72-39189
Oxygen ion anticorrelation to molecular ion concentrations from OGO 6 observations in F 2 region

22 p3169 A72-42016
Photoionization of N₂, O₂, NO, CO, and CO₂ by soft X rays.

24 p3426 A72-45302
MOLECULAR ORBITALS

Allowed states of electronic complexes and impurity molecules in crystals determination in molecular orbital scheme of molecular electronic calculations

03 p0392 A72-13864

Molecular orbital calculation of the isotropic hyperfine interactions in triatomic nitrogen radicals.

21 p3013 A72-40564

MOLECULAR OSCILLATIONS

Carbon dioxide and hydrogen mixtures in shock tube, noting rotational- and translational-vibrational energy transfer role from relaxation time measurement

02 p0203 A72-12028
Two dimensional molecular dynamics digital simulation of Ar liquid-vapor interface at triple point, yielding strongly oscillatory density profile

03 p0393 A72-14263
Nonisothermal gas layer IR radiation in multiatomic molecular vibrational-rotational band range, determining lowest level energy for wide line spectrum

04 p0547 A72-14651
High power tunable IR gas lasers based on anharmonic molecules vibrational-rotational transitions excitation at gas pressures of 10 atm

06 p0825 A72-17786
Free and stressed polymer molecules nonlinear vibrations, estimating three- and four-phonon processes contribution to linear chain vibration bands half width by numerical methods

08 p1195 A72-21851
IR emission of oxygen reaction with carbon oxysulfide, investigating molecular vibrational transitions

10 p1510 A72-24133
Spontaneous radiative dissociation in molecular hydrogen vibrational levels as function of emission wavelength, discussing fluorescent spectra, radiation lifetimes and centrifugal distortion

13 p2008 A72-30058
Diatomic-monatomic molecular gas mixtures oscillation and rotation energies relaxation equations, taking into account transport and chemical reaction processes

[DFVLR-SONDDR-198] 14 p2083 A72-30327
Intermolecular hydrogen bond study of hydroxyl group in caranol and caranol-o₂ compounds, listing IR absorption bands for valence oscillations

15 p2192 A72-32100
Vibrational excitation in N₂ by electron impact in the 15-35-eV region.

19 p2837 A72-37546
Questions in the theory of monomolecular decay of a one-component gas and the dissociation constant of CO₂ at high temperatures

21 p3088 A72-41657
Molecular vibration levels inversion ratios increase by vibrationally cold CO addition to CW CO chemical laser, observing R-branch emission lines

22 p3185 A72-42616
Measurement of thermal relaxation time of vibration of polyatomic molecules by the impact tube method

24 p3402 A72-45045
High speed mixing of nitrogen vibrationally excited with carbon dioxide

24 p3464 A72-45065

MOLECULAR OSCILLATORS

Molecular continuity relationship relating discrete absorption oscillator strengths to photodissociation cross sections

01 p0104 A72-11115
Precision timekeeping, discussing atomic standards and Cs and Rb controlled molecular oscillators stability, cost and size

04 p0521 A72-14835
Electron impact cross section and energy deposition in molecular hydrogen, using generalized oscillator strength in Born-Bethe approximation

07 p1038 A72-20566
Transient oscillator analysis of a high-pressure electrically excited CO laser.

22 p3184 A72-41970
Fluctuations in a quantum frequency standard

23 p3271 A72-43842
Laser frequency measurement by comparison with stable molecular oscillator Doppler shift produced by reflection of UHF modulated coherent optical signal

MOLECULAR PHYSICS

Dense cloud and protostar molecules from molecular line emission, considering mass effects in stellar evolution

03 p0419 A72-13120
Hydrodynamic asymptotic characteristics of autocorrelation function for molecule velocity in classical liquid, obtaining Lagrangian diffusion coefficient

05 p0692 A72-16684
Gases for carbon dioxide laser lines modulation by molecular Stark effect, presenting data for fluoroethane, monomethylamine, methyl mercaptan, vapors methanol and trichloroethylene

07 p1001 A72-19193
Relativistic Zeeman-Stark effect on molecular jet due to molecular translational motion in continuous magnetic field

10 p1514 A72-24135
Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation

12 p1847 A72-27055

Russian book - Macromolecules at the boundary between phases.

21 p3071 A72-40077

Dark dust nebulae and bright H II clouds, considering light molecules, stellar birth region, radio and IR astronomy

22 p3220 A72-41995

Quantum-chemical model of organic ring-shaped molecule with persistent magnetization at microscopic level

22 p3150 A72-42318

Molecular mechanical aspects of the isothermal rupture of elastomers.

23 p3305 A72-43507

Physical properties of atoms, molecules and solid material in ultrashort magnetic field, using quantum drift approximation

24 p3427 A72-45708

MOLECULAR PUMPS

Thermogravimetric design, using electromagnetic microbalances and turbomolecular pump for automatic sorption isotherm measurements in surface area and pore size analyses

11 p1636 A72-26788

Flow phenomena in turbomolecular pumps

18 p2696 A72-36837

Determination of the probability for passage of molecules through the working rotor of a turbomolecular vacuum pump with nonparallel walls of the channel between vanes

22 p3139 A72-41862

MOLECULAR RELAXATION

Collision excited carbon dioxide molecule vibrational relaxation rate constant based on statistical model

01 p0104 A72-10493

Carbon dioxide and hydrogen mixtures in shock tube, noting rotational- and translational-vibrational energy transfer role from relaxation time measurement

02 p0203 A72-12028

Hydrogen shock waves density profiles measurement, noting uncoupled translational and rotational relaxation processes

02 p0263 A72-12360

Relaxation and heating rate due to solar radiation absorption by 2.7 and 4.3 micron vibration-rotation bands of carbon dioxide

03 p0347 A72-13387

CW longitudinal flow carbon monoxide chemical laser system analysis, discussing vibrational levels, population densities, excitation and relaxation processes and dynamic model

03 p0368 A72-13858

Pulsed nitrous oxide molecular laser upper energy level relaxation time measurement by afterglow pulse-gain technique

04 p0529 A72-14601

Submillimeter wave sulfur dioxide molecular laser, investigating lasing lines, plasma decay and relaxation, line interactions and signal temporal behavior

04 p0532 A72-15595

Master equation for vibrational relaxation of diatomic dilute gases, discussing restrictions on experimental initial conditions and scattering cross sections

04 p0553 A72-15634

Dutch monograph on heat transfer of gas with vibrational relaxation at shock tube end wall covering mathematical model, induced velocity effect on pressure, etc

05 p0648 A72-16045

Plasma physics collective phenomena enhancing effect on relaxation processes, emphasizing relevance to stellar dynamics

[AD-739801]

05 p0714 A72-16059

Surface catalytic properties effect on multicomponent gas hypersonic boundary layer with simultaneous vibrational-dissociative relaxation, considering plate and blunt body laminar boundary layer

06 p0757 A72-18130

Nonequilibrium thermodynamics description of rarified gas relaxation phenomena for very fast flow processes with translational temperatures

06 p0902 A72-18137

Neutron irradiation effect on grain boundary relaxation in Al and Al-Li alloy by internal friction investigation

06 p0830 A72-18292

Hydrogen halide rotational relaxation to thermal distribution without intermediate quantum number peak, discussing IR chemiluminescence data correction method

07 p0936 A72-19673

Vibrational relaxation in nonequilibrium and expansion nozzle flows

08 p1148 A72-21015

Nonlinear vibrational relaxation equations for expanding carbon dioxide-helium-nitrogen laser gas mixture, obtaining mode temperatures and gain coefficients by Runge-Kutta technique

08 p1149 A72-21261

Excitation and relaxation of upper laser state in carbon dioxide discharge from Q spoiled pulse-produced fluorescence measurements

09 p1326 A72-23577

Kinetic equations solution for homogeneous multiatomic gas relaxation, proving solution existence and uniqueness

10 p1516 A72-24629

Combined translational and internal relaxation theory of sound propagation in polyatomic gases, using 17 moment approximation

11 p1687 A72-26054

Raman effect application to study of gas vibration relaxation downstream of shock wave

12 p1888 A72-27180

Chemical laser dynamics review, discussing population inversion, molecular vibrational relaxation and reactions initiation methods

12 p1822 A72-27605

CO-He laser vibrational population distribution and small signal gain measurements, comparing with prediction based on V-V anharmonic exchange relaxation

12 p1827 A72-28222

Collisional relaxation and rotational intensity distributions in aeronomic spectra, including radiative losses effects from weak interaction model

13 p2008 A72-30057

Diatomic-monatomic molecular gas mixtures oscillation and rotation energies relaxation equations, taking into account transport and chemical reaction processes

[DFVLR-SONDDR-198]

14 p2083 A72-30327

Relaxation methods of magnetic and acoustic spectroscopy for studies of gravitational and inertial dipoles and quadrupoles in molecules and nuclei of solid bodies

14 p2143 A72-30963

Interferometric investigation of impurities effects on electron density distribution in ionization-relaxation zone behind shock waves in monatomic gas

15 p2215 A72-31213

German monograph on wave expansion in gases with thermodynamic relaxation covering steady dispersed compression wave development in piston barrel for two component mixtures

[DFVLR-SONDDR-184]

15 p2218 A72-31768

Light scattering by monatomic and polyatomic gases, superimposing effects due to rotational and translational molecular relaxation

16 p2428 A72-32944

Room temperature vibrational relaxation measurements in gases subsequent to laser pumping by picosecond pulse generated transient stimulated Raman scattering

16 p2401 A72-33389

HF vibrational relaxation measurements using the combined shock tube-laser-induced fluorescence technique.

17 p2511 A72-34735

Measurement of the parameters and the structure of a wet vapor flow with interphase heat and mass transfer in the relaxation zone behind the front of a shock wave.

17 p2637 A72-35130

Tunable Raman excitation and vibrational relaxation in diatomic molecules.

17 p2586 A72-35802

Vibrational relaxation of the bending mode of shock-heated CO₂ by laser-absorption measurements.

18 p2697 A72-36562

Numerical and shock tube experiments for variation of bound electron temperature and nonequilibrium chemical and radiative relaxation behind normal shock waves in air, using atom-molecule collision model

18 p2681 A72-36564

Influence of pressure, mass flow rate, and nozzle angle on the chemical relaxation in nozzles

19 p2880 A72-37494

Intramolecular interactions and vibronic spectra of polyatomic molecules. IV - Electronic relaxations: Configurational and relaxational spectra - The four-level arrangement

19 p2838 A72-38778

IR chemiluminescence technique /method of arrested relaxation/ to measure spectral energy distribution among Cl and HI and DI reaction products

19 p2763 A72-38802

Energy distribution among reaction products. VI - F + H₂, D₂.

19 p2763 A72-38804

Organic dye laser molecular sublevel relaxation effects on steady state pi pulse behavior and spectral hole burning from resonance radiation propagation analysis

20 p2932 A72-39503

Monte Carlo studies of the relaxation of vector end-to-end length in random-coil polymer chains.

20 p2898 A72-39599

Critical mass flow and nonequilibrium nozzle flow of vibrationally relaxing, ideal dissociating diatomic and singly ionizing monatomic gases, using steepest descent method

21 p3046 A72-41249

Special features of photoresonance perturbation relaxation in a low-temperature discharge plasma

23 p3319 A72-43409

Measurement of thermal relaxation time of vibration of polyatomic molecules by the impact tube method

24 p3402 A72-45045

Catalytic efficiencies of H₂O, D₂O, NO, and HCl in the vibrational relaxation of HF and DF.

24 p3378 A72-45306

MOLECULAR ROTATION

Self broadened rotational half widths for Lorentzian line shape and slit function in CO fundamental, using line center transmission measurements

01 p0104 A72-10095

Kinetic equation for gases with rotational degrees of freedom under equality of probabilities of direct and inverse transitions and stereoisomerism of molecules

01 p0050 A72-10350

High precision rotational constants and transition frequencies in ground state interstellar molecule cyanoacetylene

01 p0023 A72-11147

Rotation and mass inclusion into study of energy barriers location effects on thermonuclear reaction dynamics

02 p0262 A72-11981

Nonisothermal gas layer IR radiation in multiatomic molecular vibrational-rotational band range, determining lowest level energy for wide line spectrum

04 p0547 A72-14657

Vibration-rotation double resonance transitions in symmetrical top molecules in millimeter range under chopped laser radiation

04 p0532 A72-15615

Artificial barium oxide clouds band spectrum analysis, calculating rotational and vibrational temperatures in total wavelength region

05 p0655 A72-16069

Collision induced vibration-rotation transition probabilities for molecular motions, using state averaged potentials

06 p0851 A72-17299

Hydrogen halide rotational relaxation to thermal distribution without intermediate quantum number peak, discussing IR chemiluminescence data correction method

07 p0936 A72-19673

Molecular rotation stimulation and deactivation of diatomic molecule addition to monatomic gas, discussing energy exchange in rarefied gas flow

08 p1211 A72-21656

Dynamic model of night time hydroxyl rotational temperature variations from airborne and ground measurements

09 p1298 A72-22587

Shock tube rotational relaxation time measurements in cryogenic hydrogen, using laser schlieren optical system

11 p1691 A72-26008

Ion dipole capture cross sections at low ion and rotational energies compared with reaction cross sections for ammonia and water parent-ion collisions

11 p1692 A72-26014

Carbon dioxide laser vibrational-rotational band small signal gain factor dependence on time elapsing after breakdown of equilibrium distribution

13 p2008 A72-29503

Adiabatic effect of slow rotational molecular diffusion on perturbed angular correlations of gamma radiation for radioactive studies in viscous media

13 p2008 A72-29863

Diatomic-monatomic molecular gas mixtures oscillation and rotation energies relaxation equations, taking into account transport and chemical reaction processes

[DFVLR-SONDDR-198]

14 p2083 A72-30327

CW tunable semiconductor laser measurement of CO laser amplifier gain line shape for several vibration-rotation lines

15 p2245 A72-31382

Optically pumped pulsed hydrogen fluoride gas laser, observing anisotropic ultrahigh gain emission in rotational transitions

15 p2251 A72-32531

Generalized phase shift effect on classical limit of rotational excitation collision cross sections related to transport properties of diatomic gas molecules

16 p2428 A72-32925

Nitrogen molecular beam rotational excitation by collision with argon beam, describing electron beam spectrographic experimental method and numerical simulation technique

16 p2431 A72-33071

Hydrogen and hydrocarbon diatomic molecules and cations rotational state upper limits determination, noting potential energy functions

16 p2432 A72-34098

Rotational excitation of rigid rotor in argon-nitrogen system, measuring energy transfer moments by particle-body and perturbation technique

17 p2585 A72-34740

Spectroscopic determination of the rotational temperature in a rarefied supersonic flow in glowing-discharge excited nitrogen.

17 p2544 A72-35928

Rate constant determination for reaction product molecule in vibrational and rotational quantum states, obtaining spectral energy distribution

19 p2763 A72-38803

Calculation of intensities of vibration-rotation of a diatomic molecule by the factorization method

21 p3087 A72-40471

Coriolis constants for prolate symmetric top molecules from gas phase Raman band contours observation, noting comparison with IR spectroscopy

22 p3209 A72-42719

Influence of steric effects and compressibility on nonlinear response to laser pulses and the diameters of self-trapped filaments.

23 p3296 A72-43873

Transport properties of a gas of diatomic molecules. V - GPS calculation of the rotational relaxation time of the Ar-N₂ system.

24 p3427 A72-45307

MOLECULAR SPECTRA

NT ELECTRONIC SPECTRA

NT RAMAN SPECTRA

NT VIBRATIONAL SPECTRA

Microwave measurement and interpretation of oceanic thermal emission in terms of molecular temperature

02 p0214 A72-11866

Interstellar molecular microwave observations, emphasizing theoretical production rates and modes

03 p0419 A72-13119

Molecular oxygen photoelectron spectra at autoionizing resonance frequencies, comparing with Franck-Condon calculations

04 p0552 A72-14892

White dwarf Grw plus 70 deg 8247 circular polarization spectral structure with molecular absorption bands coincident with Minkowski bands

04 p0580 A72-15368

Vertically oriented double crystal attachment to vacuum X ray spectrograph for enhanced resolution of ionic solids and solutions molecular spectra

07 p0983 A72-19317

Formaldehyde concentration into cloud formation compared to atomic hydrogen from analysis of molecular lines near galactic center

08 p1235 A72-21386

Tabulation of calculated rotational line intensities relative to integrated vibration-rotation band intensity for various electron transitions of nitrous oxide

09 p1276 A72-22665

Ultrasoft X ray absorption spectra features of inner atomic shell photoionization in molecules

09 p1356 A72-22827

Molecular X ray emission spectra interpretation based on singly ionized states observation by photoelectron spectroscopy and transition probability calculation

09 p1357 A72-22838

Abundance in cold stellar atmospheres, noting effect on atmospheric thermal stratification and energy transfer from molecular spectra

11 p1722 A72-26432

Interstellar free radicals and molecules spectra, noting catalyzers, temperature and abundances role

11 p1722 A72-26434

Absorption spectrum of molecular nitrogen in 730-980 A band, investigating absorption cross sections and optical oscillator strengths

12 p1848 A72-27853

Hydroxyl vibration levels excitation rates calculation from transition probabilities and band sequence nightglow intensity measurements

13 p1954 A72-29816

Methane spectral band tetrahedral fine structure analysis, using vibration-rotation Hamiltonian

14 p2084 A72-30523

Molecular band model for inhomogeneous radiating gases nonuniform transfer paths based on single collision broadened spectral line growth

14 p2135 A72-30891

Methane collision broadened rotational fundamental line, calculating line width dependence on temperature

14 p2135 A72-30893

Fundamental and overlapping bands integrated intensities and nitrogen broadened half widths of rotational lines in nitrous oxide obtained from absorption measurements

14 p2135 A72-30895

Carbon 12/13 isotope ratio measurement for interstellar ionized CH molecules toward stars with strong interstellar lines

17 p2604 A72-34524

Spectroscopy of pulsed HF chemical lasers using an infrared vidicon camera tube.

17 p2562 A72-34641

The identification of the 1-0 and 2-1 bands of HCl in the infrared sunspot spectrum.

17 p2611 A72-35299

Application of dispersion techniques to molecular band intensity measurements. I - Principles of 'fringe shift' and 'fringe slope' band analysis procedures.

17 p2586 A72-35832

Fringe shift and slope analysis of interferometric spectrogram formed by NO-gamma system spectral band

17 p2586 A72-35833

On circumstellar molecules in the Pleiades.

19 p2856 A72-37508

Quenching of fluorescence and the photoeffect in anthracene crystals

19 p2847 A72-38782

Rate constant determination for reaction product molecule in vibrational and rotational quantum states, obtaining spectral energy distribution

19 p2763 A72-38803

Vibration spectra of the isomorphous proustite-pyrrargyrite series.

20 p2932 A72-39506

Interstellar molecules and dense clouds.

20 p2970 A72-39600

Ground and low-lying excited electronic states of FeH.

21 p3096 A72-40563

Dipole moment derivative of triatomic hydrogen ion electronic ground state, considering fundamental spectrum observation in hydrogen gas in local thermodynamic equilibrium

22 p3209 A72-42720

Laser magnetic resonance of the O₂ molecule using the 337-micron HCN laser.

22 p3209 A72-42896

Study of the variation of the intensity of vibration-rotation spectra of hydrogen halide molecules under the action of compressed foreign gases

22 p3209 A72-43047

Emission and absorption spectral behavior observation by millimeter radio telescopes for molecules in interstellar space of Milky Way galaxy spiral arms

24 p3439 A72-44905

Measurement of longitudinal relaxation times for spin-decoupled protons.

24 p3427 A72-45400

Titanium oxide molecular spectrum band intensities measurement for vibrational temperature of M supergiant stars, noting atomic absorption effect on measurement accuracy

24 p3448 A72-45681

MOLECULAR SPECTROSCOPY

NT RAMAN SPECTROSCOPY

Air pollutant detection by multiple slit correlation spectrometry and laser absorption technique, noting sensitivity enhancement by laser output increase

04 p0530 A72-14894

Laser source spectroscopic determination of pure and nitrogen perturbed carbon dioxide transition lines half-widths

10 p1491 A72-24227

High resolution spectroscopic studies of high density molecular beam production and emission spectrum excitation, using Ebert-Fastie vacuum spectrometer

16 p2430 A72-33059

Strict allowance for the variation of the system of normal coordinates in the theory for the vibronic spectra of polyatomic molecules

19 p2838 A72-38777

Pulsed photoexcitation /flash photolysis/ spectrophotometers in terms of light sources, recording sensitivity enhancement, data processing, laser use and performance requirements

21 p3058 A72-41726

MOLECULAR STRUCTURE

Phenolic-novolac prepolymer molecular structure and pyrolysis reactions thermokinetic parameters, presenting statistical methods for estimating char yield

01 p0023 A72-11261

Vibrational IR and Raman spectra of dimethylaminodichlorophosphine, determining molecular structure symmetry in liquid and solid phases

04 p0481 A72-14444

Artificial intelligence applications for chemical inference, discussing modified heuristic DENDRAL computer program for cyclic structure and linear molecule identification

07 p0936 A72-19498

Supermolecular structure artificial defects influence on mechanical strength of pyrographite

07 p1024 A72-20136

Nonspherical and nonadditive interactions contribution to third virial coefficient of polyatomic gas, discussing anisotropy, shape factor, and intermolecular forces

08 p1211 A72-21292

Molecular ordering in smectic A liquid crystals, evaluating spectrum hyperfine splitting as function of orientation to spectrometer magnetic field

08 p1217 A72-21490

Temperature effects on blood electrobioluminescence, relating luminescence peaks to protein and lipid molecular structure changes

09 p1268 A72-23694

Molecular structure and thermomechanical properties of polyimide and polyamide resins used for precision parts

12 p1833 A72-27406

Organic semiconductors for photovoltaic cell applications, discussing structural characteristics, improved charge transfer and crystallographic conductivity mechanisms

12 p1856 A72-28015

Plasticizers and modifiers effect on epoxy polymers structure from electron microscopy and IR spectroscopy, observing chemical reactions between aliphatic resin and hardening agent

13 p1983 A72-28689

Crystalline polymers behavior as multiphase composite solid, calculating supermolecular structures effects on stiffness properties

14 p2163 A72-30181

Protein biosynthesis R and D, discussing rate control, structure and medical and nutritional applications

14 p2076 A72-30600

IR mass spectrometric study of OBF in Ne and Ar matrices, discussing molecular structure

16 p2360 A72-33223

The interference function of molten metals

17 p2568 A72-35175

Freeze etching techniques in electron microscopic investigations of biological cells molecular structure

18 p2653 A72-36829

Strict allowance for the variation of the system of normal coordinates in the theory for the vibronic spectra of polyatomic molecules

19 p2838 A72-38777

Friction and molecular structure - The behaviour of some thermoplastics.

20 p2945 A72-39974

Calculation of the surface properties of elastic polymer molecules in athermal solutions by the Guggenheim method

21 p3095 A72-40078

Electron microscope investigation of the effect of fillers on the formation of supramolecular structures and on the type of breakdown in amorphous and crystalline polymers

21 p3072 A72-40084

Supermolecular structure artificial defects and bond strength influence on mechanical strength of pyrographite

24 p3418 A72-45761

MOLECULAR THEORY

Molecular processes in interstellar space and life origin, discussing radio astronomy observations, catalytic action and hydroxyl radicals in galaxies

01 p0128 A72-10398

Molecular dynamic techniques for simulating one dimensional shock wave motion in three dimensional solid, using rare gas solid model

12 p1881 A72-27282

Oxygen molecule parameters from frequency data in microwave, submillimeter and IR spectroscopy

15 p2283 A72-32654

The molecular-kinetic theory of polymer adhesion

23 p3307 A72-43930

MOLECULAR WEIGHT

Partial molar enthalpy measurement of oxygen mixture in substoichiometric Zr at 1300 C, using Tian-Calvet microcalorimeter

02 p0170 A72-12167

Polymer fractionation in simulated Jovian atmosphere according to molecular weight, suggesting substance responsible for red color

04 p0572 A72-14773

Radioimmunoassay and gel filtration determination of molecular size and immunochemical reactivity of parathyroid hormone in gland extracts, peripheral circulation and parathyroid effluent blood

04 p0473 A72-15228

Ultrahigh enthalpy gas generation by steady multicomponent flow process with kinetic energy transfer from low molecular weight gas to higher weight working medium

05 p0750 A72-16979

Irradiation effects on linear polyethylene molecular weight fractions in molten and crystalline states, determining sol-gel partitioning to establish critical conditions for gelation

09 p1337 A72-22550

On the application of perturbation theory for the calculation of molecular constants due to small mass changes and on the determination of force constants from very heavy isotope substitution.

19 p2763 A72-38806

MOLECULES

NT DIATOMIC MOLECULES

NT POLYATOMIC MOLECULES

NT TRIATOMIC MOLECULES

Review of NASA Ames Research Center 1971 conference on interstellar molecules and origin of life

09 p1265 A72-22645

MOLEIRE FORMULA

U COSMIC RAY SHOWERS

U SECONDARY COSMIC RAYS

U SPATIAL DISTRIBUTION

MOLLUSKS

Marine gastropod mollusk synaptic transmission mechanism, discussing various chemical transmitters, two phase potential, receivers, electrical interaction and electrophysiological conditioning

06 p0764 A72-17996

MOLNIYA SATELLITES

Molniya 1 satellite slow neutron monitor with photomultiplier scanned scintillator, noting limiting effect of geomagnetic perturbations

14 p2105 A72-30628

Aerodynamic drag at high latitudes observed from Molniya satellites orbit analysis, suggesting upper atmosphere density change

15 p2229 A72-31989

MOLTEN SALT ELECTROLYTES

Rechargeable high energy density battery with Al and Cl electrodes and molten aluminum chloride-alkali chloride eutectic electrolyte

16 p2352 A72-33896

The reduction of chlorine on carbon in AlCl₃-KCl-NaCl melts.

21 p3013 A72-40843

The aluminum electrode in AlCl₃-alkali-halide melts.

21 p3013 A72-40844

MOLTEN SALT NUCLEAR REACTORS

Design of high-temperature liquid-metal systems. [ASME PAPER 72-AERO-13]

22 p3204 A72-43149

MOLYBDATES

Raman scattering techniques applied to problems in solid state physics.

21 p3096 A72-40602

MOLYBDENUM

Polycrystalline Mo work function calculation from electron emission microscopy, determining crystallographic grain orientation effects

01 p0071 A72-11027

Flattening, heat treatment and machining of narrow rectangular vacuum melt Mo strips for microwave devices

01 p0078 A72-11087

Molybdenum-zirconium oxide cermets oxidation behavior, noting change of Mo oxidation characteristic from linear to parabolic time law above molybdenum oxide melting point

02 p0246 A72-12550

Molybdenum-uranium dioxide cermet fuel pins fission heating at 1145 K in forced convection He cooled reactor, measuring dimensional changes and U 235 burnup

04 p0546 A72-14424

Subgrain rotation induced angular anisotropy of plastic deformation of oriented Mo single crystals during rolling

05 p0674 A72-16354

Ni-Mo-N system alpha-solid solution thermodynamic analysis, deriving reaction enthalpies/entropies, free energy and interaction coefficients

05 p0676 A72-16795

Bcc Mo and Nb after cold working observing internal friction relaxation peaks as function of stress, strain, temperature and strain rate

06 p0831 A72-18296

Crystallographic texture of Mo sheet, analyzing angular dependence of Young modulus

06 p0832 A72-18366

Temperature dependent directional differences of modulus of elasticity of Mo sheet, using resonance technique

06 p0833 A72-18632

Cast electron-beam remelted Mo, investigating carbon and zirconium carbide additions effects on cold shortness and low temperature plasticity

06 p0833 A72-18645

Nichrome matrix composites with W and Mo reinforcing fibers

07 p1013 A72-19744

Surface processes effect on hydrogen penetration and diffusion into thick Mo membranes

07 p1014 A72-19772

High temperature tensile tests of Mo with helical and circular V grooves, discussing stress concentration sensitivity relations for grooved and smooth samples

07 p1018 A72-20141

Thermodynamics of Mo silicidation reactions from gas phase in silicon chloride and hydrogen media, discussing glow discharge maximum yield

07 p0937 A72-20417

Mo single crystal internal dislocation friction and ultrasound damping dependence on oscillation amplitude, exposure time and annealing temperature

08 p1185 A72-21073

Impurities and temperature effects on microdeformation of Mo single crystals under dynamic loads

08 p1188 A72-21789

Impurities effect on Mo plastic properties and toughness, suggesting lower vacuum arc welding rates and increased electron beam zone refining runs

09 p1326 A72-22228

Subgrain growth during annealing of rolled samples of Mo-Ti-C alloy and of single crystal Mo purified by electron beam zone melting

09 p1329 A72-23034

Anomalous structural dependence of elastic limit in Mo, determining mechanisms responsible for deviations from Petch law

09 p1329 A72-23037

Radiation damage in bcc metal Mo and W foils under energetic Au ion irradiation, noting vacancy dislocation loops

09 p1331 A72-23506

Carbon dioxide absorption kinetics on monocrystalline Mo from Auger spectroscopy and slow electrons diffraction

10 p1525 A72-24137

Levitator calorimetry for solid and liquid Mo enthalpy measurement, calculating specific heat and heat of fusion

10 p1496 A72-24243

Oxygen adsorption effects on Mo orientation contrasts and emission image under electron microscope

10 p1513 A72-24875

High temperature gradients in pulsed heated Mo specimen under vacuum, using photomicrographic technique

11 p1629 A72-25267

Subgrain rotation induced angular anisotropy of plastic deformation of oriented Mo single crystals during rolling

11 p1652 A72-25339

Grain size and carbon content effects on recrystallized Mo wire ductility at room and low temperatures

11 p1657 A72-25758

Polycrystalline Mo fatigue behavior under cyclic stresses, discussing grain size effect on fatigue life and relationship between cycle dependent yield and French damage line

11 p1658 A72-25830

Mo powder sintering kinetics and disperse mechanism in isothermal and nonisothermal conditions

11 p1643 A72-26836

Chemical vapor deposition of W and Mo by hydrogen reduction of hexafluorides, noting crystal structure and microporosity

11 p1644 A72-26837

Sintered Mo diffusion weld strength dependence on contact surface flatness and smoothness

11 p1644 A72-26847

Temperature, oxygen pressure and exposure time effects on oxidation characteristics of molybdenum-zirconium oxide cermets

11 p1665 A72-26865

Carbon and oxygen distribution and content effects on Mo mechanical properties and embrittlement

11 p1666 A72-26878

Photometric determination of Mo in Ni based steels and alloys in molybdenum-unithiol complex form, noting temperature and aqueous solution pH effects

12 p1828 A72-27445

Time-temperature-precipitation (TTP) diagrams and phase instabilities of high temperature exposed Mo containing austenitic stainless steels

13 p1974 A72-28658

Mo influence on gamma prime phase precipitate in wrought Ni-base superalloys, considering solvus temperature, weight fraction and lattice parameters

13 p1975 A72-28669

Mo addition effect on Al and Ti diffusion from intermetallic compounds into Ni matrix, noting increased high temperature stress rupture life

13 p1975 A72-28670

Electron probe microanalysis of Mo-Pd system diffusion at 1000-1600 C, measuring chemical diffusion coefficient as function of temperature, concentration and activation energy

13 p1978 A72-29221

Current breaks due to capacitor discharges in W and Mo wires, noting duration proportional to wire mass

13 p2007 A72-29980

Mo single crystal weakening after hot rolling and annealing, showing decreased dislocation density and hardness recovery by electron microscopy

14 p2112 A72-30160

Hydrogen gas solubility measurement in solid Mo at atmospheric pressure and 905-1521 C, noting quasiregular linearity of Arrhenius plot

14 p2113 A72-30246

Low and medium strain rates and temperature effects on bcc structure polycrystalline Nd and Mo, determining mechanical properties of yield and flow

14 p2114 A72-30367

Mo addition effect on high temperature creep resistance and diffusion activation energy of Nb alloys tested in torsion and tension at 1100-1500 C in vacuum

14 p2116 A72-30436

High temperature composite turbine blade materials, discussing service conditions and fiber/matrix selection, noting cast Ni and Mo based alloy fibers

14 p2125 A72-30533

Dislocation substructures effect on relaxation and internal friction peak in cold rolled Mo single crystals after annealing

14 p2122 A72-30956

Zr-Cu-Mo system phase diagram from microscopy, X ray analysis and mechanical tests, noting beta solid solution transformation into alpha, omega and beta phase mixtures

14 p2122 A72-30978

Y and La action on oxidation rates of Cr and Mo at high temperature in air

15 p2252 A72-31191

Surface damage induced by ion bombardment of monocrystalline W and Mo, determining degradation rate dependence on collisional energy transfer

15 p2276 A72-31853

Debye-Waller factors measurement for Mo and Cr surfaces near normal incidence based on LEED

15 p2292 A72-31857

Oxygen monolayer amounts adsorption on yttrium films and molybdenum foil investigated by Auger electron spectroscopy, observing growth of shifted peaks

15 p2292 A72-31860

Mo and stainless Ni-Cr steel surfaces chemical composition determination by Auger electron spectroscopy during heating in high vacuum

16 p2406 A72-33251

Grain orientation and nonmetallic inclusion distribution and identification by color etching of single crystal and polycrystalline Mo

16 p2407 A72-33532

Mo and W simultaneous addition effects on Ni-Cr-Nb alloy properties, noting heat resistance increase and Nb solid solubility decrease

16 p2408 A72-33534

Metal working and testing of nuclear rocket engine components with Mo as structural material and uranium dioxide as fuel, discussing Mo-W interdiffusion

17 p2559 A72-34617

Studies of the free path of the current carriers in molybdenum

17 p2568 A72-35517

Electron-microscopic investigation of the development of a cellular structure in molybdenum during hydroextrusion

17 p2569 A72-35524

Work function change of tungsten /110/ planes as function of Mo coverage.

18 p2656 A72-36134

Incore thermionic reactor cylindrical Mo emitter covered with two CVD W layers, discussing first layer adhesion and diffusion characteristics and work function stability

18 p2707 A72-36135

Behavior of tungsten-clad Mo-UO₂ fuel under neutron irradiation at high temperature.

18 p2708 A72-36143

The vapor deposition of high work function materials in a gas discharge.

18 p2656 A72-36149

The stability of structure of physical mechanical properties of molybdenum and tungsten after irradiation and thermal influence

18 p2698 A72-36153

Studies of physical-mechanical properties of monocrystal molybdenum and tungsten and electrical characteristics of TIC/thermionic converter/

18 p2698 A72-36154

Room temperature ductility of different types of molybdenum after differing annealing

18 p2698 A72-36155

Evaluation of sublimed molybdenum collector coatings for additive diode operation.

18 p2646 A72-36202

Analysis of primary creep of molybdenum at high temperatures.

18 p2700 A72-36580

An integral test of the inelastic cross sections of Pb and Mo using measured neutron spectra.

19 p2837 A72-37634

German monograph - Effect of molybdenum and degree of age hardening on the corrosion properties of maraging chromium steels

19 p2816 A72-37654

The plastic deformation behavior of Mo single crystals under compression.

19 p2816 A72-37689

Anisotropy of angular distribution of radiation due to positron annihilation on the surface of Mo single crystals.

19 p2844 A72-37691

Study of tungsten and molybdenum coatings obtained by arc discharge in a vacuum

19 p2808 A72-38186

Strength and plasticity of molybdenum during short-term tests

19 p2819 A72-38218

Effect of molybdenum on the properties of TiC-Ni cermet hard alloys

19 p2819 A72-38283

The influence of the surface orientation on yield in Mo single crystals.

20 p2935 A72-39007

Influence of boron on the structure and certain properties of electron-beam melted molybdenum

20 p2939 A72-39313

Vapor deposition effects on high density Mo, W and Nb obtained by carbonyls pyrolysis or chlorides and fluorides reduction

20 p2941 A72-39821

Void lattice model for Mo physical properties and equilibrium lattice spacing determination, calculating defect Green function

21 p3066 A72-40623

- Mechanical properties of titanium strengthened by monodirectional molybdenum wires
21 p3069 A72-41354
- Rheological properties of molybdenum and platinum of bamboo structure under bending loads
21 p3071 A72-41712
- Effect of voids on angular correlation of positron annihilation photons in molybdenum.
22 p3187 A72-41967
- Rate of molybdenum solution in carbon-saturated liquid iron.
22 p3193 A72-43027
- Diffusive metal coatings stress-strain state effect on composite Mo material strength, ductility and creep characteristics
23 p3306 A72-43732
- Electric resistance and enthalpy of molybdenum and tungsten
23 p3272 A72-44167
- Study of the dependence of the spectral and integral radiation properties of bodies on the surface roughness.
23 p3357 A72-44538
- The effect of annealing temperature on certain properties of molybdenum and tungsten fibers
24 p3415 A72-45396
- High temperature tensile tests of Mo with helical and circular V grooves, discussing stress concentration sensitivity relations for grooved and smooth samples
24 p3417 A72-45766
- MOLYBDENUM ALLOYS**
- Powder metallurgy processed Mo alloy, investigating destructive and nondestructive tests, structural grain size and hardness, wedge density and metallography
02 p0241 A72-11454
- Sintering and heat treatment effects on mechanical properties of atomized and mixed powders of Ni-Mo steel
02 p0234 A72-11462
- Al-Mo alloys under high temperature, determining phase equilibria and intermetallic phases
03 p0370 A72-12961
- Nb-Mo-N solid solution nitrogen solubility equilibrium at various temperatures and pressures
03 p0370 A72-12962
- Fine structure of Mo-Re alloys single crystals in solid solution region as function of Re content
03 p0377 A72-14019
- Carbon impurity effects on molybdenum ingot formation, detailing crystal growth, size reduction and length
04 p0533 A72-14987
- Longitudinal ultrasonic sound attenuation in superconducting Mo-Re alloys as function of temperature, magnetic field and frequency, using evaporated thin film CdS transducers
04 p0562 A72-15295
- Quaternary Mo-Zr-Cr-C system, investigating fcc phase liquidation from phase diagram by chemical, metallographic and X ray analyses
05 p0666 A72-16099
- Electron microscopic examination of molybdenum alloy thin plates aging at 700 C observing nucleation and precipitated phase
05 p0673 A72-16147
- Mo- and Ta-base refractory alloys creep tests, determining interactions between creep strength, fatigue life and strain aging by fatigue vibration application
05 p0677 A72-17111
- Mechanical, technological and physical properties of steel with and without molybdenum
05 p0679 A72-17204
- Diffusive mobility of C in Mo single crystals and Mo-Re alloy, using autoradiography and electron microscopy
06 p0829 A72-17733
- Electron transmission microscope study of quenched Mo-Ni alloys supersaturated solid solution low temperature aging behavior, investigating recovery processes
06 p0830 A72-18056
- Mo-Nb alloys single crystals work function, obtaining thermionic emission pattern
06 p0832 A72-18414
- Phase equilibria of Mo-Mn-C and W-Mn-C systems by X ray analysis, showing eutectoid decomposition involving rhombic modification
06 p0833 A72-18432
- Deformation kinetics and failure of refractory Nb and Mo base alloys in plastic state under low cyclic fatigue
06 p0833 A72-18631
- High temperature tests of short time strength, hardness and moduli of elasticity of W-MO alloys subject to plastic deformation and annealing
06 p0833 A72-18633
- Nonheat treated extruded Mo alloy under tension and vacuum conditions at various temperatures, investigating cylindrical samples size effects on mechanical properties
06 p0833 A72-18635
- Temperature and deformation velocity effects on elasticity and tensile strength of Mo and Nb alloys
06 p0833 A72-18636
- Nb-Mo alloys behavior in aggressive boron containing medium at high temperatures, relating boride phases growth rate to component percentages
07 p1012 A72-19680
- High temperature strengthening of vacuum melted W-Ti alloys with Mo and Zr additions
07 p1014 A72-19843
- Age hardening of Mo alloys with titanium and zirconium carbides at high temperatures after quenching
07 p1014 A72-19844
- Deformation rate and temperature effects on optimum strength and ductility of die forged and extruded Mo-Ti alloys
07 p1014 A72-19845
- Long-time isothermal temper embrittlement in Ni-Cr-Mo-V steels, noting tensile ductility decrease and intergranular fracture
07 p1015 A72-19932
- Corrosion resistance decrease and embrittlement in Ni-Mo cermet alloys after heat treatment from electrical resistance measurement
07 p1017 A72-19965
- Heat treatment of martensitically aging steels with Co, Ni and Mo, considering hardening effects and optimal conditions for high mechanical properties
07 p1020 A72-20414
- C and Re effects on brittleness threshold temperature and plasticity of Mo-Re alloy
09 p1326 A72-22227
- Mo-Zr solid solutions internal bonding, discussing diffusion controlled process and hardness dependence on Zr
10 p1494 A72-23833
- Diffusive mobility of C in Mo single crystals and Mo-Re alloy, using autoradiography and electron microscopy
11 p1652 A72-25340
- Microsegregation in Ti-Mo, Ti-V and commercial Ti alloys, investigating cooling rate and alloying elements contents effects
11 p1655 A72-25506
- Elastic constants of dilute Mo-Re alloys with bcc structure, determining randomly distributed point defects low concentration effects with T-matrix method
11 p1656 A72-25724
- Mechanical, technological and physical properties of steel with and without molybdenum
11 p1660 A72-26139
- X ray analysis of internal friction strains in nickel molybdenide during ordering process at 650-700 C, using torsional pendulum method for friction measurements
11 p1662 A72-26654
- Fe-Mo solid solutions transient creep behavior as function of applied stress, noting temperature effect
11 p1662 A72-26656
- Mo-Hf alloys high temperature mechanical properties improvement by internal diffusion nitriding, noting precipitates effects
11 p1644 A72-26843
- Arc cast vacuum melted Mo base alloy properties, production and applications to heat pipes, aerospace structures and pressure vessels
11 p1644 A72-26844
- Solid state reactions in powder metallurgical production and working of Mo alloy, considering sintering process
11 p1644 A72-26846
- Mo corner of Mo-B phase diagram constructed from microstructural analysis and microhardness, melting point and lattice constant measurements
12 p1828 A72-27291
- X ray spectral analysis of Ti-Mo system alloys, investigating K and L lines and electronic structure
13 p1972 A72-28491
- Annealed and quenched Fe-Mo-Co system, defining phase relationships in Fe-rich corner at 2200, 2000 and 1800 F
13 p1973 A72-28650
- Ni-Mo-W alloys hardness rating and corrosion resistance to sulfuric and hydrochloric acids, discussing dispersion hardening, quenching and aging treatments
14 p2114 A72-30272
- Electron microscopic and X ray analyses of ordering kinetics in Ni-Mo alloys, noting lattice type change and complex domain structure formation causes
14 p2115 A72-30409
- Heterogeneous order-disorder transformation in Ni-Mo alloy at 78 K after annealing, using ion field emission microscopy
14 p2116 A72-30416
- Alpha solid solution of nitrogen in Nb-Mo alloys, obtaining excess partial quantities and activity and interaction coefficients at high temperatures
14 p2121 A72-30773
- Mo-Ni-Al system phase equilibria at 600 C from X ray and microstructural analysis, noting hardness dependence on composition
14 p2123 A72-30985
- Ni-Al-Nb-Mo system phase diagram from X ray and microstructural analysis, noting solid solubility and dependence of hardness and electrical resistivity on components
14 p2123 A72-30989
- Rare earth metals interactions with V, Nb and Mo alloys, describing procedures for interstitial impurities removal
15 p2252 A72-31190
- Carbon distribution effect on cast Mo and alloys structure studied by electron microscopy, microdiffraction and X ray analysis, noting annealing from eutectic temperature
15 p2255 A72-31575
- Polycrystalline Mo-Re alloy under cold longitudinal, transverse, cross and pack rolling, noting twin and dislocation microstructures
15 p2256 A72-31669
- Transition metals additives effect on binary Mo alloys softening, noting influence of temperature and electron concentration change
15 p2258 A72-32135
- Ti-Mo binary solid solution, investigating superconducting transition temperature, lattice instability and electron-to-atom ratio by calorimetric measurements
15 p2295 A72-32544
- Nb-Mo alloys elastic constants anomalous temperature dependence, proposing phase changes role and relationship to neutron diffraction and specific heat
16 p2405 A72-33167
- Boron concentrations in Mo-Hf alloy samples from neutron activation analysis, measuring Li 8 beta radiation with plastic scintillation detector
16 p2391 A72-33238
- C diffusion mobility and coefficients in W-Mo steels gamma and alpha phases, discussing ionization effect on activation energy increase
16 p2408 A72-33538
- Investigations aimed at eliminating the susceptibility to thermal cracking of the high corrosion resistant NiMo 30 nickel-molybdenum alloy/Remanit HB/
17 p2559 A72-34394
- Low-temperature properties of nitrogen-alloyed austenitic chromium-nickel /molybdenum/ steels and chromium-manganese-nickel steels and their applicability as low-temperature ductile steels
17 p2566 A72-34395
- Mo-Nb alloys single crystals work function, obtaining thermionic emission pattern
17 p2567 A72-34863
- Complexonometrical analysis of molybdenum aluminides and Cu-Mo alloys without preliminary separation of components
18 p2655 A72-36097
- Gravimetric and polarographic determination of W in binary W-Mo alloys, noting methods accuracy
18 p2655 A72-36098
- Creep of different molybdenum alloys at high temperature and under strong stresses
18 p2698 A72-36144
- Thermodynamic description of the metal-rich part of the system niobium-molybdenum-nitrogen
18 p2701 A72-36597
- Nucleation and growth of deformation twins in Mo-35 at. % Re alloy.
18 p2702 A72-36748
- Creep tests on 2-1/4 per cent chromium 1 per cent molybdenum steel in bainitic condition.
19 p2817 A72-37713
- Study of the structural stability and mechanical properties of molybdenum subjected to the prolonged action of temperature and stress
19 p2818 A72-38013
- Aging characteristics of Ti-Mo base beta alloys.
19 p2820 A72-38371
- Elastic constants of niobium-molybdenum alloys in the temperature range -190 to +100 C.
19 p2821 A72-38591
- Interdiffusion in nickel-molybdenum and palladium-molybdenum systems
20 p2939 A72-39315
- Effect of twins produced by annealing on high-temperature failure of chromium-nickel-molybdenum steel
20 p2939 A72-39316
- Mechanical and microstructural properties of steels for effective surface cementation, suggesting Mo and Cr optimal contents
20 p2941 A72-39576
- Carbide hardening of chromium-molybdenum-vanadium steel
20 p2941 A72-39578
- Mechanical properties of Ti-Mo alloys at low temperatures
20 p2942 A72-39824
- Domain structures in metal crystals, investigating ordering in Ni-Mo alloys
20 p2962 A72-39997
- Microalloying effect on creep and stress rupture characteristics of hot rolled and annealed Mo alloys
21 p3070 A72-41355
- Solid-state reactions during the production of TZM molybdenum alloy by powder metallurgical methods
22 p3187 A72-41972
- Investigation of phase equilibria in alloys of silicon with molybdenum and titanium
22 p3188 A72-42150

Study of the properties of porous materials of nickel-molybdenum and nickel-chromium-molybdenum alloys 22 p3188 A72-42193

Oxidation rate anisotropy investigation on coupon specimen of Ta-Mo alloy at 950 C 22 p3190 A72-42770

Niobium and molybdenum alloys containing borides and carbides of the IV-a group metals 22 p3191 A72-42814

Phase compositions, impurity effects, crystallization and production of plastic W and Mo alloys and heat resistant W-based alloys 22 p3192 A72-42815

Magnetic properties and texture of a thin strip of nickel-iron-molybdenum alloys 22 p3192 A72-43012

Influence of alloying elements on ordering in alloys of the nickel-molybdenum system 22 p3192 A72-43016

Cast heterophase Mo and alloys fracture strength and plastic characteristics, investigating crystal growth texture, orientation and substructure 23 p3301 A72-43741

Strain hardening effect of Ni, Mn and Mo in Cr steel after high temperature annealing 23 p3301 A72-43742

Mo alloy under impact tests, investigating notch sharpness effects on cold shortness threshold and strength 23 p3301 A72-43756

Increasing the boundary strength of electron-beam-melted cast molybdenum by vanadium microadditions 23 p3302 A72-43967

Metalceramic alloy of the B2Zr type 23 p3302 A72-44010

Influence of boron on the structure and properties of electron-beam melted molybdenum 24 p3414 A72-45380

Boron and carbon contents effect on elastic properties strength and ductility of electron beam melted Mo-B alloys 24 p3414 A72-45381

Crystallographic texture of sheet Mo alloys, analyzing angular dependence of Young modulus 24 p3416 A72-45752

MOLYBDENUM CARBIDES

Niobium and molybdenum carbide film deposition on steel substrates by open arc welding with partial carbon burnout 14 p2107 A72-30156

Molybdenum carbide needle formation, growth in kinetics and morphology Fe-C-Mo alloy from lattice parameters measurements 14 p2120 A72-30618

Relations between mechanical properties and microstructures in TiC-Mo2C-Ni alloy. 19 p2821 A72-38375

MOLYBDENUM COMPOUNDS

NT MOLYBDATES

NT MOLYBDENUM DISULFIDES

NT MOLYBDENUM OXIDES

Antioxidation coatings of Ta and Ta alloys for high temperature long term operation, emphasizing sintered molybdenum disilicide 11 p1663 A72-26840

Iron-nickel-molybdenum carbonyl powders 23 p3298 A72-43276

MOLYBDENUM DISULFIDES

Ultralow sliding friction during bombardment of polypropylene, molybdenum disulfide and graphite surfaces with charged helium atoms at room temperature in vacuum chamber 02 p0249 A72-12282

Graphite and molybdenum disulfide surface and lubricating properties, examining basal plane proportion relationship with edge sites 02 p0236 A72-12847

Sputtered molybdenum disulfide film lubrication, discussing adherence to metal surfaces, particle size, friction experiments and tensile tests 02 p0236 A72-12848

Tungsten, molybdenum and tantalum disulfides oxidation rate determination by fluidized bed technique, calculating kinetic and diffusive processes activation energy 03 p0370 A72-13184

Molybdenum disulfide and layer lattice materials lubricating mechanism and effectiveness from sulfur atoms strong polarization, using scanning electron microscope 06 p0822 A72-18157

Molybdenum disulfide lubricating film and wear-in study by scanning electron microscopy and testing machine 06 p0836 A72-18586

Lubrication with thin molybdenum disulfide solid film under various temperatures and atmospheric pressures, examining friction and lifetime 06 p0823 A72-18587

Molybdenum disulfides with varying purity level evaluated as solid lubricants and as lubricant additives in standard lubricating testing devices 06 p0836 A72-18588

Impurity content, particle size and abrasion resistance role in abrasiveness of molybdenum disulfide 06 p0836 A72-18589

Wear behavior of molybdenum disulfide and antimony trioxide bonded solid film lubricant with air curing silicone resin, noting temperature and pretreatment effects 06 p0823 A72-18593

Basal plane and edge surface areas measurement in graphitized molybdenum disulfide powders 06 p0837 A72-18601

Graphite and molybdenum disulfide, investigating temperature effect, thermal stability and oxidation effect on weight by TGA and DTA 06 p0837 A72-18602

Molybdenum disulfide lubricating effectiveness improvement with finer particles at aggravated sliding conditions, suggesting surface roughness qualifications 06 p0837 A72-18605

Sputtered molybdenum disulfide lubrication on polished metal surfaces with low friction coefficient, strong adherence, high density and small particle size 06 p0824 A72-18607

Graphite and molybdenum disulfide powders lubricating properties relation to surface crystalline orientation 06 p0824 A72-18608

Radioactive molybdenum disulfide lubrication films distribution on nitrated steel and on magnesium pig iron 07 p0996 A72-19775

Solid lubricant additives effects in oils and fats, discussing molybdenum disulfide and zinc pyrophosphate solid film formation on metal surfaces under contact friction conditions 07 p1024 A72-20395

Superconductivity observation in Na, K and Rb intercalates of molybdenum disulfide comparing transition temperatures 09 p1368 A72-22561

Ultralow sliding friction during bombardment of polypropylene, molybdenum disulfide and graphite surfaces with charged helium atoms at room temperature in vacuum chamber 11 p1639 A72-25707

Molybdenum disulfide addition effect on compounded model greases lubricating performance, determining oxidation stability, rust preventive behavior and consistency 12 p1832 A72-27047

Molybdenum disulfide lubricating effectiveness due to surface film properties, suggesting chemical reaction effect with sliding metal surface 16 p2397 A72-33125

Lubrication with solids. 19 p2807 A72-37771

Evidence of crystal structure in some sputtered MoS2 films. 19 p2823 A72-37897

Investigation of the lubricant properties of molybdenum disulfide, graphite, and phthalocyanine 19 p2823 A72-38094

Vacuum-friction temperature resistance and durability of a molybdenum-disulfide coating deposited on steel by the detonation method 19 p2809 A72-38290

MOLYBDENUM OXIDES

Differential thermal and X ray analyses of ignition and preignition solid-solid reactions in Zr-Mo trioxide delay system over 440-475 C 08 p1219 A72-20756

Low-temperature reduction of molybdenum and tungsten oxides 20 p2941 A72-39820

Transition of the oxide film on a molybdenum surface from the two-dimensional to the three-dimensional phase 24 p3432 A72-45503

MOLYBDENUM SULFIDES

NT MOLYBDENUM DISULFIDES

MOMENT DISTRIBUTION

Thin walled prismatic structural members under uneven axial moment distribution, formulating force deflection equations for torsional-flexural behavior 01 p0141 A72-11049

Closed quasi-linear cubic theory of viscoelasticity for bodies with force and moment physical nonlinearity 03 p0454 A72-14218

Lasing onset moments distribution over emitting surface of injection lasers at room temperature 04 p0531 A72-15082

Grad moment method application to radiative transfer in medium with relativistic differential motions, obtaining Eddington approximation and Thomas radiative-viscosity terms 04 p0579 A72-15322

Multimoment solutions to convective heat transfer from sphere, discussing maximum drag coefficient and validity at all Knudsen numbers [ASME PAPER 71-WA/HT-1] 05 p0743 A72-15863

Time optimal control of system with distributed moments, deriving conditions for existence of fast response solution 05 p0683 A72-17134

Waveguide integral equation numerical solution by moment method, suggesting algorithm for detecting and alleviating relative convergence behavior [AD-745595] 06 p0775 A72-18368

Inverse integral Fourier transforms to solve steady periodic motions of wing close to solid surface, deriving equations of lift and principal moment 08 p1108 A72-21701

Nonuniform non-Lambertian diffusely scattering surface optical transfer characteristics and initial irradiance distribution inside sphere, discussing spherical harmonic moment measurement 09 p1309 A72-22610

Bending theory of homogeneous isotropic micropolar cantilever beam loaded by moments at edges 09 p1399 A72-22700

Violation effect of moment equilibrium about normal in shell of revolution and helical shell theory, discussing distribution 10 p1560 A72-25171

Jupiter and Saturn gravitational moments from available models, taking into account rotation, density and radius 12 p1871 A72-27744

Zero moment stress effect on modal density spectrum of fluctuating thin cylindrical shells and cylindrical panels 15 p2327 A72-31737

An inverse problem in the momentless theory of shells of revolution situated in a temperature field 22 p2322 A72-41895

Interplanetary scintillation of radio sources observed through solar corona, deriving higher central moments from skewness coefficient of probability density function 24 p3437 A72-44831

Solution of a boundary-value thermoelasticity problem for a turbine blade by the polymoment method 24 p3460 A72-45623

MOMENTS

NT BENDING MOMENTS

NT DIPOLE MOMENTS

NT ELECTRIC MOMENTS

NT LOADING MOMENTS

NT MAGNETIC MOMENTS

NT MOMENTS OF INERTIA

NT PITCHING MOMENTS

NT ROLLING MOMENTS

NT STABILITY DERIVATIVES

NT STANDARD DEVIATION

NT TORQUE

NT VARIANCE [STATISTICS]

NT YAWING MOMENTS

Stresses, strains and moments interrelationship in axisymmetrically loaded circular cylindrical shell under unsteady creep conditions 09 p1401 A72-22729

Control surface dynamic hinge moment coefficients estimation based on system state measurements from flight tests, using least squares criterion [AIAA PAPER 72-379] 11 p1730 A72-25403

Second order moments of system with parametric excitation by filtered white noise calculated with Fokker-Planck equation, giving condition for mean-square-stability 14 p2131 A72-30711

Techniques for power spectrum moment estimation. 21 p3021 A72-40911

MOMENTS OF INERTIA

Moment of inertia of earth atmosphere relative to earth axis of rotation 06 p0808 A72-18038

Zero moment theory application to cylindrical shells with elliptical geometries under constant transverse loads 07 p1087 A72-18992

Natural inertia moment effect of balance weight at wing tip on critical flutter rate 08 p1242 A72-21092

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electro-dynamics equations 08 p1240 A72-21140

Gyrostad inertial motion under nonholonomic constraint of mass center coincidence with fixed point 08 p1208 A72-21360

Nonspinning satellite earth-pointing attitude control for elliptic orbits using active regulation of pitch moment of inertia 08 p1204 A72-21605

Accelerated aperiodic actuation of pendulous mass surface gyrocompass to meridian direction, using inertial moment from rotor start-up 10 p1481 A72-24496

Moment of inertia of earth atmosphere relative to earth axis of rotation 11 p1622 A72-25974

- Equations of motion for torsional vibrations in system with nonlinear elastic term and variable moments of inertia, noting analog computer simulation
11 p1739 A72-26982
- Lunar mass, gravitational field and moments of inertia from Lunar Orbiter spacecraft Doppler tracking data
13 p2037 A72-28989
- Asymmetrical mechanics theory of nematic liquid crystals, noting relation for local moment of inertia and tensor analysis of kinematic characteristics
13 p2022 A72-29497
- Optimal efficiency of satellite passive nutation damper, noting system moment of inertia and flywheel axis relationship and viscous friction coefficient
14 p2162 A72-30458
- Lunar crust mass distribution relation to moments of inertia derivation from librations, inferring nonvalidity of lunar evolution fluid phase hypothesis
14 p2153 A72-30504
- Elastic damping of spin stabilized space stations nutational oscillations induced by time-variant moments of inertia
15 p2319 A72-31458
- Body of revolution motion in fixed center Newtonian field, investigating plane trajectories of center of inertia
15 p2307 A72-31677
- Inertial crosscouplings effect on orientation process dynamics of solid body investigated by nonlinear mechanics, noting centrifugal moments of inertia effects
15 p2275 A72-31730
- Stability analysis of gyrostat satellites possible equilibria under gravitational torques, considering inertia, equilibrium and angular momentum parameters
15 p2321 A72-32586
- The masses, densities and moments of inertia of Uranus and Neptune.
20 p2967 A72-39184
- Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamics equations
20 p2976 A72-39245
- Determination of parameters related to the interior of Mercury.
24 p3436 A72-44696
- MOMENTUM**
NT ANGULAR MOMENTUM
Pressure determination in kinematic pairs of spatial landing gear mechanism, describing rotatory and spherical pairs reactions to various combinations of momenta
05 p0614 A72-17057
- Mass, momentum and energy distribution measurement in quasi-steady MPD discharge, obtaining velocity vector profiles
[AIAA PAPER 72-497]
11 p1696 A72-26220
- MOMENTUM ENERGY**
U KINETIC ENERGY
MOMENTUM PRECESSION
U PRECESSION
MOMENTUM THEORY
Flow momentum losses during gas mixture chemically nonequilibrium expansion in nozzle
01 p0145 A72-10487
- Energy-momentum tensor for radiation and radiative viscosity in optically thick matter having Thomson scattering with photon absorption and emission processes
01 p0129 A72-10798
- MHD boundary layer calculation for conducting fluid along semiinfinite flat plate with transverse magnetic field, deriving momentum and kinetic energy integral equations
01 p0113 A72-11383
- Limited three body problem applied to planetary angular momentum increment due to accretion of particles in heliocentric orbits, discussing planet rotation laws
02 p0282 A72-12330
- Nonlinear development of instability wave in turbulent wake behind thin body based on integrals of mean flow momentum and kinetic energy equations
02 p0152 A72-12351
- Boundary layer of gas-particle flows with pressure gradient, numerically integrating momentum equation for cascade particulate flow
[AIAA PAPER 72-87]
05 p0604 A72-16808
- Helicopter rotor boundary layer, comparing analytical shear stress and velocity distributions obtained by momentum integral techniques with hot wire probe experimental data
[AIAA PAPER 72-38]
05 p0607 A72-16900
- Closed system equilibrium correlation functions relationships based on total momentum conservation, discussing application to solids or liquids electrical conductivity via nuclei dynamics
07 p1035 A72-19669
- Gravitational field potential energy-momentum pseudotensor component determination in general relativity theory
08 p1207 A72-21301

- Turbulent boundary layer characteristics of rotating helical blade in annulus contained fluid, calculating boundary layer growth and streamline angles via momentum integral equations
10 p1466 A72-24296
- Critique of general momentum theory of propeller actuator disk model, showing flow field determination from nonlinear elliptic differential equation solution
11 p1572 A72-25998
- Newton-Busemann pressure law derived for hypersonic rotationally symmetric flow from momentum theory considerations and plane flows
12 p1751 A72-27120
- Impulse and kinetic momentum equations for dynamics of variable mass solid using mechanical model
12 p1846 A72-27543
- Flux functions and balance laws for linear momentum in continuum mechanics, deriving traction vector and differential equilibrium equation
12 p1846 A72-27570
- Momentum consideration aided air resistance calculations for cylinder, discussing position effects
13 p1893 A72-28705
- Nonfriction vortices generation by jet flow in stationary fluid, using conservation of momentum principle
15 p2219 A72-32554
- Lagrange equations of second kind for rigid systems, using balances of linear and angular momenta for mass point or rigid body
16 p2466 A72-33021
- Gravitational field potential energy-momentum pseudotensor component determination in general relativity theory
17 p2580 A72-34659
- Approximate calculation of the magnitude of the momentum during the passage of a material particle past an elongated homogeneous biaxial ellipsoid
17 p2618 A72-35812
- A simple quadrature method for computing laminar boundary layers.
22 p3165 A72-42110
- Approximate equations of the flow behind a detonation with lateral confinement
24 p3463 A72-45041
- MOMENTUM TRANSFER**
Momentum exchange coefficient for surface layer neutrally stable flow after surface roughness change, noting error possibility in flow estimates for heterogeneous terrain
01 p0094 A72-10827
- Energy and momentum transfer between fields and particles in plasma crossed by transverse electromagnetic wave, investigating MHD stability
01 p0109 A72-10884
- Control axes misalignment effects on spinning satellite wobble damping and requirements for active momentum exchange controllers
02 p0286 A72-12267
- Temperature dependent gas internal diatomic laminar heat transfer, investigating continuity, energy, momentum for two dimensional flow between heated parallel plates
[ASME PAPER 71-HT-N]
02 p0302 A72-12317
- Global angular momentum balance, considering atmospheric frictional torques and fluxes, ocean water mass exchanges and seasonal variations effects
03 p0384 A72-14142
- Planetary boundary layer mixing length flow hypothesis with dependence on Reynolds tangential stress permitting turbulent diffusion coefficient maximum values computation
04 p0519 A72-15458
- Plasma ion collision transport analogy with turbulent velocity space momentum transfer, explaining confined plasma runaway electron absence in strong electric fields
04 p0560 A72-15469
- Orbiting space vehicle life extension by momentum management using gravity gradient torques
05 p0727 A72-16467
- Angular momentum and Li diffusive transport induced by mild thermally driven turbulence associated with Goldreich-Schubert-Fricke instability, discussing solar rotation slowdown
[AD-735988]
05 p0720 A72-16718
- Thermal and momentum diffusivity measurements in turbulent stratified flow, obtaining velocity and temperature profiles
[AIAA PAPER 72-80]
07 p0966 A72-18950
- Atmospheric eddy flux spatial variations in constant flux layer, noting heat and momentum flux variability of less than 10 percent
07 p1030 A72-19107
- Energy and momentum removal from troposphere and lower atmosphere by mountain lee wave breaking, discussing effects on atmospheric circulation evolution and maintenance
08 p1203 A72-22167
- Trailing vortex core decay with axial injection as function of momentum flux parameter
09 p1261 A72-23623

- Momentum transfer theory for ion drift velocity in multicomponent gas mixture at arbitrary electric field strengths
10 p1519 A72-24096
- Gravitational field angular momentum transfer analogy with Einstein gravitational energy transfer in general relativity
10 p1511 A72-24246
- Relativistic heavy ion in plasma, calculating energy loss based on electron scattering and momentum transfers
10 p1515 A72-24344
- Numerical solution of two massive rigid bodies impact with variable slipping direction using Routh momentum change theorem
11 p1735 A72-25769
- Internal gravity waves effects on energy budgets and vertical angular momentum transport over mountainous terrain in southwestern U.S. from handheld camera pictures on Apollo 9
11 p1682 A72-26472
- Noncoincidence of maximum velocity and zero shear stress due to asymmetric turbulent velocity profiles, considering effect on momentum, heat and mass transfer in noncircular channels
11 p1618 A72-26534
- Heat and momentum transfer of binary gas mixture flow in parallel plate channel with mass injection from porous wall, calculating velocity, pressure and temperature distributions
11 p1746 A72-26538
- Modified gas dynamic functions of total momentum of plane boundary layer for arbitrarily oriented control surfaces and for stratified flows with potential layer
11 p1574 A72-26973
- Heat and momentum transfer properties and storm propagation speed under steady convective overturning in shear, considering cumulonimbus convection scale of atmospheric motion
12 p1840 A72-27704
- Atmospheric surface layer turbulent transfer mechanisms, studying direct measurements of momentum, heat and moisture turbulent fluxes
12 p1840 A72-27705
- Limited three body problem applied to planetary angular momentum increment due to accretion of particles in heliocentric orbits, discussing planet rotation laws
13 p2039 A72-29214
- Large scale motion of turbulent boundary layer during relaminarization under strong pressure gradient, obtaining fluctuating velocity components and tangential Reynolds stress
13 p1944 A72-30028
- High momentum transfer collisions importance for anisotropic part of distribution function in Lorentz and single component plasmas
14 p2134 A72-30802
- Ar and K electron cross section determination for momentum transfer, using dc conductivity measurement of high pressure plasma
14 p2134 A72-30803
- Momentum transport in thermal incompressible turbulent boundary layers with constant wall temperature, using dimensional analysis and Stratford model
14 p2096 A72-31055
- Momentum and energy equations for pool film boiling heat transfer from horizontal cylinder to saturated liquids, using integral boundary layer analysis
14 p2173 A72-31067
- Langmuir waves scattering by denser plasma ions as dominant turbulent process momentum exchange between dynamic plasmas, applying to galaxies expansion into intergalactic media
15 p2285 A72-32269
- Plasma containment in toroidal systems investigated on basis of fluid model containing inertia, momentum transfer, ionic collisions and thermal conductivity effects
15 p2285 A72-32273
- X ray Brillouin scattering investigation of phonon phenomena for small momentum transfers with Bragg condition nearly satisfied
15 p2250 A72-32308
- Numerically computed momentum and energy accommodation coefficients and angular distributions of gas molecules reflected from solid crystalline surfaces applied to satellite drag calculation
16 p2430 A72-33065
- Aerodynamic coefficients determination from momentum and energy exchange between low velocity molecular jet and solid surfaces, describing time of flight measurement technique
16 p2390 A72-33069
- Energy and momentum losses of high temperature gas flow through externally cooled tube, solving laminar flow differential equations numerically on digital computer
16 p2378 A72-33430
- Spiral structure generation by outward angular momentum transfer, considering gravitational stress tensor, star-spiral wave momentum transfer and galactic secular evolution
16 p2457 A72-33683

Dankwert liquid film surface layer renewal concept as refinement of Reynolds theory of correlation between convective heat transfer and momentum transfer

17 p2637 A72-35050

Heat mass and momentum transport in free turbulent mixing.

17 p2543 A72-35638

The bounding theory of turbulence and its physical significance in the case of turbulent Couette flow.

18 p2677 A72-36006

Mathematical model for internal atmospheric gravity waves breaking process modification by momentum exchange between wave and mean flow

18 p2687 A72-36630

A technique for position sensing and improved momentum evaluation of microparticle impacts in space.

19 p2795 A72-37518

Momentum transfer and plasma formation above a surface with a high-power CO₂ laser.

19 p2811 A72-37864

Momentum transport by gravity waves in a perfectly conducting shear flow.

19 p2788 A72-38792

The indirect determination of stability, heat and momentum fluxes in the atmospheric boundary layer from simple scalar variables during dry unstable conditions.

20 p2947 A72-38964

Collisionless momentum transfer interactions in laser produced plasma on solid target, refuting Wright model

21 p3090 A72-40339

Linear momentum transfer effects in molecular dissociation produced by electron impact.

21 p3087 A72-40557

Theory of laminar film condensation of flowing vapor.

21 p3128 A72-40950

Wave energy exchanger for hybrid propulsion system.

21 p3100 A72-41172

One dimensional variable slip and homogeneous model predictions of momentum flux in two phase two component low quality flow

21 p3130 A72-41179

A calculation procedure for heat, mass and momentum transfer in three-dimensional parabolic flows.

22 p3243 A72-41954

Evanescent and internal gravity wave propagation effects on atmospheric dynamics, considering momentum transfer, energy dissipation and turbulence

22 p3168 A72-41964

Transfer equations for stellar systems

23 p3338 A72-44035

Atmospheric boundary layer definition by height of maximum vertical kinetic energy flux, considering stable and unstable stratifications

24 p3421 A72-44954

Chemical explosion energy distribution between gases and propelled mass, discussing momentum and kinetic energy transfer

24 p3463 A72-45040

MONATOMIC GASES

Boundary conditions for monatomic gas flow in constant cross section channel with heat supply and ionization

01 p0111 A72-11211

Monatomic He-Ar binary gas mixtures heat transfer to cylinders in low Reynolds number flow, considering internal energy effects

02 p0303 A72-12358

Low density monatomic gas supersonic spherical source flow, presenting departure from translational equilibrium

02 p0205 A72-12359

Shock wave structure in monatomic gases, using Fokker-Planck model for particle collisions and Mott-Smith distribution for shock front

04 p0512 A72-15162

Boltzmann equation collision integral statistical models, solving shock structure in monatomic gas

04 p0513 A72-15339

Steady normal shock wave analysis in binary inert monatomic gas mixtures using kinetic theory moment method

04 p0513 A72-15340

Numerical simulation of gas atom scattering from solid surface and satellite drag coefficient calculation

07 p0910 A72-20106

Numerical determination of particle number and mass flux density in monatomic rarefied gas flow through circular orifice at finite pressure ratio

07 p0972 A72-20107

Molecular rotation stimulation and deactivation of diatomic molecule addition to monatomic gas, discussing energy exchange in rarefied gas flow

08 p1211 A72-21656

Kinetic equations derivation for rarefied chemically reacting monatomic or stable molecular gases

10 p1514 A72-23845

Steady two dimensional flow of monatomic rarefied gas past seminfinit beam

10 p1418 A72-24543

Zeeman effects in hyperfine structure of atomic iodine photodissociation laser emission, noting magnetic fields effect on time behavior

11 p1692 A72-26558

Hypersonic flow of nonequilibrium ionized monatomic inviscid radiating gas past axisymmetric blunt body with allowance for electron and ion temperatures difference

13 p1895 A72-29877

Diatomic-monatomic molecular gas mixtures oscillation and rotation energies relaxation equations, taking into account transport and chemical reaction processes

[DFVLR-SONDDER-198] 14 p2083 A72-30327

Quantum kinetic equation for monatomic and molecular gases optical characteristics calculation, considering spontaneous emission spectrum of atoms

14 p2110 A72-30358

Interferometric investigation of impurities effects on electron density distribution in ionization-relaxation zone behind shock waves in monatomic gas

15 p2215 A72-31213

Monatomic ionized gas thermodynamic properties direct computation by numerical method without iteration or numerical differentiation

15 p2335 A72-31714

Thermal force exerted on spherical particle between two flat plates in stagnant monatomic rarefied gas, using moment solution to Boltzmann equation

15 p2336 A72-32403

Microwave acoustic surface waves attenuation at solid and monatomic gas boundary, detailing frequency, molecular weight, pressure and temperature effects

15 p2278 A72-32505

Spherical source jet flow expansion of single monatomic gas into vacuum on basis of BGK kinetic equation

16 p2375 A72-32887

Light scattering by monatomic and polyatomic gases, superimposing effects due to rotational and translational molecular relaxation

16 p2428 A72-32944

Theory of sound propagation in mixtures of monatomic gases.

17 p2583 A72-35613

Shock-wave structure using nonlinear model Boltzmann equations.

17 p2542 A72-35614

French monograph - An asymptotic theory of the Boltzmann equation and its application to the study of near continuum flows

19 p2785 A72-37489

Limiting properties of solutions of the Boltzmann equation.

21 p3086 A72-40264

Electron-energy distribution in a low-temperature plasma

22 p3213 A72-43118

MONAURAL SIGNALS

Monaural prestimulatory loudness adaptation measurement by delayed and single simultaneous balance methods, discussing intensity, frequency and duration effects

08 p1127 A72-21896

MONITORS

Particle mass monitor system based on piezoelectric microbalance combined with electrostatic precipitator collector, considering applications to air quality monitoring, laboratory aerosol research, process control, etc

[AIAA PAPER 71-1100] 01 p0067 A72-10548

Voltage and current waveforms monitoring on sampling oscilloscope for TRAPATT microwave oscillator performance optimization

01 p0038 A72-10653

Acoustic echo sounder as real time monitor of airport environmental meteorological parameters

01 p0103 A72-11137

Long distance monitoring method for short wavelength radio transmission to remote countries

02 p0182 A72-12671

Ultrasonic transducer monitoring of decompression-caused gas bubbles in rat thigh muscle tissue for decompression sickness time course development studies

07 p0921 A72-20183

Explosive/pyrotechnics performance monitoring for acceptance, lot qualification, comparison testing and system design guidelines

08 p1219 A72-20760

ATC radar performance monitoring, considering advances in radar signal processing and digital display techniques

08 p1134 A72-21525

Aircraft maintenance and reliability monitoring and control on scheduled airlines, considering component failure rate and mode analysis, sampling inspection and remedial action

09 p1261 A72-22901

Picoampere charged particle beam symmetry and magnitude monitor consisting of four transmission ion chambers

09 p1315 A72-23405

MONOCHROMATIC RADIATION

Hardware monitor and associated analysis programs to evaluate real time satellite command and control digital computer system performance

10 p1442 A72-23817

Structural Acoustic Monitor system for airframe structural proof testing, providing multichannel recording and aural monitoring of acoustic data derived from aircraft mounted accelerometers

10 p1459 A72-24146

Russian papers on automatic monitoring and electrical measurement methods covering optical systems, control devices, diagnostic test optimization, bionic applications, etc

11 p1611 A72-26435

Effectiveness and reliability criteria for information and monitoring systems performance evaluation, suggesting use of revenue ratio

11 p1611 A72-26437

Discrete automatic monitoring and measuring systems with discrete random sequence and continuous process reconstructed output signals, deriving probability criteria for reading frequency determination

11 p1611 A72-26438

Optimization of diagnostic tests for monitoring industrial system efficiency, obtaining compromise between costs and utilization

11 p1611 A72-26441

Rank correlation coefficient method for complex control plants parameters selection, applying to aircraft power system monitoring

11 p1612 A72-26442

Low cost real time computerized C 14 radiopospirometry telemetering system for monitoring human metabolism data during space missions

12 p1774 A72-28277

Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors

15 p2182 A72-32636

Nondestructive monitoring techniques to optimize performance and service tests, considering penetrating radiation, electromagnetic induction, ultrasonics, holography, microwaves, acoustic emission and thermal monitoring

16 p2397 A72-33219

Photodiode-operational amplifier circuit for pulsed laser systems energy variations monitoring, noting insensitivity to ambient light conditions

16 p2402 A72-33607

Monitor and regulator for automatic speed control and flow velocity measurement in wind tunnel

16 p2392 A72-33609

'VI-like' and 'aVF-like' leads for continuous electrocardiographic monitoring.

19 p2759 A72-37244

Methods for monitoring the parameters of phased antenna arrays.

19 p2767 A72-38622

Computerized supervisory control for interpretation of subgoal statements from human operator to permit teleoperator interaction with environment without long time delay

21 p3011 A72-41417

Computer-operated data acquisition and control system for automatic diagnostic monitoring of propulsion research instrument

22 p3216 A72-42684

Development of a digital control system for a spacecraft propulsion test facility.

22 p3163 A72-42685

An advanced strain level counter for monitoring aircraft fatigue.

22 p3179 A72-42688

Signal quality monitoring of computer data transmission.

[ASME PAPER 72-AERO-1] 22 p3156 A72-43146

Multipoint real time all-day computerized noise monitoring system for diagnostic evaluation of airport, discussing design and applications

24 p3387 A72-44684

MONKEYS

Chlorpromazine tranquilizer influence on squirrel monkeys in electric shock tests, shifting postevent aggressivity to pre event anticipation

07 p0916 A72-18975

Space medical urological problems from experience with Biosatellite 3 monkey, discussing closed catheter conduit system, urinary calcium changes in immobilized animals and urinary diuresis

10 p1424 A72-23728

MONOCHROMATIC RADIATION

Monochromatic waves propagating in uniform magnetoplasma, considering resonant interaction with electrostatic approximation

01 p0107 A72-10138

Monochromatic electromagnetic field diffraction problems in homogeneous medium, presenting computer aided numerical analysis

02 p0171 A72-11690

Null electromagnetic field propagation in general relativity, applying to Stokes parameters definitions for monochromatic light

02 p0259 A72-12178

Solar coronal monochromatic optical emission, inferring electron density and ionization or temperature distributions and variations with time

03 p0422 A72-13208

Solar corona shape, structure and brightness changes during 11 year cycle from monochromatic and total eclipse white light observations

03 p0423 A72-13210

Monochromatic radio emission from decilight years distant stars, discussing search experiment by low noise multichannel receivers

03 p0436 A72-13827

Solar energy exchange by thermal radiation, investigating monochromatic emission factors at 0.3-15 micron

04 p0596 A72-14702

Laser coherent monochromatic light for cybernetics research in pattern classification, discussing fingerprints and letters

04 p0531 A72-15137

Dye laser monochromatic coherent light wavelength tuning with minimized optical cavity degradation and without external optics

04 p0531 A72-15502

Planetary nebulae NGC 2392, 6210, 6826, 6720 and 6853 observations, presenting monochromatic photographs and isophotic contours

05 p0713 A72-16021

Elliptical polarization and depolarization coefficients for monochromatic radio waves reflected from F 2 ionosphere using Stokes parameters

05 p0656 A72-16241

Scattering of arbitrarily impinging monochromatic electromagnetic waves by thin infinitely long isotropic, dielectric and metal rods of elliptic cross section

05 p0628 A72-16412

Nonlinear propagation effects of monochromatic circularly polarized vlf waves /whistlers, heli cons/ along field lines in magnetosphere

05 p0658 A72-16603

Monochromatic radiation pulse transfer in absorbing plasma, deriving heat wave propagation velocity

05 p0696 A72-16680

Plasma stability in field of longitudinal monochromatic wave, examining satellites excitation by Langmuir wave

05 p0696 A72-16681

Monochromatic light beam propagation in optically nonhomogeneous medium containing matter in near critical state, determining exciting wave electric field strength

05 p0691 A72-16683

Nonlinear monochromatic Alfvén wave propagation parallel to magnetic field in anisotropic plasma with long wavelength beam instability

07 p1039 A72-18915

One- and two-conductor transmission lines electromagnetically coupled to rocket, deriving current bounds in load impedances under incident plane monochromatic wave

07 p0956 A72-19556

Commercial radiographic system with data enhancement based on monochromatic blue film, noting image quality and exposure range

07 p0991 A72-20425

Semiregular variable CH Cygni observations from 1967 to 1969 with continuous spectrum variations comparison to monochromatic brightness changes

08 p1233 A72-21278

Narrow band signal envelope analysis of astronomically observed quasi-monochromatic emission sources

08 p1135 A72-21731

Monochromatic absorption coefficients determination for Ar heated in wall-stabilized arc at high temperatures and pressures

10 p1517 A72-23836

Stimulated monochromatic electromagnetic wave scattering derived from analysis of nonlinear interactions in magnetoactive plasma

12 p1849 A72-27063

Plane monochromatic electromagnetic wave scattering by rotating metallic cylinder, noting frequency shift dependence on cylinder translational motion velocity

13 p1914 A72-28370

Numerical methods to solve boundary value problems of monochromatic transport equations in light scattering media optics

13 p2001 A72-28504

Solar corona intensification analysis based on ionized Fe monochromatic emission spectra, investigating spectral lines behavior as function of temperature and electron density

13 p2047 A72-29736

Quasi-monochromatic wave interaction with second harmonic in weakly nonlinear medium, obtaining exact nonstationary solutions

13 p1971 A72-29911

Nonlinear damping of potential monochromatic waves in inhomogeneous plasma, obtaining resonance particle distribution function

13 p1923 A72-29984

Nonlinear AM and FM due to bonded nature of quasi-monochromatic whistler packets in magnetosphere

14 p2085 A72-30448

Monochromatic brightness coefficient measurements for Jupiter and Saturn disk centers and Uranus geometric albedo

14 p2152 A72-30491

Lagrangian complex amplitude derivation for monochromatic electrostatic wave in unmagnetized collisionless plasma, investigating nonlinear Landau damping effects on instability

14 p2140 A72-30939

Opponent color responses of monkey optic tract fibers to monochromatic lights, using chromatic adaptation and microelectrode recording

15 p2184 A72-31369

Submillimeter plane monochromatic waves propagation in ground layer of turbulent atmosphere, deriving received signals levels fluctuations

15 p2195 A72-31653

Monochromatic plasma wave excitation by cold electron beam, obtaining instability maximum amplitude and oscillation period

15 p2285 A72-32270

Monochromatic radio wave propagation in interplanetary plasma, deriving frequency spectrum and phase and amplitude fluctuations

15 p2202 A72-32656

Coherent CW radiation by tunable GaAs injection laser in external dispersive cavity at 77 K, discussing monochromatic output spectral analysis by Fabry-Perot interferometer

16 p2401 A72-33393

Monochromatic electromagnetic wave reflection and transmission at oblique incidence on sharp plasma boundary of moving ionization source

16 p2363 A72-33481

Monochromatic radiation pulse transfer in absorbing plasma, deriving heat wave propagation velocity

16 p2437 A72-33692

Plasma stability in field of longitudinal monochromatic wave, examining satellites excitation by Langmuir wave

16 p2437 A72-33693

Monochromatic light beam propagation and scattering in optically nonhomogeneous medium containing matter in near critical state, determining exciting wave electric field strength

16 p2426 A72-33694

Monochromatic carbon dioxide TEA laser

17 p2564 A72-35424

Multicomponent structure of Nd-glass laser radiation, observing active medium gain band portions interrelationships in free running and stimulated emission operation modes

17 p2564 A72-35507

Radio galaxies monochromatic luminosity-spectral index relationship from 3CR spectra studied at 10 MHz to 10,700 MHz

18 p2726 A72-36621

Experimental observations of the instability of stellar images from a bichromatic two-channel television system

19 p2860 A72-37956

Monochromatic brightness coefficient measurements for Jupiter and Saturn disk centers and Uranus geometric albedo

19 p2864 A72-38320

Influence of roughness on the thermal radiation emitted by opaque surfaces - Model test

19 p2881 A72-38393

Measurement of electron concentration in the plasma of a pulsed erosion-type accelerator

19 p2843 A72-38535

Nonlinear monochromatic Alfvén wave propagation along magnetic field in anisotropic rarefied plasma with firehose instability

20 p2957 A72-39381

Measurements of a mode-competition discriminant in a single-frequency argon ion ring laser

21 p3062 A72-40240

Nonlinear theory of the monochromatic circularly polarized VLF and ULF waves in the magnetosphere.

21 p3015 A72-40480

Pulsed monochromatic laser with toluene, xylene, ethanol, isoamyl alcohol and dimethylformamide solutions of organic dyes, discussing wavelength variations and power outputs

21 p3064 A72-41736

Holographic system resolving capacity increase by oblique illumination of object, analyzing plane monochromatic wave transmission through one dimensional semitransparent body

21 p3058 A72-41791

Monochromatic plasma waves linear and nonlinear coupling, discussing LF modulation partial transfer /Luxembourg effect/ and application to ionospheric diagnostics

23 p3319 A72-43517

Ionization structure and coarse and fine analyses in planetary nebulae spatial spectroscopic diagnostics based on line profile monochromatic intensity integral equation inversion

23 p3339 A72-44236

Visual sensitivity measurement in retinal areas with stepwise change from one monochromatic light to another, discussing eye movements effects and perception thresholds

23 p3258 A72-44385

Spectral composition and phase function of plane monochromatic light wave scattering by electrons in high temperature plasma

23 p3322 A72-44465

Utilization of a composite resonator for improving the monochromaticity of a semiconductor laser with electron-beam excitation

23 p3297 A72-44468

Stimulated monochromatic electromagnetic wave scattering derived from analysis of nonlinear interactions in magnetoactive plasma

24 p3431 A72-45716

MONOCHROMATIZATION

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc

02 p0223 A72-11402

Application of the moving-slit X-ray automonochromatization method in structural studies of planar diodes and an attempt to correlate electrical properties with lattice defects.

17 p2595 A72-34749

MONOCHROMATORS

Solar UV flux measurements by balloon-borne grating monochromator, using FM-FM analog and PCM telemetry systems for computerized data analysis

03 p0409 A72-13051

Fabry-Perot spectrometer/premonochromator assembly integral transmissivity as function of spectral tuning noting selectivity by amplitude modulation

08 p1172 A72-22035

Astronomical spectroscopy using ultraviolet resolution single Fabry-Perot interferometer in tandem with echelle Hilger monochromator

12 p1811 A72-27942

Cs vapor photoionization by sequential method via thermally tunable Ga-As laser and arc-lamp monochromator radiation

17 p2585 A72-34614

MONOCLINAL VALLEYS

U VALLEYS

MONOCOQUE CYLINDERS

U CYLINDRICAL SHELLS

MONOCOQUE STRUCTURES

MONOCOQUE STRUCTURES

Vibration and buckling analysis of doubly curved composite monocoque plates and shells of positive and negative Gaussian curvature, examining stacking sequence effect

02 p0292 A72-11990

Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

04 p0591 A72-15238

Russian book - Design principles in aircraft construction.

22 p3136 A72-42074

MONOCRYSTALS

U SINGLE CRYSTALS

MONOCULAR VISION

Functional organization of visual cortex in monkeys, discussing monocular and binocular responses, trigger and stimulus abstraction

01 p0011 A72-10467

Lateral spatial interactions of sensory receptors, discussing mathematical theory for monocular visual inputs described by real valued functions on continuum

01 p0021 A72-11196

Stereoscopic depth movement perception sensitivity compared to monocular movement

02 p0169 A72-12209

Objects visual detection probability distribution as function of angular size, contrast and search time, comparing binocular and monocular searches effectiveness

07 p0931 A72-19919

Response latencies and correlation in single units and visual evoked potentials in cat striate cortex following monocular and binocular stimulations

11 p1582 A72-26771

Monocular and biocular magnifiers for night vision equipment.

20 p2921 A72-39030

On a long-term temporal aspect of stereoscopic depth sensation.

23 p3258 A72-44381

Visual stimuli distance estimation with head stationary or moving, discussing performance after monocular motion parallax training

24 p3374 A72-44557

MONOLITHIC CIRCUITS

U INTEGRATED CIRCUITS

MONOMERS

Cation polymerization of beta-propiolactone without initial kinetics dependence on monomers concentration, relating acyl ion bonding and electron donor groups

09 p1275 A72-22496

Addition type polyimide-graphite fiber composites fabrication from monomeric reactant solutions to improve mechanical properties and thermal stability
12 p1834 A72-28091

Polymerization characteristics of 4-ferrocenyl-1, 3-pentadiene monomer, discussing synthesis on molar scale
17 p2512 A72-35934

Fiber optics development and physical foundations, discussing reflection, optical waveguides, vibrational modes during light transmission and fabrication from inhomogeneous glass and mixed monomers
24 p3425 A72-44782

MONOPLANES
NT BUCCANEER AIRCRAFT
NT ELECTRA AIRCRAFT

MONOPOLE ANTENNAS
First order admittance of coaxially driven infinite monopole antenna, obtaining Green function expansion
01 p0043 A72-11247

Vertically polarized logarithmically periodic monopole antenna for incoming wave front reception with low elevation angles in 1.5 to 30 MHz frequency range
02 p0195 A72-12697

Admittance calculation for vertical monopole antenna driven by coaxial line, approximating current distribution by polynomial with complex coefficients
04 p0501 A72-15429

Monopole antenna with lumped mutual coupling between driven and folded sections, noting staggered resonant frequencies and bandwidth broadening from input impedance analysis
06 p0782 A72-17355

Broadband cylindrical monopole antenna with adjustable quasi-distributed capacitive loading, comparing theoretical and experimental admittances
11 p1604 A72-25744

Active loop dipole aerials with height reduction properties at resonance, investigating transistor configurations in loop monopole aerial
12 p1792 A72-27699

Input impedances and current distributions of cylindrical monopole antennas of various lengths in hot lossy plasma as function of plasma density
13 p2009 A72-28538

Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole
13 p1916 A72-28541

Rod antenna near field energy flow direction and intensity characterization by time independent and dependent components of Poynting vector
13 p1932 A72-29398

Combination antenna unit with vertical monopole and two perpendicular slots in horizontal plane to yield steerable cardioid-shaped pattern for vertically polarized waves
15 p2206 A72-31776

Monopole antenna height reduction by transistor amplifier incorporation in antenna structure
15 p2208 A72-32391

Analysis of antennas on finite circular cylinders with conical or disk end caps.
17 p2525 A72-34361

The monopole slot - A small broad-band unidirectional antenna.
17 p2525 A72-34367

Engineering approach to the design of tapered dielectric-rod and horn antennas.
17 p2530 A72-35362

Analysis and prediction of coupling between collocated antennas.
20 p2902 A72-38999

Application of an agar-agar chamber for the study of electromagnetic waves in an inhomogeneous medium.
21 p3015 A72-40359

Computer-aided numerical solution for electric field structure of rod and plate, calculating field distortion by rod antennas and near lightning rod
21 p3086 A72-41671

MONOPOLES
Air shower cores or relativistic monopoles as sources of straight lightning, considering thundercloud conditions over ocean and land areas
03 p0350 A72-14100

Magnetic monopole search in lunar samples by electromagnetic measurement, determining flux limits for cosmic radiation and pair production in proton-nucleon collisions
06 p0880 A72-17884

Electromagnetic waves scattering by uniformly moving objects in free space, considering two dimensional monopoles and dipoles
09 p1282 A72-23523

Geomagnetic data testing by including monopole term in spherical harmonic reduction
13 p1951 A72-29394

Photoconductivity in depleted surface layer of quasi-monopolar semiconductors with arbitrary diffusion to Debye lengths ratio, noting n-type low resistance gallium arsenide
15 p2296 A72-32694

MONOPROPELLANTS
NT AEROZINE
Dissolved gases effect on liquid surface state during high pressure liquid monopropellant strand combustion
08 p1222 A72-22046

MONOPULSE ANTENNAS
Pulse IMPATT diode Ka band microwave rf head mechanically steered antenna array for airborne monopulse tracker applications
01 p0039 A72-10661

Bearing estimation performance of monopulse tracking with passive linear arrays, using computer simulation for various integration times and input S/N ratios
06 p0774 A72-17809

Optimization of monopulse antenna performance indices for specified sidelobe envelope function and/or specified pattern nulls
13 p1915 A72-28530

Cross coupling in a five horn monopulse tracking system.
17 p2513 A72-34356

L band optimum monopulse high power feed using dominate and higher order waveguide modes to develop sum and difference patterns
17 p2526 A72-34421

Five-horn feed system design for improving large steerable antenna monopulse performance, discussing weight and cost reductions by focal length selection
17 p2526 A72-34467

Combination of sum and difference diagrams of a dipole group in front of a parabolic reflector for a two-plane monopulse method
21 p3029 A72-40517

MONOPULSE RADAR
Low angle monopulse radar tracking errors due to multipath, considering amplitude variation across antenna aperture and reduction by target-image resolution
02 p0178 A72-12391

Ground secondary radar interrogator system using monopulse technique for bearing measurement, accuracy and interference reduction
04 p0493 A72-15523

Angular coordinates and slope determination from monopulse radar measurements of two unresolved targets
05 p0629 A72-16578

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique
18 p2662 A72-37047

Optimisation of slope of difference-mode radiation pattern in sum-and-difference-comparison monopulse radar.
23 p3264 A72-43606

MONOTONE FUNCTIONS
Monotonicity theorems for functionals and transformations in stochastic models of queueing, reliability and optimality problems
09 p1343 A72-23565

Solutions for multivalued evolution equations, considering monotonic maximal operator on finite dimensional Hilbert space
10 p1504 A72-24061

Cosmic objects and phenomena frequency distribution functions monotone decrease with respect to importance, considering star clusters, binaries, lunar craters, solar activity, etc
14 p2160 A72-30912

Non-monotonicity of temporal recognition of brief duration.
18 p2651 A72-36912

Certain algorithms for obtaining an approximate solution of incorrect problems on a set of monotonic functions
19 p2828 A72-38846

MONTE CARLO METHOD
Elliptic and parabolic partial differential difference equations solution using modified random walk Monte Carlo technique
01 p0093 A72-10858

Monte Carlo simulation on high energy cosmic ray propagation and multiplication in high altitude emulsion chamber observations, examining two-fire-ball and H-quantum models
01 p0121 A72-11123

Monte Carlo methods for hybrid computer solution of nonlinear parabolic partial differential equations with two spatial dimensions
02 p0186 A72-11657

Monte Carlo method application to meteor stream formation by meteor material ejection from comet nucleus, determining age of Draconids
02 p0282 A72-12333

Ionospheric photoelectron fluxes and motions simulated by Monte Carlo technique, including transport effects, elastic and inelastic collisions and energy losses
03 p0412 A72-13517

Rarefied gas heat transfer problem between two parallel plates of different temperatures, evaluating

nonlinear Boltzmann equation with Monte Carlo techniques
04 p0595 A72-14599

Orthogonal expansion of estimators and estimands in Hermite series for Monte Carlo computation
04 p0540 A72-15631

System natural frequency standard deviation estimator, using Monte Carlo method
[ASME PAPER 71-WA/APM-8] 05 p0734 A72-15972

Optimal sequential multiple decision procedures for radar receiver using Monte Carlo method
05 p0628 A72-16565

Flexible elastic plate nonlinear vibration response and noise transmission from turbulent boundary layer by Monte Carlo technique, discussing subsonic and supersonic flow regions
[AIAA PAPER 72-199] 05 p0651 A72-16850

Data uncertainties effects on thermal analysis, discussing Monte Carlo method combination with sensitivity analysis
[AIAA PAPER 72-60] 05 p0749 A72-16930

Nuclear-electron cascades longitudinal evolution calculation in ionization calorimeter for primary nucleons and pions, using Monte Carlo method
06 p0811 A72-17260

Monte Carlo scheme for dynamic evolution of spherical stellar systems
06 p0885 A72-18080

Direct simulation Monte Carlo method for rarefied gas dynamics, discussing computer display units use for flow visualization
07 p0973 A72-20344

Monte Carlo digital simulation of probabilistic buckling behavior of indeterminate structure under initial stresses due to random geometric lack-of-fit
07 p1095 A72-20348

Combined signal detection and trajectory estimation functions optimization application to Monte Carlo simulation for trajectory moving across two dimensional grid
08 p1144 A72-20858

Discrete-time nonlinear estimators digital implementations by computerized Monte Carlo method, comparing with alternative techniques
08 p1145 A72-20864

Maximum likelihood estimation for Weibull distribution parameters from multicensored samples by Monte Carlo simulation
08 p1200 A72-21589

Bayes estimators for Poisson distribution random parameters and reliability function, using Monte Carlo method and maximum likelihood estimation
08 p1200 A72-21590

Hybrid Monte Carlo techniques with digital and analog computers and minimal interface, simulating random walks for partial differential equations solution
08 p1138 A72-21602

Book on heat transfer by thermal radiation, covering black body radiation, electromagnetic theory, energy exchange, Monte Carlo solution, and absorbing and emitting media
09 p1411 A72-23046

State estimation for nonlinear discrete-time system based on quantized data, presenting maximum likelihood estimate solution and Monte Carlo simulation results
09 p1290 A72-23095

Monte Carlo and convolution methods for statistical analysis of ladder filters, describing programs for determining attenuation probabilistic distribution as function of components dispersions
09 p1289 A72-23679

Bayesian analysis application to reliability and life parameter estimation for Weibull failure model, using Monte Carlo simulation
10 p1503 A72-23978

Transport theory Boltzmann equation and Monte Carlo methods applied to semiconductor negative differential mobility calculation
10 p1526 A72-24398

Observation errors effects on satellite attitude best least squares estimate based on direction measurements, using Monte Carlo method computer simulation
10 p1438 A72-24692

Monte Carlo random walk methods for directional emittance of one dimensional absorbing-scattering slab with reflecting boundaries, considering refractive index, optical thickness and albedo
[AIAA PAPER 72-309] 11 p1743 A72-25243

Numerical integration for many body systems equations of motion, noting Monte Carlo and Boltzmann moment methods for large systems
12 p1873 A72-27895

Dynamical evolution of spherical star cluster under effect of internal encounters, using Monte Carlo models
12 p1873 A72-27896

Monte Carlo scheme for dynamical evolution of spherical star clusters, considering stellar dense core, spurious relaxation and escape
12 p1875 A72-27919

- Hybrid computer Monte Carlo solution algorithm for parabolic partial differential equations with time varying boundary conditions, applying to ferromagnetic rod magnetization problem 12 p1787 A72-28119
- Monte Carlo method for radiative transport theory problems, considering mathematical models of light scattering media and photon trajectory random elements 13 p2001 A72-28505
- Atmospheric model for random density variations effects on space shuttle reentry parameters, using Monte Carlo trajectories for delta wing orbiter 13 p1990 A72-28814
- Monte Carlo simulation for imperfect second order hybrid phase locked loop in radio frequency interference and Gaussian noise backgrounds, employing digital computer simulation model 13 p1935 A72-29104
- Monte Carlo method application to meteor stream formation by meteor material ejection from comet nucleus, determining age of Draconids 13 p2039 A72-29217
- Quasi-classical mechanical approximation in molecular scattering, using Monte Carlo methods for Jacobian determinant evaluation 14 p2134 A72-30836
- Upward and downward radiative transfer in atmosphere-ocean system model calculated by Monte Carlo method, noting turbidity effect on radiance 15 p2224 A72-31673
- Computerized Monte Carlo techniques for nonlinear error analysis of system behavior, using random number generators for input distribution simulation 15 p2264 A72-32184
- Monte Carlo simulation method for flow field around two dimensional or axisymmetric body immersed in hypersonic rarefied gas flow 16 p2342 A72-32882
- Monte Carlo treatment of Lyman-alpha radiation in a plane-parallel atmosphere. 17 p2598 A72-34538
- Study of high energy /25-10,000 GeV/ interactions with a multilayer cloud chamber using Monte Carlo simulations for energy calibration. 17 p2585 A72-34922
- Monte Carlo calculation of radial and time dependence of isophote diagrams for Cerenkov light in 0.1 to 1 TeV extensive air shower 17 p2599 A72-35142
- Hybrid computer Monte Carlo solution algorithm for parabolic partial differential equations with time varying boundary conditions, applying to ferromagnetic rod magnetization problem 19 p2770 A72-38620
- Monte Carlo trajectory calculations of the three-body recombination and dissociation of diatomic molecules. 19 p2838 A72-38805
- A Monte Carlo model of turbulent mixing for the prediction of NO production in steady-flow combustors. [WSCIPAPER 72-8] 20 p2982 A72-38973
- Monte Carlo studies of the relaxation of vector end-to-end length in random-coil polymer chains. 20 p2898 A72-39599
- Application of the Monte-Carlo method to the calculations of the configuration of a heat source whose material is subjected to the action of electron beams 21 p3127 A72-40135
- Transfer of resonance-line radiation in differentially expanding atmospheres. I - General considerations and Monte Carlo calculations. 21 p3106 A72-41037
- Variance reduction in Monte Carlo analysis of rarefied gas diffusion. 21 p3046 A72-41183
- Kullback-Leibler information function and the sequential selection of experiments to discriminate among several linear models. 21 p3075 A72-41187
- On the calculation of variances of solutions to linear simultaneous equation. 21 p3075 A72-41233
- The application of Monte Carlo methods to the nonlinear filtering problem. 23 p3274 A72-43541
- Approximation for Monte Carlo method modeling of pion-nucleon and nucleon-nucleon inelastic collisions at high energies 23 p3317 A72-44414
- Ranking the reliability of two designs by Monte Carlo techniques. 24 p3383 A72-44655
- MOON**
- Critique of Brown lunar theory, discussing planetary orbits, earth and moon figure effects and second order terms 01 p0122 A72-10009
- Review of papers on planetology given at Brighton symposium, covering moon, Venus, Mars and Jupiter. 01 p0132 A72-11071
- Solar wind and geomagnetic tail interaction with moon, discussing lunar Mach cone evidence for anisotropic wave propagation in magnetized collisionless warm plasma 07 p1061 A72-20025
- Lunar center of mass position with respect to visible hemisphere physical surface calculated from photogrammetric analysis and Lunar Orbiter I data 08 p1232 A72-21158
- Soviet papers on physics of moon and planets covering Martian violet clouds, UV absorption levels in Jupiter and Saturn disks, etc 08 p1237 A72-21826
- Lunar motion as plane restricted three body problem in celestial mechanics 11 p1722 A72-26478
- Solar eclipse timings by photoelectric, photographic and visual observation for comparison of Newcombe sun tables and improved lunar ephemeris reference systems 13 p2041 A72-29527
- Mars and moon cores elastic properties inferred from hydrostatic equilibrium based on observed data for total mass, radius and moment of inertia 13 p2048 A72-29809
- Star catalog zero-point improvement by Bessel method modification for lunar observation data reduction 14 p2149 A72-30210
- Cylindrical model of interplanetary magnetic field-moon interaction, taking into account solar wind flow boundary condition asymmetries 14 p2154 A72-30514
- Moon radius from Lunar Orbiter I angular velocity data obtained from camera image motion compensator sensor /V/H sensor/ 17 p2603 A72-34207
- Ephemeris time, lunar orbital elements and FK4 equinox correction from the observations of the moon by the method of equal altitudes. 17 p2603 A72-34274
- New orbital elements for moon and planets. 17 p2609 A72-35106
- Positions of the major planets and the moon observed at the 0.33 M photographic equatorial 19 p2858 A72-37856
- Lunar center of mass position with respect to visible hemisphere physical surface calculated from photogrammetric analysis and Lunar Orbiter I data 20 p2969 A72-39263
- Recent developments in the theory of the motion of the moon. 21 p3102 A72-40124
- Lunar thermal history model, considering nonuniform initial composition, radioactive element partitioning and melt cutoff value 22 p3225 A72-42529
- Lunar albedo and temperature distribution from simultaneous photoelectric and far IR brightness temperature measurements of sunlit lunar surface 22 p3226 A72-42536
- Star catalog zero-point improvement by Bessel method modification for lunar observation data reduction 23 p3333 A72-43240
- Discrepancy between Brown theory and Griffith values for lunar perigee and node mean motions partial derivatives with respect to moon mean motion 24 p3442 A72-45241
- MOON ILLUSION**
- Parallel swing with affixed luminous disks test for induced vestibular stimulation effects on moon illusion, noting eye movement factors 20 p2893 A72-38900
- MOON-EARTH TRAJECTORIES**
- Cosmic proton and neutron produced recoil proton energy spectra measurements along earth-moon-earth trajectory with nuclear emulsions aboard Zond 5 and 7 [CERN-71-16] 02 p0273 A72-12074
- MOONMOBILES**

- Mossbauer spectra measurement of metallic iron, sodium nitroprusside, sodium ferrocyanide and ferrocyanide absorbers at 78-293 K, fitting temperature dependences and resonant velocity to models 01 p0114 A72-10324
- Miniature vacuum furnace for Mossbauer spectroscopic samples heating to 1000 C, discussing temperature control, use of inert atmospheres, etc 04 p0523 A72-15481
- Critique of paper on heat capacity and thermal conductivity of Apollo 11 lunar rocks at liquid helium temperatures, noting constraints imposed by Mossbauer data 07 p1084 A72-20521
- Mossbauer gamma radiation diffraction by Y-Fe garnet crystals with Mossbauer nuclei in magnetic and electric field nodes 08 p1217 A72-21767
- Hyperfine interactions of Fe cations in ilmenite determined by Mossbauer spectroscopy, noting internal magnetic field and quadrupole coupling constant 09 p1367 A72-22457

- Mossbauer lines diffusion broadening and weakening in crystals impurity atoms nuclear spectra
09 p1371 A72-23030
- Defects high temperature diffusion effect on Mossbauer spectral lines width and positions in crystals with quantum transfer between multiplet sublevels in fine structure
09 p1372 A72-23038
- X ray and Mossbauer spectral analyses of thermomagnetically treated nickel ferrite samples containing Co, investigating ordering mechanism
13 p2020 A72-28490
- Mossbauer and X ray structural analysis of nickel ferrite-chromite magnetic moments, comparing with theoretical data
14 p2141 A72-30171
- Hyperfine magnetic field reduction produced in Fe-Cr alloy single crystal by Cr atoms observed by Mossbauer method, proposing spin disturbance mechanism
15 p2293 A72-32230
- Mossbauer spectroscopy theory and application to steel technology, discussing spectral characteristics of various iron phases and corrosion and stress effects
16 p2405 A72-32824
- Study by Mossbauer spectrometry of the iron distribution in mineralogical fractions separated from lunar rocks brought back by Apollo 12
17 p2607 A72-34917
- MOTILITY**
U LOCOMOTION
- MOTION AFTEREFFECTS**
Reaction time to visual orientation change, obtaining aftereffects as function of orientation specific adaptation duration and separation angle between inspection and test lines
08 p1124 A72-20986
- MOTION EQUATIONS**
U EQUATIONS OF MOTION
- MOTION PERCEPTION**
U SPACE PERCEPTION
- MOTION PICTURES**
Motion picture technique for studying vapor bubbles formation, determining temperature fluctuations on heated surface below active region
03 p0457 A72-14153
- Synchronization system for remote control and performance checking of motion picture projectors with running film, discussing recording equipment and stroboscopic pulsed illuminator operations
04 p0521 A72-14711
- FORTAN digital simulation of ATC radar beacon system making possible computer generated movie display
07 p0950 A72-19301
- Turbulent earth atmosphere optical inhomogeneities determination from solar limb image characteristics in motion pictures of solar disk edge
09 p1305 A72-22233
- Radiation transfer equations solved in isotropic light scattering approximation, relating transfer function to motion picture film optical properties
13 p1955 A72-28519
- Discontinuity of seen motion reduces the visual motion aftereffect.
19 p2760 A72-37600
- Role of eye movements in the perception of apparent motion.
23 p3259 A72-43804
- MOTION SICKNESS**
Navigators, pilots and airman trainees response to Coriolis accelerations, investigating nystagmus sensitivity coefficient relationship to motion sickness resistance
01 p0021 A72-11286
- Human vestibular stability under frontal and sagittal head tilts in rotating chairs, discussing motion sickness onset
05 p0622 A72-16640
- Galvanic skin response techniques for palmar and dorsal sweat detection during motion sickness by vestibular stimulation, comparing arousal and thermal sweat response
07 p0933 A72-20185
- Loudness function correlations to illusory spiral aftereffect persistence, motion sickness susceptibility and auditory reaction time in individuals
08 p1128 A72-22138
- Motion sickness experience correlations to vestibular tests in pilots and nonpilots
12 p1764 A72-28257
- Vision influence on acute motion sickness elicitation in slow rotation room, comparing with vestibular factors
12 p1764 A72-28258
- Environmental temperature effect on motion sickness sweating, discussing nausea and discomforting symptomatology prediction
12 p1775 A72-28302
- Experimental motion sickness studies in slow rotation room simulating rotating spacecraft conditions, noting relation between subject susceptibility and number of head motions
16 p2354 A72-33542
- Influence of high temperature on the onset of motion sickness
21 p3004 A72-41749
- Influence of vision on susceptibility to acute motion sickness studied under quantifiable stimulus-response conditions.
24 p3377 A72-45659
- MOTION SICKNESS DRUGS**
Antimotion sickness drugs effectiveness based on acetylcholine or norepinephrine induced changes of balance between vestibular and reticular neurons
10 p1427 A72-23726
- MOTION STABILITY**
NT AERODYNAMIC STABILITY
NT AIRCRAFT STABILITY
NT ATTITUDE STABILITY
NT BOUNDARY LAYER STABILITY
NT DIRECTIONAL STABILITY
NT FLAME STABILITY
NT FLOW STABILITY
NT GYROSCOPIC STABILITY
NT HOVERING STABILITY
NT LATERAL STABILITY
NT LONGITUDINAL STABILITY
NT MAGNETOHYDRODYNAMIC STABILITY
NT ROTARY STABILITY
NT SPACECRAFT STABILITY
- Stability of and motion about L4 in restricted three body problem with 3 to 1 commensurability between long and short periods of motion
01 p0122 A72-10010
- Stability relative to part of variables of n-dimensional vector equation, considering applications to solid bodies with fluid filled cavities and gyrostat satellite optimal stabilization
02 p0251 A72-11494
- Unperturbed motion asymptotic stability and instability theorems, considering Liapunov function method
02 p0260 A72-12432
- Motion stability of sphere and homogeneous semi-infinite rotating cylinder in circular orbits and monoenergetic streams, integrating by trajectories
02 p0285 A72-12832
- Finite time motion stability of systems with small parameter, using method of averaging and matching principle
03 p0390 A72-13910
- Linear nongyroscopic conservative system stability from modified Lagrange equations of motion, using pseudo degree of freedom concepts and vibration method
03 p0362 A72-14394
- Instability effect on aperiodic motion of nonlinear thermomechanical oscillator from periodic solutions
04 p0547 A72-14458
- Plane physical pendulum motion stability under randomly oscillating suspension point with allowance for viscous friction
04 p0549 A72-15055
- Steady state angular motion stability of passive magnetically stabilized satellites, using Liapunov method
05 p0726 A72-16464
- Flexible antennas effect on three dimensional motion stability of gravity gradient satellite, using coupled rigid-elastic analysis
05 p0727 A72-16470
- Nonlinear motion stability of finite amplitude wave solution in thin viscous incompressible liquid film
06 p0801 A72-18142
- Mechanical systems with nonlinear position functions, elastic elements or self damping, investigating oscillation mode onset and stability conditions
06 p0850 A72-18701
- Nonlinear resonance oscillations of flexible rod and elastic cylindrical shell under potential and nonpotential forces, investigating motion instability
06 p0900 A72-18704
- Sensitivity functions for differential equations describing aircraft perturbed motion, noting dependence on time derivatives, system parameters and coordinates
07 p1032 A72-18977
- Parachute design for very high altitude sounding rockets, discussing stability and descent velocity requirements and test methods
07 p1085 A72-19604
- Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application
07 p1035 A72-19972
- Perturbed motion differential equations for stability and integration problems in mechanics
08 p1205 A72-20964
- Saturn ring motion stability factors for atomized material resistance to gravitational field, discussing ring thickness, density and other parameters
08 p1231 A72-21128
- Distant stellar satellites existence possibility based on maximum distance estimation for material particle motion stability with respect to sun or another star
08 p1231 A72-21133
- Bounded circular-space three body problem, obtaining Lagrangian solutions for triangular motion configuration stability
08 p1232 A72-21134
- Liquid fuel elastic rocket motion stability in supersonic flight, using vibration and thrust vector control equations for dynamic properties description
08 p1241 A72-21633
- Liapunov stability of circular equatorial motions of light bodies in Kerr gravitational field of massive rotating body, using geodesic lines equations
08 p210 A72-22071
- Asymptotic motion stability for part of periodic and continuous systems variables, deriving solution uniqueness sufficient conditions
09 p1350 A72-22206
- Motion stability of linear discrete deterministic and random systems over finite time interval
09 p1291 A72-23428
- Upper bounds on lumped and continuous dynamic systems motion under loads and perturbations, discussing structure stability conditions
[ASME PAPER 71-APMW-3] 10 p1554 A72-24188
- Stability of superluminal and subluminal waves propagating transversely to external uniform magnetic field in streaming relativistic plasmas
10 p1522 A72-24608
- Oscillation modes and stability region of harmonic oscillators with homogeneous nonlinear rheological differential equations of motion
10 p1513 A72-24998
- Body center of mass position for stable fall in viscous fluid, determining terminal velocity as function of body geometry
10 p1470 A72-25067
- Periodic motions stability of nonlinear control systems with energy consumption, using contact transformations
10 p1458 A72-25074
- Spacecraft motion stabilization about mass center and optimal angular velocity control using minimax technique
11 p1684 A72-26903
- Inverted pendulum subjected to small amplitude sinusoidal periodic and stochastic base motion, determining stability boundaries by averaging method
12 p1844 A72-27247
- Simultaneous nonhomogeneous internal and external friction effects on nonconservative force systems motion stability, considering cantilever beam compression
12 p1845 A72-27321
- Runaway stars trajectories stability tested from clusters study, noting preservation of energy, velocity and position and reproducibility
12 p1873 A72-27900
- Orbital and rotational motion stability of solid body containing elastic rods and fluid-filled cavity
13 p2002 A72-28715
- Control parameters required for stabilization of motion in systems with nonholonomic couplings by dynamic programming method of summary representations
13 p2003 A72-29068
- Nonlinear oscillations amplitude, frequency and instability regions of moving belt as function of longitudinal velocity
13 p1964 A72-29150
- Liapunov functions and integral inequalities for study of finite time stability of motion, noting small parameter system subjected to continuous disturbances
13 p2004 A72-29496
- Dynamic system motion stability estimation with Liapunov function in quadratic form, applying to circular satellite orbit stability in axisymmetric gravitational field
14 p2161 A72-31079
- Axisymmetric flight vehicles motion stability and transient behavior via Liapunov method, taking into account nonlinear characteristics
15 p2318 A72-31203
- Liapunov function application to stability of unperturbed motion of differential equations with respect to part of variables
16 p2422 A72-32940
- Pasquill method adequacy for atmospheric stability conditions discrimination and prediction of horizontal and vertical turbulence intensities
16 p2419 A72-33943
- Study of the stability of certain relative equilibria of a symmetrical satellite
17 p2620 A72-34282
- Russian book - Introduction to the theory of stability of motion
18 p2711 A72-36523
- Motion stability of inertial navigation gyroscopic system with gyro horizon compass, noting constant and time dependent coefficients of motion equations
19 p2830 A72-37320
- Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application
20 p2955 A72-40029
- Numerical stabilization of the differential equations of Keplerian motion.
21 p3106 A72-41050
- Non-linear rotor bearing behavior.
21 p3061 A72-41518

Instability of the equilibrium position of a multidimensional system consisting of 'neutrally' unstable subsystems

21 p3126 A72-41546

Long term stability of earth and lunar orbiters - Theory and analysis.

[AIAA PAPER 72-936]

21 p3112 A72-41574

Asymptotic motion stability analysis with respect to part of variables, using Liapunov functions for solution boundedness conditions

22 p3204 A72-41901

Orbital and rotational motion stability of rigid body containing elastic rods and fluid-filled cavity

22 p3204 A72-42092

Frequency stability criterion for variable-structure automatic control systems

22 p3162 A72-42185

Helicopter rotor blade flapping motion stability, applying perturbation technique to linear equations of motion for different advance ratios and Lock numbers [AIAA PAPER 72-955]

22 p3137 A72-42351

Atmospheric frontal motion stability via two-layer homogeneous incompressible fluid model, solving eigenvalue problem by small perturbation method

22 p3201 A72-42505

Stability of motion at collinear libration centers in the restricted problem of three bodies with allowance for light pressure

24 p3437 A72-44762

Iterative solution for adiabatic radial pulsation in massive main sequence star, noting transition to non-linearity via Eddington stability integral extension

24 p3438 A72-44833

MOTIVATION

Management enhancement of researchers motivation in times of economic uncertainty, stressing security related aspects of employment

06 p0905 A72-17396

Motivation in vigilance, studying effects of subject self evaluation and experimenter knowledge of results/ controlled feedback

06 p0766 A72-17711

Terminal area ATC specialists and trainees job attitude and motivation from questionnaire on challenge, tasks, salary, work schedule, etc

06 p0766 A72-17865

Incentive contracts with price differential acceptance test plans to motivate producer to product improvement, defining admissible strategies in terms of risk limitation

13 p2066 A72-28354

Conditioned slow negative potential of human brain cortex dependence on motivation, emphasizing punishment avoidance conditions

16 p2353 A72-33097

Self-paced ergometer performance - Effects of pedal resistance, motivational contingency and inspired oxygen concentration.

18 p2653 A72-36911

Employee motivation programs as a means of cost reduction in aerospace industries.

24 p3468 A72-45221

MOTOR SYSTEMS (BIOLOGY)

U EFFERENT NERVOUS SYSTEMS

MOTORS

NT ELECTRIC MOTORS

NT SERVOMOTORS

NT SYNCHRONOUS MOTORS

NT TORQUE MOTORS

Variable rigidity effects of ball bearings on axial loading stability and failure of gyromotor supports

15 p2235 A72-31898

MOUNTAIN INHABITANTS

Respiration control during hyperoxia, discussing chemoreceptor significance in minute volume respiration rate reduction mechanism from Pamir mountain aborigines oxygen breathing reaction studies

08 p1120 A72-22076

Native highlander and lowlander chemoreflex ventilatory response to transient carbon dioxide inhalation at low and high altitudes

12 p1762 A72-27728

High altitude natives cerebral arterial-venous oxygen difference measurement during ambient air and oxygen breathing, showing chronic hypoxia effect on cerebral blood flow

14 p2079 A72-30704

Mountain inhabitants cardiocirculatory adaptation to chronic hypoxia, studying coronary flow and myocardial oxygen consumption and efficiency

15 p2187 A72-32498

Ventilatory peripheral chemoreflex response to hypoxia during physical exercise in native highlanders and altitude-acclimated lowlanders

17 p2499 A72-34345

Pulmonary gas exchange in Andean natives at high altitude.

18 p2650 A72-36570

Vascular headache of acute mountain sickness.

22 p3150 A72-42491

Adaptive processes responsible for natural acclimatization of human organism to low ambient pressures at high altitudes

22 p3143 A72-42584

Anatomy of the coronary circulation at high altitude.

22 p3144 A72-42594

Resistance and capacitance vessels of the skin in permanent and temporary residents at high altitude.

22 p3144 A72-42595

MOUNTAINS

NT HIMALAYAS

Mountain stations wind measurement usefulness for small aircraft traffic guidance

04 p0544 A72-15625

Mountains located on meteor propagation path of radio waves, investigating effect on transmission region size

08 p1239 A72-21891

Weather analysis for mountainous terrain from potential temperature surface maps and vertical cross sections

09 p1344 A72-22431

Numerical shallow fluid model for air flow across orographic variable grid barrier, using idealized Andes Mountains range

12 p1838 A72-27023

Winds aloft forecast use to predict southwestern mountain lee wave behavior for general aviation cross country flights

13 p1993 A72-28863

Atmospheric boundary layer and diffusion over three dimensional mountainous terrain by laboratory simulation with meteorological wind tunnel and scale model

[AIAA PAPER 72-648]

16 p2419 A72-34085

Medical and technical aspects of rescue and survival of astronauts in high mountain and mountainous remote areas.

17 p2507 A72-34434

Structure of Sierra Madera, Texas, as a guide to central peaks of lunar craters.

21 p3049 A72-41114

Ka-26 helicopter operational flight testing in high mountain environment, discussing takeoff, landing and climb performance as function of altitude dependent engine characteristics

23 p3251 A72-43638

Certain characteristics of the muon and electron components of extensive air showers at mountain level

23 p3331 A72-44425

MOUNTING

NT RIGID MOUNTING

Solar array for San Marco C satellite to study neutral atmosphere structure, discussing interior mounting design features

12 p1758 A72-28038

Laser ranging instrument for satellite distance measurement, discussing four-axial mounting, guiding telescope, receiving optics and performance

15 p2247 A72-31935

Reduction of the effect of mount deformation on the flexure of the telescope mirror

19 p2801 A72-37967

High power pulsed ruby laser and sapphire rods optical contacting technique

21 p3063 A72-40622

MOUNTS

U SUPPORTS

MOUTH

Influence of ionizing radiation on the tooth organ

22 p3141 A72-41987

MOVING TARGET INDICATORS

MTI radar system design philosophy for target detection in land clutter environment

02 p0178 A72-12390

Radar measurement accuracy in log-normal clutter of fluctuating targets in random noise or intentional interference

02 p0178 A72-12401

Pulse and Doppler microwave radars comparison with respect to accuracy of moving targets velocity measurements and power characteristics

05 p0661 A72-16034

Electronic scanning steerable phased array radar beam pointing capability improvement for moving target detection probability

06 p0772 A72-17423

Criterion for estimating radar capability to resolve two targets with differential motion, noting application to synthetic aperture radars and Doppler filters

08 p1134 A72-21424

Digital MTI detection filter using on-line adaptive procedure for adjustment

10 p1456 A72-23804

Detection probability for moving small targets embedded in random white noise on TV display, comparing machine processed pattern recognition techniques and human performances

12 p1843 A72-27933

Recursive digital MTI radar filter design in z plane, detailing spectrum rolloff and flat passband in amplitude response

16 p2369 A72-33758

Design of nonrecursive digital moving-target-indicator radar filters.

18 p2667 A72-36687

Weighting factor and transmission time optimization in video MTI radar.

21 p3022 A72-41088

Effect of envelope limiting in pulse-compression moving-target-indicator radar systems.

24 p3380 A72-45577

MRKOS COMET

Observation and feature variations of comet 1969e before and during the perihelion passage.

24 p3445 A72-45463

MSRE REACTORS

U MOLTEN SALT NUCLEAR REACTORS

MTBF

Redundancy configuration effect on electronic system reliability, discussing MTBF and cost analysis

02 p0194 A72-12444

Aircraft flight control system MTBF field operational and MIL-STD-781 testing, establishing data baseline for reliability predictions

05 p0638 A72-16662

Confidence level determination in terms of reliability index (MTBF) for MIL-STD-781 truncated sequential probability ratio tests

10 p1444 A72-23985

Training cockpit TL-29 mean time of failure-free operation from measurement data during development tests and two year guarantee, calculating avionics devices reliability

14 p2092 A72-30288

Microwave power junction transistor design factors effects on long and short term reliability and MTBF

18 p2666 A72-36552

Reliability prediction of a two-unit standby redundant system with standby failure.

20 p2929 A72-39855

Evaluation of the mean time to tracking failure in a nonlinear pulsed servo with irregular signal input

21 p3038 A72-40708

Prior distributions fitted to observed reliability data.

22 p3182 A72-41980

Determining optimum burn-in and replacement times using Bayesian decision theory.

22 p3182 A72-41982

MTI RADAR

U MOVING TARGET INDICATORS

MUFFLERS

Sound field measurement in circular and rectangular air duct with sound-absorbing walls (mufflers), deriving empirical formula for attenuation frequency characteristics

09 p1354 A72-23683

MULLITES

Reusable external thermal insulation mullite for space shuttle vehicle, presenting conductivity, expansion coefficient, specific heat, stability, tensile strength and strain capability

01 p0091 A72-10762

Mullite as part of aluminum oxide-silicon dioxide system, discussing formation, structure, physical chemistry, additives effects and high alumina refractories

10 p1501 A72-24729

The manufacture of mullite reusable surface insulation materials for space shuttle.

[SME PAPER EM 72-714]

18 p2695 A72-36527

MULTICHANNEL COMMUNICATION

Molniya-Orbit communication satellite system, discussing operational quality, maintenance, television transmission facsimile, sound broadcast and multichannel telephony

01 p0023 A72-10046

Wideband data transmission on group-band communication channels, using dual single-sideband modulation with basic transmission rate of 48 kbit/sec

01 p0024 A72-10113

Orthogonal convolutional coding with on-off signaling and Viterbi decoding for synchronous multiple access communication with bound bit error rate

01 p0026 A72-10343

FM radio link superposed parabolic antenna systems adjustment for space diversity reception for scatter propagation and broadband multichannel transmission in 1.9 GHz range

01 p0027 A72-10410

S band transistor power amplifier design and performance, noting application for 960 telephone channel relay system

01 p0038 A72-10657

Low noise phase locked power microwave sources for solid state radio links with 960 voice channels, discussing design

01 p0006 A72-10712

Multichannel communication system reliability, considering channel repair time random distribution

01 p0033 A72-11263

Time division multiple access systems for communication satellites, discussing performance and application in Intelsat network

01 p0033 A72-11301

Time division multiple access system with 100/50 M bit/s channel capacity for Symphonie and Intelsat satellite speech channels

01 p0033 A72-11302

Time division multiple access systems for satellite transmission, discussing burst transmission control problem associated with transmitting end synchronization

01 p0033 A72-11303

Time division multiple access systems transmitting and receiving end synchronization control criteria derivation, discussing code pattern selection for reliable detection

01 p0033 A72-11304

Switching operations in TDMA system, noting availability of signaling channels with broadcast mode

01 p0033 A72-11305

Spectral characteristics of ionospheric signal by phase lags introduced in multichannel field recorder

02 p0172 A72-11926

Multichannel space station communications using PCM-PSK-PM interplex modulation for reducing cross modulation loss

02 p0174 A72-12131

Intermodulation noise in multichannel frequency division multiplex telemetry systems due to nonlinearities in transmitter-receiver links and tape recorder

02 p0175 A72-12145

Multichannel high-speed high-density digital recorder, describing tape transport and signal system

02 p0187 A72-12151

Communication satellites multiple access, using time division multiplex method

02 p0181 A72-12607

Multiple access techniques in satellite telecommunication systems, discussing clean mesh type network

02 p0182 A72-12699

Graphical and tubular methods for frequency assignment to avoid intermodulation interference in channelized bands

03 p0325 A72-14046

Communication satellites performance improvement by time division multiple access techniques and use of frequencies above 10 GHz for localized coverage through highly directive beams

04 p0494 A72-15676

Time division multiple access (TDMA) satellite communication system optimal design, discussing earth stations, satellites and transmission path characteristics

05 p0626 A72-16298

Exercise ECG multichannel radio telemetry equipment, discussing sources of malfunction and unreliability and remedial procedures

05 p0621 A72-16610

Signal coding for discrete information in multichannel systems using multiple differential phase shift keying

06 p0773 A72-17500

Multichannel communication system in adaptive system based on random parameter extremum criterion, deriving average usage time of extremal channel

07 p0938 A72-19008

FM mf equipment for 2700-channel Hertzian beam, considering thermal noise, intermodulation and equivalent distortion of amplifiers, discriminator, limiter, etc

07 p0954 A72-19190

Digital decision directed suboptimal receiver design for random multipath channel communication with intersymbol interference, predicting performance for steady state probability of correct decision

07 p0941 A72-19272

TDMA satellite communication system with convolutional encoding and Viterbi decoding, evaluating data buffering and control configurations

07 p0941 A72-19297

Error probability estimates in two channel diversity reception systems with allowance for fading correlation and incomplete signal separation

09 p1278 A72-22572

Multiple access to communication satellites in time division multiplex, discussing burst phase control and ground station receiving-transmitting systems

09 p1278 A72-22852

Multichannel integral commutators with MOSFET as switching elements, calculating transmission errors

10 p1449 A72-24288

Frequency measurements of square wave signal with unknown amplitude by two mismatched channels, comparing rms error with effective estimate variance

10 p1436 A72-24509

Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution

11 p1651 A72-26363

Clock synchronization of multichannel radio communications systems using orthogonal signals with overlapping transmission spectra

11 p1598 A72-26727

Noise immunity and code sequence rejection probability in real multifrequency communications systems with multipositional frequency shift keying

11 p1598 A72-26729

Intelsat 4 satellite communication transponder design for broadband multicarrier operation, using frequency and pulse modulation techniques

[AIAA PAPER 72-535] 12 p1780 A72-27358

Intelsat V satellite system with large telephone channels capacity and full earth station network connectivity, discussing system concepts and technology

[AIAA PAPER 72-536] 12 p1780 A72-27359

TDMA system for Intelsat 4 and subsequent satellites, discussing automatic synchronization acquisition, terrestrial network-satellite transmission channel modular interface, etc

[AIAA PAPER 72-538] 12 p1780 A72-27361

Intelsat satellite time division multiple access system (TDMA) using semiconductor technology with burst synchronization

[AIAA PAPER 72-546] 12 p1781 A72-27369

Aircraft and water vehicles mobile communications via stationary satellite, discussing optimum multiple access and repeater configuration

[AIAA PAPER 72-565] 12 p1781 A72-27376

AM/PM conversion and transfer in nonlinear signal transmission systems, calculating coefficients as function of multicarrier powers for intelligible crosstalk

12 p1782 A72-27554

Bandpass filter harmonic signal phase shift distortion effect on transient response in PSK of multichannel transmission

12 p1783 A72-27630

Intelsat 3 global multichannel wideband multiple access communication system, describing technological advancements in communication performance, attitude control and testing procedures

[AIAA PAPER 72-534] 13 p1918 A72-28982

Self adaptive two channel iteration servosystems for input reconstruction by successive approximations, determining signal and noise error operators

13 p1936 A72-29155

Spectral characteristics of ionospheric signal by phase lags introduced in multichannel field recorder

13 p1920 A72-29238

Inexpensive microwave high density channel filters to meet amplitude and phase requirements without external equalization

15 p2210 A72-31181

Multimode fiber optics data transmission through high electrical noise environments for send-receive communication links

15 p2198 A72-32059

Time division demultiplexing technique using two channel simulation of twenty-four channel digital optical PCM communication system

15 p2200 A72-32163

Incoherent receiver noise stability in multichannel system with channel frequency separation, deriving formula for receiver error probability

15 p2209 A72-32668

Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution

16 p2403 A72-33715

Random multiple access data transmission systems with feedback for message confirmation and retransmission in event of errors, evaluating channel capacity

16 p2372 A72-33794

Intelsat satellite SPADE demand-assignment multiple access system design for increased communication flexibility and efficiency

17 p2512 A72-34269

Correlation functions and reconstruction error for quantized Gaussian signals transmitted over discrete memoryless channels

17 p2516 A72-35333

Intelsat 4 multichannel communication network earth station equipment components and characteristics experimental system (SPADE) study to realize demand assignment

18 p2659 A72-36272

YIG filter banks for ECM and communications

19 p2772 A72-37523

Limitations of technological state-of-the-art with satellite and space communications above 10 GHz

19 p2765 A72-37940

Predictive filtering of multi-channel time series records with application to Doppler radar data

19 p2781 A72-38272

Satellite communications in Japan

19 p2766 A72-38603

Simulation of the process of reducing the redundancy of multichannel telemetry information on a digital computer by the method of adaptive break down into discrete elements and associative sorting

21 p3014 A72-40313

Computer simulation of a digital satellite communications system utilizing TDMA and coherent quadrature signalling

21 p3020 A72-40895

Bandwidth economy for multiplexed digital signals

21 p3020 A72-40897

Suppressed clock pulse duration modulation for noisy voice communication channels with hard limiting satellite repeaters, discussing system design and test data

21 p3020 A72-40898

Commercial satellite communication system development, considering external constraints, orbital geometry, frequency allocations, multiple access transmission techniques, and satellite and earth station designs

21 p3021 A72-40921

Mathematical model for lattice-type error distribution of parallel channels communication system, noting metric for algebraic signal coding method

22 p3154 A72-42234

Parameter estimation of reflected signal in multichannel communication system with discrete readings, considering receiver with optimal signal processing under low noise level

22 p3154 A72-42239

Asymptotic methods of calculating the effectiveness of one variant procedure of selecting operational subchannels in an adaptive multichannel communications system

23 p3266 A72-44207

Optimal signal processing in systems with multiple reception elements /channels/

23 p3266 A72-44219

Error probability estimates in two channel diversity reception systems of digital data transmission with allowance for fading correlation and incomplete signal separation

24 p3379 A72-44751

MULTICHANNEL RECEIVERS

U MULTICHANNEL COMMUNICATION
U RECEIVERS

MULTICHANNEL TRANSMITTERS
U MULTICHANNEL COMMUNICATION
U TRANSMITTERS

MULTILAYER INSULATION

Space shuttle cryogenic tanks self evacuating multilayer insulation, evaluating thermal and dynamic performance

01 p0139 A72-10778

Multilayer insulation materials for reusable space vehicles thermal protection and radiation shielding, tabulating thermal conductivity values for various materials

01 p0092 A72-10780

Two-layer dielectric loaded cylindrical antenna with wall airgap, calculating radiation pattern by boundary value approach

06 p0775 A72-18240

Space and ground environments effect on cryogenic multilayer insulation materials, tabulating mechanical and thermophysical test data

[AIAA PAPER 72-286] 11 p1741 A72-25225

Multilayer insulation apparent thermal conductivity measurement at low compressive loads, describing test calorimeter and experimental technique

[AIAA PAPER 72-367] 11 p1670 A72-25392

Damping additions for plates using constrained thin viscoelastic sheets and metallic layers

11 p1688 A72-26063

Heat losses due to spacecraft installation discontinuities on aluminized Mylar multilayer insulation, predicting blanket performance

[AIAA PAPER 72-285] 14 p2171 A72-30829

Analytical prediction of pressure-time relationship during evacuation of multilayer insulation thermal protection systems, taking into account outgassing effects

14 p2172 A72-30925

Statistical solution to unsteady heat conduction through flat multilayer insulating wall, using random walk method

16 p2477 A72-33407

Fine line multilayer system packaging using hybrid thick film processing and materials

22 p3161 A72-43174

MULTILAYER STRUCTURES

U LAMINATES

MULTILOOP SYSTEMS

U CASCADE CONTROL

MULTIMODE RESONATORS

Multimode cavity for simultaneous oxygen/argon plasma excitation and electron density measurements, noting gas pressure effect

08 p1213 A72-21323

Three resonant mode waveguide circulator adjustment with eigenvalues associated to resonant field patterns

15 p2208 A72-32388

Resonator dielectric waveguide structure in electron beam pumped semiconductor laser, noting reduction of diffraction losses and of laser action threshold

17 p2562 A72-34660

Frequency detection with digital resonators without damping

19 p2773 A72-37939

Magnitude of the attenuation troughs of a two-branch filter with multiple-frequency quartz resonators

23 p3272 A72-44170

MULTIPATH TRANSMISSION

Wideband FSK receiver for space telemetry, calculating error probability in multipath signal fading due to planetary surface reflections

01 p0025 A72-10329

- Electromagnetic wave line-of-sight propagation based on geometrical optics for different refractivity profiles above sea, noting earth surface reflection role
01 p0026 A72-10404
- Rain, snow and hail precipitation effects on radio link signal attenuation, scattering and fading along various transmission paths at millimeter and centimeter wavelengths
01 p0027 A72-10407
- Centimeter waves fading due to interference from tropospheric multipath propagation
01 p0027 A72-10412
- Low angle monopulse radar tracking errors due to multipath, considering amplitude variation across antenna aperture and reduction by target-image resolution
02 p0178 A72-12391
- Intermodulation noise distortion due to multipath transmission over FM/FDM microwave links, deriving distortion probability distribution for Nakagami-Rice randomly distributed signal reception
04 p0493 A72-15517
- AM/PM distortion intermodulation in FM/FDM radio systems during two-path propagation, using Fourier series method for noise power spectra calculation
06 p0775 A72-18239
- Digital decision directed suboptimal receiver design for random multipath channel communication with intersymbol interference, predicting performance for steady state probability of correct decision
07 p0941 A72-19272
- Multipath angle error reduction using multiple radar target signal processor with angle tracking of wave fronts
08 p1134 A72-21408
- Adaptive multibeam experiment for aeronautical and maritime services [AMEAMS], discussing NASA ATS-G satellite application to small mobile terminal communications system
12 p1842 A72-27383
- Microwave radio link transmission loss Rayleigh-like long term distribution explained by two-path propagation model
12 p1784 A72-27796
- Line-of-sight radio link attenuation by atmospheric precipitation and phase interference fading during multipath propagation in 7-15 GHz range
12 p1785 A72-27802
- Adaptive reception of weak repetitive signals on background of intense fluctuating noise, synthesizing adaptive detection system for multipath propagation and small SNR
15 p2195 A72-31658
- A mode-averaging diversity combiner
17 p2513 A72-34360
- Error rate of phase-shift keying in the presence of discrete multipath interference
17 p2516 A72-35334
- On an anomaly in long-range short-wave propagation from the equatorial region to central Europe
18 p2657 A72-36232
- Digital simulation for radio frequency interference and specular multipath effects on FM spread spectrum demodulation with feedback and phase lock loops
18 p2659 A72-36317
- MULTIPHASE FLOW**
NT TWO PHASE FLOW
- Thermodynamic equilibrium variational theory for multiphase systems subject to nonhydrostatic stress, considering diffusion and phase transformations
03 p0455 A72-12908
- Multiphase Stefan problems for bounded and unbounded temperature fields with variable phase volume
06 p0904 A72-18401
- Three phase bidirectional pulsating flow hydraulic control system, discussing design, performance and applications
08 p1114 A72-22162
- Single- and multiphase theories of slowly varying nonlinear dispersive waves, noting stability solutions to large scale variations and shocks
09 p1351 A72-22942
- Small scale flow and surface effects in multiphase media hydromechanics, obtaining entropy production in mixture for interphase transformations characterization
10 p1468 A72-24430
- Steady state lumped linear formulation of heat transfer in multichannel parallel-and-mixed-flow heat exchangers
14 p2173 A72-31065
- Multiphase Stefan problems for bounded and unbounded temperature fields with variable phase volume
17 p2636 A72-34852
- MULTIPLE DEGREES OF FREEDOM**
U DEGREES OF FREEDOM
- MULTIPLE OUTPUT PROGRAMS**
Executive job handling program for operation with fault tolerant multiprocessor in real time control environment
10 p1442 A72-23816

- MULTIPLETS**
U FINE STRUCTURE
- MULTIPLEX TRANSMISSION**
U MULTIPLEXING
- MULTIPLEXERS**
U MULTIPLEXING
- MULTIPLEXING**
NT FREQUENCY DIVISION MULTIPLEXING
NT TIME DIVISION MULTIPLEXING
- Analog FM multiplex signal intermodulation formula based on time-variable electromagnetic waves tropospheric scatter propagation
01 p0027 A72-10411
- Format logic design for airborne memory controlled PCM telemetry multiplex digital and analog data system
02 p0187 A72-12130
- Miniaturized micropower biomultiplexer telemetry system utilizing hybrid techniques
02 p0192 A72-12133
- Data transmission and distribution systems interface, using semiconductor technology in multiplexing, asynchronous data transfer, A-D and D-A data conversion and sensor signal conditioning
02 p0194 A72-12404
- Multiplex FM recording system parameters effect on system design, considering SNR, deviation ratio, wow and flutter, tape speed errors, crosstalk and FM filters
02 p0230 A72-12409
- Interrogation frequency effects in random access analog multiplexers operating on flying capacitor at very high sampling frequencies
02 p0195 A72-12692
- Doubly multiplexing dispersive spectrometer, noting high SNR and Littrow mode operation
03 p0359 A72-13446
- High resolution Hadamard transform IR spectrometer with single slit and multiplex scan operation modes determined by signal strength, noise characteristics and scanning time
09 p1313 A72-23327
- Computerized and analytic techniques for estimating multiplexed systems output probability distribution, considering system effectiveness, reliability and survivability
10 p1486 A72-23977
- Optimal detection of rectangular radio signal pulse envelope distortions by multiplex fluctuations over white noise background
10 p1436 A72-24516
- Switching behavior and attenuation of space division multiplex crosspoint circuit with end marking, discussing realization in thick film technology
11 p1604 A72-25908
- Energy spectra of mixed discrete random processes in statistical multiplexing systems with pulse position, delta and pulse code modulation
13 p1919 A72-29054
- Telecommunication satellites microwave components, emphasizing reliability requirements in multiplex systems
13 p1933 A72-29835
- Microwave circuits for multiplexing applications, discussing optimal design in terms of economic, mechanical and electrical parameters
13 p1934 A72-30089
- Time sharing radio communication system analysis with amplitude modulated carrier, noting power reduction, sideband content and multiplexing
15 p2201 A72-32566
- FM/FM multiplex receiver with carrier and subcarrier demodulators, deriving average click rate, output noise spectrum and SNR from Rice model
16 p2362 A72-33212
- Methods using Walsh functions for multiplexing and transmitting signals
19 p2765 A72-37942
- New technique of image multiplexing using random diffuser
21 p3050 A72-40145
- Bandwidth economy for multiplexed digital signals
21 p3020 A72-40897
- Bistable trigger stages composed of digital multiplexer with IC logic modulus replacing NAND or NOR circuits
23 p3267 A72-43990
- MULTIPLICATION**
Binary multiplication algorithms adaptable to IC functional elements for ultrahigh speed operations
11 p1602 A72-26547
- Fixed point computer mean square errors in multiplication as function of number of digital order
16 p2367 A72-33959
- Cellular-array arithmetic unit with multiplication and division
17 p2519 A72-34297
- Some properties of iterative square-rooting methods using high-speed multiplication
19 p2769 A72-37577
- Efficient method to multiply successively functions of the companion matrix and applying the method to evaluate transient response
23 p3309 A72-43862

MULTIPLIER PHOTOTUBES **U PHOTOMULTIPLIER TUBES** **MULTIPLIERS**

- Floating point cellular logic multiplier with variable dynamic range suitable for scientific satellites, missiles, desk calculators and cellular computers
04 p0499 A72-15208
- Multiplier method for discrete optimization problems with equality constraints, applying to time optimal control for V/STOL aircraft
06 p0794 A72-18387
- Wide dynamic range analog multiplier with variable transconductance divider in operational transistor amplifier feedback path
11 p1603 A72-25742
- Quadratic optimal control problem solution via multipliers method, generating minimizing convergent sequence of arcs
12 p1794 A72-27509
- Classical isoperimetric problem approximation via multipliers method, generating minimizing convergent sequence of arcs
12 p1836 A72-27510
- Broadband correlation meter with multiplier using vacuum thermal converters for 1.5 KHz-15 MHz range and variable signal delay
13 p1961 A72-29920
- Nonlinear characteristics of semiconductor diode multiplier circuits for frequency converters
16 p2370 A72-33951
- Strain multiplier with S-N fatigue life gages, discussing design and performance
22 p3179 A72-42708
- Circuit analysis and operation of analog multipliers with MOSFET, applying to industrial automatic control systems and measuring instruments
24 p3384 A72-44896
- Allowable regions for stability multiplier characteristics
24 p3420 A72-45787
- MULTIPOLAR FIELDS**
Plasma interchange instability in quadrupole and octupole magnetic fields determination by disturbance wavelength ratio to ion cyclotron radius
03 p0396 A72-13659
- Fluctuations and diffusion correlation analysis in linear octupole magnetic confinement, determining dispersion relation for interchange instability
03 p0396 A72-13660
- Multipole magnetic field configuration effectiveness in electromagnetic plasma trap, discussing electron losses critical angle and captured ions maximum density
09 p1363 A72-23221
- Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasmoid during resonance
13 p2020 A72-30014
- Geomagnetic field multipoles effects on radiation belt particle motion for analysis of true anomalies
15 p2222 A72-31280
- Nonlinear equations of discrete elastic Cosserat media from multipolar media equations, studying small rotation theory
16 p2425 A72-33591
- Motion of plasmoids in a multipole magnetic field of toroidal configuration
22 p3214 A72-43120
- Polarizational interaction of opposed plasma flows in a linear octupolar magnetic field
22 p3214 A72-43121
- MULTIPOLES**
Multipole methods for electromagnetic scattering from conducting cylinder over dielectric half space, noting application to radar cross sections
01 p0030 A72-10842
- Plasma column interaction with counter rotating hf magnetic fields of multipole configurations, calculating angular velocity
04 p0557 A72-15169
- Multipole network characteristics of optical link assemblies /optons/ using photosensitive element and light source
08 p1139 A72-21057
- Plasma injected into closed multipole magnetic trap, investigating plasma wave locking time and characteristic life
09 p1362 A72-23213
- Multipole synthesis compensating mutual coupling for orthonormalized radiation patterns in ring antenna array
11 p1598 A72-26711
- Correction to nonlinear refractivity calculation for cubic lattice crystal with allowance for higher induced multipoles
12 p1855 A72-27620
- Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasmoid during resonance
13 p2020 A72-30014
- Multipole expansion of sound radiation from moving rigid bodies
18 p2710 A72-36404

Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasma spheroid during electromagnetic interaction under resonance conditions

22 p3212 A72-42729

A rapid assay of dipolar and extrapolar content in the human electrocardiogram.

23 p3259 A72-43811

MULTIPROGRAMMING

Aerospace guidance multiprocessor with memory units attached to time-multiplexed data bus, predicting performance in terms of queueing theory, Markov process and simulation

12 p1786 A72-27433

Operational software for computerized process control, considering operations system, translator, supervision and auxiliary and service programs

21 p3024 A72-41000

Multiprogrammed virtual memory digital computer systems analysis and design, discussing component characteristics, operating system structure and mathematical description techniques

23 p3267 A72-43987

MULTIROPPELLANTS

U ROCKET PROPELLANTS

MULTISPECTRAL BAND SCANNERS

ERTS satellite return beam vidicon TV system and multispectral scanner images, describing photogrammetric and cartographic evaluations

01 p0065 A72-10449

ERTS satellite image processing for multispectral scanning system, discussing distortion from geometrical properties

01 p0066 A72-10458

Aerial multispectral scanners and ground data stations for water quality measurements and pollution abatement

[ALAA PAPER 71-1096] 01 p0067 A72-10545

Multichannel multispectral scanner system for NASA C-130 earth resources aircraft, describing electronic equipment and calibration sources

01 p0048 A72-10946

IR scanner for Indian land areas and oceans thermal mapping, using satellite-borne multispectral photography

02 p0225 A72-11777

Water depth attenuation coefficients and bottom reflectance characteristics from large area multispectral scanner measurements for discharge and concentrations monitoring

02 p0211 A72-11812

Southern corn leaf blight detectability by remote sensing based on pattern recognition technique application to multispectral color and IR photographic and scanner data

02 p0212 A72-11814

Forest vegetation distributional and statistical parameters ecological analysis by multiband remote sensing in areas devoid of ground control

02 p0212 A72-11815

Aerial multispectral scanner data determination with filtering and smoothing along flight line over extended areas, deriving algorithm for cloud-shadowed area detection

02 p0212 A72-11817

Orbiting multispectral scanner with independent land and oceanographic spectrometers for ground controlled dual mode operation

02 p0226 A72-11823

Natural resources multispectral remote sensing for national emergencies, discussing various imaging techniques

02 p0212 A72-11828

Oil slicks aerial photographic and multispectral scanner investigation, discussing detection effectiveness of UV, blue, green and IR imagery

02 p0226 A72-11829

Object proportions estimation algorithms in single resolution element of airborne multispectral scanner

02 p0227 A72-11839

Data compression and random noise effects on pattern recognition and picture quality of multispectral scanner data

02 p0227 A72-11840

Multispectral scanner data preprocessing to improve automated recognition by reducing atmospheric and sensor induced signal variability

02 p0227 A72-11841

Multispectral scanner data training sets size effect on correlation between soil reflectance and organic matter content obtained from ground truth

02 p0227 A72-11845

Pattern recognition of multispectral scanner remote sensor data, using table look-up approach for processing simplicity and time reduction

02 p0227 A72-11846

Airborne high resolution multispectral TV camera system, describing special objective configuration for improved ground resolution

02 p0227 A72-11850

Multichannel multispectral airborne IR imaging system and video data processing for U.S. geological survey

02 p0227 A72-11851

Extended wavelength field spectroradiometry for multispectral scanner data interpretation in airborne observations

02 p0228 A72-11853

Automatic classification over extended remote sensing test sites, examining causes of variation in multispectral scanner data response

02 p0228 A72-11875

Digital computer mapping of terrain by clustering techniques, using color IR film emulsion layers as three band spectrometer

02 p0215 A72-11879

Automatic soil type mapping, using multispectral remote sensing and computerized pattern recognition

02 p0215 A72-11881

ERTS multispectral scanner data telemetry decom-mutator/processor capable of decommutating five spectral bands of digital video data

02 p0175 A72-12162

Earth resources applications of multispectral remote sensing techniques for airborne and satellite-borne imaging systems, discussing microwave radiometer augmentation of visual and IR data

06 p0813 A72-17430

Performance tests of return beam vidicon multispectral television camera system for ERTS program

07 p0986 A72-19657

Multispectral remote sensing techniques, equipment and applications, discussing color and IR camera, line scanning and radar systems and automated interpretation devices

09 p1312 A72-23304

Photointerpretation and computerized radiometric analysis of ERTS multispectral TV and scanner imagery of Israel

15 p2221 A72-31242

Color band selection for Mars lander multispectral imaging system for surface constituent discrimination

15 p2307 A72-31809

Melting snow and ice packs detection by multispectral/visible and near IR/ remote sensing from earth satellites

16 p2387 A72-33999

Suitability of the normal density assumption for processing multispectral scanner data.

22 p3157 A72-43025

Mercury-cadmium telluride photoconductive detectors array for S-192 multispectral scanner for Skylab earth scanning experiments

23 p3288 A72-43879

Mercury-cadmium telluride multispectral photoconductive detectors, discussing fabrication techniques and performance characteristics

23 p3288 A72-43880

Nimbus limb radiometer, Apollo fine sun sensor, and Skylab multispectral scanner.

23 p3288 A72-43882

MULTISPECTRAL PHOTOGRAPHY

NT INFRARED PHOTOGRAPHY

NT RADAR PHOTOGRAPHY

Forestry and agricultural applications of multiband photography, considering photointerpretation of black and white, color and IR photographs

01 p0057 A72-10459

Air pollution circulation patterns remote sensing, describing multispectral stereo image pairs digital cross correlation

[ALAA PAPER 71-1106] 01 p0067 A72-10551

Soyuz 6 multispectral aerogeophysical measurements of Usturt plateau and Caspian and Aral Seas, discussing remote sensing information yield on earth water/land and atmosphere properties

02 p0208 A72-11785

High altitude aircraft and Apollo 9 multispectral photography and simulated ERTS-A imagery evaluation, comparing with ground observations in Arizona

02 p0210 A72-11799

Environmental analysis of Lake Tahoe Basin from small scale multispectral aerial imagery, discussing color enhancement usefulness for interpretation and management of natural resources

02 p0210 A72-11800

Computer enhancement of multispectral satellite-and air-photographs and imagery for earth resources

02 p0186 A72-11801

Oil spills remote detection by multispectral photography, IR scanner imagery and microwave radiometry

02 p0226 A72-11830

Multispectral photographic data preprocessing and computerized simulation of ERTS data channel to make terrain maps, testing classification accuracy improvement possibility

02 p0215 A72-11880

Hybrid system to process multispectral photographic data from aircraft and spacecraft sensors, assessing data quality, cost effectiveness and delay reduction

02 p0228 A72-11883

Chesapeake Bay aquatic ecosystems observations, using satellite remote sensing multispectral photography and imagery

02 p0215 A72-11885

MULTISTAGE ROCKET VEHICLES

RADAM /Radar Amazon/ side-looking radar imagery and multiband aerial photography for mineral, vegetation, soil and water resources mapping in Brazil

02 p0216 A72-11890

Si monolithic multispectral image photosensor array for satellite application, presenting fabrication and spectral response data

04 p0500 A72-15304

Radio quiet quasar PHL 957 absorption line spectra obtained at telescope with Cassegrain image tube and multichannel spectrometer and integrating TV camera

05 p0720 A72-16714

Satellite-borne multispectral photographic line-scan system with direct optoelectrical signal conversion for photogrammetric and cartographic applications

06 p0815 A72-17757

Multispectral TV camera systems for satellite recording of earth surface electromagnetic radiation at separate wavelengths

[DGLR PAPER 71-135] 06 p0817 A72-18232

Image resolutions for ERTS return beam vidicon TV, Skylab multispectral cameras and Gemini/Apollo photographs

06 p0818 A72-18328

ERTS A and B satellite systems for multispectral imaging of earth surface, discussing sensors, operational control and data processing requirements and implementation

07 p1085 A72-19276

Return beam vidicon multispectral camera system for ERTS A and B, describing camera system design and performance characteristics in terms of ERTS mission purpose

07 p0986 A72-19601

Earth science and technical applications of multispectral photography and digital image processing techniques

08 p1166 A72-21334

Multiband color aerial photography interpretation for forest appraisal in U.S.S.R.

09 p1302 A72-23285

Multiband aerial photography application to vegetal cover determination, evaluating film types, seasons and scales

09 p1302 A72-23287

Multiband photointerpretation of forested land units, using aerial black and white photographs and film-filter combinations

09 p1302 A72-23288

Multispectral remote sensing techniques, equipment and applications, discussing color and IR camera, line scanning and radar systems and automated interpretation devices

09 p1312 A72-23304

Crop classification by airborne multispectral observations, suggesting sample regions selection method for spectral signatures identification based on statistical similarities

11 p1628 A72-26985

Photogrammetric camera system imaging characteristics comparison with aerial reconnaissance, multispectral and return beam vidicon systems, noting economic benefits due to smaller scale imagery

12 p1805 A72-27819

Apollo 9, Skylab and Earth Resources Technology Satellite-borne multiband cameras performance requirements and tolerances comparison, considering geometric and spectroradiometric properties

16 p2395 A72-34103

Multispectral angular reflectivity effect on optimum filter combinations for spaceborne multiband photography sensing mission in visible and near IR regions

16 p2395 A72-34104

Multispectral photography in soil moisture determination and soil series differentiation.

18 p2686 A72-36320

ERTS-borne return beam vidicon camera using high resolution TV sensors coaligned to view identical scene in different spectral bands

19 p2795 A72-37576

Multicolor photometry of the NGC 5194/5195 double system

19 p2858 A72-37812

Earth resources technology satellites /ERTS/ program requirements, considering coverage, spectral characteristics, system performance, photographic interpretation and information extraction

24 p3398 A72-45115

High resolution multispectral camera system for ERTS A & B.

24 p3402 A72-45182

MULTISTAGE COMPRESSORS

U TURBOCOMPRESSORS

MULTISTAGE ROCKET VEHICLES

Stages optimum selection for step rocket moving in plane gravitational field

13 p2051 A72-28384

- Two stage solid propellant sounding rocket, discussing engine design, operation and tests
13 p2052 A72-29859
- Reusable two-stage meteorological rocket vehicle, discussing design, performance, second stage recovery technique and cost
17 p2619 A72-34185
- Considerations regarding the choice of the number of stages in long-range or high-altitude rockets
20 p2977 A72-39596
- Ascent acceleration maximization of variable mass particle, calculating optimal parameters of multistage rocket
22 p3204 A72-42066
- Dynamic behavior of M-4S rocket devices for strap-on booster separation and nose cone and flare deployment
22 p3232 A72-43143
- Multistage rocket optimal control, deriving conditions for existence of minimum of performance index function of mass, position and velocity initial and final values
23 p3343 A72-44264
- MULTIVARIATE STATISTICAL ANALYSIS**
NT BIVARIATE ANALYSIS
NT CORRELATION
NT COVARIANCE
NT DISCRETE FUNCTIONS
NT ORTHOGONALITY
NT REGRESSION ANALYSIS
Multivariate algorithms of optimum content and form for cardiovascular risk assessment in pilots and air transport personnel
12 p1764 A72-28264
- Kennedy Space Center area afternoon convective thunderstorm activity and associated weather phenomena prediction via multivariate regression analysis
13 p1989 A72-28803
- Computerized analytical system for side-looking radar imagery interpretation by isodensitracer scanned density data multivariate analysis applied to environmental discrimination
15 p2198 A72-32064
- Extension of analytical design techniques to multivariable feedback control systems.
23 p3274 A72-43539
- Output-feedback control law for randomly distributed multivariable system.
23 p3275 A72-43608
- MULTIVIBRATORS**
NT FLIP-FLOPS
Book on transistors in pulse circuits covering switching diodes and circuits, multivibrators, blocking oscillators, etc
05 p0640 A72-16288
- Base resistance coupled transistorized multivibrator design characterized by superior frequency stability regardless of wide voltage fluctuation
13 p1934 A72-30017
- Multivibrator with p-n-p and n-p-n transistors, noting circuit diagram, operation and power dissipation
20 p2906 A72-38898
- Linearization of relaxation-time control in a transistorized multivibrator
23 p3270 A72-43765
- MUONS**
Cerenkov radiation detection by human eye, discussing relativistic muons passage through vitreous humor and retina
02 p0272 A72-11754
- Absorbed doses at various depths in water target exposed to charged pions, muons and electron beams, using Monte Carlo program
02 p0162 A72-12063
- Atmospheric temperature effect on solar diurnal variation of muon component, considering asymptotic characteristics of cosmic ray anisotropy
05 p0709 A72-16257
- Electron and muon density fluctuations, trajectory distribution and azimuthal symmetry in cosmic ray air showers
06 p0870 A72-17279
- Extensive air shower spectra based on electron and muon number
06 p0871 A72-17283
- Extensive air shower characteristics and muon counts at different level observations relative to particle number and primary energy spectra
06 p0871 A72-17284
- High energy cosmic ray interactions at one TeV, including X process, horizontal showers and muon poor showers
06 p0871 A72-17285
- High energy muon energy and angular distributions from electron-photon cascades, using emulsion chamber with X ray films
06 p0871 A72-17286
- Energy spectrum of muon formed electromagnetic cascades in vertical cosmic radiation flux
06 p0871 A72-17287
- Spectral calculations of electromagnetic and nuclear showers of cosmic ray muons interacting with substance
06 p0871 A72-17288
- Muon densities in penetrating high energy particles, comparing with extensive atmospheric showers
06 p0871 A72-17289
- Muon generated cascade showers in iron, using ionization calorimeter and hodoscope detectors
06 p0871 A72-17290
- Muon track curvatures in Wilson chamber magnetic field for calibrating ionization levels of logarithmic increase
06 p0811 A72-17293
- Cosmic ray muon intensity in interplanetary magnetic field, revealing sidereal variation due to motion of solar system relative to local galactic rotation frame
06 p0873 A72-17648
- Cosmic ray muons integral energy spectrum and angular distribution at sea level represented by power law, using primary interaction model
07 p1063 A72-20475
- Meteorological effects on cosmic rays, deriving muon and pion intensity and meteorological coefficient formulas and computer calculation scheme
07 p1066 A72-20654
- Computerized numerical calculation of muons production spectrum, angular distribution and Coulomb scattering in determining meteorological factors effects on cosmic rays
07 p1067 A72-20655
- Muon telescopes calibration for cosmic rays rigid component variations by data comparison with variable aperture telescope
08 p1162 A72-20720
- Temperature effects elimination from underground muon intensity measurements
08 p1226 A72-20813
- Inelasticity fluctuations effect on cosmic ray showers development, proposing criteria for lateral electron distribution and relative abundance of hadrons and muons
10 p1529 A72-24213
- Muon rich showers interpretation, allowing for combined influence of types I and II fluctuations
10 p1529 A72-24229
- Nucleonic cascade model analysis of underground vertical muon curve for primary cosmic ray nucleon spectrum below 40 TeV
10 p1529 A72-24417
- Sea level absolute vertical cosmic ray muon intensity from range spectrometer measurements within tropic zone
12 p1864 A72-28225
- Scaling hypothesis and limiting fragmentation mechanism for cosmic ray muon production, noting energy independent charge ratio
15 p2298 A72-31289
- Underground delayed shower particles small pulse events interaction analysis for muons and pions compared with quark behavior
16 p2450 A72-34140
- An improved measurement of the charge ratio of cosmic ray muons in the range 10-300 GeV/c
17 p2599 A72-34920
- The absolute vertical cosmic-ray muon intensity at sea level.
17 p2600 A72-35147
- Scintillation telescopes for muon angular distribution, designing test device for photomultiplier tubes section
17 p2556 A72-35437
- Short- and long-range terrestrial telecommunication using energetic collimated beams of muons
17 p2519 A72-35837
- Yields of gamma rays emitted following capture of negative muons by Si28 and Mg24.
19 p2837 A72-38026
- Muon telescopes calibration for cosmic rays hard component variations by data comparison with variable aperture standard telescope
19 p2803 A72-38348
- Zenith angle dependence of the meteorological corrections coefficients for cosmic ray hard component.
19 p2852 A72-38632
- Cosmic ray muon sea level momentum spectra and charge ratios geomagnetic latitude dependence measurements by spark chamber technique
19 p2853 A72-38754
- The muon flux of cosmic rays at sea level.
20 p2964 A72-39349
- Energy spectrum and composition of primary cosmic radiation at energies from 50 to 5000 TeV
23 p3330 A72-44422
- Investigation of EAS characteristics at sea level with the aid of the classical method and by the method of recording radio emission
23 p3330 A72-44423
- Certain characteristics of the muon and electron components of extensive air showers at mountain level
23 p3331 A72-44425
- Muon component near the axis of an extensive air shower
23 p3331 A72-44426
- Energy spectrum and angular distribution of cascades with an energy greater than 0.3 TeV, formed by cosmic muons
23 p3331 A72-44427
- Energy spectra and angular distributions of cosmic ray muons with an energy of 2 to 10 TeV
23 p3331 A72-44428
- Energy dependence of muon-nucleon inelastic interaction, calculating photonuclear cross section for high energy interactions in iron
23 p3331 A72-44429
- A study of the mechanisms of formation of penetrating particle groups by the spark calorimeter method
23 p3291 A72-44430
- Fluctuations of the spatial distribution of the number of particles in showers generated by muons in heavy material
23 p3331 A72-44431
- Angular distribution of high-energy cosmic-ray muons
23 p3331 A72-44434
- Device for studying the photonuclear interaction of superhigh-energy muons
23 p3291 A72-44440
- Primary cosmic ray nucleon spectrum from sea-level muon spectrum and scaling hypothesis parameters.
23 p3332 A72-44458
- Stopping rate of negative cosmic-ray muons near sea level.
23 p3332 A72-44501
- Gamma-neutrino angular correlations in muon capture.
24 p3427 A72-45774
- MUSCLES**
NT MYOCARDIUM
Fast and slow human muscle fibers temporal response characteristics, using tensometric recording
03 p0317 A72-13989
- Spinal reflexes through electric stimulation of gastrocnemius and soleus human leg muscles, attributing increased tendon reflex amplitudes to gamma motoneurons hyperactivation
04 p0467 A72-14704
- Exercise and denervation effects on intrafusal muscle fibers morphology, noting 25-33 percent cross-sectional area atrophy in nuclear bag and chain fibers
04 p0472 A72-14895
- Daily prolonged exercises effects on human muscle glycogen utilization, noting reduced lactate accumulation and increased free fatty acid levels
04 p0480 A72-15213
- Regulation of sweat secretion on skin surfaces overlying active and nonactive muscle tissue during skin or core temperature alterations
04 p0480 A72-15216
- Muscle blood flow relation to oxygen consumption from measurements during bicycle ergometer exercises, using Xe 133 clearance method
08 p1123 A72-20888
- Endurance exercise effect on respiratory capacity in white, red and intermediate muscles in rats, relating fiber type to oxidative capacity
08 p1115 A72-21083
- Stepwise adaptation to high mountain conditions effect on brain and sural muscle oxidation processes in rats
08 p1121 A72-22085
- Alternative heating local heat clearance probes for human muscle blood flow measurement
09 p1273 A72-23442
- Continuous and intermittent maximal exercise effects on human muscle intracellular and capillary blood pH
10 p1425 A72-24477
- Forearm skin and muscle blood flow change measurements during whole body heating, using plethysmography, isotopic labeling and blood sampling techniques
11 p1587 A72-26617
- Liver and muscle type isozymes of DPN-linked glycerol-3-P dehydrogenase in chickens in terms of tissue distribution, ontogeny and avian evolution
12 p1759 A72-27161
- Rat vena porta muscle cells spontaneous activity intensified by direct current depolarization and inhibited by hyperpolarization, noting effects of calcium and sodium ions
13 p1902 A72-28638
- Cold adaptation effects on rat skeletal muscle tissue Vant-Hoff coefficient, considering phosphorylation and oxidation rate, P/O and mitochondrial ATP-ase activity
13 p1902 A72-28639
- Potassium, sodium and calcium ion distribution in skeletal muscle subcellular organoids, discussing lipid, protein and nucleic acid binding
14 p2076 A72-30670
- Muscle cell ATP, creatine phosphate and lactate concentration changes relation to oxygen uptake during and after exercise
14 p2080 A72-30705
- Long term weightlessness-induced physiological response normalization by muscle bioelectrostimulation, muscular tissue energy load increase and mineral metabolism stabilization
16 p2354 A72-33543

Biological systems activity in controlling extremal problems of nervous and muscular systems, noting external stimulation minimization
19 p2761 A72-38577

The state of water in muscle tissue as determined by proton nuclear magnetic resonance.
24 p3371 A72-44774

MUSCULAR FATIGUE
Human oxygen intake and blood lactic acid removal kinetics during recovery from mild steady work on bicycle ergometer
10 p1426 A72-24989

Dynamic bioelectric impedance level of tissue area between active electromyograph electrodes related to human skeletal muscle fatigue
13 p1905 A72-29332

MUSCULAR FUNCTION
NT SPASMS
Frog Rana temporaria striated muscle tension response recording during sudden fiber length alteration, suggesting force generation mechanism
01 p0009 A72-10017

Discharge patterns in motor nerve fibers during human voluntary muscle contractions
01 p0013 A72-10624

Optimum muscle work conditions experiments with rabbits, correlating total work performance and power output with muscle temperature variations
02 p0160 A72-12013

Training effect on oxygen consumption in negative muscular work, considering connective tissue strengthening and muscle viscosity changes
03 p0315 A72-13676

Human muscular electrical activity in various body positions, noting potentials during natural and unaccustomed postures
03 p0317 A72-13990

Electromyographic determination of muscular compliance during arm movements, using on-line analog computer
04 p0478 A72-14708

Prolonged muscular work effects on erythrocyte 2,3-DPG generation relation to oxyhemoglobin affinity
04 p0472 A72-14898

Stochastic signal method for measuring dynamic viscoelastic properties of isometric frog sartorius muscle at rest and contraction, using white noise vibrations
04 p0480 A72-15221

Hemodynamic and blood oxygen parameter changes comparison in dogs during hypoxia at rest and muscle activity in various oxygen concentrations
04 p0474 A72-15232

Heat production increase by muscular contractions due to noradrenaline in cold adapted rats
05 p0620 A72-17215

Coleoptera flight muscle system anatomy, presenting instantaneous lift forces measurement systems
06 p0755 A72-17563

Heart pacemaker activity during muscular exertion, developing mathematical model based on system dynamics transient processes analysis
06 p0764 A72-18059

Electromyogram study of antagonist muscles reactions to Achilles tendon percussion or whole body sudden motion via test stand jerking
07 p0915 A72-18864

Cardiac acceleration by voluntary muscle contractions of minimal duration in men due to vagal tone inhibition
07 p0929 A72-19442

Myoepithelial mechanism of high frequencies pulsatile discharge of human sweat glands
07 p0930 A72-19444

Vagal control of ventilation and respiratory muscles during elevated pressures in cats
07 p0917 A72-19446

Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc
07 p0930 A72-19875

Acceleration tolerance increase by static forearm muscular contraction exercise comparison to g-suit protection during human centrifuge tests
[AD-739063] 08 p1114 A72-20887

Cat and rabbit middle ear muscles contraction by electric stimulation of motor nerves, noting sound transmission reduction
08 p1115 A72-21136

Cat middle ear muscles motor units twitch tension and contraction time in response to motor neuron threshold stimulation
08 p1116 A72-21137

Motor unit potential histogram study of human motoneuron activity patterns during voluntary muscular contractions
08 p1116 A72-21472

Myocardium excitation-contraction mechanism in heart regulation, discussing surface membrane structure and cell action potential
09 p1264 A72-22222

Force-velocity relations in cat papillary muscles isotonic relaxation, discussing effects of preloads and afterloads, temperature and stimulation frequency
09 p1265 A72-22864

Functional organization of monkey cortical efferent zones in distal forelimb muscle control from intracortical microstimulation studies, showing stimulation thresholds distribution
09 p1267 A72-23582

Peripheral afferent input to monkey cortical efferent zones of distal forelimb muscle control, using single microelectrode for intracranial stimulation and cellular discharge recording
09 p1267 A72-23583

Artificial heart-lungs model with contractile polymer membrane as synthetic muscles to react with gases and liquids, discussing design features
10 p1431 A72-24640

Human body biochemical energy conversion processes during muscular activity, discussing nutrition, circulation and respiration roles
11 p1585 A72-26075

Speed and mechanical work measurements during knee bending and immediate or delayed leg extension exercise, showing muscle elastic potential energy utilization
11 p1587 A72-26615

Electromyogram and myogram responses in phasic stretch reflex under prestrain conditions as index of fusimotor activity level in normal humans
11 p1588 A72-26632

Human motoneuron discharge time relations during isometric muscle contraction, measuring adjacent action potential and mean interspike intervals
12 p1761 A72-27653

Irreversibility mechanism in postpartum ductus arteriosus closure in guinea pigs, studying vessel cellular changes and smooth muscle response to oxygen pressure
12 p1762 A72-27826

Inspiration, expiration and hand muscle control comparison in psychophysical category production method for human voluntary breathing regulation investigation
12 p1763 A72-27843

Energy metabolism and ATP balance characteristics during muscular activity as function of organism adaptation to activity
13 p1902 A72-28640

Supraspinal effects on different work regimes of supplementary respiratory muscles, using interference electromyograms cross correlation analysis
13 p1905 A72-29328

Contractile responses of guinea pig, rat and human isolated ventricular myocardium to increased stimulation frequency
13 p1907 A72-30044

Temperature and extracellular Ca level effects on mammalian ventricular myocardium force-frequency relationships, determining contractile tension, velocity and phase duration
13 p1907 A72-30045

Delayed growth of rats carcasses and skeletal muscles during prolonged hypokinesia, comparing effects on flexor muscles to ankle joint extensors
14 p2074 A72-30378

Prolonged bed rest induced muscular activity restriction effect on arterial and venous tone in different body areas
14 p2074 A72-30385

Human leg muscle reflex excitability changes during angular acceleration, suggesting vestibular apparatus as coordination means in quasi-static and dynamic movement control
14 p2075 A72-30388

Surface electrode position effect on electromyogram recording of electrical activity during repeated biceps and triceps brachii contractions
15 p2190 A72-32489

Surface electrode distance, area and pressure effects on electromyogram recording of large skeletal muscle electrical activity during defined muscular tensions
15 p2190 A72-32490

Hill model for myocardium activity, taking into account contractile state variations and characteristic force-velocity curve
15 p2187 A72-32492

Human heart physiopathology from cardiac performance analysis, treating heart as pump and muscle
15 p2187 A72-32493

Apexocardiograms and carotid pulse measurements as indicators of cardiac function and myocardial contractility
15 p2190 A72-32494

Hypokinesia and motor activity of humans in industrial societies, noting prolonged inactivity and posture maintaining effects
16 p2353 A72-33098

Increase in skeletal muscle performance during emotional stress in man.
17 p2500 A72-34942

Effects of hypoxia and ischemia on myocardial contraction - Alterations in the time course of force and ischemia-dependent inhomogeneity of contractility.
17 p2502 A72-34996

Interrelation of interoceptors and exteroceptors in the process of urination and defecation reflex act maturation in ontogeny
17 p2504 A72-35022

Servo action in human voluntary movement.
18 p2654 A72-36999

Computerized statistical simulation of automatism of spontaneously active smooth muscle strip, neglecting individual cell spontaneous activity
19 p2757 A72-37949

Vertical posture control mechanisms in man
19 p2757 A72-37992

Automatically controlled delay in self-excited pulsating systems based on artificial muscles
19 p2761 A72-38464

Influence of rhythmical photostimulation on lower-order monkeys with hyperkinesia of post-encephalitic origin
20 p2890 A72-38930

Significance of the nature of an increase in physical strain as it affects the adaptation of an organism to intense muscular activity
20 p2891 A72-38933

The silent period in man during muscle lengthening produced by loading
20 p2892 A72-39590

Book - Energy metabolism of human muscle.
20 p2893 A72-39700

Muscle metabolism of ATP, CP, glycogen and lactates at rest and during submaximal and maximal exercise
21 p3005 A72-40421

Muscle metabolism during isometric exercise performed at constant force.
21 p3005 A72-40425

Synchronization in the work of motor neurons during arbitrary motor activity of various types
21 p2999 A72-40595

Cortical metabolism regulation and effector systems of the adaptation process
21 p3000 A72-40760

A model for analysing the coordination of manual movements.
21 p3010 A72-41413

The foot as input device for control operation.
21 p3012 A72-41428

Physical and chemical identification methods for biochemical reactions and energy balance of muscular contraction and shaking
21 p3003 A72-41469

Chemical energy transformation to mechanical energy and heat in muscles during exercise, considering energy sources for contraction, oxidations, glycolysis and alactic anaerobic mechanism
21 p3003 A72-41470

Effects of physical exercise on spinal reflectivity in man
21 p3003 A72-41524

Dependence of muscle efficiency on oxygen concentration in the venous blood
22 p3141 A72-42157

Blood flow, oxygen uptake, and capillary filtration in resting skeletal muscle.
22 p3150 A72-42668

Analysis of femoral venous blood during maximum muscular exercise.
22 p3145 A72-42742

Sensorimotor mechanism of proprioceptors in muscles and tendons, considering reflexive control of position and motion
22 p3146 A72-42781

Functional insufficiency of the neuromuscular system caused by weightlessness and hypokinesia.
23 p3253 A72-43387

Metabolic changes in healthy humans caused by prolonged bed rest in horizontal position, noting prevention by physical exercises and electric muscle stimulation
23 p3260 A72-43921

Influence of the nervous system and its mediators on the spontaneous contractile activity of a smooth muscle
24 p3370 A72-44590

Changes in certain hemodynamic indices during muscular strain in people with differing capacity to perform work
24 p3370 A72-44591

The reflex and mechanical response of the inspiratory muscles to an increased airflow resistance.
24 p3372 A72-44958

General index for the assessment of cardiac function.
24 p3372 A72-45011

MUSCULAR STRENGTH
Contractile and muscle-like fibers and autopulsation systems for polymer engine and spring action studies
19 p2760 A72-38200

MUSCULAR TONUS
Human and monkey muscle tonic vibration reflex response to vibratory stimulation dependent on

- frequency range, electromyograph discharge interval length, etc 02 p0163 A72-12250
- Techniques and procedure for differential ballistoscillography of extremities. 20 p2897 A72-39325
- Breathing rate response to oral instructions in relationship to nervous system, bronchial muscle tonus and gas metabolism rate reflex-type changes 21 p3001 A72-40761
- Functional insufficiency of the neuromuscular system caused by weightlessness and hypokinesia. 23 p3253 A72-43387

- Corticosterone content in blood plasma, cerebral cortex and skeletal muscles during hypoxia adaptation in rats 08 p1121 A72-22083
- Pure biocarbons for skeletal fixation of limb prosthetic devices, noting load bearing applications dependence on brittle characteristics 12 p1773 A72-28095
- Electrical components of cardiac and skeletal muscle impedance, calculating rectangular stimulating current mean value 13 p1908 A72-28461
- Prevention of weightlessness effects on blood hydrostatic pressure, musculoskeletal system and sensorimotor performance, discussing space flight training and space environment simulation tests 13 p1909 A72-28787
- Dynamic bioelectric impedance level of tissue area between active electromyograph electrodes related to human skeletal muscle fatigue 13 p1905 A72-29332
- Increase in skeletal muscle performance during emotional stress in man. 17 p2500 A72-34942
- Techniques and procedure for differential ballistoscillography of extremities. 20 p2897 A72-39325
- Effect of hypoxia on the condition of skeleton muscles in rats under hypokinesia 21 p2998 A72-40433
- Blood flow, oxygen uptake, and capillary filtration in resting skeletal muscle. 22 p3150 A72-42668
- MUTATIONS
- Molecular evolutionary changes in amino acids of proteins due to mutant random fixation, comparing human and fish hemoglobin chains 02 p0158 A72-11761
- Evolutionary rate of cistrons in vertebrates, discussing hemoglobin and cytochrome c changes involving amino acid mutant substitution 02 p0158 A72-11762
- Amino acid code comparisons of polypeptide chains of globins due to mutations during vertebrate evolution from ancestral gene 02 p0159 A72-11764
- Space flight effects on chlorella cell survival and mutability in Zond automatic stations 05 p0623 A72-16775
- Dose response curves for pink somatic mutations in *Tradescantia* after neutron and X ray irradiation 15 p2186 A72-31723
- Blue green algae *Anacystis nidulans* UV light-sensitive mutants photorecovery capacity following irradiation 16 p2356 A72-33673

- Space flight effects on chlorella cell survival and mutability in Zond automatic stations 17 p2504 A72-35278
- Soyuz 5 satellite vehicle space flight factors effect on chlorella cells, investigating survival rates and mutability 17 p2505 A72-35279
- Empirical support for a stochastic model of evolution. 23 p3254 A72-43565
- Amino acid substitution correlation with genetic code in human, bovine, ovine, porcine and salmon calcitonins, suggesting mutation occurrence time during evolution 23 p3254 A72-43568

MYELIN

- Myelinated nerve fiber mathematical model for action potential transmission mechanism analysis during relative refractory phases 14 p2079 A72-30597

MYLAR [TRADEMARK]

- Heat losses due to spacecraft installation discontinuities on aluminized Mylar multilayer insulation, predicting blanket performance [AIAA PAPER 72-285] 14 p2171 A72-30829

MYOCARDIUM

- Incidence rates of myocardial infarction and sudden death from coronary heart disease for adult black and white populations in Nashville 02 p0156 A72-11425
- Canine and human ventricular myocardium microelectrophysiological studies of postextrasystolic T wave change relation to cellular repolarization and contractile potentiation magnitude 02 p0157 A72-11474
- High altitude hypoxia effects on rat myocardium lactic dehydrogenase isozyme complement and anoxic tolerance 02 p0165 A72-12834
- Xenon 133 myocardial clearance method accuracy and reliability in determining high and low left coronary artery blood flow under different hemodynamic conditions 03 p0319 A72-13181
- Myocardial blood flow measurement by Xe 133 clearance method after direct application of isotope into subendocardial and subepicardial layers of left ventricle 03 p0315 A72-13182
- Familial cardiomyopathy detection by electrocardiography noting arrhythmias, ventricular hypertrophy, abnormal Q waves and intraventricular conduction defects 04 p0466 A72-14443
- Regional myocardial contraction mechanics during transient ischemia and reoxygenation in anesthetized dogs 04 p0476 A72-15719
- Helium-cold hypothermia induction and maintenance effect on hamster myocardia, with ventricle analysis of hypoxic damage, glycogen and catecholamines 04 p0476 A72-15720
- Hemodynamic response to hypoxia in dogs with experimental myocardial infarction, discussing changes in cardiac output, stroke volume, left ventricular pressure and systemic vascular resistance 05 p0617 A72-16152
- Myorelaxant 3,5-dimethyl-4-bromopyrazol injection effect on rabbit and dog heart during direct extracardiac nerve stimulation 05 p0618 A72-16358
- Myokinase activity determination as diagnostic test for human myocardial infarction, comparing to creatine phosphokinase activity test 05 p0618 A72-16388
- Asymmetrical hypertrophic cardiomyopathy symptoms simulating mitral stenosis, suggesting electrocardiography, chest X ray and hemodynamic studies as diagnostic procedures 06 p0761 A72-17380
- Sudden death in myocardial infarction, discussing heart electrical stability, neural control, arrhythmias and cardiac conduction disturbances 06 p0761 A72-17381
- Coronary artery disease and vessel involvement severity predictions from electrocardiographic and vectorcardiographic patterns of anterior wall myocardial infarction 07 p0931 A72-19994
- ECG evidence of myocardial ischemia in patients without arteriographic evidence of coronary artery disease, studying myocardial oxygen supply 07 p0920 A72-19995
- ECG and VCG in diagnosis of myocardial infarction and QRS changes 07 p0920 A72-20174
- Glucose and fatty acid metabolic response during impending myocardial infarction in animals 07 p0921 A72-20175
- Stretch activation of myogenic oscillation of isolated contractile structures of heart muscle in ATP salt solution 07 p0923 A72-20427

- Myocardium catecholamine level reduction by heart hyperfunction from aortic coarctation during moderate thyroidin doses 07 p0924 A72-20622
- Hyperbaric chamber tests for hemodynamic response to oxygen inhalation at 1 and 2 atm pressure for myocardial infarction treatment assessment 08 p1114 A72-20891
- Myocardial infarction effects on drug tolerance and hemodynamic changes due to digitalis doses, discussing toxic arrhythmias 08 p1115 A72-21082
- Beta-adrenergic inhibitors effects on coronary blood flow and myocardial oxygen consumption of normal and coronary artery disease patients 08 p1118 A72-21549
- Ventricular myocardium contractile function disorder diagnosis by phase coordinate method with intracardial hemodynamics application 08 p1122 A72-22186
- Myocardium excitation-contraction mechanism in heart regulation, discussing surface membrane structure and cell action potential 09 p1264 A72-22222
- Intraventricular conduction defects incidence and mortality in acute myocardial infarction, noting left anterior hemiblock dominance 09 p1266 A72-23273
- Assessment of regional myocardial temperature changes effect on blood flow measurements by heated cross-thermocouples in dogs 10 p1432 A72-25071
- Serum petidase activity determination as enzymatic diagnostic test for myocardial infarction 11 p1579 A72-25851
- Myocardium biopulse-controlled cardiosynchronizer as key component of biocontrol systems for cardiological studies 11 p1585 A72-26455
- Chronic hypoxia adapted rat myocardial tissue sensitivity to increased carbon dioxide tension 11 p1579 A72-26616
- Hemodynamic variables relation to coronary blood flow and myocardial oxygen consumption during upright bicycle exercise 11 p1587 A72-26618
- Gabor-Nelson myocardium electrical activity model for mathematical construction of vectorcardiograph from ECG for comparison of various lead systems 11 p1588 A72-26629
- Myocardial infarction stress effect on serum cortisol, plasma free fatty acid and urinary catecholamine levels 11 p1582 A72-26787
- High altitude hypoxia preadaptation effects on left ventricle myocardium noradrenaline concentration in rats with experimental vitium cordis 12 p1761 A72-27648
- Hemodynamic effects of angiographic contrast medium in patients with and without heart disease, discussing myocardial performance during first ten beats 12 p1762 A72-27732
- Electrical components of cardiac and skeletal muscle impedance, calculating rectangular stimulating current mean value 13 p1908 A72-28461
- Heart enzyme activity under experimental myocardial ischemia in rabbits determined for blood, left and right ventricles and atrium 13 p1901 A72-28463
- Physiological evaluation of diastole mechanism in rat hypertrophied myocardium as function of heart rate, Ca ion concentrations and temperature 13 p1901 A72-28521
- Contractile responses of guinea pig, rat and human isolated ventricular myocardium to increased stimulation frequency 13 p1907 A72-30044
- Temperature and extracellular Ca level effects on mammalian ventricular myocardium force-frequency relationships, determining contractile tension, velocity and phase duration 13 p1907 A72-30045
- Platelet aggregates role in intramyocardial vessel circulation impedance in patients dying suddenly of coronary artery disease 15 p2186 A72-31770
- Hill model for myocardium activity, taking into account contractile state variations and characteristic force-velocity curve 15 p2187 A72-32492
- Human heart physiopathology from cardiac performance analysis, treating heart as pump and muscle 15 p2187 A72-32493
- Apexocardiograms and carotid pulse measurements as indicators of cardiac function and myocardial contractility 15 p2190 A72-32494
- Mountain inhabitants cardiocirculatory adaptation to chronic hypoxia, studying coronary flow and myocardial oxygen consumption and efficiency 15 p2187 A72-32498

Baboon heart endocardial structure dynamic behavior, comparing left ventricle septum and epicardium contractile force and intramyocardial pressure changes

15 p2187 A72-32748

Serial ECG change detection and description in myocardial infarction survivors, using computer analysis to find best diagnostic discriminants from multiple criteria

16 p2357 A72-34008

Myocardial lipid and carbohydrate metabolism in fasting men during prolonged exercise.

17 p2499 A72-34347

Thyroidal influence on myocardial changes induced by simulated high altitude.

17 p2500 A72-34730

Normal and hypoxic myocardium mitochondrial metabolism process, studying electron transport system

17 p2501 A72-34978

Myocardial protein synthesis in acute myocardial hypoxia and ischemia.

17 p2501 A72-34980

Acute myocardial anoxia - Anatomical changes and their possible relation to immunological processes.

17 p2501 A72-34981

Acute hypoxia of the myocardium - Ultrastructural changes.

17 p2501 A72-34982

Extracellular acid-base changes in the dog myocardium during hypoxia and local ischemia, measured by means of glass micro-electrodes.

17 p2501 A72-34983

Changes of intracellular myocardial electrolytes in experimental hypertension.

17 p2501 A72-34984

The intramyocardial oxygen pressure at normoxia and hypoxia.

17 p2501 A72-34986

Myocardial ultrastructure in acute and chronic hypoxia.

17 p2502 A72-34988

Myocardial metabolic changes in chronic hypoxia.

17 p2502 A72-34989

Anoxic tolerance of the heart muscle in different types of chronic hypoxia.

17 p2502 A72-34991

Ion alterations during myocardial ischemia.

17 p2502 A72-34994

Morphological alterations in the ischaemic heart.

17 p2502 A72-34995

Effects of hypoxia and ischemia on myocardial contraction - Alterations in the time course of force and ischemia-dependent inhomogeneity of contractility.

17 p2502 A72-34996

Induction of ventricular arrhythmias by elevation of arterial free fatty acids in experimental myocardial infarction.

17 p2502 A72-34997

Effect of nicotinic acid on myocardial metabolism in man at rest and during exercise.

17 p2506 A72-35968

Analysis of left ventricular wall motion by reflected ultrasound - Application to assessment of myocardial function.

19 p2755 A72-37497

Coronary collateral circulation and myocardial blood flow reserve.

19 p2755 A72-37500

Prognostic value of an electrocardiographic sign in acute myocardial infarction.

19 p2756 A72-37871

Systematic detection of myocardial infarction in the course of medical screening of flight personnel

19 p2757 A72-37881

Influence of inotropic alteration on the severity of myocardial ischemia after experimental coronary occlusion.

19 p2758 A72-38552

Determination of the elastic modulus of the left-ventricle myocardium with the aid of X-ray kymography

20 p2893 A72-38940

An indirect method for evaluation of left ventricular function in acute myocardial infarction.

20 p2892 A72-39462

Cardiac hypertrophy, capillary and muscle fiber density, muscle fiber diameter, capillary radius and diffusion distance in the myocardium of growing rats adapted to a simulated altitude of 3500 m.

21 p3003 A72-41624

Myocardium automatism, excitability, conductivity and contractility under cooling, noting complete inhibition at 9-3 deg C

22 p3141 A72-42072

Succinic and lactic dehydrogenases activities in homogenates from myocardial tissues of guinea pigs, rabbits and dogs in high altitude environments

22 p3144 A72-42592

Coronary blood flow and myocardial metabolism in man at high altitude.

22 p3144 A72-42593

Factors limiting the increase in stroke volume obtainable by positive inotropism - Investigations regard-

ing the sufficient heart in the case of continued postextrasystolic potentiation

22 p3145 A72-42748

Cardiocirculatory adaptation to chronic hypoxia. II - Comparative study of myocardial metabolism of glucose, lactate, pyruvate and free fatty acids between sea level and high altitude residents.

22 p3148 A72-43022

Effects of coronary arteriography on myocardial blood flow.

23 p3256 A72-43933

Collagen in human myocardium as a function of age.

23 p3256 A72-43935

General index for the assessment of cardiac function.

24 p3372 A72-45011

Clinical and anatomic implications of intraventricular conduction blocks in acute myocardial infarction.

24 p3374 A72-45691

MYOELECTRIC POTENTIALS

Motor unit potential histogram study of human motoneuron activity patterns during voluntary muscular contractions

08 p1116 A72-21472

Myocardium excitation-contraction mechanism in heart regulation, discussing surface membrane structure and cell action potential

09 p1264 A72-22222

Human motoneuron discharge time relations during isometric muscle contraction, measuring adjacent action potential and mean interspike intervals

12 p1761 A72-27653

MYOELECTRICITY

NT MYOELECTRIC POTENTIALS
Myocardium biopulse-controlled cardiosynchronizer as key component of biocontrol systems for cardiological studies

11 p1585 A72-26455

Gabor-Nelson myocardium electrical activity model for mathematical construction of vectorcardiograph from ECG for comparison of various lead systems

11 p1588 A72-26629

Electrical components of cardiac and skeletal muscle impedance, calculating rectangular stimulating current mean value

13 p1908 A72-28461

Surface electrode position effect on electromyogram recording of electrical activity during repeated biceps and triceps brachii contractions

15 p2190 A72-32489

Surface electrode distance, area and pressure effects on electromyogram recording of large skeletal muscle electrical activity during defined muscular tensions

15 p2190 A72-32490

MYOGLOBIN

Hemoglobin-facilitated diffusion of oxygen - Interfacial and thickness effects.

18 p2650 A72-36569

MYSTERE 20 AIRCRAFT

The Dassault Mystere 20.

19 p2748 A72-37900

N

N-N JUNCTIONS

Schottky barrier and n-n heterojunction diodes hf noise, considering ideality factor effect

07 p0955 A72-19358

S-type negative resistance segment formation on rectilinear branch of I-V characteristics of p-n-n structure

14 p2089 A72-30969

N-P JUNCTIONS

U P-N JUNCTIONS

N-P-N JUNCTIONS

Avalanche injected current relationship to emitter-base junction breakdown damage in planar n-p-n gated transistors

03 p0336 A72-14279

High temperature GaAs bipolar transistor n-p-n junction fabrication by vapor phase growth technique, considering I-V characteristics dependence on procedure

06 p0783 A72-17607

Complementary monolithic IC n-p-n and p-n-p transistor circuit structure with high sheet and low saturation resistance

11 p1606 A72-26567

Monoplastic solid encapsulant for n-p-n and p-n-p silicon planar passivated signal transistors

17 p2528 A72-34715

Multivibrator with p-n-p and n-p-n transistors, noting circuit diagram, operation and power dissipation

20 p2906 A72-38898

Boron p-type region impurity concentration calculation technique to establish anomalous base profile in n-p-n bipolar transistors

20 p2908 A72-39567

Emitter-dip model of diffusion anomalies of n-p-n Si HF transistors doped with B and P

21 p3035 A72-41489

N-TYPE SEMICONDUCTORS

Transferred electron microwave oscillator diodes with n-n structure by liquid phase epitaxy, reducing high resistance layer in interfaces and crystal defects

01 p0036 A72-10629

Transverse photoconductivity and dark I-V characteristics of n-GaAs compensated with Cr in high electric field at room temperature

03 p0401 A72-13586

Annealing defects in n-type silicon, observing anomalous heat treatment temperatures of A and E centers

04 p0560 A72-14529

Nonparabolic n-InSb semiconductors, presenting microwave conductivity dc field induced anisotropy

04 p0560 A72-14543

Transit time and LSA oscillations at millimeter and submillimeter wavelengths in n-type GaAs

04 p0563 A72-15593

N- and p-type semiconductors energy band structure bending near interface

05 p0702 A72-16197

Hopping electroconductivity of n-type GaS single crystals, observing frequency dependence

06 p0866 A72-18181

Microwave biased millimeter and submillimeter wave detector with n-type InSb, using down conversion process and free carrier absorption for detection

06 p0866 A72-18384

Carrier wave growth during propagation through negative differential mobility n-type GaAs under nonuniform dc bias conditions

07 p1047 A72-19044

Energy spectrum of radiation defects in proton bombarded n-type Si crystals from Hall effect and electroconductivity measurements

07 p1049 A72-19901

Millimeter and submillimeter band frequency conversion in nonlinear bulk n-InSb semiconductor at liquid helium temperature

08 p1140 A72-21060

Quantizing magnetic field effect on electromagnetic wave propagation in multivalley n-type Si and Ge and PbTe semiconductors

08 p1218 A72-21878

Electron and hole recombination at deep impurity centers during nonequilibrium current carriers excitation by Nd-glass laser light in p- and n-type germanium

09 p1322 A72-22214

Au-Si and Al-Si p diodes noise operating in avalanche with charges injected by radiation

09 p1287 A72-23113

Piezoresistance magnitude and temperature dependence changes of electron irradiated n-type silicon due to oxygen vacancy complex /A center/

09 p1372 A72-23239

Internal Q switching and long time delay emission in electron beam excited p-type and n-type GaAs lasers, indicating optical absorption traps

10 p1489 A72-23947

Electric field profile in n-type GaAs layer biased above transferred electron threshold for small signal amplifier operation

10 p1450 A72-24554

High conversion efficiency microwave second harmonic generator using negative resistance nonlinearity of n-type GaAs

11 p1591 A72-25741

Recombination parameters in low resistivity gamma irradiated n-type Ge, obtaining energy levels and temperature dependence of electron and hole capture probabilities

12 p1857 A72-28056

Li defect interactions in electron irradiated n-type single crystal Si from electron paramagnetic resonance measurements

12 p1858 A72-28063

Introduction rate and annealing of defects produced in Li-diffused float zone n-type Si by 30 MeV electrons and fission neutrons

12 p1858 A72-28064

Electron irradiation of n-type Si or Te doped GaAs, determining carrier removal rate, mobility changes and annealing characteristics

12 p1858 A72-28067

Annealing behavior of electrical properties and photoluminescence spectra in electron irradiated n-type GaAs semiconductors

12 p1859 A72-28068

Carrier concentration Hall mobility and photoconductivity in n- and p-type CdTe after neutron and electron bombardment

12 p1859 A72-28072

Quasi-linear approximation of input impedance of epitaxial n-type Si unijunction transistors for predominant drift conditions

13 p1927 A72-28406

Laser light induced high-low impedance switch in Cd doped n-type Si diodes with p-p-n junctions and negative resistance

13 p1928 A72-28676

Negative photoconductivity effect in high resistance n-type indium phosphide single crystals, noting

photocurrent spectral distribution and I-V characteristics 13 p2022 A72-29647

Zr oxidation kinetics at 440-850 C for 3 min maximum exposure time, observing time oxide change relationship to activation energy 14 p2113 A72-30247

Quasi-discrete acceptor states in zero gap n-type semiconductors, showing noncompensation at low temperatures 14 p2142 A72-30360

Millimeter wave third harmonic generation and frequency multiplication in n-type InSb at 77 K 14 p2142 A72-30799

Carrier wave behavior in n-type GaAs slab under crossed dc electric and magnetic fields, investigating traveling space charge amplifier magnetic control 14 p2143 A72-30941

High resistance n-type InP crystals electrical conductivity and photoconductivity characteristics at 80 K, discussing photosensitivity spectral distribution and temperature dependence 15 p2290 A72-31371

Electrical conductivity, reluctance and Hall effect of n-type semiconductors determined at extremely low temperatures 15 p2291 A72-31389

Transverse magnetic field effects on n-type GaAs Gunn diodes microwave power, coherence and dynamic I-V characteristics [ONERA, TP NO. 1051] 15 p2207 A72-31884

Tunable monochromatic IR laser based on magneto-Raman scattering from conduction electrons in n-type InSb, discussing physical processes and experimental techniques 15 p2250 A72-32393

Photoconductivity in depleted surface layer of quasi-monopolar semiconductors with arbitrary diffusion to Debye lengths ratio, noting n-type low resistance gallium arsenide 15 p2296 A72-32694

N-type GaAs absorption spectra construction from transmission spectra, considering effects of irradiation by fast protons, electrons, neutrons and alpha particles 16 p2441 A72-33368

Plasma magnetoresistance in variable magnetic field measured on n-type InSb sample for SHF inertialess power sensor development 16 p2436 A72-33482

Electrical characteristics of bulk n-InP oscillators. 18 p2666 A72-36456

Electric contact between metal and n-type semiconductor, investigating contact pressure effects on electron tunneling and phonon conduction to provide band structure 18 p2718 A72-36488

New efficient method for calculating hot electron effects applied to n-Ge. 19 p2844 A72-37686

Quantum efficiency and radiative lifetime of the band-to-band recombination in heavily doped n-type GaAs. 19 p2844 A72-37947

Differential negative resistance (DNR) in n-channel MOSFETs of silicon. 20 p2961 A72-39711

Technology and performance of n-channel MOSLSs using depletion-type load elements. 20 p2961 A72-39712

Small-signal admittance of the insulator-n type-gallium-arsenide interface region. 20 p2909 A72-39775

Fast-neutron-compensated n-germanium as a model of amorphous semiconductors. 20 p2961 A72-39853

Solid state physics experiment for conduction electrons effective mass determination in ultrapure n-type InSb by means of magnetophonon effect 21 p3096 A72-40203

Determination of conduction anisotropies in semiconductors. 21 p3097 A72-40697

Experimental investigation of a millimeter-wavelength n-InSb frequency converter at 4.2 K 21 p3016 A72-40786

Experimental investigation of the propagation of electromagnetic waves in a rectangular waveguide partially filled with n-InSb in the presence of a transverse magnetic field 21 p3016 A72-40796

Magneto-microwave free-carrier absorption in germanium in the Faraday configuration. 21 p3097 A72-41379

Plasma echo-type oscillations in n-type InSb semiconductor, noting conduction band nonparabolicity effects 21 p3098 A72-41687

Theory of microwave amplification with electron transfer 23 p3269 A72-43550

NACELLES

Propulsion system optimization in transonic transport aircraft design, considering nacelle integration,

engine choice, noise attenuation and technology utilization [SAE PAPER 710762] 01 p0115 A72-10259

Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls 07 p1054 A72-19268

Subsonic powered nacelle wind tunnel model for investigation of geometric variables effect on pressure drag [ASME PAPER 72-GT-14] 11 p1568 A72-25613

Balloon-nacelle for small scale photography and multispectral photometric ground measurements, describing automatic adjustment device for photographic lens diaphragm 16 p2349 A72-33633

Performance of low pressure ratio ejectors for engine nacelle cooling. 18 p2721 A72-36530

Balloon nacelle for terrain photography from very high altitudes 24 p3403 A72-45229

NAMING

NT NORMS

NAPHTHALENE

Turbine blade local heat transfer coefficient calculation with digital computer program and naphthalene blade mass transfer in cascade flow 05 p0747 A72-16498

Radical concentrations in gamma irradiated poly(ethylene 2,6-naphthalene dicarboxylate) by ESR spectrum analysis 10 p1433 A72-23847

Electron spin resonance of gamma-irradiated poly(ethylene 2,6-naphthalene dicarboxylate). 20 p2898 A72-39400

Studies on the convective heat transfer from a rotating disk. VI - Experiment on the laminar mass transfer from a stepwise discontinuous naphthalene disk rotating in a uniform forced stream. 22 p3243 A72-41946

NARCOLEPSY

IR pupillography for screening narcoleptics and fatigue prone individuals from driver and pilot training applicants 12 p1777 A72-28323

NARCOSIS

Inert gas narcosis under hyperbaric conditions relationship to mental performance and auditory and visual evoked responses in man [AD-736736] 02 p0166 A72-11705

Acute hypercapnia neurotropic effect in rabbits, describing carbon dioxide inhalation period, pre-narcotic and narcotic stages and recovery phase 02 p0160 A72-12015

NARCOTICS

NT MORPHINE

Central nervous system pharmacology, discussing somniferous, narcotic and neurotropic substances effects on brain activity 08 p1127 A72-21841

NASA PROGRAMS

NT APOLLO PROJECT

NT EARTH RESOURCES PROGRAM

NT GLOBAL ATMOSPHERIC RESEARCH PROGRAM

NT HELIOS PROJECT

NT MARINER PROGRAM

NT ROVER PROJECT

NT SKYLAB PROGRAM

NT TILT ROTOR RESEARCH AIRCRAFT PROGRAM

NT VIKING MARS PROGRAM

Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system [SAE PAPER 710774] 01 p0116 A72-10266

Experiment sensors impact on on-orbit vehicle configurations and operations in NASA program, synthesizing and cost analyzing common module sets 01 p0135 A72-10945

NASA earth resources satellite R and D program for acquiring data on agriculture, forestry, geography, geology, hydrology, mineralogy and marine resources 01 p0063 A72-10949

NASA quality assurance program, discussing management planning, assessment, failure prevention and cost effectiveness 02 p0304 A72-11554

NASA/MSFC earth observation aircraft program radar scatterometers, presenting system evaluation 02 p0172 A72-11849

NASA spacecraft instrumentation for high energy phenomena measurements, discussing collimated proportional counters, wire grid digitized spark chambers and modulation and slit collimators 03 p0353 A72-13038

NASA closed cycle MHD facility for power generation, discussing system components, design and operation [AIAA PAPER 72-103] 05 p0616 A72-16936

Skylink project as prospective joint American-Soviet space mission, combining Skylab and Soyuz spacecraft 05 p0731 A72-17092

NASA space applications program review, discussing potential of communication, navigation and earth observation satellites 06 p0893 A72-18610

Medical equipment advancements through NASA sponsored aerospace research program, describing prosthetic urethral valve, ear oximeter, radiation dosimeter and electromyographic muscle trainer 06 p0765 A72-18616

NASA materials science and manufacturing in space program involving space shuttle reusable equipment and weightlessness applications experiments 06 p0797 A72-18621

NASA sponsored medical R and D programs for space applications, stressing benefits to earthbound medical services 06 p0769 A72-18626

NASA programs phased planning and quality assurance techniques, noting cost effectiveness 07 p1102 A72-19126

Book on NASA technology transfer program covering regional university-based dissemination center evaluation and comparison with other transfer mechanisms 07 p1102 A72-19182

Biomedical transducers for NASA space program, discussing spray-on electrodes and telemetering for ECG respiration and body temperature 07 p0931 A72-19917

ERTS program, discussing orbit selection and sensor equipment 07 p1085 A72-20305

NASA research and applications module (RAM) for interim space station development and possible missions with space shuttle 08 p1240 A72-20978

NASA space programs, discussing future Apollo, Skylab, orbiting space station, space shuttle and deep space projects 08 p1230 A72-21002

Global NASA communications network (NASCOM) reliability, discussing design and performance goals 10 p1435 A72-23992

NASA ERTS and Skylab programs review, presenting information on spacecraft design, orbits, attitudes, sensors, image characteristics, data handling and processing, etc 10 p1539 A72-24323

Manned-Unmanned Lunar Explorer (MULE) for NASA integrated program plan after 1980, discussing weight, locomotion system and mission capabilities [AIAA PAPER 72-369] 11 p1612 A72-25394

NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements [SAE PAPER 720319] 11 p1575 A72-25582

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system [ASME PAPER 72-GT-96] 11 p1705 A72-25667

Large space telescope (LST) project, discussing instrumentation, observation program and operational characteristics 11 p1630 A72-25681

Short and long range contributions of NASA space program to life quality improvement, discussing land and crop surveys, communications and environment modification 11 p1748 A72-26098

NASA space program impact on U.S. technology, discussing performance levels, precision, reliability and industry stimulation 11 p1748 A72-26099

NASA program to develop heat resistant materials for aerospace applications, discussing refractory carbides, nitrides and borides temperature dependent behavior and properties 11 p1664 A72-26857

Weather forecasting support of NASA programs involving earth oriented viewing and sensing experiments from aircraft and spacecraft 13 p1990 A72-28816

NASA program for acquisition, analysis and dissemination of space propagation and interference data for space systems designers, operators and regulatory agencies [AIAA PAPER 72-577] 13 p1918 A72-28985

NASA space plans for 1970s including lunar, planetary and universe explorations, cost reduction, human living and working capability, technology applications and international cooperation 14 p2162 A72-31136

European programs on space stations, tugs, shuttles, propulsion and avionics and consideration for participation in NASA programs for 1970s and 1980s 14 p2175 A72-31137

European space project priority in terms of technological competition, budget limitation and participation in NASA post-Apollo program 14 p2175 A72-31138

U.S. industry views on NASA plans for 1970s, emphasizing interplanetary nuclear propulsion, space transportation, shuttle costs and economics 14 p2175 A72-31139

- U.S.-U.S.S.R. space cooperation, considering Eisenhower and Kennedy initiatives, NASA-Soviet Agency negotiations and current situation
14 p2176 A72-31145
- Apollo lunar exploration program survey, reviewing information on lunar crust composition and thickness, lunar evolutionary processes and chronology and extraterrestrial particle fluxes
15 p2309 A72-31970
- Report to COSPAR on U.S. space program covering stellar astronomy, lunar and planetary research under atmospheric physics, earth and life sciences, etc
15 p2337 A72-32006
- NASA teleoperator-robot development program, discussing technology and design studies related to space shuttle and stations, satellites and planetary vehicles
15 p2190 A72-32315
- NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation [AIAA PAPER 72-657]
16 p2443 A72-34077
- NASA R and D for STOL short haul transportation systems, discussing propulsive lift, blown flap and augmentor wing concepts, noise reduction, etc
17 p2487 A72-34238
- Spacecraft rescue and recovery capabilities assessment based on anticipated U.S. space programs, discussing mission design, recovery response, weather prediction and communications
17 p2620 A72-34429
- Survival equipment for life raft in conjunction with Mercury, Gemini, Apollo, Skylab and space shuttle NASA programs
17 p2620 A72-34433
- Space shuttle program, discussing configurational concepts, payload carrying capacity variants and cost reduction design changes
17 p2621 A72-34869
- NASA technology transfer from information dissemination and service to product development, noting firemen breathing system
17 p2639 A72-35506
- NASA R and D programs for quiet STOL aircraft and engines development
18 p2721 A72-36503
- Space science advances and NASA Planetary Program, noting solar system evolution, life origin and Skylab and Space Shuttle programs
19 p2855 A72-37274
- Potential applications of NASA-developed technology to problems of the environment. [ASME PAPER 72-ENAV-23]
20 p2895 A72-39154
- Flight safety research, discussing NASA aviation hazards R and D programs involving fire, lightning and static, steep approaches, aircraft wakes, fog and visibility
20 p2888 A72-39742
- European participation in space shuttle and space tug programs, discussing funding and technical aspects
21 p3103 A72-40456
- NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise [ICAS PAPER 72-48]
21 p3100 A72-41173
- NASA's quiet engine programs.
22 p3217 A72-43152
- Development of planetary quarantine in the United States.
23 p3259 A72-43382
- NASA developed geostationary weather and environmental satellite for launch in 1973, discussing ground station equipment, antenna system and data collection service
23 p3343 A72-43551
- Explorer satellites and Pioneer space probes development program, discussing launching rockets, reentry tests, payloads, radio communication, Van Allen belts discovery, etc
23 p3358 A72-44353
- NASA ICBM/IRBM space program major management decisions and highlights concerning Atlas, Titan and Thor
23 p3358 A72-44356
- NASA space science, exploration and applications plans and policies in view of space shuttle capabilities, emphasizing cost reduction
24 p3440 A72-45162
- United States Space Nuclear Electric Power Program.
24 p3424 A72-45179
- NASA's management concept for the Space Shuttle Program.
24 p3468 A72-45194
- Potential contributions of the United States space program to exploration of the solar system.
24 p3445 A72-45467
- ### NATIONAL AIRSPACE UTILIZATION SYSTEM
- Aircraft proximity control for ATC system using national secondary surveillance radar (SSR) for CAS-PWI functions
06 p0844 A72-17330
- Air traffic flow control - Problems and approaches.
19 p2832 A72-38254
- ### NATIONAL AVIATION SYSTEM
- National Aviation System technology, discussing wide body jets, smokeless turbopfans, all-weather operational capability, collision avoidance and noise reduction
04 p0597 A72-14824
- Nationwide real time automated ATC system interconnected by data transmission links, discussing radar signal acquisition/transfer and computer complex
06 p0845 A72-18283
- Air traffic flow control - Problems and approaches.
19 p2832 A72-38254
- ### NATURAL FREQUENCIES
- #### U RESONANT FREQUENCIES
- ### NATURAL GAS
- Combustion products thermodynamic parameters for natural gas burning in oxygen atmosphere, plotting gas temperature and flow rates against pressure and excess oxidant ratio
13 p2065 A72-29451
- ### NATURAL SATELLITES
- #### NT EUROPA
- #### NT IAPETUS
- #### NT IO
- #### NT MOON
- #### NT PHOBOS
- #### NT TITAN
- Io modulation of Jupiter decametric emissions, using cyclotron magnetosphere model and coupling by whistler mode electromagnetic waves
01 p0125 A72-10084
- Jupiter outer satellite origin, considering capture orbit dimensions based on three body elliptical problem
02 p0275 A72-11594
- Outer planets satellites physics and chemistry, discussing steady state thermal models based on energy equilibrium between internal radioactive decay and surface radiation
04 p0568 A72-14495
- Jupiter outer satellite group formation theory, suggesting asteroid-larger satellite collision
04 p0569 A72-14496
- Jupiter-induced perturbations in orbital elements of Callisto artificial satellite, noting correction requirement due to Jupiter polar flattening
04 p0572 A72-14634
- Jovian decametric radiation observations, showing satellite Io relative position correlated to highest frequency
04 p0581 A72-15515
- Jupiter mass from discrete time observations of J1X satellite positions and velocities, using sequential Kalman-Bucy filter
06 p0876 A72-17580
- Astronomical model for Jovian decametric radio emission control by Io satellite based on two surface sources on planet and particle interaction with plasma
06 p0891 A72-18504
- Spacecraft planetary approach navigation with TV camera onboard Mariner 9 giving images of Mars natural satellites against star background, discussing optical data processing programs [AIAA PAPER 72-53]
07 p1032 A72-18946
- Maximum cut-off frequency of Io controlled Jovian decametric radiation as function of lambda coordinates
07 p1059 A72-19599
- Photoelectric measurements of brightness of Galilean satellites of Jupiter as function of solar phase angle
08 p1238 A72-21831
- Telescope observations of occultations of stars by outer planets, natural satellites and asteroids
09 p1387 A72-22977
- Negative search for post-eclipse brightening of Io and Europa satellites in 1970 based on single beam photometric observation
10 p1532 A72-23714
- Secular and periodic variations of orbital elements of Mars satellites due to oblateness and solar attraction
10 p1541 A72-24471
- Photoelectric observation of beta Scorpis occultation by Jovian satellite Io, noting Fresnel diffraction effects
10 p1548 A72-24969
- Occultation of beta Scorpis by Jupiter and Io to determine Jovian equatorial radius and oblateness
10 p1548 A72-24970
- Three body problem study of satellite capture by planets in elliptical orbits, deriving orbital elements in terms of mass ratio and planetary orbit eccentricity
12 p1865 A72-27096
- Jupiter occultations of multiple star beta Scorpis and Io close approach to beta sub 2 Sco
12 p1871 A72-27757
- Titan and Galilean satellites effective temperatures from broadband observations, suggesting low surface emissivity or high opacity for Titan
13 p2041 A72-29417
- Jupiter decametric radiation modulation by photoelectron emission by satellite Io, describing future probe experimental test
14 p2156 A72-30558
- Comets formation from Jupiter satellite Io surface eruption using particle trajectory analysis and comet orbital elements calculation
15 p2305 A72-31391
- Callisto radio emission analysis by ice body model, noting brightness temperature calculation of ice surface
15 p2308 A72-31904
- Io effects on Jupiter decametric radio bursts, discussing ionosphere vs solid surface for required conductivity
16 p2455 A72-33465
- Solar wind velocity near Jupiter correlated to Io geocentric phase during radio bursts, noting plasma-sphere models
16 p2459 A72-33904
- Titan spectrum absorption features, estimating hydrogen abundances
17 p2606 A72-34540
- Sheath effects and related charged-particle acceleration by Jupiter's satellite Io.
17 p2611 A72-35320
- Influence of the Galilean Jovian satellites on the motion of an artificial satellite of Callisto
17 p2618 A72-35811
- Temperature sounding experiments for the Jovian planets.
18 p2726 A72-36641
- Electrodynamic effects of Jupiter's satellite Io.
21 p3104 A72-40483
- Role of the swarm of satellite-particles on the origin of the earth's rotation
22 p3220 A72-41916
- Origin and evolution of the earth-moon system.
22 p3227 A72-42540
- Book on moons and planets covering celestial mechanics, solar system origin, stellar formation, comets, asteroids, meteorites, planetary interiors, surfaces, atmospheres, etc
22 p3228 A72-42750
- The physical properties of the Jovian atmosphere inferred from eclipses of the Galilean satellites. II - 1971 apparition.
24 p3435 A72-44689
- The determination of the diameter of Io from its occultation of beta Scorpis C on May 14, 1971.
24 p3436 A72-44700
- Observation of the occultation of beta Sco C by Io.
24 p3436 A72-44702
- Luni-solar perturbations of the geostationary vehicle at arbitrary latitude.
24 p3448 A72-44990
- Ground observation for outer planets natural satellites ephemeris, using astrometric telescopes, photographic and plate reduction techniques [AIAA PAPER 72-904]
24 p3443 A72-45426
- ### NAUSEA
- Environmental temperature effect on motion sickness sweating, discussing nausea and discomforting symptomatology prediction
12 p1775 A72-28302
- ### NAVIER-STOKES EQUATION
- Difference analog of nonlinear hydrodynamic boundary value problem from Navier-Stokes steady state theory
01 p0050 A72-10576
- Inertia effects in fully developed axisymmetric laminar flow between two parallel rotating walls, solving Navier-Stokes equation in nonlinear form [ASME PAPER 71-LUB-J]
02 p0234 A72-11529
- Nonlinearity effects on two dimensional steady supersonic dissipative flow governed by Navier-Stokes equations, obtaining expressions for flows past thin airfoil and wedge
02 p0203 A72-11976
- Secondary periodic solution for Navier-Stokes type evolution problems, observing stabilities [ONERA, TP NO. 1035]
03 p0389 A72-13786
- Navier-Stokes equation analysis of three dimensional steady radial expansion of viscous heat-conducting compressible fluid from spherical sonic source into vacuum
03 p0343 A72-14247
- Laminar viscous flow past finite flat plate at high Reynolds numbers, solving Navier-Stokes equations
04 p0511 A72-14859
- Pressure and convective heat transfer distribution at air inlet central body surface, reducing Navier-Stokes equations to partial differential equations with similar solutions
04 p0596 A72-14971
- German monograph on two dimensional unsteady boundary layer calculation with unstable effects, using Navier-Stokes equations
04 p0512 A72-15245
- Navier-Stokes equations numerical solution by computerized simulation for viscous channel flow with diaphragm orifice reducing cross section
04 p0513 A72-15644
- Navier-Stokes equations solution by finite difference methods for steady incompressible laminar vapor flow in symmetrical and unsymmetrical heat pipes, calculating pressure losses [ASME PAPER 71-WA/HT-15]
05 p0744 A72-15874

Longitudinal curvature effects on laminar and turbulent boundary layer flows predicted from Navier-Stokes equations, noting mixing length assumption validity [ASME PAPER 71-WA/FE-37] 05 p0645 A72-15920

Navier-Stokes equations solution for unsteady viscous flow around oscillating elliptic airfoil in turbomachinery flutter analysis, obtaining pressure and shear stress distributions 05 p0600 A72-16002

Navier-Stokes equations asymptotic solution for compressible weightless conducting fluid flow in plane channel with intense blowing from walls 05 p0648 A72-16219

Numerical simulations of three dimensional homogeneous isotropic turbulence at wind tunnel Reynolds numbers, solving Navier-Stokes equations for incompressible flow 05 p0649 A72-16685

Two dimensional turbulence stationary states from statistical equilibria for Navier-Stokes equation 05 p0649 A72-16686

Navier-Stokes equations numerical solution for laminar incompressible flow past paraboloid of revolution at zero angle of attack [ALAA PAPER 72-110] 05 p0604 A72-16818

Numerical solution to Navier-Stokes equations for viscous annular flow between rotating long eccentric cylinders [ALAA PAPER 72-113] 05 p0605 A72-16821

Atmospheric turbulence incompressible two dimensional model, comparing Navier-Stokes equations numerical integration results with finite difference simulation [ALAA PAPER 72-152] 05 p0651 A72-16871

Unsteady axisymmetric incompressible pipe flow stability near piston, using Navier-Stokes equations solution with finite difference forms 05 p0653 A72-17006

Two-dimensional asymptotic solutions to Navier-Stokes equations for weak vortex discontinuity flow with vanishing viscosity 06 p0798 A72-17680

Navier-Stokes equation solution for laminar incompressible flow past parabolic cylinder, investigating skin friction and pressure drag 06 p0798 A72-17782

Perturbation methods for laminar flows near leading edge, discussing approximations of Navier-Stokes equations and domain connection 06 p0756 A72-18108

Small parameter method solution of two dimensional incompressible flow Navier-Stokes equations, exemplifying application to viscous incompressible flow past seminfinit plate 06 p0801 A72-18127

Convergent finite difference schemes for Navier-Stokes equations initial boundary value problems, using Temam systems approximation method 06 p0840 A72-18132

Coolant flow and heat transfer in rotating circular cylindrical enclosure, solving Navier-Stokes and energy equations by finite difference formulation 06 p0802 A72-18189

Navier-Stokes equations numerical solution for viscous incompressible fluid in circular cylinder with rotating top disk, computing secondary flow at Reynolds numbers to 400 06 p0802 A72-18526

Difference method for numerical integration of Navier-Stokes equations for two dimensional incompressible steady flow along flat thin plate 07 p0908 A72-19170

Hydrodynamic stability problems with reference to Navier-Stokes equation solutions, discussing linearization principle application 07 p0969 A72-20066

Navier-Stokes equation numerical solution methods, expressing boundary conditions by separate equations for vorticity and stream function 07 p0970 A72-20077

Invariant free boundary problems of Navier-Stokes equations with nonzero vector of volume forces, investigating liquid layer flow on vertical cylinder surface 07 p0972 A72-20105

Generalized Navier-Stokes equations for incompressible turbulent flow time mean values, using nonlinear phenomenological theory 07 p0972 A72-20109

Unsteady gas flow in thrust bearing with spiral grooves, presenting Navier-Stokes and discontinuity equation 08 p1176 A72-21167

Navier-Stokes equations numerical solution for symmetric laminar incompressible flow past parabolic cylinder, presenting surface pressure, friction and pressure drag results 10 p1465 A72-24291

Finite amplitude disturbances effect on plane Poiseuille flow hydrodynamic stability, presenting numerical method for solving parabolic partial differential equations derived from Navier-Stokes equation 10 p1468 A72-24422

Navier-Stokes equations system integration for axisymmetric vortex flow of viscous incompressible three component fluid 10 p1471 A72-25134

Turbulent flow time averaged description by Navier-Stokes equations, determining Reynolds number dependent stress tensor coefficients 11 p1615 A72-25722

Wind velocities field in vortices leeward of islands derived from Navier-Stokes equation for isolated axisymmetric viscous vortex 12 p1839 A72-27032

Collisional plasma shock waves structure in electromagnetic shock tube with strong transverse bias magnetic field, using two fluid Navier-Stokes equations 13 p2011 A72-29119

Navier-Stokes equation for rotating liquid axial flow past porous plate, noting velocity distribution for suction and thinning effect for blowing 13 p1942 A72-29127

Binary gas mixture slipping rate determination from joined solution of Hamel kinetic model linearized equations, and Navier-Stokes and Boltzmann equations 14 p2096 A72-31013

Two dimensional viscous flow past seminfinit flat plate and smooth obstacle, using Navier-Stokes equations for lift force relationship investigation 15 p2216 A72-31312

Navier-Stokes equation for unsteady asymptotic suction flow over flat plate, plotting velocity distribution profiles 15 p2178 A72-31406

Finite difference solution to Navier-Stokes equations for axisymmetric flow of incompressible viscous fluid 15 p2216 A72-31446

Ideal gas supersonic axial flow past circular cylinder, solving Navier-Stokes equations by Van Dyke matched asymptotic expansions method 15 p2178 A72-31463

Kinematic eddy viscosity for incompressible two dimensional turbulent flow, obtaining Navier-Stokes equations and conditions for equilibrium and nonequilibrium boundary layers 15 p2216 A72-31470

Three dimensional boundary layer instability, obtaining linearized perturbation equation on basis of Navier-Stokes equation 15 p2216 A72-31471

Shock wave propagation in gas with discrete velocity distribution, comparing solutions based on Euler, exact and Navier-Stokes equations respectively 16 p2375 A72-32861

Mathematical model of atmospheric tides using Navier-Stokes equations for perfect gas in thermodynamic equilibrium 16 p2385 A72-33343

Turbulent solutions of certain linear and nonlinear partial differential equations 17 p2537 A72-34194

Solution of the two-dimensional, unsteady, compressible Navier-Stokes equations using a second-order accurate numerical scheme. 17 p2538 A72-34646

Numerical calculation of the supersonic flow of a viscous fluid about a parabolic obstacle 17 p2484 A72-34887

A modified Navier-Stokes equation, and its consequences on sound dispersion. 17 p2540 A72-35146

The flow caused by the differential rotation of a right circular cylindrical depression in one of two rapidly rotating parallel planes. 17 p2540 A72-35189

General closed form solutions to Burger equation with forcing terms in Navier-Stokes equation for turbulence studies 18 p2677 A72-36004

Invariant solutions of the Navier-Stokes equations describing motions with a free boundary. 18 p2679 A72-36234

A new method of analysis in laminar-flow theory. 18 p2681 A72-36551

Numerical study of a viscous gas flow in the wake of a plane body 18 p2642 A72-36804

A comparison of the solutions of Prandtl's and Navier-Stokes equations in a superposed fluctuating flow. 18 p2684 A72-37084

Proper equations and similar approximations in the hypersonic merged layer. 20 p2885 A72-39621

Large-scale instabilities of turbulent wakes. 21 p3044 A72-40116

Two-dimensional stationary problem with a free boundary for the Navier-Stokes equations 21 p3047 A72-41663

Predvoditelev critical revision of hydrodynamic and heat transfer theory based on Navier-Stokes and Boltzmann equations, developing statistical system of molecular interactions 22 p3165 A72-41951

Numerical solution to the Navier-Stokes equations in the problem of a gas flow past a rectangle 22 p3166 A72-42252

Boundary value problems of viscous fluid dynamic system generated by Navier-Stokes equations, using Hopf theory 22 p3208 A72-43137

Navier-Stokes evolution inequality bounded solution existence and uniqueness theorems for two dimensional space 22 p3200 A72-43201

Periodic solutions of a nonlinear mixed problem for the Navier-Stokes equations 24 p3418 A72-44780

A theory of homogeneous, isotropic turbulence of incompressible fluids. 24 p3392 A72-45245

Kinetic theory of turbulent flow. 24 p3394 A72-45563

Area navigation for Chicago-New York region, evaluating Decca Omnitrac 1A RNAV system installation in Boeing 727 aircraft 09 p1349 A72-23467

Operational aviation meteorological requirements, reviewing aircraft categories, ATC systems and avionics and navigational aids 10 p1508 A72-25078

Loran-Omega course and track equipment /LO-CATE/ of integrated upper air meteorological sounding systems, describing radiosonde navigational aids 10 p1484 A72-25086

Integrated display system design with navigation update, weapon delivery, reconnaissance, bomb damage assessment, threat and terrain avoidance capabilities for multicrew military aircraft 11 p1684 A72-26292

Skyguide airborne computer navigation system for airline applications, discussing system components, flight crew monitoring and optimization 11 p1684 A72-26999

VOR and Doppler VOR ground station equipment based on reliable solid state radio transmitters and signal generating devices for aircraft navigation 12 p1779 A72-27104

Detection range, color, brightness and flash subjective response tests to evaluate light signals for nighttime sea navigation and visual collision avoidance 12 p1777 A72-28326

Great circle intermediate waypoint computation method for inertial navigation equipped aircraft 15 p2271 A72-32205

Hybrid area navigation and microwave instrument landing system, discussing approach control and terminal guidance 15 p2271 A72-32206

ICAO assistance to member states in various transport airports and navigation facilities economics including accounting and financial statistics 16 p2481 A72-33334

V/STOL flight control - Trend and requirements. 17 p2487 A72-34240

The Omega navigation system - Its history, application and versatility. 17 p2578 A72-35559

OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss 19 p2831 A72-37796

Precision navigation for approach and landing operations. 19 p2832 A72-38253

Space shuttle terminal navigation with conventional navigation aids. 20 p2950 A72-39095

Reduction of air traffic congestion due to corridor effect of present airway route pattern through area navigation /R-NAV/ based on VOR/DME inputs 20 p2952 A72-39750

An area navigation system for a long range airplane. 21 p3079 A72-40281

Statistical synthesis of navigation aids systems with unsteady random interferences, obtaining optimization criterion by least squares method 22 p3202 A72-42232

NAVIGATION INSTRUMENTS

NT ATTITUDE INDICATORS

NT GYRO HORIZONS

NT GYROCOMPASSES

NT MAGNETIC COMPASSES

NT RADIO ALTIMETERS

NT RADIO DIRECTION FINDERS

Error probability distributions in navigational statistics involving single or identical and diverse instruments or operators 01 p0096 A72-10176

Human factors engineering of aircraft cockpit data entry keyboards on area navigation control and display units 01 p0020 A72-11138

Apollo lunar roving vehicle design requirements based on environmental conditions, emphasizing wheel drive control and steering systems optimization and navigational instrumentation 05 p0643 A72-16428

Incorrect or unmodeled error sources effects on arbitrary linear navigation filters design and performance [AIAA PAPER 72-14] 05 p0688 A72-16911

Onboard orbital navigation system analysis on space shuttle radio range and range rate measurement data relative to ground beacon, using Kalman filter 08 p1203 A72-20856

Astrolabe design and operation for reconnaissance and simultaneous determination of latitude and longitude 08 p1165 A72-21022

Flight testing of automated modular area navigation system for L-1011, describing computer, data storage and control-display units and electronic automatic chart system 10 p1509 A72-24271

Self organizing control system for optimal performance of navigation instruments, using adaptive algorithm for statistical error filtration 13 p1996 A72-29157

Small aircraft navigation over 10-400 mile course segments by raw OMEGA phase information dc presentation on conventional ID-249 course deviation indicator 13 p1999 A72-29201

Landmark navigation with angle measurements for roving vehicle guidance on lunar and planetary surfaces 15 p2268 A72-31790

Configuration and flight test of the only operational Air Force area navigation system. 17 p2578 A72-35557

Contribution of Danjon's astrolabe to the study of proper motions 18 p2726 A72-36727

Landmark navigation rule, a new navigation device. 19 p2830 A72-37296

Development of STOLAND, a versatile navigation, guidance and control system. 19 p2831 A72-38106

Design of a reduced-state suboptimal filter for self-calibration of a terrestrial inertial navigation system. [AIAA PAPER 72-849] 20 p2949 A72-39080

Error analysis of hybrid aircraft inertial navigation systems. [AIAA PAPER 72-848] 20 p2950 A72-39081

An adaptive technique for a redundant-sensor navigation system. [AIAA PAPER 72-863] 20 p2952 A72-39134

A detailed analysis of Mariner nine TV navigation data. [AIAA PAPER 72-866] 20 p2977 A72-40061

Modular navigation /MONA/ dual channel automatic area navigation system, describing computer, flight data storage and control/display units 21 p3079 A72-40277

TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units 21 p3079 A72-40278

Operational implementation of area navigation. 21 p3079 A72-40279

Present status of self-contained navigation systems combining Doppler velocity sensors and attitude/heading references. 21 p3079 A72-40282

ILS replacement by microwave landing system, considering landing phase range from acquisition to touchdown, terminal approach handling by airborne navigation system and economic advantages 21 p3081 A72-40294

Application of external information about the linear velocity of an object for correcting inertial navigation systems 24 p3423 A72-45319

NAVIGATION SATELLITES

NT NAVSTAR SATELLITES

NT TRANSIT SATELLITES

Geometry and latitude/longitude differentials approximations for position fixing by Doppler signals and earth satellites 01 p0097 A72-10182

Uhf aeronautical satellite system, presenting ATC trends, international aspects, available flight levels, weather conditions and long haul conflicts 02 p0257 A72-12383

Satellite navigational aid system technical and operational characteristics, emphasizing voice communications links in L band 03 p0386 A72-12972

Flight navigation technology current state and development trends, discussing transition from Doppler to inertial systems, use of computers and satellites, collision avoidance, etc 05 p0687 A72-16737

Spacecraft, aircraft and ship navigation by satellites, noting Navy Navigation Satellite System 05 p0687 A72-16747

Single satellite angle system and multiple satellite ranging and range difference systems in short haul air navigation, comparing with VORTAC 06 p0844 A72-17335

NASA space applications program review, discussing potential of communication, navigation and earth observation satellites 06 p0893 A72-18610

Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement 12 p1842 A72-27103

Correlation technique for position location in surveillance and navigation by phase extraction from range tones using synchronous satellites [AIAA PAPER 72-564] 12 p1842 A72-27375

Russian book on flight navigation cybernetics covering Doppler, astro and radio inertial schemes and satellite systems 12 p1843 A72-28344

OMEGA navigation system operation aboard NOAA ship Discoverer in conjunction with satellite system, noting Trans-Atlantic tracklines 13 p1998 A72-29194

Navy navigation satellite system, discussing time and frequency role, TIMATION satellite time standard and application for user equipment clock signal comparison 15 p2268 A72-32070

Technical and operational aspects of L-band satellite system for air navigation, discussing verbal communication, direction finding and noise interference problems 16 p2421 A72-34138

Ranging signals for aeronautical satellite systems 17 p2516 A72-35220

Geostationary satellite system for air navigation via voice and data communication, discussing ground facilities and avionics 21 p3080 A72-40284

Navigation satellite system based on triangular distance measurement between two satellites and aircraft, noting simplification of air- and satellite-borne equipment requirements 21 p3080 A72-40285

A hybrid navigation concept using a spinning satellite-borne interferometer and self-contained equipment. 21 p3082 A72-41083

The role of time/frequency in Navy navigation satellites. 22 p3202 A72-42749

Theoretical and practical comparison between two minute Doppler and short Doppler satellite position fix accuracy. 22 p3203 A72-42947

Potential of the navy navigation satellite system in predicting ionospheric characteristics. 24 p3447 A72-45555

NAVIGATORS

Navigators, pilots and airman trainees response to Coriolis accelerations, investigating nystagmus sensitivity coefficient relationship to motion sickness resistance 01 p0021 A72-11286

Civil aeronautics environment relation to psychiatrists and medical psychologists treatment of air navigation personnel, discussing chemotherapeutic and psychotherapeutic treatment administration problems 07 p0927 A72-19243

Military aviation navigator training, discussing objectives, methods, instructors and equipment 15 p2272 A72-32207

Electronic displays with weapon aiming sensors in aircraft navigator-attack systems 15 p2273 A72-32634

A new approach to a cruise navigator evaluation using sparse reference data. [AIAA PAPER 72-835] 20 p2950 A72-39092

NAVION AIRCRAFT

Effects of variations in lift and drag response to longitudinal control on the ease and quality of landing. 24 p3368 A72-45333

NAVSTAR SATELLITES

Spacecraft, aircraft and ship navigation by satellites, noting Navy Navigation Satellite System 05 p0687 A72-16747

NAVY

Critical review of Mil-F-83300 V/STOL flying qualities specifications as applied to helicopter design and missions, suggesting inappropriateness for Navy helicopters [AHS PREPRINT 643] 17 p2490 A72-34503

Polaris submarine-weapon system autonomous organization and management technique based on team

- combining Navy and civilian contractors in close working relationship 23 p3358 A72-44358
- NEAR INFRARED RADIATION**
- Visible and near IR reflectance spectra of soil mineralized trees, using multispectral photographic filters 02 p0209 A72-11789
- Water molecules absorption lines in sunspots umbral near IR spectrum, noting improved spectrometric apparatus 05 p0719 A72-16515
- Earth upper atmosphere outgoing thermal radiation radiance calculation in near IR spectrum 06 p0808 A72-18041
- Ground based IR astronomical telescope detectors, relating F number and optical requirements to near, far, and intermediate IR observation 10 p1481 A72-24249
- III-V metal photocathodes for near IR and shorter wavelengths, noting performance improvements over conventional cathodes 11 p1630 A72-25683
- Laser emission in near IR by flash lamp pumped fluorescent dyes, presenting oscillograms 11 p1651 A72-26505
- Venus atmosphere IR synthetic spectra of carbon dioxide band and water line formation for isotropic scattering, comparing with terrestrial clouds 13 p2040 A72-29410
- Stimulated luminescence in activated Nd glass by pulsed laser radiation at 1060 nm wavelength 13 p1969 A72-29519
- Human eye relative luminous efficiency for near IR and UV coherent light, using ruby laser pumped tunable dye laser primary and second harmonic outputs 15 p184 A72-31380
- Sky spectral brightness, transmittance and indicatrix measurements at near IR wavelengths 15 p2222 A72-31398
- Avalanche photodiode with n-p-pi-p double diffused reach-through structure for visible and near-IR regions, noting high efficiency, low noise and gain stability 15 p2248 A72-32036
- Near IR airglow observation by sound rocket to determine layer height diurnal variation and rocket axis zenith angle 15 p2231 A72-32328
- Pulsed emission at pulse front in molecular hydrogen, deuterium and nitrogen at near IR electronic transitions, analyzing spectral, temporal and energy characteristics 16 p2401 A72-33298
- Flowing air glow discharge near IR emission spectrum as function of pressure, noting atomic lines 16 p2427 A72-34097
- Multispectral angular reflectivity effect on optimum filter combinations for spaceborne multiband photography sensing mission in visible and near IR regions 16 p2395 A72-34104
- Near-infrared photometry of Mira variables. 18 p7229 A72-37018
- Grid polarisers for use in the near infrared. 20 p2922 A72-39046
- The employment of a novel Quntacon photomultiplier for increasing the sensitivity of older flame photometers in the near IR 20 p2927 A72-39697
- Radiometer with protective mica window for radiant flux densities measurement of near IR sources, noting reading independence of sources spectra characteristics 21 p3059 A72-41821
- Mercury-cadmium telluride photodiode detectors for near IR laser receivers, discussing time response and I-V characteristics as function of temperature 23 p3296 A72-43881
- Circular and linear dichrometer for the near infrared. 23 p3289 A72-43899
- Observation of M 82 in the near infrared 24 p3446 A72-45487
- NEAR ULTRAVIOLET RADIATION**
- Uranium arc plasma visible and near UV emission coefficients as function of U partial pressure and corresponding temperatures 01 p0112 A72-11337
- Brightness correlation and mapping of weak photospheric magnetic fields and faculae using CN 3883-A spectroheliograms 03 p0414 A72-12927
- High spectral resolution balloon-borne spectrograph for near UV solar Mg II resonance lines 03 p0354 A72-13053
- Solc-type tunable birefringent filter for near UV spectrum, discussing optical design and transmission characteristics 03 p0355 A72-13058
- Human eye relative luminous efficiency for near IR and UV coherent light, using ruby laser pumped tunable dye laser primary and second harmonic outputs 15 p2184 A72-31380

NEAR WAKES

- Finite difference model application to supersonic planar viscous near wake, determining parameter range by physical and numerical restraints [AIAA PAPER 72-115] 05 p0609 A72-16971
- Supersonic near wake flow around blunt and sharp cones with trailing edge turbulent boundary layer 06 p0757 A72-18141
- Laminar near wake solutions for slender ablating cone under supersonic atmospheric entry conditions including boundary layer reactions [AIAA PAPER 72-116] 07 p0907 A72-18954
- Book on steady laminar supersonic and hypersonic wakes covering near and far region solutions, boundary layer separation, etc 09 p1261 A72-23029
- About the interaction between a satellite and its environmental ionospheric plasma. 21 p3090 A72-40454
- Base mounted cylinders effect on near wake of axisymmetric blunt base in supersonic flow [AIAA PAPER 72-1013] 21 p2993 A72-41594
- NEBULAE**
- NT CASSIOPEIA A
- NT CRAB NEBULA
- NT PLANETARY NEBULAE
- Galactic II astronomy, discussing findings on emission from H II regions of Orion Nebula and late and early type stars 02 p0276 A72-11643
- Planetary mass distribution in solar system from gravitational contraction of nebula formed by accretion of ring shaped particle cloud 02 p0282 A72-12311
- Dust continuous spectrum and Balmer line intensity ratio in Orion Nebula from slit spectroscopy observations [AD-745076] 02 p0284 A72-12631
- Reflection nebulae genetic relationship to illuminating stars from catalogs based on Palomar Observatory Sky Survey 02 p0284 A72-12639
- Emission nebulae in Magellanic Clouds observed at 408 MHz, calculating electron density and total mass 02 p0285 A72-12796
- He abundances in gaseous nebulae by optical and radio observation, discussing hydrogen and helium recombination spectra interpretation 03 p0419 A72-13115
- Gum Nebula size, emission features and expansion dynamics, discussing Zeta Puppis UV spectrum and Vela X radio emission 03 p0440 A72-14364
- Galactic plane 100 micron survey, detecting continuum radio sources, bright and dark nebula and IR stars 04 p0570 A72-14524
- Faust project history, scientific objectives and present status, discussing stars, nebulae, quasars point sources and galactic photometry 04 p0583 A72-15691
- Radio emitting giant loops in the Galaxy, considering supernova radiation induced nebulae model to explain spectral and polarization properties 06 p0876 A72-17649
- Interstellar gas motion model of nebulae formation by Wolf-Rayet stars 06 p0883 A72-18016
- Galactic cepheid RS Puppis and surrounding ring-structured nebula luminous variations and evolution, using reflecting shell model 07 p1069 A72-19079
- Radio emission of Lupus region believed to contain supernova of 1006 A.D., noting strong polarization 07 p1076 A72-19607
- Isophote equidensity role in astronomical photometric investigation of solar corona, galactic nebulas, comets and extragalactic stellar systems 07 p1082 A72-20301
- Photoelectric Fabry-Perot measurements of M8 and M42 nebulae H alpha and forbidden N II emission lines profiles, determining temperatures and turbulent motions 09 p1390 A72-23528
- OH emission source and H II region bright knots coincidence in NGC 7538 nebula, suggesting physical model 09 p1392 A72-23548
- Interstellar gas motion model of nebulae formation by Wolf-Rayet stars 11 p1718 A72-25952
- Interstellar anomalous 6 centimeter formaldehyde absorption in diffuse dark nebulae, discussing quantum mechanics of collisional pumping process 11 p1720 A72-26112
- Chemical equilibrium models of low temperature condensation from solar nebula relating to planetary composition 15 p2311 A72-32083
- Galactic nebulae electron temperature and density from forbidden line emissions interpreted in terms of transition probabilities and collision strengths 18 p2723 A72-36090

- Bright nebulae near concentrations of high-velocity gas. 19 p2856 A72-37504
- Study of a faint nebula identified as the HB-21 radio source 19 p2862 A72-38054
- Two quantum induced photon-plasmon transition probability for hydrogen atom in processes of nebulas and stellar chromospheres 19 p2837 A72-38058
- Transfer of resonance-line radiation in differentially expanding atmospheres. I - General considerations and Monte Carlo calculations. 21 p3106 A72-41037
- Interstellar nitrogen-15 and U169.3 - Possibly a new methanol line. 21 p3107 A72-41272
- Various ground configuration level intervals from gaseous nebulae and solar coronal forbidden transitions observations and laboratory investigations of resonance lines 21 p3108 A72-41286
- A spectral study of the nebula NGC 7635 and the star BD +60.2522 deg 21 p3113 A72-41755
- Nebulae of the Southern Milky Way - An atlas. 21 p3114 A72-41847
- Dark dust nebulae and bright H II clouds, considering light molecules, stellar birth region, radio and IR astronomy 22 p3220 A72-41995
- The non-spherical nebulae of Nova Delphini 1967, Nova Vulpeculae 1968/I, and Nova Serpentis 1970. 22 p3221 A72-41999
- The dynamical effects of stellar mass loss on diffuse nebulae. 22 p3224 A72-42380
- Gum nebula origin as ionized hydrogen cloud from prehistorical supernova explosion, discussing different ionization mechanisms 22 p3227 A72-42543
- The peculiar O6f star HD 148937 and the symmetrically surrounding nebulae. 22 p3227 A72-42557
- Internal dust effects on nebulae structure and spectrum, solving radiation transfer equation for spherical models with nonisotropic scattering 22 p3227 A72-42558
- Spectrophotometric study of the cometary nebula NGC 2261 22 p3229 A72-42961
- Estimate for the frequency of novae in the Andromeda Nebula and our Galaxy. 23 p3333 A72-43229
- Investigation of several nebulae in Cassiopeia with a Fabry-Perot interferometer. 23 p3333 A72-43233
- Solar system thin disk model planet formation in equatorial plane from nebula dust component, discussing gravitational effects and mass increase rate 23 p3335 A72-43261
- Russian book - Problems of the physics of nebulas and unsteady stars. 23 p3338 A72-44026
- Polarization of emission in the IC 4592 and IC 4601 nebulae 23 p3338 A72-44032
- Orion nebula continuum spectrum energy distribution from spectrophotometric measurements, comparing color temperature with previously obtained data 24 p3438 A72-44839
- NECK [ANATOMY]**
- Neck proprioception effects and otolith organ activity in perceived visual target elevation under centrifuging stress 12 p1776 A72-28305
- NEGATIVE CONDUCTANCE**
- Theorems derived for bulk semiconductor device static negative differential resistance exhibition 01 p0114 A72-10790
- Dynamic negative differential conductivity in bulk semiconductors, analyzing relation to impulse responses 04 p0562 A72-15129
- Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior 07 p1048 A72-19637
- Transverse negative differential conductivity in semiconductors, discussing effect of locations and shapes of energy surfaces in k-space and favorable crystal orientations 11 p1701 A72-25856
- Energy absorption inelastic surface mechanisms effect on I-V characteristics profile for bounded semiconductors with negative differential conductivity 13 p2023 A72-29991
- Free carrier mobility dependence on excitation light intensity in CdSe single crystals with negative photoconductivity 14 p2141 A72-30169

- Room temperature negative photoconductivity of p-type ZnTe-CdTe solid solutions mixed crystals within model with electron and hole capture levels
14 p2141 A72-30173
- Gunn effect - Bulk instabilities.
17 p2594 A72-34562
- New measurement method of Gunn-diode impedance.
17 p2529 A72-35000
- The behaviour of a Gunn oscillator in the domain-delayed mode.
18 p2667 A72-36945
- The negative space-charge density distribution and the potential distribution in a Penning discharge cell
23 p3324 A72-44211
- Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior
24 p3427 A72-44569
- NEGATIVE FEEDBACK**
NT SENSORY FEEDBACK
Balanced negative feedback circuits for reducing nonlinear distortions in distributed gain power amplifiers
02 p0193 A72-12223
- Elimination of spherical cavity resonators natural frequencies degeneration through symmetry disrupting disturbance, using group theory for fields and frequencies calculations
08 p1209 A72-21737
- Microwave amplifier with internal negative feedback, using IF output for frequency modulation of mixer oscillator signal
13 p1930 A72-29057
- Forced oscillations in RC amplifier with negative feedback through nonlinear bandpass filter with varicaps
13 p1931 A72-29266
- Linear negative feedback dc current magnetic transducers for telemetry input signals, discussing operation principles and design
16 p2370 A72-33862
- SNR improvement by negative feedback and deterioration by positive feedback in amplifiers, discussing input circuit thermal noise
21 p3034 A72-41123
- Reciprocal synchronization of generators connected by a long line section
23 p3272 A72-44210
- NEGATIVE RESISTANCE CIRCUITS**
Thermal effects on reversible threshold switching in amorphous semiconductor thin films involving current controlled negative resistance
02 p0268 A72-12202
- Receptor membrane pulse generation electronic model with tunnel diode negative resistance circuit
12 p1771 A72-27578
- Microwave power generation via semiconductor devices, discussing circuit problems due to negative resistance
14 p2088 A72-30832
- End line matching for high gain traveling wave amplifier constructed from heterogeneous transmission line sections with negative resistance
18 p2665 A72-36110
- Stabilization of relaxation oscillators with components having an S-shaped current-voltage characteristic
20 p2906 A72-38891
- Voltage controlled miniaturized n-type negative resistance circuit based on junction transistor and FET without internal bias
21 p3038 A72-40998
- Multiloop LC oscillators with negative resistance and nonlinear capacitances
23 p3271 A72-43838
- Negative resistance, transit time and limited space charge accumulation modes of semiconductor devices operation with electron transitions
23 p3272 A72-44138
- NEGATIVE RESISTANCE DEVICES**
Punch-through transit time negative resistance semiconductor device utilizing injection from Schottky barrier, deriving small signal theory for microwave impedance
01 p0042 A72-10787
- Waveguide structures partially filled with bulk negative differential conductivity media, describing wave propagation characteristics and power distributions
04 p0501 A72-15427
- Three layer bipolar transistor structure with negative resistance region in I-V characteristics
04 p0503 A72-15668
- High power negative resistance amplifiers, calculating relationship among output, gain, gain compression and efficiency for comparison with GaAs avalanche diode amplifier experiment
07 p0958 A72-19920
- Solid state microwave power amplifier with unidirectional transmission line loaded by negative resistance diode series, calculating large signal characteristics
08 p1142 A72-21558
- Bulk negative resistance devices equivalent noise temperature derivation via diffusion-impedance field noise formula, obtaining Gunn oscillators SNR approximate value
10 p1454 A72-25106
- High conversion efficiency microwave second harmonic generator using negative resistance nonlinearity of n-type GaAs
11 p1591 A72-25741
- Small signal theory of emitter current limited injection in negative mobility semiconductors at zero doping limit
12 p1788 A72-27165
- Laser light induced high-low impedance switch in Cd doped n-type Si diodes with p-p-n junctions and negative resistance
13 p1928 A72-28676
- CW Gunn oscillator cavity loading and bias voltage effects on external negative differential conductance
13 p1933 A72-29825
- Negative photoconductivity in CdSe single crystals due to free carrier mobility decrease after surface treatment in gas discharge, noting neutron traps role
13 p2024 A72-30046
- S-type negative resistance segment formation on rectilinear branch of I-V characteristics of p-n-n structure
14 p2089 A72-30969
- GaAs Gunn diode LSA operation mode in multiloop circuit to extend high frequency limit
15 p2207 A72-31888
- Gunn diode elements design, operation, performance, efficiency, heat dissipation, lifetime and applications as microwave oscillators
15 p2208 A72-32500
- Negative resistance devices, stability under open and short circuits from dc I-V characteristic shape
16 p2368 A72-32857
- Harmonic oscillators with negative resistance elements, discussing simplified mathematical calculation for I-V characteristics nonlinearity and applications to various diodes and transistors
16 p2368 A72-32858
- Arc discharge transition from diffusion to arc mode, presenting theory on I-V characteristics negative resistance section and on hysteresis causes
18 p2714 A72-36207
- Stability of injection-locked oscillators.
18 p2665 A72-36265
- Improved geometry for a semiconductor surface-wave oscillator.
18 p2667 A72-36685
- Dynamic behavior of nonlinear power amplifiers in stable and injection-locked modes.
19 p2773 A72-38293
- Effect of the filling of the capture levels with increasing current on the formation of negative resistance under double injection conditions
19 p2846 A72-38574
- Four-terminal Si controlled switches, discussing negative resistance and linear amplification I-V characteristics and applications in oscillators and modulators
20 p2907 A72-39274
- Harmonic oscillation characteristics of avalanche Si diode with nonlinear and negative resistance characteristics
20 p2908 A72-39705
- Differential negative resistance / DNR / in n-channel MOSFETS of silicon.
20 p2961 A72-39711
- Electronic superregeneration in semiconductor photosensitive structures with negative resistance
23 p3268 A72-43345
- Theory of microwave amplification with electron transfer
23 p3269 A72-43550
- Stability criteria for phase-locked oscillators.
23 p3272 A72-44192
- Noise properties of the injection-limited Gunn diode.
24 p3385 A72-44962
- NEMBUTAL (TRADEMARK)**
Nembutal barbiturate effects on afferent signals transmission and thalamocortical level of somatosensory system
08 p1116 A72-21195
- NEODYMIUM**
Mode locked oscillation in ring cavity Nd glass laser, showing satellite pulse and spectral broadening due to self phase modulation
02 p0238 A72-12203
- Picosecond pulse production and measurement from mode locked Nd glass laser
02 p0238 A72-12492
- Neodymium laser plasma dispersion and diffusion in magnetic field, using electrostatic injection of LiH particles
03 p0393 A72-13081
- Pinched vortex tube high current arc discharges for continuous pumping of ion crystal YAG-Nd lasers
06 p0825 A72-17839
- Single pulse Nd laser with KDP cascade multipliers and tunable frequency converter using organic dye solution
06 p0825 A72-17841
- Temporal characteristics of emission line broadening in lasers with dispersive resonators for Nd ion activated phosphate glasses and disordered crystals
06 p0826 A72-18011
- Stimulated emission cross section, loss coefficient and terminal level lifetime of high power Nd-phosphorus oxychloride liquid lasers
07 p1004 A72-19226
- Energy transfer rates and spectral line inhomogeneity of narrow band oscillation phosphate glass and inorganic liquid lasers with Nd
07 p1004 A72-19227
- Continuous TEM power from single longitudinal mode Nd-YAG laser pumped with tungsten-iodine lamp
07 p1004 A72-19235
- Neodymium-glass laser emission spectral and temporal correlations during Q switching by rotating prisms and passive shutter
07 p1006 A72-19633
- Spectroluminescent and lasing properties of Nd ions in anisotropic scheelite crystal structures
07 p1007 A72-20121
- Nd smooth pulsed laser action with narrow spectral line and emission amplification from Nd doped phosphate and silicate glass rods
08 p1183 A72-22027
- Nd glass absorption of flash pump emission energies with varying discharge parameters, Xe pressure and glass thickness
08 p1184 A72-22030
- Giant pulse amplification with neodymium-phosphorus oxychloride liquid laser amplifier
09 p1323 A72-22655
- High power Nd-glass laser systems, discussing oscillator and amplifier operating parameters optimization
10 p1489 A72-23945
- Spectroscopic and stimulated emissive properties of neodymium ions in potassium yttrium tungstate crystals at 77 and 300 K
11 p1701 A72-26362
- Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution
11 p1651 A72-26363
- Angular spectra and frequency characteristics of quasi-continuous monomode and two mode Nd-YAG lasers with spherical resonator
12 p1819 A72-27054
- High power Nd glass laser with stepwise pulse amplification for intensive heating of solid target plasmas
12 p1849 A72-27061
- Frequency tuning and intracavity high efficiency extraction of second harmonic radiation from prism type Nd laser
12 p1825 A72-27885
- Nd-YAG laser bibliography covering oscillation, dynamics, engineering, materials and harmonic generation
12 p1826 A72-27957
- High power monopulse Nd laser, obtaining single longitudinal frequency stabilized mode with anisotropic spar or quartz plates
13 p1971 A72-29922
- Phononless lines shift and broadening and electron phonon interaction in lanthanum trifluoride-Nd crystal, obtaining temperature dependence of non-radiative transition probability
14 p2142 A72-30359
- High energy storage laser material Nd-doped silicate oxyapatite refractivity temperature dependence characteristics measurement
15 p2249 A72-32167
- Spiking response of luminescent diode pumped CW Nd-YAG laser to sinusoidal modulation, showing agreement with relaxation oscillation resonance prediction
15 p2250 A72-32526
- Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution
16 p2403 A72-33715
- Frequency tuning and intracavity high efficiency extraction of second harmonic radiation from prism type Nd laser
16 p2404 A72-33994
- Breakdown of some transparent dielectrics under the action of neodymium and ruby lasers in free light emission modes
19 p2810 A72-37542
- Quantum yield variations of Nd ion activated glass as function of electron beam energy and intensity, noting nuclear particles effect on laser radiation
19 p2823 A72-38205
- Properties of stimulated neodymium laser emission under the action of Co 60 gamma emission
19 p2812 A72-38214
- Amplification of mode-locked trains with a liquid laser amplifier, Nd³⁺/POCl₃:ZrCl₄.
20 p2934 A72-39642

- A stable neodymium-glass laser harmonic generator
21 p3064 A72-41739
- Unidirectional single frequency traveling wave CW
pumped Nd-YAG ring laser, noting spatial hole burning
elimination
22 p3185 A72-42614
- Neodymium-glass laser emission spectral and temporal
correlations during Q switching by rotating
prisms and passive shutter
24 p3408 A72-44565
- Angular spectra and frequency characteristics of
quasi-continuous monomode and two mode Nd-YAG
lasers with spherical resonator
24 p3412 A72-45707
- High power Nd glass laser with stepwise pulse
amplification for intensive heating of solid target plasmas
24 p3431 A72-45714

NEODYMIUM ALLOYS

- Ti-Nd and Ti-Nd-Al alloys heat treatment effects on
tensile and bending strengths
02 p0244 A72-12245
- Nd-Dy alloy magnetic and structural properties over
entire composition range
08 p1217 A72-21596
- Thermal and microstructural analysis of phase
interactions in Mg alloys of Mg-Nd-Y system
14 p2124 A72-31028
- Phase diagram of the neodymium-erbium system
19 p2846 A72-38473

NEODYMIUM COMPOUNDS

- Spectral heterogeneous lasing media with asymmetric
luminescence bands, considering neodymium
phosphate and germanate glass
06 p0824 A72-17392
- Giant pulse radiation in Q factor modulated Nd glass
laser frequency stabilization by molecular Cs vapor
15 p2245 A72-31411
- Laser effect in solution of neodymium oxide in mixture
of phosphorus oxychloride and heavy water,
presenting preparation procedure
15 p2246 A72-31680

NEON

NT NEON ISOTOPES

- Isotopic composition of trapped helium, neon and
argon in carbonaceous chondrites, observing covariance
based on mass-dependent fractionation
03 p0414 A72-12904
- Pulsed current changes in positive column of He and
Ne discharges, observing gradient and electron
concentration transient behavior
03 p0399 A72-14348
- Neon lower laser level spontaneous emission double
resonance phenomena, discussing depopulation rates
and resonance line profile changes
04 p0531 A72-15138
- Galactic nucleus IR measurements in terms of forbidden
NE II emission line at 12.8 microns
07 p1081 A72-20229
- Subnanosecond light pulse generation by Ne laser at
5401 Å by amplified spontaneous emission
09 p1323 A72-22869
- Nonlinear effects in optical pumping of Ne transition
by laser line
10 p1491 A72-24109
- Absolute differential cross sections of electrons
elastically scattered on neon atom.
18 p2713 A72-36952
- The use of known helium line cross sections for investigation
of unknown transition in neon.
18 p2713 A72-36954
- Ion-atom scattering and interatomic potentials for
ions of noble metals and period II elements incident on
neon and argon with energies in the range 8-25 keV.
19 p2837 A72-37883
- Pressure shift of the magnetic resonance line of
neon in a He-Ne laser.
19 p2811 A72-37930
- Interpretation of experimental differential elastic
scattering cross section for H⁺/+ Ne.
20 p2956 A72-39721
- Transition probabilities and collision-induced transitions
in excited levels of neon.
21 p3061 A72-40136
- The mass spectrographic measurement of gas
separation with the aid of ambipolar effusion in neon-
krypton mixtures
21 p3053 A72-40486
- Nonlinear interaction of p and s ionization waves in
neon.
21 p3090 A72-40487
- Apparent constant wavelength oscillations in a
bounded plasma.
23 p3320 A72-43577
- New lines of neon ions in the range 50-200 Å.
23 p3315 A72-43802
- Frequency stabilization of pure neon laser.
23 p3296 A72-43951
- Nonlinear effects in the dynamic behavior of the
positive column from a low-voltage low-pressure
discharge
24 p3428 A72-44965

NEON ISOTOPES

- L-chondrite Assam, determining He, Ne and Ar
concentrations and isotopic compositions and galactic
and solar flare irradiation track densities
01 p0124 A72-10060

Optical hyperfine structure of Ne 21 excited states
and quadrupole moment obtained by laser induced line
narrowing techniques
10 p1515 A72-24601

Ar-39/Ar-38 cosmic ray exposure age calculation
from Sikhote-Alin meteorite fall fragment content of
Ar-39, Ar-38, Ne-21 and He-3
14 p2157 A72-30584

Pure Ne laser and its fundamental characteristics.
23 p3296 A72-43946

NEON 19

U NEON ISOTOPES

NEOPENTANE

- Organophosphorus antiwear additives in neopentyl
polyol ester lubricants on 440C stainless steel surfaces,
using four ball wear test machine
[AD-740055] 02 p0250 A72-12849
- Chromatographic analysis of reaction products of
HCl-accelerated neopentane pyrolysis, showing tert-
butyl chloride formation
10 p1434 A72-24235

NEOPLASMS

NT CANCER

NT LEUKEMIAS

NEPHELOMETERS

- Atmospheric aerosol chemical composition analysis
by nephelometer light scattering measurement of
suspended particle mass concentration, visibility and
size distribution and scattering-humidity relationship
[ALAA PAPER 71-1101] 01 p0058 A72-10549
- NEPTUNE (PLANET)
Methane contribution to thermal opacity in Uranus
and Neptune atmospheres for atmospheric model
synthesis
09 p1383 A72-22293

Jupiter, Saturn, Uranus, Neptune and Pluto state of
knowledge, noting angular momentum fraction, red
spot, albedos, densities, atmospheric compositions,
natural satellites, etc
12 p1870 A72-27345

Uranus, Neptune and Pluto disk temperature observations
via National Radio Astronomy Observatory
interferometer
16 p2455 A72-33464

Secular variations of the first order of elements for
the four major planets - Comparison with Le Verrier
and Gaillot
18 p2727 A72-36734

The masses, densities and moments of inertia of
Uranus and Neptune.
20 p2967 A72-39184

Invalidity of Neptune predicted position derivation
from perturbations on Uranus via method neglecting
eccentricity
21 p3111 A72-41474

NERNST GENERATORS

U THERMOMAGNETIC COOLING

NERNST HEAT THEOREM

U NERNST-ETTINGSHAUSEN EFFECT

NERNST-ETTINGSHAUSEN EFFECT

- Ni-Co alloys Nernst-Ettingshausen and Hall effects
anomalous constants relationship determination from
emf and electrical conductivity measurements
13 p1977 A72-28910
- Adiabatic conditions influence on charge carriers
dispersion determination of semiconductors based on
Nernst-Ettingshausen effect
15 p2291 A72-31390

Temperature dependence of the thermal electromotive
force and of the Nernst-Ettingshausen effect in
nickel-cobalt alloys
22 p3187 A72-41855

NERVA (ENGINE)

U NUCLEAR ENGINE FOR ROCKET VEHICLES

NERVES

HIS bundle electrocardiography for arrhythmia studies,
discussing conducting tissue potential recording,
ventricular delay and block site determination and
electrophysiological effects of drugs
02 p0157 A72-11473

Vestibular nuclei bulbar complex evoked potentials
under visceral and somatic nerves electric stimulation
in anesthetized cats
02 p0164 A72-12512

Exercise and denervation effects on intrafusal
muscle fibers morphology, noting 25-33 percent cross-
sectional area atrophy in nuclear bag and chain fibers
04 p0472 A72-14895

Adrenergic innervation of internal carotid arteries in
extra- and intracranial regions in dogs, using
luminescence method
08 p1121 A72-22184

German monograph on Ranvier node steady state I-
V characteristics transition range and control by altered
external solutions and morphological effects on
nerve fiber
09 p1264 A72-22336

Photically induced and spontaneously discharged
neuron impulse propagation through direct pathways
from superior colliculus to dorsal and ventral lateral
geniculate nuclei in cats
09 p1265 A72-22863

Cerebrospinal fluid pH change effects on cat
respiratory response before and after vagotomy,
showing vagal activity relation to central chemical
control of respiration
12 p1762 A72-27825

Vagus nerve regeneration in humans after stomach
cancer surgery
13 p1903 A72-28779

Statistical activity analysis procedure for random
nerve network model, determining representative
point trajectory in phase space via similarity matrix
13 p1909 A72-29176

Myelinated nerve fiber mathematical model for action
potential transmission mechanism analysis during
relative refractory phases
14 p2079 A72-30597

Cat cerebellum cortex evoked response impulses in
teraction during stimulation of hypothalamus and
peripheral nerves
14 p2076 A72-30669

Cerebral cortex electric shock stimulation effects on
phrenic nerve discharges in bivagotomized and curarized
cats
14 p2077 A72-30842

Acquired complete right bundle branch block
without overt cardiac disease - Clinical and
hemodynamic study of 37 patients.
17 p2505 A72-35821

Effects of vagotomy and increased blood pressure
on the incidence of decompression-induced pulmonary
hemorrhage.
18 p2650 A72-36446

Electrical stimulation of vestibular nuclei - Effects
on light-evoked activity of lateral geniculate nucleus
neurons.
19 p2758 A72-38220

Study of bilateral cortical nerve connections
between the preorel gyrus and various cortical regions
20 p2891 A72-39323

Propriospinal ducts of the lateral funiculus and their
possible role in transmission of pyramidal stimuli
21 p2999 A72-40583

Localization and structural-functional organization
of the system of vagus nerve nuclei constituting the
'cardiac center' of the medulla oblongata
21 p3004 A72-41673

Computation of the shape and velocity of a nerve
pulse
22 p3149 A72-42156

Continuous recording of His bundle electrogram
during selective coronary cineangiography in man.
23 p3255 A72-43813

H-V intervals in left bundle-branch block - Clinical
and electrocardiographic correlations.
24 p3374 A72-45690

Clinical and anatomic implications of intraventricular
conduction blocks in acute myocardial infarction.
24 p3374 A72-45691

Soviet book on physiology of conditioned reflexes
covering brain and nervous system, tonic reflexes,
functional models, inhibition localization, etc
01 p0011 A72-10295

Human nervous system properties responsible for
individual behavioral differences, discussing
methodological problems in future research from
biological criteria viewpoint
08 p1118 A72-21839

Conditioned reflex activity, discussing biological
and nervous system, electric analog simulation and
mathematical and structural modeling
08 p1127 A72-21842

Effects of long periods of clinical death from
drowning or lethal blood loss on higher nervous activity
in reanimated dogs
13 p1902 A72-28642

Statistical activity analysis procedure for random
nerve network model, determining representative
point trajectory in phase space via similarity matrix
13 p1909 A72-29176

Effect of a magnetic field on experimental tumors
/direct and via nervous system/
17 p2503 A72-35011

- New experimental data on the morpho-physiological analysis of the adaptation phenomenon in the somatic reflex arch 17 p2504 A72-35023
- Vasomotor reflex locking level 17 p2504 A72-35025
- Biological systems activity in controlling extremal problems of nervous and muscular systems, noting external stimulation minimization 19 p2761 A72-38577
- Changes in the functional state of analysors in flying personnel during long flights 21 p3006 A72-40445
- Critique of Pavlov conditioned reflex role in higher nervous activity and association principle role in psychic activity 21 p3001 A72-40811
- A model for analysing the coordination of manual movements. 21 p3010 A72-41413
- Some data on the interrelations of conscious and unconscious reactions 23 p3257 A72-44076
- Influence of the nervous system and its mediators on the spontaneous contractile activity of a smooth muscle 24 p3370 A72-44590
- ## NETS
- ### NT NEURAL NETS
- ## NETWORK ANALYSIS
- ### NT CRITICAL PATH METHOD
- Large-signal IC equivalent circuit model for DC, linear and nonlinear transient time circuit analysis of lateral p-n-p transistors, including isolation junction interactions 01 p0044 A72-10126
- Microwave oriented circuit analysis program (MODMAN) to handle nonlinear, time-varying, lumped and distributed elements in time domain, using transmission line modeling algorithm 01 p0045 A72-10687
- Irredundant multiple output combinational logic network fault detection and diagnosis theorems derivation from structural models in labeled direct graph form 02 p0184 A72-11478
- Circuit theory optimization techniques in computer aided electric circuits and devices design, discussing algorithms, sequential methods, convergence speed, topologies, system responses, etc 02 p0197 A72-11688
- Computer aided circuit design and analysis, emphasizing algebra of structural numbers as synthesis technique without system structure restriction 02 p0186 A72-11693
- Network sensitivity analysis emphasizing first, higher and mixed higher derivatives computation and iterative synthesis techniques 02 p0197 A72-12114
- Affined RC or RL networks, investigating real and equal or imaginary, conjugate and inverse voltage and current transmittances 02 p0197 A72-12240
- Dc, ac and transient models of IC operational amplifier for computer aided circuit design and analysis applications 03 p0329 A72-14180
- Microcircuit failures due to electrical overstress, covering current density, thermally induced burn-out, junction shorts and second breakdown with nonuniform heat flow 03 p0336 A72-14290
- Computer analysis of linear electric circuits without restrictions on network topology and component composition, using system matrix 04 p0495 A72-14464
- Circular network analysis by conformal mapping method, evaluating physical and geometric magnitudes in turbine driven machinery 04 p0461 A72-14514
- Implicit equations in nonlinear network analysis, deriving conditions for existence of unique solutions 04 p0540 A72-15695
- Computer aided linear circuit design for network synthesis, analysis, optimization and data storage noting MARTHA program 05 p0639 A72-15785
- One dimensional bipolar junction transistor, comparing charge control and regional mathematical models for suitability in device and circuit computerized analysis and design 05 p0636 A72-16359
- Photomultiplier operation pulsed control in semiconductor circuit for background cosmic radiation noise error minimization in atmospheric shower station 06 p0811 A72-17294
- Digital system automated design and analysis developments covering interactive graphic computer aided design, gate level simulation, synthesis, partitioning, interconnection and fault test generation 06 p0778 A72-17471
- CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities 06 p0778 A72-17474
- Coordinated characterization and mathematical modeling for device, circuit and system designs and computer analysis, applying to bipolar transistor 06 p0778 A72-17477
- One dimensional analysis computer program for junction device modeling, exemplifying hf bipolar transistor Fermi statistics effect and velocity limitation in high current density 06 p0779 A72-17478
- Computer aided steady state response analysis for nonlinear electric circuits with periodic input, using Newton algorithm with rapid convergence 06 p0779 A72-17480
- Linear network sensitivity and group delay evaluation without topology or component restraints, using computer technique 06 p0793 A72-17594
- Two dimensional network class port behavior equivalence to three layer structures of linear passive isotropic materials based on depth and surface properties analysis 06 p0793 A72-17595
- GERT simulation program as stochastic network analysis technique for modeling policies and processes in performance tests and checkout 06 p0780 A72-17977
- Algorithm for constructing linear and nonlinear differential and algebraic equations of state variables of nonlinear electronic circuits 07 p0958 A72-18846
- Direct coupled waveguide cavity resonator equalizer networks, determining reflection coefficient, phase, amplitude and time delay characteristics by scattering matrix theory 07 p0955 A72-19327
- Digital simulation for predicting performance of data communication networks with computerized switching centers, detailing space shuttle interior communication system 07 p0952 A72-20364
- Input binary sequence transformation in chain of series connected on-off neuron models, applying to n-stage linear filter analysis 08 p1138 A72-20870
- German monograph on multielement linear mechanical oscillator analysis covering behavior of harmonically excited bar chains of arbitrary structure 09 p1350 A72-22337
- Linear IC amplifier analysis by admittance parameters of equivalent two terminal pair network as function of frequency, temperature and supply voltage 09 p1285 A72-22342
- Linear analysis and synthesis of three dimensional interference system stationary in space and time domains 09 p1278 A72-22573
- Stability degree analysis of linear feedback control systems with dead time, presenting proportional and integral compensation diagrams produced with digital computer program 09 p1291 A72-23370
- Electronic circuits statistical optimization with Monte Carlo procedure, discussing methods and algorithms for accelerating evolutionary modeling 10 p1452 A72-24638
- Book on logarithmic video amplifiers covering design, analysis, performance and applications 10 p1452 A72-24698
- Digital computer calculation of complex electric networks described by mathematical models, calculating flow distribution 11 p1577 A72-25282
- Nonlinear resistive network analysis by piecewise linear mappings, studying Lipschitz condition and global homomorphism 11 p1608 A72-25360
- Computerized filter design, discussing frequency analysis and synthesis programs for quadrupole eigenmodes and transfer function 11 p1604 A72-26089
- Phase metering information converters with digital analog computation, discussing analysis of prototype semiconductor model with ten-digit binary codes 11 p1602 A72-26449
- Linear multiple section binary filters analysis and synthesis, discussing mesh functions spectra for signal measurement in automatic control systems 11 p1612 A72-26452
- Transistorized measuring amplifiers optimal initial regimes calculation with generalized junction voltage method, noting circuits analysis and internal feedback loops 11 p1605 A72-26467
- IC lateral p-n-p multijunction transistor frequency characteristics analysis, noting parasitic effects, cutoff frequencies and power gain 12 p1788 A72-27311
- Linear approximations and grapho-analytical method for neuronist line analysis, noting conditions for tunnel diode parameters 12 p1789 A72-27397
- Iterative solution for linear and nonlinear dc networks with independent voltage sources, noting convergence conditions 12 p1794 A72-27398
- Encapsulation influence on Gunn effect devices from circuit analysis of wideband tunable transferred electron microwave oscillators 12 p1790 A72-27440
- Antoniou bridge type gyrator circuit stability, showing sensitivity to resistors ratio variations 12 p1792 A72-27698
- TV network distribution systems cost, comparing video tape shipping, terrestrial interconnection with delay for time zones and indirect and direct satellite transmission [ALAA PAPER 72-552] 13 p1918 A72-28983
- Circuit of two parallel connected vacuum pentodes with different reactances to provide exact voltage division of ac signals by another 13 p1930 A72-29045
- Transfer matrices determination for two terminal pair network derived from four terminal pair network, considering bandpass filters 13 p1931 A72-29060
- Circuit theory - Conference, University of Missouri, Rolla, May 1972 13 p1935 A72-29101
- Nonlinear harmonic analysis of reflex klystrons with high electron conductance, using average method in second approximation 13 p1931 A72-29290
- Interaction between generating lines in coupled channels with arbitrary line broadening, studying radiation generation regimes in cascade circuit 13 p1970 A72-29680
- Electromagnetic processes computation in circuits with SHF currents by reduction to integral equation, using dipoles system representation 13 p1937 A72-29945
- Nonsingular feedback control system phase-amplitude frequency response graphical analysis using real circle diagram 13 p1937 A72-29974
- Variable saturation of series LC circuit, discussing current response, ferromagnetic jump, symmetry and subharmonic oscillations 14 p2090 A72-31116
- Regenerative semiconductor parametric amplifier under dc through p-n junction, analyzing nonlinear phenomena 14 p2090 A72-31124
- Lumped approximation to distributed RC notch networks for linear IC, deriving open circuit voltage transfer functions and root locus graphs 14 p2092 A72-31170
- Multiple port waveguide circulators bandwidth performance calculation to include higher order cylindrical and evanescent modes 15 p2205 A72-31356
- Low storage numerical solution of waveguide problem based on impulse analysis, using random walk technique to eliminate large matrix processing 15 p2194 A72-31542
- Reflector networks analysis for optimal operation of electronic scanning antenna in illuminated grating 15 p2195 A72-31670
- Computer program for symbolic network functions, using numerical algorithms for branches not represented by symbolic parameters 15 p2211 A72-31845
- Nonideal component parts effect on behavior of digital microstrip closed circuit X band phase shifter, presenting detailed network analysis 15 p2201 A72-32471
- Mathematical models for electromagnetic interference in electronic equipment, discussing nonlinear circuit analysis 15 p2201 A72-32568
- Three section stepped structure to satisfy requirements for multifunction matching four-pole in signal network with active semiconductor component 15 p2210 A72-32708
- Passive and active electric circuit analysis by structural numbers method with computer time and space advantages, noting application to transistor circuits 16 p2370 A72-32851
- Laguerre filters parameters choice for correlator input networks application, noting output SNR improvement 16 p2368 A72-33089
- Stress and parametric change analysis for failure mode identification and reliability screen tests of LSI circuits, noting MOS inverter operation and RAM mechanization 17 p2528 A72-34706
- Parametric resonance in an oscillatory circuit with a nonlinear p-n junction capacitance 17 p2533 A72-34757
- Calculation of steady modes of operation of RC circuits with jumpwise varying parameters 17 p2533 A72-34761
- The identification of parameters in nonlinear thermal networks with the aid of a Kalman filter 17 p2533 A72-34827

A recognition method for technical diagnosis of analog electronic circuits

17 p2522 A72-34913

DC analysis of linearized electronic circuits with the aid of electronic computers

17 p2524 A72-35977

Fundamental, harmonic and combination frequency components amplitude analysis via dual input describing function for nonlinear element response under two incommensurate frequency sinusoidal signals

18 p2671 A72-36051

Development of a continuous linear model of a d-c to d-c flyback converter.

18 p2643 A72-36073

Digital simulation of stiff linear dynamic systems.

18 p2663 A72-36315

Minimax method of optimizing electric circuits in the absence of constraints on the variable parameters

19 p2777 A72-37309

Programming method for computer analysis of linear passive circuits powered by voltage sources

19 p2777 A72-37311

Determination of linear circuit sensitivity to circuit parameter changes in the equations of state variables

19 p2777 A72-37312

Matrix coefficients calculation of state variables equations for network analysis and synthesis

19 p2777 A72-37313

Feedback influence coefficient on amplifier gain, using recurrent difference concept

19 p2777 A72-37314

Admissible changes in the parameters of a matching four-terminal network

19 p2772 A72-37315

Equivalent circuits and oriented graphs for network analysis and synthesis of nonlinear transducers used in control systems

19 p2777 A72-37316

French monograph - Contribution to the study of the behavior of bipolar transistors during high frequency dynamic operation

19 p2772 A72-37485

Frequency-selective networks suitable for microelectronic realization. II.

19 p2773 A72-37874

Frequency detection with digital resonators without damping

19 p2773 A72-37939

Amplitude and harmonic oscillation characteristics of quaternary RC parametron using tunnel diodes

19 p2773 A72-38211

Adaptive control systems fundamental functions, principles, characteristics and applicability

19 p2782 A72-38312

Digital computer algorithm for electronic circuit calculations

19 p2774 A72-38422

A six-phase bridge rectifier circuit with a reduced number of controlled rectifiers and a rigid external characteristic during high-level regulation

19 p2774 A72-38585

Eigenfrequencies of monolithic filters.

19 p2774 A72-38608

A large-signal theory for current-driven frequency multipliers.

19 p2775 A72-38609

Mathematical model for MOS transistor circuit analysis, noting parameters measurement and environmental effects representation

20 p2909 A72-39783

Integral equations of a multipoint network with a digital control automaton

21 p3036 A72-40154

Possibility of developing combination method for calculating, with a controlled quantization step, the response of a nonlinear network

21 p3074 A72-40184

Digital filters with cyclically variable coefficients

21 p3025 A72-40221

Communication network vertex and mixed cutset definitions and computation from interchange graph of given finite connected undirected graph without loops and multiple edges

21 p3015 A72-40634

Digital command system second-order subcarrier tracking loop performance.

21 p3038 A72-40870

Communication receivers interference modeling - Nonlinear transfer functions from circuit analysis - Mild excitations.

21 p3019 A72-40890

Digraphs application to electronic linear networks analysis, developing computer program

21 p3024 A72-40992

Network algebra simplification through computerized minimization of Boolean functions, describing FORTRAN IV program

21 p3038 A72-41001

Shaping circuit for complex RF pulse consisting of simultaneous equilength square pulses with different frequencies, discussing carrier frequencies selection

21 p3022 A72-41118

The mathematical synthesis and analysis of fluid logic networks.

22 p3161 A72-42049

Complex amplitude four-pole network nonlinear conversion of sum of sinusoidal oscillations

22 p3158 A72-42083

Network analysis and frequency response of LF filter with distributed RC structure and voltage converter

22 p3158 A72-42120

Generalized numbers method for analysis and synthesis of linear circuits described by signal flow graph, noting algorithms for computer programming

23 p3269 A72-43443

Numerical integration of nonlinear differential equations in nonlinear circuits analysis, obtaining information on unsteady processes from calculation with controlled level time quantization step

23 p3269 A72-43444

Error analysis of linear and nonlinear elements in hydraulic control circuits of flight vehicles, calculating accuracy of frequency response determination

23 p3252 A72-43671

An estimate of expected critical-path length in PERT networks.

23 p3308 A72-43806

Linear electronic networks analysis and synthesis via equations of variable states, noting structural features of circuits without component related degeneration

23 p3271 A72-43844

Asilomar Conference on Circuits and Systems, 5th, Pacific Grove, Calif., November 8-10, 1971, Record.

23 p3276 A72-43851

An algorithm to obtain the steady state response of nonlinear periodic systems.

23 p3267 A72-43852

NETWORK SYNTHESIS

Tunnel diode microwave oscillator design by circle diagrams of operational and load characteristics

01 p0035 A72-10048

Time optimal phase locked AFC system synthesis based on Po ntryagin maximum principle, comparing computerized and experimental transient response

01 p0024 A72-10049

Optimal design of logic networks in homogeneous microelectronic structures, using shortest link search and graph continuity parameters

01 p0034 A72-10300

Network synthesis of cascaded threshold logic elements to separate binary patterns into two classes by iterative computation of parameters

01 p0034 A72-10474

Distributed impedance controller synthesis for stabilization of plane fluid flows, investigating Rayleigh-Taylor instability

01 p0050 A72-10504

High stability and power IMPATT oscillator design for line-of-sight communication links, avoiding spurious resonances and mode jumping

01 p0037 A72-10645

Microwave module circuit design for airborne phased array radar with distributed power generation, reception and phase shift functions, considering performance, reliability and cost

01 p0028 A72-10660

Ferrite microwave devices design, covering nonreciprocal circuit and electrical tuner

01 p0041 A72-10696

Directional couplers design for broadband microwave integrated circuits

01 p0046 A72-10702

Efficiency/reliability design requirements of driven transistor synchronous rectifiers in low output voltage applications

01 p0042 A72-11053

Integrated electronics digital-analog solar cell array control unit, discussing circuit design and radiation hardening

01 p0042 A72-11059

Phase stable locked local oscillators for K band radiometers for long baseline interferometric measurements, emphasizing construction technique

01 p0044 A72-11307

Minimum length fault tests design for irredundant combinational logic circuits containing single faults based on Boolean difference function

02 p0185 A72-11485

Interference control in microwave circuit design, discussing coupling element, antenna terminals, radiated interference susceptibility and electromagnetic environments

02 p0189 A72-11558

High perveance electron guns with control grids and low voltage beam modulation, considering design, operation, structural and control characteristics

02 p0189 A72-11562

Computer aided circuit design and analysis, emphasizing algebra of structural numbers as synthesis technique without system structure restriction

02 p0186 A72-11693

Circuit design techniques used for wideband signal processing systems, considering 1000 MB/S microwave communication link

02 p0176 A72-12163

Reactive two terminal pair network synthesis for shaping sawtooth current pulses in inductive load for given input function

02 p0193 A72-12222

High efficiency GaAs transferred electron device operation and microwave oscillator design by simple static I-V characteristics description for time domain computer simulation

02 p0193 A72-12230

Linear aperture antennas approximate synthesis method, determining radiation pattern characteristics by solution of extremal problems in theory of linear integral operators

02 p0195 A72-12592

Computer programs and program systems for IC synthesis, emphasizing models, analysis methods, optimized design and monolithic and hybrid IC configurations

02 p0197 A72-12668

Multiple access techniques in satellite telecommunication systems, discussing clean mesh type network

02 p0182 A72-12699

Optimal synthesis of pulse repetition frequency control and filtering circuits of radar range finder in Gaussian approximation

02 p0183 A72-12759

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution

02 p0196 A72-12761

Active all-pass circuits transfer function and synthesis, including delay lines, phase correctors and wide-band phase shifter applications

03 p0338 A72-13169

Self consistent junction circulator theory, considering lossless ferrite loaded symmetric n-port junction and numerical design procedures

03 p0330 A72-13232

Linear time optimal control system with retardations in controls, discussing controllability, existence and uniqueness, synthesis techniques and dynamic programming

03 p0338 A72-13406

Linear radio receiver circuit synthesis for output signal structure and rotational choice, using reduction algorithm

03 p0323 A72-13894

Limiting approximation theorems for synthesis of linear circuits and signals in time-frequency domains

03 p0338 A72-13896

Dc, ac and transient models of IC operational amplifier for computer aided circuit design and analysis applications

03 p0329 A72-14180

Self oscillating dc-to-dc converters performance and design, considering switching frequency, duty cycles, line and load regulation and peak-to-peak ripple

04 p0465 A72-14487

RC network synthesis technique using grounded gyrator and summing amplifier, applying to thin film RC networks and IC operational amplifiers

04 p0504 A72-14570

Optical birefringent networks synthesis, describing use of building blocks of polarizers, birefringent crystals and optical compensators

04 p0548 A72-14737

Control system synthesis from transient process estimates with Liapunov functions, proposing optimality criteria based on Gaussian minimum constraint principle extension

04 p0505 A72-14997

Optimal nonlinear discrete filters with finite memory for polynomial signals, discussing synthesis with aid of minimax method

04 p0505 A72-14998

Linear dynamic system sensitivity models simplification conditions application to adaptive nonsearching system synthesis algorithms

04 p0505 A72-14999

Programmable cellular cascades and arrays synthesis for realizing arbitrary Boolean functions or parallel arithmetic operations

04 p0498 A72-15107

Synthesis of currents along linear antennas, reducing to solution of integral equation

04 p0500 A72-15406

Capacitor-fed parallel chopper as phase sensitive demodulator, discussing design, stability, linearity and wide dynamic frequency range

04 p0507 A72-15522

Computer aided linear circuit design for network synthesis, analysis, optimization and data storage noting MARTHA program

05 p0639 A72-15785

N-port resistive network synthesis involving use of vectors, cones, bilinear inequalities and matrices

05 p0639 A72-15801

Synthesis method for optimized single-stage reflection type phase shifters, determining transformation coefficient

05 p0634 A72-15831

Logical synthesis of hybrid off-on control systems with proportional and binary variables, presenting example of fluid power, electronic and fluidic implementation

[ASME PAPER 71-WA/FLCS-1]

05 p0640 A72-15919

Linear single and multiloop control system synthesis for sensitivity reduction by introducing signals proportional to sensitivity functions with analyzer
05 p0640 A72-16207

Model reference adaptive control system synthesis in presence of random perturbations, considering error signal derivative use to form parameter adjustment algorithm
05 p0640 A72-16208

Radio signal electron-phonon detector design and experimental realization, considering requirements for minimum transduction and surface wave propagation loss
05 p0626 A72-16281

Nonlinear spatial filter synthesis by one-to-one signal-to-reference beam ratio and optimum exposure condition
05 p0663 A72-16676

Optimally sensitive closed loop control synthesis for systems containing uncertain time varying parameters, applying to stochastic systems
06 p0792 A72-17309

CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities
06 p0778 A72-17474

Algebraic scheme describing electric element and subnetwork interconnection into networks by wiring operators having conversation capability with computer
06 p0778 A72-17475

Microwave frequency multiplier construction by hybrid circuits based on quasi-lumped components, calculating characteristics from equivalent circuit
06 p0785 A72-18313

Unified design charts for communication systems filter networks with inverse Chebyshev and elliptic function responses
06 p0787 A72-18400

High efficiency microwave avalanche diode oscillators circuit design in TRAPPATT mode
06 p0787 A72-18455

Optimal receiver synthesis for radio signals with differentiable components of continuous Markov processes masked by phase interference and white noise
07 p0937 A72-18847

Steepened microwave bandpass filters with bypass and flattened reflection coefficient and delay, discussing design and implementation
07 p0954 A72-19175

Suboptimal Kalman filter design for system state estimation in presence of plant dynamics uncertainties and measurements noise, optimizing tradeoff between sensitivity and estimation error
07 p0959 A72-19302

Microwave IC front end receiver synthesis for radio relay system, considering low noise figure achievement by Si Schottky barrier diodes
07 p0955 A72-19356

Optimal Bayesian system synthesis for simultaneous discrimination and parameter estimation of several signals in noise background
07 p0943 A72-19516

Algorithm for asynchronous multilevel sequential circuits design, stressing NOR networks
07 p0963 A72-20387

Quantization errors effect on recursive filter design for strapdown inertial navigation systems, developing suboptimal linear minimum variance
08 p1144 A72-20848

Numerically exact nonlinear filter synthesis, describing confidence intervals for error performance statistical inferences
08 p1144 A72-20850

Hybrid computer synthesis and simulation algorithm for optimal discrete nonlinear filters, giving timing, accuracy and equipment requirement estimates
08 p1137 A72-20851

Transcendent Si power rectifier with high current and power dissipation capacity, discussing design, fabrication and performance tests
08 p1111 A72-21413

Circuits for pulse rise time discrimination in proportional counters with different gas mixtures
08 p1167 A72-21511

Radio communication system optimization from viewpoints of global synthesis, including economics and partial synthesis based on noise stability, precision and reliability
08 p1136 A72-21845

Digital filter synthesis for radar signal processing applications, discussing frequency sampling method extension with advantage of known waveform and reduced computations
08 p1146 A72-21916

German monograph on optimal design of HF bandpass filters with lumped elements, covering LC coupled two- and four-circuit systems
09 p1284 A72-22328

Linear analysis and synthesis of three dimensional interference system stationary in space and time domains
09 p1278 A72-22573

Horn antenna synthesis for determining impedance boundary conditions at walls for aperture field distribution
09 p1285 A72-22574

Polynomial filter design with three layer RC distributed elements and operational amplifiers, investigating active elements effects on response
09 p1290 A72-23354

Digital computer prepared optimal controls setting diagrams for single loop, linear and concentrated parameter control circuit design
09 p1291 A72-23372

Phased array radar systems synthesis based on life cycle cost minimization, taking into account high-speed digital data processing
09 p1280 A72-23374

Stationary Kalman-Bucy filter synthesis from filter coefficients and correlation matrix of filtration errors, discussing random process estimation application
09 p1289 A72-23434

DESMAG computer program extension with graphic terminal to functional network conception and implantation
09 p1283 A72-23469

Numerical linear interpolator design with ICs, noting application to digital filters and sampled data systems
09 p1289 A72-23677

Flow control circuits design based on unvented bistable fluid amplifiers
10 p1422 A72-23970

Bulk effect diodes combination with YIG elements to provide oscillator operation up to 18 GHz, discussing design, circuit diagrams and performance
10 p1448 A72-24037

Integrated circuits fabrication and design, describing internal physical processes, input and output signal values, functional operations and topological features
10 p1448 A72-24283

Nonlinear filtering synthesis of optimal receiver for pseudorandom phase shift keyed signal with arbitrary modulation angle and white noise background
10 p1436 A72-24510

Narrow bandpass waveguide filters synthesis, using orthogonal mode cavities to realize negative coupling elements
10 p1451 A72-24591

FM measurement system with linear resistance-to-frequency converter realized in RC oscillator form, discussing design problems
10 p1482 A72-24598

Pulse width modulated regulating dc-to-dc converter with small number of transistors to improve circuit reliability
10 p1452 A72-24680

Network synthesis for various second and third order sinusoidal oscillators consisting of linear passive or active RC circuits and amplifier
10 p1452 A72-24802

Voltage-frequency converter network design and operation, presenting circuit diagram
10 p1453 A72-24817

Stabilization bandwidth reduction in microwave parallel tunnel diode amplifier circuits synthesis
10 p1453 A72-24910

Linear constant systems synthesis with structural constraints in state space form, applying to RC filter circuit
10 p1453 A72-25101

Stationary weighting pattern synthesis by linear time varying dynamic system, noting feedback system input-output mapping property
11 p1608 A72-25321

Lumped-distributed active network function sensitivity formulas in terms of immittance parameters
11 p1610 A72-25747

Switching behavior and attenuation of space division multiplex crosspoint circuit with end marking, discussing realization in thick film technology
11 p1604 A72-25908

Soviet book on radio receiver design covering military applications, bandwidth requirements, network synthesis and AM, FM, SSB, Doppler, phase metering, PCM and radar equipment
11 p1604 A72-26045

Computerized filter design, discussing frequency analysis and synthesis programs for quadrupole eigenmodes and transfer function
11 p1604 A72-26089

Matrix and graphic test construction methods for optimal design of logic networks in automatic control systems
11 p1612 A72-26443

Linear multiple section binary filters analysis and synthesis, discussing mesh functions spectra for signal measurement in automatic control systems
11 p1612 A72-26452

Electronic filters realization by error function minimization, discussing parameter space algorithmic search and complex plane optimization methods
11 p1606 A72-26550

Multipole synthesis compensating mutual coupling for orthonormalized radiation patterns in ring antenna array
11 p1598 A72-26711

Radiation pattern forming circuit with compensated mutual coupling in phased antenna arrays, noting synthesis by matched multipoles
11 p1598 A72-26712

Criterion selection and minimum margin search for optimization of complex electronic circuit parameters described by mathematical models
11 p1612 A72-26736

Polish monograph on minimal representations and identification of Boolean function symmetry in combinational logic network synthesis, using two dimensional topological model
12 p1793 A72-27224

Multivalued logical function synthesis with multistage logical network through hypercomplex representation and linear transformation
12 p1794 A72-27497

Matching two port network synthesis for prescribed damping poles and impedances
12 p1794 A72-27573

Integrated metal-nitride-oxide-silicon (M/NOS)/semiconductor storage units characteristics, design and operation in FETs
12 p1791 A72-27574

Computer aided circuit design by TRAPPATT diode model consisting of nonlinear capacitance shunted by voltage- and current-controlled switch
12 p1791 A72-27672

RC network synthesis for accurate realization of complex transmission zeros without capacitor adjustment
12 p1794 A72-27696

Dicke radiometer for 100 meter radio telescope, discussing demodulator design with dc coupling for difference signal and individual switching phases
12 p1792 A72-27807

Optimal reception system synthesized for FM signal with phase fluctuation masked by narrow band AM and white noise
13 p1914 A72-28414

Additional operator method application to nonlinear servosystems self adjusting circuits design, presenting system simulation results
13 p1935 A72-28611

Method to obtain optimal efficiency gyroamplifier circuits with short waveguide selector by prior grouping of electronic oscillators
13 p1928 A72-28799

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver
13 p1999 A72-29204

Microwave circuits for multiplexing applications, discussing optimal design in terms of economic, mechanical and electrical parameters
13 p1934 A72-30089

Graphical design technique based on Nyquist plane construction using circle criterion for nonlinear systems controller synthesis
14 p2091 A72-30375

Narrow band retuned dc pumped amplifier-filter design based on diffron, considering electron beam interaction
14 p2088 A72-30798

Two-variable resonant ladder network synthesis for prescribed amplitude response with closed-form solution, illustrating with waveguide bandstop filter
14 p2091 A72-30945

Optimal filter synthesis for linear time varying parameter control systems, using computer-aided solution of multidimensional Riccati equations
14 p2090 A72-31120

Inexpensive microwave high density channel filters to meet amplitude and phase requirements without external equalization
15 p2210 A72-31181

Distributed lumped active network configuration and design chart for realizing all-pass voltage transfer function
15 p2210 A72-31508

Active RC circuit synthesis by state model method, minimizing capacitances of admittance matrix for microelectronic circuit technology
15 p2210 A72-31595

Open circuit voltage transfer function synthesis to realize arbitrary real rational function in complex variable, using generalized positive impedance converter
15 p2211 A72-31847

Reliability-maximizing digital computer synthesis based on multiple redundant network design, discussing majority structure distribution optimization technique
15 p2203 A72-32174

Lossless low pass ladder network synthesis in terms of reflection coefficient poles and zeros with application to bandpass matching problem
15 p2212 A72-32248

Linear radio receiver circuit synthesis for output signal structure and rational selection, using reduction algorithm
15 p2202 A72-32705

Limiting approximation theorems for synthesis of linear circuits and signals in time-frequency domains 15 p2212 A72-32707

Voltage and current generalized immittance converter realization, using with current conveyor for simulation 16 p2367 A72-32856

Computer algorithms for adaptive optimal synthesis of complex electronic systems, using stochastic approximation and gradient search with data storage 16 p2367 A72-33265

German monograph on microwave broadband tunnel diode mixers theory and design, taking into account parasitic elements as part of filter networks 16 p2368 A72-33507

Circuit synthesis for random numbers probabilistic digital transducers reduced to synthesis of random binary signal converters, noting method description with Boolean functions 16 p2372 A72-34012

State space technique application to discrete linear control systems synthesis, discussing time-optimal and quadratic-cost problems, and pole assignment method 17 p2532 A72-34246

Bandpass filters set synthesis in crab eye configuration, noting design principles and telephone techniques 17 p2524 A72-34295

Advances in LSI technology. 17 p2527 A72-34569
Relationship between antenna synthesis for a given radiation pattern and the synthesis of spatial signal processing systems 17 p2515 A72-34832

Radio pulse shaping network synthesis composed of lumped elements, noting pulse duration limitation by network efficiency 17 p2533 A72-34837

An algorithm for the automatic synthesis of nearly optimal 2-level and-or combinational circuits. 17 p2533 A72-35058

Design of nonlinear networks with a prescribed small-signal behavior. 17 p2533 A72-35199

Threshold logic network synthesis with specific threshold-gate sensitivities. 17 p2533 A72-35364

Binomial electronic filter design for nonnegative impulse transient response to obtain fast rise times via in-line pole-zero configuration 18 p2672 A72-36053

Feedback controller synthesis from nonlinear system modeling by linear equations, proving theorem relating stability properties 18 p2672 A72-36060

Series stabilization reflection type tunnel diode microwave amplifier synthesis with allowance for real circulator reactance 18 p2665 A72-36107

The use of linear programming to design digital filters from impulse-response specifications. 18 p2663 A72-36304

Synthesis of networks containing three-layer rectangular distributed RC elements and nonideal operational amplifiers 18 p2673 A72-36791

Design of digital filters using state-space realization. 18 p2674 A72-36943

Linear electric circuits optimal synthesis as nonlinear programming of network parameters, discussing approximation algorithms 19 p2776 A72-37306

Computerized design of electric filters with given frequency response, discussing attenuation characteristic approximation by Chebyshev method 19 p2776 A72-37307

Electric circuits design by combined network synthesis and optimization methods, noting approximation by nonlinear programming 19 p2776 A72-37308

Matrix coefficients calculation of state variables equations for network analysis and synthesis 19 p2777 A72-37313

Equivalent circuits and oriented graphs for network analysis and synthesis of nonlinear transducers used in control systems 19 p2777 A72-37316

On the performance and design of self-oscillating dc-to-dc converters. 19 p2754 A72-37850

Design considerations in the measurement of electron temperature in the ionosphere. 19 p2801 A72-37926

Algorithm for linear multivariable systems synthesis via combined dynamic feedforward compensation and linear state variable feedback 19 p2779 A72-38232

Stationary Kalman-Bucy filter synthesis from filter coefficients and correlation matrix of filtration errors, discussing random process estimation application 19 p2782 A72-38517

Nonlinear programming in computerized electronic circuits design, discussing optimization methods and real time operation 19 p2782 A72-38578

Oscillatory circuits synthesis by wave resistance determination of homogeneous line segments for given resonant frequencies spectrum 19 p2768 A72-38660

Optimal synthesis of pulse repetition frequency control and filtering circuits of radar range finder in Gaussian approximation 20 p2902 A72-39065

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution 20 p2907 A72-39067

Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft. 20 p2887 A72-39119

[ALAA PAPER 72-880] Minimax technique for direct synthesis of Kalman-like filter under large uncertainties in a priority statistics of plant and measurement noises 20 p2907 A72-39120

[ALAA PAPER 72-878] Synthesis of passive matching two-ports with given apparent resistances. III 20 p2907 A72-39424

Transformation of reactive ladders into digital circuits. 20 p2910 A72-39427

New active all-pass network with linear group delay. 20 p2910 A72-39431

A frequency transformation chart for RC-active band-pass filters. 20 p2907 A72-39432

A high-frequency dynamic phase metering instrument for ionospheric research. 21 p3051 A72-40214

Russian book - Design principles for multiple-valued physical circuits. 21 p3027 A72-40386

Antenna radiation patterns synthesis from individual elements amplitude and phase characteristics, using method based on steepest descent technique 21 p3028 A72-40506

Synthesis of threshold-logic networks using Karnaugh-mapping techniques. 21 p3037 A72-40636

Synthesis of feedback systems with large plant ignorance for prescribed time-domain tolerances. 21 p3037 A72-40643

Frequency-sampling and transversal digital filter equalizers optimal design from specified unit impulse time response, using linear programming algorithm 21 p3033 A72-40900

Low cost design of linear pulse stretcher circuit for short duration pulse time measurement in nuclear instrumentation and computing counters 21 p3033 A72-40997

Network algebra simplification through computerized minimization of Boolean functions, describing FORTRAN IV program 21 p3038 A72-41001

Correction of diffraction errors in acoustic-surface-wave pulse-compression filters. 21 p3034 A72-41464

The mathematical synthesis and analysis of fluid logic networks. 22 p3161 A72-42049

Design equations for comb type bandpass filter formed by cascade connection of symmetrical networks containing coupled waveguides and coaxial lines 22 p3158 A72-42125

Optimal frequency-difference communications system with manipulated amplitudes 22 p3154 A72-42237

Voltage generalized-immittance converter synthesis with RC circuits for obtaining current transfer function proportional to square of s with application to filter design 22 p3140 A72-42303

Symbol synchronization advances impact on PCM bit synchronizers design, discussing symbol detection and timing extraction circuits 22 p3155 A72-42706

Reliability-maximizing digital computer synthesis based on redundant network design, discussing majority structure optimal allocation technique 22 p3157 A72-43008

Synthesis method for phase and loss optimized single-stage reflection type phase shifters, determining transformation coefficient 23 p3268 A72-43439

Computation of optimal parameter domains of components in the design of electronic circuits 23 p3268 A72-43440

Generalized numbers method for analysis and synthesis of linear circuits described by signal flow graph, noting algorithms for computer programming 23 p3269 A72-43443

Microstrip matching networks synthesis for microwave integrated circuits, calculating passband of configurations with lumped and distributed elements 23 p3269 A72-43445

Local-oscillator-circuit optimisation for minimum distortion in double-balanced modulators. 23 p3270 A72-43603

Calculation of the nonlinear dynamic regime of a two-terminal pair network with a weak nonlinearity 23 p3270 A72-43772

Digital filter realizations using a special-purpose stored-program computer. 23 p3267 A72-43815

MOS logic circuit design simplification by replacing series and parallel transistor networks by equivalent single transistor inverter circuit 23 p3271 A72-43843

Linear electronic networks analysis and synthesis via equations of variable states, noting structural features of circuits without component related degeneration 23 p3271 A72-43844

An approach for generation of second order RC-active filters. 23 p3276 A72-43863

Digital filter design using observers. 23 p3276 A72-43864

Optimal design of a class of nonlinear networks. 23 p3276 A72-43865

Synthesis of hyperstable discrete model reference adaptive systems. 23 p3276 A72-43867

RC, RL and RLC networks associated tunnel diode circuits normalized graphs, design method and stability consideration 23 p3272 A72-43988

Discrete-antenna synthesis theory in the case of uniform approximation to a given radiation pattern 23 p3266 A72-44213

Stochastic coder electronic circuit for random numbers conversion into electrical voltages and vice versa, noting compactness and low cost 23 p3273 A72-44460

Book - Electronic integrated systems design. 23 p3274 A72-44475

Book on complete technological system reliability assessment covering performance requirement and achievement, transfer characteristics, sampling, estimation, confidence, synthesis problem, etc 23 p3294 A72-44499

Linear analysis and synthesis of three dimensional interference system stationary in space and time domains 24 p3379 A72-44752

Synthesis of horn antenna with impedance boundary conditions on walls and specified aperture field distribution 24 p3384 A72-44753

A near-time-optimal control circuit with a large number of relay elements 24 p3387 A72-45699

NEUMANN PROBLEM

Laplace equation internal Dirichlet and Neumann boundary value problems solution procedure for thermal potential of steady temperature field 07 p1098 A72-18988

Poisson equation boundary value problems summary representation formulas for three layer annular sector with Dirichlet or Neumann conditions 08 p1205 A72-20963

Laplace operator eigenvalue computation for simply connected region with homogeneous Dirichlet and Neumann boundary conditions and finite difference problem 09 p1340 A72-22296

Algorithms for eigenvalue spectrum determination in Dirichlet and Neumann problems for Helmholtz equation in configuration domains 12 p1847 A72-27985

Neumann problem for eigenvalues with homogeneous boundary conditions, using R-functions for complex-type regions 13 p1987 A72-29792

Steady state temperature field and heat flux at wall for metallic coolant flow in thin walled axisymmetric pipe with nonhomogeneous Neumann boundary condition 16 p2477 A72-33413

NEURAL NETS

Neurophysiology of auditory pattern recognition of simple and complex sounds, using cats data on cochlear nerve neural mechanism 01 p0012 A72-10482

Neural tissues excitability relationship to precellular organization, considering polyphosphate distribution in vertebrate tissues 04 p0470 A72-14789

Multichannel IC spike height discriminator for separating electrical activity of neural units recorded with microelectrode 04 p0481 A72-15223

Cats cochlea and cochlear nucleus neural responses in auditory masking of low frequency tones, showing phase locked cells progressive desynchronization with intensity 04 p0475 A72-15251

- Nerve structures localized cooling device using vacuum insulated closed circuit controlled cryogenic probe with cooling range of plus/minus 20 C
04 p0481 A72-15252
- Human visual system selective adaptability to speed, size and orientation, suggesting motion analysis by visual cortex neural subsystems
06 p0761 A72-17603
- Input binary sequence transformation in chain of series connected on-off neuron models, applying to n-stage linear filter analysis
08 p1138 A72-20870
- Associative memory model using neuron synaptic weight change for storing input disturbances
08 p1138 A72-20871
- Adaptive neural nets of threshold logic units as models of perception and memory in biological systems
09 p1273 A72-23580
- Visual cortex neuronal background activity in unanesthetized rabbits under stimulation and depression of lateral geniculate body and mesencephalic reticular formation, considering synaptic organization
12 p1761 A72-27646
- Neuron networks dynamic behavior in terms of linear differential equations for membrane potential changes and neuron threshold
12 p1772 A72-27925
- Coherent brain model for evolution mechanisms of biological resonance in neuron network signal flow
13 p1908 A72-28455
- Neuronal network numerical and analytical studies, using invariant imbedding and matrix Fredholm integral equation
13 p1986 A72-29400
- Automata with behavior defined by input stimuli sequence and independent on initial state, considering neuron nets as example
15 p2203 A72-32173
- Object code storage in the static portion of a short-time memory
19 p2759 A72-37423
- Models of neurons reacting to input signal alternation in space and time
19 p2759 A72-37424
- Neuron mathematical model synthesis from algorithms to construct neural networks and single threshold element in network form
19 p2759 A72-37425
- A possible anatomical basis for descending control of impulse transmission through the dorsal horn
21 p2998 A72-40578
- Visual information space-time dependent filtering by retinal and geniculate body neural nets
22 p3142 A72-42299
- Preprocessing of nerve pulse sequences for analysis by digital computer
23 p3261 A72-44349
- NEURISTORS**
- Hybrid neuristor transmission lines with planar p-n-p semiconductor structures, discussing development, testing and electrical parameters
10 p1448 A72-24281
- Linear approximations and grapho-analytical method for neuristor line analysis, noting conditions for tunnel diode parameters
12 p1789 A72-27397
- NEUROGLIA**
- Proton irradiation effects on monkey central nervous system, showing inflammatory reaction and neuroglial astrocyte glycogen accumulation
13 p1906 A72-29833
- NEUROLOGY**
- Motoneuron pool fraction determination in human monosynaptic response of healthy and neuropathological subjects, comparing diagnostic methods
07 p0924 A72-20619
- Acceleration stress effects on splanchnic blood flow due to organ displacement and neurogenic vasoconstriction in vascular beds
12 p1765 A72-28285
- Workload modification effects on pilot neurological changes during Boeing 707 letdown, approach and landing
12 p1775 A72-28290
- Neurologic oxygen toxicity - Effects of switch of inert gas and change of pressure.
19 p2758 A72-38704
- Study of bilateral cortical nerve connections between the precentral gyrus and various cortical regions
20 p2891 A72-39323
- NEUROMUSCULAR TRANSMISSION**
- Discharge patterns in motor nerve fibers during human voluntary muscle contractions
01 p0013 A72-10624
- Human and monkey muscle tonic vibration reflex response to vibratory stimulation dependent on frequency range, electromyograph discharge interval length, etc
02 p0163 A72-12250
- Lateral geniculate body neurons activity during nystagmic eye movements in cats after vestibular stimulation related to visuo-motor mechanisms counteracting illusory shifts
03 p0315 A72-13623
- Spinal reflexes through electric stimulation of gastrocnemius and soleus human leg muscles, attributing increased tendon reflex amplitudes to gamma motoneurons hyperactivation
04 p0467 A72-14704
- Human neuromuscular coordination control optimization, discussing preprogrammed open-loop control with feedback monitoring loop
04 p0477 A72-14705
- Human arm muscle motor neuron reflex response to rectangular pulse excitation of ulnar nerve
04 p0476 A72-15587
- Marine gastropod mollusk synaptic transmission mechanism, discussing various chemical transmitters, two phase potential, receivers, electrical interaction and electrophysiological conditioning
06 p0764 A72-17996
- Phase relations between alpha waves in EEG and automated rhythmic motoric activity as function of subject behavioral activity and thalamic pacemaker zones
07 p0916 A72-19109
- Field and intracellular potentials in cat trochlear nucleus following vestibular nerve and nuclei stimulation for synaptic organization study of vestibulo-ocular reflex
07 p0923 A72-20501
- Stimulation transmission tracts, synaptic mechanisms and tonic activity of cat sympathetic ganglia
07 p0924 A72-20617
- Motoneuron pool fraction determination in human monosynaptic response of healthy and neuropathological subjects, comparing diagnostic methods
07 p0924 A72-20619
- Cat and rabbit middle ear muscles contraction by electric stimulation of motor nerves, noting sound transmission reduction
08 p1115 A72-21136
- Cat middle ear muscles motor units twitch tension and contraction time in response to motor neuron threshold stimulation
08 p1116 A72-21137
- Motor unit potential histogram study of human motoneuron activity patterns during voluntary muscular contractions
08 p1116 A72-21472
- Bulbar respiratory neuron discharge pattern response to nasal and tracheal receptor stimulation in cats, relating changes in neuronal activity and intratracheal pressure
08 p1117 A72-21473
- High pressure gas mixture breathing effects on intercostals externi muscles electrical activity and respiratory cycle time in rats
08 p1121 A72-22082
- Myocardium excitation-contraction mechanism in heart regulation, discussing surface membrane structure and cell action potential
09 p1264 A72-22222
- Laryngeal motoneuron activity during Hering-Breuer reflexes, noting inspiratory fibers firing inhibition and activation during lung inflation
09 p1266 A72-22975
- Functional organization of monkey cortical efferent zones in distal forelimb muscle control from intracortical microstimulation studies, showing stimulation thresholds distribution
09 p1267 A72-23582
- Peripheral afferent input to monkey cortical efferent zones of distal forelimb muscle control, using single microelectrode for intracranial stimulation and cellular discharge recording
09 p1267 A72-23583
- Human motoneuron discharge time relations during isometric muscle contraction, measuring adjacent action potential and mean interspike intervals
12 p1761 A72-27653
- Neuronal mechanisms of muscular motor activity control, analyzing cerebrum-motoneuron connections, spinal potentials, monosynaptic responses and depolarization
13 p1907 A72-29981
- Description of an easy and simplified test for electromyographic diagnosis of latent spasmophilia in flight personnel
19 p2760 A72-37878
- Propriospinal ducts of the lateral funiculus and their possible role in transmission of pyramidal stimuli
21 p2999 A72-40583
- Synaptic suprasegmental control mechanisms of spinal cord motor neurons
21 p2999 A72-40584
- Study of the conductivity of the motor neuron membrane during supraspinal stimulation
21 p2999 A72-40585
- Synaptic potentials of sensor and motor neurons of trigeminal nuclei during corticofugal stimulation
21 p2999 A72-40587
- Influence of a preceding afferent stimulation on the pyramidal activation of spinal motor neurons
21 p2999 A72-40588
- Role of pyramidal and extrapyramidal components of cortically-induced efferent stimuli in the mechanism of cortical motor activity coordination
21 p2999 A72-40591
- Synchronization in the work of motor neurons during arbitrary motor activity of various types
21 p2999 A72-40595
- Role of efferent influences of temporo-rhino-encephalic cerebral structures in pre-adjustment alterations of spinal motor neuron excitability
21 p2999 A72-40596
- Cortical metabolism regulation and effector systems of the adaptation process
21 p3000 A72-40760
- Computation of the shape and velocity of a nerve pulse
22 p3149 A72-42156
- Tactile information transmission for orientation and motor control, discussing somatic sensitivity peripheral mechanism
22 p3146 A72-42778
- Functional insufficiency of the neuromuscular system caused by weightlessness and hypokinesia.
23 p3253 A72-43387
- NEURON TRANSMISSION**
- U BIOELECTRICITY**
- NEURONS**
- Postsynaptic electric potential responses to click of auditory cortex neurons in cats
02 p0158 A72-11757
- Visual cortex neuron responses to light flashes under hypothalamic and reticular electric stimulation in rats
02 p0158 A72-11758
- Neurosecretory cell functional activity of supraoptic and paraventricular hypothalamic nuclei in rats after electrical stimulation of midbrain reticular formation
02 p0158 A72-11759
- Synaptic mechanisms of vestibulospinal and reticulospinal effect on transmission to lumbar motoneurons in monkeys
02 p0158 A72-11760
- Noceptive chemical action in cat skin vessels, showing fiber types for impulse transmission
02 p0164 A72-12511
- Cerebral neurons population electric stimulation effect on deep sleep duration in Parkinsonism patients
04 p0476 A72-15585
- Electrophysiology for auditory temporal masking mechanism study of cat cochlear nucleus and inferior colliculus single neurons
05 p0620 A72-17175
- Marine gastropod mollusk synaptic transmission mechanism, discussing various chemical transmitters, two phase potential, receivers, electrical interaction and electrophysiological conditioning
06 p0764 A72-17996
- Psycho-physical theory of human mind, discussing molecular biological processes of neuron recording in terms of quantum mechanics
06 p0769 A72-18191
- Neuronal systems short-latency paired interactions detection method, obtaining histogram for action potentials
07 p0934 A72-20624
- Hypothalamic single neuron unit discharge pattern response to acoustic, light and somatosensory stimulation in cats
08 p1116 A72-21471
- Motor unit potential histogram study of human motoneuron activity patterns during voluntary muscular contractions
08 p1116 A72-21472
- Neurophysiological mechanisms responsible for conditioned reflexes, considering cells, reaction relationship to animal behavior, neuronal stimuli interactions, internal inhibitions and trace process reproduction
08 p1118 A72-21835
- Hippocampus neuron reactions and memory function realization with incoming information and stored imprints comparison by brain
08 p1122 A72-22191
- Protein biosynthesis inhibitors retardation of noradrenaline and serotonin induced hyperpolarization of neuron membranes in cortical sensorimotor region of rabbits
08 p1122 A72-22192
- Photically induced and spontaneously discharged neuron impulse propagation through direct pathways from superior colliculus to dorsal and ventral lateral geniculate nuclei in cats
09 p1265 A72-22863
- Single lateral geniculate neuron recording during receptive field-centered flashing spot variations for intensity response function comparison with optic neurons in cats
10 p1427 A72-25177
- Cortico-subcortical connections transection effect on cat lateral geniculate body and visual cortex neurons spontaneous activity
12 p1761 A72-27652
- Human motoneuron discharge time relations during isometric muscle contraction, measuring adjacent action potential and mean interspike intervals
12 p1761 A72-27653

Illumination code efficiency in impulse activity of neurons of outer geniculate body of cat visual system, emphasizing pulse per group technique

13 p1903 A72-28780

Visual cortex neuron reactions to antidromic stimulation of cat pyramidal tract, noting axon activation increased discrimination in analysis

13 p1903 A72-28781

Neuronal mechanisms of muscular motor activity control, analyzing cerebrum-motoneuron connections, spinal potentials, monosynaptic responses and depolarization

13 p1907 A72-29981

Human spinal segment functional state before voluntary movement during water immersion, using H-reflex for spinal cord motoneuron excitability evaluation

14 p2073 A72-30255

Organ cell lysosomes polymorphic properties and formation by Golgi complex, discussing role in neurocyte structure restitution following gamma irradiation

14 p2075 A72-30594

Cat bulbar respiratory neuron discharge modification by single electric shock stimulation of cerebral cortex

14 p2077 A72-30843

Sperry neuronal specificity hypothesis for nerve cell connections formation between eye and brain during embryonic development, proposing systems matching theory

17 p2504 A72-35070

Nuclein acid contents in cholinergic and adrenergic spinal cord neurons and in their glial satellite-cells during hypoxic hypoxia and a post-hypoxia period

19 p2756 A72-37742

Influence of cooling of the sensorimotor region of the cerebral cortex on the neurons of the mesencephalic reticular formation

20 p2890 A72-38926

RNA content in the cortex neurons in connection with the change in its function during the emergence of an animal from hypothermia

20 p2890 A72-38928

Device for eliminating the artifact of electrical stimulation when recording evoked pulse activity of neurons

20 p2893 A72-38938

Neuronal fiber and synaptic axonal contact structure of cat spinal gray matter in corticospinal, rubrospinal and reticulospinal terminal zones by Golgi method

21 p2998 A72-40579

Morphological changes in spinal cord neurons of animals due to the decreased intensity of supraspinal stimulation

21 p2998 A72-40580

The ultrastructure of the lateral basilar region of the spinal cord.

21 p2998 A72-40581

Neuronal organization of descending systems of the spinal cord

21 p2998 A72-40582

Intracellular study of rubrospinal neurons and of their synaptic activation during the stimulation of the sensorimotor cortical region

21 p2998 A72-40586

Synaptic potentials of sensor and motor neurons of trigeminal nuclei during corticofugal stimulation

21 p2999 A72-40587

Patterns of spontaneous and reflexly-induced activity in phrenic and intercostal motoneurons.

21 p3003 A72-41462

Electromyographic investigation of diaphragm cross contraction following spinal cord section in cats, noting diaphragm motoneurons excitation by breathing center pulses

22 p3142 A72-42281

Reactions of auditory cortex neurons to geniculocortical fiber stimulation

22 p3145 A72-42723

Dependence of inhibitory areas of inferior colliculus neurons on the time characteristics of acoustic stimuli

22 p3145 A72-42724

Effect of a polarizing current on the activity of neurons of the respiratory center

22 p3145 A72-42725

Changes in the impulse activity of cortical neurons during selective reinforcement of a chosen range of their interspike intervals

23 p3257 A72-44087

Synaptic events during specific and nonspecific inhibition of visual cortex neurons

23 p3257 A72-44088

Neuronal and focal reactions of the parietal associative cortex to various peripheral stimuli

23 p3257 A72-44089

Responses of anterior suprasylvian gyrus neurons to peripheral stimuli of different modalities

23 p3257 A72-44090

Post-synaptic potentials of motor neurons of the facial nerve nucleus evoked by afferent and corticofugal pulse stimulation

23 p3257 A72-44091

Classification of neurons in the lumbosacral section of the spinal cord according to their discharge during evoked locomotion

23 p3257 A72-44092

Elaboration of steady changes in the firing rate of cortical neuron populations

24 p3370 A72-44587

Cat hypothalamus regions neurons background activity characterized by single nonrhythmic spikes with large interspike intervals, noting frequency of discharge bursts

24 p3370 A72-44588

Pulse activity of neurons in the thermal regulation center of the anterior hypothalamus during chill shivering

24 p3371 A72-44594

First-breath response of medullary inspiratory neurons to the mechanical loading of inspiration.

24 p3372 A72-44595

Temperature-sensitive neurons in the brain stem - Their responses to brain temperature at different ambient temperatures.

24 p3373 A72-45232

NEUROPHYSIOLOGY

Soviet book on physiology of conditioned reflexes covering brain and nervous system, tonic reflexes, functional models, inhibition localization, etc

01 p0011 A72-10295

Psychology of visual form perception in relation to neurophysiological principles of lateral interaction and organization, considering retinal images, aftereffects, binocular vision, etc

01 p0011 A72-10469

Neuronal mechanisms of binocular vision and space perception from tests on cats and men, discussing neurophysiological models of stereopsis

01 p0012 A72-10479

Neurophysiology of auditory pattern recognition of simple and complex sounds, using cats data on cochlear nerve neural mechanism

01 p0012 A72-10482

Split human cerebrum physiology, discussing corpus callosum as interhemispheric nervous process transfer, and right and left hemispheres functional differentiation and asymmetry

02 p0157 A72-11544

Retinal annulus onset and offset thresholds, discussing neural signals delay characteristics

02 p0164 A72-12488

Differential neurophysiological and psychological effects of subanesthetic concentrations of cyclopropane, diethyl ether, methoxyflurane and ethrane in conscious man

04 p0480 A72-15220

Neuroelectric signal recognition system with computerized compensation for variations due to small random changes, slow trends and interference potentials

04 p0481 A72-15253

Ecdysone hormonal control of *Drosophila* circadian rhythms and synchronizing mechanisms, discussing light stimulation and neurohormone secretion

07 p0919 A72-19537

Thalamus functional and organizational anatomy studies from improved neurophysiological research methods, emphasizing cytoarchitectural differentiation functional significance

07 p0922 A72-20274

Comparative EEG characteristics of frontal and occipital human brain cortex, relating psychophysiological and neurophysiological factors

08 p1116 A72-21196

Soviet papers on human higher nervous activity physiology covering conditioned reflexes and adaptive behavior, neurotropic substance effects, mathematical and structural modeling, etc

08 p1118 A72-21834

Neurophysiological mechanisms responsible for conditioned reflexes, considering cells, reaction relationship to animal behavior, neuronal stimuli interactions, internal inhibitions and trace process reproduction

08 p1118 A72-21835

Brain structures role in fixation of temporal relationships in information memory function of central nervous system

08 p1118 A72-21836

Conditioned reflex mechanisms responsible for regulation of emotions in higher order animal and human neurophysiology

08 p1118 A72-21837

Physiology of sleep phases and dreams, discussing data on highly organized and interacting neurohumoral mechanisms exhibiting alternating forms of brain bioelectric activity

08 p1118 A72-21838

Human nervous system properties responsible for individual behavioral differences, discussing methodological problems in future research from biological criteria viewpoint

08 p1118 A72-21839

Soviet book on psychic phenomena and brain, covering cybernetics, dialectical materialist implications, consciousness, psychophysiology and cerebral neurodynamic structures

08 p1121 A72-22164

Electrophysiological, neurophysiological, metabolic, vegetative, psychological, chemical and pathological aspects of sleep, noting disturbance and wakefulness mechanisms for various clinical disorders

09 p1264 A72-22223

Neurophysiological mechanisms of sleep, studying sleep and wakefulness state evoked potentials relation to cortex and subcortical activity levels

09 p1264 A72-22224

German monograph on Ranvier node steady state I-V characteristics transition range and control by altered external solutions and morphological effects on nerve fiber

09 p1264 A72-22336

Antimotion sickness drugs effectiveness based on acetylcholine or norepinephrine induced changes of balance between vestibular and reticular neurons

10 p1427 A72-23726

Neural effects on human visual resolution of horizontal and vertical gratings resulting from early abnormal visual inputs due to astigmatism

10 p1430 A72-24348

Russian book on visual sensor signal dynamics covering nerve signal transformation, light stimuli responses, afferent flow, bionics, neurocybernetics and communication theory

11 p1584 A72-26049

Intraelectroretinographic analysis of light signal spatial summation at different retinal nerve levels in frogs

11 p1585 A72-26454

Effects of long periods of clinical death from drowning or lethal blood loss on higher nervous activity in reanimated dogs

13 p1902 A72-28642

Functional organization and neurophysiological mechanisms of return corticothalamic system in anesthetized cats, showing axon terminal presynaptic depolarization

13 p1902 A72-28762

Pancreas insular apparatus biosynthesis of neurohumoral mechanism compounds stimulating coronary ectasia hormones discharge from brain into blood in cats with alloxan diabetes

14 p2077 A72-30973

Slow neural recovery processes during sleep, characterizing cerebral neurons synchronized and desynchronized sleep phases for mammals

16 p2355 A72-33557

Evidence for the role of the transient neural 'off-response' in perception of light decrement - A psychophysical test derived from neuronal data in the cat.

17 p2500 A72-34884

New experimental data on the morpho-physiological analysis of the adaptation phenomenon in the somatic reflex arch

17 p2504 A72-35023

Bioelectric activity of the medulla oblongata during hypothermia and bloodletting

17 p2504 A72-35024

Neuroinhibition in the regulation of emesis.

18 p2650 A72-36449

Operative memory mechanism as visual system neuron chain storage of stimuli from image recognition time measurements

20 p2891 A72-38936

General principles and detail similarities in visual pattern analysis by single neuron operation, computer programs and psychological perception

20 p2891 A72-39275

Negative /painful/ stimulus cessation relation to emotionally positive zone activation in rat brain during self stimulation experiments

20 p2892 A72-39410

Anatomy, pathology, etiology, diagnosis and therapy of posterior tibial nerve compression lesion, discussing tarsal tunnel syndrome

21 p3005 A72-40396

Russian book - Neurophysiological background of tactile perception.

21 p2998 A72-40464

Russian book - Mechanisms of descending control of spinal cord activities.

21 p2998 A72-40577

Morphological changes in spinal cord neurons of animals due to the decreased intensity of supraspinal stimulation

21 p2998 A72-40580

Neuronal organization of descending systems of the spinal cord

21 p2998 A72-40582

Cerebrum sections and related afferent processes as activator of automatic neuron mechanism control of motor activity, discussing segmentary spinal cord changes

21 p2999 A72-40593

Russian book - Cortico-visceral interrelations in physiology, biology and medicine.

21 p3000 A72-40752

Role of afferent and efferent connections in the formation and reproduction of trace processes in man
21 p3001 A72-40807

Critique of Pavlov conditioned reflex role in higher nervous activity and association principle role in psychic activity
21 p3001 A72-40811

Effect of neurohomologous phospholipids associated with other substances on experimental intoxication by asymmetrical dimethylhydrazine. II - Biochemical aspects of the pyridoxine-phospholipid association
21 p3009 A72-41195

The effect of size, retinal locus, and orientation on the visibility of a single afterimage.
21 p3003 A72-41253

Analysis of the activity evoked in the cerebellar cortex by stimulation of the visual pathways.
21 p3003 A72-41460

Effect of vibration on the permeability of the blood-brain barrier
22 p3149 A72-42070

Neurophysiological mechanisms of the extinction of the orientating reflex
22 p3142 A72-42280

Ocular and induced visual effects of systemic and topical drugs in terms of eye neuroanatomy and pharmacology, stressing glaucoma therapy
22 p3150 A72-42499

Subjective and objective sensory physiology, discussing transformation processes in sensory receptors and nerves, psychophysical scaling methods, chemoreceptors and peripheral adaptation
22 p3146 A72-42777

Temperature sensitivity neurophysiological mechanism, discussing cold and heat sensitive receptors localized distribution in human skin and thermoregulatory function
22 p3146 A72-42779

Pain perception anatomical and neurophysiological mechanism, discussing human response to mechanical, thermal and chemical pain inducing stimuli
22 p3146 A72-42780

Olfactory perception neurophysiological mechanism, discussing receptor cells sensory thresholds and time, temperature and humidity effects
22 p3146 A72-42782

Taste organs neurophysiological structure and function, considering stimuli and excitation parameters effects on perception threshold
22 p3146 A72-42783

Cerebral auditory system acoustic information processing, discussing ganglia and cochlea neurophysiological functions in response to afferent stimulations
22 p3146 A72-42786

Human vocal apparatus anatomical and neural structure, considering linguistic sounds composition
22 p3147 A72-42789

Limbico-neocortical, cardiovascular and hormonal system vegetative shifts associated with emotional behavior response, presenting neurogenic stress model for animals
22 p3148 A72-43166

Nervous mechanisms of the acoustic stress reaction
22 p3148 A72-43169

Nervous-emotional stress as a problem of modern work physiology
22 p3148 A72-43170

Preprocessing of nerve pulse sequences for analysis by digital computer
23 p3261 A72-44349

Influence of the sympathetic nervous system on the presynaptic inhibition of the dorsal surface potential of the spinal cord
24 p3370 A72-44589

Influence of the nervous system and its mediators on the spontaneous contractile activity of a smooth muscle
24 p3370 A72-44590

NEUROSCIENCE
U NEUROLOGY
NEUROSES
Extraversion, neuroticism, and color preferences.
18 p2653 A72-36903

NEUROTROPISM
Acute hypercapnia neurotropic effect in rabbits, describing carbon dioxide inhalation period, preanesthetic and narcotic stages and recovery phase
02 p0160 A72-12015

Central nervous system pharmacology, discussing somniferous, narcotic and neurotropic substances effects on brain activity
08 p1127 A72-21841

NEUTRAL BEAMS
NT MOLECULAR BEAMS
NT NEUTRON BEAMS
Neutral Cr beam excited states radiative lifetime measurement by beam foil method
03 p0390 A72-13016

NEUTRAL PARTICLES
NT FAST NEUTRONS
NT NEUTRONS
NT THERMAL NEUTRONS

Plasma ion temperature and neutral collision frequency determination by Langmuir probes [AD-739452]
02 p0264 A72-12262

Weakly ionized turbulent gas flow in pipe, comparing neutral and plasma fluctuations with laser beam scintillations
04 p0558 A72-15331

Ionospheric neutral composition variations as function of height, local time and solar activity
05 p0656 A72-16235

Neutral atoms pressure distribution along capillary and pressure compensating channel during discharge in argon ion laser
05 p0670 A72-16990

Internal neutral sheet in geomagnetic tail from Explorer 34 magnetic field experiment, noting quasi-periodic structure and magnetic loop formation
06 p0803 A72-17450

Combustion product plasma electrical conductivity dependence on neutral component density fluctuation
07 p1044 A72-19888

Planetary scale circulation systems effects on photochemistry and transport processes of minor neutral constituents in mesosphere and lower thermosphere
09 p1274 A72-22353

Model calculation for seasonal effects on minor neutral constituents distribution in mesosphere and lower thermosphere, suggesting large scale meridional circulation role
09 p1274 A72-22354

Meteor method for determining errors in rate measurement of electron attachment to neutral air particles based on nonexistent recombination, turbulent diffusion and photodetachment
09 p1383 A72-22503

Nighttime radar method of meteor radio echo observation to determine electron attachment rate to neutral air particles
09 p1383 A72-22504

Frictioned force modification of lower thermosphere vertical neutral gas velocities with resulting atomic oxygen and molecular nitrogen density-height distribution deviation from barometric law
09 p1298 A72-22582

Effective photoionization sections of neutral atoms, discussing photon energy effects, subshell periodicity and continuum functions phase shift
09 p1356 A72-22828

Target jet density variations effect on vacuum in neutral atom beam ionization region of fast neutral particle magnetic trap
09 p1363 A72-23223

Charged to neutral particle transformation capacity of wide aperture recharge target formed by supersonic gas jets in magnetic trap with annular nozzle
09 p1363 A72-23224

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges
10 p1521 A72-24355

Ionization movement of charged and neutral particles in F 2 region coupled to air movement by collision drag forces
11 p1621 A72-25839

Neutral gases density and flux distribution in lunar atmosphere, using kinetic theory of gases
11 p1722 A72-26394

Atmospheric neutral density measurement near 400 km during daytime by microphone density gage on OGO 6
11 p1625 A72-26407

Atmospheric temperature measurement by neutral particle wake method, using satellite-borne mass spectrometer
11 p1634 A72-26408

Electron temperature determination from rate of ionization due to collisions between electrons and neutral particles in plasma
11 p1697 A72-26586

Neutral gas velocity distribution, transverse drift velocity, particle and energy densities in column under free fall conditions, considering wastage by ionization processes
11 p1698 A72-26645

Neutral atoms pressure distribution along capillary and pressure compensating channel during discharge in argon ion laser
12 p1819 A72-27133

Upper atmosphere neutral particle pressure, temperature and density profiles during 7 March 1970 solar eclipse from pitot tube soundings
12 p1800 A72-27144

Neutral upper ionosphere temperature measurement with manometer device onboard Cosmos 320 satellite, noting equatorial fluctuations at 250 km
13 p1955 A72-28586

Wind profiles, turbulence, and temperature and density distribution of neutral upper atmosphere obtained via sounding with Skylark rockets carrying chemical seeding payloads
15 p2223 A72-31435

Satellite instrument to observe atmospheric composition by energy analysis of incoming gas stream,

using velocity mass spectrometer for neutral particles measurement
15 p2236 A72-31966

Mesospheric and lower thermospheric composition from neutral atmospheric particles measurement by rocket-borne instrument consisting of RF quadrupole mass spectrometer
15 p2228 A72-31967

Atmospheric stratification, wind profiles and vertical density distribution of ions and neutral particles determined by rocket sounding
15 p2228 A72-31968

Solar flare and neutral sheet simulation by investigating behavior of plasma current through magnetic neutral point created by capacitor discharges
15 p2301 A72-32342

Neutral atom concentration measurement in Cs ion beam, using high sensitivity detection gage to obtain emission indicatrices
16 p2434 A72-32862

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges
17 p2589 A72-34955

Combustion product plasma electrical conductivity dependence on neutral component density fluctuation
17 p2590 A72-35136

Hot rarefied neutral gas existence in interstellar space on basis of data collected in 21 cm hydrogen line
19 p2865 A72-38480

IR emission of nitrogen layer heated by reflected shock wave, noting absorption cross sections under free-free electron transitions in neutral particle fields
19 p2835 A72-38776

Free fall column theory allowing for 'neutral gas reduction' by ionization processes, and application of this theory to noble gas ion lasers
21 p3090 A72-40488

Bond energy electrostatic potential calculation and equilibrium and rate constants prediction for alkali and halide ions association with neutrals
21 p3087 A72-40556

Frictional effects with neutrals and the gravitational instability of a plasma.
21 p3093 A72-41332

Elastic electron-neutral interaction in argon in the vicinity of the Ramsauer minimum
22 p3211 A72-42642

Physical and chemical properties and stratification of neutral matter in comet atmospheres, discussing neutral gas dynamics and surface brightness distribution in comet images
23 p3335 A72-43299

Metal ions effect on sporadic E layer formation, noting magnesium ions profile redistribution by vertical gradient in neutral particles wind
23 p3284 A72-43376

Study of the angular distribution of charged and neutral pions during inelastic interactions in the energy region above 1 TeV
23 p3291 A72-44443

Relationship between the energies of charged and neutral particles generated in the energy region above 100 GeV
23 p3332 A72-44447

Electromagnetic instabilities produced by neutral-particle ionization in interplanetary space.
23 p3332 A72-44506

Interaction of the solar wind with the neutral component of the interstellar gas.
23 p3332 A72-44507

Neutral upper ionosphere temperature measurement with manometer device onboard Cosmos 320 satellite, noting equatorial fluctuations at 250 km
24 p3402 A72-45086

Steady-state distribution of the charged and neutral particle concentration in a bounded high-temperature turbulent plasma
24 p3429 A72-45493

Charged and neutral cosmic rays radioactive isotope and momentum distribution measuring techniques in high energy particle astronomy observatories /HEAO/
24 p3404 A72-45540

Theoretical models of the D-region.
24 p3399 A72-45580

The development of a theoretical model of the atmosphere and the ionosphere.
24 p3399 A72-45585

NEUTRALIZERS
Hollow cathode neutralizer for electron bombardment ion thruster, discussing performance from SERT II flight
05 p0706 A72-16853

[AIAA PAPER 72-207]
Rectifier tube cathode as colloid thruster electron gun type neutralizer, discussing efficiency and accelerated life tests
11 p1711 A72-26228

[AIAA PAPER 72-511]
Hg flow and hollow cathode temperature effects on ion thruster neutralizer stability and lifetime capability, using bell jar tests
13 p2026 A72-28937

[AIAA PAPER 72-422]
Theory of the dynamic vibration neutralizer with motion-limiting stops.
17 p2625 A72-34317

[ASME PAPER 71-APMW-14]

NEUTRINOS

- Neutrino flux from solar models differing in opacity, equations of state and nuclear cross section factors
01 p0122 A72-11146
- Spectroscopic He abundance in population II stars from viewpoint of big-bang cosmology, taking into account neutrino emission according to photon-neutrino coupling theory
02 p0281 A72-12303
- Solar model for capture rate in C1 37 neutrino experiment, comparing different stellar evolution programs
04 p0566 A72-14562
- Neutrino emission process effects on solar C-N-O cycle energy generation and C12/C13 abundance ratio
04 p0567 A72-14911
- Neutron star evolution theories, emphasizing neutrino emission processes and stellar collapse
07 p1080 A72-20056
- Neutrino interactions in lepton era of universe and hot big bang cosmology according to proton-neutrino coupling theory
07 p1084 A72-20538
- Stellar evolution from precarbon-burning contraction to presupernova stage with and without neutrino production by electron neutrino interaction
10 p1545 A72-24825
- Closed rotating cosmologies containing matter described by the kinetic theory - Entropy production in the collision time approximation.
17 p2618 A72-35823
- Ion-ion correlation effects on electron-nucleus neutrino bremsstrahlung.
18 p2723 A72-36089
- Experimental nuclear physics and theoretical solar structure and evolution explanations of disagreement between calculated and observed solar neutrino flux
18 p2722 A72-37007
- Variation of evolved blue/red ratio for supergiants as function of stellar mass, discussing status of astrophysical test for neutrino emission
19 p2854 A72-37235
- Unsteady hydrodynamic accretion on a neutron star
19 p2862 A72-38053
- Stellar energy-loss rates in a convergent theory of weak and electromagnetic interactions.
20 p2972 A72-39868
- An upper limit on the neutrino rest mass.
21 p3088 A72-40830
- Approximation of energy generation and nucleosynthesis during hydrostatic carbon burning in massive stars, noting neutrino-dominated evolution effects
22 p3228 A72-42562
- Solar neutrino flux dependence on gravitational effects, discussing Brans-Dicke gravitation theory and general relativity equations
22 p3229 A72-42957
- Solar neutrino and dilaton theory of non-Newtonian gravity.
23 p3329 A72-44315
- On the physical nature of cosmic neutrino absorption. I - Cosmological models with continuous creation. II - Cosmological models without continuous creation.
24 p3439 A72-44974
- Gamma-neutrino angular correlations in muon capture.
24 p3427 A72-45774
- NEUTRON ABSORBERS**
High neutron absorption doping material selection for enhancing explosive mixtures neutron radiographic image without interference with chemical reaction
08 p1220 A72-20769
- NEUTRON ACTIVATION ANALYSIS**
